Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

Chemical and Biochemical Engineering, M.S.

Graduate students in the Department of Chemical and Biochemical Engineering gain an understanding of the principles of engineering science and use those principles in contemporary applications related to energy, the environment, biotechnology, and materials. The department emphasizes research, since most opportunities for graduates are in research and development.

Research and Study Areas

Current research strengths of the Department of Chemical and Biochemical Engineering are in the areas of global and regional atmospheric modeling, biomaterials and medical engineering, cellular engineering, photopolymerization, biocatalysis, and biofuels.

Biochemical Engineering

Biochemical engineering involves the industrial application of enzymes, microorganisms, cells, and tissues for production of chemicals, pharmaceuticals, and other materials of commercial value.

The department is working to solve problems with the use of insect cell culture for recombinant protein and viral insecticide production. Research is being conducted to improve the quality and quantity of recombinant proteins produced in large-scale bioreactors. In addition, a continuous viral insecticide production system is being developed for the large-scale production of these environmentally safe alternatives to chemical insecticides. The insect cell/baculovirus system is being used as a model system to investigate the role of oxidative stress in viral cytotoxicity.

Carbon dioxide accumulation, which commonly occurs in large-scale bioreactor systems, affects insect cell growth. The department's researchers are investigating the corresponding effect on insect cell growth and the baculovirus infection process.

Work is under way on cellular recognition and signaling processing during infection and inflammation. Knowledge gained from these studies aids the design of drugs and biological sensors for bacterial presence.

The integration of biotechnology with traditional chemical engineering has led to an interdisciplinary area involving other engineering departments and the Departments of Chemistry and Biology (College of Liberal Arts and Sciences); the Department of Biochemistry, the Free Radical and Radiation Biology Program, and the Department of Microbiology and Immunology (Carver College of Medicine); and the College of Pharmacy. This focus includes involvement in the University's Center for Biocatalysis and Bioprocessing, whose fermentation capabilities are highlighted by its 1,500-liter fermentor.

Biomedical Research

The department's research involves a multidisciplinary approach to solving problems in the medical field, particularly in drug delivery and biomaterials.

Researchers are working to develop safe delivery systems that target drugs precisely in the human body and avoid premature metabolism or elimination. To treat respiratory infections, micron-sized particles are being engineered with properties that enhance aerodynamic performance, particle

stability, and targeting within the respiratory tract. Polymeric vehicles are being designed to provide sustained protection and prevention against cancers by kick-starting the immune system. Finally, work is under way to overcome barriers to efficient delivery of DNA, with the potential to provide cures for genetic disorders such as cystic fibrosis and X-Linked Severe Combined Immunodeficiency (X-SCID). This work brings together collaborators from the Carver College of Medicine, the Colleges of Dentistry and Pharmacy, the Department of Chemistry, and the Roy J. Carver Department of Biomedical Engineering.

In the biomaterials realm, new materials are being developed that can interact with the human body to perform certain functions while maintaining compatibility. A project with the Department of Ophthalmology and Visual Sciences involves development of biodegradable stent materials to alleviate a serious eye disease induced by a blood clot in the central retinal vein. Research with the Department of Otolaryngology—Head and Neck Surgery is exploring the development of photo-patterned surfaces for directed growth of cells to improve cochlear implants. Current research in the tissue engineering field applies microfabrication techniques to develop scaffolds that are biodegradable and biocompatible with cell-interactive properties, and that directly incorporate controlled-release functionality within the scaffold.

The department also conducts research that is focused on self-assembling systems, rational design of novel drug and gene delivery systems, and development of sophisticated scaffolds for tissue-specific regeneration. In tissue engineering, microfabrication techniques are applied to novel biomaterials to provide spatial control over tissue formation and to integrate minimally invasive scaffold delivery strategies. In drug and gene delivery, researchers are exploring the synergistic application of degradable particle technology, CpG oligonucleotides, and heat-shock protein therapy for generating sustained, stronger immune responses against carcinomas.

Students involved in animal research have access to the University's Office of Animal Resources, which is adjacent to University of Iowa Hospitals & Clinics.

Energy and Environment

Chemical engineers are well suited to make major contributions toward meeting challenges for the environment, energy, and sustainable development. The Department of Chemical and Biochemical Engineering has an active research program in the environmental areas of air pollution, biofuels, atmospheric chemistry, atmospheric CO₂ fluxes, environmental change, bioremediation, and the design of new environmentally compatible technologies. Particular emphasis is placed on the chemistry and physics of local, regional, and global air-pollution problems. Research in support of this activity includes high-speed computing and detailed sensitivity analysis.

This work involves three centers and institutes on campus. The Center for Global and Regional Environmental Research brings together University scientists and scholars from more than 20 disciplines, including chemistry, civil and environmental engineering, geography, geology, law, and medicine. The center's chief area of concern is environmental change. Chemical and biochemical engineering researchers interact with scientists at IIHR—Hydroscience & Engineering, a research institute focusing on applied fluid mechanics; their collaborations involve environmental fluid mechanics and air pollution field studies. The Nanoscience and Nanotechnology Institute provides an interdisciplinary home for chemical

and biochemical researchers working on the development, application, and environmental and health effects of nanomaterials.

Photopolymerization

Photopolymerizations are chain reactions in which a liquid monomer is converted to a solid, durable polymer in a process triggered by light of the appropriate wavelength. The use of light, rather than heat, to drive a polymerization reaction offers advantages in developing new processes or products.

Photopolymerizations provide both spatial control and temporal control of reactions, since light can be directed to locations of interest in the system and is easily shuttered on or off. Photopolymerizations also provide solvent-free formulations, which reduce the emissions of volatile organic pollutants, and they exhibit extremely rapid reaction rates. These advantages have led to tremendous growth in the application of photopolymerizations in the private sector, but much of this growth has occurred without a fundamental understanding of the underlying chemical processes.

The department's research in this area focuses on comprehensive characterization of the kinetics, mechanisms, structure, and properties of photopolymerizations. Work includes the following types of studies: characterization of the photochemical processes by which polymerizations may be initiated; kinetic characterization of cationic photopolymerization; development of methods for photopolymerization of thick polymers and composites; development of photopolymerization systems based upon agricultural feedstocks; new methods for monitoring high-speed photopolymerization reactions; nanostructured materials through photopolymerization; biomedical devices formed by photopolymerization; and influence of order on photopolymerization reactions.

Chemical and biochemical engineering researchers are members of the Photopolymerization Center, an industry/university cooperative center on fundamentals and applications of photopolymerization. The center brings together experts from the University of Iowa, the University of Colorado, and member companies such as 3M, DSM, and Boeing. In addition, interdisciplinary collaborations are fostered on campus through the Iowa Center for Research, Exploration, and Advanced Technology in Engineering and Sciences (Iowa CREATES) and Materials Analysis, Testing and Fabrication (MATFab) in the Iowa Advanced Technology Laboratories.

Requirements

The Master of Science program in chemical and biochemical engineering requires a minimum of 30 s.h. of graduate credit, with or without thesis. Students must earn at least 24 s.h. in approved graduate-level coursework; courses numbered below 3000 do not count toward this requirement. Thesis students earn 6 s.h. in CBE:5999 M.S. Thesis Research: Chemical and Biochemical Engineering. Nonthesis students earn 6 s.h. in additional approved coursework. Students must maintain a cumulative g.p.a. of at least 3.00.

Students who receive assistantships, fellowships, or other awarded financial support are expected to pursue an advanced degree with thesis; they may not elect the nonthesis option.

All students select one course in transport phenomena, reaction engineering, proposal writing, thermodynamics, and

data science; they must earn a cumulative g.p.a. higher than 3.25 in those courses.

Code	Title	Hours
Transport Phenomena		
CBE:5115	Transport Phenomena I	3
Alternate courses approved on a case-by-case basis, and may include:		
BME:5430	Biotransport	3
ME:5143	Computational Fluid and Thermal Engineering	3
Another course with consent of advisor		
Chemical Thermodynamics		
CBE:5110	Intermediate Thermodynamics	3
Alternate courses approved on a case-by-case basis, and may include:		
A 5000-level thermal physics course		
Another course with consent of advisor		
Chemical Reaction Kinetics		
One of these plus corresponding undergraduate chemical reaction engineering:		
CBE:3205	Introduction to Biochemical Engineering	3
CBE:5315	Polymer Chemistry	3
CBE:5425	Atmospheric Chemistry and Physics	3
Technical Communication		
One of these:		
CBE:5104	Introduction to Literature Review and Technical Writing (for M.S. nonthesis students)	3
CBE:5105	Introduction to Literature Review and Proposal Writing (for M.S. thesis and Ph.D. students)	3
Data Science		
CBE:5120	Data Science in Chemical and Engineering Systems	3

All M.S. thesis students are required to take ENGR:7270 Engineering Ethics (1 s.h.) during their first semester. Thesis students also must pass a final M.S. examination.

Students in the nonthesis program may petition for entry into the thesis program or the Ph.D. program by requesting a change of status through the Graduate College. The request is reviewed by the Graduate Admissions Committee. If approved by the committee, it is forwarded to the chemical and biochemical engineering faculty for final approval. Students then are assigned to research advisors as though they were newly admitted graduate students. For a detailed description of program requirements, see Graduate Program on the Department of Chemical and Biochemical Engineering website.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Applicants must provide the following:

Completed application form.

Unofficial transcript(s). If admitted, official transcripts will be required before enrollment. For international students, all academic records should bear the original stamp or seal of the institution and the signature of a school official. Documents not in English must be accompanied by a complete, literal, English translation, certified by the issuing institution.

Official Graduate Record Examination (GRE) General Test scores (verbal and quantitative) from Educational Testing Services (the University's institutional code is 6681) or International English Language Testing System (IELTS).

Statement of purpose.

Three letters of recommendation.

Test of English as a Foreign Language (TOEFL) scores for applicants whose native language is not English.

Applicants should have a B.S. degree in chemical engineering or a related discipline with satisfactory grades from a recognized college or university in the United States and a cumulative g.p.a. of at least 3.00 on a 4.00 scale. Graduates of non-U.S. universities may be accepted, depending on evaluation of their records. Applicants who do not meet these requirements may be granted conditional admission by the Graduate Admissions Committee.

Graduate courses in chemical and biochemical engineering are designed for students who have an undergraduate background in chemical engineering. Exceptional students from other areas also may apply for admission to the M.S. program in chemical and biochemical engineering. If admitted, they may be required to take specific undergraduate courses to prepare them for graduate coursework.

Financial Support

A number of fellowships, assistantships, and scholarships are awarded on a competitive basis to graduate students who qualify.

Graduate students have the opportunity to receive interdisciplinary research training in several fellowship programs administered through the Center for Biocatalysis and Bioprocessing (CBB). The program provides research training in areas that combine basic and applied research. Through these programs, students interact with other students and faculty members from biochemistry, biology, chemistry, civil and environmental engineering, medicinal and natural products chemistry, and microbiology and immunology.

Career Advancement

Chemical and biochemical engineers work in a wide range of industries, including petroleum and specialty chemical production, polymer and plastic production, food processing, energy, microelectronics production, pharmaceutical production, biochemical processing, and environmental compliance. Potential jobs include production, process development, plant design and construction, and fundamental research. The engineering profession also is a foundation for a variety of careers in medicine, law, government, and consulting. Many experienced chemical and biochemical engineers move through management ranks to high-level administrative positions. On average, 93-98 percent of

graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

Chemical and Biochemical Engineering, Ph.D.

Graduate students in the Department of Chemical and Biochemical Engineering gain an understanding of the principles of engineering science and use those principles in contemporary applications related to energy, the environment, biotechnology, and materials. The department emphasizes research, since most opportunities for graduates are in research and development.

Research and Study Areas

Current research strengths of the Department of Chemical and Biochemical Engineering are in the areas of global and regional atmospheric modeling, biomaterials and medical engineering, cellular engineering, photopolymerization, biocatalysis, and biofuels.

Chemical and biochemical engineering researchers are members of the Photopolymerization Center, an industry/university cooperative center on fundamentals and applications of photopolymerization. The center brings together experts from the University of Iowa, the University of Colorado, and member companies such as 3M, DSM, and Boeing. In addition, interdisciplinary collaborations are fostered on campus through the Iowa Center for Research, Exploration, and Advanced Technology in Engineering and Sciences (Iowa CREATES) and Materials Analysis, Testing and Fabrication (MATFab) in the Iowa Advanced Technology Laboratories.

Requirements

The Doctor of Philosophy program in chemical and biochemical engineering requires a minimum of 72 s.h. of graduate credit beyond the Bachelor of Science degree. However, the degree is granted primarily on the basis of achievement rather than on the accumulation of semester hours. Students typically are expected to have completed three academic years in residence, or two years if they already hold a recognized master's degree. In order to graduate, they must have an overall g.p.a. of at least 3.25.

All students must complete a core course requirement, which consists of a course in transport phenomena, a course in reaction engineering, a course on proposal writing, a thermodynamics course, and a course in data science, as well as five additional courses (total of 30 s.h.).

Code	Title	Hours
Transport Phenomena		
CBE:5115	Transport Phenomena I	3
Alternate courses approved on a case-by-case basis, and may include:		
BME:5430	Biotransport	3
ME:5143	Computational Fluid and Thermal Engineering	3
Other courses with consent of advisor		
Chemical Thermodynamics		
CBE:5110	Intermediate Thermodynamics	3
Alternate courses approved on a case-by-case basis, and may include:		
A 5000-level thermal physics course		
Other courses with consent of advisor		
Chemical Reaction Kinetics		
One of these:		
CBE:3205	Introduction to Biochemical Engineering	3
CBE:5315	Polymer Chemistry	3
CBE:5425	Atmospheric Chemistry and Physics	3
Technical Communication		
CBE:5105	Introduction to Literature Review and Proposal Writing	3
Data Science		
CBE:5120	Data Science in Chemical and Engineering Systems	3

All Ph.D. students are required to take ENGR:7270 Engineering Ethics (1 s.h.) during their first semester.

Students are required to satisfy a qualifying requirement with a minimum g.p.a. of at least 3.50 in the four core courses and pass a comprehensive examination before they can become candidates for degree. The comprehensive examination is the presentation and defense of the candidate's research proposal. These examinations are arranged by members of the examining committee and may be repeated at the committee's discretion. Comprehensive examination policies are published in the Manual of Rules and Regulations of the Graduate College on the Graduate College website. A final examination, which is a defense of the thesis, completes the doctoral program.

For a detailed description of program requirements, see Graduate Program on the Department of Chemical and Biochemical Engineering website.

Combined Programs

Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in chemical and biochemical engineering in a combined degree program offered by the College of Engineering and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1711] (Carver College of Medicine) in the Catalog.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Applicants must provide the following:

Completed application form.

Unofficial transcript(s). If admitted, official transcripts will be required before enrollment. For international students, all academic records should bear the original stamp or seal of the institution and the signature of a school official. Documents not in English must be accompanied by a complete, literal, English translation, certified by the issuing institution.

Official Graduate Record Examination (GRE) General Test scores (verbal and quantitative) from Educational Testing Services (the University's institutional code is 6681) or International English Language Testing System (IELTS).

Statement of purpose.

Three letters of recommendation.

Test of English as a Foreign Language (TOEFL) scores for applicants whose native language is not English.

Applicants should have a B.S. degree in chemical engineering or a related discipline with satisfactory grades from a recognized college or university in the United States and a cumulative g.p.a. of at least 3.00 on a 4.00 scale. Graduates of non-U.S. universities may be accepted, depending on evaluation of their records. Applicants who do not meet these requirements may be granted conditional admission by the Graduate Admissions Committee.

Graduate courses in chemical and biochemical engineering are designed for students who have an undergraduate background in chemical engineering. Exceptional students from other areas also may apply for admission to the Ph.D. program in chemical and biochemical engineering. If admitted, they may be required to take specific undergraduate courses to prepare them for graduate coursework.

Financial Support

A number of fellowships, assistantships, and scholarships are awarded on a competitive basis to graduate students who qualify.

Graduate students have the opportunity to receive interdisciplinary research training in several fellowship programs administered through the Center for Biocatalysis and Bioprocessing (CBB). The program provides research training in areas that combine basic and applied research. Each year the center offers fellowships to doctoral students in biotechnology. These are funded by grants from the National Institute of General Medical Sciences, National Institutes of Health (NIH), National Science Foundation (NSF), and the CBB with funding from the State of Iowa. Through these programs, students interact with other students and faculty members from biochemistry, biology, chemistry, civil and environmental engineering, medicinal and natural products chemistry, and microbiology and immunology.

Career Advancement

Chemical and biochemical engineers work in a wide range of industries, including petroleum and specialty chemical production, polymer and plastic production, food processing, energy, microelectronics production, pharmaceutical production, biochemical processing, and environmental compliance. Potential jobs include production, process development, plant design and construction, and fundamental research. The engineering profession also is a foundation for a variety of careers in medicine, law, government, and consulting. Many experienced chemical and biochemical engineers move through management ranks to high-level administrative positions.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

Civil and Environmental Engineering

Chair

- A. Allen Bradley Jr.

Undergraduate majors: civil engineering (B.S.E.); environmental engineering (B.S.E.)

Graduate degrees: M.S. in civil and environmental engineering; Ph.D. in civil and environmental engineering

Faculty: <https://cee.engineering.uiowa.edu/people>

Website: <https://cee.engineering.uiowa.edu/>

Civil and environmental engineering is one of the three largest fields of engineering. It traditionally has been concerned with infrastructure facilities that are both large in scale and essential to modern life. Civil and environmental engineering projects include transportation systems and their components, such as bridges, highways, public transit systems, railways, harbors, airports, and seaports; large-scale structures and office buildings that provide enclosed working and living space; environmental and hydraulic systems that provide clean water and air, including filtration plants and distribution systems for municipal and industrial water supplies, wastewater treatment plants, dams, levees, and irrigation systems.

Growth areas of civil and environmental engineering include water sustainability, infrastructure development, construction management, computer-aided design, hazardous waste management, and engineered environmental systems. In the future, civil and environmental engineers will be called upon to design structures for earth, prevent erosion and sedimentation of rivers, predict effects of global climate change on the environment, provide modern and efficient transportation systems, and ensure the quality of our air, surface waters, and groundwaters.

In planning and design, civil and environmental engineers work with other engineers, architects, landscape architects, planners, economists, financiers, sociologists, lawyers, and other specialists as members of the design team. Some civil and environmental engineers work in engineering offices; others may be called upon to construct or supervise outdoor projects they have designed. These field assignments, many of which are in remote and fascinating parts of the world, are particularly appealing to many civil and environmental engineers. There also is significant potential for entrepreneurial work by civil and environmental engineers as they start their own companies.

In addition to the degree programs offered by the Department of Civil and Environmental Engineering, the department also participates in two Graduate College programs: Applied Mathematical and Computational Sciences [p. 1547], an interdisciplinary doctoral program; and Transportation Studies [p. 1631], a graduate certificate program.

Certificates

Sustainable Water Development

The graduate Certificate in Sustainable Water Development trains science, technology, engineering, and mathematics (STEM) students to address future challenges of water scarcity and variability while also meeting the food and energy demands of Earth's growing population. The Department of Civil and Environmental Engineering administers the

certificate program; see the Certificate in Sustainable Water Development [p. 1533] in the Catalog.

Related Certificate: Transportation Studies

The Transportation Studies Program offers the graduate Certificate in Transportation Studies. The program focuses on the varied and complex problems of transportation and on interdisciplinary approaches to addressing them. The Departments of Civil and Environmental Engineering, Industrial and Systems Engineering, Mechanical Engineering (College of Engineering), Economics (Tippie College of Business), and the School of Planning and Public Affairs (Graduate College) participate in the program.

The certificate is coordinated by the School of Planning and Public Affairs. See the Certificate in Transportation Studies [p. 1632] in the Catalog.

Programs

Undergraduate Programs of Study

Majors

- Major in Civil Engineering (Bachelor of Science in Engineering) [p. 1471]
- Major in Environmental Engineering (Bachelor of Science in Engineering) [p. 1474]

Graduate Programs of Study

Majors

- Master of Science in Civil and Environmental Engineering [p. 1476]
- Doctor of Philosophy in Civil and Environmental Engineering [p. 1478]

Facilities

Undergraduate Teaching Laboratories

Environmental Engineering Teaching Laboratory

Located at the Water Plant, this laboratory is designed to provide undergraduate students hands-on experience in water laboratory testing and analysis. It serves several program-required and elective courses with a laboratory component.

Fluids Laboratories

The fluid laboratories comprise a trio of rooms. The Fluids Fundamentals Lab includes recently built equipment and ones that have been around for decades. The Advanced Measurements Lab includes some of the larger experimental devices, such as a wind tunnel and a towing tank. The third laboratory, the Fluids Workshop, is a space in which students can perform their experiments.

Hydraulics Laboratory

The Hydraulics Laboratory experimental facilities include flumes and pipe systems to perform experiments on open-channel and closed-conduit flows. Instruments are available

for measuring various flow quantities such as discharge, pressure, velocity, and temperature.

Iowa Technology Institute

The Iowa Technology Institute contains 17 work stations, all connected to the engineering computer network, that allow students to access AutoCAD, Pro/ENGINEER, and a full complement of structural, hydraulic, transportation, and environmental software to support work on engineering design projects.

Soils Laboratory

The teaching laboratory contains state-of-the-art equipment to provide hands-on experience to students and allows them to keep their skills on soil properties and characterization, soil stability, soil strength, consolidation/compaction for highway embankments, and foundations of structures. The teaching lab is an air-conditioned, temperature-controlled laboratory with an extensive number of different types of equipment. It is used twelve times throughout the year to perform four teaching sessions to groups of junior-level students.

Structures, Mechanics, and Materials Laboratory

The Structures, Mechanics, and Materials Laboratory is a teaching lab where students conduct experiments to quantify the physical and mechanical properties of construction materials. Equipment is available to test metals, aggregates, concrete, and asphalt.

Graduate Laboratories

Structures, Mechanics, and Materials

Facilities for computations, materials testing, geotechnical experiments, and small-scale structural testing are available for research and teaching. Faculty, staff, and students in structures, mechanics, and materials (SMM) have access to the computing resources of the Engineering Technology Center and the University of Iowa Technology Institute. Both centers continuously update their computing facilities to maintain pace with the rapidly changing field.

A wide range of experimental facilities are available for testing structural materials such as Portland cement concrete, asphalt, metals, timber, and composites. These facilities include several loading frames (purely uniaxial, purely torsional, and axial-torsional) that are available with computer-based control and data collection systems. Facilities for creep testing, triaxial soil testing, and high-cycle fatigue testing also are available. The laboratories have a variety of ovens and other facilities for preparation and treatment of test specimens.

Four well-equipped physical testing laboratories are dedicated to SMM teaching and research: the Civil Materials Laboratory, Soil Mechanics Laboratory, Plasticity Laboratory, and the Asphalt Laboratory. The Civil Materials Laboratory currently has a small-scale single-degree-of-freedom shaker table. Faculty, staff, and students have access through CCAD to a six-degree-of-freedom man-rated shaker table with 4,000-pound payload and a 12-camera Vicon motion-capture system.

Transportation Engineering

The department's Asphalt Laboratory is equipped with a set of Superpave testing equipment and asphalt mixture performance testing equipment which can measure dynamic

modulus and flow number of asphalt mixtures. The lab has a Hamburg Wheel Tracking Device for measuring the moisture sensitivity of asphalt mixtures; asphalt foaming equipment for mix design of cold in-place recycled asphalt using foamed asphalt; and equipment for Marshall mix design, indirect tensile strength test, and volumetric analysis of asphalt mixtures. The Asphalt Laboratory is one of the department's group of laboratories for testing the strength behavior of other materials.

Water and the Environment

The teaching and research functions of the department are closely connected to the research activities of IIHR—Hydroscience & Engineering. The institute houses some of the most modern research facilities in the world, including a 100-meter towing tank, a wave basin facility for ship hydrodynamics research, several flumes, an array of field instrumentation for hydrologic experiments, extensive laboratory space for hydraulic modeling, state-of-the-art instrumentation for flow measurements and visualization, and comprehensive computational facilities.

Research related to ecohydraulics and the environment takes place at the Lucille A. Carver Mississippi Riverside Environmental Research Station. IIHR—Hydroscience & Engineering operates the 250-square-foot facility, which is located on the Mississippi River near Muscatine, Iowa. The station provides engineers and biological scientists with an ideal facility in which to examine the multifaceted ecohydraulic processes of the upper Mississippi. It is equipped with water quality laboratories, research boats, and a seminar room.

The Environmental Engineering and Science Laboratories provide state-of-the-art facilities, equipment, and expertise to support both undergraduate and graduate-level instruction and research. The labs support research in contaminant fate and transport in various media (air, water, soil, plants, and microbes), drinking water disinfection and distribution, wastewater treatment, geochemical-contaminant interactions, bioremediation, and phytoremediation. They also provide resources for analytical chemistry, electrochemistry, molecular biology, microscopy, computer modeling, and simulated environments on the bench- and pilot-scale levels.

The Environmental Engineering and Science Laboratories are affiliated with the University's Center for Health Effects of Environmental Contamination, Center for Global and Regional Environmental Research, and the UI's Environmental Health Sciences Research Center, an affiliate of the National Institute of Environmental Health Sciences (NIEHS).

Courses

Civil and Environmental Engineering Courses

CEE:0000 Civil Engineering Internship/Co-op 0 s.h.

Civil engineering students participating in the Cooperative Education Program register in this course during work assignment periods; registration provides a record of participation in the program on the student's permanent record card. Requirements: admission to the Cooperative Education Program.

CEE:1010 Introduction to Careers in Environmental Engineering 0 s.h.

Past, present, and future roles of environmental engineers in society; introduction to the discipline's historical roots and early visionary leaders in sanitation engineering and public health; growth during the environmental movement, and current role of environmental engineers in modern society as stewards for clean air, water, and energy; range of career opportunities available to environmental engineering majors, particularly in the emerging role of ambassadors for sustainable development.

CEE:1030 Introduction to Earth Science 3-4 s.h.

Relationships between plate tectonics, geologic time, and the rock cycle with volcanoes and igneous, sedimentary, metamorphic rocks; fossils; radioactive isotopes; landscape evolution; mountain building; natural resources; their impacts on civilization. GE: Natural Sciences with Lab; Natural Sciences without Lab. Same as EES:1030.

CEE:1031 Introduction to Earth Science Laboratory 1 s.h.

Laboratory component of EES:1030. Requirements: completion of 3 s.h. in EES:1030 or CEE:1030. GE: Natural Sciences Lab only. Same as EES:1031.

CEE:2000 Civil and Environmental Engineering Sophomore Seminar 0 s.h.

Introduction to civil and environmental engineering curriculum and profession; presentations by senior undergraduate students, faculty, and professionals; lifelong learning skills and requirements for professional licensure in civil engineering. Requirements: sophomore standing.

CEE:2010 Civil and Environmental Engineering Professional Practice and Ethics 1 s.h.

Practical issues associated with civil engineering practice; topics may include safety and OSHA regulations, engineering specifications/building codes, contracts, liability, and ethics; role that a professional engineering license plays in the student's career and professional/ethical obligations that come with it; history of civil engineering and development of civil practice in the United States.

CEE:2015 Civil Engineering Tools 2 s.h.

Tools and methods used in civil engineering career: AutoCAD, programming, project estimating, heavy equipment productivity estimation, and earthwork estimation.

CEE:2050 Severe and Unusual Weather 3 s.h.

Basic weather concepts behind severe weather phenomena and essential safety information; how weather events cause billions of dollars in damage and thousands of casualties; winter storms can impact half of the nation, paralyzing the transportation network with icy roads and wind driven snow; tornadoes can strike within minutes tearing apart homes; hurricanes can destroy entire communities with strong winds, heavy rain, and deadly storm surge; how understanding severe weather and knowing what to do before, during, and after an event can significantly reduce injury, deaths, and property damage. Same as CBE:2050.

CEE:2240 Digital Drafting with AutoCAD 3 s.h.

Basic principles of 2-D and 3-D computer-aided drafting; use of AutoCAD software to draw plans, elevations, and sections for objects and interior spaces. Prerequisites: CERM:2010 or SCLP:2810 or TDSN:2210 or MTLs:2910. Same as TDSN:2240.

CEE:3001 Leadership Skills for Engineers 1 s.h.

Survey of leadership ideas and principles as applied to situations commonly encountered in civil engineering practice, especially as they relate to challenges that beginning engineers face; speakers in selected engineering professions provide context and examples; exercises on leadership principles. Requirements: junior standing in civil and environmental engineering.

CEE:3002 Technical Communication in Civil and Environmental Engineering 1 s.h.

Development of communication skills through writing and oral presentations; impact of engineering solutions in a global, economic, environmental, and societal context; writings and presentations on current or historical engineering solutions; exposure to professionals with significant experiences to share in these areas. Requirements: junior standing.

CEE:3003 Project Management Skills 1 s.h.

Review and extension of civil and environmental engineering project management skills in preparation for capstone senior design course; project scheduling, cost estimating, contract types, construction phasing; review for Fundamentals of Engineering Exam (FE) and practice tests in four subdisciplinary areas. Requirements: senior standing.

CEE:3142 Quality Control 3 s.h.

Basic techniques of statistical quality control; application of control charts for process control variables; design of inspection plans and industrial experimentation; modern management aspects of quality assurance systems. Offered fall semesters. Prerequisites: STAT:2020 or MSCI:9100 or BAIS:9100 or (STAT:3100 and STAT:3101 and STAT:3200). Same as ISE:3600, STAT:3620.

CEE:3155 Principles of Environmental Engineering 4 s.h.

Water supply and treatment processes; wastewater treatment processes; processes for air pollution control, groundwater remediation; solid and hazardous waste management. Prerequisites: CHEM:1110.

CEE:3328 Fluvial Geomorphology 3 s.h.

Hydrologic principles, stream channel processes, and fluvial geomorphology within drainage basin systems; spatial and temporal variations in water distribution, analysis of hydrological data, flow mechanisms, sediment transport, forecasting procedures, hydrograph construction, modeling. Requirements: EES:3020 or another 3000-level geology or hydraulics course. Same as EES:3380.

CEE:3371 Principles of Hydraulics and Hydrology 3 s.h.

Hydraulics of pressure conduits and open channels, dimensional analysis, flow measurements, hydraulic machinery, laboratory. Prerequisites: ENGR:2510.

CEE:3430 Water Treatment 4 s.h.

Physical, chemical, and biological processes and operations to remove and treat chemical and pathogenic pollutants and protect human and environmental health; relevant to drinking water, municipal wastewater, water reuse, stormwater, industrial process water, agricultural wastewater; modern technologies and appropriate designs for the developing world; theory and applications; hands-on laboratory. Prerequisites: CEE:3155 and ENGR:2510.

CEE:3530 Geomechanics 4 s.h.

Identification and classification of earth materials; hydraulic and mechanical properties of soils; soil improvement; laboratory testing. Prerequisites: ENGR:2750.

- CEE:3533 Principles of Structural Engineering** 4 s.h.
Fundamental principles of structural analysis applied to statically determinate and indeterminate structures, continuous beams, trusses, and frames; external and internal equilibrium, compatibility of deformation, influence lines, virtual work; parallel use of classical and matrix formulation; slope deflection, flexibility and stiffness methods; use of computers. Prerequisites: ENGR:2750.
- CEE:3586 Civil Engineering Materials** 3 s.h.
Structure, strength and failure, durability, deformation, practice, and processing for primary construction materials systems, including steel, aluminum, concrete, asphalt, fiber-reinforced composites, masonry, timber. Prerequisites: ENGR:2750.
- CEE:3763 Principles of Transportation Engineering** 3 s.h.
History of transportation modes, new transport technologies, traffic operations and control, economic evaluation of transport alternatives, transportation planning, roadway design and construction, route location, preventive maintenance strategies. Requirements: sophomore standing.
- CEE:3783 Surveying and Remote Sensing** 3 s.h.
Engineering surveying measurements, methods, computations. Prerequisites: ENGR:1100.
- CEE:3790 Resilient Infrastructure and Emergency Response** 3 s.h.
Concepts of resilient cities with specific emphasis on role of infrastructure and built environment; risk analysis, hazard mitigation and emergency response to various threats; resiliency through good design.
- CEE:3996 Civil and Environmental Engineering: Engineering Project** 1 s.h.
Support for student learning associated with an engineering project; students work as a team to design and fabricate a product; student projects are often associated with a contest or competitions (e.g., steel bridge, concrete canoe).
- CEE:3997 Engineering Service Project** 1-3 s.h.
Provides support of student learning associated with a variety of international engineering service projects facilitated by the Department of Civil and Environmental Engineering; service projects are usually designed and built as part of an Engineers Without Borders USA and/or a Bridges to Prosperity (Continental Crossings) approved program; active involvement by students in these organizations required.
- CEE:3998 Individual Investigations: Civil Engineering** arr.
Individual projects for civil engineering undergraduate students: laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research.
- CEE:4097 Topics in Teaching and Learning** 1 s.h.
Overview of Iowa's hydroclimate; emphasis on discharge, rainfall, and temperature; how to address basic research questions related to Iowa's climate and extreme events; hands-on exercises.
- CEE:4102 Groundwater** 3 s.h.
Groundwater quality and quantity; Darcy's Law, 2-D flow equation, unsaturated zone, contaminant transport, redox reactions, drinking water quality, bioremediation; laboratories in permeameter testing, porous media grain size analysis, pump testing, monitoring well installation.
- CEE:4103 Water Quality** 3 s.h.
Sources, availability, uses, characteristics, criteria, best management practices for surface waters; protection of waters impaired by eutrophication, soil erosion and sedimentation; pathogenic organisms, habitat destruction, wastewater discharges, contaminated sediments, atmospheric deposition, watershed development, invasive species, irrigation return flows, stormwater discharges, nonpoint sources, agricultural runoff; laboratory component, measurement of water quality characteristics in the field. Requirements: junior or higher standing.
- CEE:4104 Groundwater Modeling** 3 s.h.
Groundwater flow and contaminant transport modeling; numerical methods, applications of groundwater modeling to water supply, groundwater resources evaluation, remediation design using software; GMS (MODFLOW, MODPATH, and MT3D). Prerequisites: MATH:1860 and (EES:4630 or CEE:4103). Same as EES:4660.
- CEE:4107 Sustainable Systems** 3 s.h.
New and emerging concepts in sustainable systems design and assessment. Same as CBE:4410.
- CEE:4118 Probabilistic Methods in Hydroscience** 3 s.h.
Common probabilistic models used in hydrology, hydraulics, and water resources; derived distributions; multivariate models and estimation of model parameters; analysis of data and model building; uncertainty analysis. Prerequisites: STAT:2020 and MATH:2560.
- CEE:4119 Hydrology** 3 s.h.
Overview of fundamental processes in water cycle, including precipitation, evaporation, infiltration, and runoff; quantitative approaches for predicting streamflow and design discharges; applications to flood hazard assessment and stormwater management. Prerequisites: ENGR:2510.
- CEE:4135 Structural Modeling and Health Monitoring** 3 s.h.
Measurements, structural modeling, structural analysis, stiffness method, trusses and frames, structural testing, modal analysis. Prerequisites: CEE:3533 and ENGR:2750.
- CEE:4146 Multiscale Hydrology: Introduction to Multiscale Hydrologic Phenomena** 3 s.h.
Hydrologic principles over the last century developed from experimentation at laboratory and small plot scales; major scientific and engineering challenges, including links between statistical fluctuations that data exhibits; physical, chemical, and biological principles through appropriate mathematical theories, numerical models, and field observations; coupled hydrologic processes at larger scales using newly built on abstraction; observations used in hydrologic engineering at larger scales for several decades and missing a coherent theory that ties them together. Prerequisites: MATH:6600 and ENGR:2510. Requirements: three semesters of calculus and college physics, an introductory hydrology course, and a probability and statistics course.
- CEE:4150 Environmental Chemistry** 3 s.h.
Principles of general, physical, organic chemistry applied in water and air systems; emphasis on qualitative and quantitative understanding of chemical kinetics and equilibrium; acid-base reactions, complex formation, precipitation, dissolution, and oxidation-reduction reactions; organic nomenclature. Prerequisites: CHEM:1120. Same as CBE:4420.

- CEE:4157 Environmental Engineering Design 3 s.h.**
Application of physical, chemical, and biological operations and processes to the design of water and wastewater treatment systems; applications in solid and hazardous waste treatment. Prerequisites: CEE:3155.
- CEE:4158 Solid and Hazardous Wastes 3 s.h.**
Sources, characteristics, collection, disposal of solid and hazardous wastes; environmental impacts of hazardous waste management; resource recovery systems. Requirements: for OEH:4920—OEH:4240. Same as OEH:4920.
- CEE:4159 Air Pollution Control Technology 3 s.h.**
Sources, environmental and health impacts, regulations, modeling of air pollution; processes and alternative strategies for control; global climate considerations. Same as CBE:4459, IGPI:4159.
- CEE:4160 Introduction to Bridge Engineering 3 s.h.**
Bridge engineering and design; history of the bridge; factors that affect bridge design; bridges according to use (e.g., road, rail, pedestrian and bicycle) and type (e.g., suspension, cable stay, truss); how sustainability concepts may impact bridge design; substantial design exercise. Prerequisites: CEE:3533.
- CEE:4162 Structural Systems for Buildings 3 s.h.**
Detailed analysis and design of gravity and lateral force resisting systems for buildings; roof, floor, and bearing wall gravity systems; steel braced frames, steel and concrete moment frames, and masonry and timber shear walls lateral systems; introduction to tall building structures. Prerequisites: CEE:3533.
- CEE:4164 Design of Wood Structures 3 s.h.**
Framing layout and analysis of wood frame structures for gravity and lateral loads; design of structural members for bending, axial load, and shear, including joists, beams, columns, engineered lumber, bearing walls, shear walls, and diaphragms; introduction to connection design. Prerequisites: CEE:3533.
- CEE:4176 Transportation Demand Analysis 3 s.h.**
City planning procedures and traffic engineering techniques applied to transportation problems; trip generation, distribution, assignment, mode choice models; travel surveys, data collection techniques; arterial flow, intersection performance, parking; transit system analysis. Same as URP:4262.
- CEE:4180 Fundamentals of Atmospheric Science 3 s.h.**
Review of fundamental principles in atmospheric sciences needed for study of interdisciplinary topics involving the Earth's atmosphere; understanding weather and climate processes to address problems in engineering; hydrometeorology of rainfall and its measurement by remote sensing; impact of climate anomalies and climate change on water resources; exchange of water, energy, and chemicals at the land-atmosphere boundary; forecasting of atmospheric chemistry and air quality. Prerequisites: ENGR:2510.
- CEE:4187 Statistics for Experimenters 3 s.h.**
Application of statistical techniques to evaluate data derived from experimental samples designs; use of spreadsheets, statistical software; design and analysis of experiments; regression analysis; model building; practical applications. Same as OEH:4540.
- CEE:4317 Remote Sensing 3 s.h.**
Fundamentals of electromagnetic waves, atmospheric radiative transfer, passive remote sensing, weather radar, hydrologic application of remote sensing.
- CEE:4370 Open Channel Flow and Sediment Transport 3 s.h.**
In-depth analysis of governing flow equations; steady uniform flow in channels of different resistance and cross section; flow control sections; specific energy considerations; analysis and computation of gradually varied profiles and spatially varied flow effected by lateral outflow and inflow; unsteady flow; flood routing. Prerequisites: CEE:3371.
- CEE:4371 Water Resources Engineering 3 s.h.**
Planning and economics of varied water resources projects; stochastic basis for design; flood damage mitigation, reservoirs, river morphology, economic analysis of water projects, urban water requirements, water supply, hydroelectric power systems, river navigation; contemporary civil-engineering problems and issues associated with water infrastructure development. Corequisites: CEE:3371.
- CEE:4374 Water Resource Design 3 s.h.**
Prerequisites to storm water management systems design, including design flows and rates; analysis and design of storm sewers, detention basins, street and highway drainage facilities, culverts, dams, spillways, measures for energy dissipation; review of wastewater transfer systems and design. Prerequisites: CEE:3371.
- CEE:4378 Hydrometeorology 3 s.h.**
Atmospheric thermodynamics; precipitation processes; evaporation; infiltration; surface runoff; hydrographs, runoff relations; runoff hydrography; storage problems; frequency, intensity, duration studies of storms, floods, droughts; hydrometeorological observations and network design; watershed modeling; urban hydrology climate.
- CEE:4385 International Perspectives in Water Sciences and Management 3 s.h.**
Internationalization and water, with focus on a country or a world region; intensive, in-depth exposure to complex issues that affect planning and execution of water projects in large-scale watersheds.
- CEE:4410 Interdisciplinary Scientific Visualization 3 s.h.**
Fundamentals of data visualization and practice communicating with data; techniques and algorithms for creating effective visualizations for engineers based on principles from graphic design, visual arts, human perception, and effective storytelling; targeted towards students interested in using visualization in their own work, as well as students interested in building better visualization tools and systems; examples might include interactive visualization systems, augmented/virtual reality applications, data and visual analytics tools, or new applications of existing visualizations methods.
- CEE:4506 Design of Concrete Structures 3 s.h.**
Fundamental analysis and design of reinforced concrete members and structures, flexure, shear, bond, continuity, beams, one-way slab system; columns. Prerequisites: CEE:3533.
- CEE:4511 Scientific Computing and Machine Learning 3 s.h.**
Numerical methods in scientific computing; root problems and optimization; linear algebraic equations; eigenvalue problems; numerical differentiation and integration; interpolation and curve-fitting; initial value and boundary value problems; machine learning in regression, classification, and clustering problems; Python programming and packages. Prerequisites: MATH:2560. Same as ME:4111.

- CEE:4512 Engineering Design Optimization** 3 s.h.
Engineering design projects involving modeling, formulation, and analysis using optimization concepts and principles; linear and nonlinear models, optimality conditions, numerical methods. Prerequisites: ENGR:2110 and MATH:2550. Requirements: junior standing. Same as ME:4112.
- CEE:4515 Computer-Aided Engineering** 3 s.h.
Computational engineering modeling and simulation, geometric modeling, grid generation, finite-element and finite-volume methods, uncertainty analysis, optimization, engineering applications. Prerequisites: ENGR:2750. Corequisites: ME:3052. Same as ME:4110.
- CEE:4532 Fundamentals of Vibrations** 3 s.h.
Vibration of linear discrete and continuous mechanical and structural systems; harmonic, periodic, and arbitrary excitation; modal analysis; applications. Prerequisites: ENGR:2750. Same as ME:4153.
- CEE:4533 Finite Element I** 3 s.h.
One- and two-dimensional boundary value problems; heat flow, fluid flow, torsion of bars; trusses and frames; isoparametric mapping; higher order elements; elasticity problems; use of commercial software. Prerequisites: ENGR:2750. Same as IGPI:4115.
- CEE:4535 Design of Steel Structures** 3 s.h.
Concepts and procedures in steel design; LRFD (load and resistance factor design) methodology for beams/columns; analysis and design of indeterminate structures. Prerequisites: CEE:3533.
- CEE:4539 Foundations of Structures** 3 s.h.
Application of soil mechanics to analysis of structural foundations; slope stability analysis; bearing capacity and settlement of shallow and deep foundations; retaining structures, braced cuts, reinforced earth structures; usage of computational models; subsurface exploration methods. Prerequisites: CEE:3530.
- CEE:4560 Pavement Engineering** 3 s.h.
Fundamental design principles; characterization and testing of asphalt and concrete paving materials; stresses and strain development within pavement structure; basic principles of mechanistic-empirical pavement design procedures. Prerequisites: CEE:3763.
- CEE:4730 Transportation Infrastructure Construction and Management** 3 s.h.
Analytical methods for developing transportation infrastructure construction and management systems; e-construction, transportation infrastructure condition evaluation, performance modeling, maintenance and rehabilitation optimization, asset management, development of transportation infrastructure construction and management system; application of information technology and mobile computing to solving transportation infrastructure construction and management problems. Prerequisites: CEE:3763.
- CEE:4762 Design of Transportation Systems** 3 s.h.
Overview of different modes within transportation systems; concepts of sustainability and livability in transportation system design; derivation of standards for geometric design of highways; roundabout design; cross-sectional and longitudinal geometric design of highways. Prerequisites: CEE:3763.
- CEE:4763 Traffic Engineering** 3 s.h.
Design of traffic control devices; evaluation and analysis of intersections and transportation networks using appropriate computer software. Prerequisites: CEE:3763.
- CEE:4850 Project Design and Management in Civil Engineering** 3 s.h.
Design of civil engineering systems, individual and team design projects oriented toward the solution of local problems, project management, construction management, contracts, budgeting, bidding. Corequisites: CEE:3003. Requirements: final semester.
- CEE:4995 Contemporary Topics in Civil and Environmental Engineering** arr.
New topics or areas of study not formally offered in other civil and environmental courses; ice engineering, chaos and strange attractors, remote sensing, nonlinear dynamics of hydrologic processes, advanced water and wastewater treatment processes, hazardous waste control, global climate change, damage mechanics; based on faculty/student interest.
- CEE:5083 Introduction to Comp Flow in Pipes and Channels** 3 s.h.
General review of numerical methods in hydraulics (finite-difference, finite-element, and method of characteristics); stability and accuracy of numerical schemes; steady free surface flows; flow transients in pipelines and channels. Prerequisites: ME:5160.
- CEE:5091 Graduate Seminar: Structure, Mechanics, Materials** 0 s.h.
Presentation and discussions of recent advances and research in structures, mechanics, and materials engineering by guest lecturers, faculty, students. Requirements: senior or graduate standing.
- CEE:5092 Graduate Seminar: Environmental Engineering Seminar** 0 s.h.
Presentation and discussion of current topics, case studies, and research in environmental science and engineering by students, guest lecturers, faculty. Requirements: senior or graduate standing.
- CEE:5093 Graduate Seminar: Hydraulics, Hydrology, and Water Resources** 0 s.h.
Presentation and discussions of recent advances and research in hydraulics, hydrology, and water resources by guest lecturers, faculty, students. Requirements: senior or graduate standing.
- CEE:5095 Career Paths in Sustainable Water Development** 0 s.h.
Introduction to different career paths in the food, energy, and water (FEW) sector; speakers from a variety of different careers—including researchers, professors, entrepreneurs, consultants, and civic, professional, and global engineers—discuss their own career paths as well as current opportunities in their fields; students prepare individual development plans that identify their preferred career (i.e., training) path, a plan of study (i.e., path coursework), mentors, and their preferred research area. Requirements: graduate standing in sustainable water development program.
- CEE:5096 Water, Energy, and Food Nexus Seminar** 0 s.h.
Invited presentations on research, policy, economics, and social drivers of water, energy, and food in the 21st century.
- CEE:5097 Coaching Seminar on Communicating Water Science** 0 s.h.
Presentation of student research on water, energy, and food in the 21st century; students receive live, immediate feedback from their peers and faculty coaches on best practices to improve their oral communication skills.

CEE:5098 Graduate Seminar in Structures, Materials, Mechanics, and Transportation 0 s.h.

Presentation and discussion of recent advances and research in structures, mechanics, materials, and transportation engineering by guest lecturers, faculty, and students. Requirements: graduate standing.

CEE:5100 Cultural Competence for Sustainable Water Development Engineers 0 s.h.

Skills needed to be culturally responsive to a wide range of communities in which sustainable water development engineering students interact with during their professional careers; series of three workshops; focus on how to identify cultural strengths that support development in underserved, resource-constrained communities; how to engage, build trust, and bridge differences with diverse stakeholders; how to conduct culturally sensitive interviews; how to communicate effectively across culture; preparation for Capstone Community Engagement project. Requirements: graduate standing in sustainable water development program.

CEE:5110 Managing Data to Facilitate Your Research 1 s.h.

Overview of major issues in quantitative data management; topics include computer file and directory organization, data documentation and lab notebook best practices, data organization and structure, data description and annotation, data versioning, data sharing and publication, licensing, ownership, preservation of access, reuse, and citation; for students in science, technology, engineering and mathematics (STEM) disciplines.

CEE:5115 Atmospheric Chemistry and Physics 3 s.h.

Principal chemical and physical processes affecting atmospheric trace gas and pollutant cycles; emphasis on atmospheric photochemistry, aerosol science, major sources, and removal processes. Corequisites: CBE:3120. Same as CBE:5425.

CEE:5137 Composite Materials 3 s.h.

Mechanical behavior of composite materials and their engineering applications; composite constituents (fibers, particles, matrices) and their properties and behavior; macromechanical behavior of composite laminae; micromechanical predictions of composite overall properties; classical lamination theory; composite beams and plates. Prerequisites: ENGR:2750. Same as ME:5167.

CEE:5153 Fundamentals of Environmental Sampling and Analysis 3 s.h.

Laboratory experiments to demonstrate important concepts in environmental chemistry and to familiarize students with procedures used to characterize water and wastewater and evaluate certain treatment processes. Prerequisites: CHEM:1120. Corequisites: CEE:5152.

CEE:5154 Environmental Microbiology 3 s.h.

Microorganisms possess diverse metabolic functions, inhabit a myriad of environments, and play important roles in global biogeochemical cycles; environmental microbiology concepts with emphasis on metabolic diversity and application of molecular methods to characterize microbial community structure and function in ecosystems (polymerase chain reaction, next-generation DNA sequencing, proteomics); biodegradation and bioremediation of hydrocarbon pollutants in groundwater, biological processes relevant to food-water-energy nexus (nitrogen cycling in agriculturally impacted watersheds), and microbial ecology of marine environments (hydrothermal vent plumes, oxygen minimum zones). Corequisites: CEE:5152.

CEE:5155 Biological Treatment Processes 3 s.h.

Applied microbiology and fundamental principles of aerobic and anaerobic biological wastewater treatment processes; sludge processing and advanced wastewater treatment and bioremediation; lectures and laboratory. Prerequisites: CEE:5154 and CEE:3155 and CEE:5152. Corequisites: CEE:3155 and CEE:5156.

CEE:5156 Physical and Chemical Environmental Processes 3 s.h.

Theory of physical and chemical operations and processes in water and wastewater treatment, including fundamental aspects of process dynamics; lectures, laboratory. Prerequisites: CEE:4150. Corequisites: CEE:3155.

CEE:5179 Continuum Mechanics arr.

Mechanics of continuous media; kinematics of deformation, concepts of stress and strain; conservation laws of mass, momentum and energy; constitutive theories; boundary and initial value problems. Prerequisites: ENGR:2750 or ENGR:2510. Same as ME:5179.

CEE:5210 Developing Professional Service Business 2-3 s.h.

Use of professional skills and functional knowledge in creating a specialized service business. Same as ENTR:9000.

CEE:5225 Communicating Data Through Stories 3 s.h.

How to communicate science effectively and responsively with multiple audiences from peers and professors to potential employers, policymakers, and the lay public; focus on speaking about science clearly and vividly in ways that can engage varied audiences, especially those outside the student's own field; connecting and finding common ground with an audience, defining goals, identifying main points, speaking without jargon, explaining meaning and context, using storytelling techniques and multimedia elements. Same as GRAD:5225.

CEE:5236 Optimization of Structural Systems 3 s.h.

Advanced topics; optimization of structural topology, shape, and material; finite dimensional dynamic response optimization, sensitivity analysis, distributed parameter systems; projects. Same as BME:5720.

CEE:5310 Informatics for Sustainable Systems 3 s.h.

Introduction to fundamental and advanced environmental informatics concepts and procedures including automated data collection, data management, data transformations, and processing to support modeling and analysis; scientific visualization of environmental data to support management of food, energy, and water (FEW) resources; sustainability in FEW systems. Same as IGPI:5311.

CEE:5350 Watershed Hydrology and Ecosystem Processes 3 s.h.

Introduction to hydrologic and ecosystem processes within a watershed; description of water, energy, and nutrient cycling in watersheds; focus on hydrologic and water-quality issues in agricultural Midwest; watershed modeling techniques, ecosystem goods and services, and selected case studies in watershed and ecosystem management problems. Requirements: graduate standing.

CEE:5369 Intermediate Mechanics of Fluids 3 s.h.

Basic concepts and definitions; pressure distribution in a fluid; governing equations and boundary conditions; integral and differential analysis; dimensional analysis and similarity; experimental analysis; laminar and turbulent internal and external flows; potential flows; engineering applications. Prerequisites: ENGR:2510. Same as ME:5160.

CEE:5372 Experimental Methods in Fluid Mechanics and Heat Transfer 3 s.h.

Hands-on experience in methodology of conducting experiments in fluid mechanics and heat transfer from design to data acquisition and processing; essential theoretical elements, experimental methodologies, data acquisition systems, uncertainty analysis; wide variety of instruments for fundamental and applied experimentation; work in small groups; design, implement, test, and report an experiment in area of interest. Same as ME:5162.

CEE:5374 Environmental Fluid Dynamics 3 s.h.

Introduction to the fundamentals of fluid dynamics with emphasis on application to natural flows of air and water in environmental systems; physical laws describing fluid dynamics, focus on development of physical insight of environmental fluids problems and strategies for solving them; analysis tools for solving various problems related to the movement of mass, momentum, and energy in natural and urban environments; systems include the atmospheric boundary layer, rivers, and streams, lakes, wetlands, and coastal zones; topics include incompressible viscous fluid flows, turbulence, waves, effects of rotation and stratification, scaling analysis, and scalar transport. Prerequisites: ENGR:2510. Requirements: working knowledge of multivariate calculus, partial differential equations, statistics, hydrology/hydraulics, and elementary fluid mechanics.

CEE:5380 Fluid Flows in Environmental Systems 3 s.h.

Introduction to environmental fluid flows and transport processes with focus on application and developing a language of environmental fluid mechanics; topics include physical and mathematical description of conservation and transport laws, statistical techniques for analyzing environmental flow data, scaling and similarity, stratification, turbulent flux measurement and modeling, environmental boundary conditions; application to surface waters and the planetary boundary layer; applied project involving collection and analysis of environmental flow data.

CEE:5390 PCBs in the Environment 3 s.h.

Polychlorinated biphenyls (PCBs) as potent carcinogens and linked to metabolic syndrome, autism, learning disabilities, hearing loss, and neurological disorders; how these compounds become to be such ubiquitous environmental pollutants; what the impact of their presence is; how sites are remediated and exposures reduced; in-depth examination through literature review, laboratory experiments, computational modeling, final written reports, and presentations. Recommendations: laboratory experience.

CEE:5410 Politics and Economics of the Food, Energy, Water Nexus 3 s.h.

Focus on the relationships between food, energy, and water resources; current and future political and economic frameworks that shape the food, energy, and water nexus.

CEE:5440 Foundations of Environmental Chemistry and Microbiology 3 s.h.

Investigation of chemical and biological processes at the food-energy-water nexus; example topic areas include biogeochemical cycling of nutrients, biomass conversion, resource recovery from wastewater, removing pollutants from drinking water sources, water reuse, engineered natural treatment systems, pollutant transformation and control, treatment of process waters. Requirements: undergraduate senior standing or graduate standing.

CEE:5460 Water Quality and Flow 3 s.h.

Laboratory and field experiments to promote student learning of flow-dependent movement and associated environmental transformation of surface water and groundwater pollutants; exploration of water quality and flow fundamentals needed to design and numerically model treatment reactors for small-community wastewater, urban storm water, and agricultural runoff; emphasis on engineered solutions that couple water quality and flow considerations as potential mitigations for adverse effects on natural water cycle caused by floods and other natural and human-influenced phenomena.

CEE:5513 Mathematical Methods in Engineering 3 s.h.

Linear ordinary differential equations, series solutions of differential equations, special functions, Laplace transforms, Fourier series, matrices, linear systems, eigenvalue problems, second-order partial differential equations. Prerequisites: MATH:2550 and MATH:2560. Same as CBE:5140, ME:5113.

CEE:5540 Intermediate Mechanics of Deformable Bodies 3 s.h.

Application of equilibrium analyses, strain-displacement relations, and constitutive relationships to practical structural systems and elementary plane elasticity problems. Prerequisites: ENGR:2750. Same as ME:5150.

CEE:5549 Fracture Mechanics 3 s.h.

3-D stress states, definition and criteria for failure, nominal and local yield phenomena, linear elastic and elastic plastic fracture mechanics, plane stress and plane strain fracture toughness, J-Integral, crack opening displacement, environmental assisted cracking, fatigue crack growth, fail safe, and damage tolerant design. Prerequisites: ENGR:2750. Corequisites: ME:3052. Same as ME:5159.

CEE:5678 Application Simulation to Transportation 3 s.h.

Transportation system management and traffic engineering; application of real-time simulation and visualization. Prerequisites: CEE:3763 or CEE:4763. Same as URP:5678.

CEE:5875 Perspectives in Biocatalysis 1-3 s.h.

Applied enzymology, protein design, structure-activity relationships, biosensor technology, microbial transformations, biodegradation of environmental pollutants. Requirements: graduate standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as BIOC:5875, CBE:5875, CHEM:5875, MICR:5875, PHAR:5875.

CEE:5990 Structural Engineering Practicum A 2 s.h.

Students select a design project and develop two or more alternative design concepts in consultation with a three-member advisory committee consisting of at least one faculty member and one design professional; entire design process documented in a written report. Prerequisites: CEE:3136 and CEE:4535.

CEE:5991 Structural Engineering Practicum B 1 s.h.

Detailed design development of one of the concepts developed in CEE:5990; students perform detailed design calculations using applicable structural analysis and design software, produce professional quality structural plans including connection details, and defend design to a three-member advisory committee. Prerequisites: CEE:5990.

CEE:5993 Community-Centered Problem Solving and Design 3 s.h.

Analysis, evaluation, and modeling of food-energy-water systems (FEWS) development challenges faced by resource-constrained communities in developed and developing countries; design and development of appropriate solutions to address disparities in FEWS and anticipate social, economic, political, technological, human health, and environmental impacts of these interventions; communication with a diverse suite of stakeholders using modern forms of media intended for public engagement and dissemination of research impacts; demonstration of cultural responsiveness consistent with social and economic realities of resource-limited communities.

CEE:5998 Individual Investigations: Civil and Environmental Engineering arr.

Individual projects for civil and environmental engineering graduate students: laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

CEE:5999 Research: Civil and Environmental Engineering M.S. Thesis arr.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for the M.S. with thesis in civil and environmental engineering. Requirements: graduate standing.

CEE:6223 Environmental Boundary Layers 4 s.h.

Fundamentals of environmental boundary layer dynamics and thermodynamics of natural and engineered systems; atmospheric boundary layers and aquatic surface layer dynamics; land-atmosphere interaction, air-water exchange, and turbulent transport in aquatic ecosystems; turbulence, surface energy balance, spectral analysis, similarity theory; flow over homogeneous and heterogeneous surfaces, thermal stratification effects, measurement, simulation of turbulent and surface fluxes; applications to environmental modeling, urban meteorology, ecosystem dynamics, renewable energy; recent and current research topics. Prerequisites: ENGR:2510.

CEE:6225 Communicating Science 3 s.h.

Writing and speaking about environmental engineering and science research; key principles of writing with clarity and cohesion, and practice applying these principles on a piece of research writing that students are currently working on; review best practices for presenting research to peers and at conferences; students are required to share their work with peers through writing and presentations. Recommendations: graduate standing in earth and environmental sciences; M.S. students must be thesis option.

CEE:6253 Environmental Organic Chemistry 3 s.h.

Environmental factors that govern processes that determine fate of organic chemicals in natural and engineered systems; knowledge of chemical fate applied toward quantitatively assessing environmental behavior of organic chemicals; holistic view on physical-chemical properties of organic compounds, including aspects of gas-solid partitioning, bioaccumulation, and transformations in the atmosphere.

CEE:6255 Environmental Biotechnology and Bioremediation 3 s.h.

Concepts in molecular microbial ecology and bioremediation; microbial diversity and genetics, evolution of biodegradation pathways, application of quantitative PCR, high-throughput amplicon and metagenomic and transcriptomic sequencing, proteomics, stable isotopes; bioremediation research and practice. Prerequisites: CEE:5154.

CEE:6299 Advanced Topics in Water and the Environment 1-3 s.h.

Advanced topics or areas of study not formally offered in other civil and environmental courses; topics include environmental engineering and science, hydraulics, hydrology, water resources, and sustainable water development.

CEE:6310 Analytical Methods in Mechanical Systems 3 s.h.

Vector and function spaces; functionals and operators in Hilbert spaces; calculus of variations and functional analysis with application to mechanics; Ritz and Galerkin methods. Prerequisites: ME:5113. Same as ME:6214.

CEE:6372 Environmental Dispersion Processes 3 s.h.

Review of classical diffusion theories; longitudinal dispersion, transverse and vertical mixing in free-surface turbulent shear flow; application to natural channels; selected topics including stream-tube models, mixing and dispersion of heated effluents. Corequisites: CEE:5369.

CEE:6376 Viscous Flow 3 s.h.

Equations of viscous flow; classical analytical and numerical solutions; flow regimes and approximations; laminar boundary layers—equations, solution methods, applications; stability theory and transition; incompressible turbulent flow—mean-flow and Reynolds-stress equations, modeling, turbulent boundary layers and free shear flows. Requirements: for ME:6260—ME:5160; for CEE:6376—CEE:5369. Same as ME:6260.

CEE:6520 Watershed Sedimentation 3 s.h.

Exploration of rich and complex field of sediment transport, geomorphology, and contaminant transport; associated physical, chemical, and biological processes with associated mathematical modeling; investigation of current topics not covered elsewhere, including physical processes affecting stability/mobility, transport, and fate of soil/sediments; lack of general understanding in development of fine-scale sedimentary structure in different systems, particularly contamination and contamination release; suspension effects on turbulent flows. Prerequisites: CEE:4370 and CEE:4373.

CEE:6532 Finite Element II 3 s.h.

Computer implementation; plate and shell elements; mixed and hybrid formulations; nonlinear analysis; recent development; introduction to boundary element method. Prerequisites: CEE:4533. Same as IGPI:6216, ME:6215.

CEE:7250 Advanced Fracture Mechanics 3 s.h.

Fracture of modern engineering materials; linear-elastic fracture; computational methods; functionally graded materials; elastic-plastic fracture; multiscale fracture and fatigue crack initiation. Prerequisites: ME:5113 and (ME:5159 or CEE:4533). Same as ME:7250.

CEE:7549 Multiscale Modeling 3 s.h.

Computational modeling of engineering materials ranging from molecular to continuum scales, molecular dynamics and Monte Carlo methods, nanoscale continuum modeling, scale-coupling methods. Prerequisites: ME:5143 or CEE:4533. Same as ME:6255.

CEE:7999 Research: Civil and Environmental Engineering Ph.D. Dissertation arr.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for the Ph.D. in civil and environmental engineering.

Civil Engineering, B.S.E.

Educational Objectives

Within a few years of graduation, graduates of the Bachelor of Science in Engineering (B.S.E.) program in civil engineering will:

- be productive and contributing members of the civil engineering profession as practitioners, entrepreneurs, researchers, or teachers;
- be engaged in learning, understanding, and applying new ideas as the field develops;
- pursue advanced studies, if qualified and interested; and
- promote the safety, health, and welfare of the public and the environment through professional practice and civic leadership.

Requirements

The Bachelor of Science in Engineering with a major in civil engineering requires a minimum of 128 s.h. Students must have a g.p.a. of at least 2.00 on all college work used to satisfy degree requirements as well as on all work undertaken at the University of Iowa.

All engineering students complete the B.S.E. core requirements, which include RHET:1030 Rhetoric; ENGR:1100 Introduction to Engineering Problem Solving and ENGR:1300 Introduction to Engineering Computing; and courses in chemistry, engineering mathematics and fundamentals, and physics.

They also complete the curriculum designed for their major program, which covers four major stems: mathematics and basic sciences, engineering topics, an elective focus area, and the general education component. For information about the curriculum stems, see the Bachelor of Science in Engineering [p. 1428] in the Catalog.

Students must select elective focus area courses according to guidelines established by the Department of Civil and Environmental Engineering. See "Elective Focus Areas" below.

Elective Focus Areas

Civil engineering students may choose from several standard elective focus areas developed by the department or create an individual focus area tailored to their interests.

Standard elective focus areas are offered in the broad field of civil and environmental engineering practice and in the four technical areas: environmental engineering; hydraulics and water resources; structures, mechanics, and materials; and transportation engineering. Other areas of focus include pre-architecture and urban and regional planning. For more detailed information about elective focus areas, see the Bachelor of Science in Engineering [p. 1428] in the Catalog. For a list of standard elective focus area options and guidelines for tailored elective focus areas in civil engineering, see Elective Focus Areas on the Department of Civil and Environmental Engineering website.

Combined Programs

B.S.E./M.S. in Civil and Environmental Engineering

The College of Engineering offers the combined Bachelor of Science in Engineering/Master of Science program for civil engineering undergraduate students who intend to earn a M.S. in civil and environmental engineering. B.S.E./M.S. students may attend the departmental graduate seminar and work on a master's thesis or research project while they are still undergraduates. They may count a limited amount of coursework toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the B.S.E., and they normally complete the M.S. one year later.

To be admitted to the degree program, students must have completed at least 80 s.h. and have a cumulative g.p.a. of at least 3.25. They must submit an application form to the Department of Civil and Environmental Engineering, along with a letter stating their proposed area of specialization and the name of a department faculty member willing to be their primary M.S. advisor. Graduate Record Examination (GRE) General Test scores are not required for the degree program.

Applications are due by May 15.

B.S.E./M.S. in Urban and Regional Planning

The College of Engineering and the School of Planning and Public Affairs offer the combined Bachelor of Science in Engineering/Master of Science program in urban and regional planning. The program, which is completed in five years, is designed for students who wish to pursue a public or private sector career in planning, a field that encompasses the development of alternatives to improve the quality of life in cities and regions.

Graduates are technically oriented professionals who have a clear understanding of policy development and implementation, which they apply to civil and industrial engineering problems. They fill positions such as public works director, transportation engineer, and public utilities staff member.

Each student in the combined program has two advisors, one in civil engineering and one in planning and public affairs. Students enroll in the College of Engineering for their first four years in the program and in the Graduate College for their fifth year. They follow the standard curriculum of their B.S.E. program during the first two years and begin adding courses from the planning and public affairs program during the third year. Successful students receive a B.S.E. at the end of the fourth year and an M.S. in urban and regional planning at the end of the fifth year.

Students in the combined program must maintain a cumulative g.p.a. of at least 3.00 in order to graduate with an M.S. in urban and regional planning.

For more information, see the M.S. in urban and regional planning (Graduate College) in the Catalog. Contact Engineering Student Services for information about applying to the combined program.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Enrollment in math courses requires completion of a placement exam.

b Enrollment in chemistry courses requires completion of a placement exam.

c Courses with prerequisites; students should complete a prerequisite waiver form.

d Students may select a course from all GE CLAS Core categories except Rhetoric, Quantitative or Formal Reasoning, and Natural Sciences.

e A full list of approved course subjects can be found on the College of Engineering General Education Component website.

f Design Courses: CEE:4157; CEE:4374; CEE:4506; CEE:4535; CEE:4762. Design courses must be taken from two different technical areas.

g Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>

Career Advancement

The engineering profession is a foundation for a variety of careers in industry, medicine, law, government, and consulting. Engineering majors hold eight of the top ten spots on the list of top-paid majors for bachelor's degree graduates, according to the National Association of Colleges and Employers (NACE). On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair and other career-development programming each semester.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

Environmental Engineering, B.S.E.

Educational Objectives

Within a few years of graduation, graduates of the Bachelor of Science in Engineering (B.S.E.) program in environmental engineering will:

- be productive and contributing members of the environmental engineering profession as practitioners, entrepreneurs, researchers or teachers;
- be engaged in learning, understanding, and applying new ideas as the field develops;
- pursue advanced studies, if qualified and interested; and
- promote the safety, health, and welfare of the public and the environment through professional practice and civic leadership.

Requirements

The Bachelor of Science in Engineering with a major in environmental engineering requires a minimum of 128 s.h. Students must have a g.p.a. of at least 2.00 on all college work used to satisfy degree requirements as well as on all work undertaken at the University of Iowa.

All engineering students complete the B.S.E. core requirements, which include RHET:1030 Rhetoric; ENGR:1100 Introduction to Engineering Problem Solving and ENGR:1300 Introduction to Engineering Computing; and courses in chemistry, engineering mathematics and fundamentals, and physics.

They also complete the curriculum designed for their major program, which covers four major stems: mathematics and basic sciences, engineering topics, an elective focus area, and the general education component. For information about the curriculum stems, see the Bachelor of Science in Engineering [p. 1428] in the Catalog.

Students must select elective focus area courses according to guidelines established by the Department of Civil and Environmental Engineering. See "Elective Focus Areas" below.

Elective Focus Areas

Environmental engineering students may choose from a standard elective focus area developed by the department or create an individual focus area tailored to their interests.

For more detailed information about elective focus areas, see the Bachelor of Science in Engineering [p. 1428] in the Catalog. For a description of the standard elective focus area options and guidelines for tailored elective focus areas in environmental engineering, see Elective Focus Areas on the Department of Civil and Environmental Engineering website.

Combined Programs

B.S.E./M.S. in Civil and Environmental Engineering

The College of Engineering offers a Bachelor of Science in Engineering/Master of Science program for environmental engineering undergraduate students who intend to earn a M.S. in civil and environmental engineering. B.S.E./M.S.

students may attend the departmental graduate seminar and work on a master's thesis or research project while they are still undergraduates. They may count a limited amount of coursework toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the B.S.E., and they normally complete the M.S. one year later.

To be admitted to the degree program, students must have completed at least 80 s.h. and have a cumulative g.p.a. of at least 3.25. They must submit an application form to the Department of Civil and Environmental Engineering, along with a letter stating their proposed area of specialization and the name of a department faculty member willing to be their primary M.S. advisor. Graduate Record Examination (GRE) General Test scores are not required for the fast-track degree program.

Applications are due by May 15.

Career Advancement

The engineering profession is a foundation for a variety of careers in industry, medicine, law, government, and consulting. Engineering majors hold eight of the top ten spots on the list of top-paid majors for bachelor's degree graduates, according to the National Association of Colleges and Employers (NACE). On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair and other career-development programming each semester.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

Civil and Environmental Engineering, M.S.

Graduate study in civil and environmental engineering prepares students for professional careers and further study. The principal concentration areas are environmental engineering and environmental science; hydraulics, hydrology, and water resources; structures, mechanics, and materials; sustainable water development; and transportation.

Research and Study Areas

Structures, Mechanics, and Materials

The structures, mechanics, and materials curriculum is designed for students who wish to gain knowledge and skill in the mechanics of solids and structures that they can apply to civil infrastructure systems and other fields. The program concentrates on developing appropriate methodologies for tackling broad, complex issues related to civil infrastructure systems, and on educating engineers in the implementation and application of methodologies to actual engineering projects. Faculty members have expertise in structural engineering, design optimization, solid mechanics, and computational methods.

Transportation Engineering

The transportation engineering curriculum is geared toward students interested in developing specialized knowledge and skills applicable to the diverse set of issues associated with transportation. Faculty members have expertise in traffic engineering, infrastructure management systems, pavement engineering, advanced construction materials, dynamic load and pavement simulation, optimal design, winter highway maintenance, real-time simulation, human factors, intelligent sensors, nondestructive testing, transportation planning, and travel demand modeling.

Water and the Environment

The water and the environment graduate program focuses on both fundamental and applied aspects of environmental systems and processes across a range of scales. The water and the environment program offers unique opportunities for students to actively participate in the research, analysis, and design aspects of real-world problems. There are three areas of specialization—environmental engineering and science; hydraulics, hydrology, and water resources; and sustainable water development.

The environmental engineering and science curriculum provides a comprehensive base of coursework and research in the areas of air and water quality management; environmental chemistry and microbiology; natural systems modeling; and processes for water supply, pollution control, and solid and hazardous waste management.

The hydraulics, hydrology, and water resources curriculum is associated with IIHR—Hydroscience & Engineering, a world-renowned research institute, where senior staff members of the institute are professors in the program. IIHR offers unique curriculum opportunities in laboratory and field-scale experimentation, and in mathematical modeling with IIHR's high-speed computer facilities.

The sustainable water development curriculum is focused on training interdisciplinary professional engineers, researchers, educators, and those who are ready to meet

the water resource challenges of communities most in need. Community service and professional development experiences complement innovative research at the food, energy, and water nexus.

Across all specialization areas within water and the environment, interdisciplinary research and study are conducted with programs including the Center for Global and Regional Environmental Research, the Center for Health Effects of Environmental Contamination, the Iowa Superfund Research Program, the Hazardous Substances Research Center, and the Center for Biocatalysis and Bioprocessing; the Department of Chemical and Biochemical Engineering (College of Engineering); the Departments of Earth and Environmental Sciences, and Geographical and Sustainability Sciences (College of Liberal Arts and Sciences); the Department of Microbiology and Immunology (Carver College of Medicine); the Department of Occupational and Environmental Health (College of Public Health); and the School of Planning and Public Affairs (Graduate College). Other areas of interdisciplinary focus include groundwater contamination, biotechnology, global climate change, and hazardous substances.

Requirements

The Master of Science program in civil and environmental engineering requires a minimum of 30 s.h. of graduate credit for thesis students; 31 s.h. for nonthesis students. The program enables students to concentrate in one or more areas of their choice. Students who choose the thesis program may earn up to 6 s.h. for the thesis. M.S. students must maintain a g.p.a. of at least 2.75.

With the approval of their advisor, students develop a study plan that satisfies the requirements of their chosen curriculum. Students must pass an oral examination and in some program options, a written examination.

Consult the department's Graduate Program Resources web page for more detailed information about the M.S. program in civil and environmental engineering.

Combined Programs

M.S. (Sustainable Water Development Subprogram)/M.S. in Urban and Regional Planning

The Department of Civil and Environmental Engineering and the School of Planning and Public Affairs collaborate to offer a combined Master of Science in civil and environmental engineering with a sustainable water development subprogram/Master of Science in urban and regional planning.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information, see the M.S. in urban and regional planning [p. 1622] (Graduate College) in the Catalog.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Each of the program's curricula is flexible; students may be admitted from all disciplines of engineering as well as from the mathematical and basic sciences.

Applicants should have a cumulative undergraduate g.p.a. of at least 3.00. Those with grade-point averages slightly lower should contact the department.

Applicants should have a combined verbal and quantitative score of at least 301 on the Graduate Record Examination (GRE) General Test. Lower scores are considered with other evidence of academic promise (recommendation letters, grade-point average). GRE General Test scores also are used in financial aid decisions.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

- Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
- Work with academic advisor to determine elective graduate coursework and sequence. See General Catalog and CEE website for specifics.
- Must be completed during first semester.
- Required every semester.
- Final exam is required for some program areas. Refer to Graduate Program Resources on the CEE website for details.

Financial Support

A significant number of research assistantships are available on a variety of research projects, and a limited number of teaching assistantships may be available. Selection of recipients usually is based on scholastic achievement and research interest.

Career Advancement

Current and projected demand for M.S. graduates is excellent. Graduates are placed in advanced technical positions in industry, consulting firms, or government, or they may continue their graduate study. On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair and other career-development programming each semester.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

Civil and Environmental Engineering, Ph.D.

Graduate study in civil and environmental engineering prepares students for professional careers and further study. The principal concentration areas are environmental engineering and environmental science; hydraulics, hydrology, and water resources; structures, mechanics, and materials; sustainable water development; and transportation.

Research and Study Areas

Structures, Mechanics, and Materials

The structures, mechanics, and materials curriculum is designed for students who wish to gain knowledge and skill in the mechanics of solids and structures that they can apply to civil infrastructure systems and other fields. The program concentrates on developing appropriate methodologies for tackling broad, complex issues related to civil infrastructure systems, and on educating engineers in the implementation and application of methodologies to actual engineering projects. Faculty members have expertise in structural engineering, design optimization, solid mechanics, and computational methods.

Transportation Engineering

The transportation engineering curriculum is geared toward students interested in developing specialized knowledge and skills applicable to the diverse set of issues associated with transportation. Faculty members have expertise in traffic engineering, infrastructure management systems, pavement engineering, advanced construction materials, dynamic load and pavement simulation, optimal design, winter highway maintenance, real-time simulation, human factors, intelligent sensors, nondestructive testing, transportation planning, and travel demand modeling.

Water and the Environment

The water and the environment graduate program focuses on both fundamental and applied aspects of environmental systems and processes across a range of scales. The water and the environment program offers unique opportunities for students to actively participate in the research, analysis, and design aspects of real-world problems. There are three areas of specialization—environmental engineering and science; hydraulics, hydrology, and water resources; and sustainable water development.

The environmental engineering and science curriculum provides a comprehensive base of coursework and research in the areas of air and water quality management; environmental chemistry and microbiology; natural systems modeling; and processes for water supply, pollution control, and solid and hazardous waste management.

The hydraulics, hydrology, and water resources curriculum is associated with IIHR—Hydrosience & Engineering, a world-renowned research institute, where senior staff members of the institute are professors in the program. IIHR offers unique curriculum opportunities in laboratory and field-scale experimentation, and in mathematical modeling with IIHR's high-speed computer facilities.

The sustainable water development curriculum is focused on training interdisciplinary professional engineers, researchers, educators, and those who are ready to meet

the water resource challenges of communities most in need. Community service and professional development experiences complement innovative research at the food, energy, and water nexus.

Across all specialization areas within water and the environment, interdisciplinary research and study are conducted with programs including the Center for Global and Regional Environmental Research, the Center for Health Effects of Environmental Contamination, the Iowa Superfund Research Program, the Hazardous Substances Research Center, and the Center for Biocatalysis and Bioprocessing; the Department of Chemical and Biochemical Engineering (College of Engineering); the Departments of Earth and Environmental Sciences, and Geographical and Sustainability Sciences (College of Liberal Arts and Sciences); the Department of Microbiology and Immunology (Carver College of Medicine); the Department of Occupational and Environmental Health (College of Public Health); and the School of Planning and Public Affairs (Graduate College). Other areas of interdisciplinary focus include groundwater contamination, biotechnology, global climate change, and hazardous substances.

Requirements

The Doctor of Philosophy program in civil and environmental engineering requires a minimum of 72 s.h. of graduate credit. Students must maintain a g.p.a. of at least 3.00 throughout the program. The doctoral degree is granted primarily on the basis of achievement rather than on a prescribed course of study.

Students usually need at least three years of full-time graduate study to complete the degree. All students must pass a qualifying examination. They also must pass a written and oral comprehensive examination before they may be formally admitted to Ph.D. candidacy; the comprehensive examination usually is taken after all required coursework has been completed. Students devote one year to the preparation of a dissertation that contributes to knowledge in the field; they must defend their dissertation successfully in a final examination.

Consult the department's Graduate Program Resources web page for more detailed information about the Ph.D. program in civil and environmental engineering.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Each of the program's curricula is flexible; students may be admitted from all disciplines of engineering as well as from the mathematical and basic sciences.

Applicants should have a graduate g.p.a. of at least 3.00. Those with grade-point averages slightly lower should contact the department.

Applicants should have a combined verbal and quantitative score of at least 301 on the Graduate Record Examination (GRE) General Test. Lower scores are considered with other evidence of academic promise (recommendation letters, grade-point average). GRE General Test scores also are used in financial aid decisions.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Civil and Environmental Engineering, Ph.D.

- a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
- b Typically completed by the end of the first year. Refer to the CEE website and the Graduate College Manual of Rules and Regulations for details.
- c Must be completed during first semester.
- d Required every semester.
- e Work with academic advisor to determine graduate elective coursework and sequence. See General Catalog and CEE website for specifics.
- f Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.

- g Oral exam typically completed by the end of the second year after passing the Qualifying Exam; written dissertation prospectus must be submitted to the committee two weeks before exam.
- h Enrollment during four semesters is required.
- i Total of 29 s.h from CEE:7999 is required. May take up to 6 s.h. for a letter grade; all other credits must be taken on S/U basis.
- j Technical communication requirement; approved courses include RHET:7500, RHET:7930, RHET:7940. Other courses may be considered and should be submitted to the CEE Director of Graduate Studies for approval.
- k Oral dissertation defense.

Financial Support

A significant number of research assistantships are available on a variety of research projects, and a limited number of teaching assistantships may be available. Selection of recipients usually is based on scholastic achievement and research interest.

Career Advancement

Graduates are placed in advanced technical positions in industry, consulting firms, or government.

Engineering Career Services develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair and other career-development programming each semester.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

Electrical and Computer Engineering

Chair

- Er-Wei Bai

Undergraduate majors: computer science and engineering (B.S.E.); electrical engineering (B.S.E.)

Graduate degrees: M.S. in electrical and computer engineering; Ph.D. in electrical and computer engineering

Faculty: <https://ece.engineering.uiowa.edu/people>

Website: <https://ece.engineering.uiowa.edu/>

Electrical engineers and computer engineers make vital contributions to nearly all facets of modern society through their work in areas such as the internet of things (IoT), artificial intelligence, deep learning, computer systems, software applications, medical imaging, robotics, wireless communications, and fiber optics. From smart technologies to high-definition television, cellular telephones, and computer networks, the contributions of electrical and computer engineers are constantly reinventing the world.

Many benefits that have sprung from electrical and computer engineering technology now are taken for granted—noninvasive imaging of the brain and other internal organs, astonishing views of the solar system's outer planets, and wireless telecommunications. Electrical and computer engineers also play crucial roles in major emerging technologies, such as driverless vehicles, smart cities, and human genomics.

As the United States strives to retain or enlarge its share of national and international markets, electrical and computer engineers will play a more important role in fostering innovation, increasing productivity, and creating intelligent systems to improve the quality of life for residents.

Electrical and computer engineers work in research, design, development, manufacturing, sales, market analysis, consulting, field service, and management. They are employed in computer, semiconductor, software, aerospace, telecommunication, medical, radio, television, and power industries, and many graduates pursue entrepreneurial ventures.

Programs

Undergraduate Programs of Study

Majors

- Major in Computer Science and Engineering (Bachelor of Science in Engineering) [p. 1488]
- Major in Electrical Engineering (Bachelor of Science in Engineering) [p. 1492]

Graduate Programs of Study

Majors

- Master of Science in Electrical and Computer Engineering [p. 1497]
- Doctor of Philosophy in Electrical and Computer Engineering [p. 1499]

Research and Study Areas

Augmented Reality and Multimodal Sensing

The department is actively involved in research to advance augmented reality and virtual reality systems, particularly regarding their underlying multimodal imaging and sensing techniques. Work in this area relies on mathematics, instrumentation, software engineering, computer vision, and computer graphics to design and engineer novel methodologies and systems for sensing, virtually replicating, understanding, and then augmenting the world around us. This is an interdisciplinary research area that encompasses fields such as: 3-D/4-D surface imaging and measurement, 3-D/4-D data compression and communication, real-time computer vision, computer-aided surgeries, machine learning, computer graphics, human-computer interaction, multimedia on mobile devices, and computer-aided design. In addition to advancing the basic science within those fields, departmental researchers are pursuing various applications of their work via collaborations with the Carver College of Medicine [p. 1658], the Public Digital Arts faculty cluster, the Iowa Informatics Initiative, the Iowa Institute of Biomedical Imaging, and the Iowa Technology Institute.

Bioinformatics and Computational Biology

The Center for Bioinformatics and Computational Biology (CBCB) is a multidisciplinary research enterprise that encompasses numerous laboratories and collaborates with many graduate programs on campus. Students may earn the Certificate in Informatics [p. 1597] (Graduate College), to augment their Ph.D. training in disciplines ranging from molecular biology to biochemistry to computer science to engineering.

The Coordinated Laboratory for Computational Genomics, a CBCB affiliate, engages in a broad range of research activities that complement the Human Genome Project. Members of the laboratory develop new hardware and software techniques for analysis and annotation of genomic sequence, its transcription and translation, and the proteome. Other efforts are aimed at systematic capture and curation of phenotypic information acquired from massive databases of clinical information derived from collaborations with the Carver College of Medicine. The goal of these projects is to elucidate the mechanisms of human disease and develop promising new methods for cures and treatments.

The laboratory's facilities include more than 200 workstations, three Linux clusters, and access to the National Science Foundation (NSF) TeraGrid and other high-performance computing facilities. Projects in the laboratory frequently involve cutting-edge genomic and proteomic instruments such as the Roche 454 next-generation sequencing platform and several high-throughput gene expression (microarray) measurement platforms.

Computer Systems

High-performance computing research involves development of collaborative and parallel computing environments and associated software tools, and use of these facilities and tools in varied application domains, including image processing and computational biology. Current work in networking focuses on protocols and layer-integration schemes that

support high-performance wireless networking, and on control and coordination of mobile ad hoc networks. Current research facilities in these areas include several large cluster computers and an experimental asynchronous transfer mode (ATM) network.

Departmental facilities that support this work include Linux and Windows workstations and server nodes that provide college-wide networked computer services. Advanced computing facilities also are available at national supercomputing centers and federal laboratories.

Control Systems and Systems Theory

Control systems and system theory use feedback to improve the predictability and efficiency of engineered systems ranging from electronic amplifiers to vehicle guidance systems, manufacturing processes, communication channels, and the internet. Work in control systems and systems theory draws heavily on results from mathematics, physics, and computer science to model the systems that are to be controlled and to implement feedback controllers.

Current research emphasizes optimal, adaptive, digital, robust, and stochastic control and the control of discrete event dynamical systems. Recent work has concerned the estimation, identification, and robust control of linear and nonlinear dynamical systems; set membership identification, control over wireless communication channels; coordinated fault tolerant control of unmanned vehicles; use of control theory to analyze distributed computing, communications, and manufacturing systems; interplay between communications and control; design of fast digital controllers using subband coding; and multirate control systems.

Research in control systems and systems theory is supported by extensive computing resources and collaborations with local industry, the National Advanced Driving Simulator (NADS), the University of Iowa Technology Institute, and the Carver College of Medicine [p. 1658].

Nanoscale Electronics and Spintronics

Nanotechnology is the branch of technology that deals with dimensions that are 10,000 times smaller than the width of the hair. Nanoscience and nanotechnology involve the ability to see and to control individual atoms and molecules. Utilizing the nanofabrication and nanoimaging facilities available on campus, nanoscale transistors, optical circuits, biosensors, and solar cells are being developed. Departmental researchers are pursuing experimental, theoretical, and large-scale computational approaches.

Optoelectronics

Research in this area is carried out primarily in the new Iowa Center for Research, Exploration, and Advanced Technology in Engineering and Sciences (Iowa-CREATES) at the Iowa Advanced Technology Laboratories, a well-equipped, modern facility two blocks from the Seamans Center for the Engineering Arts and Sciences. Current research topics are optical and electronic properties of semiconductors, semiconductor devices, electro-optics, nonlinear optics, nonlinear wave propagation in plasmas, nanotechnology, and medical devices. This research is at the interface of optical

engineering, materials engineering, quantum physics, and electromagnetics.

Much work is done in collaboration with other University of Iowa departments, including the Departments of Physics and Astronomy, and Chemistry (College of Liberal Arts and Sciences), and the Departments of Internal Medicine and Neurosurgery (Carver College of Medicine). Facilities include two molecular beam epitaxy reactors (in physics and astronomy), a microfabrication laboratory with nanometer resolution capabilities, electrical characterization capability to 22 GHz, several Ti-sapphire lasers, a mid-infrared optical parametric oscillator, and plasma equipment for nonlinear wave plasma interaction studies.

Examples of current projects are the design and fabrication of diode lasers and light-emitting diodes based on the bandgap engineering of antimony and arsenic-based III-V compound semiconductors, phase control of laser arrays, development of an all-optical power equalizer, characterization of quantum well devices, nonlinear waveguide devices, development of a noncontact method to measure transport properties, plasma and optical soliton excitation and propagation, development of cellular probes, gas sensors, and a laser scalpel for medical research.

Signal and Image Processing

Research in image processing and basic and applied signal processing is supported by a digital signal processing laboratory and an image analysis laboratory. Collaborative research with faculty in the Departments of Radiology, Neurology, Psychiatry, Internal Medicine, Ophthalmology and Visual Sciences, Radiation Oncology (Carver College of Medicine), and the Roy J. Carver Department of Biomedical Engineering is directed at quantitative analysis of medical images.

In the area of signal processing, current projects include analysis and design of efficient adaptive algorithms for signal processing, efficient coding and transmission of speech, speech processing aids for the hearing impaired, robust equalization of uncertain channels, application of neural networks to communications systems, multirate signal processing, and subband coding and channel equalization.

Image processing and analysis projects include development of novel methods for image segmentation, image registration, computer-aided detection and diagnosis, early identification of disease patterns from medical image data, computer-aided surgical planning, virtual and augmented reality medical image visualization, building anatomic atlases, and a broad range of translational medicine projects focusing on research and clinical applications of the novel methods. The areas of interest span all scales, from molecules to cells to small animals to humans, and cover a broad range of organ systems and targeted diseases. The spectrum of medical imaging modalities used for research and applications in image processing and analysis is equally broad, encompassing all existing modalities, including X-ray, CT, MR, PET, SPECT, and OCT.

The Medical Image Analysis Labs consist of several specialized facilities for digital image processing. They are equipped with state-of-the-art devices for data storage, transfer, visualization, and analysis. High-capacity data storage devoted to image processing research offers more than 35 TB of online hard disk space. An augmented reality medical image visualization lab serves as a high-performance collaborative resource for the Iowa Institute for Biomedical Imaging. The institute makes additional resources available to

image processing research, including small and large animal as well as human research scanning facilities, and provides a backbone for interdisciplinary medical image analysis research to electrical and computer engineering graduate students and faculty.

Wireless Communication Systems

The department is engaged in research using wireless sensor networks (WSNs), which consist of spatially distributed autonomous devices that use sensors to cooperatively monitor physical or environmental conditions such as temperature, sound, vibration, pressure, motion, and pollutants at different locations. WSNs are used for environment and habitat monitoring, health care applications, home automation, and traffic control. Current research includes the application of WSN, traditional telemetry, and commercial cellular communication infrastructure for geosciences data collection (e.g., rainfall, water quality, soil moisture).

Another important research interest involving distributed sensor networks is the distributed control of power systems, especially requirements of the next-generation electric grid with smart metering and distributed generation using small-scale wind and solar generators. Research on WSNs also includes the design of cooperative communication techniques for energy efficient WSNs and issues of localization, network organization, and control.

Research activities in communication systems focus on design and analysis of receivers for digital wireless communications, especially the development of effective and practical receivers for multiple-user wireless cellular systems in multipath channels. Topics of research include the design, analysis, and experimental demonstration of large-scale distributed multiple-input multiple-output (MIMO) arrays for communication sensing and electronic warfare; precision interference cancellation techniques using feedback control; and synchronization and channel estimation for massive MIMO Base Stations.

Facilities

Undergraduate Core

Electrical and computer engineering provides core instruction for the college in electrical circuits, electronics, instrumentation, and computers. A key part of this core teaching responsibility lies in providing students with an early opportunity to use engineering laboratory instrumentation.

Undergraduate Laboratories

The department's undergraduate laboratories include facilities for the study of the internet of things (IoT), electrical and electronic circuits, wireless communication, power and sustainable energy, signals and systems, embedded systems, measurement automation, communication systems, control systems, image processing, robotics, and optics. The laboratories are equipped with modern equipment, including digital oscilloscopes, computer-controlled virtual instrumentation, and software and hardware for embedded-systems development.

Graduate Facilities and Laboratories

The department has laboratories intended primarily for graduate research in the areas of virtual and augmented

reality, deep learning, big data, bioinformatics, image processing, software engineering, electro-optics, control systems, medical imaging and image analysis, large-scale intelligent systems, and wireless communication. Linux, Macintosh, and Windows workstations and server nodes provide college-wide networked computing support. Through cooperative arrangements, advanced computing facilities at national supercomputing centers, federal laboratories, and other universities are available for graduate research.

Courses

Electrical and Computer Engineering Courses

ECE:0000 Electrical Engineering Internship/Co-op 0 s.h.

Electrical engineering students participating in the Cooperative Education Program register in this course during work assignment periods; registration provides a record of participation in the program on the student's permanent record. Requirements: admission to Cooperative Education Program.

ECE:1000 First-Year Seminar 1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first- or second-semester standing.

ECE:2400 Linear Systems I 3 s.h.

Introduction to continuous and discrete time signals and systems with emphasis on Fourier analysis; examples of signals and systems; notion of state and finite state machines; causality; linearity and time invariance; periodicity; Fourier transforms; frequency response; convolution; IIR and FIR filters, continuous and discrete Fourier transforms; sampling and reconstruction; stability. Prerequisites: ENGR:2120 and MATH:2560.

ECE:2410 Principles of Electronic Instrumentation 4 s.h.

Principles of analog signal amplification, signal conditioning, filtering; operational amplifier circuit analysis and design; principles of operation of diodes, bipolar transistors, field effect transistors; discrete transistor amplifier analysis and design; laboratory included. Prerequisites: ENGR:2120 and PHYS:1612 and MATH:2560.

ECE:3000 Electrical and Computer Engineering Professional Seminar 1 s.h.

Professional aspects of electrical and computer engineering, and computer science, presented through lectures and discussions by guest speakers, field trips, and panel discussions. Requirements: junior standing.

ECE:3320 Introduction to Digital Design 3 s.h.

Modern design and analysis of digital switching circuits; combinational logic; sequential circuits and system controllers; interfacing and busing techniques; design methodologies using medium- and large-scale integrated circuits; lab arranged. Requirements: sophomore standing.

ECE:3330 Introduction to Software Design 3 s.h.

Design of software for engineering systems; algorithm design and structured programming; data structures; introduction to object-oriented programming in JAVA; applications to engineering problems; lab arranged. Prerequisites: ENGR:2730. Same as IGPI:3330.

- ECE:3350 Computer Architecture and Organization** **3 s.h.**
Basic concepts; computer evolution, register transfer level design, simulation techniques, instruction sets (CISC and RISC), assembly language programming, ALU design, arithmetic algorithms and realization of arithmetic functions, hardwired and microprogrammed control, memory hierarchies, virtual memory, cache memory, interrupts and DMA, input/output; introduction to high-performance techniques, pipelining, multiprocessing; introduction to hardware description languages (Verilog, VHDL); students design and simulate a simple processor. Prerequisites: ENGR:2730 and ECE:3320.
- ECE:3360 Embedded Systems** **3 s.h.**
Microprocessors and microcontrollers as components in engineering systems; embedded system design processes; microcontroller/microprocessor architecture; interrupts and traps; memory and device interfacing; low-level and high-level software design for embedded systems; examples of embedded system architecture and design; fundamentals of operating systems; tasks and processes; context switching and scheduling; memory and file management, interprocess communication; device drivers. Prerequisites: ENGR:2730 and ECE:3320. Corequisites: ECE:2410.
- ECE:3400 Linear Systems II** **3 s.h.**
Builds on concepts from ECE:2400 towards application in digital signal processing; lab exercises, hands-on term project; review of key linear systems concepts; MATLAB basics, tools, and functions for digital signal processing; discrete time systems, difference equations in digital signal processing; Fourier analysis of discrete time signals; transient, steady-state, and frequency response of discrete time, linear time-invariant (LTI) systems; Z-transform analysis; sampling theorem and aliasing; power spectral density and periodograms; recording and processing of sound and music; finite impulse response (FIR) and infinite impulse response (IIR) filters; designing and using filters in MATLAB. Prerequisites: ECE:2400.
- ECE:3410 Electronic Circuits** **4 s.h.**
Design and analysis of FET and BJT amplifiers; low, midrange, high-frequency analysis; difference amplifiers; feedback amplifiers; SPICE simulation; power amplifiers; digital logic families. Prerequisites: ECE:2410 and ECE:2400.
- ECE:3500 Communication Systems** **3 s.h.**
Introduction to analog and digital communications, with an emphasis on modulation and noise analysis; Fourier analysis, probability theory, random variable and processes, AM, FM, pulse-coded modulation, binary digital modulation, SNR analysis of AM and FM, BER analysis of digital modulation schemes. Prerequisites: ECE:2400.
- ECE:3540 Communication Networks** **3 s.h.**
Communication networks, layered network architectures, applications, network programming interfaces (e.g., sockets), transport, congestion, routing, data link protocols, local area networks, emerging high-speed networks, multimedia networks, network security, internet protocol; technology examples. Prerequisites: ENGR:2730. Corequisites: STAT:2020.
- ECE:3600 Control Systems** **3 s.h.**
Fundamental concepts of linear feedback control, mathematical modeling, transfer functions, system response, feedback effects, stability, root-locus and frequency response analysis and design, compensation, lab arranged. Prerequisites: ECE:2400.
- ECE:3700 Electromagnetic Theory** **3 s.h.**
Electric and magnetic forces, Maxwell's equations, wave propagation; applications, including radiation, transmission lines, circuit theory. Prerequisites: MATH:3550 and PHYS:1612.
- ECE:3720 Semiconductor Devices** **3 s.h.**
Fundamentals of semiconductor physics and devices; principles of the p-n junction diode, bipolar transistor, field effect transistor. Prerequisites: ECE:3410 and PHYS:1612.
- ECE:3998 Individual Investigations: Electrical Engineering** **arr.**
Individual projects for electrical engineering undergraduate students: laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research.
- ECE:4480 Knowledge Discovery** **3 s.h.**
Knowledge discovery process, including data reduction, cleansing, transformation; advanced modeling techniques from classification, prediction, clustering, association; evaluation and integration. Same as BAIS:4480, CS:4480.
- ECE:4720 Introductory Optics** **3 s.h.**
Wave motion and superposition, electromagnetic theory, photons, propagation of light, geometrical and physical optics, interference, diffraction, polarization, and Fourier optics; optical components, devices, and systems. Prerequisites: (PHYS:1512 or PHYS:2703 or PHYS:1612) and (MATH:1560 or MATH:1860). Same as PHYS:4720.
- ECE:4728 Introductory Solid State Physics** **3 s.h.**
Phenomena associated with solid state; classification of solids and crystal structures, electronic and vibrational properties in solids; thermal, optical, magnetic, dielectric properties of solids. Prerequisites: PHYS:3741. Same as PHYS:4728.
- ECE:4880 Principles of Electrical and Computer Engineering Design** **3 s.h.**
Design problems requiring integration of subject matter from other required electrical and computer engineering courses. Prerequisites: ECE:2410 and ENGR:2730. Requirements: senior standing.
- ECE:4890 Senior Electrical and Computer Engineering Design** **3 s.h.**
Individual or team project; demonstration of completed project and formal engineering report. Prerequisites: ECE:4880. Requirements: completion of three required subprogram courses.
- ECE:5000 Graduate Seminar: Electrical and Computer Engineering** **0 s.h.**
Presentation and discussion of recent advances and research in electrical and computer engineering by guest lecturers, faculty, students. Requirements: graduate standing.
- ECE:5210 Bioinformatics Techniques** **3 s.h.**
Informatics tools and techniques applied to modern problems in biomedicine and basic life sciences; common tools, experience applying tools in contemporary problem settings; genomics and genetics, how to sequence a genome, transcription and expression, SNPs, Perl, BioPerl, Perl modules, Ensembl API, BLAST/BLAT, NCBI, UCSC, Ensembl Genome browsers, linkage, association, disease gene identification. Prerequisites: BIOL:1411 and (ENGR:2730 or CS:2110 or CS:5110). Same as BME:5320, IGPI:5321.

- ECE:5220 Computational Genomics** 3 s.h.
Introduction to computational methods used in genome analysis and functional genomics; biological sequence analysis, sequence database search, microarray data analysis, biological network analysis; in-depth coverage of principal genome science challenges and recent solutions. Prerequisites: (BIOS:4120 or STAT:3510) and (CS:5110 or ENGR:1300). Recommendations: completion of BME:5320. Same as BIOL:5320, BME:5330, GENE:5173, IGPI:5330.
- ECE:5300 Switching Theory** 3 s.h.
Switching algebras; combinational circuits—hazards, minimization, multiple-output networks; sequential circuits—critical races, essential hazards, fundamental-mode, pulse-mode, synchronous circuits-state assignment, state reduction; input-output experiments. Prerequisites: ECE:3320.
- ECE:5320 High Performance Computer Architecture** 3 s.h.
Problems involved in designing and analyzing current machine architectures using hardware description language (HDL) simulation and analysis, hierarchical memory design, pipeline processing, vector machines, numerical applications, multiprocessor architectures and parallel algorithm design techniques; evaluation methods to determine relationship between computer design and design goals. Prerequisites: ECE:3350 or CS:3620. Same as CS:5610.
- ECE:5330 Graph Algorithms and Combinatorial Optimization** 3 s.h.
Combinatorial optimization problems; time complexity; graph theory and algorithms; combinatorial optimization algorithms; complexity theory and NP-completeness; approximation algorithms; greedy algorithms and matroids. Prerequisites: ECE:3330. Same as IGPI:5331.
- ECE:5380 Testing Digital Logic Circuits** 3 s.h.
Logic models for faults; fault detection in combinational and sequential circuits; fault-diagnosis; design for testability; random testing, compressed data testing, built-in testing. Prerequisites: ECE:3320.
- ECE:5410 Advanced Circuit Techniques** 3 s.h.
Advanced circuit techniques and principles; analog circuit design including amplifiers, oscillators, multipliers, modulators, phase-locked loops, active filters, switching power supplies, analog to digital and digital to analog converters; lab activities include circuit simulation, design, printed circuit board (PCB) layout and fabrication, assembly, and testing. Prerequisites: ECE:3410.
- ECE:5420 Power Electronics** 3 s.h.
Fundamental concepts and design techniques of power electronics circuits; switching power pole and various switch-mode DC to DC power conversion topologies; feedback control of switch-mode DC to DC power supplies; diode rectification of AC utility power and Power Factor Control (PFC) circuits; electromagnetic concepts and design of high-frequency inductors and transformers; electrically isolated switch-mode DC power supply topologies and soft-switching DC-DC converters and inverters; techniques for synthesis of DC and low-frequency AC sinusoidal voltages. Prerequisites: PHYS:1611 and ENGR:2120 and MATH:2560. Requirements: junior standing.
- ECE:5430 Electric Drive Systems** 3 s.h.
Basic characteristics of DC and AC electric motors and their associated power electronics interfaces; applications of electric machines and drives that are essential for wind turbines, electric and hybrid-electric; emphasis on vehicles; electric machines in context of overall drives and associated applications; space-vector theory used to analyze electric machines and drives; DC motor/generator characteristics and control; AC single phase and three-phase motor characteristics and feedback control, including AC synchronous and induction motors. Prerequisites: ENGR:2120 and PHYS:1611 and MATH:2560. Requirements: junior standing.
- ECE:5450 Machine Learning** 3 s.h.
Mathematical foundations and practical techniques of pattern recognition; adaptation, learning, description; statistical pattern recognition; syntactic pattern recognition, neural networks for recognition; fuzzy logic for recognition; nonstandard and combined pattern recognition approaches. Prerequisites: ECE:2400 or BME:2200. Same as IGPI:5450.
- ECE:5460 Digital Signal Processing** 3 s.h.
Theory, techniques used in representing discrete-time signals; system concepts in frequency and sampling domains; FIR and IIR digital filter theory, design and realization techniques; theory, application of discrete Fourier transforms/FFT. Prerequisites: ECE:3400. Same as IGPI:5460.
- ECE:5470 Medical Imaging Physics** 3 s.h.
Physics and data acquisition techniques of major medical imaging modalities (X-ray, CT, MR, ultrasound, PET, SPECT); physical interactions of energy with living tissue; principles and methods for acquiring imaging data and subsequent image construction; how individual modalities influence image quality; MATLAB programming required. Second in a medical imaging sequence. Prerequisites: BME:2200 and BME:2210. Same as BME:5210, IGPI:5206.
- ECE:5480 Digital Image Processing** 3 s.h.
Mathematical foundations and practical techniques for digital manipulation of images; image sampling, compression, enhancement, linear and nonlinear filtering and restoration; Fourier domain analysis; image pre-processing, edge detection, filtering; image segmentation. Prerequisites: ECE:2400 or BME:2200. Same as IGPI:5480.
- ECE:5490 Multi-Dimensional Image Analysis Tools and Techniques** 3 s.h.
Broad exposure to common tools of medical imaging analysis in commercial, clinical, and research settings, including algorithm development (using C++ and ITK), rapid prototyping (SimpleITK, nipy, ipython notebook), statistical analysis (R), machine learning (scikit-learn, keras/tensorflow) and reproducible science tools (python, git, bash); special emphasis on big data challenges associated with volume, velocity, and veracity; real-world settings for problems include image-guided robotic surgery, dose treatment planning, and image analysis. Prerequisites: ECE:5480 and (ECE:3330 or CS:2820).
- ECE:5500 Communication Theory** 3 s.h.
Random processes, source coding, digital transmission at baseband, optimum receiver design for Gaussian noise, error probability and power spectrum analysis, signal design for bandlimited channels, digital carrier modulation, bandwidth/energy/error probability tradeoffs, coding for error detection and correction. Prerequisites: STAT:2020 and ECE:3500.

ECE:5520 Introduction to Information and Coding Theories 3 s.h.

Quantitative measure of information; source encoding; error detecting codes; block and convolutional codes, design of hardware and software implementations; Viterbi decoding. Prerequisites: ECE:3500 and STAT:2020.

ECE:5530 Wireless Sensor Networks 3 s.h.

Wireless sensor networks overview; antennas, radio propagation models; WSN power and energy considerations, engineering issues, batteries, networks layers, stacks; medium access control (MAC); spread spectrum, FHSS, CDMA; infrastructure establishment; WSN routing; localization; synchronization; sensors; RFID; WSN case studies; lab. Prerequisites: STAT:2020 and ECE:3500. Requirements: senior standing.

ECE:5550 Internet of Things 3 s.h.

Internet of things (IoT) describes the evolution of the internet to intelligent devices, sensors, actuators, controllers, and other types of internet-enabled components; soon, IoT-based applications will enable seminal advances in a wide range of areas including health and lifestyle, transportation, smart cities, environment, energy, agriculture, and industry; topics include IoT logical and physical structure, IoT-enabled internet services, IoT devices/platforms/endpoints, IoT application domains, IoT security and privacy issues, and IoT data analytic; case studies and projects focused on design and implementation of a working IoT application. Prerequisites: ENGR:2730. Requirements: background in computer networks or embedded systems.

ECE:5600 Control Theory 3 s.h.

State space approach; controllability, observability, canonical forms, Luenberger observers, feedback control via pole placement, stability, minimal realization and optimal control. Prerequisites: ECE:3600.

ECE:5620 Electric Power Systems 3 s.h.

Overview of electric power systems; single phase and three-phase representations of electric power signals and electromagnetic concepts; AC transmission lines and underground cables, power flow in a power system network, AC power transformers, High Voltage DC (HVDC) power transmission, electric power distribution, synchronous generators, voltage regulation and stability, power system transients and dynamic stability, control of interconnected power systems, transmission line faults, transient over-voltages and surge protection. Prerequisites: PHYS:1611 and ENGR:2120 and MATH:2560. Requirements: junior standing.

ECE:5630 Sustainable Energy Conversion 3 s.h.

Overview of sustainable energy conversion technologies; thermal energy conversion; Carnot and Rankine cycles; solar resource and raw energy availability, PV solar cell characteristics, solar panel construction, Maximum Power Point (MPP) tracking and utility grid interface; wind energy conversion resource and available energy, wind turbine configurations, electrical power interface electronics; ocean energy conversion tidal and wave resources and conversion technologies; tidal basin containment conversion and tidal current turbine systems. Prerequisites: ENGR:2120 and PHYS:1611 and MATH:2560. Requirements: junior standing.

ECE:5640 Computer-Based Control Systems 3 s.h.

Discrete and digital control systems; application of computers in control; sampling theorem; discrete time system models; analysis and design of discrete time systems; control design by state variable and input/output methods; advanced topics in digital controls; lab. Prerequisites: ECE:5600. Same as IGPI:5641.

ECE:5700 Advanced Electromagnetic Theory 3 s.h.

Time varying fields; plane wave propagation, reflection, refraction; waves in anisotropic media transmission lines, impedance matching, Smith chart; metallic and dielectric wave guides; resonators; antennas, antenna arrays. Prerequisites: ECE:3700.

ECE:5720 Solid State Physical Electronics 3 s.h.

Advanced topics in semiconductor physics and devices; elementary concepts in quantum and statistical mechanics, diodes, bipolar transistor, field-effect transistor. Prerequisites: ECE:3720.

ECE:5780 Optical Signal Processing 3 s.h.

Linear systems description of optical propagation; diffraction and angular plane wave spectrum; lenses as Fourier transformers, lens configurations as generalized optical processors; lasers, coherence, spatial frequency analysis; holography; convolvers, correlators, matched filters; synthetic aperture radar; optical computing. Requirements: for ECE:5780—ECE:3700; for PHYS:4820—PHYS:3812. Same as PHYS:4820.

ECE:5790 Electro Optics 3 s.h.

Wave equation solutions; optical birefringence; finite beam propagation in free space, dielectric waveguides and fibers; optical resonators; nonlinear phenomena; electro-optic, acousto-optic modulation; optical detection, noise; application to communication systems. Requirements: for ECE:5790—ECE:3700; for PHYS:4726—PHYS:3812. Same as PHYS:4726.

ECE:5800 Fundamentals of Software Engineering 3 s.h.

Problem analysis, requirements definition, specification, design, implementation, testing/maintenance, integration, project management; human factors; management, technical communication; design methodologies; software validation, verification; group project experience. Prerequisites: CS:2820 or ECE:3330. Same as CS:5800.

ECE:5810 Formal Methods in Software Engineering 3 s.h.

Models, methods, and their application in all phases of software engineering process; specification methods; verification of consistency, completeness of specifications; verification using tools. Prerequisites: ECE:3330 or CS:2820. Recommendations: CS:4350. Same as CS:5810.

ECE:5820 Software Engineering Languages and Tools 3 s.h.

Modern agile software development practices for cloud and web-based applications, using state-of-the-art software engineering languages, tools, and technologies; agile software development practices, software-as-a-service (SAAS), and the Ruby on Rails Development Framework. Prerequisites: ECE:3330 or CS:2820. Same as CS:5820.

ECE:5830 Software Engineering Project 3 s.h.

Team software development project using concepts and methodologies learned in earlier software engineering classes; practical aspects of large-scale software development. Prerequisites: ECE:5820. Same as CS:5830.

ECE:5995 Contemporary Topics in Electrical and Computer Engineering arr.

New topics or areas of study not offered in other electrical and computer engineering courses; based on faculty/student interest; not available for individual study.

ECE:5998 Individual Investigations: Electrical and Computer Engineering arr.

Individual projects for electrical and computer engineering graduate students; laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

ECE:5999 Research: Electrical and Computer Engineering M.S. Thesis arr.

Experimental and/or analytical investigation of approved topic for partial fulfillment of requirements for M.S. degree with thesis in electrical and computer engineering. Requirements: graduate standing.

ECE:7470 Image Analysis and Understanding 3 s.h.

Mathematical foundations and practical techniques of digital image analysis and understanding; image segmentation (from edges and regions), object description (from boundaries, regions, scale, scale insensitive descriptions, 3-D shape, texture) pattern recognition (statistical and syntactic methods, cluster analysis), image understanding (knowledge representation, control strategies, matching, context, semantics), image analysis and understanding systems; lab arranged. Prerequisites: ECE:5480. Same as IGPI:7470.

ECE:7480 Advanced Digital Image Processing 3 s.h.

Advanced local operators (scale-space imaging, advanced edge detection, line and corner detection), image morphology (binary/gray scale operators, morphological segmentation and watershed), digital topology and geometry (binary/fuzzy digital topology, distance functions, skeletonization), color spaces, wavelets and multi-resolution processing (Haar transform, multi-resolution expansions, wavelet transforms in one or two dimensions, fast wavelet transform, wavelet packets), image registration (intensity correlation, mutual information, and landmark-based deformable registration methods). Prerequisites: ECE:5460 and ECE:5480. Same as IGPI:7480.

ECE:7720 Semiconductor Physics 3 s.h.

Electronic, optical, and materials properties of semiconductors. Prerequisites: PHYS:4728 and PHYS:5742. Same as PHYS:7720.

ECE:7930 Seminar: Plasma Physics arr.

Current research. Same as PHYS:7930.

ECE:7999 Research: Electrical and Computer Engineering Ph.D. Thesis arr.

Experimental and/or analytical investigation of approved topic for partial fulfillment of requirements for Ph.D. in electrical and computer engineering.

Computer Science and Engineering, B.S.E.

The Bachelor of Science in Engineering (B.S.E.) program in computer science and engineering combines the technical content of a computer science degree and a computer engineering degree in a single degree program. The program curriculum is jointly taught by faculty from the Department of Electrical and Computer Engineering and the Department of Computer Science (College of Liberal Arts and Sciences). The program provides students with a strong theoretical and conceptual understanding of the principles underlying computer software and hardware along with the engineering analysis, design, and multidisciplinary teamwork skills needed to develop large and complex systems containing both software and hardware components.

The computer science and engineering program encompasses the technical rigor of a Bachelor of Science program in computer science and a Bachelor of Science program in computer engineering. Graduates gain the foundational knowledge provided by a computer science education together with the critical thinking, problem-solving, and system design skills at the heart of a computer engineering curriculum.

Educational Objectives

Graduates of the computer science and engineering program will:

- exhibit leadership and vision in contributing to the computing-related technical and policy decisions of industry, government, and research enterprises;
- demonstrate computing skills and problem-solving abilities that permit them to contribute in a variety of technical, business, and academic careers;
- thrive in diverse, global, and multidisciplinary environments;
- possess the ability to communicate effectively and participate collaboratively in interactions with other computing and engineering professionals; and
- understand the importance of participating in lifelong learning activities that enhance their professional and personal development.

Requirements

The Bachelor of Science in Engineering with a major in computer science and engineering (CSE) requires a minimum of 129 s.h. Students must have a g.p.a. of at least 2.00 on all college work used to satisfy degree requirements as well as on all work undertaken at the University of Iowa.

The major provides technical depth and breadth as well as flexibility and the opportunity for students to customize their programs according to their own goals and interests. Students choose one of several elective focus areas (EFAs) according to the type of job or research they plan to pursue; see "Elective Focus Area Courses" below. Students also have the opportunity to work with their academic advisor to build an EFA plan that adheres to their goals and interests.

Students complete the B.S.E. core requirements, which include RHET:1030 Rhetoric, ENGR:1300 Introduction to Engineering Computing; and courses in chemistry, engineering mathematics and fundamentals, and physics.

Students take CS:1210 Computer Science I: Fundamentals instead of ENGR:1100 Introduction to Engineering Problem Solving. Those who complete ENGR:1100 Introduction to Engineering Problem Solving before entering the CSE program may use that course for elective credit.

They also complete the curriculum designed for their major program, which covers four major stems: mathematics and basic sciences, engineering topics, an elective focus area, and the general education component. For information about the curriculum stems, see the Bachelor of Science in Engineering [p. 1428] in the Catalog.

CSE students must complete core courses; math, science, and communication courses; required computer science and engineering program courses; a constrained program elective course; approved elective focus area (EFA) courses; general education component (GEC) courses; and a two-semester capstone design sequence.

The B.S.E. with a major in computer science and engineering requires the following coursework.

Core Computing Courses

Code	Title	Hours
All of these:		
CS:1210	Computer Science I: Fundamentals	4
ENGR:1300	Introduction to Engineering Computing	3
ENGR:2730	Computers in Engineering	3

Core Engineering Courses

Code	Title	Hours
All of these:		
ENGR:1000	Engineering Success for First-Year Students	1
ENGR:2110	Engineering Fundamentals I: Statics	2
ENGR:2120	Engineering Fundamentals II: Electrical Circuits	3
ENGR:2130	Engineering Fundamentals III: Thermodynamics	3

Math, Science, and Communication Courses

Code	Title	Hours
All of these:		
CHEM:1110	Principles of Chemistry I	4
PHYS:1611	Introductory Physics I	4
PHYS:1612	Introductory Physics II	4
MATH:1550	Engineering Mathematics I: Single Variable Calculus	4
MATH:1560	Engineering Mathematics II: Multivariable Calculus	4
MATH:2550	Engineering Mathematics III: Matrix Algebra	2
MATH:2560	Engineering Mathematics IV: Differential Equations	3
RHET:1030	Rhetoric	4

STAT:2020	Probability and Statistics for the Engineering and Physical Sciences	3
-----------	--	---

Required Program Courses

Code	Title	Hours
All of these:		
ECE:2400	Linear Systems I	3
ECE:2410	Principles of Electronic Instrumentation	4
ECE:3000	Electrical and Computer Engineering Professional Seminar	1
ECE:3320	Introduction to Digital Design	3
ECE:3330	Introduction to Software Design	3
ECE:3350	Computer Architecture and Organization	3
ECE:3360	Embedded Systems	3
ECE:3540	Communication Networks	3
CS:2210	Discrete Structures	3
CS:2230	Computer Science II: Data Structures	4
CS:3330	Algorithms	3
CS:3620	Operating Systems	3
CS:3820	Programming Language Concepts	3

Theory Elective

Code	Title	Hours
One of these:		
ECE:5330	Graph Algorithms and Combinatorial Optimization	3
ECE:5450	Machine Learning	3
ECE:5520	Introduction to Information and Coding Theories	3
ECE:5810	Formal Methods in Software Engineering	3
ECE:5995	Contemporary Topics in Electrical and Computer Engineering (when topic is cryptography)	3
CS:4330	Theory of Computation	3
CS:4350	Logic in Computer Science	3
CS:4720	Optimization Techniques	3
CS:5340	Limits of Computation	3
CS:5360	Randomized Algorithms	3
CS:5370	Computational Geometry	3
CS:5430	Machine Learning	3
CS:5620	Distributed Systems and Algorithms	3
CS:5850	Programming Language Foundations	3
CS:5860	Lambda Calculus and Applications	3

Elective Focus Area Courses

Students select an elective focus area (EFA) to personalize their curriculum and to prepare them for certain jobs or

research study they intend to seek. A number of areas are available, such as bioinformatics, business, medical imaging, embedded systems, and software engineering. Students also may work with their academic advisor to create a customized plan tailored to their goals and interests.

Students complete five elective focus area courses, which they select according to guidelines established by the department. For a complete list of EFAs and course selection guidelines, see Elective Focus Areas on the Department of Electrical and Computer Engineering website.

Students who choose their EFA and general education component carefully may be able to earn the Certificate in Sustainability [p. 2021], the Certificate in Technological Entrepreneurship [p. 1535], or one of several undergraduate minors offered by the University by taking minimal additional coursework beyond that required for the computer science and engineering major.

General Education Component

Students are required to take at least 15 s.h. of General Education Component (GEC) courses; see General Education Component on the College of Engineering website.

The requirements are:

- Engineering Be Creative: complete 3 s.h.
A full list of approved courses can be found on the College of Engineering GEC Options: Be Creative Course List web page.

- GE CLAS Core: complete 3 s.h.

Students must complete 3 s.h. of coursework from one of the approved GE CLAS Core [p. 20] areas below.

Interpretation of Literature
World Languages
Historical Perspectives
International and Global Issues
Literary, Visual, and Performing Arts
Social Sciences
Values and Culture

- Approved Course Subjects: complete 9 s.h.

See the College of Engineering GEC Options: Approved Course Subjects web page.

Capstone Design Courses

In their senior year, students complete a two-semester capstone design sequence culminating in the development and implementation of a significant, original project. The capstone design experience emphasizes teamwork, professionalism, open-ended problem solving, and the ability to work within real-world constraints and engineering standards.

Code	Title	Hours
Both of these:		
ECE:4880	Principles of Electrical and Computer Engineering Design	3
ECE:4890	Senior Electrical and Computer Engineering Design	3

Double Major in Computer Science and Engineering/ Electrical Engineering

Students may earn a double major in computer science and engineering (CSE) and electrical engineering (EE). They must satisfy all requirements of the electrical track of the EE major and all requirements of the CSE major. The double major may be achieved with as few as five additional courses.

The following list shows the required courses that are not in common between the EE and CSE majors. In addition to the courses below, students must take one ECE 5000-level course and an additional 5000-level course that is cross-listed in the Department of Electrical and Computer Engineering and the Department of Computer Science. For more information, contact the Department of Electrical and Computer Engineering.

Code	Title	Hours
ECE:3330	Introduction to Software Design (required for CSE, EE elective focus area)	3
ECE:3350	Computer Architecture and Organization (required for CSE, EE elective focus area)	3
ECE:3400	Linear Systems II (required for EE, CSE elective focus area elective)	3
ECE:3410	Electronic Circuits (required for EE, CSE elective focus area)	4
ECE:3500	Communication Systems (required for EE)	3
ECE:3540	Communication Networks (required for CSE, EE breadth elective)	3
ECE:3600	Control Systems (required for EE)	3
ECE:3700	Electromagnetic Theory (required for EE)	3
ECE:3720	Semiconductor Devices (required for EE)	3
EE depth elective (required for EE, CS theory elective if 5000-level EE course selected from CS theory list)		3
CS:1210	Computer Science I: Fundamentals (required for CSE, EE substitute for ENGR:1100)	4
CS:2210	Discrete Structures (required for CSE, EE elective focus area)	3
CS:2230	Computer Science II: Data Structures (required for CSE)	4
CS:3330	Algorithms (required for CSE)	3
CS:3620	Operating Systems (required for CSE)	3
CS:3820	Programming Language Concepts (required for CSE)	3
CS theory elective (required for CSE, EE depth elective if satisfied with 5000-level EE course from CS theory list)		3

CS elective (required for CSE)		3
MATH:3550	Engineering Mathematics V: Vector Calculus (required for EE)	3

Combined Programs

B.S.E./M.S. in Electrical and Computer Engineering

The College of Engineering offers a Bachelor of Science in Engineering/Master of Science for computer science and engineering undergraduate students who intend to earn a M.S. in electrical and computer engineering. B.S.E./M.S. students may take up to 12 s.h. of graduate-level coursework and do thesis-level research while they are still undergraduates. They may count 9 s.h. of graduate coursework toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the B.S.E., and they normally complete the M.S. one year later.

To be admitted to the degree program, students must have completed at least 80 s.h., must have a cumulative g.p.a. of at least 3.25, and must submit a letter of application to the chair of the Department of Electrical and Computer Engineering. For more information, see Joint B.S./M.S. Degree on the Department of Electrical and Computer Engineering website.

B.S.E./M.C.S.

The College of Engineering and the Department of Computer Science (College of Liberal Arts and Sciences) offer a combined Bachelor of Science in Engineering/Master of Computer Science for computer science and engineering undergraduate students.

The combined degree program allows students to count a limited amount of credit toward both degrees. For more information, see the Master of Computer Science, M.C.S. [p. 326] in the Catalog.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

- a Enrollment in math courses requires completion of a placement exam.
- b Enrollment in chemistry courses requires completion of a placement exam.
- c Courses with prerequisites; students should complete a prerequisite waiver form.
- d Students may select a course from all GE CLAS Core categories except Rhetoric, Quantitative or Formal Reasoning, and Natural Sciences.
- e A full list of approved course subjects can be found on the College of Engineering General Education Component website.
- f Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>

Career Advancement

Students who earn a major in computer science and engineering work in research, design, development, manufacturing, sales, market analysis, consulting, field service, and management. They are employed in computer, semiconductor, software, aerospace, telecommunication, medical, radio, television, and power industries, and many graduates pursue entrepreneurial ventures.

The major also prepares students for further study in many areas demanding computational and engineering skill sets.

Engineering Career Services develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair and other career-development programming each semester.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

Electrical Engineering, B.S.E.

Electrical engineers develop technologies and systems for a wide variety of applications ranging from telecommunications to medical imaging. They play a central role in the design and implementation of any technology that is powered by electricity as well as the generation and distribution of electric power. Topics covered in the electrical engineering curriculum include: design of electronic circuits, communication systems, control systems, and semiconductor devices. Students may opt to specialize in any of these areas as well as others that include electrical power generation and distribution, medical image processing, computer systems, or design of micro- and nano-scale optical and electronic devices.

Educational Objectives

Graduates of the electrical engineering program will:

- exhibit leadership and vision in contributing to the technical and policy decisions of industry, government, and research enterprises;
- demonstrate problem-solving abilities that permit them to contribute in a variety of technical, business, and academic careers;
- thrive in diverse, global, and multidisciplinary environments;
- possess the ability to communicate effectively and participate collaboratively in interactions with engineers and other professionals; and
- understand the importance of participating in lifelong learning activities that enhance their professional and personal development.

Requirements

The Bachelor of Science in Engineering (B.S.E.) with a major in electrical engineering requires a minimum of 128 s.h. Students must have a g.p.a. of at least 2.00 on all college work used to satisfy degree requirements as well as on all work undertaken at the University of Iowa.

The major provides technical depth and breadth as well as flexibility and the opportunity for students to customize their programs according to their own goals. Students choose one of several elective focus areas (EFAs) according to the type of job or research they plan to pursue. More than 20 EFAs are available; see "Elective Focus Area Courses" below. Students also have the opportunity to work with their academic advisor to build an EFA plan that adheres to their goals and objectives.

Students complete the B.S.E. core requirements, which include RHET:1030 Rhetoric; ENGR:1100 Introduction to Engineering Problem Solving and ENGR:1300 Introduction to Engineering Computing; and courses in chemistry, engineering mathematics and fundamentals, and physics. Students also complete the curriculum designed for their major program, which covers four major stems: mathematics and basic sciences, engineering topics, an elective focus area, and the general education component. For information about the curriculum stems, see the Bachelor of Science in Engineering [p. 1428] in the Catalog.

The curriculum is built on a common core of electrical and computer engineering courses taken by all students.

Beginning in their sophomore year, students select either the electrical or computer curricular track and begin taking more specialized courses. The electrical track is intended to provide a broad background in electrical engineering concepts and practice that prepares students for graduate study or electrical engineering careers in a wide range of industries and organizations. The computer track provides focus and depth for students preparing for graduate study, or a career in computer hardware or software engineering. Students begin taking track and EFA courses in their third year.

Students must complete core courses; math, science, and communication courses; required electrical engineering program courses; electrical or computer track courses; one depth elective; one breadth elective; approved elective focus area (EFA) courses; general education component (GEC) courses; and a two-semester capstone design sequence.

The B.S.E. with a major in electrical engineering requires the following coursework.

Core Engineering Courses

Code	Title	Hours
All of these:		
ENGR:1000	Engineering Success for First-Year Students	1
ENGR:1100	Introduction to Engineering Problem Solving	3
ENGR:1300	Introduction to Engineering Computing	3
ENGR:2110	Engineering Fundamentals I: Statics	2
ENGR:2120	Engineering Fundamentals II: Electrical Circuits	3
ENGR:2130	Engineering Fundamentals III: Thermodynamics	3
ENGR:2730	Computers in Engineering	3

Math, Science, and Communication Courses

Code	Title	Hours
All of these:		
CHEM:1110	Principles of Chemistry I	4
PHYS:1611	Introductory Physics I	4
PHYS:1612	Introductory Physics II	4
MATH:1550	Engineering Mathematics I: Single Variable Calculus	4
MATH:1560	Engineering Mathematics II: Multivariable Calculus	4
MATH:2550	Engineering Mathematics III: Matrix Algebra	2
MATH:2560	Engineering Mathematics IV: Differential Equations	3
MATH:3550	Engineering Mathematics V: Vector Calculus	3
RHET:1030	Rhetoric	4
STAT:2020	Probability and Statistics for the Engineering and Physical Sciences	3

Required Program Courses

All of these:		
ECE:2400	Linear Systems I	3
ECE:2410	Principles of Electronic Instrumentation	4
ECE:3000	Electrical and Computer Engineering Professional Seminar	1
ECE:3320	Introduction to Digital Design	3
ECE:3360	Embedded Systems	3
ECE:3700	Electromagnetic Theory	3

Track Courses

Electrical Track Courses

Students in the electrical track complete these track courses.

Code	Title	Hours
All of these:		
ECE:3400	Linear Systems II	3
ECE:3410	Electronic Circuits	4
ECE:3500	Communication Systems	3
ECE:3600	Control Systems	3
ECE:3720	Semiconductor Devices	3

Computer Track Courses

Students in the computer track complete these track courses.

Code	Title	Hours
All of these:		
ECE:3330	Introduction to Software Design	3
ECE:3350	Computer Architecture and Organization	3
CS:2210	Discrete Structures	3
CS:2230	Computer Science II: Data Structures	4
CS:3330	Algorithms	3

Track Breadth and Depth Electives

Students complete one track breadth elective and one track depth elective.

Students in the computer track must choose their track breadth elective from the list of required electrical track courses above. Students in the electrical track must choose their track breadth elective from the list of required computer track courses. Students in either track may instead use ECE:3540 Communication Networks as their track breadth elective.

The track depth elective must be an advanced course, normally numbered 4000 or above, in a subject area within a student's track. For a complete list of depth electives for each track, consult the Department of Electrical and Computer Engineering website.

Elective Focus Area Courses

Students select an elective focus area (EFA) to personalize their curriculum and to prepare them for certain jobs or research study they intend to seek. More than 20 EFAs are available, such as bioinformatics, business, communication systems, medical imaging, nanotechnology, power systems, and software engineering; see Elective Focus Areas on the Department of Electrical and Computer Engineering website. Students also may work with their academic advisor to create a customized plan tailored to their goals and objectives.

Students complete five elective focus area courses in addition to their track breadth and track depth courses, which they choose according to guidelines established by the department.

Students who choose their track, EFAs, and general education component carefully may be able to earn the Certificate in Sustainability [p. 2021], the Certificate in Technological Entrepreneurship [p. 1535], or one of several undergraduate minors offered by the University without taking courses beyond those required for the electrical engineering major. Students selecting the computer track satisfy the requirements for a minor in computer science. Students who take one additional advanced math course meet the requirements for a minor in mathematics.

General Education Component

Students are required to take at least 15 s.h. of General Education Component (GEC) courses; see General Education Component on the College of Engineering website.

The requirements are:

- Engineering Be Creative: complete 3 s.h.
A full list of approved courses can be found on the College of Engineering GEC Options: Be Creative Course List web page.
- GE CLAS Core: complete 3 s.h.
Students must complete 3 s.h. of coursework from one of the approved GE CLAS Core [p. 20] areas below.
 - Interpretation of Literature
 - Diversity and Inclusion
 - World Languages
 - Historical Perspectives
 - International and Global Issues
 - Literary, Visual, and Performing Arts
 - Social Sciences
 - Values and Culture
- Approved Course Subjects: complete 9 s.h.
See the College of Engineering GEC Options: Approved Course Subjects web page.

Capstone Design Courses

In their senior year, students complete a two-semester capstone design sequence culminating in the development and implementation of a significant, original project. The capstone design experience emphasizes teamwork, professionalism, open-ended problem solving, and the ability to work within real-world constraints and engineering standards.

Code	Title	Hours
Both of these:		
ECE:4880	Principles of Electrical and Computer Engineering Design	3
ECE:4890	Senior Electrical and Computer Engineering Design	3

Double Major in Electrical Engineering/Computer Science and Engineering

Students may earn a double major in electrical engineering (EE) and computer science and engineering (CSE). They must satisfy all requirements of the electrical track of the EE major and all requirements of the CSE major. The double major may be achieved with as few as five additional courses.

The following list shows the required courses that are not in common between the EE and CSE majors. In addition to the courses below, students must take one ECE 5000-level course and an additional 5000-level course that is cross-listed in the Department of Electrical and Computer Engineering and the Department of Computer Science. For more information, contact the Department of Electrical and Computer Engineering.

Code	Title	Hours
ECE:3330	Introduction to Software Design (required for CSE, EE elective focus area)	3
ECE:3350	Computer Architecture and Organization (required for CSE, EE elective focus area)	3
ECE:3400	Linear Systems II (required for EE, CSE elective focus area elective)	3
ECE:3410	Electronic Circuits (required for EE, CSE elective focus area)	4
ECE:3500	Communication Systems (required for EE)	3
ECE:3540	Communication Networks (required for CSE, EE breadth elective)	3
ECE:3600	Control Systems (required for EE)	3
ECE:3700	Electromagnetic Theory (required for EE)	3
ECE:3720	Semiconductor Devices (required for EE)	3
EE depth elective (required for EE, CS theory elective if 5000 level-EE course selected from CS theory list)		3
CS:1210	Computer Science I: Fundamentals (required for CSE, EE substitute for ENGR:1100)	4
CS:2210	Discrete Structures (required for CSE, EE elective focus area)	3
CS:2230	Computer Science II: Data Structures (required for CSE)	4

CS:3330	Algorithms (required for CSE)	3
CS:3620	Operating Systems (required for CSE)	3
CS:3820	Programming Language Concepts (required for CSE)	3
CS theory elective (required for CSE, EE depth elective if satisfied with 5000-level EE course from CS theory list)		3
CS elective (required for CSE)		3
MATH:3550	Engineering Mathematics V: Vector Calculus (required for EE)	3

Combined Programs

B.S.E./M.S. in Electrical and Computer Engineering

The College of Engineering offers a Bachelor of Science in Engineering/Master of Science for electrical engineering undergraduate students who intend to earn a M.S. in electrical and computer engineering. B.S.E./M.S. students may take up to 12 s.h. of graduate-level coursework and do thesis-level research while they are still undergraduates. They may count 9 s.h. of graduate coursework toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the B.S.E., and they normally complete the M.S. one year later.

To be admitted to the degree program, students must have completed at least 80 s.h., must have a cumulative g.p.a. of at least 3.25, and must submit a letter of application to the chair of the Department of Electrical and Computer Engineering. For more information, see Joint B.S./M.S. Degree on the Department of Electrical and Computer Engineering website.

Academic Plans

Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Career Advancement

The engineering profession is a foundation for a variety of careers in industry, medicine, law, government, and consulting. Engineering majors hold eight of the top ten spots on the list of top-paid majors for bachelor's degree graduates, according to the National Association of Colleges and Employers (NACE). Electrical engineers find employment everywhere smart technology is employed. They consistently rank among the most sought after and highest-paid technology professionals. On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Electrical engineers work in research, design, development, manufacturing, sales, market analysis, consulting, field service, and management. They are employed in computer, semiconductor, software, aerospace, telecommunication, medical, radio, television, and power industries.

Engineering Career Services develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair and other career-development programming each semester.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

Electrical and Computer Engineering, M.S.

The Department of Electrical and Computer Engineering stimulates excellence in scholarship and research through close contact with the faculty and programs tailored to fit students' individual needs.

Students select an advisor and, with the advisor, plan an individual program bounded only by the broad guidelines of the Graduate College and the program. The department maintains close interdisciplinary ties with other University of Iowa departments, especially with the Departments of Physics and Astronomy, and Computer Science (College of Liberal Arts and Sciences); the Departments of Industrial and Systems Engineering, and Mechanical Engineering, the Roy J. Carver Department of Biomedical Engineering (College of Engineering); and the Carver College of Medicine. Principal areas of graduate study include medical image analysis, signal and image processing, control systems and systems theory, wireless communications, waves and materials, computer systems, and computational genomics. View principal areas of study under Research and Study Areas [p. 1481] in the Electrical and Computer Engineering section of the Catalog.

Requirements

The Master of Science program in electrical and computer engineering requires 30 s.h. of graduate credit with or without thesis. Either option may precede Ph.D. study. M.S. students must maintain a cumulative g.p.a. of at least 3.00.

Thesis students must complete at least 12 s.h. from an approved list of electrical and computer engineering courses and 6 s.h. in ECE:5999 Research: Electrical and Computer Engineering M.S. Thesis. Nonthesis students must complete at least 18 s.h. from an approved list of electrical and computer engineering courses; they may count no more than 3 s.h. of independent study toward the degree. For a list of approved courses, see the Electrical and Computer Engineering Graduate Manual. Courses required for the B.S.E. in electrical engineering do not count toward the M.S. requirements.

Students who plan to satisfy thesis requirements must successfully complete a final examination, which is conducted by a committee of at least three faculty members. The final examination consists of an oral defense of the thesis.

Software Engineering Subprogram

A software engineering subprogram is available to both thesis and nonthesis students. Both thesis and nonthesis options require a minimum of 30 s.h. of graduate credit. All rules for additional credit and the M.S. final examination are the same as for the M.S. without the subprogram. Successful completion of the subprogram results in a degree designation that specifies the software engineering subprogram on a student's transcript.

The software engineering subprogram requires the following coursework.

Code	Title	Hours
ECE:5320	High Performance Computer Architecture	3
ECE:5330	Graph Algorithms and Combinatorial Optimization	3
ECE:5800	Fundamentals of Software Engineering	3
ECE:5810	Formal Methods in Software Engineering	3
ECE:5820	Software Engineering Languages and Tools	3
ECE:5830	Software Engineering Project	3

In addition to the courses listed above, thesis students complete another 3 s.h. of approved coursework and 6 s.h. in ECE:5999 Research: Electrical and Computer Engineering M.S. Thesis; nonthesis students complete another 9 s.h. of approved coursework. Students who complete one or more required courses as an undergraduate can substitute courses from the list of approved ECE courses; see the list of approved courses in the Electrical and Computer Engineering Graduate Manual.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Applicants must have a g.p.a. of at least 3.00 on all electrical and computer engineering, mathematics, and physics coursework. Those with a g.p.a. between 2.75 and 3.00 in electrical and computer engineering, mathematics, and physics coursework may be admitted on probation, if warranted by other aspects of their academic records.

Students with baccalaureate degrees in related areas (e.g., physics, mathematics, and computer science) may be admitted on conditional status. They may be required to complete additional coursework, without earning graduate credit, before being granted regular status.

Each application is reviewed individually. Extenuating circumstances may permit deviations from the usual standards.

Financial Support

A number of fellowships, traineeships, assistantships, scholarships, and industrial grants are available to graduate students who qualify. These are awarded on a competitive basis.

Career Advancement

The engineering profession is a foundation for a variety of careers in industry, medicine, law, government, and consulting. Electrical engineers find employment everywhere smart technology is employed. They consistently rank among the most sought after and highest-paid technology professionals. On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college's co-op and internship program, engage in employer outreach,

and provide opportunities for students to network with employers, including an engineering career fair and other career-development programming each semester.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

Electrical and Computer Engineering, Ph.D.

The Department of Electrical and Computer Engineering stimulates excellence in scholarship and research through close contact with the faculty and programs tailored to fit students' individual needs.

Students select an advisor and, with the advisor, plan an individual program bounded only by the broad guidelines of the Graduate College and the program. The department maintains close interdisciplinary ties with other University of Iowa departments, especially with the Departments of Physics and Astronomy, and Computer Science (College of Liberal Arts and Sciences); the Departments of Industrial and Systems Engineering, and Mechanical Engineering, and the Roy J. Carver Department of Biomedical Engineering (College of Engineering); and the Carver College of Medicine. Principal areas of graduate study include medical image analysis, signal and image processing, control systems and systems theory, wireless communications, waves and materials, computer systems, and computational genomics. View principal areas of study under Research and Study Areas [p. 1481] in the Electrical and Computer Engineering section of the Catalog.

Requirements

The Doctor of Philosophy program in electrical and computer engineering requires a minimum of 72 s.h. of graduate credit. At least 45 s.h. must be earned in formal coursework (not in thesis work or other independent study), including 30 s.h. from an approved list of electrical and computer engineering courses. For the list of approved courses, see the Electrical and Computer Engineering Graduate Manual. Each Ph.D. student's study plan must be approved by the student's advisor and by the graduate committee. Students must maintain a cumulative g.p.a. of 3.25 or higher in all graduate coursework.

Acceptance to the Ph.D. program requires successful completion of the Ph.D. qualifying process. The qualifying process consists of two parts—an examination and a course breadth requirement. The half-day written exam is given once a year, late in the spring semester. It covers two subjects chosen by a student from a list of nine. Students normally are expected to take the qualifying examination within the first 30 s.h. of their graduate studies. A cumulative g.p.a. of at least 3.25 is required for admittance to the exam. Students who fail the examination may retake it only once the next time it is offered.

To complete the breadth requirement, students must take two courses associated with the same list of nine subjects that the examination is drawn from and complete the courses with grades of at least A-minus. The breadth courses must not duplicate the subjects chosen for the examination and must be completed within the fourth semester of graduate study.

Ph.D. students take a qualifying examination and a comprehensive examination. Then they must successfully complete a research program that includes a minimum of 18 s.h. of Ph.D. research and culminates in the preparation of a thesis. Finally, the candidate must present a successful oral defense of the thesis.

Following successful completion of the qualifying examination and invitation to the Ph.D. program, a student must complete

the two-part comprehensive examination. The first part is a written research proposal that includes a thorough literature survey providing the motivation and background for the proposal. The second part is an oral examination.

Students must pass the qualifying examination before they may take the comprehensive exam, and they must complete the comprehensive exam no later than three calendar years after passing the qualifying exam. Students who fail to meet this deadline must retake the qualifying exam. The qualifying exam and the comprehensive exam may not be taken in the same semester.

The final requirement for completion of the Ph.D. program is the preparation and successful defense of the thesis. This must be completed no sooner than six months but no longer than three years after completion of the comprehensive examination.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Applicants must have a g.p.a. of at least 3.25 on all electrical and computer engineering, mathematics, and physics coursework.

Each application is reviewed individually. Extenuating circumstances may permit deviations from the usual standards.

Financial Support

A number of fellowships, traineeships, assistantships, scholarships, and industrial grants are available to graduate students who qualify. These are awarded on a competitive basis.

Career Advancement

Engineering is a well-respected profession that is used as a foundation for a variety of careers in industry, medicine, law, government, and consulting. Graduates consistently rank among the most sought after and highest-paid technology professionals.

Engineering Career Services develops and promotes experiential education and professional opportunities for students. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair and other career-development programming each semester.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

Industrial and Systems Engineering

Chair

- Geb W. Thomas

Undergraduate major: industrial engineering (B.S.E.)

Graduate degrees: M.S. in industrial engineering; Ph.D. in industrial engineering

Faculty: <https://ise.engineering.uiowa.edu/people>

Website: <https://ise.engineering.uiowa.edu>

The Department of Industrial and Systems Engineering offers undergraduate and graduate degrees and research programs in industrial and systems engineering.

Industrial and systems engineering encompasses analysis, design, and implementation of systems through optimal use of resources—human, material, energy, information, and financial. Systems may range from small units to extremely large operations. The industrial engineer must be skilled in mathematics, physical sciences, management, and human relations; and understands and designs solutions for the complexities of manufacturing, computer systems, economics, optimization, human behavior, and systems analysis and design.

Programs

Undergraduate Program of Study

Major

- Major in Industrial Engineering (Bachelor of Science in Engineering) [p. 1506]

Graduate Programs of Study

Majors

- Master of Science in Industrial Engineering [p. 1510]
- Doctor of Philosophy in Industrial Engineering [p. 1513]

Facilities

The following facilities and laboratories are used by undergraduate and graduate students. For information about laboratories affiliated with core courses coordinated by other College of Engineering departments, see those departmental Catalog sections.

Additive Manufacturing-Integrated Product Realization Laboratory (AMPRL)

Researchers at AMPRL focus on studying how material forming processes that occur in nature can be utilized to enable next-generation additive manufacturing (AM) technologies. Current research includes the design and development of next-generation AM technologies, AM process modeling and optimization, and the advancement of novel applications of new AM technologies. The lab applies its technological developments in a diverse array of fields, including tissue engineering, sensing, energy harvesting, and robotics. The lab is furnished with state-of-the-art material preparation, processing, and characterization equipment, as well as

several custom 3-D printers invented and developed by the group.

Design for Manufacturing Laboratory

The Design for Manufacturing Laboratory provides students with experience in computer-aided design and computer-aided manufacturing (CAD/CAM) systems. It is equipped with 4-axis computer numerical control (CNC) mills (Haas and Tormach), CNC router (Techno-CNC), CNC metal lathe (Haas and Techno-CNC), drill press, plastic injection molder, thermoforming machine, band saw, disc sander, bench grinder, polishing wheel, hand drill, sandblasting cabinet, press, foot shear, and welding station. The lab has the latest software technology, including Pro/ENGINEER and Rhinoceros.

Graphical Representation of Knowledge Lab (GROK)

The GROK Lab develops technologies to help scientists and doctors improve their understanding and control of complex systems such as robots, distributed sensor networks, and augmented-reality systems. The lab designs and builds software, electronic circuits, and mechanical devices that create or modify complex systems and that extend scientists' understanding of how to make these systems perform their intended tasks better.

The lab has a variety of software development platforms and manufacturing tools, including computer numerical control (CNC) machines and supplies for casting and molding, as well as a suite of equipment for circuit design, testing, and assembly. The GROK lab has developed technologies used by NASA to control robots exploring South America and Mars. Its most recent projects have focused on using distributed wireless sensor networks to monitor factory-related health hazards and on developing surgical simulators to better train orthopedic surgeons.

Information and Cognitive Systems Research Group

Research in the Information and Cognitive Systems Engineering Research Group focuses on design and analysis of cognitive work and information systems in real-world domains. Current emphasis is on cognitive work in health care systems.

The research group conducts studies in usability testing, process mapping, cognitive walkthroughs, dynamic systems simulation, and interface design, prototyping, and evaluation. The research facility houses state-of-the-art qualitative field data collection equipment and data analysis tools, programming tools for dynamic systems simulations, and design, prototyping, and usability testing hardware and software tools for interface and display design. The facility also employs data modeling tools and diagramming tools.

Intelligent Systems Laboratory

The Intelligent Systems Laboratory conducts research in data science and computational intelligence leading to applications in manufacturing, energy, service industry, and health care. The current project focuses on smart manufacturing, digital industry, cloud and edge modeling, service manufacturing, and autonomous systems. Many of the intelligent manufacturing concepts pursued globally have originated in the laboratory. The pioneering research has been marked with publication of the textbook *Intelligent*

Manufacturing Systems (Prentice Hall) and the Journal of Intelligent Manufacturing.

Laboratory for IoT-Enabled Data Analytics and System Informatics

The lab utilizes high performance computing workstations to model uncertainty quantifications and complex variable relationships. The aim is to develop engineering-guided statistical techniques to facilitate the interpretability, real-time monitoring, root cause analysis of complex systems. The lab focuses on developing and applying data analytics tools to various promising areas including advanced manufacturing systems, driver simulation and monitoring systems, and water and hydrology modeling systems. The research in the group requires algorithm development, hardware design, theoretic analysis, and simulation and emulation.

National Advanced Driving Simulator Laboratory (NADS)

The NADS Laboratory is home to the nation's first and largest public simulator of its kind in the world. For the last 25 years, the University of Iowa has conducted advanced research and development in support of saving lives, improving quality of life, advancing technology, and improving efficiency and productivity of the automotive and supporting industries. Most importantly, NADS serves as a place where students can learn firsthand about how innovation occurs in science and engineering.

From drug research to automated vehicles, NADS is dedicated to engaging in a broad, holistic approach. Faculty, staff, and students at NADS collaborate with nearly all UI colleges in their automotive safety research. Human factors research at NADS is funded by government agencies and industry leaders for the public and private sectors. NADS supports undergraduate, graduate, and doctoral students in driving research studies. Many of these studies include the use of the NADS miniSim™, a portable, high-performance driving simulator based on NADS' state-of-the-art driving simulation technology developed through decades of research. In-house workstations and computers equipped with software such as MATLAB, Visual Studio, R, and SAS are available to students with approved access to the facility.

Automated vehicle technology is revolutionizing transportation and mobility unlike any other technology of the past several decades. Vehicles, and the their underlying technologies, are changing at a rapid pace. Many of the advanced driver assistance technologies and vehicle safety systems have been in research and development programs at the UI. The UI specializes in driver performance and behavior and how to optimally design the user interface of such systems. As vehicles become increasingly automated, the UI College of Engineering is leading a number of advanced research projects in automated and connected vehicles, funded by government and industry. Together with industry partners, the automated vehicles division is being built with a broad range of capabilities. These vehicles will be used to collect data for research programs funded through industry and government contracts.

Operator Performance Laboratory (OPL)

The OPL is a flight test organization at the UI. The lab specializes in civilian and military flight testing and assessment of technologies in operational contexts, such

as flight in degraded visual environments (DVE) and GPS-denied environments. Quantification of data link and sensor performance for manned and unmanned aircraft in such operational context is an area of focus. OPL develops, tests, and evaluates Helmet Mounted Displays (HMDs), Synthetic Vision Systems (SVS), Live Virtual Constructive (LVC) training systems, physiological-based workload measurement systems, pilot spatial orientation enhancement systems, and embedded flight simulation capabilities.

Unmanned aircraft operations include test flights supporting commercial unmanned aircraft systems (UAS) autonomy, 5th- and 6th-generation manned-unmanned teaming (MUMT) concepts and the extension of LVC toward MUMT. The OPL team developed the Cognitive Assessment Tool Set (CATS), which is able to accurately quantify human cognitive workload using a flight-approved sensor package. CATS has been used in many flight tests as the data collection and analysis tool for pilot behavior in real-world flight environments. OPL pioneered the development and testing of LVC technology that blends ground-based battlespace simulations with airborne testbeds equipped with radar and weapons simulators that can employ simulated ordnance for effect in distributed simulation environments. This capability has been demonstrated many times, including at the Interservice/Industry Training Simulation Education Conference (IITSEC). In 2004, the OPL team developed and tested a Synthetic Vision System that was subsequently commercialized by Dynon Avionics under the brand name Skyview. This system has sold over 10,000 units and is flying in thousands of aircraft.

OPL has performed many flight test projects on its fleet of aircraft, exceeding a total 2,400 flight hours of developmental test and evaluation (DT&E) and operational test and evaluation (OT&E) data collection. OPL has 10 instrumented research aircraft. These include two L-29 fighter jet trainers, two MI-2 twin-turbine helicopters, one A-36 Bonanza, one Cessna 172, three TBM 3M UAS (62lbs), and one Vapor 55 (55 lbs). The OPL L-29's are the only tactical jet research aircraft that are equipped with the F-35 helmet-mounted display (HMD). The OPL MI-2 is a one-of-a-kind sensor platform with a conformal HMD using full-color symbology showing threats and obstacles acquired by its suite of onboard sensors. Each OPL aircraft also is a flight simulator. Additionally, the OPL has a Boeing 737-800 full flight deck simulator, an unmanned aerial vehicle (UAV) Ground Control Station (GCS) simulator, a fast jet simulator, and deployable command and control (C2) bus as well as a C2 high mobility multipurpose wheeled vehicle (HMMWV) for use as a forward command node in rugged terrain. OPL has an extensive telemetry infrastructure that is deployable. OPL's flight support system also is deployable using mobile tool control, spares, jigs, and jacks, among other means.

Visual Intelligence Laboratory

The Visual Intelligence Laboratory is a research group at the Iowa Technology Institute. The lab conducts fundamental research to bridge the state-of-the-art computational geometry, vision, and machine learning technologies to real-world industrial applications such as computational human factor, autonomous driving, image-guided radiotherapy, medical image analysis, computational design and fabrication, and so on. The lab is interested in discovering new mathematical theories and algorithms allowing the description, comparison, and algebraic (de)composition of shapes and visual features. Such mathematical understanding of shapes enables computers to see and understand the world, and thus become smarter assistants to humans.

The Visual Intelligence Laboratory has a variety of imaging devices to obtain 2-D/3-D geometric information for various objects. The lab's imaging capacity includes the Studio360, a state-of-the-art imaging facility comprised of over 100 digital single-lens reflex (DSLR) cameras mounted on a 20-foot diameter geodesic dome. The Studio360 can capture time-synced photos/videos of dynamic objects (e.g., a person performing a motion) from multiple perspectives and reconstruct 3-D models of the objects. The lab also owns a high-performance computing server, with eight NVIDIA GeForce 1080 Ti GPUs and two Intel Xeon E5 CPUs (total 48 threads), designated for massive-scale image/geometry processing and deep learning.

The lab has established a broad academic research partnership with a variety of entities across campus, including the National Advanced Driving Simulator (NADS), the Iowa Neuroscience Institute (INI), and the University of Iowa Hospitals & Clinics (UIHC). In addition, the lab has been involved in a number of research projects sponsored by government and industry partners, including the U.S. Department of Transportation, the U.S. Department of Defense, Hyundai Motors, and many others.

Courses

Industrial and Systems Engineering Courses

ISE:0000 Industrial Engineering Internship/Co-op 0 s.h.

Industrial engineering students participating in the Cooperative Education Program register in this course during work assignment periods; registration provides a record of participation in the program on the student's permanent record. Requirements: admission to Cooperative Education Program.

ISE:1000 First-Year Seminar 0-1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

ISE:2000 Industrial Engineering Sophomore Seminar 0 s.h.

Curriculum and profession; ethics and professionalism in classroom and workplace. Requirements: sophomore or transfer standing in engineering.

ISE:2500 Engineering Economy 3 s.h.

Basic concepts of engineering economy: time value of money, cash flow equivalence, depreciation, tax considerations, continuous cash flows, cost accounting overview; main analysis techniques—present worth, uniform annual cost, rate of return, benefit/cost ratio, replacement and break-even analysis. Corequisites: STAT:2020.

ISE:3000 Professional Seminar: Industrial Engineering 0 s.h.

Professional aspects of industrial engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Requirements: junior standing.

ISE:3149 Information Visualization 3 s.h.

Instruments for reasoning about quantitative information; analyzing and communicating statistical information; main typologies of data graphics (data-maps, time-series, space-time narrative, relational diagrams, graphs and methods for dimensionality reduction); language for discussing data visualizations combined with knowledge of human perception of visual objects; how to visualize information effectively by using statistical methods, knowledge of human perception, and basics of data graphics. Prerequisites: STAT:2020.

ISE:3300 Manufacturing Systems 3 s.h.

Manufacturing and logistics systems, supply chain management, MRP/ERP systems, lean manufacturing, concurrent engineering, value stream mapping and six sigma. Offered spring semesters. Prerequisites: ISE:3700 and ENGR:2760.

ISE:3350 Process Engineering 4 s.h.

Methodologies, algorithms, and tools for processing modeling, analysis, and reengineering; modeling issues in product and component design, product and process modularity, quality, reliability, and agility. Prerequisites: ISE:3700.

ISE:3400 Human Factors 3 s.h.

Design of human-machine systems; development of optimum work environments by applying principles of behavioral science and basic knowledge of human capacities and limits. Offered fall semesters. Prerequisites: PSY:1001.

ISE:3450 Ergonomics 3 s.h.

Ergonomic design of jobs and products in an industrial and consumer market setting; principles of good design, examples of poor design; consequences of poor job and product design; principles of work sampling, usability studies, performance rating, sizing and planning of workstations, hand tool design, ergonomic design in transportation; related group project.

ISE:3500 Information Systems Design 3 s.h.

Structure and design of computer-based information systems; concepts of information systems, decision making; computer hardware, software, data structures; methods for determining system requirements; designing, implementing, evaluating, managing information systems; applied projects. Prerequisites: ENGR:1300.

ISE:3600 Quality Control 3 s.h.

Basic techniques of statistical quality control; application of control charts for process control variables; design of inspection plans and industrial experimentation; modern management aspects of quality assurance systems. Offered fall semesters. Prerequisites: STAT:2020 or MSCI:9100 or BAIS:9100 or (STAT:3100 and STAT:3101 and STAT:3200). Same as CEE:3142, STAT:3620.

ISE:3610 Stochastic Modeling 3 s.h.

Fundamental probabilistic models and applications of industrial engineering; overview of probability and distributions, stochastic processes and Markov chains, queuing theory, inventory theory, decision theory under uncertainty, and elements of risk management. Prerequisites: STAT:2020. Corequisites: ISE:3700.

ISE:3660 Data Analytics with R 3 s.h.

Basics of data analytics and data mining; how to implement a variety of popular data mining methods in R to tackle business and engineering problems; focus on process of turning raw data into intelligent decisions and algorithms commonly used to build predictive models and find relevant patterns in data. Prerequisites: STAT:2020.

- ISE:3700 Operations Research** 3 s.h.
Operations research models and applications; emphasis on deterministic model (linear programming, duality). Offered fall semesters. Prerequisites: MATH:2550. Corequisites: STAT:2020.
- ISE:3750 Digital Systems Simulation** 3 s.h.
Simulation modeling and analysis; emphasis on construction of models, interpretation of modeling results; input and output analysis; hands-on usage of ARENA simulation software, manufacturing, health care, and service. Offered spring semesters. Prerequisites: ISE:3610 and ISE:3700.
- ISE:3760 Applied Linear Regression** 3 s.h.
Regression analysis with focus on applications; model formulation, checking, selection; interpretation and presentation of analysis results; simple and multiple linear regression; logistic regression; ANOVA; hands-on data analysis with computer software. Prerequisites: STAT:2020 or STAT:2010 or STAT:3120. Same as IGPI:3200, STAT:3200.
- ISE:3998 Individual Investigations: Industrial Engineering** arr.
Independent projects in industrial engineering for undergraduate students, including laboratory study, an engineering design project, analysis and simulation of an engineering system, computer software development, CAD/CAM applications, or research.
- ISE:4113 Control of Mechanical Engineering Systems** 3 s.h.
How to model simple engineering systems, apply time and frequency domain analysis techniques, and design control systems; application of these techniques using MATLAB; writing differential equations describing engineering systems and determine time domain response to a wide range of inputs; use of state-variable equations to model engineering systems and determine their time response to a wide range of inputs; describe advantages of feedback control; analyze performance of control systems; determine stability of control systems using Root-Locus, Bode, and Nyquist methods; design feedback control systems using frequency domain and state-variable methods. Prerequisites: MATH:2550 and MATH:2560 and ENGR:2710. Same as ME:4113.
- ISE:4116 Manufacturing Processes Simulations and Automation** 3 s.h.
Material processing, metal cutting theories, forming, micro/nano fabrication, programmable logic controller, computer numerical controllers, discrete control system, DC and AC servo motors, Command generation. Prerequisites: ME:2300 or ENGR:2760. Same as ME:4116.
- ISE:4172 Big Data Analytics** 3 s.h.
Principles of data mining and machine learning in context of big data; basic data mining principles and methods—pattern discovery, clustering, ordering, analysis of different types of data (sets and sequences); machine learning topics including supervised and unsupervised learning, tuning model complexity, dimensionality reduction, nonparametric methods, comparing and combining algorithms; applications of these methods; development of analytical techniques to cope with challenging and real "big data" problems; introduction to MapReduce, Hadoop, and GPU computing tools (Cuda and OpenCL). Prerequisites: STAT:2020 or MSCI:9100 or BAIS:9100. Requirements: basic programming skills in C, C++, Java, or Python; knowledge of Matlab, Octave, or R; and knowledge of a word processor. Recommendations: ISE:3760 and CS:4400 and CS:3330 and MATH:2550.
- ISE:4175 Safety Engineering** 3 s.h.
Systems safety principles and methods, occupational safety, product safety and liability, accident investigation and prevention methods and analysis, hazard analysis, and standards and regulations.
- ISE:4550 Wind Power Management** 3 s.h.
Principles of wind power production, wind turbine design, wind park location and design, turbine and wind park control, predictive modeling, integration of wind power with a grid.
- ISE:4600 Industrial Engineering Design Project** 1-4 s.h.
Projects involving product and related operational system design in an industrial or service organization; associated entrepreneurial or intrapreneurial planning. Corequisites: ISE:2500 and ISE:3300 and ISE:3350 and ISE:3400 and ISE:3450 and ISE:3500 and ISE:3600 and ISE:3750, if not taken as prerequisites. Requirements: completion of all ISE coursework.
- ISE:4620 Design of Experiments for Quality Improvement** 3 s.h.
Development of skills necessary to efficiently and effectively design and analyze experiments for quality improvement; topics include experiment planning, design, and statistical analysis of the results; experimentation is beneficial in all phases of industrial processes including new product design, process development, and manufacturing process improvement; students develop successful experiments that can lead to reduced development lead time, enhanced process performance, and improved product quality. Prerequisites: STAT:2020. Requirements: junior (third year) standing.
- ISE:4900 Introduction to Six Sigma** 3 s.h.
Six Sigma techniques for the DMAIC cycle (Define, Measure, Analyze, Improve, Control); what is needed for data collection (process inputs and outputs, measurement tools), conduct analysis (hypothesis testing, process capability studies), and conduct process improvement studies (design of experiments, response surface methodology); overview of Six Sigma, process and project management skills; application of the DMAIC model to a real-life improvement projection (a "learn-by-doing" approach). Prerequisites: ISE:3600.
- ISE:5000 Graduate Seminar: Industrial Engineering** 1 s.h.
Recent advances and research in industrial engineering presented by guest lecturers, faculty, students. Requirements: graduate standing.
- ISE:5420 Automated Vehicle Systems** 3 s.h.
Overview of vehicle technologies (HAV) and advanced driver assistance systems (ADAS) including a historical perspective, testing, policy and regulation, algorithm design, and human factors. Recommendations: ISE:3400.
- ISE:5520 Renewable Energy** 3 s.h.
Introduction to different sources of renewable energy generation including wind, solar, fuel cells, and bioenergy; design of energy solutions for different stand-alone applications (i.e., factories, data centers, hospitals) and system-wide solutions powering transportation systems, cities, or states; application-specific topics such as energy storage, control of energy generators, operations and maintenance, performance optimization, equipment health monitoring, predictive engineering, and integration of renewable energy with a grid.

- ISE:5620 Design of Experiments** **3 s.h.**
Principles and methods of statistical design of experiments for product and process improvement; students develop skills necessary for planning, analysis, and optimization of experimental data, which can be applied across various fields of research including engineering, medicine, and the physical sciences. Prerequisites: STAT:2020.
- ISE:5650 Mechatronics Engineering for Smart Device Design** **3 s.h.**
Introduction to basic mechatronics system components and design principles using mechatronics to meet functionality requirements of products, processes, and systems; lab-oriented assignments and team-based projects presented with innovative case studies in diverse application domains; labs require students to use a micro-controller kit to finish hardware development assignments; for students who plan to have a career in areas such as product development, robotics, design and manufacturing automation, technology management and innovations. Prerequisites: ENGR:2120 and ENGR:2760.
- ISE:5730 Digital Industry** **3 s.h.**
Modeling methodologies, analysis, and optimization of digital enterprise models; autonomous building of models from data stores; introduction to different application-as-a-service models embedded in edge, fog, and cloud architectures and solutions; science of process modeling and analysis illustrated with case studies. Prerequisites: ISE:3700.
- ISE:5860 Health Informatics** **3 s.h.**
Technological tools that support health care administration, management, and decision making. Same as HMP:5370, IGPI:5200, MED:5300, SLIS:5900.
- ISE:5995 Contemporary Topics in Industrial Engineering** **arr.**
New topics or areas of study not offered in other industrial engineering courses; topics based on faculty/student interest.
- ISE:5998 Individual Investigations: Industrial Engineering** **arr.**
Individual projects for industrial engineering graduate students: laboratory study, engineering design, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.
- ISE:5999 Research: Industrial Engineering M.S. Thesis** **arr.**
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for M.S. with thesis in industrial engineering. Requirements: graduate standing.
- ISE:6211 Human Factors in Healthcare Systems** **3 s.h.**
Solving human factors problems in health care work systems; cognitive systems engineering, interface design, health care productivity, patient safety; specific research including decision making, information transfer, and communication; discrete event and dynamic systems simulation modeling; human computer interaction; health information technology/systems; usability; business models of organizational, technical, and social elements of health care systems.
- ISE:6220 Cognitive Engineering** **3 s.h.**
Cognitive engineering principles; decision making and judgment; distributed cognition; cognitive work; human system interaction; cognitive work analysis; situated action and ecological models; mental models and representation; cognitive engineering methods and applications.
- ISE:6232 Advanced Computer-Aided Design and Manufacturing** **3 s.h.**
In-depth study of CAD and manufacturing (CAD/CAM); review of CAD/CAM, computer graphics, NURBS modeling (curves/surfaces, solid modeling, design data exchange); computational geometry for product development, heterogeneous object modeling, rapid prototyping (RP) and layered manufacturing, computer-aided path planning, CAD applications (computer-aided tissue engineering, biomedical imaging and processing, biomanufacturing); related lab projects and assignments. Requirements: knowledge of one programming language (C, C++, C#, VB, or Java).
- ISE:6300 Innovation Science and Studies** **3 s.h.**
Innovative typology and sources, classical innovation models, measuring innovation, innovation discovery from data, evolutionary computation in innovation, innovation life cycle.
- ISE:6350 Computational Intelligence** **3 s.h.**
Concepts, models, algorithms, and tools for development of intelligent systems; data mining, expert systems, neural networks for engineering, medical and systems applications. Prerequisites: ISE:3700. Same as NURS:6900.
- ISE:6380 Deep Learning** **3 s.h.**
Basic principles of deep neural networks for various engineering applications; skill sets to design and implement deep learning algorithm for engineering applications; essential topics of deep learning for its practical use and exploring diverse methods and architectures for different types of applications.
- ISE:6410 Research Methods in Human Factors Engineering** **3 s.h.**
Logic and methods for research and for analysis and evaluation of complex human-machine systems; advanced techniques for enhancement of human interaction with advanced information technology; emphasis on cognitive task analysis techniques for innovative design, understanding of how technology affects safety, performance, user acceptance.
- ISE:6420 Human/Computer Interaction** **3 s.h.**
Development of projects using human factors principles in the design of computer interfaces.
- ISE:6450 Human Factors in Aviation** **3 s.h.**
Measuring, modeling, and optimizing human visual performance; display design for optimal legibility, research in visibility, legibility, conspicuity, and camouflage; visibility model development.
- ISE:6460 The Design of Virtual Environments** **3 s.h.**
Development of techniques for designing and creating three-dimensional representations of information for simulation, scientific visualization, and engineering; emphasis on human factors issues, software.
- ISE:6480 Unmanned Aircraft Systems** **3 s.h.**
Applications and research in unmanned aircraft systems (UAS) with focus on engineering aspects; new era of aviation and how UAS are fast emerging as a disruptive technology in aviation; applications ranging from film production, photography, precision agriculture, remote sensing, and infrastructure inspections to military applications; problem space of UAS from a variety of angles including engineering controls design, data links, UAS types, human factors, regulatory aspects.

ISE:6600 Linear Programming 3 s.h.

Mathematical programming models; linear and integer programming, transportation models, large-scale linear programming, network flow models, convex separable programming. Requirements: calculus and linear algebra. Same as BAIS:6600, IGPI:6600.

ISE:6720 Nonlinear Optimization 3 s.h.

Mathematical models, theory, algorithms for constrained and unconstrained nonlinear optimization; optimality conditions and aspects of duality theory; applications of nonlinear optimization in data analytics and machine learning.

ISE:6750 Stochastic Optimization 3 s.h.

General tools and approaches used in decision making under uncertainties; modeling of uncertainties and risk, changes that uncertainties bring to the decision process, difficulties of incorporating uncertainties into optimization models, common techniques for solving stochastic problems.

ISE:6760 Pattern Recognition for Financial Data 3 s.h.

Modeling and harvesting useful information and patterns for financial data; topics include basic concepts of financial data, financial data visualization, modeling and forecasting of financial time series, seasonal models, volatility models, value at risk, principal component analysis, and factor models.

ISE:6780 Financial Engineering and Optimization 3 s.h.

Quantitative methods of modeling various financial instruments (i.e., stocks, options, futures) and tools for measurement and control of risks inherent to financial markets; fundamentals of interest rates; options and futures contract valuation, including weather and energy derivatives; risk management and portfolio optimization; emphasis on modeling and solution techniques based on optimization and simulation approaches traditional to industrial engineering and operations research. Recommendations: basic knowledge of probability and statistics, numerical methods, and optimization.

ISE:6810 Advanced Topics on Additive Manufacturing 3 s.h.

Review of critical challenges facing 3-D printing; emphasis on techniques and practical experience in developing novel additive manufacturing processes and applications; topics include 3-D content creation and preparation, CAD systems for additive manufacturing, additive manufacturing processes, fabrication speed and improvements, rapid tooling and indirect processes.

ISE:7995 Advanced Topics: Industrial Engineering arr.

Discussion of current literature in industrial engineering.

ISE:7998 Special Topics in Industrial Engineering arr.**ISE:7999 Research: Industrial Engineering Ph.D. Dissertation arr.**

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for Ph.D. in industrial engineering.

Industrial Engineering, B.S.E.

The Department of Industrial and Systems Engineering offers a host of options for each engineering student. From the undergraduate engineering degree, a dual Undergraduate to Graduate (U2G) degree, elective focus areas, and extracurricular activities, there are many options available to explore and develop professional skills. The industrial and systems engineering (ISE) undergraduate program emphasizes a broad education in engineering fundamentals and the opportunity for in-depth learning in an elective focus area.

Elective Focus Areas and Specialized Opportunities

As part of the mission to help students be engineers and something more, the Department of Industrial and Systems Engineering offers elective focus area options so that students can pursue specialized interests, such as big data analytics, design and manufacturing, computer and information systems, entrepreneurship, human factors, and management in order to complement their undergraduate degree in industrial engineering.

Student Organizations

Student organizations can have an enormous impact on an undergraduate student's career. The College of Engineering is home to a number of student organizations and clubs. Popular organizations for industrial and systems engineering students include the Institute for Industrial and Systems Engineers and the Human Factors and Ergonomics Society.

Undergraduate Resources

A plethora of resources are available to students to pursue research, access professional services available in the college and across the University, and participate in or view sports and arts events on campus and around town.

Scholarships

A variety of scholarships and funding opportunities are available to industrial and systems engineering students.

Accreditation

The undergraduate program in industrial engineering is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET).

Educational Objectives

The following educational objectives of the program are defined in conjunction with the accreditation process.

Within a few years of graduation, industrial engineering graduates will:

- continue learning,
- lead and inspire others, and
- engage in the community and society.

Requirements

The Bachelor of Science in Engineering requires a minimum of 128 s.h. Students must have a g.p.a. of at least 2.00 on all college work used to satisfy degree requirements as well as on all work undertaken at the University of Iowa.

The major in industrial engineering requires a strong foundation of courses in engineering science, mathematics, design, manufacturing, social science, and humanities. Advanced work includes specialty courses in human factors and ergonomics, management, information systems, manufacturing, quality control, and operations research. Design is an integral part of the undergraduate program; all students complete a comprehensive design experience.

All engineering students complete the B.S.E. core requirements, which include RHET:1030 Rhetoric, ENGR:1100 Introduction to Engineering Problem Solving, ENGR:1300 Introduction to Engineering Computing, and courses in chemistry, engineering mathematics and fundamentals, and physics.

They also complete the curriculum designed for their major program, which covers four major stems: mathematics and basic sciences, engineering topics, an elective focus area, and the general education component. For information about the curriculum, see the Bachelor of Science in Engineering [p. 1428] in the Catalog.

Students must select elective focus area courses specific to the Department of Industrial and Systems Engineering.

Elective Focus Areas

The industrial engineering program offers a variety of elective focus area (EFA) options, including big data analytics, computer and information systems, design and manufacturing, entrepreneurship, human factors and ergonomics, management, wind energy, and an option to tailor an EFA to an individual student's interests. For more detailed information about elective focus areas, see the Bachelor of Science in Engineering [p. 1428] in the Catalog. For a list of standard industrial engineering elective focus area options and guidelines for tailored elective focus areas, see undergraduate EFAs and Specialized Opportunities on the Department of Industrial and Systems Engineering website.

Big Data Analytics

Big data analytics is the process of examining big data in an effort to uncover hidden patterns, unknown correlations, and other useful information. Ninety-five percent of the data in the world today has been created in the last two years alone. This data comes from everywhere: sensors used to gather climate information, posts to social media sites, digital pictures and videos, purchase transaction records, and cell phone GPS signals to name a few.

Computer and Information Systems

Industrial engineers have a natural role to play in this field by using quantitative system analysis, manufacturing system knowledge, and human factors skills to help design and refine computer systems that are becoming ever more complex. The field offers substantial opportunities for technical skill development, travel, and interaction with a diverse range of professionals.

Design and Manufacturing

Many graduates find careers in manufacturing industries that include the use of computer-aided design and manufacturing, virtual and physical prototyping, 3-D design, design and simulation of manufacturing processes, and manufacturing systems. They find employment in diverse industries, including the supplier manufacturing industry (e.g., John Deere, Caterpillar, Rockwell Collins, Raytheon, Boeing), health care (e.g., Johnson & Johnson, Zimmer), and software and in the information industry (e.g., Pro/Engineer, Catia, SolidWorks, AutoCAD).

Entrepreneurship

Engineering students explore venture capital, marketability of products, and technology transfer. They gain exposure to understanding sound business practice, acquire team-building skills in both small and large companies, understand the entrepreneurial approach to acquiring and managing resources, learn how to create a business plan, and obtain valuable contacts and networking opportunities with businesses and industries.

Human Factors and Ergonomics

The human factors and ergonomics EFA represents an increasingly important engineering specialty. The dramatic increase in netcentric computer technology makes system performance increasingly dependent on the match between system characteristics and human capabilities. Graduates find employment in diverse industries that include health care (e.g., GE, Medtronic, Guidant), original equipment manufacturer (OEM) and supplier manufacturing industry (e.g., Rockwell Collins, Boeing, Deere, Caterpillar), computer systems (e.g., Microsoft, Intel, IBM), the government (e.g., NHTSA, NTSB, NASA, the Department of Defense), and consulting (e.g., Accenture, Battelle). Human factors considers cognitive characteristics, and ergonomics considers physical characteristics. The EFA provides advanced education in psychology, systems, statistics, and biomechanics.

Management

Industrial engineers are often assigned managerial tasks, project management, and financial assessments as they relate to project budgets, cost calculations, and optimization criteria. The EFA prepares students for a career in business management.

Wind Energy

Wind energy has become a major source of clean energy. Wind generation is expected to grow in the decades to come and create new jobs. Professionals with diverse backgrounds and knowledge of wind energy fundamentals are needed to fill these careers.

Tailored

Students work with their advisor to tailor a program that is specific to their individual needs.

Combined Programs

B.S.E./M.S.

The College of Engineering offers a combined Bachelor of Science in Engineering/Master of Science program for industrial engineering undergraduate students who intend to earn a M.S. in industrial engineering.

Undergraduate students at the University of Iowa who have completed more than 80 s.h. and have a g.p.a. higher than 3.25 may apply for admission to the Undergrad to Grad (U2G) program designed to accelerate the attainment of an M.S. in industrial engineering degree. Students typically complete their M.S. degree within one year of their B.S.E. degree.

Students meet with their academic advisor, complete a plan, and submit an application for the M.S. program of study to the Graduate College. Graduate Record Examination (GRE) General Test scores are not required for University of Iowa students. Students continue to follow the industrial and systems engineering curriculum as planned with their advisor.

Students may take up to 15 s.h. of graduate coursework and count 12 s.h. toward both degrees, attend the program's graduate seminar, and optionally work with a faculty member on a master's thesis project while they are still undergraduates.

Interested students should consult the Department of Industrial and Systems Engineering.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Industrial Engineering, B.S.E.

Course	Title	Hours
First Year		
Fall		
MATH:1550	Engineering Mathematics I: Single Variable Calculus ^a	4

Degree Application: apply on MyUI before deadline (typically in February for spring, September for fall)

Hours	16
Total Hours	130

- a Enrollment in math courses requires completion of a placement exam.
- b Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
- c Enrollment in chemistry courses requires completion of a placement exam.
- d Typically this course is offered in fall and spring semesters. Check MyUI for course availability since offerings are subject to change.
- e Courses with prerequisites; students should complete a prerequisite waiver form.
- f Typically this course is offered in fall, spring, and summer semesters. Check MyUI for course availability since offerings are subject to change.
- g Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
- h A full list of approved course subjects can be found on the College of Engineering General Education Component website.
- i Systems Elective can include ISE:3149, ISE:4172, ISE:4175, ISE:4550, ISE:4900 or ENGR:2730. Alternatively, students can take a 5000 or above level Industrial Engineering course (3 sh), with the permission of the instructor, to fulfill this Systems Elective requirement.
- j At least 3 s.h. of courses must be mathematics or basic sciences courses (as defined by ABET) in a different area or at a more advanced level than those required in the regular curriculum.
- k Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>

Career Advancement

Industrial and systems engineers have many opportunities for employment and service in industrial, government, research, and public service organizations. Employment opportunities are among the most varied in the engineering field. Industrial and systems engineers hold positions as advisors to management or may participate directly in management decisions. Representative job titles include industrial engineer, manufacturing engineer, systems analyst, quality specialist, operations research analyst, internal consultant, human factors specialist, supervisor, and manager. Industrial and systems engineers are employed by manufacturing and energy firms, wind turbine manufacturers, government agencies, and service organizations such as airlines, banks, hospitals, health care groups, and consulting companies.

People are often surprised to learn the impact and breadth of the industrial engineering profession, which is one of the three largest areas of engineering employment, according to the Bureau of Labor Statistics. Yet, less than five percent of all engineers are trained specifically for this specialty, according to the American Society of Engineering Educators. It is one of the more gender diverse engineering degrees: 31.3 percent of industrial engineering degrees are awarded to women, compared to 21.7 percent of all engineering degrees.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation and negotiation. In addition to equipping students with the tools they need to navigate their internship, co-op, or full-time job search, Engineering Career Services

also develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers in meaningful ways, including an engineering career fair each semester and other programming related to career development.

Industrial Engineering, M.S.

Research and Study

The M.S. in industrial engineering program supports two major paths: one focusing on courses and one on research and a thesis. The first path is intended primarily for students who wish to advance their technical knowledge and move toward a career in industry. The second path also is a good choice for students interested in industry, but it is targeted more toward developing independent research skills and writing, and it also can support future graduate work.

Both paths expect some diversity of technical skills in three major areas which include systems, human factors, and analytics. The systems area emphasizes the design, construction, and analysis of complex systems with interdependent parts that include people and machines. The human factors area emphasizes the interaction of people with systems, and includes the study and analysis of people's cognitive and physical limitations. The analytics area emphasizes the application of mathematical formula, including statistical approaches, as well as algorithmic and computational approaches to deriving knowledge from data. Each area is supported by several faculty members and many faculty members support multiple areas; see Facilities [p. 1500] in the Department of Industrial and Systems Engineering section of the Catalog to learn more about each research lab and its activities.

Related Certificate

Informatics

The Informatics Program offers the Certificate in Informatics with a health informatics and information science subprogram. The subprogram emphasizes the organization, management, and use of health care information; health care research, education, and practice; and information technology developments in the socioeconomic context of health care. Industrial engineering graduate students complete ISE:5860 Health Informatics and approved electives. To learn more, see the Certificate in Informatics [p. 1597] (Graduate College) in the Catalog.

Requirements

The Master of Science program in industrial engineering requires a minimum of 30 s.h. of graduate credit. Students must maintain a g.p.a. higher than 3.25 to earn the degree. They must enroll in ENGR:7270 Engineering Ethics; and in ISE:5000 Graduate Seminar: Industrial Engineering, which students take every semester. Credit in these two courses does not count toward the 30 s.h. required to meet major requirements.

Courses Approved for Focus Areas

The following courses are for M.S. students selecting a with or without thesis option. Students must successfully complete at least one approved graduate-level course in each of three focus areas—human factors, analytics, and systems. Those with relevant academic background in these areas may be excused from this requirement by the director

of graduate studies. For more detailed information about program requirements, see the Graduate Student Handbook or Graduate Program on the Department of Industrial and Systems Engineering website.

Code	Title	Hours
ISE:3300	Manufacturing Systems	3
ISE:3350	Process Engineering	4
ISE:3400	Human Factors	3
ISE:3450	Ergonomics	3
ISE:3500	Information Systems Design	3
ISE:3600	Quality Control	3
ISE:3610	Stochastic Modeling	3
ISE:3660	Data Analytics with R	3
ISE:3700	Operations Research	3
ISE:3750	Digital Systems Simulation	3
ISE:4172	Big Data Analytics	3
ISE:4175	Safety Engineering	3
ISE:4620	Design of Experiments for Quality Improvement	3
ISE:4900	Introduction to Six Sigma	3
ISE:5420	Automated Vehicle Systems	3
ISE:5520	Renewable Energy	3
ISE:5620	Design of Experiments	3
ISE:5650	Mechatronics Engineering for Smart Device Design	3
ISE:5730	Digital Industry	3
ISE:6211	Human Factors in Healthcare Systems	3
ISE:6220	Cognitive Engineering	3
ISE:6300	Innovation Science and Studies	3
ISE:6350	Computational Intelligence	3
ISE:6380	Deep Learning	3
ISE:6410	Research Methods in Human Factors Engineering	3
ISE:6420	Human/Computer Interaction	3
ISE:6460	The Design of Virtual Environments	3
ISE:6480	Unmanned Aircraft Systems	3
ISE:6760	Pattern Recognition for Financial Data	3
ISE:6780	Financial Engineering and Optimization	3
ISE:6810	Advanced Topics on Additive Manufacturing	3

Master of Science Degree Without Thesis

The M.S. in industrial engineering without thesis requires at least 21 s.h. in Department of Industrial and Systems Engineering courses (prefix ISE), including at least 12 s.h. of graduate-level courses at the 5000 level or above. Courses offered by other College of Engineering departments or courses from other colleges may be selected with consent of the academic advisor.

Master of Science With Thesis

Nonthesis students may petition for entry into the M.S. thesis program or the Ph.D. program by requesting a change of status through the department. Typically, students make this request at the invitation of a faculty member who is ready to serve as a student's research advisor. The request is then reviewed by the Graduate Admissions Committee. The committee forwards approved requests to the department chair, who may authorize a change of status petition from the department to the Graduate College.

Students are encouraged to write their thesis as a publishable journal article and submit the article for publication. The thesis option consists of a minimum of 21 s.h. of coursework and up to 9 s.h. of research. Students pursuing the thesis option are permitted to enroll in ISE:5999 Research: Industrial Engineering M.S. Thesis. Up to 9 s.h. in the thesis course may count toward the graduate-level course requirement. In addition, students must submit the Final Examination: Advanced Degree form, complete a Report of Thesis Approval, and submit a copy of their thesis to the Graduate College by following the published guidelines and deadlines.

Admission

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Admission to the graduate program is competitive and based on an applicant's previous coursework, research, and industrial experience. The general admission standards are intended to maintain the quality of the graduate program and to ensure sufficient preparation required for timely degree completion. Specific admission standards may be waived by the Graduate Admissions Committee when other evidence of competence is compelling. These standards are minimum standards, and meeting these standards does not ensure admission to the program; admitted students typically exceed these standards.

Applicants are expected to have a minimum cumulative g.p.a. of 3.00 on a 4.00 scale, and have earned a B.S.E. in industrial engineering degree or in a related science or engineering discipline. Applicants are required to submit the results of their Graduate Record Examination (GRE) General Test. The GRE Advanced Examination in Engineering is not required for admission to the program; however, these scores should be forwarded to the department if that examination is taken. The minimum GRE General Test requirement is a combined quantitative reasoning and analytical writing score of 300. There is no specified minimum requirement for the verbal reasoning portion of the test.

International applicants whose first language is not English are required to submit the results of their Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS). Applicants who have completed a post-secondary degree at an English-speaking institution may request a waiver of this requirement. A minimum TOEFL score of 100 or a minimum IELTS score of 7 is required for admission.

Applicants must arrange to have three letters of recommendation sent to the department online through the Office of Admissions website. The letters should be completed by persons who are well acquainted with the applicant and

the ability of the applicant to undertake graduate work in industrial or systems engineering.

While the department considers applications at any time, first consideration is given to students who have their application materials, including their application, transcripts, GRE scores, TOEFL scores, and the required letters of recommendation, completed by the admission priority deadline as found on the Graduate Admissions website. The director of graduate admissions is responsible for overseeing the graduate recruiting activities and the admissions procedures in the department. The director serves as the point of initial contact between prospective graduate students and the department, and maintains a record of each qualified applicant in the departmental office. The director, in consultation with the Graduate Admissions Committee and the department chair, screens applicants and ultimately determines which applicants are extended offers of admission.

Applicants with Degrees Other Than in Industrial or Systems Engineering

The department encourages students with degrees in other scientific disciplines, such as in computer science, mathematics, physics, or other engineering disciplines, to apply for admission. Some students may have already completed M.S. degrees; however, these students are expected to attain a proficiency in specified core areas of industrial and systems engineering equivalent to entering graduate students who hold a B.S.E. degree in industrial engineering. The background of each student admitted to the program with a degree other than in industrial or systems engineering is reviewed by the faculty members. These proficiencies are intended to ensure that each admitted graduate student is able to fully participate in all industrial and systems engineering discipline areas at some level, even while advanced courses in certain areas may not be immediately accessible to all graduate students. The director of graduate studies specifies in writing any remedial courses that are required of a student.

Degree Program Selection

Unless otherwise specified, graduate students in the Department of Industrial and Systems Engineering are enrolled in the M.S. nonthesis program. If a student and faculty member have jointly agreed a student may pursue the M.S. with thesis option, the student may be admitted into the thesis track.

Financial Support

Many graduate students who are actively engaged in research receive financial support through a combination of research and teaching assistantships and fellowships. Decisions about research assistantships are made by the individual faculty members and the department. Support is available on a semester or academic year basis. Stipends are approximately \$20,000 (half-time or 20 hours per week) for an academic year of graduate study. Other levels of support are possible. If an award is made, nonresident students usually qualify for tuition at the resident rate, at approximately \$10,000 per academic year. Normally stipends are not immediately awarded to international applicants, but after admission and enrollment, an application can be made. Preference for graduate student support is given to Ph.D. students.

Students should direct questions about availability of financial support to faculty members in their primary area of study. Awards and reappointments are highly competitive and are based upon a student's academic record, prior performance, the ability to serve, and upon an assessment of the student's potential contribution to the research and teaching goals of the program.

For more information, see Departmental Scholarships and Funding Opportunities on the Department of Industrial and Systems Engineering website.

Career Advancement

Industrial and systems engineers have many opportunities for employment and service in industrial, government, research, and public service organizations such as airlines, banks, hospitals, health care groups, and consulting companies. Employment opportunities are among the most varied in the engineering field. Industrial and systems engineers hold positions as advisors to management or may participate directly in management decisions. Representative job titles include industrial engineer, manufacturing engineer, systems analyst, quality specialist, operations research analyst, internal consultant, human factors specialist, supervisor, and manager.

Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation and negotiation. In addition to equipping students with the tools they need to navigate their internship, co-op, or full-time job search, Engineering Career Services also develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers in meaningful ways, including an engineering career fair each semester and other programming related to career development.

Industrial Engineering, Ph.D.

Research and Study

The Ph.D. in industrial engineering program is intended for students who wish to prepare themselves for a career creating and cultivating new knowledge. In addition to a broad selection of technical research courses, the program emphasizes original research under the close supervision of a faculty member. Students develop an individualized research project that typically includes the design and analysis of experimental or theoretical work or the invention of new processes, techniques, or devices, which ultimately leads to original publications in the academic literature. The training is appropriate for people seeking a career in academia or in research and development in industry.

The coursework requires some diversity of technical skills in three major areas which include systems, human factors, and analytics. The systems area emphasizes the design, construction, and analysis of complex systems with interdependent parts that include people and machines. The human factors area emphasizes the interaction of people with systems, and includes the study and analysis of people's cognitive and physical limitations. The analytics area emphasizes the application of mathematical formula, including statistical approaches, as well as algorithmic and computational approaches to deriving knowledge from data. Each area is supported by several faculty members, and many faculty members support multiple areas; see Facilities [p. 1500] in the Department of Industrial and Systems Engineering section of the Catalog to learn more about each research lab and its activities.

Related Certificate

Informatics

The Informatics Program offers the Certificate in Informatics with a health informatics and information science subprogram. The subprogram emphasizes the organization, management, and use of health care information; health care research, education, and practice; and information technology developments in the socioeconomic context of health care. Industrial engineering graduate students complete ISE:5860 Health Informatics and approved electives. To learn more, see the Certificate in Informatics [p. 1597] (Graduate College) in the Catalog.

Requirements

The Doctor of Philosophy program in industrial engineering requires a minimum of 72 s.h. of graduate credit. Students must maintain a g.p.a. of at least 3.50 to earn the degree. At least 36 s.h. must be taken in Department of Industrial and Systems Engineering courses (prefix ISE), including at least 24 s.h. in graduate-level courses numbered ISE:5000 and above. They must enroll in ENGR:7270 Engineering Ethics; and in ISE:5000 Graduate Seminar: Industrial Engineering, which students take every semester. Credit in those two courses may be applied toward the 72 s.h. of required coursework.

In order to meet the breadth requirement, students must successfully complete at least 6 s.h. of coursework numbered ISE:5000 or above offered by the Department of Industrial and Systems Engineering in each of the three focus areas:

human factors (two courses), analytics (two courses), and systems (two courses). Students with relevant academic background in these areas may be excused from the breadth requirement with approval of the director of graduate studies. The academic advisor and/or examining committee may decide a student must complete other requirements such as additional coursework or the acquisition of specific skills. The actual amount of coursework required is determined with the advice and consent of the academic advisor. Students who earned an M.S. at the University of Iowa may have satisfied this requirement. There is no foreign language requirement in the program.

Students are typically expected to have completed three academic years of residence, or two years if they already hold a recognized M.S. degree. For students who earned their M.S. degree at the UI, no more than 36 s.h. from the M.S. degree may be counted toward the Ph.D. degree. For students who earned their M.S. from another institution, a maximum of 30 s.h. may be transferred toward the doctoral program. The director of graduate studies reviews the transcripts of new Ph.D. students to determine which requirements have been met from previous coursework.

Excellence in research is the principal requirement for the degree. It is expected that the Ph.D. dissertation research project represents an original and significant contribution to the body of knowledge in the field. At least one accepted research article in a peer-reviewed journal as first author with the research advisor as a co-author, in addition to presentation of the research in a departmental seminar, are requirements. Submission of three, first-authored papers and at least one research presentation at a national conference is typical. In addition, students must fulfill the qualifying requirement, pass the comprehensive examination, submit the Final Examination: Advanced Degree form, complete a Report of Thesis Approval, and submit a copy of their thesis to the Graduate College by following the published guidelines and deadlines.

Qualifying Exam

Students interested in pursuing a Ph.D. are initially admitted as M.S. nonthesis students until they have completed the qualifying examination. This is typically achieved within their first three semesters if beginning the program without an M.S. degree, or within the first two semesters if beginning the program with an M.S. degree. Once the exam is passed, students are formally admitted to the Ph.D. program. The purpose of this qualifier is to determine a student's proficiency in research and scholarship.

Comprehensive Examination

The general rules for the administration of the Ph.D. comprehensive examination are contained in the policies and procedures of the Graduate College. The tradition in the department is for the comprehensive examination to consist of a written and oral component. Students write and submit a comprehensive examination document, usually called the dissertation research proposal, to each member of the examination committee two weeks before the examination date. During the examination, students make a roughly 30-minute presentation on the content of the research proposal. Committee members may ask questions regarding the proposal before, during, or after the oral presentation. Having satisfactorily completed the comprehensive examination, students are accepted as a candidate for the Ph.D. degree.

Final Examination (Thesis Defense)

Each student must defend the completed dissertation in the final examination, which is conducted by the examining committee.

En Passant Option

Students admitted to the Ph.D. program may elect to earn their M.S. degree through the *en passant* option, with the permission of their Ph.D. committee. This option allows students to write an English-language manuscript as the first author and submit it to a peer-reviewed research journal in lieu of writing the M.S. thesis. With this option, students, in conjunction with their academic advisor, author a paper that serves as the foundation for the Ph.D. research. The decision to select this option must be made before the qualifying examination. The committee may determine, based on the published or submitted scholarship to peer-reviewed journals, that the presentation of a separate research thesis is not necessary. In this case, up to 9 s.h. in ISE:5999 Research: Industrial Engineering M.S. Thesis may be counted towards the nonthesis option. Students choosing the *en passant* option generally receive an M.S. degree without the thesis designation.

For more detailed information about program requirements, see the Graduate Student Handbook or Graduate Program on the Department of Industrial and Systems Engineering website.

Admission

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Admission to the graduate program is competitive and based on an applicant's previous coursework, research, and industrial experience. The general admission standards are intended to maintain the quality of the graduate program and to ensure sufficient preparation required for timely degree completion. Specific admission standards may be waived by the Graduate Admissions Committee when other evidence of competence is compelling. These standards are minimum standards, and meeting these standards does not ensure admission to the program; admitted students typically exceed these standards.

Applicants are expected to have a minimum cumulative g.p.a. of at least 3.00 on a 4.00 scale, and have earned a B.S.E. in industrial engineering degree or in a related science or engineering discipline. Applicants are required to submit the results of the Graduate Record Examination (GRE) General Test. The GRE Advanced Examination in Engineering is not required for admission to the program; however, these scores should be forwarded to the department if that examination is taken. The minimum GRE General Test requirement is a combined quantitative reasoning and analytic writing score of 300. There is no specified minimum requirement for the verbal reasoning portion of the test.

International applicants whose first language is not English are required to submit the results of their Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS). Applicants who have completed a post-secondary degree at an English-speaking institution may request a waiver of this requirement. A minimum TOEFL

score of 100 or a minimum IELTS score of 7 is required for admission.

Applicants must arrange to have three letters of recommendation sent to the department online through the Office of Admissions website. The letters should be completed by persons who are well acquainted with the applicant and the ability of the applicant to undertake graduate work in industrial or systems engineering.

While the department considers applications at any time, first consideration is given to students who have their application materials, including their application, transcripts, GRE scores, TOEFL scores, and the required letters of recommendation, completed by the admission priority deadline as found on the Graduate Admissions website. The director of graduate admissions is responsible for overseeing the graduate recruiting activities and the admissions procedures in the department. The director serves as the point of initial contact between prospective graduate students and the department, and maintains a record of each qualified applicant in the departmental office. The director, in consultation with the Graduate Admissions Committee and the department chair, screens applicants and ultimately determines which applicants are extended offers of admission.

Applicants with Degrees Other Than in Industrial or Systems Engineering

The department encourages students with degrees in other scientific disciplines, such as in computer science, mathematics, physics, or other engineering disciplines, to apply for admission. Some students may have already completed M.S. degrees; however, these students are expected to attain a proficiency in specified core areas of industrial and systems engineering equivalent to entering graduate students who hold a B.S.E. degree in industrial engineering. The background of each student admitted to the program with a degree other than in industrial or systems engineering is reviewed by the faculty members. These proficiencies are intended to ensure that each admitted graduate student is able to fully participate in all industrial and systems engineering discipline areas at some level, even while advanced courses in certain areas may not be immediately accessible to all graduate students.

Financial Support

Many graduate students who are actively engaged in research receive financial support through a combination of research and teaching assistantships and fellowships. Decisions about research assistantships are made by the individual faculty members and decisions about teaching assistantships are made by the department. Support is available on a semester or academic year basis. Stipends are approximately \$20,000 (half-time or 20 hours per week) for an academic year of graduate study. Other levels of support are also possible. If an award is made, nonresident students usually qualify for tuition at the resident rate, at approximately \$10,000 per academic year. Normally stipends are not immediately awarded to international applicants, but after admission and enrollment, an application can be made. Preference for graduate student support is given to Ph.D. students.

Students should direct questions about availability of financial support to faculty members in their in primary area of study. Awards and reappointments are highly competitive and are

based upon a student's academic record, prior performance, the ability to serve, and upon an assessment of the student's potential contribution to the research and teaching goals of the program.

For more information, see Departmental Scholarships and Funding Opportunities on the Department of Industrial and Systems Engineering website.

Career Advancement

Industrial and systems engineers have many opportunities for employment and service in industrial, government, research, and public service organizations. Employment opportunities are among the most varied in the engineering field. Industrial and systems engineers are employed by manufacturing and energy firms, government agencies, and service organizations such as airlines, banks, hospitals, health care groups, and consulting companies.

The Ph.D. is a gateway toward careers of learning and creation. Employers typically hire people with doctorates to run laboratories, create research directions, and supervise other engineers at the boundaries of knowledge. Ph.D.-level researchers generally enjoy great freedom and tailored work environments as they explore and learn to help create new visions of tomorrow. A Ph.D. opens up academic, research, and entrepreneurial possibilities limited only by one's drive and creativity. Positions are often found through announcements in trade journals, international conferences, and specialized job-posting services. Students often work with faculty to identify and apply for appropriate positions. It is rare that students do not find an appropriate position before completing their thesis.

Mechanical Engineering

Chair

- Ching-Long Lin

Undergraduate major: mechanical engineering (B.S.E.)

Graduate degrees: M.S. in mechanical engineering; Ph.D. in mechanical engineering

Faculty: <https://me.engineering.uiowa.edu/people>

Website: <https://me.engineering.uiowa.edu>

The Department of Mechanical Engineering offers distinct undergraduate and graduate degrees and research programs in mechanical engineering. It also is the administrative home of the undergraduate Certificate in Naval Science and Technology [p. 1531].

Mechanical engineering is broadly concerned with energy, manufacturing, and design of machines. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of a wide variety of devices, machines, and systems—including complex human-machine systems—for energy conversion, biofuel production, environmental control, materials processing, transportation, materials handling, and other purposes. Major subspecialties of mechanical engineering include thermal-fluids engineering and mechanical systems engineering.

Thermal-fluid phenomena occur in many engineering systems and devices such as aircraft; automobiles; off-road vehicles; ships; gas turbines; heat exchangers; material processes; heating, ventilating, air-conditioning, and refrigerating systems; hydraulic and wind turbines; airbag inflators; fuel cells; biofuel processes; environmental control devices; and biomedical systems.

Machines and mechanical systems are the foundations of human technology. Mechanical systems are found in mechanical engineering systems and devices such as manufacturing equipment, medical equipment, ground vehicles, heavy equipment, farm equipment, aircraft, ships, home appliances, packaging machinery, wind turbine blades and gearboxes, robots, and biomedical systems.

Mechanical engineers find a wide variety of career opportunities in industry, government, and education. Mechanical engineers form an integral part of most industries, including aerospace firms, energy companies, automobile manufacturers, health care providers, food- and metal-processing industries, petroleum refineries, electronic and computer manufacturers, heavy construction and agricultural vehicle manufacturers, wind turbine manufacturers, thermal comfort equipment firms, farm equipment firms, and consulting companies.

Certificates

Naval Science and Technology

The Department of Mechanical Engineering offers the undergraduate certificate program in Naval Science and Technology; see the Certificate in Naval Science and Technology [p. 1531] in the Catalog.

Related Certificate: Transportation Studies

The Transportation Studies Program offers the Certificate in Transportation Studies. The program focuses on the varied and complex problems of transportation and on

interdisciplinary approaches to addressing them. The Departments of Civil and Environmental Engineering, Industrial and Systems Engineering, Mechanical Engineering (College of Engineering), Economics (Tippie College of Business), and the School of Planning and Public Affairs (Graduate College) participate in the program.

The certificate is coordinated by the School of Planning and Public Affairs; see the Certificate in Transportation Studies [p. 1632] in the Catalog.

- Master of Science in Mechanical Engineering [p. 1526]
- Doctor of Philosophy in Mechanical Engineering [p. 1528]

Facilities

Undergraduate Instruction

Engineering Core

The laboratories for fluid flows and transport processes contain a wind tunnel; a water flume; a water table; four water channels with porous media; three air-jet tables; various air, water, and oil flow devices; and facilities for numerous small-scale experiments to demonstrate the principles of mass, momentum, and energy transfer.

For information about laboratories affiliated with core courses coordinated by other College of Engineering departments, see the departments' Catalog sections.

Computational Fluids Laboratory

The Computational Fluids Laboratory is equipped with 20 computers running Ansys Fluent software used in fluid mechanics courses.

Control Automation Robotics Laboratory

The new Control Automation Robotics (CAR) Laboratory has KUKA KR 6 and KUKA KMR iiwa omniMove robotics. Students who are interested in learning how to program and control an industrial robot can enroll in ME:4113 Control of Mechanical Engineering Systems. Modern Robotics and Automation (ME:4140) is another course that uses the CAR lab.

Design Project Laboratory

The Design Project Laboratory supports all senior design project courses. It is equipped with eight mid-level workstations as well as a high-end workstation, which enables students to manipulate full design models and interactive Cisco Webex sessions with companies using the analysis software during the session. Research versions of Ansys Fluent and ProE, standard computers, and videoconferencing facilities also are available.

Fluids Laboratories

The fluid laboratories comprise a trio of rooms. The Fluids Fundamentals Lab includes recently built equipment and ones that have been around for decades. The Advanced Measurements Lab includes some of the larger experimental devices, such as a wind tunnel and a towing tank. The third laboratory, the Fluids Workshop, is a space in which students can perform their experiments. The new laboratories held their open house in January 2019. Four courses with a total of approximately 170 students currently hold classes in the lab.

Ralph and Barbara Stephens Experimental Engineering Laboratory

The Ralph and Barbara Stephens Experimental Engineering Laboratory supports the required undergraduate courses ME:3351 Engineering Instrumentation and ME:4080 Experimental Engineering. The lab is equipped with varied instruments and test rigs that help students learn basic measurement principles and laboratory procedures. It also offers sensors for measurement of displacement, mass, temperature, pressure, velocity and flow rate, heat flux, force, torque, and so forth.

Solidification Laboratory

The Solidification Laboratory supports research in fundamental aspects of solidification and their application in casting of metals. Research in the lab ranges from basic experimental and computational studies of microstructure evolution to modeling and simulation of a wide variety of industrial metal casting processes. Collaboration with the casting industry has resulted in custom-made software for process control, new capabilities in commercially available casting simulation software, and strategies for yield improvement and defect prevention. Facilities include numerous state-of-the-art computer workstations and experimental test setups.

Thermal and Heat Transfer Laboratory

The Thermal and Heat Transfer Laboratory is equipped with data acquisition systems to process data online. It also provides facilities for experiments in heat transfer measurements.

Graduate Facilities

Fluid Mechanics

The program in fluid mechanics is conducted in close collaboration with IIHR—Hydroscience & Engineering. The equipment available to graduate students includes several wind tunnels and hydraulic flumes, an environmental flow facility, a towing tank, two special low-temperature flow facilities for investigation of ice phenomena, hot-wire and laser anemometer systems, particle-image velocimetry systems, and computer-based data acquisition systems.

Facilities available in the department include a flow visualization and imaging system with charge-coupled devices (CCD) camera, and a low-speed wind tunnel. IIHR and College of Engineering shops provide the necessary support. In addition to using in-house workstations and computers, the department's faculty members and students make extensive use of supercomputers at national centers.

Mechanical Systems

Computer-based simulation research activities in the mechanical systems area are carried out mainly in the

University of Iowa Technology Institute. It maintains a variety of high-performance computer systems in support of its technology research and development efforts. General computing services are supported by a number of Linux and Windows applications servers connected to centralized file servers. Computer-aided design/computer-aided engineering (CAD/CAE), software development, virtual prototyping, and virtual environment development applications are hosted on numerous high-performance workstations. Standard desktop, multimedia, and office productivity applications are hosted on a network of more than 40 workstations.

Thermal Sciences

Facilities for research in the thermal sciences and systems consist of a low-pressure combustion chamber, a high-pressure continuous flow combustion chamber, a high-pressure chamber for atomization study, a test rig for heat transfer to near supercritical fluids, a diffusion flame test rig, an enclosed laminar flame test rig, an air atomization spray apparatus, test stands for melting and solidification studies, various optical measurement systems, and two fuel cell test rigs. Laser-based diagnostics (e.g., laser-induced fluorescence, imaging, and laser Doppler anemometry) are available for solidification, turbulent flow, heat transfer, and combustion studies. Flow visualization and imaging by CCD camera are available for the study of complex fluid motion and heat convection, and combustion flows.

Shared Laboratory

Design for Manufacturing Laboratory

The Design for Manufacturing Laboratory is used by students in mechanical engineering and in industrial and systems engineering. The laboratory provides students with experience in CAD/CAM systems. It is equipped with 4-axis computer numerical control (CNC) mills (Haas and Tormach), CNC router (Techno-CNC), CNC metal lathe (Haas and Techno-CNC), drill press, plastic injection molder, thermoforming machine, band saw, disc sander, bench grinder, polishing wheel, hand drill, sandblasting cabinet, press, foot shear, and welding station. The lab has the latest software technology, such as Pro/ENGINEER and Rhinoceros.

Mechanical Engineering Courses

ME:0000 Mechanical Engineering Internship/Co-op0 s.h.

Mechanical engineering students participating in the Cooperative Education Program register in this course during work assignment periods; registration provides a record of participation in the program on the student's permanent record. Requirements: admission to the Cooperative Education Program.

ME:1000 First-Year Seminar 0-1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

ME:2020 Mechanical Engineering Sophomore Seminar 0 s.h.

Introduction to the mechanical engineering profession and curriculum; ethics and professionalism in classroom and workplace; mentorship program and professional societies; visits to laboratories and local companies. Requirements: sophomore or transfer standing.

- ME:2200 Introduction to Mechanical Engineering Design** 2 s.h.
Solid modeling, assemblies, drawings, and Geometric Dimensioning and Tolerancing (GD&T); basic engineering design process; introduction to engineering standards, product liability, and ethics. Prerequisites: ENGR:1100.
- ME:2300 Manufacturing Processes** 3 s.h.
Fundamentals of design, engineering graphics, and manufacturing processing; computer graphics using Pro/ENGINEER for CAD and CAM; typical industrial processes including casting, welding, machining, and forming; laboratory exercises and projects. Corequisites: ENGR:2720 and (ME:2200 or BME:2710).
- ME:3040 Thermodynamics II** 3 s.h.
Power and refrigeration cycles; mixtures of gases, psychometric mixtures; availability; thermodynamics of combustion and chemical equilibrium. Prerequisites: ENGR:2130.
- ME:3045 Heat Transfer** 3 s.h.
Principles of heat transfer by conduction, convection, radiation; analytical and numerical methods of solution; applications to engineering problems. Prerequisites: MATH:3550 and ENGR:2510 and ENGR:1300.
- ME:3052 Mechanical Systems** 4 s.h.
Topics in mechanical behavior and failure of materials; materials selection in design; stress and deflection analysis; static failure theories; fatigue and durability in design; fracture, statistical, and reliability considerations; introduction to finite element analysis using commercial software packages; standards, product liability, engineering ethics. Prerequisites: ENGR:2750. Corequisites: ENGR:2720 and ME:2300 and STAT:2020.
- ME:3091 Professional Seminar: Mechanical Engineering** 0 s.h.
Professional aspects of mechanical engineering: presentations, student/faculty interaction, professional society involvement, panel discussions, plant trip. Requirements: junior standing.
- ME:3351 Engineering Instrumentation** 2 s.h.
Basic elements of measuring circuits (bridges, voltage dividers, shunts, transformers); laboratory instrumentation (oscilloscopes, multimeters, power supplies, signal generators); amplifiers; frequency response principles; sensors; data acquisition, signal processing, filtering using Labview. Prerequisites: PHYS:1612 and ENGR:2120.
- ME:3600 Control of Mechanical Engineering Systems** 3 s.h.
Introduction to fundamental control theory and robot manipulators. Prerequisites: MATH:2560 and ENGR:2710.
- ME:4024 Product Design and Realization** 3 s.h.
Design principles and methods to develop 3-D part models and assemblies; emphasis on use of mechanical engineering design principles and functional requirements through the complete design process using PTC Creo Parametric; for students with a basic knowledge of computer-aided design (CAD). Prerequisites: ENGR:2760 or ME:2200. Corequisites: ENGR:2750.
- ME:4048 Energy Systems Design** 4 s.h.
Principles and design of energy conversion systems, including solar, wind, and geothermal power systems; design of thermal-fluid system components, modeling and simulation of systems, optimization techniques; design projects. Prerequisites: ME:3045.
- ME:4055 Mechanical Systems Design** 3 s.h.
Kinematics of mechanisms, dynamics and vibration of machines, cam and gear, machine elements, computer-aided analysis of machines. Prerequisites: ENGR:2710 and ME:3052.
- ME:4080 Experimental Engineering** 4 s.h.
Principles of physical measurements; standards calibration, estimation of error; static and dynamic performance of measuring systems; laboratory experience, experiment planning, report writing. Prerequisites: ME:3351. Corequisites: ME:3045 and ME:3052.
- ME:4086 Mechanical Engineering Design Project** 3 s.h.
Application of mechanical, thermal, fluid systems design; student or team design projects initiated at various levels in the design process and carried through to higher levels; emphasis on synthesis, written and oral communication. Corequisites: ME:4048 or ME:4055.
- ME:4098 Individual Investigations: Mechanical Engineering** arr.
Individual projects for mechanical engineering undergraduate students; laboratory study; engineering design project; analysis, synthesis, simulation of an engineering system; computer software development, research.
- ME:4110 Computer-Aided Engineering** 3 s.h.
Computational engineering modeling and simulation, geometric modeling, grid generation, finite-element and finite-volume methods, uncertainty analysis, optimization, engineering applications. Prerequisites: ENGR:2750. Corequisites: ME:3052. Same as CEE:4515.
- ME:4111 Scientific Computing and Machine Learning** 3 s.h.
Numerical methods in scientific computing; root problems and optimization; linear algebraic equations; eigenvalue problems; numerical differentiation and integration; interpolation and curve-fitting; initial value and boundary value problems; machine learning in regression, classification, and clustering problems; Python programming and packages. Prerequisites: MATH:2560. Same as CEE:4511.
- ME:4112 Engineering Design Optimization** 3 s.h.
Engineering design projects involving modeling, formulation, and analysis using optimization concepts and principles; linear and nonlinear models, optimality conditions, numerical methods. Prerequisites: ENGR:2110 and MATH:2550. Requirements: junior standing. Same as CEE:4512.
- ME:4113 Control of Mechanical Engineering Systems** 3 s.h.
How to model simple engineering systems, apply time and frequency domain analysis techniques, and design control systems; application of these techniques using MATLAB; writing differential equations describing engineering systems and determine time domain response to a wide range of inputs; use of state-variable equations to model engineering systems and determine their time response to a wide range of inputs; describe advantages of feedback control; analyze performance of control systems; determine stability of control systems using Root-Locus, Bode, and Nyquist methods; design feedback control systems using frequency domain and state-variable methods. Prerequisites: MATH:2550 and MATH:2560 and ENGR:2710. Same as ISE:4113.

ME:4116 Manufacturing Processes Simulations and Automation 3 s.h.

Material processing, metal cutting theories, forming, micro/nano fabrication, programmable logic controller, computer numerical controllers, discrete control system, DC and AC servo motors, Command generation. Prerequisites: ME:2300 or ENGR:2760. Same as ISE:4116.

ME:4117 Finite Element Analysis 3 s.h.

Trusses and frames; Rayleigh-Ritz methods; 2-D and 3-D elasticity problems; heat transfer, thermo-mechanical coupling; transient problems; use of commercial software for applications in analysis and design of mechanical engineering systems. Prerequisites: ENGR:2750.

ME:4120 Advanced Linear Control Systems 3 s.h.

Overview of system modelling and classical control design tools and methods, and bridges those with state-space approach for analysis and control of linear systems in the time domain; topics include linearization, root locus, Bode diagrams, Nyquist criteria, robustness margins, lead-lag compensators, observability and controllability, state-space realizations, internal stability and input-output stability, pole-placement, observers and reduced order observers, separation principle, performance limitations, linear quadratic regulator and its guaranteed margins, and optimal estimation. Prerequisites: ME:3600 or (MATH:2550 and MATH:2560 and ENGR:2710).

ME:4125 Biomimetic Fluid Dynamics 3 s.h.

Study and development of engineered systems that mimic the structure and function of biological systems; overview of the fluid dynamic principles that govern locomotion by swimming or flapping flight; equations of motion, fundamentals of aerodynamics; analytical models of force generation for swimming and flight; parameters governing effective locomotion; experimental and numerical studies to understand the present state of the art, challenges, and important questions. Prerequisites: ENGR:2510.

ME:4140 Modern Robotics and Automation 3 s.h.

Introduction to basics of robotics and automation; mechanical design development and manufacturing of smart and automated devices, components, and systems; principles of robotic motion and kinematics; introduction to process automation through system requirement identification, equipment integration, sensors, actuation, and logical control; fundamentals of design, analysis, and manufacturing to meet functionality requirements of products, devices, and systems using the principles of mechatronics to develop smart and automated products. Prerequisites: ENGR:2710.

ME:4145 Industrial Internet of Things (IIoT) 3 s.h.

Introduction to process automation through system requirement identification, equipment integration, sensors, actuation, and logical control; fundamentals of design, analysis, and manufacturing to meet functionality requirements of products, devices, and systems using principles of mechatronics to develop smart and automated products; integration of advanced networking and monitoring into device control and automation. Corequisites: ME:3351.

ME:4150 Artificial Intelligence in Engineering 3 s.h.

Artificial intelligence, computational intelligence, data science and engineering, machine intelligence, digital manufacturing and design, intelligent machining, fault diagnosis, autonomy, robotics; applications in mechanical engineering. Prerequisites: ME:4111.

ME:4153 Fundamentals of Vibrations 3 s.h.

Vibration of linear discrete and continuous mechanical and structural systems; harmonic, periodic, and arbitrary excitation; modal analysis; applications. Prerequisites: ENGR:2750. Same as CEE:4532.

ME:4175 Computational Naval Hydrodynamics 3 s.h.

Simulations based on relevant vessels and propellers will be used to introduce the use of computational fluid dynamics for the analysis of surface and underwater marine craft performance, while also introducing naval hydrodynamics concepts related to resistance, propulsion, maneuvering, and seakeeping; an educational version of the naval hydrodynamics code REX will be freely distributed and used in the class. Prerequisites: ENGR:2510.

ME:4176 Experimental Naval Hydrodynamics 3 s.h.

Introduction to experimental methods for measurement of propeller thrust performance and resistance of surface vessels and underwater marine craft; present and expand on fundamental concepts related to fluid mechanics, measurement methods, and uncertainty analysis in a context that focuses on naval science and technology challenges; students work with models of relevant vessels and propellers in a dedicated towing tank facility. Prerequisites: ENGR:2510.

ME:4186 Enhanced Design Experience 2-3 s.h.

Experience working in teams on industry-sponsored design and product development projects scheduled for production; emphasis on practical experience with the complete design process, from conceptualization through prototyping, evaluation, testing, and production; written and oral communication. Prerequisites: ME:4086.

ME:4200 Modern Engineering Materials for Mechanical Design 3 s.h.

Overview of design approaches for different engineering materials (i.e., metals, polymers, ceramics); topics include manufacturing processes, smart and advanced functionalities for applications in emerging engineering fields, theoretical models describing mechanical behavior, failure mechanisms, and design criteria; introduction to composite materials; computer lab activities focus on finite element method (FEM) simulations of materials with different mechanical properties. Prerequisites: ME:3052.

ME:5113 Mathematical Methods in Engineering 3 s.h.

Linear ordinary differential equations, series solutions of differential equations, special functions, Laplace transforms, Fourier series, matrices, linear systems, eigenvalue problems, second-order partial differential equations. Prerequisites: MATH:2550 and MATH:2560. Same as CBE:5140, CEE:5513.

ME:5114 Nonlinear Control in Robotic Systems 3 s.h.

Nonlinear analysis and control systems theory; focus on Lyapunov-based analysis methods and associated design techniques; introduction to definitions of stability for autonomous and nonautonomous systems leading to a Lyapunov framework, and based on the developed Lyapunov-based analysis tools, basic and advanced design tools for contemporary engineering problems are presented, including state-of-the-art techniques. Prerequisites: ME:3600 or ME:4120 or CBE:4105 or ECE:3600.

- ME:5115 Cooperative Autonomous Systems** 3 s.h.
How to enable ground, marine, and aerial robotic platforms to perform cooperative tasks autonomously in complex real-world environments; theoretical topics include numerical approximation, optimal control, nonlinear analysis and control, game theory, and graph theory; project-based activities in a laboratory environment; focus on design and implementation of motion planning, tracking, collision avoidance, and cooperative control algorithms for autonomous vehicles. Prerequisites: ME:3600 or ME:4120 or ME:4113 or CBE:4105 or ECE:3600.
- ME:5120 Vehicle System Dynamics** 3 s.h.
Introduction to principles and basic procedures used in analysis of vehicle system dynamics and design; topics include tire mechanics, longitudinal and cornering tire force characteristics, steady-state and transient vehicle cornering responses, vehicle stability control, ride comfort, suspension design, off-road vehicle mobility, tire-soil interaction, and vehicle performance evaluations. Prerequisites: ENGR:2710.
- ME:5143 Computational Fluid and Thermal Engineering** 3 s.h.
Governing equations of fluid flow and heat transfer; basic numerical techniques for solution of the governing equations; estimation of accuracy and stability of the approximations; boundary conditions; grid generation; applications to flows and heat transfer in engineering systems; familiarity with software for analysis and design of thermo-fluids systems. Prerequisites: ME:3045.
- ME:5145 Intermediate Heat Transfer** 3 s.h.
Steady and unsteady conduction; forced and natural convection; surface and gaseous radiation; condensation and evaporation; analytical and numerical methods and applications. Prerequisites: ME:3045.
- ME:5146 Modeling of Materials Processing** 3 s.h.
Manufacturing processes for metals, polymers, semiconductors; processing by casting, solidification, crystal growth, polymer molding and extrusion, welding, heat treating, application of optical (laser) and electromagnetic energy; processes that use momentum, heat, mass transfer principles; measurement and instrumentation for materials processing; current topics in materials processing. Corequisites: ME:3045.
- ME:5149 Propulsion Engineering** 3 s.h.
Opportunity to develop basic understanding and knowledge of rocket and airbreathing propulsion systems, relevant terminology and analysis techniques, parameteric cycle analysis for ideal engines, off-design analysis methods, problem-solving methodology. Prerequisites: ME:3040. Requirements: graduate standing.
- ME:5150 Intermediate Mechanics of Deformable Bodies** 3 s.h.
Application of equilibrium analyses, strain-displacement relations, and constitutive relationships to practical structural systems and elementary plane elasticity problems. Prerequisites: ENGR:2750. Same as CEE:5540.
- ME:5154 Intermediate Kinematics and Dynamics** 3 s.h.
Kinematic and dynamic analysis of mechanical systems; computational kinematics, Lagrangian dynamics, principle of virtual work in dynamics, constrained dynamics, spatial dynamics. Prerequisites: ENGR:2710.
- ME:5159 Fracture Mechanics** 3 s.h.
3-D stress states, definition and criteria for failure, nominal and local yield phenomena, linear elastic and elastic plastic fracture mechanics, plane stress and plane strain fracture toughness, J-Integral, crack opening displacement, environmental assisted cracking, fatigue crack growth, fail safe, and damage tolerant design. Prerequisites: ENGR:2750. Corequisites: ME:3052. Same as CEE:5549.
- ME:5160 Intermediate Mechanics of Fluids** 3 s.h.
Basic concepts and definitions; pressure distribution in a fluid; governing equations and boundary conditions; integral and differential analysis; dimensional analysis and similarity; experimental analysis; laminar and turbulent internal and external flows; potential flows; engineering applications. Prerequisites: ENGR:2510. Same as CEE:5369.
- ME:5162 Experimental Methods in Fluid Mechanics and Heat Transfer** 3 s.h.
Hands-on experience in methodology of conducting experiments in fluid mechanics and heat transfer from design to data acquisition and processing; essential theoretical elements, experimental methodologies, data acquisition systems, uncertainty analysis; wide variety of instruments for fundamental and applied experimentation; work in small groups; design, implement, test, and report an experiment in area of interest. Same as CEE:5372.
- ME:5167 Composite Materials** 3 s.h.
Mechanical behavior of composite materials and their engineering applications; composite constituents (fibers, particles, matrices) and their properties and behavior; macromechanical behavior of composite laminae; micromechanical predictions of composite overall properties; classical lamination theory; composite beams and plates. Prerequisites: ENGR:2750. Same as CEE:5137.
- ME:5179 Continuum Mechanics** arr.
Mechanics of continuous media; kinematics of deformation, concepts of stress and strain; conservation laws of mass, momentum and energy; constitutive theories; boundary and initial value problems. Prerequisites: ENGR:2750 or ENGR:2510. Same as CEE:5179.
- ME:5195 Contemporary Topics in Mechanical Engineering** arr.
New topics in fluid and thermal sciences and mechanical systems not covered in other courses; topic and coverage determined by student/faculty interest. Requirements: junior standing.
- ME:5210 Intermediate Thermodynamics** 3 s.h.
Fundamental principles of thermodynamics as applied to phase equilibrium; properties of fluids, first and second law, variable composition systems, behavior of real fluids, mathematical techniques for solution thermodynamics. Requirements: CBE:3105 or ME:3040 or graduate standing. Same as CBE:5110.
- ME:6191 Graduate Seminar: Mechanical Engineering** 1 s.h.
Presentation and discussion of recent advances and research in mechanical engineering by guest lecturers, faculty, students.
- ME:6198 Individual Investigations: Mechanical Engineering** arr.
Individual project in mechanical engineering, for department graduate students; laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research.

- ME:6199 Research: Mechanical Engineering M.S. Thesis** **arr.**
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for M.S. with thesis in mechanical engineering.
- ME:6214 Analytical Methods in Mechanical Systems** **3 s.h.**
Vector and function spaces; functionals and operators in Hilbert spaces; calculus of variations and functional analysis with application to mechanics; Ritz and Galerkin methods. Prerequisites: ME:5113. Same as CEE:6310.
- ME:6215 Finite Element II** **3 s.h.**
Computer implementation; plate and shell elements; mixed and hybrid formulations; nonlinear analysis; recent development; introduction to boundary element method. Prerequisites: CEE:4533. Same as CEE:6532, IGPI:6216.
- ME:6216 Laser Materials Processing** **3 s.h.**
Proficient engineering background involved in laser processing and manufacturing; fundamentals and operation principles for various types of laser systems, laser optics, principles of laser-matter interactions, laser-induced thermal and thermo-mechanical effects; emerging areas of laser applications (e.g., microscale and nanoscale laser processing, ultrafast laser processing) and related energy transport analyses; video demonstrations. Prerequisites: ME:3045 and MATH:3550.
- ME:6217 Advanced Modeling and Simulation for Manufacturing** **3 s.h.**
How materials often behave in a complicated manner involving deeply coupled effects among stress/stain, temperature, and microstructure during a manufacturing process; modeling and prediction of material processes based on a metallo-thermomechanical coupled analysis; focus on heat transfer modeling in material processes, fundamental mechanics aspects required for material processing analysis, and microstructural evolution modeling in material processes. Prerequisites: CEE:4533 and ME:3045.
- ME:6240 Probabilistic Inference and Estimation for Mechanical Systems** **3 s.h.**
Theory and application of common techniques for probabilistic inference and estimation including types of estimators; Bayesian, Kalman, and Particle filtering; various motion and measurement models; and algorithms for simultaneous localization and mapping (SLAM). Prerequisites: ME:4120. Requirements: some level of exposure to probability and statistics, linear algebra, and 3-D rigid body dynamics.
- ME:6245 Diffusive Transport** **3 s.h.**
Diffusive transport of heat, mass, and momentum; phenomenological laws and analogies; analytical and numerical solution techniques; inverse heat conduction; multiphase and multicomponent systems. Prerequisites: ME:5145. Same as CBE:6145.
- ME:6247 Contact Mechanics** **3 s.h.**
Varied aspects of contact mechanics and engineering applications, including stationary contacts, sliding, rolling, impact, and fretting fatigue; emphasis on theoretical basis of solutions of contact mechanics problems; mathematical methods of solving contact problems using Green's function method; complex potentials and integral transform methods. Prerequisites: ME:5113 and ME:5150.
- ME:6255 Multiscale Modeling** **3 s.h.**
Computational modeling of engineering materials ranging from molecular to continuum scales, molecular dynamics and Monte Carlo methods, nanoscale continuum modeling, scale-coupling methods. Prerequisites: ME:5143 or CEE:4533. Same as CEE:7549.
- ME:6260 Viscous Flow** **3 s.h.**
Equations of viscous flow; classical analytical and numerical solutions; flow regimes and approximations; laminar boundary layers—equations, solution methods, applications; stability theory and transition; incompressible turbulent flow—mean-flow and Reynolds-stress equations, modeling, turbulent boundary layers and free shear flows. Requirements: for ME:6260—ME:5160; for CEE:6376—CEE:5369. Same as CEE:6376.
- ME:6261 Multibody System Dynamics** **3 s.h.**
Introduction to principles of analytical and computational dynamics for rigid and flexible multibody systems; spatial kinematics and dynamics of rigid body systems, numerical solution procedures for multibody dynamics analysis, and flexible multibody dynamics. Prerequisites: ME:5154.
- ME:6262 Inviscid Flow** **3 s.h.**
Derivation of governing equations for fluid flow; general theorems for motion of inviscid, incompressible flows; solution techniques for two- and three-dimensional irrotational flows; forces and moments acting on immersed bodies; vortex kinematics and dynamics; steady and unsteady aerodynamic theory. Prerequisites: ME:5160.
- ME:6263 Compressible Flow** **arr.**
Compressible flow behavior; 1-D unsteady flow and appropriate use of x-t diagrams; 2-D flows and use of the method of characteristics; Burgers' Equation and its properties.
- ME:6275 Advanced Heat Transfer** **3 s.h.**
Conservation laws, forced and natural convection; surface and gaseous radiation; analytical and numerical methods; applications. Prerequisites: ME:5145.
- ME:6278 Nonlinear Elasticity** **3 s.h.**
Nonlinear elasticity theory; modern applications in biomechanics; vectors and tensors, constitutive theory of elastic material, some exact solutions of boundary value problems, inverse deformation relations, stability of elastic material, theories of tissue adaptive response. Prerequisites: ME:5150. Requirements: elementary linear elasticity.
- ME:6300 Control of Networked Autonomous Systems** **3 s.h.**
Introduction to state-of-the-art research in networked autonomous robotic systems; graph theory based network models, decentralized control, multi-agent cooperation, and mobile sensor networks. Corequisites: ME:5115 or ME:5114.
- ME:6320 Fluid-Structure Interactions** **3 s.h.**
Foundations of fluid-structure interactions (FSI) with focus on hydro-electric responses of flexible structures in dense fluids; structural dynamics and fluid dynamics are too often characterized as distinct disciplines and this dichotomous mindset fails to recognize the important effects that dynamics fluid loads exert upon structural vibrations and vice-versa; students are equipped with knowledge to approach modern FSI problems; foundations of theoretical FSI, experimental methods, and computational approaches. Prerequisites: (ME:5160 or ME:4125) and (ME:4153 or ME:5154).

ME:7248 Combustion Theory 3 s.h.

Laminar flame theory; turbulent combustion; spray combustion; thermal ignition; pollutant formation, oxidation; combustion diagnostics. Prerequisites: ME:5145 and ME:5160.

ME:7250 Advanced Fracture Mechanics 3 s.h.

Fracture of modern engineering materials; linear-elastic fracture; computational methods; functionally graded materials; elastic-plastic fracture; multiscale fracture and fatigue crack initiation. Prerequisites: ME:5113 and (ME:5159 or CEE:4533). Same as CEE:7250.

ME:7256 Computational Solid Mechanics 3 s.h.

Advanced computational methods for nonlinear and dynamic analysis of solids, structures; new space- and time-discretization methods for problems, including highly nonlinearities, large deformation, contact/impact conditions. Prerequisites: ME:5113 and CEE:4533.

ME:7257 Probabilistic Mechanics and Reliability 3 s.h.

Stochastic and reliability analysis of mechanical systems; computational methods for structural reliability; random eigenvalue problem; random field and stochastic finite element methods. Prerequisites: CEE:4533 and ME:5113.

ME:7266 Interfacial Flows and Transport Processes 3 s.h.

Physics of fluid interfaces and numerical techniques to simulate interface dynamics; interfacial flow coupled with thermal-fluid transport, from molecular interactions to continuum approximations; development of computer code segments to track and represent interface-flow interactions. Prerequisites: ME:5145 and ME:5160.

ME:7267 Multiphase Flow and Transport 3 s.h.

Thermodynamic and mechanical aspects of interfacial phenomena and phase transitions; nucleation, phase-change, species transport, particulate flows, liquid-vapor systems, solidification, porous media. Prerequisites: ME:5145 and ME:5160.

ME:7268 Turbulent Flows 3 s.h.

Origin; need for modeling, averages, Reynolds equations, statistical description; experimental methods and analysis; turbulence modeling; free shear layers and boundary layers; complex shearflows; development of computational strategies; recent literature on theory and applications, chaos phenomena. Prerequisites: ME:5160.

ME:7269 Computational Fluid Dynamics and Heat Transfer 3 s.h.

Development of numerical and algebraic approximations for elliptic, parabolic, hyperbolic partial differential equations; finite-volume, spectral, pseudo-spectral, Galerkin techniques; stability of numerical methods; CFL condition; stiff problems; adaptive grid generation and boundary-fitted coordinates; numerical solutions for one- and two-dimensional compressible and incompressible fluid flow and heat transfer problems. Prerequisites: ME:4111 and ME:5160.

ME:7299 Research: Mechanical Engineering Ph.D. Dissertation arr.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for Ph.D. in mechanical engineering.

Mechanical Engineering, B.S.E.

Educational Objectives

Within a few years of graduation, graduates of the mechanical engineering program will:

- have successful careers in engineering and beyond and will have assumed professional roles of increasing responsibility and impact;
- have acquired new knowledge and expertise through professional development opportunities or advanced education; and
- be engaged in workplace, professional, or civic communities.

Graduates of the Department in Mechanical Engineering B.S.E. program will be prepared to effectively contribute as engineers in a diverse and multidisciplinary work environment. They will have an ability to:

- identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics;
- apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare as well as global, cultural, social, environmental, and economic factors;
- communicate effectively with a range of audiences;
- recognize ethical and professional responsibilities in engineering situations and make informed judgments which consider the impact of engineering solutions in global, economic, environmental, and societal contexts;
- function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives;
- develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions; and
- acquire and apply new knowledge as needed, using appropriate learning strategies.

Requirements

The Bachelor of Science in Engineering requires a minimum of 128 s.h. Students must have a g.p.a. of at least 2.00 on all college work used to satisfy degree requirements as well as on all work undertaken at the University of Iowa.

The major in mechanical engineering lays a foundation in the basic disciplines of mathematics, physics, and chemistry and in the engineering sciences of statics, dynamics, thermodynamics, mechanics of deformable bodies, mechanics of fluids and transfer processes, materials science, and electrical sciences. An understanding of these sciences enables mechanical engineers to design parts of systems and understand whole systems, plan the production and use of energy, plan and operate industrial manufacturing facilities, and design automatic control systems for machines and other mechanical systems.

Mechanical engineering students develop an awareness of social and humanistic issues relating to business, environment, government, history, language, religion, and

international relations. They also acquire an appreciation of professional and ethical responsibilities.

All engineering students complete the B.S.E. core requirements, which include RHET:1030 Rhetoric, ENGR:1100 Introduction to Engineering Problem Solving, ENGR:1300 Introduction to Engineering Computing, and courses in chemistry, engineering mathematics and fundamentals, and physics.

They also complete the curriculum designed for their major program, which covers four major stems: mathematics and basic sciences, engineering topics, an elective focus area, and the general education component. For information about the curriculum stems, see the Bachelor of Science in Engineering [p. 1428] in the Catalog.

Upper-level students work on team projects in a senior capstone design course, ME:4086 Mechanical Engineering Design Project. Some students may arrange to participate in established research projects.

Students must select elective focus area courses according to guidelines established by the Department of Mechanical Engineering. See "Elective Focus Area" below.

Elective Focus Area

The mechanical engineering program offers a variety of elective focus area (EFA) options, including standard focus areas developed and maintained by the program and flexible focus areas tailored to individual student interests. For more detailed information about elective focus areas, see the Bachelor of Science in Engineering [p. 1428] in the Catalog.

Mechanical engineering students can select an EFA from the following.

- Energy and Environment
- Manufacturing
- Mechanical Engineering Design
- Robotics and Autonomous Systems
- Tailored

For a list of standard mechanical engineering elective focus area options and guidelines for tailored elective focus areas, see the undergraduate Mechanical Engineering Program page on the Department of Mechanical Engineering website.

Combined Programs

B.S.E./M.S.

A Bachelor of Science/Master of Science combined degree program is available for qualified University of Iowa undergraduate students. This allows students to complete a M.S. degree in two or three semesters after completion of their B.S. degree. Those in the combined degree program receive a B.S. degree when all requirements have been completed, and then become M.S. students in the Department of Mechanical Engineering (ME).

The Undergrad to Grad (U2G) combined degree program is primarily intended for students interested in pursuing the M.S. nonthesis degree option. However, the M.S. degree thesis option can be pursued in instances where students have been conducting research under the supervision of a ME faculty member since, at least, the summer following their junior year, and a ME faculty member is willing to advise them and serve as committee chair for their final exam.

Interested students should discuss the combined degree program with their advisor during their third year. Applications should be submitted during the second semester of their third year and before the start of their fourth year (two-semester blended model); see the U2G Program on the Department of Mechanical Engineering website. However, single-semester admits are allowed and must adhere to the application deadlines and other program requirements.

Accepted students are expected to have a minimum University of Iowa cumulative g.p.a. of at least of 3.25, and maintain this grade-point average throughout their time in the program. Undergraduate students whose UI cumulative grade-point average falls below this minimum are removed from the combined program.

Students may contact any ME faculty member to inquire about participation in the U2G combined degree program, research opportunities, and financial support.

Program Benefits

Students may apply up to 12 s.h. of graduate-level coursework toward both their B.S. and M.S. degrees. However, credit may not be applied to courses taken prior to admission to the combined degree program. Mechanical engineering courses eligible for graduate credit are numbered ME:4100 or above, except for ME:4186 Enhanced Design Experience. The courses selected must fulfill M.S. coursework requirements and be applicable to B.S. electives.

Students who select the thesis option can begin work on their M.S. thesis research with a faculty advisor during their fourth year of undergraduate studies.

Graduate Record Examination (GRE) General Test scores are not required for admission to the combined degree program. Students are assessed undergraduate tuition and fees until their B.S. degree has been conferred; then, students are assessed graduate tuition and fees, and they may be eligible for graduate assistantships.

Financial Support

Departmental funding preference is given to Ph.D. students. Students can discuss financial support possibilities with their advisor.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

- a Enrollment in math courses requires completion of a placement exam.
- b Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
- c Enrollment in chemistry courses requires completion of a placement exam.
- d Typically this course is offered in fall and spring semesters. Check MyUI for course availability since offerings are subject to change.
- e Courses with prerequisites; students should complete a prerequisite waiver form.
- f Typically this course is offered in fall, spring, and summer semesters. Check MyUI for course availability since offerings are subject to change.
- g Students may select a course from all GE CLAS Core categories except Rhetoric, Quantitative or Formal Reasoning, and Natural Sciences.
- h A full list of approved course subjects can be found on the College of Engineering General Education Component website.
- i Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>

Career Advancement

The engineering profession is a foundation for a variety of careers in industry, medicine, law, government, and consulting. Engineering majors hold eight of the top ten spots on the list of top-paid majors for bachelor's degree graduates, according to the National Association of Colleges and Employers (NACE). On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter

Mechanical Engineering, M.S.

Research

The mechanical engineering graduate program in the College of Engineering emphasizes in-depth learning and research. In collaboration with faculty across campus, the faculty are currently researching a diverse range of topics within the field. For more information, see the Department of Mechanical Engineering website.

Design and Uncertainty Quantification

The Design and Uncertainty Quantification focus area is concerned with design optimization of complex mechanical systems in the presence of uncertainty. The focus area emphasizes developments of sound theoretical foundation, novel computational methods and algorithms, and modern software tools aimed at creating state-of-the-art engineering design of automotive, aerospace, naval, nuclear, and biomedical systems. Current areas of excellence include artificial muscles and smart materials design, ship hydrodynamics, design sensitivity analysis, uncertainty quantification, and reliability-based design optimization.

Fluid Dynamics

The Fluid Dynamics focus area covers a wide variety of topics with flow of liquids and gases as the common denominator. The graduate program in fluid dynamics emphasizes fundamental principles and applications, and the numerical and experimental techniques used to obtain and analyze fluid flows. Areas of concentration include computational fluid dynamics, experimental fluid dynamics, medical flows, naval hydrodynamics, biologically-inspired air and underwater vehicles, multiphase flows, cavitation and ventilation, and fluid-structure interaction and turbulence, among others.

Heat Transfer and Combustion

The Heat Transfer and Combustion focus area applies to real-world systems in manufacturing and materials processing, propulsion, energy production, and other areas. The graduate program emphasizes fundamental principles and techniques required for experimental and theoretical research. Current areas of research include solidification of materials, metal casting, 3-D printing, laser-materials interaction, power plants and propulsion devices such as automobile and aircraft engines, energy conservation and production, energy storage, complex reactive materials, and machine learning in computational modeling and simulation.

Manufacturing and Materials

The Manufacturing and Materials focus area involves fundamental materials processing science, technological advancement in manufacturing applications, and development of new manufacturing processes and new material functions. Current and emerging thrust areas include solidification, metal casting, laser materials processing, micro- and nanofabrication, joining, ultrasonic welding, machining, microstructure evolution, manufacturing process modeling and simulation, artificial muscles, artificial camouflage, smart materials, and material characterizations. These research activities are well supported by federal and state agencies and the manufacturing industry.

Robotics, Controls, and Autonomous Systems

Robotics, Controls and Autonomous Systems (RCAS) are concerned with the modeling, analysis, design, and control of dynamic systems. The graduate program in RCAS emphasizes fundamental principles and techniques of robotics, control theory, and artificial intelligence. Areas of concentration include computational intelligence, dynamic autonomous systems, cyber-physical systems, and networked robotic systems with potential applications in self-driving cars; medical and assistive robots for surgery and rehabilitation; industrial co-robots for human-robot collaboration; and uncrewed aerial, ground, and underwater vehicles.

Solid Mechanics and Multibody Dynamics

Solid Mechanics and Multibody Dynamics are concerned with the behavior of solid materials and flexible bodies, especially their deformation, motion, and stress responses under the action of applied loads. The graduate program in solid mechanics and multibody dynamics emphasizes the theoretical foundations and problem-solving techniques for engineering applications. Current research focuses of the faculty include multiscale mechanics of materials, biomechanics, vehicle dynamics, computational mechanics, multibody dynamics, and optimization.

Requirements

The Master of Science program in mechanical engineering requires a minimum of 30 s.h. of coursework and research, including a minimum of 12 s.h. in mechanical engineering courses (prefix ME) numbered 5000 or above. Students must maintain a g.p.a. of at least 3.00 in graduate work used to satisfy their requirements to earn the degree. The course plan should be approved by their advisor prior to registration each semester. All students choose either a thesis or nonthesis program.

The requirements for the M.S. may be completed within one calendar year. However, students with assistantship duties or other constraints may take up to two calendar years to complete their degree. Students must complete ENGR:7270 Engineering Ethics during their first fall semester in the program. They must register for ME:6191 Graduate Seminar: Mechanical Engineering each fall and spring semester until successful completion of their final examination or thesis defense; credit in these courses does not substitute for regular coursework or research credit hours. For students who select the thesis option, normally 6 s.h., and no more than 9 s.h. of credit for thesis research is counted toward degree requirements in ME:6199 Research: Mechanical Engineering M.S. Thesis.

Thesis students must be successful in their final examination. The exam is administered by a student's committee, which consists of at least three faculty members, including at least one with a primary appointment in the Department of Mechanical Engineering. The nonthesis option does not include a final exam.

Admission

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate

College policies, see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Applicants who have earned a baccalaureate or master's degree in engineering curriculum or in the mathematical or physical sciences are eligible to be considered for admission to graduate study in mechanical engineering. To be considered for regular admission, applicants must have a g.p.a. of at least 3.00 on a 4.00 scale in all previous college-level work.

Minimum Requirements for Admission

Graduate Record Examination (GRE) General Test Requirements

Quantitative Reasoning: 80th percentile or above (score=159)
Verbal Reasoning: 60th percentile or above (score=152)
Analytical Writing: 50th percentile or above (score=4.0)

International Student Requirements

Requirements include a minimum TOEFL score of 550 or higher on the paper-based test (PBT) or a score of 81 or higher on the internet-based test (iBT). Newly admitted graduate students who present TOEFL scores below 600 on the PBT or below 100 on the iBT are required to complete an English Proficiency Evaluation on campus before their first registration for classes.

Alternatively, a International English Language Testing System (IELTS) score of 7 is required. IELTS test takers, regardless of score, are required to take an on-campus English Proficiency Evaluation.

There is no conditional admission for graduate students whose TOEFL scores are below 550 on the PBT, below 81 on the iBT, or below 6.5 on the IELTS.

Applicants with lower grade-point averages and/or GRE or TOEFL test scores may be considered for conditional admission under exceptional circumstances. Those admitted conditionally must achieve regular standing within one semester (excluding summer sessions) after admission by attaining a g.p.a. of at least 3.00 on their first 9 s.h. at the University of Iowa. The Graduate College cancels registration for the subsequent semester for students who have not submitted their GRE and/or TOEFL scores by the end of the first semester after admission.

Some of the requirements may be waived in select cases when other components of the application are particularly outstanding. Satisfaction of the requirements does not guarantee admission.

Applying for Admission

Refer to the Graduate Admissions website for information about applying for graduate studies.

Graduate Application Deadlines

Applications for fall: January 15 (application deadline), March 1 (admission decision)

Applications for spring: September 1 (application deadline), October 1 (admission decision)

All requirements must be fulfilled by the respective deadline dates. Applicants who apply after a deadline date must be sponsored by a mechanical engineering faculty member for a deadline waiver.

Financial Support

Financial support is available to M.S. students, primarily through graduate assistantships in teaching or research from the Department of Mechanical Engineering, IHR—Hydroscience and Engineering, the National Advanced Driving Simulator, and the University of Iowa Technology Institute. These awards may be made on a semester, academic year, or calendar year basis. Awards and reappointments are competitive and are based on a student's potential contribution to the teaching and research goals of the department. Students who fulfill their assistantship responsibilities and continue to make satisfactory progress toward their degree objective receive preference in new assistantship awards. Decisions about research and teaching assistantships are made by individual faculty members. Students should direct questions about availability of financial support to faculty members in their primary area of study.

Students with assistantship appointments of one-quarter-time or more must register for a minimum of 9 s.h. during fall and spring semesters until they have completed 30 s.h. of course and research work beyond the baccalaureate degree.

Career Advancement

The engineering profession is a foundation for a variety of careers in industry, medicine, law, government, and consulting. On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

Mechanical Engineering, Ph.D.

Research

The mechanical engineering graduate program in the College of Engineering emphasizes in-depth learning and research. In collaboration with faculty across campus, the faculty are currently researching a diverse range of topics within the field. For more information, see the Department of Mechanical Engineering website.

Design and Uncertainty Quantification

The Design and Uncertainty Quantification focus area is concerned with design optimization of complex mechanical systems in the presence of uncertainty. The focus area emphasizes developments of sound theoretical foundation, novel computational methods and algorithms, and modern software tools aimed at creating state-of-the-art engineering design of automotive, aerospace, naval, nuclear, and biomedical systems. Current areas of excellence include artificial muscles and smart materials design, ship hydrodynamics, design sensitivity analysis, uncertainty quantification, and reliability-based design optimization.

Fluid Dynamics

The Fluid Dynamics focus area covers a wide variety of topics with flow of liquids and gases as the common denominator. The graduate program in fluid dynamics emphasizes fundamental principles and applications, and the numerical and experimental techniques used to obtain and analyze fluid flows. Areas of concentration include computational fluid dynamics, experimental fluid dynamics, medical flows, naval hydrodynamics, biologically-inspired air and underwater vehicles, multiphase flows, cavitation and ventilation, and fluid-structure interaction and turbulence, among others.

Heat Transfer and Combustion

The Heat Transfer and Combustion focus area applies to real-world systems in manufacturing and materials processing, propulsion, energy production, and other areas. The graduate program emphasizes fundamental principles and techniques required for experimental and theoretical research. Current areas of research include solidification of materials, metal casting, 3-D printing, laser-materials interaction, power plants and propulsion devices such as automobile and aircraft engines, energy conservation and production, energy storage, complex reactive materials, and machine learning in computational modeling and simulation.

Manufacturing and Materials

The Manufacturing and Materials focus area involves fundamental materials processing science, technological advancement in manufacturing applications, and development of new manufacturing processes and new material functions. Current and emerging thrust areas include solidification, metal casting, laser materials processing, micro- and nanofabrication, joining, ultrasonic welding, machining, microstructure evolution, manufacturing process modeling and simulation, artificial muscles, artificial camouflage, smart materials, and material characterizations. These research activities are well supported by federal and state agencies and the manufacturing industry.

Robotics, Controls, and Autonomous Systems

Robotics, Controls and Autonomous Systems (RCAS) are concerned with the modeling, analysis, design, and control of dynamic systems. The graduate program in RCAS emphasizes fundamental principles and techniques of robotics, control theory, and artificial intelligence. Areas of concentration include computational intelligence, dynamic autonomous systems, cyber-physical systems, and networked robotic systems with potential applications in self-driving cars; medical and assistive robots for surgery and rehabilitation; industrial co-robots for human-robot collaboration; and uncrewed aerial, ground, and underwater vehicles.

Solid Mechanics and Multibody Dynamics

Solid Mechanics and Multibody Dynamics are concerned with the behavior of solid materials and flexible bodies, especially their deformation, motion, and stress responses under the action of applied loads. The graduate program in solid mechanics and multibody dynamics emphasizes the theoretical foundations and problem-solving techniques for engineering applications. Current research focuses of the faculty include multiscale mechanics of materials, biomechanics, vehicle dynamics, computational mechanics, multibody dynamics, and optimization.

Requirements

The Doctor of Philosophy program in mechanical engineering requires 72 s.h. of graduate credit, including a minimum of 42 s.h. in mechanical engineering courses (prefix ME) with at least 12 s.h. selected from courses numbered ME:6000 or above. Students also must complete a minimum of 12 s.h. in thesis research in ME:7299 Research: Mechanical Engineering Ph.D. Dissertation. A maximum of 30 credits of transfer credit may be applied toward the degree and coursework requirements. Students must maintain a cumulative g.p.a. higher than 3.25 to earn the degree.

To be formally admitted to the Ph.D. program, students must pass the qualifying examination. Information regarding the details of the qualifying exam procedure can be obtained from the Department of Mechanical Engineering website.

Students must complete ENGR:7270 Engineering Ethics during their first fall semester of enrollment. They must register for ME:6191 Graduate Seminar: Mechanical Engineering each fall and spring semester until successful completion of their final examination or thesis defense; credit in these courses does not substitute for regular coursework or research credit hours. They must have their course plan approved by their advisor prior to registration each semester.

Admission

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Minimum Requirements for Admission

Graduate Record Examination (GRE) General Test Requirements

Quantitative Reasoning: 80th percentile or above (score=159)
 Verbal Reasoning: 60th percentile or above (score=152)
 Analytical Writing: 50th percentile or above (score=4.0)

International Student Requirements

Requirements include a minimum TOEFL score of 550 or higher on the paper-based test (PBT) or a score of 81 or higher on the internet-based test (iBT). Newly admitted graduate students who present TOEFL scores below 600 on the PBT or below 100 on the iBT are required to complete an English Proficiency Evaluation on campus before their first registration for classes.

Alternatively, a International English Language Testing System (IELTS) score of 7 is required. IELTS test takers, regardless of score, are required to take an on-campus English Proficiency Evaluation.

There is no conditional admission for graduate students whose TOEFL scores are below 550 on the PBT, below 81 on the iBT, or below 6.5 on the IELTS.

Applicants with lower grade-point averages and/or GRE or TOEFL test scores may be considered for conditional admission under exceptional circumstances. Those admitted conditionally must achieve regular standing within one semester (excluding summer sessions) after admission by attaining a g.p.a. of at least 3.00 on their first 9 s.h. at the University of Iowa. The Graduate College cancels registration for the subsequent semester for students who have not submitted their GRE and/or TOEFL scores by the end of the first semester after admission.

Some of the requirements may be waived in select cases when other components of the application are particularly outstanding. Satisfaction of the requirements does not guarantee admission.

Other Requirements

Students must have earned a minimum g.p.a. of at least 3.00 on a 4.00 scale, submit three letters of recommendation, unofficial transcripts (with official transcripts submitted if accepted), and a statement of purpose.

Applying for Admission

Refer to the Graduate Admissions website for information about applying for graduate studies.

Graduate Application Deadlines

Applications for fall: January 15 (application deadline), March 1 (admission decision)

Applications for spring: September 1 (application deadline), October 1 (admission decision)

All requirements must be fulfilled by the respective deadline dates. Applicants who apply after a deadline date must be sponsored by a mechanical engineering faculty member for a deadline waiver.

Financial Support

Financial support is available to Ph.D. students, primarily through graduate assistantships in teaching or research from the Department of Mechanical Engineering, IHR—Hydroscience and Engineering, the National Advanced Driving Simulator, and the University of Iowa Technology Institute. These awards may be made on a semester, academic year, or calendar year basis. Awards and reappointments are competitive and are based on a student's potential contribution to the teaching and research goals of the department. Students who fulfill their assistantship responsibilities and continue to make satisfactory progress toward their degree objective receive preference in new assistantship awards.

Students with assistantship appointments of one-quarter-time or more must register for a minimum of 9 s.h. during fall and spring semesters until they have completed 72 s.h. of course and research work beyond the baccalaureate degree. Once they meet these minimums, students must register for a graduate seminar each semester until they have successfully completed their final examination or thesis defense. All registrations should accurately reflect the amount and type of work undertaken, the use of University facilities, and the amount of consultation with the faculty.

Career Advancement

The engineering profession is a foundation for a variety of careers in industry, medicine, law, government, and consulting.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

Naval Science and Technology

Chair, Department of Mechanical Engineering

- Ching-Long Lin

Coordinators

- James H.J. Buchholz (Mechanical Engineering), Pablo Carrica (Mechanical Engineering)

Undergraduate certificate: naval science and technology
Website: <https://me.engineering.uiowa.edu/undergraduate/certificate-naval-st>

Naval science and technology has a tremendous impact upon defense, world commerce, and energy production. The U.S. Navy is expanding its fleet to the largest size in nearly 20 years. Approximately 90 percent of world trade is carried by sea. The number of offshore solar, wind, and wave energy installations continues to increase.

The underlying science and technology challenges demand a workforce with a strong foundation in the engineering sciences related to fluid flow, computational and experimental methods, autonomous systems, and control. The Certificate in Naval Science and Technology introduces students to the principles of naval hydrodynamics, including propulsion, resistance, maneuvering, and seakeeping, as well as the fundamentals of autonomous systems, including control systems, robotics, and artificial intelligence.

Students who complete the certificate will work in a unique learning community where they will have an opportunity to contribute to projects of interest to the Navy and its supporting industry, and learn about potential career paths.

The Certificate in Naval Science and Technology is administered by the Department of Mechanical Engineering [p. 1516].

Learning Objectives

The Certificate in Naval Science and Technology is built on eight learning objectives. The first six learning objectives are focused on providing students with strong technical and leadership skills and an understanding of marine systems enabling them to work effectively in naval science and technology and other technology-intensive fields. Specifically, students will achieve the following:

- Demonstrate a foundation in the fundamentals of fluid mechanics and naval hydrodynamics.
- Use advanced numerical methods and/or measurement techniques to solve fluid-flow problems and design systems involving naval hydrodynamics.
- Demonstrate a foundation in the fundamentals of control theory and artificial intelligence, including optimal control, tracking, planning, machine learning, and reinforcement learning.
- Use simulators and experiments to evaluate, simulate, and design autonomous naval systems.
- Develop potential for continued growth and leadership in a complex and multidisciplinary technical environment.
- Demonstrate organization and communication skills needed to manage open-ended projects.

The final two learning objectives focus on understanding the challenges faced by the Navy and helping students to identify related career paths:

- Recognize and address current science and technology challenges faced by the Navy.
- Be able to make decisions about career paths in the Navy, its contractors, and supporting industry.

Programs

Undergraduate Program of Study Certificate

- Certificate in Naval Science and Technology [p. 1531]

Naval Science and Technology, Certificate

Requirements

The undergraduate Certificate in Naval Science and Technology requires 18 s.h. of credit. Students must maintain a g.p.a. of at least 2.00 in work for the certificate. The certificate may be earned by any student admitted to the University of Iowa who is not concurrently enrolled in a UI graduate or professional degree program.

All of the certificate courses have prerequisites; students must complete all of a course's prerequisites before they may register for the course. Prerequisites do not count toward the 18 s.h. required for the certificate. Prerequisites for certificate courses are listed on the Certificate in Naval Science and Technology web page.

Mechanical engineering students may use the certificate as a tailored engineering focus area by adding an additional eligible course. In addition, mechanical engineering students may earn the Certificate in Naval Science and Technology while they complete the design elective focus area for their major. College of Engineering students earning the certificate are advised by the Department of Mechanical Engineering.

The Certificate in Naval Science and Technology requires the following coursework.

Naval Hydrodynamics Courses

In certain circumstances, if it is not possible for students to complete two of these courses, they may request permission to take ME:5143 Computational Fluid and Thermal Engineering instead of ME:4175 Computational Naval Hydrodynamics.

Code	Title	Hours
At least two of these:		
ME:4125	Biomimetic Fluid Dynamics	3
ME:4175	Computational Naval Hydrodynamics	3
ME:4176	Experimental Naval Hydrodynamics	3

Autonomous Systems and Machine Learning Courses

Code	Title	Hours
At least two of these:		
ME:4111/CEE:4511	Scientific Computing and Machine Learning	3
ME:5114	Nonlinear Control in Robotic Systems	3
ME:5115	Cooperative Autonomous Systems	3

Capstone Course

Students must complete either a capstone design project on an approved naval science and technology topic or an independent investigation involving research or testing of a system related to naval hydrodynamics. If a student

chooses, both courses may be completed for credit toward the certificate.

Code	Title	Hours
One or both of these:		
ME:4098	Individual Investigations: Mechanical Engineering (students must register for at least 3 s.h.)	arr.
ME:4186	Enhanced Design Experience (subject to approval of application for capstone design path; ME:4086 is a prerequisite course)	3

Electives

Students select the remainder of the 18 s.h. required for the certificate from the following.

Code	Title	Hours
ME:4116	Manufacturing Processes Simulations and Automation	3
ME:4120	Advanced Linear Control Systems	3
ME:4140	Modern Robotics and Automation	3
ME:4150	Artificial Intelligence in Engineering	3
ME:4200	Modern Engineering Materials for Mechanical Design	3
ME:5143	Computational Fluid and Thermal Engineering	3
ME:5160	Intermediate Mechanics of Fluids	3

Sustainable Water Development

Chair, Department of Civil and Environmental Engineering

- A. Allen Bradley Jr.

Graduate certificate: sustainable water development

Website: <https://cee.engineering.uiowa.edu/graduate-program/sustainable-water-development-graduate-certificate>

The Certificate in Sustainable Water Development trains science, technology, engineering, and mathematics (STEM) graduate students to address future challenges of water scarcity and variability while also meeting the food and energy demands of Earth's growing population. The certificate leverages a unique learning environment focused on water sustainability that extends beyond any one discipline, department, or college.

The Certificate in Sustainable Water Development is administered by the Department of Civil and Environmental Engineering [p. 1462].

Programs

Graduate Program of Study Certificate

- Certificate in Sustainable Water Development [p. 1533]

Sustainable Water Development, Graduate Certificate

Requirements

The graduate Certificate in Sustainable Water Development requires 15 s.h. of credit, including at least 9 s.h. earned at the University of Iowa. The 5000-level courses required for the certificate must be taken at the University of Iowa. Students must maintain a g.p.a. of at least 2.50 in work for the certificate. The certificate is open to graduate students currently enrolled at the University of Iowa who are completing a degree program.

The Certificate in Sustainable Water Development requires the following coursework.

Code	Title	Hours
CEE:5096	Water, Energy, and Food Nexus Seminar (taken for two semesters)	0
CEE:5350	Watershed Hydrology and Ecosystem Processes	3
CEE:5410	Politics and Economics of the Food, Energy, Water Nexus	3
CEE:5993	Community-Centered Problem Solving and Design	3
Two courses numbered 3000 or above from approved list of path electives; consult primary thesis advisor and certificate program coordinator		6

Students can view path elective courses on the Civil and Environmental Engineering website. For more information, contact the Sustainable Water Development Program coordinator.

Admission

Students must:

- be in a relevant science, technology, engineering, or mathematics (STEM) field;
- submit their University of Iowa transcript;
- have a graduate g.p.a. higher than 3.00 if in doctoral program or a g.p.a. higher than 2.75 if in master's program;
- submit their résumé or curriculum vitae;
- provide a statement of purpose of 500 words or less about their core research and training program, and why the certificate program will benefit their training and goals for career placement; and
- provide a letter of endorsement from their advisor.

Admission to the certificate program is competitive. Applications are accepted on a rolling basis and are reviewed by the Sustainable Water Development Program; applications can be submitted online along with pertinent materials. Students will receive an email after an admission decision has been made.

Technological Entrepreneurship

Undergraduate certificate: technological entrepreneurship

Website: <https://www.engineering.uiowa.edu/current-students/undergraduate-students/academic-advising/majors-minors-and-certificates-0>

The College of Engineering partners with the John Pappajohn Entrepreneurial Center in the Tippie College of Business to offer the Certificate in Technological Entrepreneurship.

The program is intended for students who would like to develop an understanding of how to manage innovation in business environments as well as those who plan to start and operate their own businesses.

Students who complete the certificate program are able to:

- gain exposure to understanding sound business thinking;
- employ a more innovative and creative mindset in problem solving;
- learn how to create a business plan as skillfully as solving difficult engineering equations;
- understand the entrepreneurial approach to acquiring and managing resources;
- acquire team-building skills critical in both small and large companies;
- get insights in how to bridge engineering and business problems; and
- obtain valuable contacts and network opportunities with successful, thriving businesses and industries.

The Certificate in Technological Entrepreneurship is administered by the College of Engineering [p. 1420].

Programs

Undergraduate Program of Study Certificate

- Certificate in Technological Entrepreneurship [p. 1535]

Technological Entrepreneurship, Certificate

Requirements

The undergraduate Certificate in Technological Entrepreneurship requires a minimum of 18 s.h. of credit. Students must complete at least 12 s.h. of the 18 s.h. required for the certificate at the University of Iowa or in approved study abroad courses.

The certificate program is open to Bachelor of Science in Engineering students who have earned at least 45 s.h. of credit toward the B.S.E. and have a University of Iowa g.p.a. of at least 2.75. They must maintain a g.p.a. of at least 2.00 in work toward the certificate. Students must be granted the B.S.E. and complete all certificate requirements in order to receive the certificate.

Students must declare their intention to pursue the certificate on MyUI and must apply for admission; visit the Technological Entrepreneurship Certificate web page for more information.

Certificate students study how the entrepreneurial process relates to technology-based businesses. The program is intended for students who would like to develop an understanding of how to manage innovation in business environments as well as those who plan to start and operate their own businesses.

The Certificate in Technological Entrepreneurship requires the following coursework.

Foundation Course

Code	Title	Hours
This course:		
ISE:2500	Engineering Economy	3

Entrepreneurship Core

Code	Title	Hours
Both of these:		
ENTR:2000	Entrepreneurship and Innovation	3
ENTR:3100	Entrepreneurial Finance	3

Entrepreneurship Course in the Major

Code	Title	Hours
One of these, depending on a student's engineering major:		
BME:4910	Biomedical Engineering Senior Design I (biomedical engineering majors)	4
CBE:4109	Chemical Engineering Process Design I (chemical engineering majors)	2
CEE:4850	Project Design and Management in Civil Engineering (civil engineering majors)	3

ECE:4890	Senior Electrical and Computer Engineering Design (electrical engineering majors)	3
ISE:4600	Industrial Engineering Design Project (industrial engineering majors)	4
ME:4086	Mechanical Engineering Design Project (mechanical engineering majors)	3

Entrepreneurship Electives

Students customize their programs with their choice of electives. They must earn sufficient elective credit to complete the 18 s.h. required for the certificate.

Code	Title	Hours
BME:4920	Biomedical Engineering Senior Design II	4
ENTR:3200	Entrepreneurial Marketing	3
ENTR:3400	Strategic Management of Technology and Innovation	3
ENTR:3500	Social Entrepreneurship	3
ENTR:3595	Nonprofit Organizational Effectiveness I	3
ENTR:3600	E-Commerce Strategies for Entrepreneurs	3
ENTR:4000	Topics in Entrepreneurship	3
ENTR:4200	Entrepreneurship: Business Consulting	3

Graduate College

Dean

- John C. Keller

Associate Deans

- Michelle L. Campo, Steven M. Varga

Assistant Deans

- Heidi Arbisi-Kelm, Jennifer Teitle

Website: <https://www.grad.uiowa.edu>

The University of Iowa has been a leading center of advanced study for more than a century. Presently, the Graduate College accounts for nearly one-fifth of the University's total enrollment. This high ratio reflects the breadth of the University's graduate programs and resources, the strength of a graduate faculty with a long tradition of personal and professional concern for students, and the opportunities afforded graduate students for involvement, recognition, and support.

The Graduate College is responsible for the review and approval of proposals for new graduate programs and for the periodic survey and evaluation of existing programs. Through its administration of scholarship, fellowship, and research assistantship funds, the college encourages research and strengthening of departments. Additionally, the college works with the other colleges and departments of the University to formulate policies concerning selection, supervision, and support of graduate students.

The faculty of the Graduate College is made up of all University tenure-track faculty members at the ranks of assistant professor, associate professor, and professor. A 17-member Graduate Council, elected from and by the graduate faculty and the Graduate Student Senate, is the executive committee of the graduate faculty and is advisory to the dean of the Graduate College.

Manual of Rules and Regulations of the Graduate College

The current edition of the Manual of Rules and Regulations of the Graduate College is available on the college's website.

Office of Graduate Diversity, Equity, and Inclusion

The Office of Graduate Diversity, Equity, and Inclusion is dedicated to providing academic assistance to graduate students from underrepresented populations across graduate programs; to helping build a sustainable practice of inclusion that nourishes and attracts underrepresented graduate students campuswide; and to helping build community through individual and group activities focused on successful academic progress.

Graduate Student Success

The Graduate College takes a holistic approach to graduate student and postdoctoral scholar preparation. Whether a student's goal is a career in academe, industry, government or elsewhere, professional development can expand one's options and make a student more marketable to employers.

The Graduate Student Success Office can help graduate students in the realms of:

- communication
- research and publication
- diversity
- funding
- teaching
- leadership
- careers
- wellness

Research Resources

Many of the University's diverse research activities are centrally administered by the Office of the Vice President for Research, which has a cooperative relationship with the Graduate College.

Graduate Student Senate

The Graduate Student Senate is the University graduate student body representative organization. Representatives are elected annually from each University department that has a graduate degree program. The senate's primary purpose is to serve the interests of the graduate student body in matters affecting its welfare. The senate advises the dean of the Graduate College on matters pertaining to the college.

Programs

Degrees Offered

The Graduate College confers the Master of Arts (M.A.), Master of Science (M.S.), Master of Accountancy (M.Ac.), Master of Arts in Teaching (M.A.T.), Master of Computer Science (M.C.S.), Master of Fine Arts (M.F.A.), Master of Health Administration (M.H.A.), Master of Public Affairs (M.P.Aff.), Master of Public Health (M.P.H.), Specialist in Education (Ed.S.), Master of Science in Nursing (M.S.N.), Master of Social Work (M.S.W.), Doctor of Philosophy (Ph.D.), Doctor of Education (Ed.D.), Doctor of Musical Arts (D.M.A.), Doctor of Nursing Practice (D.N.P.), Doctor of Physical Therapy (D.P.T.), and Doctor of Audiology (Au.D.) degrees.

The college currently confers degrees in the following major fields.

Accounting: M.Ac.²

Actuarial Science: M.S.²

African American World Studies: M.A.¹

American Studies: M.A.¹, Ph.D.

Anatomy and Cell Biology: M.S.³, Ph.D.³ (see Biomedical Science)

Anthropology: M.A.¹, Ph.D.

Applied Mathematical and Computational Sciences: Ph.D.

Art: M.A.¹, M.F.A.

Art History: M.A.¹, Ph.D.¹

Asian Civilizations: M.A.¹

Astronomy: M.S.¹

Athletic Training: M.S.¹

Biochemistry: M.S., Ph.D.

Biology: M.S.³, Ph.D.³ (see Integrated Biology)

Biomedical Engineering: M.S.¹, Ph.D.

Biomedical Science: M.S.¹, Ph.D.

Biostatistics: M.S.¹, Ph.D.

Book Arts: M.F.A.

Business Administration: M.A.¹, Ph.D.

Business Analytics: M.S.
 Chemical and Biochemical Engineering: M.S.¹, Ph.D.
 Chemistry: M.S.¹, Ph.D.
 Civil and Environmental Engineering: M.S.¹, Ph.D.
 Classics: M.A.¹, Ph.D.
 Clinical Investigation: M.S.¹
 Communication Studies: M.A.¹, Ph.D.
 Community and Behavioral Health: M.S.³, Ph.D.
 Comparative Literature—Translation: M.F.A.
 Computer Science: M.S.¹, M.C.S.², Ph.D.
 Dance: M.F.A.
 Dental Public Health: M.S.
 Economics: M.A.¹, Ph.D.
 Education: M.A.¹, M.A.T.², Ed.S.², Ph.D.
 Educational Policy and Leadership Studies: M.A.¹, Ed.D.², Ed.S.², Ph.D.
 Electrical and Computer Engineering: M.S.¹, Ph.D.
 Elementary Education: M.A., Ph.D.
 Engineering and Information Science, M.S.²
 English: M.A.¹, M.F.A., Ph.D.
 Epidemiology: M.S.¹, Ph.D.
 Exercise Science: M.S.³, Ph.D.³
 Film and Video Production: M.A.¹, M.F.A.
 Film Studies: M.A.¹, Ph.D.
 Finance: M.S.¹
 Free Radical and Radiation Biology: M.S.³, Ph.D.³ (see Biomedical Science)
 French and Francophone World Studies: M.A.¹, Ph.D.
 Genetics: Ph.D.
 Geography: M.A.¹, Ph.D.
 Geoscience: M.S.¹, Ph.D.
 German: M.A.¹, Ph.D.³
 Greek: M.A.¹
 Health and Human Physiology: M.S.¹, Ph.D.
 Health and Sport Studies: M.A.³, Ph.D.³
 Health Management and Policy: M.H.A.², Ph.D.³
 Health Policy, M.S.
 Health Services and Policy: Ph.D.
 History: M.A.¹, Ph.D.
 Human Toxicology: M.S., Ph.D.
 Immunology: Ph.D.
 Industrial Engineering: M.S.¹, Ph.D.
 Informatics: M.S.¹, Ph.D.
 Integrated Biology: M.S.¹, Ph.D.
 Integrative Physiology: Ph.D.³ (see Health and Human Physiology)
 Interdisciplinary Studies: M.A.¹, M.F.A., M.S.¹, Ph.D.
 International Studies: M.A.³
 Journalism: M.A.¹
 Latin: M.A.¹
 Library and Information Science: M.A.¹
 Linguistics: M.A.¹, Ph.D.
 Mass Communications: Ph.D.
 Mathematics: M.S.¹, Ph.D.
 Mechanical Engineering: M.S.¹, Ph.D.
 Microbiology: M.S., Ph.D.
 Molecular and Cellular Biology: Ph.D.³ (see Biomedical Science)
 Molecular Biology: Ph.D.³ (see Biomedical Science)
 Molecular Physiology and Biophysics: M.S.³, Ph.D.³ (see Biomedical Science)
 Music: M.A.¹, M.F.A., D.M.A., Ph.D.
 Neuroscience: Ph.D.
 Nursing: M.S.N.¹, D.N.P., Ph.D.
 Occupational and Environmental Health: M.S.¹, Ph.D.
 Operative Dentistry: M.S.³
 Oral Science: M.S., Ph.D.

Orthodontics: M.S.
 Pathology: M.S.
 Pharmacology: M.S.³, Ph.D.³ (see Biomedical Science)
 Pharmacy: M.S.¹, Ph.D.
 Philosophy: M.A.¹, Ph.D.
 Physical Rehabilitation Science: M.A.¹, Ph.D.
 Physical Therapy: D.P.T.
 Physics: M.S.¹, Ph.D.
 Political Science: M.A.¹, Ph.D.
 Psychological and Quantitative Foundations: M.A.¹, Ed.S.², Ph.D.
 Psychology: M.A.¹, Ph.D.
 Public Affairs: M.P.Aff.²
 Public Health: M.P.H.²
 Rehabilitation and Counselor Education: M.A.¹, Ph.D.
 Religious Studies: M.A.¹, Ph.D.
 Science Education: M.S.¹, M.A.T.², Ph.D.
 Second Language Acquisition: Ph.D.
 Secondary Education: M.A., M.A.T., Ph.D.
 Social Work: M.S.W.¹, Ph.D.
 Sociology: M.A.¹, Ph.D.
 Spanish: M.A.¹, Ph.D.
 Spanish Creative Writing: M.F.A.
 Special Education: M.A.¹, Ph.D.
 Speech and Hearing Science: Ph.D.
 Speech Pathology and Audiology: M.A.¹, Au.D.
 Statistical Genetics: Ph.D.³
 Statistics: M.S.¹, Ph.D.
 Stomatology: M.S.³
 Strategic Communication: M.A.²
 Teaching and Learning: M.A.¹, M.A.T.², Ph.D.
 Theatre Arts: M.F.A.
 Translational Biomedicine: M.S.², Ph.D.³
 Urban and Regional Planning: M.S.¹
 Women's Studies: Ph.D.³

¹ Degree offered with or without thesis

² Nonthesis degree

³ Student entry suspended

Interdisciplinary Degree Programs

The Graduate College participates in a number of University of Iowa interdisciplinary degree programs. Detailed information about the following master's and doctoral degree programs is provided later in these Graduate College sections of the Catalog: Applied Mathematical and Computational Sciences [p. 1547], Genetics [p. 1576], Human Toxicology [p. 1579], Immunology [p. 1582], Informatics [p. 1586], Molecular Medicine [p. 1609], Neuroscience [p. 1611], and Translational Biomedicine [p. 1627].

In addition to the degree programs listed above, the graduate faculty has authorized the awarding of interdisciplinary master's and doctoral degrees. Students seeking approval for interdisciplinary master's and doctoral programs must previously have been admitted to and enrolled in a departmental program in the Graduate College. See sections X.A. and XII.D. in the Manual of Rules and Regulations of the Graduate College on the college's website.

Combined Programs

Combined Programs Offered Through the Graduate College

Various combined programs have been developed whereby students work simultaneously toward two degrees. Consult the appropriate Catalog sections for more information. Established combined graduate programs include, but may not be limited to:

B.S. in Biochemistry/Ph.D. in Biochemistry

The combined B.S. in biochemistry/Ph.D. program in biochemistry enables Bachelor of Science students majoring in biochemistry to begin work toward the Ph.D. while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the B.S. and Ph.D. degree requirements. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the Carver College of Medicine; see the Department of Biochemistry [p. 1675] in the Catalog.

B.A. in Biology/M.P.H. (Epidemiology Subprogram) or M.S. in Epidemiology

The combined B.A. in biology/M.P.H. with an epidemiology subprogram and the combined B.A. in biology/M.S. in epidemiology enable Bachelor of Arts students majoring in biology to begin work toward the M.P.H. or M.S. while completing the bachelor's degree. Students admitted to either program may count 12 s.h. of credit toward both the B.A. and the M.P.H. or M.S. degree requirements; they also may maximize their selection of upper-level classes for advanced training in epidemiology. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the College of Public Health; see the B.A. in biology [p. 181]; Master of Public Health, M.P.H. [p. 1889] (epidemiology subprogram); and M.S. in epidemiology [p. 1926] in the Catalog.

B.A. in Biology, Chemistry, Environmental Sciences, Physics/M.A.T. (Science Education Subprogram)

The combined B.A./M.A.T. program with a science education subprogram enables Bachelor of Arts students majoring in biology, chemistry, environmental sciences, or physics to begin work toward the M.A.T. while completing the bachelor's degree. Students admitted to the program may count 18 s.h. of credit toward both the B.A. and M.A.T. degree requirements. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the College of Education; see Biology [p. 175], Chemistry [p. 207], Environmental Sciences [p. 453], or Physics and Astronomy [p. 879] and the Master of Arts in Teaching, M.A.T. [p. 1405] (science education subprogram) in the Catalog.

B.A. or B.S. in Computer Science/M.C.S.

The combined B.A. or B.S. in computer science/M.C.S. program enables undergraduate students majoring in computer science to begin work toward the M.C.S. while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of coursework, typically advanced technical courses and electives, toward both the bachelor's and the M.C.S. degree requirements. Offered by the Graduate

College and the College of Liberal Arts and Sciences; see Computer Science [p. 298] in the Catalog.

B.A. or B.S. in Environmental Policy and Planning/M.S. in Urban and Regional Planning

The combined B.A. or B.S. in environmental policy and planning/M.S. in urban and regional planning enables undergraduate students majoring in environmental policy and planning to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count a limited amount of credit toward both the B.A. or B.S. and M.S. degree requirements. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Environmental Policy and Planning [p. 440] and the M.S. in urban and regional planning [p. 1622] in the Catalog.

B.A. in Geography (Geographic Information Science Track) or B.S. in Geography/M.S. in Informatics (Geoinformatics Subprogram)

The combined B.A. in geography with a geographic information science track or B.S. in geography/M.S. in informatics with a geoinformatics subprogram enables undergraduate students majoring in geography to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count a limited amount of credit toward both the B.A. or B.S. and M.S. degree requirements. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Geographical and Sustainability Sciences [p. 531] and the M.S. in informatics [p. 1592] (geoinformatics subprogram) in the Catalog.

B.A. in German/M.A. in German

The combined B.A./M.A. program in German enables undergraduate students majoring in German to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the B.A. and M.A. degree requirements. They also have the opportunity for early entrance into advanced courses in German. Offered by the Graduate College and the College of Liberal Arts and Sciences; see German [p. 566] in the Catalog.

B.A. in Linguistics/M.A. in Linguistics (TESL Subprogram)

The combined B.A./M.A. program in linguistics with a TESL (Teaching English as a Second Language) subprogram enables students majoring in linguistics to begin work toward the M.A. while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of advanced coursework toward both the B.A. and M.A. degree requirements and may take selected graduate-level courses before they have been awarded the B.A. degree. They also may gain experience teaching ESL at the college level early in their graduate careers. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Linguistics [p. 756] in the Catalog.

B.A. in Mathematics/M.A.T. (Mathematics Education Subprogram)

The combined B.A./M.A.T. program with a mathematics education subprogram enables Bachelor of Arts students majoring in mathematics to begin work toward the M.A.T.

while completing the bachelor's degree. Students admitted to the program may count 18 s.h. of credit toward both the B.A. and M.A.T. degree requirements. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the College of Education; see the B.A. in mathematics [p. 789] and the Master of Arts in Teaching, M.A.T. [p. 1403] (mathematics education subprogram) in the Catalog.

B.S. in Microbiology/Ph.D. in Microbiology

The combined B.S. in microbiology/Ph.D. in microbiology enables undergraduate students majoring in microbiology to begin work toward the Ph.D. while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the B.S. and Ph.D. degree requirements. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the Carver College of Medicine; see the B.S. in microbiology [p. 1716] and the Ph.D. in microbiology [p. 1722] in the Catalog.

B.A. in Psychology/M.P.H. (Community and Behavioral Health Subprogram)

The combined B.A. in psychology/M.P.H. program with a community and behavioral health subprogram enables Bachelor of Arts students majoring in psychology to begin work toward the M.P.H. while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the B.A. and M.P.H. degree requirements. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the College of Public Health; see the B.A. in psychology [p. 936] and the Master of Public Health, M.P.H. [p. 1889] (community and behavioral health subprogram) in the Catalog.

B.S. in Statistics/M.P.H. (Biostatistics Subprogram)

The combined B.S. in statistics/M.P.H. program with a biostatistics subprogram enables Bachelor of Science students majoring in statistics to begin work toward the M.P.H. while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the B.S. and M.P.H. degree requirements. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the College of Public Health; see B.S. in statistics [p. 1074] and the Master of Public Health, M.P.H. [p. 1889] (biostatistics subprogram) in the Catalog.

B.S. in Statistics/M.S. in Statistics

The combined B.S./M.S. program in statistics enables undergraduate students majoring in statistics to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of credit toward both the B.S. and M.S. degree requirements. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Statistics and Actuarial Science [p. 1068] in the Catalog.

B.S. in Therapeutic Recreation/M.S. in Health and Human Physiology (Child Life Subprogram)

The combined B.S. in therapeutic recreation/M.S. in health and human physiology with a child life subprogram enables undergraduate students majoring in therapeutic recreation to begin work toward the M.S. while completing the bachelor's

degree. Students admitted to the program may count a limited number of credit toward both the B.S. and M.S. degree requirements. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Health and Human Physiology [p. 598] in the Catalog.

B.A. or B.S./M.S. in Business Analytics (Career Subprogram)

The combined B.A. or B.S./M.S. in business analytics with a career subprogram allows the following undergraduate students majoring in actuarial science (B.S.); applied physics (B.S.); biology (B.A. or B.S.); chemistry (B.A. or B.S.); computer science (B.A. or B.S.); criminology, law and justice (B.A. or B.S.); data science (B.S.); economics (B.A. or B.S.); English (B.A.); English and creative writing (B.A.); enterprise leadership (B.A.); ethics and public policy (B.A.); history (B.A.); informatics (B.A. or B.S.); interdepartmental studies (B.A.); journalism and mass communication (B.A.); linguistics (B.A.); mathematics (B.A. or B.S.); physics (B.A. or B.S.); political science (B.A. or B.S.); psychology (B.A. or B.S.); sociology (B.A. or B.S.); and statistics (B.S.) to begin work toward the M.S. in business analytics while completing their undergraduate degree. This provides students with the opportunity to complete both degrees in less time than it would take them to complete the degrees separately. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the Tippie College of Business; see the M.S. in business analytics (career) [p. 1148] in the Catalog.

B.A. or B.S./M.S. in Finance

The combined B.A. or B.S./M.S. in finance allows the following undergraduate students majoring in actuarial science (B.S.); applied physics (B.S.); biology (B.A. or B.S.); chemistry (B.A. or B.S.); computer science (B.A. or B.S.); criminology, law and justice (B.A. or B.S.); data science (B.S.); English (B.A.); English and creative writing (B.A.); enterprise leadership (B.A.); ethics and public policy (B.A.); history (B.A.); informatics (B.A. or B.S.); interdepartmental studies (B.A.); journalism and mass communication (B.A.); linguistics (B.A.); mathematics (B.A. or B.S.); physics (B.A. or B.S.); political science (B.A. or B.S.); psychology (B.A. or B.S.); sociology (B.A. or B.S.); and statistics (B.S.) to begin work toward the M.S. in finance while completing their undergraduate degree. This provides students with the opportunity to complete both degrees in less time than it would take them to complete the degrees separately. Offered by the Graduate College, the College of Liberal Arts and Sciences, and the Tippie College of Business; see the M.S. in finance [p. 1190] in the Catalog.

Combined Bachelor's and Public Health Graduate Degrees

The College of Public Health and various undergraduate programs have developed combined programs in which students pursue the bachelor's degree, either a B.A. or a B.S., and a public health graduate degree, M.A., M.P.H. or M.S., in five years instead of six. Offered by all undergraduate colleges, the Graduate College, and the College of Public Health; see College of Public Health [p. 1870] in the Catalog.

B.B.A./M.S. in Business Analytics (Career Subprogram)

The combined B.B.A./M.S. in business analytics with a career subprogram enables undergraduate students majoring in accounting, business administration, economics, finance, management, business analytics and information systems, and marketing to begin work on the M.S. while completing

the Bachelor of Business Administration degree. Students can complete both degrees in less time than it would take them to complete them separately; see the M.S. in business analytics (career) [p. 1148] in the Catalog.

B.B.A./M.S. in Finance

The combined B.B.A./M.S. program in finance allows undergraduate students majoring in business administration to begin work toward the M.S. while completing the Bachelor of Business Administration degree. The program provides students with the opportunity to complete both degrees in five years instead of six. Offered by the Graduate College and the Tippie College of Business; see the M.S. in finance [p. 1190] in the Catalog.

B.S.E. in Biomedical Engineering/M.S. in Biomedical Engineering

The combined B.S.E./M.S. program in biomedical engineering enables undergraduate students majoring in biomedical engineering to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count a limited amount of credit toward both the B.S.E. and M.S. degree requirements. They also may attend and participate in the departmental graduate seminar and work on a master's thesis or research project before they have been awarded the B.S.E. degree. Offered by the Graduate College and the College of Engineering; see the Roy J. Carver Department of Biomedical Engineering [p. 1433] in the Catalog.

B.S.E. in Biomedical Engineering/M.S. in Occupational and Environmental Health (Industrial Hygiene Subprogram)

The combined B.S.E. in biomedical engineering/M.S. in occupational and environmental health with an industrial hygiene subprogram enables undergraduate students majoring in biomedical engineering to begin work toward the M.S. in occupational and environmental health while completing the bachelor's degree. Students admitted to the program may count a limited amount of credit toward both the B.S.E. and M.S. degree requirements. Offered by the Graduate College, the College of Engineering, and the College of Public Health; see the B.S.E. in biomedical engineering [p. 1440] and the M.S. in occupational and environmental health [p. 1943] (industrial hygiene subprogram) in the Catalog.

B.S.E. in Chemical Engineering/M.S. in Chemical and Biochemical Engineering

The combined B.S.E. in chemical engineering/M.S. in chemical and biochemical engineering enables undergraduate students majoring in chemical engineering to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of coursework, typically advanced chemistry sequences and electives, toward both the B.S.E. and M.S. degree requirements. Offered by the Graduate College and the College of Engineering; see Chemical and Biochemical Engineering [p. 1446] in the Catalog.

B.S.E. in Chemical Engineering/M.S. in Civil and Environmental Engineering

The combined B.S.E. in chemical engineering/M.S. in civil and environmental engineering enables undergraduate students majoring in chemical engineering to begin work toward the M.S. in civil and environmental engineering while completing the bachelor's degree. Students admitted to the program may count 12 s.h. of coursework toward both the B.S.E. and M.S. degree requirements. Offered by the Graduate College and the College of Engineering; see the B.S.E. in chemical and biochemical engineering [p. 1452] and the M.S. in civil and environmental engineering [p. 1476] in the Catalog.

B.S.E. in Civil Engineering/M.S. in Civil and Environmental Engineering

The combined B.S.E. in civil engineering/M.S. in civil and environmental engineering enables undergraduate students majoring in civil engineering to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count a limited amount of credit toward both the B.S.E. and M.S. degree requirements. They also may attend and participate in the departmental graduate seminar and work on a master's thesis or research project before they have been awarded the B.S.E. degree. Offered by the Graduate College and the College of Engineering; see Civil and Environmental Engineering [p. 1462] in the Catalog.

B.S.E. in Civil Engineering/M.S. in Urban and Regional Planning

The combined B.S.E. in civil engineering/M.S. in urban and regional planning enables undergraduate students majoring in civil engineering to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count a limited amount of credit toward both the B.S.E. and M.S. degree requirements. They also may attend and participate in the departmental graduate seminar and work on a master's thesis or research project before they have been awarded the B.S.E. degree. Offered by the Graduate College and the College of Engineering; see the B.S.E. in civil and environmental engineering [p. 1471] and the M.S. in urban and regional planning [p. 1622] in the Catalog.

B.S.E. in Electrical Engineering/M.S. in Electrical and Computer Engineering

The combined B.S.E. in electrical engineering/M.S. in electrical and computer engineering enables undergraduate students majoring in electrical engineering to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count 9 s.h. toward both the B.S.E. and M.S. degree requirements. They also may count an additional 3 s.h. toward the M.S. degree requirements and engage in thesis-level research before they have been awarded the B.S.E. degree. Offered by the Graduate College and the College of Engineering; see Electrical and Computer Engineering [p. 1481] in the Catalog.

B.S.E. in Industrial Engineering/M.S. in Industrial Engineering

The combined B.S.E./M.S. program in industrial engineering enables undergraduate students majoring in industrial engineering to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count 6 s.h. toward both the B.S.E. and M.S. degree

requirements. They also may count an additional 6 s.h. toward the M.S. degree requirements, attend one of the department's graduate seminars, and work on master's thesis research before they have been awarded the B.S.E. degree. Offered by the Graduate College and the College of Engineering; see Industrial and Systems Engineering [p. 1500] in the Catalog.

B.S.E. in Mechanical Engineering/M.S. in Mechanical Engineering

The combined B.S.E./M.S. program in mechanical engineering enables undergraduates majoring in mechanical engineering to begin work toward the M.S. while completing the bachelor's degree. Students admitted to the program may count 6 s.h. toward both the B.S.E. and M.S. degree requirements. They also may count an additional 6 s.h. toward the M.S. degree requirements, attend a graduate seminar, and participate in master's thesis research before they have been awarded the B.S.E. degree. Offered by the Graduate College and the College of Engineering; see Mechanical Engineering [p. 1516] in the Catalog.

B.S.E. in Mechanical Engineering/M.S. in Civil and Environmental Engineering

The combined B.S.E. in mechanical engineering/M.S. in civil and environmental engineering enables undergraduate students majoring in mechanical engineering to begin work toward the M.S. in civil and environmental engineering while completing the bachelor's degree. Students admitted to the program may count 9 s.h. of coursework toward both the B.S.E. and M.S. degree requirements. They also may count an additional 3 s.h. toward the M.S. degree requirements before they have been awarded the B.S.E. degree. Offered by the Graduate College and the College of Engineering; see the B.S.E. in mechanical engineering [p. 1523] and the M.S. in civil and environmental engineering [p. 1476] in the Catalog.

Au.D./Ph.D. in Speech and Hearing Science

The combined Au.D./Ph.D. program in speech and hearing science is designed for students who would like to practice audiology and hold a faculty position at a university. Students admitted to the program work concurrently toward the Doctor of Audiology and the Doctor of Philosophy; they may count 30 s.h. toward the requirements of both degrees. Offered by the Graduate College and the College of Liberal Arts and Sciences; see Communication Sciences and Disorders [p. 263] in the Catalog.

J.D./Graduate Degrees

The College of Law and several Graduate College programs and schools have developed combined programs in which students pursue the Juris Doctor (J.D.) degree and a graduate degree concurrently. Offered by the Graduate College and the College of Law; see the Manual of Rules and Regulations of the Graduate College on the college's website and Juris Doctor, J.D. [p. 1650] in the Catalog.

M.A. in Library and Information Science/Certificate in Book Studies/Book Arts and Technologies

The combined M.A. in library and information science and Certificate in Book Studies/Book Arts and Technologies prepares students for careers in special collections librarianship. Students admitted to the program receive

training in the management of varied types of special collections, such as rare books, manuscripts, archives, graphics, music, and ephemera. Offered by the Graduate College; see the M.A. in library and information science [p. 1604] and the Certificate in Book Studies/Book Arts and Technologies [p. 1570] in the Catalog.

M.A. in Library and Information Science/M.F.A. in Book Arts

The combined M.A. in library and information science/M.F.A. in book arts allows graduate students with strong interests in the physical book to acquire training in the book arts, book history, and material book studies. The earned expertise in the production and legacy of the book as a physical artifact combined with expertise in library and information science can be an asset for those focused on careers in special collections libraries and archives. Students in the combined program earn both degrees by completing fewer semester hours than if each degree was completed separately. Offered by the Graduate College; see the M.A. in library and information science [p. 1604] and the M.F.A. in book arts [p. 1568] in the Catalog.

M.D./Ph.D. (Medical Scientist Training Program)

The combined Doctor of Medicine/Doctor of Philosophy program prepares students for careers in academic medicine, with emphasis on basic and clinical research. Offered by the Graduate College and the Carver College of Medicine; see Medical Scientist Training [p. 1711] Program in the Catalog.

Certificates

The Graduate College also participates with other University of Iowa colleges in offering the following graduate certificates.

Adult Gerontology Acute Care Nurse Practitioner

The Certificate in Adult Gerontology Acute Care Nurse Practitioner is a program for post-master's Advanced Practice Registered Nurse degree students who would like to pursue a second specialty. See the Certificate in Adult Gerontology Acute Care Nurse Practitioner [p. 1841] in the Catalog.

Adult Gerontology Primary Care Nurse Practitioner

The Certificate in Adult Gerontology Primary Care Nurse Practitioner is a program for post-master's Advanced Practice Registered Nurse degree students who would like to pursue a second specialty. See the Certificate in Adult Gerontology Primary Care Nurse Practitioner [p. 1842] in the Catalog.

African American Studies

The Certificate in African American Studies is a program that increases intellectual knowledge and understanding of African American culture and experience. See the Certificate in African American Studies [p. 43] in the Catalog.

Aging and Longevity Studies

The Aging and Longevity Studies Program is a multidisciplinary certificate program administered by the College of Liberal Arts and Sciences in cooperation with other University of Iowa colleges. The program is designed

to complement graduate degree programs or to serve as a stand-alone nondegree program for students with academic, professional, research, or service career interests in aging. See the Certificate in Aging and Longevity Studies [p. 49] in the Catalog.

Agricultural Safety and Health

The Certificate in Agricultural Safety and Health is a postbaccalaureate program for practicing health care professionals serving rural areas and for health professions students who intend to practice in rural areas. The program is designed to help rural health professionals address safety and health issues in farm settings. See the Certificate in Agricultural Safety and Health [p. 1902] in the Catalog.

Applied Behavior Analysis

The Certificate in Applied Behavior Analysis develops skills in behavioral intervention and intensive instruction. The course sequence contributes to eligibility for certification as a board-certified behavior analyst (BCBA). See the Certificate in Applied Behavior Analysis [p. 1292].

Biostatistics

The Certificate in Biostatistics is open to students in University of Iowa graduate degree programs outside biostatistics and to individuals admitted to the Graduate College as nondegree students. The certificate program enables students to add a formal biostatistics emphasis to their degree programs. Students who complete the certificate in conjunction with a graduate degree may count a maximum of 6 s.h. of certificate credit toward their graduate degree. See the Certificate in Biostatistics [p. 1912] in the Catalog.

Book Studies/Book Arts and Technologies

The Certificate in Book Studies/Book Arts and Technologies is designed to be completed in one year. The program is open to students who are enrolled in a graduate degree program at the University of Iowa as well as to students enrolled in the Graduate College with nondegree status. See the Certificate in Book Studies/Book Arts and Technologies [p. 1570] in the Catalog.

Business Analytics

The Certificate in Business Analytics is open to students in University of Iowa graduate degree programs and to individuals admitted to the Graduate College as nondegree students. The certificate program is designed for working professionals and addresses a growing need to manage and analyze the rapidly increasing amount of data that is available to support business decision making. See the Certificate in Business Analytics [p. 1154] in the Catalog.

Cognitive Science of Language

The Certificate in Cognitive Science of Language is designed to complement doctoral study. The certificate program is open to University of Iowa Ph.D. students in linguistics, neuroscience, psychology, and speech and hearing science. Ph.D. students in other disciplines may petition to be permitted to earn the certificate. Students must complete a formal application to enter the certificate program; they should contact the program's coordinator before they apply. See the Certificate in Cognitive Science of Language [p. 1572] in the Catalog.

College Teaching

The Certificate in College Teaching complements discipline-oriented graduate programs and prepares students for careers in postsecondary education. The program is open to graduate students working toward a Ph.D. or other terminal graduate degree. See the Certificate in College Teaching [p. 1575] in the Catalog.

Emerging Infectious Disease Epidemiology

The Certificate in Emerging Infectious Disease Epidemiology is a postbaccalaureate program designed to meet the training needs in emerging infectious disease of international public health professionals as well as University of Iowa graduate students. Applicants to the program must hold a bachelor's degree. See the Certificate in Emerging Infectious Disease Epidemiology [p. 1918] in the Catalog.

Family Nurse Practitioner

The Certificate in Family Nurse Practitioner is a program for post-master's Advanced Practice Registered Nurse degree students who would like to pursue a second specialty. See the Certificate in Family Nurse Practitioner [p. 1843] in the Catalog.

Gender, Women's, and Sexuality Studies

The Certificate in Gender, Women's, and Sexuality Studies is open to students enrolled in graduate degree programs. See the Certificate in Gender, Women's, and Sexuality Studies [p. 530] in the Catalog.

Global Health Studies

The Certificate in Global Health Studies is open to graduate and professional students, except for those in the College of Pharmacy who have earned the Pharm.D. degree—they are awarded the undergraduate certificate. Students must maintain a g.p.a. of at least 3.00 in work for certificate. See the Certificate in Global Health Studies [p. 597] in the Catalog.

Health Systems

The Certificate in Health Systems is built on the foundational courses from the Doctor of Nursing Practice (D.N.P.) with a health systems subprogram. The certificate is available to post-master's degree students seeking additional preparation in the area of health systems/administration. See the Certificate in Health Systems [p. 1844] in the Catalog.

Healthcare Management

The Certificate in Healthcare Management provides foundational business and leadership skills to physicians, nurses, and other clinicians, and managers. See the Certificate in Healthcare Management [p. 1938] in the Catalog.

Informatics

The Certificate in Informatics requires a variable amount of graduate credit, depending on the student's choice of subprogram. The certificate program is designed for students enrolled in University of Iowa graduate degree programs who wish to study informatics as a complement to their degree program and for nondegree students who are

interested in increasing their knowledge of informatics. See the Certificate in Informatics [p. 1597] in the Catalog.

Literary Translation

The Certificate in Literary Translation includes coursework in translation practice and techniques. Translation workshops and coursework in translation theory also are central to the certificate program as they are essential to the training of literary translators. See the Certificate in Literary Translation [p. 772] in the Catalog.

Native American and Indigenous Studies

The Native American and Indigenous Studies Program offers an interdisciplinary certificate program focusing on the histories, cultures, languages, arts, religious traditions, political and social organizations, economies, geographies, literatures, and contemporary legal and political concerns of Native Americans of the United States as well as other Indigenous peoples of the Western Hemisphere. See the Certificate in Native American and Indigenous Studies [p. 862] in the Catalog.

Online Teaching

The Certificate in Online Teaching is designed to prepare students for the realities of online teaching and to help them expand their career options. The certificate is open to students in University of Iowa graduate degree programs and to individuals admitted to the Graduate College as nondegree students. See the Certificate in Online Teaching [p. 1316] in the Catalog.

Pediatric Nurse Practitioner—Acute Care

The Certificate in Pediatric Nurse Practitioner—Acute Care is available for post-master's Advanced Practice Registered Nurse (APRN) degree students who would like to pursue a second specialty. See the Certificate in Pediatric Nurse Practitioner—Acute Care [p. 1845] in the Catalog.

Pediatric Nurse Practitioner—Primary Care

The Certificate in Pediatric Nurse Practitioner—Primary Care is available for post-master's Advanced Practice Registered Nurse (APRN) degree students who would like to pursue a second specialty. See the Certificate in Pediatric Nurse Practitioner—Primary Care [p. 1846] in the Catalog.

Public Health

The Certificate in Public Health is designed to improve public health practice and public health workforce capacity in Iowa and the upper Midwest. It is intended primarily for individuals in public health practice, those in the workforce, and those interested in strengthening their knowledge and skills in basic public health competencies. See the Certificate in Public Health [p. 1900] in the Catalog.

Psychiatric/Mental Health Nurse Practitioner

The Certificate in Psychiatric/Mental Health Nurse Practitioner is available for post-master's Advanced Practice Registered Nurse (APRN) degree students who would like to pursue a

second specialty. See the Certificate in Psychiatric/Mental Health Nurse Practitioner [p. 1847] in the Catalog.

Public Digital Humanities

The Certificate in Public Digital Humanities is open to all University of Iowa graduate students in good academic standing. Students take a theory and practice course, and select elective coursework to suit their disciplinary or technical needs. See the Certificate in Public Digital Humanities [p. 1626] in the Catalog.

Sacred Music

The Certificate in Sacred Music is an interdisciplinary program with courses in sacred music, choral conducting and literature, keyboard, voice, religion, and art and art history. The program is open to students enrolled in a graduate degree program and to nondegree students who have been admitted to the Graduate College and who have consent of the certificate's faculty advisor. See the Certificate in Sacred Music [p. 857] in the Catalog.

Special Collections Librarianship

The Certificate in Special Collections Librarianship includes coursework that introduces students to the core theories supporting the collection and management of rare books, archival records, and manuscript collections. See the Certificate in Special Collections Librarianship [p. 1608] in the Catalog.

Sustainable Water Development

The Certificate in Sustainable Water Development trains science, technology, engineering, and mathematics (STEM) graduate students to address future challenges of water scarcity and variability while also meeting the food and energy demands of Earth's growing population. See the Certificate in Sustainable Water Development [p. 1532] in the Catalog.

Translational and Clinical Investigation

The Certificate in Translational and Clinical Investigation is designed for clinicians who seek advanced training in clinical methodology and applied patient-oriented research skills. Students in the certificate program must be practicing academic clinicians who have completed doctoral training. See the Certificate in Translational and Clinical Investigation [p. 1951] in the Catalog.

Transportation Studies

The Certificate in Transportation Studies includes a choice of coursework in traffic engineering, transportation and land use planning, design of transportation systems, transportation demand analysis, transportation policy and planning, as well as other transportation areas. Students may earn the certificate in conjunction with an M.S. or Ph.D. in civil and environmental engineering or with an M.S. in urban and regional planning.

Individuals working toward degrees in other transportation-related disciplines are encouraged to apply to the Transportation Studies Program. Depending on a student's background, additional coursework in statistics, computer programming, simulation, mathematics, and operations research may be required for the certificate. Credit earned in these courses may not be applicable to the student's

degree program. See the Certificate in Transportation Studies [p. 1632] in the Catalog.

Financial Support

Approximately half of the University's graduate students receive some form of University-administered financial assistance. For eligibility requirements and application procedures, see "Section VII. Graduate Appointments" in the Manual of Rules and Regulations of the Graduate College on the college's website. The following are the primary sources of assistance. For a more complete description of funding available to graduate students, see the Graduate College website.

Teaching and Research Assistantships

Teaching and research assistantships are available in most departments. Assistantship stipends are awarded for half-time academic-year appointments and half-time fiscal-year appointments; assistants also are eligible for tuition scholarships. Assistants (one-quarter-time or more) pay resident tuition rates for fee purposes.

Iowa Arts Fellowships

Iowa Arts Fellowships are for University of Iowa graduate students entering M.F.A. programs. Typical stipends are for the academic year, with all tuition and a percentage of mandatory fees paid, plus a health insurance allowance, for one year (the remaining years of support must be provided by the appointing program). There are no departmental service obligations while holding the first-year fellowship.

Iowa Performance Fellowships

Iowa Performance Fellowships are for first-year D.M.A. candidates in a performance area of music. Recipients are nominated by the School of Music. Awards include academic-year fellowships, summer fellowships, and tuition and a percentage of mandatory fees paid (fellow is responsible for the remainder of fees). The School of Music provides a one-quarter-time research assistantship in years two and three.

Graduate College Iowa Recruitment Fellowships

Iowa Recruitment Fellowships program enhances departmental recruitment packages by offering the most accomplished new doctoral students a stipend supplement for up to five years and fellowship support for up to four summer terms. Tuition scholarships are to be paid during the academic years (fall, spring) by the appointing unit, while the Graduate College provides up to 2 s.h. of tuition and benefits for the summer terms. Recipients are nominated by their department.

Graduate College Summer Fellowships

Graduate College Summer Fellowships are for advanced doctoral students who have completed their comprehensive exams, are working to complete their dissertations, and do not otherwise have funding for the summer session. Awards provide a summer stipend and provide up to 2 s.h. of tuition. Awardees must enroll for the six-week, eight-week, or twelve-

week summer session. Students enrolled in the four-week summer session are not eligible to receive the fellowship.

T. Anne Cleary International Research Fellowships

The T. Anne Cleary International Research Fellowships are for doctoral students who have completed all predissertation requirements, including the comprehensive examination, and who will use the fellowship for dissertation research outside North America. The awards may vary and are meant to supplement other research funds. Doctoral students in any discipline may apply. Past recipients of the Cleary fellowship and Doctor of Musical Arts students who choose the D.M.A. essay option are not eligible.

Ballard and Seashore Dissertation-Year Fellowships

Ballard and Seashore Dissertation Fellowships are one semester fellowships for doctoral candidates who have completed all doctoral degree requirements except their dissertation. Recipients are nominated by their departments. Fellowships provide monetary amounts for the semester plus tuition and a percentage of mandatory fees paid for up to 2 s.h. and a health insurance allowance.

Post-Comprehensive Research Awards

The Post-Comprehensive Research Awards program provides an opportunity for advanced doctoral students to benefit from protected and supported time to pursue their scholarly research activities. The award is intended to recognize students with distinguished academic achievement during their early graduate training. These achievements should be evident from a combination of outstanding academic performance in coursework, as well as early scholarly research activities. Students who have held teaching assistantships in the previous two semesters will have priority. Awardees will receive a stipend. The Graduate College also supports up to 2 s.h. of tuition, a percentage of the mandatory fees, and a health insurance allowance. Recipients are nominated by their department.

Scholarships

Scholarships provide up to full tuition.

Graduate Student Travel Awards

Graduate student travel awards provide reimbursement for travel by students who present research and scholarship results to professional conferences. Awards are competitive across disciplines and vary. Funds are administered by the Graduate Student Senate and the Graduate College.

Other Sources

For other sources of financial support, contact the Office of Student Financial Aid.

Many departments offer additional support through traineeships, part-time employment in research, or part-time teaching appointments. The Office of the Vice President for Research maintains a library of information on public and private agencies that provide funds for research and graduate

study. Much material has been collected concerning awards for overseas study.

Courses

Most Graduate College courses are offered by the college's programs and schools. They are listed and described in the corresponding Catalog sections.

The college also offers the following nondepartmental courses.

Graduate College Courses

- GRAD:0006 SROP Scholars Program** 0 s.h.
- GRAD:5225 Communicating Data Through Stories** 3 s.h.
How to communicate science effectively and responsively with multiple audiences from peers and professors to potential employers, policymakers, and the lay public; focus on speaking about science clearly and vividly in ways that can engage varied audiences, especially those outside the student's own field; connecting and finding common ground with an audience, defining goals, identifying main points, speaking without jargon, explaining meaning and context, using storytelling techniques and multimedia elements. Same as CEE:5225.
- GRAD:5800 Writing for National Fellowships** arr.
Process of writing applications for nationally competitive fellowship opportunities; completion of a fellowship application portfolio for a specific fellowship opportunity.
- GRAD:6000 Ph.D. Postcomprehensive Registration** 1 s.h.
- GRAD:6001 Master's Final Registration** 1 s.h.
Requirements: master's degree candidate.
- GRAD:6002 Doctoral Continuous Registration** 1 s.h.
Requirements: doctoral degree candidate who has passed comprehensive examinations.
- GRAD:6003 Doctoral Final Registration** 1 s.h.
Requirements: doctoral degree candidate in final session of enrollment.
- GRAD:6217 Seminar in College Teaching** 1-3 s.h.
Preparation for college teaching; for graduate students planning to teach. Same as PSQF:6217.
- GRAD:6300 Writing for Learned Journals** 1-4 s.h.
Seminar that supports graduate students in bringing written work to publishable form; analysis of target journals' audiences, interests, and citation politics; submission and the publication process; response to reader reports and criticism; best writing and research practices; discussion of knowledge cultures and discourses in disciplines and the contemporary academy. Same as AMST:6300, GWSS:6300, RHET:6330.
- GRAD:6313 Studio Summer Fellowship** 1 s.h.
Investigation of and reflection on digital scholarly collaboration, production, and promotion. Same as ULIB:6313.
- GRAD:6500 Digital Humanities Independent Study** arr.
Independent study for students working toward their public digital humanities certificate.
- GRAD:6510 Introduction to Programming** 1 s.h.
Introduction to computer programming; how computer programming has quickly become a valuable skill across a diverse range of professions and academic disciplines from analyzing text, visualizing data, creating maps, or developing web applications, programming impacts an increasingly large segment of professional activity; knowing how to read and write code is a valuable literacy in modern mediated life, whether the need is to automate repetitive tasks, perform calculations on data, or accept and process user input; students write simple programs of their own design.
- GRAD:6520 Data Visualization Basics** 1 s.h.
Hands-on introduction to basics of data visualization—working with data, analyzing and designing clear and functional visualizations, and developing simple data visualizations in Excel and Python or R; basic static plots (e.g., scatterplots, histograms, line graphs); brief introduction to geographic maps and network graphs.
- GRAD:6521 Scholarly Communication and Journal Publishing** 1 s.h.
Process of publishing a scholarly journal; several scholarly journals are published locally through Iowa Research Online (IRO); for graduate students interested in academic journal publishing as well as scholarly communication more broadly.
- GRAD:6530 Map Making for Beginners** 1 s.h.
Maps are high-impact visual representations that can make complex ideas more comprehensible and enhance the persuasive power of academic arguments; however, proprietary GIS software is expensive and inaccessible to most users; introduction to spatial analysis of data and map making with QGIS—a free, open source, and comprehensive desktop GIS application.
- GRAD:6590 Digital Humanities Capstone** arr.
Application and practice of classroom experience to a specific project under guidance from a faculty member and project team leader. Prerequisites: CLAS:7290 or SLIS:7290. Requirements: admission to public digital humanities certificate program, an approved certificate plan of study on file, completion of 12 s.h. of approved coursework, and good standing in all required certificate coursework. Same as SLIS:6590.
- GRAD:6800 CIC Scholar** arr.
- GRAD:6801 Regents Exchange Program** arr.
- GRAD:6997 Graduate/Professional Transfer** arr.
- GRAD:6998 Undergraduate Transfer** arr.
- GRAD:6999 Resident/Fellow/Post-Doctoral** 0 s.h.
- GRAD:7280 Obermann Center for Advanced Studies Special Topics Seminars** 1-3 s.h.
Active participation and engagement in a major program, such as the annual Humanities Symposium; readings on interdisciplinary histories, contexts, and theoretical perspectives that frame featured events; work of artists, scholars, and researchers participating in the program. Requirements: admission to Graduate College.

GRAD:7285 Obermann Center Professional Development Seminar **1 s.h.**

Active participation and engagement in a series of classes dedicated to connecting public engagement, research, and teaching; readings and media viewings that frame course topics; production of a short film, marketing materials, grant, and syllabi relevant to public engagement project. Requirements: admission to Graduate College and completion of Obermann Graduate Institute on Engagement and the Academy.

GRAD:7385 Teaching and Learning in Higher Education **3 s.h.**

Current theoretical and empirical literature on teaching and learning in higher education; focus on development of effective teaching practice. Same as EDTL:7385, EPLS:7385, PSQF:7385, RCE:7385.

GRAD:7400 Practicum in College Teaching **arr.**

Supervised college teaching experience; teaching in collaboration with faculty, observation and critiques of teaching, participation in course planning and evaluation procedures; ethical and multicultural considerations. Requirements: admission to the graduate certificate in college teaching program.

GRAD:7601 Postdoctoral Research Scholar **0 s.h.**

Requirements: postdoctoral standing.

GRAD:7602 Postdoctoral Research Fellow **0 s.h.**

Requirements: postdoctoral standing.

Applied Mathematical and Computational Sciences

Chair

- Laurent O. Jay (Mathematics)

Graduate degree: Ph.D. in applied mathematical and computational sciences

Faculty: <https://www.amcs.uiowa.edu/faculty>

Website: <https://www.amcs.uiowa.edu>

Applied mathematical scientists formulate scientific concepts and problems in mathematical terms; solve the resulting mathematical problems using analytical and computational methods; and discuss, interpret, and evaluate the solutions. They explore areas of mathematical application and develop mathematical theories in new areas.

Programs

Graduate Program of Study

Major

- Doctor of Philosophy in Applied Mathematical and Computational Sciences [p. 1548]

Courses

Applied Mathematical and Computational Sciences Courses

AMCS:5900 Seminar: Applied Mathematical and Computational Sciences arr.

Current research by faculty, students, guests.

AMCS:7990 Reading and Research arr.

Applied Mathematical and Computational Sciences, Ph.D.

Requirements

The Doctor of Philosophy program in applied mathematical and computational sciences (AMCS) requires a minimum of 72 s.h. of graduate credit. The Ph.D. program is autonomous, broadly based, and interdisciplinary. It is designed to help students achieve a command of theoretical and applied mathematics and obtain basic knowledge in another area (engineering, medicine, or one of the behavioral, biological, physical, or social sciences).

The program is flexible; students can concentrate on applied mathematics, such as differential equations and numerical analysis, or on other applicable techniques in mathematics. Scientific computing is an important part of applied mathematics, so it is often a part of student training and dissertation research.

Prospective students should have a desire to apply a mathematical science (mathematics or statistics) to relevant problems in another area.

Course of Study

Faculty members help each student plan a course of study that is consistent with the student's background, interests, and goals.

These individual programs are designed to help students develop expertise in methods of applied mathematics and build a good foundation in related topics of theoretical mathematics. The individual programs also provide sufficient knowledge in an outside area to enable students to use mathematical techniques in that area.

Students can arrange their study plans to earn a master's degree from another department after they complete part of their plan. Students find suitable thesis problems and supervisors with the help of the faculty.

Required Courses

Students must successfully complete these four core course sequences in the first two years of graduate study.

Code	Title	Hours
All of these:		
MATH:5200 & MATH:5210	Introduction to Analysis I-II	8
MATH:5400 & MATH:5410	General Topology - Introduction to Smooth Manifolds	8
MATH:5600 & MATH:5700	Nonlinear Dynamics with Numerical Methods - Partial Differential Equations with Numerical Methods	8

MATH:5800 & MATH:5810	Numerical Analysis: Nonlinear Equations and Approximation Theory - Numerical Analysis: Differential Equations and Linear Algebra	8
-----------------------	--	---

Outside Area Courses

Students must take and pass a Ph.D.-level course sequence area outside of mathematics in which mathematics is applied. The sequence must consist of two courses at the 6000-level or above.

Advanced Mathematics Course Requirement

In order to establish a solid foundation in mathematics, students must successfully complete at least 12 s.h. of graduate mathematics courses numbered MATH:6000 to MATH:7799, with the exception of seminar courses. The courses should be chosen to obtain mathematical breadth and must be approved by the AMCS chair.

Comprehensive Examination

Students complete a comprehensive examination that covers their outside research area within three-and-a-half years after beginning graduate study. The examination is typically based on the outside area courses and/or directed readings.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website. To be prepared for graduate-level coursework in mathematics and an additional area, applicants should have a bachelor's or master's degree with a strong mathematics component and some background in the additional area.

Applications for fall admission are due on January 15. For application forms and more information about the academic program, contact the chair of the Applied Mathematical and Computational Sciences Program.

Financial Support

Financial support is provided to every student admitted. Fellowships and research and teaching assistantships are available to qualified applicants and fellowship support is available during summer sessions.

Career Advancement

Career opportunities for applied mathematicians include positions in colleges, universities, governmental laboratories, business, industry, and consulting firms.

Biomedical Science

Director

- Daniel Thomas Tranel

Graduate degrees: M.S. in biomedical science; Ph.D. in biomedical science

Website: <https://medicine.uiowa.edu/biomed/>

The Biomedical Science Program offers over 300 faculty laboratories under the diversity of a large umbrella program. Students conduct groundbreaking research on a campus that ranks among the top public institutions in the country in research activity, federal funding, graduate education, and core facility support. Ph.D. students benefit from the extensive scope of the program and the support of a cohesive academic campus.

Students select from one of seven subprograms:

- cancer biology [p. 1552]
- cell and developmental biology [p. 1553]
- experimental pathology [p. 1555]
- free radical and radiation biology [p. 1557]
- molecular medicine [p. 1559]
- molecular physiology and biophysics [p. 1561]
- pharmacology [p. 1563]

Successful completion culminates with a Ph.D. in biomedical science and affiliation with a respective subprogram. Three closely related Ph.D. programs—genetics, human toxicology, and neuroscience—complete the complement of biomedical programs on campus. Visit the Biomedical Science Program website for more information.

Programs

Graduate Programs of Study

Majors

- Master of Science in Biomedical Science [p. 1551]
- Doctor of Philosophy in Biomedical Science [p. 1552]

Admission

The Biomedical Science Program is sufficiently flexible to accommodate students with a relatively wide range of backgrounds. Students with a bachelor's degree in any of the biological, biochemical, engineering, or physical sciences who have a strong desire to pursue a research-oriented career are encouraged to apply. Students must have:

- a bachelor's degree from a regionally accredited American college or university or an equivalent degree from another country as determined by the Office of Admissions; and
- a minimum g.p.a. of 3.00 or higher or the equivalent from another country as determined by the Office of Admissions.

Facilities

Biomedical science researchers benefit from state-of-the-art core research facilities and research support facilities. Much of the research is interdisciplinary, with collaborations coordinated through major research centers, institutes, and programs.

Financial Support

Students receive stipend and tuition support. Continued support beyond the first year is guaranteed, provided that satisfactory progress toward degree completion is accomplished. Sources of support include departmental funds, training grants, research grants, and individual fellowships.

Career Advancement

The Biomedical Science Program prepares students for successful careers as researchers, educators, and future leaders in the international biomedical workforce.

Courses

- Biomedical Science Courses [p. 1549]
- Cancer Biology Courses [p. 1549]

Biomedical Science Courses

BMED:5207 Principles of Molecular and Cellular Biology

3 s.h.

Structure of DNA, RNA, and Protein; DNA replication, genetic and epigenetic regulation; RNA production and processing; protein production and post-translation modification; cellular membranes and trafficking; cytoskeleton and regulation of cell junctions and migration; signal transduction and regulation of cell cycle and apoptosis; didactic lectures and group discussion of primary research publications.

BMED:7270 Scholarly Integrity/Responsible Conduct of Research I

0 s.h.

Training in principles of scholarly integrity and the responsible conduct of research; facilitated discussions of case studies; student/mentor responsibilities in pursuit of scholarly work (ownership, authorship, plagiarism/falsification/fabrication of data); student/mentor relationships and intellectual dialogues (communication, collaboration, grievance management); student responsibilities to institution/scholarly community/society (intellectual property, conflict of interest, fiscal responsibilities, protection of human/animal subjects). Requirements: successful completion of CITI online training (greater than 80 percent score for each module) and enrollment in Graduate College degree-seeking program. Recommendations: minimum first-year graduate standing (Ph.D., M.S./M.A.), and involvement in mentored research activities (extramurally or intramurally funded).

BMED:7271 Scholarly Integrity/Responsible Conduct of Research II

0 s.h.

Training in principles of scholarly integrity and the responsible conduct of research; facilitated discussions of case studies; student/mentor responsibilities in pursuit of scholarly work (ownership, authorship, plagiarism/falsification/fabrication of data); student/mentor relationships and intellectual dialogues (communication, collaboration, grievance management); student responsibilities to institution/scholarly community/society (intellectual property, conflict of interest, fiscal responsibilities, protection of human/animal subjects). Requirements: successful completion of CITI online training (greater than 80 percent score for each module) and enrollment in Graduate College degree-seeking program. Recommendations: minimum of first-year graduate standing (Ph.D., M.S./M.A.) and involvement in mentored research activities (extramurally or intramurally funded).

BMED:7604 Scholarly Integrity/Responsible Conduct of Research I **0 s.h.**

Training in principles of scholarly integrity and the responsible conduct of research; facilitated discussions of case studies; student/mentor responsibilities in pursuit of scholarly work (ownership, authorship, plagiarism/falsification/fabrication of data); student/mentor relationships and intellectual dialogues (communication, collaboration, grievance management); student responsibilities to institution/scholarly community/society (intellectual property, conflict of interest, fiscal responsibilities, protection of human/animal subjects); meets responsible conduct of research training obligation for postdocs and faculty holding an NIH K award. Requirements: successful completion of CITI online training (greater than 80 percent score for each module).

BMED:7605 Scholarly Integrity/Responsible Conduct of Research II **0 s.h.**

Training in principles of scholarly integrity and the responsible conduct of research; facilitated discussions of case studies; student/mentor responsibilities in pursuit of scholarly work (ownership, authorship, plagiarism/falsification/fabrication of data); student/mentor relationships and intellectual dialogues (communication, collaboration, grievance management); student responsibilities to institution/scholarly community/society (intellectual property, conflict of interest, fiscal responsibilities, protection of human/animal subjects); meets responsible conduct of research training obligation for postdocs and faculty holding an NIH K award. Requirements: successful completion of CITI online training (greater than 80 percent score for each module).

Cancer Biology Courses

CBIO:3310 Practical Data Science and Bioinformatics **3 s.h.**

Understanding how to access large biological data sets and use them to answer biological questions is an important skill for researchers; immersive introduction to computational handling of data; how to access and analyze publicly available data; critically evaluate data quality and analysis in context of measuring gene expression; basic coding in R/RStudio, plotting and data display, fitting and regression, statistical inference, statistical models, downloading and data wrangling; basic introduction to machine learning (clustering); for students with no computational background. Prerequisites: BIOL:1411 with a minimum grade of C- and BIOL:1412 with a minimum grade of C-. Requirements: college algebra. Recommendations: BIOC:3110, or BIOC:3120 and BIOC:3130, or other upper-level life sciences courses. Same as BIOC:3310, MMED:3310.

CBIO:5000 Experimental Methodologies **2 s.h.**

Practical experience in common laboratory methods including polymerase chain reaction (PCR), western blotting, immunostaining, cell culture, and bioinformatics. Requirements: admission to cancer biology graduate program.

CBIO:5500 Topics in Cancer Biology **1 s.h.**

Discussion and presentation of new scientific literature in cancer biology fields; how to evaluate and critically interpret scientific literature, data, and conclusions; journal club format. Requirements: admission to cancer biology graduate program.

CBIO:6000 Seminar: Cancer Research **1 s.h.**

Attendance at seminar presentations of cutting-edge science in the field of cancer biology; presentations by experts in the field and trainees. Requirements: admission to cancer biology graduate program.

CBIO:6500 Research in Cancer Biology **arr.**

Research experience through research rotations and conduction of dissertation research in cancer research laboratories. Requirements: admission to cancer biology graduate program.

CBIO:7000 Clinical Connections **1 s.h.**

Shadowing experiences arranged with clinicians who are treating cancer patients at University of Iowa Hospitals & Clinics. Requirements: admission to cancer biology graduate program.

CBIO:7500 Crafting a Scientific Proposal **1 s.h.**

Training in areas of scientific writing and development of a scientific proposal; students develop a proposal related to, but not identical to, the proposal for the comprehensive exam. Requirements: admission to cancer biology program.

Biomedical Science, M.S.

There is no direct admission to the M.S. program in biomedical science. Students interested in biomedical science are considered for Ph.D. admission only. Visit the Ph.D. in biomedical science [p. 1552] in this section of the Catalog for information about the Ph.D. degree program.

Biomedical Science, Ph.D.

Students interested in the Ph.D. with a major in biomedical sciences should apply to the subprogram area they choose to pursue.

Cancer Biology

The Doctor of Philosophy in biomedical science with a cancer biology subprogram requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the degree. The subprogram provides training in many areas of research—cell biology, genetics, immunology, and cell metabolism, among others—that are necessary to understand the complexities of cancer etiology and treatment. The cancer biology subprogram does not offer a master's degree. Cancer biology is affiliated with the Holden Comprehensive Cancer Center, which was founded in 1980 and has been designated as a National Cancer Institute NCI-Designated Cancer Center since 2000.

The curriculum is a sequence of required and elective courses that provides students with advanced knowledge in current concepts related to molecular, cellular, and genetic processes that contribute to the development and treatment of cancer. It also provides specialized training in experimental methodology used to study cancer in a laboratory setting. Cancer biology prepares students for a variety of career paths in academic, clinical, and industry environments that deal with the study and/or treatment of cancer.

Students have flexibility in their research rotations and can adapt their studies to permit specialization, as well as gaining clinical exposure by shadowing oncologists.

Entering students are expected to have a solid background in chemistry, mathematics, and the biological sciences. They should have completed undergraduate coursework in introductory biology and chemistry, biochemistry, genetics, organic chemistry, physical chemistry, and calculus; and previous coursework in cancer biology is desirable. Deficiencies in a particular area, as determined by the Graduate Studies Committee, can be remedied by completion of appropriate courses during the first year of graduate study.

Selection of a Ph.D. mentor (thesis advisor) is normally finalized near the end of the spring semester of a student's first year of study. The deadline for selection is determined by the biomedical science program.

Students are required to complete the core courses listed below prior to their comprehensive examination. Students who wish to take the comprehensive examination should first make arrangements in consultation with their mentor, the program director, and the Student Advisory Committee. The exam is typically completed during the second summer of study.

The Ph.D. in biomedical science with a cancer biology subprogram requires the following coursework.

Core Curriculum

Code	Title	Hours
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0

BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0

MMED:6220/ ACB:6220/ MPB:6220	Mechanisms of Cellular Organization	3
MMED:6227/ ACB:6227/ MPB:6227	Cell Fate Decisions	1
PATH:5260	Translational Histopathology	3
PCOL:6208	G Proteins and G Protein-Coupled Receptors	1
PCOL:6209/ MPB:6209/ NSCI:6209	Steroid Receptor Signaling	1

Additional Requirements

Laboratory Rotations

In order to gain more widespread experience in cancer biology research and to aid in selecting a laboratory home and thesis project, students perform three to seven laboratory rotations prior to selection of a thesis advisor. Laboratory rotations are normally carried out in research laboratories of the cancer biology faculty. A rotation can be completed with a faculty member outside the cancer biology program with permission of the program director.

Rotations begin in the spring semester of the first year. The length of a laboratory rotation is flexible and can vary from a minimum of two to five weeks. Two laboratory rotations may be completed in the same lab with the approval of the program director. The goal of the rotations is to gain a comprehensive view of the mentor's research program, to gain exposure to experimental methods used in the mentor's lab, and to learn about the mentoring styles of faculty members.

Teaching

The cancer biology program does not require teaching. Students with an interest in teaching experience are encouraged to discuss their career plans with their mentor and/or the program director.

Publication Requirements

Students are required to have a minimum of one first-author publication in a peer-reviewed journal prior to graduation.

The article must be formally accepted and be in-press status or published prior to graduation. A co-first-authored, peer-reviewed publication will count toward this requirement.

Comprehensive Examination

Students are eligible to take the comprehensive examination when they are in good academic standing as defined by the Graduate College—the student has completed all program core courses with a grade of at least B or have a non-letter grade of pass.

Written Examination

The comprehensive exam is on-topic, meaning the subject should be a student's current research being conducted in the mentor's lab. Students normally take the comprehensive exam during the second spring or summer of their enrollment in the program. They submit a written exam, if that is acceptable to the comprehensive examination committee, and then prepare for an oral examination.

Oral Examination

The purpose of the oral examination is to determine whether the student's written submission adequately represents the student's knowledge. A student may be queried on issues beyond the scope of the written proposal to allow the committee to determine the student's general depth of knowledge.

Final Examination

The thesis committee is selected by each student after the successful completion of the comprehensive examination. Students are eligible for their oral thesis defense after completing 72 s.h. of coursework, publication of at least one primary author manuscript or be in-press status, and with consent of the thesis committee. The procedures are the same as for the comprehensive examination.

Combined Programs

Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in biomedical science (cancer biology subprogram) in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1711] (Carver College of Medicine) in the Catalog.

Cell and Developmental Biology

The Doctor of Philosophy in biomedical science with a cell and developmental biology subprogram requires 72 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the degree. They gain admission to graduate training laboratories in the Department of Anatomy and Cell Biology, Interdisciplinary Graduate Programs, or through direct admission into a specific laboratory.

The Ph.D. in biomedical science with a cell and developmental biology subprogram requires the following coursework.

Core Curriculum

PHAR:5521	High Throughput Screening for Pharmaceutical and Biomedical Sciences	1

Additional Requirements

Laboratory Rotations

Students rotate through at least three different laboratories during their first academic year. The rotations are approximately 10 weeks each. At the conclusion of each rotation, students give a 12-minute presentation.

Teaching

Students are required to complete a teaching requirement (3 s.h.). They may teach in a combination of 1 or 2 s.h. courses, or one 3 s.h. course. Teaching requirements must be met prior to the final thesis defense and graduation. Most students meet the requirement in the third year after completion of the comprehensive exam. A student must earn a satisfactory report from the course director in order to receive credit for the teaching requirement.

Publication Requirements

It is expected that a student will have contributed as an author to at least one research publication. The publication must demonstrate primary authorship and be at the accepted phase of the publication process. The number of publications and their quality, content, and impact is established by the thesis committee.

Seminar Presentations

Students present their thesis research annually in the cell and developmental biology seminar series in a 30-minute presentation. Evaluation critique by faculty and students is provided.

Comprehensive Examination

The comprehensive examination must be taken before the fall semester of a student's third year.

Written Examination

A written proposal follows the form of a standard National Institutes of Health (NIH) R01 research grant and covers the area of the research proposed for the student's anticipated thesis dissertation. One aim area should be completely of the student's own design, with no input from the thesis advisor.

Oral Examination

The oral examination of the student's research proposal lasts approximately two to three hours. The exam begins with a brief student presentation on the proposed research project. Questions during the examination may come from the proposal, the thesis research, or other general areas of cell and developmental biology.

Thesis Defense

The five-member thesis committee serves as an advisory body for the preparation of the thesis. The candidate and the committee should meet yearly; however, the candidate, the thesis advisor, or the committee can request a meeting at any time. In the subultimate committee meeting, committee members review the material that is expected to be incorporated into the thesis. The final draft of the thesis is due to the committee two weeks before the final examination. The final examination takes the form of a seminar presented to the program, with questions, comments, and discussion following. After the seminar, the candidate meets with the committee for the final thesis defense.

Combined Programs

Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in biomedical science (cell and developmental biology subprogram) in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1711] (Carver College of Medicine) in the Catalog.

Experimental Pathology

The Doctor of Philosophy in biomedical science with an experimental pathology subprogram requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the degree. The subprogram provides students with advanced knowledge of disease pathogenesis at the genetic, molecular, cellular, and systems levels. It also teaches cutting edge research skills enabling graduates to investigate the basis of disease and lay the foundation for novel and improved therapies.

The curriculum is a sequence of required and elective courses with the goal of providing students a foundation in current cellular and molecular biology, in-depth knowledge of disease pathogenesis, and specialty content in the area of their thesis work.

Students who enter the experimental pathology subprogram are directly admitted. They choose a laboratory and mentor upon entering the program and begin work immediately on a thesis project. The subprogram is open to Medical Scientist Training Program students.

The Ph.D. in biomedical science with an experimental pathology subprogram requires the following coursework.

Core Curriculum

Code	Title	Hours
All of these:		
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0

MMED:8115	Molecular Physiology	4
NSCI:5653/ BIOL:5653/ PSY:5203	Fundamental Neurobiology	3
NSCI:7235	Neurobiology of Disease	3

Additional Requirements

Laboratory Rotations

Rotations are not required as students entering the experimental pathology subprogram are directly admitted.

Teaching

The experimental pathology subprogram does not have a teaching requirement. However, there are opportunities to teach if students desire this experience.

Publication Requirements

Students must have one first-author, peer-reviewed paper published or in press, as well as a co-authored, peer-reviewed paper or review article published or in press prior to being allowed to schedule their dissertation defense.

Comprehensive Examination

The comprehensive examination is generally taken in the spring semester of the second year of study. Students with advanced standing (medical scientist training program students or those with an M.S. degree) may choose to take the examination in the fall semester of their second year.

The comprehensive examination is off-topic. The focus of the proposal is in the field of a student's research. To determine the topic, each of the five comprehensive exam committee members choose a recent high-profile paper in the area of the student's research interests, but not directly related to the dissertation project. After examining the papers, the student chooses one and makes it the subject of the comprehensive exam.

The student then prepares and submits a two-page, single-spaced abstract to the committee. The abstract should include the background/rationale, the significance of the question being asked, and an outline of the specific aims. Upon approval of the abstract, the student is given permission to prepare a full proposal based on the NIH R21 format. Specifically, the proposal should be seven single-spaced pages and must include significance, innovation, rationale, and experimental approach. The proposal is then defended orally in front of the entire committee.

Final Examination

The dissertation committee consists of the mentor and four additional faculty. Students are required to select and meet with their committee by the end of the first fall semester of their second year, and at least yearly thereafter.

Upon meeting all requirements, students may then defend their dissertation/final exam. Two weeks prior to the defense, students must provide the entire committee with a completed draft of their dissertation. On the day of the defense, students present a public seminar of their dissertation work. This is then followed by defense of the dissertation before the entire dissertation committee. A final version of the dissertation is prepared based on suggested edits provided by the committee. After final approval by the research advisor and committee, the dissertation is submitted to the Graduate College.

Free Radical and Radiation Biology

The Doctor of Philosophy in biomedical science with a free radical and radiation biology subprogram is interdisciplinary and requires 72 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the degree. The possibility exists for a major emphasis in radiation biology or redox biology with a focus on cancer or degenerative diseases associated with aging. Although students with diverse academic backgrounds may enter the program, each student should have a science background which includes at least two years of chemistry, including organic chemistry; one year of physics; two years of biology; and mathematics, including at least one semester of calculus.

The Ph.D. in biomedical science with a free radical and radiation biology subprogram requires the following coursework.

Core Curriculum

PSQF:6217/ GRAD:6217	Seminar in College Teaching	1-3

Additional Requirements

Laboratory Rotations

Graduate students rotate through at least three free radical and radiation biology different laboratories during their first academic year with primary and secondary faculty.

Seminar and Journal Clubs

Students must enroll in one seminar for credit once a year for three years as well as a thesis defense seminar. Students should not register for the seminar during their first academic year.

Students enrolled for research credit are required to submit a research report to their advisor on the last day of class each semester. The report is evaluated and graded by the advisor. The report, written in a form that is appropriate for a peer-reviewed publication, should define the goals, aims, and objectives for the specific semester, and describe the progress made by the student toward completion of the research objectives.

Topics in Free Radical Biology and Medicine (FRRB:6006) and Topics in Radiation and Cancer Biology (FRRB:6008) must be taken at least two times.

Publication Requirements

Students must submit at least one first-author manuscript or be ready to submit to a peer-reviewed journal prior to the thesis defense. All Ph.D. students are expected to have peer-reviewed publications prior to graduation and these publications should include first authorship.

Grant Writing Opportunities

National Institutes of Health (NIH) research grant proposals (i.e., F30, F31) and/or equivalent grant submissions are encouraged based on a student's work. The free radical and radiation biology program will provide resources and critiques of the application prior to submission. Students should review the instructions provided in the NIH publication, PHS-398, available from the National Institutes of Health website.

Qualifying Examination

To qualify for entry into the Ph.D. program, a student must satisfactorily complete a written qualifying examination. The student typically takes the exam after successfully completing the major required coursework, but no later than the beginning of the fifth semester after entering the program. The exam is offered after the close of spring semester classes, typically Monday and Tuesday of the first week of the regular summer session.

A student is allowed two attempts to satisfactorily complete the exam. Guidelines state that a score greater than 70 percent on any section constitutes a Ph.D. pass in that section, between 60 percent and 70 percent is an M.S. pass, and below 60 percent is a failing grade. A student who passes (Ph.D. pass) some sections on the first attempt are not required to repeat an exam for that section. New questions are written for the exam sections to be repeated and students are expected to clear a 70 percent pass within eight weeks of their first attempt. An overall average of 70 percent or greater on the repeated exam sections constitutes a Ph.D. pass. An average equal to or greater than 70 percent constitutes a Ph.D. pass and progress toward completion of the Ph.D. degree requirements.

Comprehensive Examination

Students must successfully pass the comprehensive examination. This exam may be taken at any time after successfully completing the qualifying exam but no later than the first February after successfully completing the qualifying exam. This exam should be written in a National Institutes of Health R01 format and be on the topic of the student's dissertation research. Members of the exam committee should approve of the hypothesis plus a student's aims page. The members then can have no further input into the preparation of the document. If the student fails to satisfactorily complete the comprehensive exam, the student is allowed one additional attempt to satisfactorily complete the exam. The second attempt can be undertaken no sooner than June (at least four months after the first attempt) and no later than August of that same year.

For the Ph.D. comprehensive examination, a student must develop a proposal, present a written copy of the proposal to each member of the examining committee, then orally defend the proposal two to four weeks later. The written proposal shall be prepared using a computer, be no more than 50 double-spaced pages, and follow the general guidelines for National Institutes of Health (NIH) R01 research grant proposals (minus administrative pages); see instructions provided in the NIH publication PHS-398, available from the NIH website.

Final Examination

The final examination is a defense of the thesis and explanation of the scientific principles involved, given in a public seminar and closed door oral exam, with committee members. The student's research must be summarized in the format required by the Graduate College.

Combined Programs

Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in biomedical science (free radical and radiation biology subprogram) in a combined degree program offered by the Graduate College and the Carver College of Medicine.

Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1711] (Carver College of Medicine) in the Catalog.

Molecular Medicine

The Doctor of Philosophy in biomedical science with a molecular medicine subprogram provides interdisciplinary training in the concepts and methodologies fundamental to the investigation of biological processes and molecular mechanisms that relate to human disease. The Ph.D. requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the degree.

The curriculum is a sequence of required and elective courses, which provides students with broad exposure to areas including molecular biology, cell biology, biochemistry, and integrative sciences. It ensures a comprehensive exposure to conceptual and experimental aspects of molecular and cellular biology and of translational studies. Sufficient flexibility is provided so that students can adapt the program to permit specialization in their own area of interest. Faculty members are involved in a variety of research projects involving molecular and cellular biology and molecular medicine.

The Ph.D. in biomedical science with a molecular medicine subprogram requires the following coursework.

Core Curriculum

Code	Title	Hours
All of these:		
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
MMED:6260	Methods for Molecular and Translational Medicine	1
MMED:6280	Critical Thinking in Molecular Medicine (postcomprehensive students must participate in a journal club of their choice)	1
MMED:7290	Seminars in Molecular Medicine (students must register each semester)	1
MMED:8115	Molecular Physiology	4
PATH:5270/ IGPI:5270/ MMED:5270	Pathogenesis of Major Human Diseases	3
PCOL:5204	Basic Biostatistics and Experimental Design	1

Typical Curriculum

First Year, Fall

Code	Title	Hours
BMED:5207	Principles of Molecular and Cellular Biology	3
MMED:6280	Critical Thinking in Molecular Medicine	1
MMED:8115	Molecular Physiology	4
PCOL:5204	Basic Biostatistics and Experimental Design	1

First Year, Spring

Code	Title	Hours
MMED:6260	Methods for Molecular and Translational Medicine	1
MMED:6280	Critical Thinking in Molecular Medicine	1
PATH:5270/ IGPI:5270/ MMED:5270	Pathogenesis of Major Human Diseases	3

Electives (from second year tracks or other courses; consult advisor)

Second Year

Students select coursework from the following three track areas: metabolic disorders, cardiovascular biology, and molecular and cellular medicine (general).

Code	Title	Hours
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
MMED:6280	Critical Thinking in Molecular Medicine	1
MMED:7290	Seminars in Molecular Medicine	1
Electives		1-3

Metabolic Disorders

Code	Title	Hours
MMED:6230	Pathogenesis of Metabolic and Cardiovascular Disorders	3
MMED:6280	Critical Thinking in Molecular Medicine	1
MMED:7310	Translational Medicine Education Rounds (taken fall and spring semesters)	1
BIOC:7253	Metabolism I	1
BIOC:7255	Metabolism II	1

Cardiovascular Biology

Code	Title	Hours
MMED:6230	Pathogenesis of Metabolic and Cardiovascular Disorders	3
MMED:6280	Critical Thinking in Molecular Medicine	1

MMED:7310	Translational Medicine Education Rounds (taken fall and spring semesters)	1
Elective		3

Molecular and Cellular Medicine (General)

Code	Title	Hours
All of these:		
MMED:6220/ ACB:6220/ MPB:6220	Mechanisms of Cellular Organization	3
MMED:6280	Critical Thinking in Molecular Medicine	1
MMED:7310	Translational Medicine Education Rounds (taken fall and spring semesters)	1

Related coursework from list in the molecular medicine Graduate Student Guidelines

3 s.h. from these:

MMED:3310/ BIOC:3310/ CBIO:3310	Practical Data Science and Bioinformatics	3
MMED:6225/ ACB:6225/ MPB:6225	Growth Factor Receptor Signaling	1
MMED:6226/ ACB:6226/ MPB:6226	Cell Cycle Control	1
MMED:6227/ ACB:6227/ MPB:6227	Cell Fate Decisions (elective, 1s.h. maximum)	1
Elective		1

Additional Requirements

Laboratory Rotations

To ensure that students obtain early involvement in laboratory research, they are required to register for research credits and complete three laboratory rotations during their first year of graduate study. In general, these rotations are in laboratories of three different molecular medicine faculty members. In some cases, if approved by the molecular medicine program, students may be allowed to complete two of their rotations in the same laboratory.

Teaching

Students are required to complete a teaching requirement (3 s.h.). They may teach in a combination of 1 or 2 s.h. courses, or one 3 s.h. course. This teaching requirement must be met prior to the final dissertation defense and graduation. It is recommended that teaching occur in the third year following completion of the comprehensive examination.

Publication Requirements

Students are required to have a minimum of one first-author publication in a peer-reviewed journal. The article must be formally accepted and be in press status or be published prior to graduation. A co-first-authored, peer-reviewed publication will count toward this requirement.

External Fellowship Application Requirement

Students are required to submit a fellowship to an external funding agency (i.e., National Institutes of Health, American Heart Association) within one year of completing their comprehensive examination or by a date that is mutually agreed upon by the student, the dissertation advisor, and the molecular medicine program.

Comprehensive Examination

Students are expected to complete the comprehensive examination, both written and oral components, before the beginning of their third year. The preliminary specific aims document can be submitted to the comprehensive examination committee any time after approval of the dissertation plan, but must be submitted before April 1. The committee evaluation of the specific aims will be returned to the student within one week. A rejected specific aims must be revised and resubmitted within three weeks. The committee then has one week to evaluate the resubmitted specific aims. The specific aims must be accepted by a majority vote of the committee before a student can proceed with development of a full proposal. Only two rounds of submission are allowed.

Following acceptance of the specific aims, a student must submit the written proposal within six weeks. The committee has two weeks to review the written document. The oral presentation to defend the written proposal should be scheduled as soon after the two weeks as possible or at the convenience of the committee. It is expected that all examinations will be completed by July 15, in advance of the end of the student's second year.

The detailed Molecular Medicine Student Guidelines is located under "Program Information" on the Molecular Medicine Program website.

Final Examination

The five-member thesis committee serves as an advisory body for preparation of the thesis. It is expected that a student meet with the committee annually, although the candidate, thesis advisor, or the committee can request a meeting at any time. The final examination takes the form of a seminar presented to the program followed by a final thesis defense with committee members. The student is required to present a complete copy of the thesis to the thesis committee members at least two weeks prior to the final defense date.

Combined Programs

Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in biomedical science (molecular medicine subprogram) in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1711] (Carver College of Medicine) in the Catalog.

Molecular Physiology and Biophysics

The Doctor of Philosophy in biomedical science with a molecular physiology and biophysics subprogram offers opportunities for training and research. The degree requires a minimum of 72 s.h. of graduate credit. Students must

maintain a cumulative g.p.a. of at least 3.00 to earn the degree.

Students join an active group of faculty members and advanced students at a time of expanding interdisciplinary biomedical research at the University of Iowa. Faculty in the Department of Molecular Physiology and Biophysics have a strong research focus on the cellular, molecular, and physical mechanisms of physiological processes.

The Ph.D. in biomedical science with a molecular physiology and biophysics subprogram requires the following coursework.

Core Curriculum

Code	Title	Hours
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
MPB:5153	Graduate Physiology	4
MPB:6302	Research Physiology and Biophysics	arr.
	Advanced electives, approved by the director of graduate studies	9

Typical Curriculum

Fall Semester

Code	Title	Hours
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
MPB:5153	Graduate Physiology	4
MPB:6302	Research Physiology and Biophysics	6

Spring Semester

Code	Title	Hours
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
MPB:6225/ ACB:6225/ MMED:6225	Growth Factor Receptor Signaling (elective)	1
MPB:6302	Research Physiology and Biophysics	2
MMED:6215	Transcription and Multifunctional Regulation by RNA (elective)	1
MMED:6226/ ACB:6226/ MPB:6226	Cell Cycle Control (elective)	1
MMED:6227/ ACB:6227/ MPB:6227	Cell Fate Decisions (elective)	1

Elective Coursework Options

Any elective preapproved by the director of graduate studies can be used to meet the elective requirement. A total of 9 s.h. of elective coursework is required.

The most common elective options are the following.

Code	Title	Hours
MPB:6220/ ACB:6220/ MMED:6220	Mechanisms of Cellular Organization	3
GENE:6150	Genetic Analysis of Biological Systems	3
IGPI:5270/ MMED:5270/ PATH:5270	Pathogenesis of Major Human Diseases	3
NSCI:5653/ BIOL:5653/ PSY:5203	Fundamental Neurobiology	3

Additional Requirements

Plan of Study

In consultation with the director of graduate studies, each newly admitted student formulates a plan of study to be completed before the comprehensive examination. This plan should include projected dates for completion of the comprehensive examination as well as provision for removal of deficiencies. Before completing the comprehensive exams, the normal course load is 15 s.h. each semester.

Required Courses

It is the intention of the department to have a curriculum that allows coursework to be mostly completed within the first year, though in some instances additional coursework in subsequent years is required. The core curriculum represents a minimum of required classes; although with advice of the director of graduate studies and thesis advisor, some students may benefit from completing additional coursework.

Requests for waiver of required courses or change of course registration must be approved by the director of graduate studies after consultation with the faculty and the chair of the department.

Evaluation of Progress

Students must meet progress requirements of the Department of Molecular Physiology and Biophysics and the Graduate College. To meet departmental requirements, students must earn a grade of B or higher in MPB:5153 Graduate Physiology and BMED:5207 Principles of Molecular and Cellular Biology (B-minus or lower constitutes a non-passing grade), a grade of satisfactory (S) for BMED:7270 Scholarly Integrity/Responsible Conduct of Research I, and a g.p.a. of at least 3.00 in all elective coursework (a grade below B, but above D-minus, is permissible for individual electives, so long as the grade-point average of all combined electives taken during the graduate program remains higher than 3.00).

All core curriculum courses receiving a letter grade must be satisfactorily completed prior to taking the comprehensive exam. According to Graduate College regulations, students cannot take a comprehensive exam in a semester in which they are on academic probation.

Comprehensive Examination

Students admitted directly to the doctoral program are required to complete the comprehensive examination by June 30 of the second year in the program.

Workshop

All postcomprehensive students are required to present a workshop on the progress of their thesis research once per year. Students should consult with the workshop coordinator to arrange presentation dates. Precomprehensive students also are encouraged to present workshops, though it is not required. Students have an option to present a full or half workshop (typically 45 or 20 minutes, respectively).

Teaching

Experience in teaching is an important part of a student's academic training. To attain adequate teaching proficiency, students receive teaching assignments after successful completion of the comprehensive exam and in subsequent years as warranted. Individual assignments depend on the teaching needs of the department. Examples of teaching assignments include running review sessions in a graduate physiology course, formal lectures, participating in small group conferences, assisting in computer simulations, or bench mentoring of summer students. These teaching assignments are made by the director of graduate studies in consultation with appropriate course directors. Thesis advisors with specific suggestions concerning teaching assignments that would be particularly beneficial to the individual circumstances of a particular student are encouraged to share them with the director of graduate studies for consideration. However, final discretion for approval lies with the director of graduate studies who must preapprove all assignments.

Research Publication

It is expected that thesis research will result in findings that are of sufficient quality and completeness to warrant publication in good quality peer-reviewed journals. At least one first-author peer-reviewed research paper should be accepted for publication prior to the Ph.D. thesis defense. The published paper or a letter from an editor indicating acceptance should be provided to the director of graduate studies before scheduling a final exam date. In certain cases, a first-author research manuscript might be written, but not yet accepted by a journal at the time a final Ph.D. thesis exam is scheduled. In this case, the first-author requirement may be satisfied if trainees submit their manuscript to the preprint server for biology, bioRxiv.

Thesis Defense and Presentation

Students complete a thesis defense with their committee. Once this test is completed they must schedule a public thesis presentation.

Combined Programs

Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in biomedical science (molecular physiology and biophysics subprogram) in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1711] (Carver College of Medicine) in the Catalog.

Pharmacology

The Doctor of Philosophy in biomedical science with a pharmacology subprogram requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the degree.

Qualified students who are interested in earning the Doctor of Medicine along with the Ph.D. may apply to the Medical Scientist Training Program [p. 1711] in a combined M.D./Ph.D. program. Students have the opportunity to tailor their curriculum with courses that enhance their educational goals. They take a combination of graduate courses that include seminar courses.

The Ph.D. in biomedical science with a pharmacology subprogram requires the following coursework.

Core Curriculum

Code	Title	Hours
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:7270	Scholarly Integrity/Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/Responsible Conduct of Research II	0
PCOL:5130	Fundamentals of Pharmacology	3
PCOL:5204	Basic Biostatistics and Experimental Design	1
PCOL:6203	Pharmacology for Graduate Students	6
PCOL:6210	Receptors and Cell Signaling	3
PCOL:6250	Advanced Problem Solving in Pharmacological Sciences	1
MPB:5153	Graduate Physiology	4

Typical Curriculum

First Year, Fall

Code	Title	Hours
BMED:5207	Principles of Molecular and Cellular Biology	3
PCOL:5204	Basic Biostatistics and Experimental Design	1
PCOL:6015	Topics in Pharmacology and Neuroscience	1
PCOL:6080	Pharmacology Seminar	1
PCOL:6090	Graduate Research in Pharmacology	arr.
MPB:5153	Graduate Physiology	4

First Year, Spring

Code	Title	Hours
PCOL:5130	Fundamentals of Pharmacology	3
PCOL:6015	Topics in Pharmacology and Neuroscience	1
PCOL:6080	Pharmacology Seminar	1
PCOL:6090	Graduate Research in Pharmacology	arr.

PCOL:6210	Receptors and Cell Signaling	3
PCOL:6250	Advanced Problem Solving in Pharmacological Sciences	1

Second Year, Fall

Code	Title	Hours
BMED:7270	Scholarly Integrity/Responsible Conduct of Research I	0
PCOL:6015	Topics in Pharmacology and Neuroscience	1
PCOL:6080	Pharmacology Seminar	1
PCOL:6090	Graduate Research in Pharmacology	arr.
PCOL:6203	Pharmacology for Graduate Students	6

Second Year, Spring

BMED:7271	Scholarly Integrity/Responsible Conduct of Research II	0
PCOL:6015	Topics in Pharmacology and Neuroscience	1
PCOL:6080	Pharmacology Seminar	1
PCOL:6090	Graduate Research in Pharmacology	arr.

Additional Requirements

Laboratory Rotations

Newly admitted students complete three 12-week laboratory rotations by the end of the second semester.

Seminar and Journal Clubs

During each semester, all registered students enroll in PCOL:6080 Pharmacology Seminar and PCOL:6015 Topics in Pharmacology and Neuroscience.

Comprehensive Examination

The comprehensive examination process normally begins during the fourth semester and is completed during the fifth semester in the program. The exam consists of writing and defending a research proposal in an area not directly related to work being conducted by the student or in the laboratory of the student's mentor(s). During the oral defense, the Comprehensive Exam Committee may pose questions related to the written proposal and also may ask questions to determine whether the student has broad knowledge in the pharmacological sciences.

Publication

A first-authored manuscript derived from a student's thesis research must be accepted for publication before the Ph.D. degree is granted.

Final Examination

The final oral examination is a defense of the thesis and is conducted by the Thesis Committee, typically immediately after a thesis seminar.

Combined Programs

Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in biomedical science (pharmacology subprogram) in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1711] (Carver College of Medicine) in the Catalog.

Center for the Book

Director

- Matthew P. Brown (English)

Director, Graduate Studies

- Julia A. Leonard (Interdisciplinary Programs)

Graduate degree: M.F.A. in book arts

Graduate certificate: book studies/book arts and technologies

Faculty: <https://book.grad.uiowa.edu/faculty-and-staff/instructors>

Website: <https://book.grad.uiowa.edu>

The University of Iowa Center for the Book represents a community of faculty, staff, students, and local book specialists with interests in all facets of book production, distribution, and use. Some members of the center actively research the history and circulation of the book, examining the role of books in cultural and historical processes. They also look at how changes in book production affect the way books are viewed as artifacts. Specialists in book arts and technologies study the history and technique of book crafts, including letterpress printing, typography, calligraphy, papermaking, and bookbinding. Others engage in the conservation or production of books, including artists' books and literary fine press publications.

The center offers classes; sponsors lectures, seminars, and workshops; and encourages the exchange of ideas among individuals with interests in the book. A wide range of perspectives on the book as an aesthetic, cultural, and historical artifact is provided by associated faculty, staff, and graduate students in the Schools of Art and Art History and Library and Information Science; the Departments of History and English; University of Iowa Libraries; the Creative Writing Program (Iowa Writers' Workshop); and other areas. This interdisciplinary membership and the center's facilities combine to provide an exceptional environment for studying the history of the book, its evolution, and its future.

Graduate students may earn a master's degree or a graduate certificate through the center. Undergraduate students may add dimension to their majors in English, art, journalism, history, and other disciplines by taking Center for the Book courses in book arts and book studies. They also may include an emphasis on book arts or on cultural and historical aspects of the book in the interdepartmental studies major.

Courses

Center for the Book Courses

UICB:2100 Creative Writing for Book Arts 3 s.h.

Creative writing in context of book arts; text and image, typography, visual sequence, graphic narrative; zines, chapbooks, broadsides, and artist's books.

UICB:2110 Introduction to Book Arts 3 s.h.

Topics related to artist books, hand bookbinding, letterpress printing, papermaking, and lettering arts. GE: Engineering Be Creative. Same as BKAT:2110.

UICB:2600 Graphic Design II 3 s.h.

Fundamentals of typography as a core element in visual communication; introduction to historical typographic practices as well as modern modes of designing with type. Prerequisites: ARTS:1510 and ARTS:1520. Corequisites: DSGN:2500. Same as DSGN:2600.

UICB:2900 Book Design for Publishing 3 s.h.

Introduction to the major aspects of book design, including typography, layout, standard industry software, discussion of trends in the field. Same as ARTS:2900, ENGL:2900, WRIT:2900.

UICB:3140 Literature and the Book 3 s.h.

English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: Varies by semester. Same as ENGL:3140.

UICB:3142 Topics in Book History 3 s.h.

Authorship, publishing, and so forth within specific historical and cultural contexts. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: Varies by semester. Same as ENGL:3142.

UICB:3280 Elements of Book Art 3 s.h.

Overview of book art process and techniques for nonmajors; introduction to traditional bookbinding skills, nontraditional book structures, and content development for artist books. GE: Engineering Be Creative. Same as BKAT:3280.

UICB:3380 Elements of Letterpress 3 s.h.

Introduction to letterpress printing; metal type, relief printing, page layout, and basic typography; basic use of Vandercook Proof Press; experimentation with diverse letterpress techniques; for non-book art majors. GE: Engineering Be Creative. Same as BKAT:3380.

UICB:3900 Special Project for Undergraduates arr.

Independent study.

UICB:3980 American Print Culture 3 s.h.

Exploration of a wide range of imagery printed and published in the United States during 19th century (1776-1900); fine art original prints, popular imagery in periodicals and illustrated books, scholarly literature, history of evolving technologies, variety of printed work; shifting reputation of printed art and its makers. Same as ARTH:3980.

UICB:4100 Paperworks 3 s.h.

Conceptual and methodological approaches to 2-D and 3-D paper works; creation of works that couple unique properties of paper-pulp medium with personal visual ideas and clarity of intent; contemporary issues in paper pulp, medium's relationship to larger art and craft contexts. GE: Engineering Be Creative. Same as BKAT:4100.

- UICB:4150 Introduction to Book Studies** 3 s.h.
Theory and practice of book studies; meanings of word and image in the book format; comparative study of other media, applied study of the codex as physical artifact. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: Varies by semester. Same as ENGL:4150, SLIS:4150.
- UICB:4205 Bookbinding I: Materials and Techniques** 3 s.h.
Hands-on introduction to materials and techniques commonly used in bookbinding. Same as BKAT:4205.
- UICB:4210 Boxes and Enclosures** 3 s.h.
Hands-on techniques for a variety of book enclosures; appropriateness, aesthetic issues concerning box design; Japanese wraparound case, drop-spine box, hinged and lidded boxes, slipcase; technical skill development. Prerequisites: UICB:4205. Same as BKAT:4210.
- UICB:4270 Bookbinding II** 3 s.h.
Builds on skills acquired in UICB:4205; projects to complete six bindings based on historical and contemporary models; sewing styles, board attachments, endband types; nonadhesive and case-bound structures, varied materials and binding styles, their effects on structure, aesthetic considerations, further development of solid binding skills; historical development of particular binding practices. Prerequisites: UICB:4205. Same as BKAT:4270.
- UICB:4280 Artists' Books** 3 s.h.
Exploration of the book as a form for artistic expression; emphasis on conceptual development; relationship between content, form, and structure; how a book's structure and design can enhance and integrate part of the work's meaning. Prerequisites: UICB:4205 or BKAT:4205. Same as BKAT:4280.
- UICB:4290 Historical Book Structures** 3 s.h.
Historical development of book structures examined through surviving examples, construction of historical models. Prerequisites: UICB:4205.
- UICB:4300 Letterpress I** 3 s.h.
Mechanics of letterpress printing, typography, and design as applied to hand set metal type and edition printing; printing on a Vandercook proof press; introduction to photopolymer plates and methods of illustration related to edition printing, historical aspects of printing technology, typesetting, type classification; role of letterpress in modern private press and contemporary artist books. Same as ARTS:4300.
- UICB:4340 Digital Design for Artists' Books** 3 s.h.
Introduction to concepts, techniques, and technologies used to design and produce artists' books with personal computers and graphic design software. GE: Engineering Be Creative. Same as ARTS:4340.
- UICB:4380 Letterpress II** 3 s.h.
Builds on skills acquired in UICB:4300; students produce an editioned letterpress printed chapbook or artist book, a poster for a public event, and an image built from metal type; exploration of hand-set metal, digital typesetting, printing from photopolymer plates, and pressure printing; press mechanics and operation; publication philosophies, manuscript acquisition, and topics specific to literary fine press and artist books; historical and contemporary context for literary fine press publications and artist book work. Prerequisites: UICB:4300. Same as ARTS:4380.
- UICB:4390 Book and Publication Design** 3 s.h.
Students plan, design, and produce a book using Adobe Creative Suite; page layout software, typography, page layout and design, book formatting, handling of image files, preparation of materials for print and other contemporary book media; history of book design, book design in contemporary publishing; visit to University of Iowa Libraries Special Collections. Prerequisites: DSGN:2600 or UICB:4300. Same as ARTS:4390.
- UICB:4400 History of Western Letterforms** 3 s.h.
History of Western letterforms, with focus on tools, materials, techniques; the major hands, their place in history, their influence on modern times; creation of letterforms using appropriate tools; hands-on approach with emphasis on understanding rather than mastery. Same as ARTS:4400.
- UICB:4415 Calligraphy I: Foundational Hands** 3 s.h.
Hands-on instruction in italic and pressure pen scripts; historical relationships, effects on modern letterforms. GE: Engineering Be Creative. Same as ARTS:4415.
- UICB:4420 Calligraphy I: Blackletter Hands** 3 s.h.
Explores some of the many calligraphic forms known collectively as blackletter hands (medieval introduction to calligraphy); study of various hands from the heavily vertical Textura to the floridly expressive Gothic Cursive, and the distinctive connotations these unique letterform carry; emphasis on exploring the creative process while refining calligraphic skills and understanding the historical and social connections this hand has with other disciplines.
- UICB:4490 Advanced Studies in Letter Arts** 3 s.h.
Special topics and advanced projects in calligraphy and letter arts. Prerequisites: UICB:4400 or UICB:4415 or UICB:4420. Same as ARTS:4490.
- UICB:4910 The Book in the Middle Ages** 3 s.h.
Relation of text, decoration, function, creators, and audience in different genres of medieval manuscript books 400-1500 A.D. Same as HIST:4910, SLIS:4910.
- UICB:4920 The Transition from Manuscript to Print** 3 s.h.
History of the book and communication in Europe 1400-1800; production, distribution, and use of texts in cultural context. Same as HIST:4920, SLIS:4920.
- UICB:4930 Topics in Material Analysis** 3 s.h.
Analysis and description of physical book artifacts and their component parts (parchment, paper, bookbinding) and allied specialties (the lettering arts, printing and illustration techniques); reading, writing, presentations. Same as HIST:4430.
- UICB:5110 Islamic/Asian Papermaking History and Technique** 3 s.h.
History, technique, and aesthetics of traditional Islamic and Asian hand papermaking. Same as BKAT:5110.
- UICB:5130 European Papermaking History and Technique** 3 s.h.
History and technique of traditional European hand papermaking and related aesthetics; students gain confidence in pursuing independent production of handmade papers or undertaking related research in their own particular areas of interest; fiber preparation, sheet forming, and drying/finishing methods; concurrent readings and discussions of related history and aesthetics; special projects selected by student with instructor approval. Same as BKAT:5120.
- UICB:5160 Studies in Papermaking** arr.
Topics in the history and technique of papermaking. Prerequisites: UICB:4100 or UICB:5110 or UICB:5130.

- UICB:5170 Advanced Papermaking Production 3 s.h.**
Independent Western- or Japanese-style projects undertaken at UICB Research and Production Paper Facility at Oakdale Campus under faculty guidance; plan, implement, and evaluate professional scale production runs using full-scale equipment. Prerequisites: UICB:5110 or UICB:5130 or BKAT:5110 or BKAT:5120. Same as BKAT:5170.
- UICB:5180 Advanced Projects in Paper 1-3 s.h.**
Advanced independent projects undertaken in a classroom setting; collaborative group discussions to plan, implement, troubleshoot, and evaluate student projects. Prerequisites: UICB:5110 or UICB:5130 or BKAT:5110 or BKAT:5120. Same as BKAT:5180.
- UICB:5210 Bookbinding III 3 s.h.**
Bookbinding structures based on historical and contemporary models; differences in various binding practices, how these differences affect function, why the styles developed; experience choosing appropriate structures for particular uses; emphasis on fine tuning skills and techniques required for advanced binding practices; sewn endbands, rounding and backing, sewing on varied supports, board attachments, and covering methods. Prerequisites: (UICB:4205 or BKAT:4205) and (UICB:4270 or BKAT:4270). Requirements: for UICB:5210—UICB:4205 and UICB:4270; for BKAT:5210—BKAT:4205 or BKAT:4270 or UICB:4205 or UICB:4270. Same as BKAT:5210.
- UICB:5220 Book Conservation 3 s.h.**
Practical methods, materials assessment, conservation history and evolution. Prerequisites: UICB:4270. Same as SLIS:5535.
- UICB:5260 Studies in Bookbinding 3 s.h.**
Topics related to hand bookbinding. Same as BKAT:5260.
- UICB:5280 Bookbinding IV 3 s.h.**
Advanced studies in bookbinding; fine binding styles, leather paring and tooling, advanced finishing techniques, refining skills; continued look at differences in regional binding practices, how these differences affect function, and why particular styles developed. Prerequisites: UICB:5210.
- UICB:5330 Letterpress III: Imagemaking arr.**
Advanced work in alternative and innovative letterpress technologies as they apply to imagemaking processes for fine press printing; topics include pressure printing, photopolymer from nondigital negatives, explorations of type-high surfaces, monoprints on the Vandercook, and applying hand work to editioned prints; students complete a series of print exercises for each process, a small printed book sketch, and a longer format editioned artist book. Prerequisites: UICB:4380. Same as ARTS:5330.
- UICB:5340 Letterpress III: The Handprinted Book 3 s.h.**
Advanced work in fine press book design; exploration of problems in hand-printing books, choice of manuscript, editing, design, typesetting, proofreading, printing and binding; histories of printing and of the book, emphasis on 20th- and 21st-century book design and literature; issues of book design and production related to letterpress printing. Prerequisites: UICB:4380. Same as ARTS:5340.
- UICB:5370 Studies in Printing 1-3 s.h.**
Development of individual book projects and production of one substantial project or several smaller ones; focus on acquiring or creating a text and/or other content; project development; range of print techniques available in letterpress printing; issues involved in producing editioned artist books or fine press work; opportunity to expand on existing printing; classroom setting used to augment work sessions with in-progress critiques, readings, and visits to special collections.
- UICB:5380 Letterpress IV: Advanced Projects 3 s.h.**
Development and/or production of one substantial project; focus on acquiring or creating a text and/or other content; project development; range of print techniques available in letterpress printing; issues involved in producing editioned artist books or fine press work; opportunity to expand existing printing; classroom setting augments work sessions with in-progress critiques, readings, and visits to special collections. Prerequisites: UICB:5330 or UICB:5340.
- UICB:5520 Studies in Book History and Technologies 0-3 s.h.**
Topics related to production, distribution, and consumption of books through history and into the future. Same as SLIS:5520.
- UICB:5530 Topics in Preservation 3 s.h.**
Care, conservation, and preservation of cultural heritage artifacts; readings, discussion, hands-on sessions. Same as SLIS:5530.
- UICB:5540 Topics in Book Arts 1-3 s.h.**
Focus on particular techniques and concepts in the book arts and related fields.
- UICB:5550 Special Project for Graduate Students arr.**
Independent study.
- UICB:5600 History of Readers and Reading 3 s.h.**
Cultural nature of reading practices in historic and contemporary contexts; print and digital culture; reading communities; examples of recent scholarship; use of primary resources; seminar. Same as SLIS:5600.
- UICB:6100 Book Studies Proseminar 1-3 s.h.**
- UICB:6370 Topics in Book Studies 3 s.h.**
Topics relevant to book studies and special collections. Same as SLIS:6370.
- UICB:6510 Book Art Seminar: History, Practice, and Critique 3 s.h.**
Art-historical introduction to book arts (printing, bookbinding, papermaking and paperworks, artist bookwork, lettering arts, literary fine press and fine press artist books); influences and origins, contemporary practice, critical considerations; locating field through lenses of fine art, craft, and book history; weekly readings, observational analyses, hands-on exercises; archival research in the University of Iowa Libraries Special Collections; final research, analytical, and/or critical project.
- UICB:6520 Graduate Book Arts Workshop 3 s.h.**
Development of artwork and studio practice; readings and research in contemporary theory and practice; analysis of visual language; integration of creative activities and critical thinking in student's own art practice and analysis of contemporary work in book arts; group and individual critiques, studio assignments, presentations, discussions.
- UICB:6540 M.F.A. Thesis Hours arr.**

Book Arts, M.F.A.

Graduate study of the book is interdisciplinary. It focuses on book arts as hands-on practice as well as a historical and cultural phenomenon. Its principal objectives are to provide scholarly and aesthetic contexts for the study of book history, arts, and technologies; and to offer a structured program in book-related disciplines for graduate students with a serious interest in book studies.

Requirements

The Master of Fine Arts program in book arts requires a minimum of 60 s.h. of graduate credit, including a thesis. Students complete core courses and work with a faculty advisor to design an individualized curriculum spanning several studio practice disciplines: artist book work, bookbinding, lettering arts, digital book work, papermaking, or letterpress printing. The degree culminates with the successful completion of a thesis.

The program requires the following coursework.

Studio Requirements

Courses from the areas below should be selected in consultation with an advisor.

Required Core Electives

Code	Title	Hours
Three of these (9 s.h.):		
UICB:4205/ BKAT:4205	Bookbinding I: Materials and Techniques	3
UICB:4300/ ARTS:4300	Letterpress I	3
UICB:4400/ ARTS:4400	History of Western Letterforms	3
UICB:4415/ ARTS:4415	Calligraphy I: Foundational Hands	3
UICB:5110/ BKAT:5110	Islamic/Asian Papermaking History and Technique	3
UICB:5130/ BKAT:5120	European Papermaking History and Technique	3

Graduate Book Arts Workshop

Code	Title	Hours
UICB:6520	Graduate Book Arts Workshop (must be taken three times for a total of 9 s.h.)	9

Book Art Seminar

Code	Title	Hours
This course:		
UICB:6510	Book Art Seminar: History, Practice, and Critique	3

Studio Practice Electives

Code	Title	Hours
Studio practice courses		15

Scholarly Inquiry Requirement

Code	Title	Hours
Two of the following, or students may request to use related courses approved by the head of the scholarly inquiry area (6 s.h.):		
UICB:3140/ ENGL:3140	Literature and the Book	3
UICB:3142/ ENGL:3142	Topics in Book History	3
UICB:3980/ ARTH:3980	American Print Culture	3
UICB:4150/ ENGL:4150/ SLIS:4150	Introduction to Book Studies	3
UICB:4910/ HIST:4910/ SLIS:4910	The Book in the Middle Ages	3
UICB:4920/ HIST:4920/ SLIS:4920	The Transition from Manuscript to Print	3
UICB:5600/ SLIS:5600	History of Readers and Reading	3
UICB:6100	Book Studies Proseminar	3

Material Analysis Requirement

Code	Title	Hours
This course:		
UICB:4930/ HIST:4430	Topics in Material Analysis	3

Additional Electives

Code	Title	Hours
Elective courses (may include 0-6 s.h. of thesis credit; see below)		15

Thesis

Code	Title	Hours
Can be taken for a maximum of 6 s.h.:		
UICB:6540	M.F.A. Thesis Hours	arr.

Combined Programs

M.F.A./M.A. in Library and Information Science

The Center for the Book and the School of Library and Information Science offer a combined Master of Fine Arts in book arts/Master of Arts in library and information science. The combined degree program allows students with strong interests in the book arts, book history, and material book studies to also gain expertise in library and information science. The degrees provide book artists and librarians with credentials reflecting a depth of skills and knowledge that have been used to secure positions in special collections libraries and archives. Students in the combined program earn both degrees by completing fewer semester hours than if each degree was completed separately.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more

information, see the M.A. in library and information science [p. 1604] in the Catalog.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website. Visit Admissions on the Center for the Book website for more information.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Book Arts, M.F.A.

- Choose three courses for a total of 9 s.h. from UICB:4205, UICB:4300, UICB:4400, UICB:4415, UICB:5110, UICB:5130
- Complete a total of 15 s.h. of Studio Practice Elective courses. Work with academic advisor to determine appropriate graduate course and sequence; see General Catalog and department website for specifics.
- Choose two courses for a total of 6 s.h. from UICB:3140, UICB:3142, UICB:3980, UICB:4150, UICB:4910, UICB:4920, UICB:5600, UICB:6100
- Complete a total of 6 s.h. of Scholarly Inquiry courses. Work with academic advisor to determine two appropriate graduate courses and sequence from a select list OR related coursework approved by the head of the scholarly inquiry area: see General Catalog and department website for specifics.
- Must be taken three times for a total of 9 s.h.
- Complete a total of 15 s.h. of Additional Elective courses. Work with academic advisor to determine appropriate graduate coursework and sequence; see General Catalog and department website for specifics. Up to 6 s.h. allowed for thesis credit.
- Hours may be required for this Additional Elective if fewer than 6 s.h. of thesis credits are completed.
- Maximum of 6 s.h. of thesis credit allowed.

Book Studies/Book Arts and Technologies, Graduate Certificate

Requirements

The graduate Certificate in Book Studies/Book Arts and Technologies requires 18 s.h. of graduate credit and is designed to be completed in one year. The program is open to students who are enrolled in a graduate degree program at the University of Iowa as well as to students enrolled in the Graduate College with nondegree status.

The program requires the following coursework. Students should consult their advisor concerning course choices.

Code	Title	Hours
A studio practice course		3
A scholarly inquiry course		3
Electives		12
Total Hours		18

Certificate and Degree Opportunities

Separate application to each program is required.

Certificate/M.A. in Library and Information Science

The Center for the Book and the School of Library and Information Science enable students to earn the Certificate in Book Studies/Book Arts and Technologies and a M.A. in library and information science [p. 1604]. Admission deadline is February 1 for the following fall.

The programs offer multiple pathways into professional engagement with artifacts, such as rare and artist books, available in archives and libraries. Students select courses that enable them to gain skills and knowledge in areas of service such as conservation, cataloging, instruction, and outreach. Completion of the two programs requires 51 s.h. of credit. Students must take at least 27 s.h. of library and information science courses and 15 s.h. of book arts, studies, and technologies courses. The remaining 9 s.h. may be taken in either School of Library and Information Science (prefix SLIS) or Center for the Book (prefix UICB) courses or from another unit, with approval of the School of Library and Information Science.

Certificate/M.F.A. in Art

The Center for the Book and the School of Art and Art History enable students to earn the Certificate in Book Studies/Book Arts and Technologies and a M.F.A. in art [p. 136]. Students may wish to earn the M.F.A. in a studio art area (printmaking, drawing and painting, design, etc.) in combination with the 18 s.h. certificate in book studies/book arts and technologies. If accepted to both programs, students are advised and matriculate through both programs independently. Most, if not all, of the 18 s.h. of elective coursework required for the M.F.A. may be applied toward the Center for the Book certificate. It is possible for a student to earn both credentials in the same amount of time required to earn the M.F.A.

Admissions advisors in both areas of study assist interested students in discerning whether the Center for the Book M.F.A. in book arts or the School of Art and Art History M.F.A. in art and the certificate option is most appropriate to a student's background and career goals. In large part, this is determined by the degree to which books and book arts are central to the applicant's chosen path.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website. Visit Admissions on the Center for the Book website for more information.

Cognitive Science of Language

Chair, Psychological and Brain Sciences

- Mark S. Blumberg

Coordinator, Cognitive Science of Language

- Robert M. McMurray (Psychological and Brain Sciences)

Graduate certificate: cognitive science of language

Faculty: <https://cogscilang.grad.uiowa.edu/people>

Website: <https://cogscilang.grad.uiowa.edu>

The scientific study of language is larger than any one field, due in part to the broad diversity in forms and uses of language. The Cognitive Science of Language Program uses an interdisciplinary approach to the study of language, helping to prepare language scientists who are conversant in multiple domains.

Programs

Graduate Program of Study Certificate

- Certificate in Cognitive Science of Language [p. 1572]

Cognitive Science of Language, Graduate Certificate

Requirements

The graduate Certificate in Cognitive Science of Language requires a minimum of 12-15 s.h. of graduate credit. Designed to complement doctoral study, the certificate program is open to University of Iowa Ph.D. students in linguistics, neuroscience, psychology, and speech and hearing science. Ph.D. students in other disciplines may petition to be permitted to earn the certificate. Students must complete a formal application to enter the certificate program; they should contact the program's coordinator before they apply.

The certificate program ensures that students have training in interdisciplinary approaches to the study of language along with a strong theoretical grounding in their Ph.D. discipline. Certificate students work with their Ph.D. advisor and the certificate program's coordinator to develop an individual plan of study that complements the degree program and career interests of all students. In order to be granted the Certificate in Cognitive Science of Language, students must complete all of the requirements of their Ph.D. program as well as all of the certificate requirements.

Certificate students must participate in the cognitive science of language proseminar, a two-semester (6 s.h.) survey course on the five major disciplines within the language sciences—psychology, formal linguistics, neuroscience, communication disorders, and computational approaches. They also must complete three courses on cognitive science or language outside their field of study. Students can choose from the approved courses in the lists below, or they can petition the program for other courses. Students may enroll in the proseminar and three additional courses before or concurrently with other courses in their programs.

Students must include a faculty member from the Cognitive Sciences of Language Program on their Ph.D. comprehensive and dissertation exam committees.

The Certificate in Cognitive Science of Language requires the following coursework.

Code	Title	Hours
	Proseminar	6
	Disciplinary Courses	6-9
	Total Hours	12-15

Proseminar

Code	Title	Hours
Both of these:		
PSY:6101/ CSD:6101/ LING:6101	Cognitive Science of Language Proseminar I	3
PSY:6102/ CSD:6102/ LING:6102	Cognitive Science of Language Proseminar II	3

Disciplinary Courses

Students take a total of three courses chosen from the following lists (6-9 s.h.).

Communication Sciences and Disorders

Code	Title	Hours
CSD:3116/ LING:3116	Basic Neuroscience for Speech and Hearing	3
CSD:3118/ LING:3118	Language Acquisition	1-3
CSD:3122	Speech Production: Anatomy and Physiology	4
CSD:4145	Developmental Language Disorders	3
CSD:5146	Neurogenic Disorders of Language	3
CSD:5206	Language Disorders: Birth to Five Years	3
CSD:5222	Gross Anatomy of Speech/Voice Production	2
CSD:5233	Aphasia	2
CSD:5256	Anatomy and Physiology of Hearing	3-4
CSD:5282	Phonological Development and Disorders	2
CSD:6230	Psychoacoustics	2
CSD:6538	Seminar: Hearing Science	1

Linguistics

Introduction to Syntax (LING:5010) has a corequisite, LING:5000 Proseminar: Morphosyntax, which does not count toward the certificate.

Code	Title	Hours
LING:3030	Child Language-Linguistic Perspectives	3
LING:4090	Practical Phonetics	3
LING:5010/ SLA:5010	Introduction to Syntax	3
LING:5020/ SLA:5020	Introduction to Phonology	3
LING:6050	Language Universals Linguistic Typology	3
LING:6080/ SLA:6452	Topics in Second Language Acquisition	3
LING:7090/ SLA:7404	Seminar: Problems in Linguistics	2-3

Neuroscience

Code	Title	Hours
NSCI:6240/ NEUR:6240	Topics in Cognitive Neuroscience	3

Psychological and Brain Sciences

Code	Title	Hours
PSY:3670/ LING:3670	Language Processes	3
PSY:7020	Seminar: Cognitive Neuroscience	0-2
PSY:7430	Seminar: Cognitive Development	0-3

PSY:7610 Seminar: Cognitive Psychology 2-3

Second Language Acquisition

Code	Title	Hours
SLA:6901/ ASIA:6901/ FREN:6901/ JPNS:6901/ SPAN:6901	Second Language Acquisition Research and Theory	3

Spanish and Portuguese

Code	Title	Hours
SPAN:4100/ SLA:4301	Introduction to Spanish Phonology	3
SPAN:4150/ SLA:4300	Introduction to Spanish Syntax	3
SPAN:6110/ SLA:6303	Spanish Phonology	3
SPAN:6120/ SLA:6304	Spanish Syntax	3
SPAN:6150/ SLA:6301	Topics in Spanish Language Acquisition	3

College Teaching

Director

- Mitchell J. Kelly (Psychological and Quantitative Foundations)

Graduate certificate: college teaching

Website: <https://education.uiowa.edu/services/office-graduate-teaching-excellence-ogte/graduate-certificate-college-teaching>

The certificate program in college teaching provides coursework and supervised experiences that prepare graduate students for careers in postsecondary education.

The Certificate in College Teaching is administered by the Graduate College.

Programs

Graduate Program of Study

Certificate

- Certificate in College Teaching [p. 1575]

College Teaching, Graduate Certificate

Requirements

The graduate Certificate in College Teaching requires a minimum of 12 s.h. of graduate credit. Previous teaching experience does not count toward certificate requirements. The certificate program is open to all University of Iowa students enrolled in a Ph.D. or other terminal degree program.

Students apply to the certificate program on the Office of Graduate Teaching Excellence (OGTE) website, under Graduate Certificate in College Teaching.

The Certificate in College Teaching requires the following coursework. Courses selected from the categories below can be completed in any order at any time.

Category 1

Category 1 coursework provides an overview of basic instructional issues and methods in college teaching. The work requires students to engage in discipline-specific thinking as they consider their own teaching situations.

Students choose two courses (minimum of 6 s.h. required) from the following.

Code	Title	Hours
Students must take at least one of these:		
EPID:7200	Teaching in Epidemiology	3
GRAD:7385/ EDTL:7385/ EPLS:7385/ PSQF:7385/ RCE:7385	Teaching and Learning in Higher Education	3
GRAD:6217/ PSQF:6217	Seminar in College Teaching	3
PSQF:6205	Design of Instruction	3
RHET:5352	Seminar: Topics in Teaching and Professional Development	3
SOC:7010	Teaching Sociology	3
Students may take one of these:		
PSQF:6211	Universal Design and Accessibility for Online Instruction	3
PSQF:6215	Web-Based Learning	3
PSQF:6216	Tools and Utilities for Online Teaching	3

Category 2

Category 2 requires students to complete practicum courses under the guidance of two different professors. Prior or current experience as a teaching assistant does not count toward this requirement.

Students enroll in one of the following courses twice, with each enrollment supervised by a different faculty member. Students earn a total of 3 s.h. for the two enrollments. They can enroll in two practicums with two different professors in the same semester or they can complete practicum experiences in separate semesters.

Code	Title	Hours
EDTL:7380	Practicum in College Teaching	1-3
EPLS:7380	Practicum in College Teaching	1-3
GRAD:7400	Practicum in College Teaching (faculty member must be outside the College of Education)	1-3
PSQF:7380	Practicum in College Teaching	1-3
RCE:7380	Internship in Teaching	1-3

Category 3

For Category 3, students develop a full portfolio that demonstrates their skills and competencies in teaching, research, and service. The portfolio requires sample syllabi, a statement of teaching philosophy, samples of assignments and student work, and reflective essays on critical issues in teaching in higher education. The portfolio artifacts are reviewed and evaluated by the course instructor.

Category 3 requires the following course.

Code	Title	Hours
EALL:7475	Ph.D. ePortfolio in College Teaching	3

Genetics

Chair

- Daniel F. Eberl (Biology)

Graduate degree: Ph.D. in genetics

Faculty: <https://genetics.grad.uiowa.edu/faculty-and-research/directory>

Website: <https://genetics.grad.uiowa.edu>

Prospective doctoral students in genetics should have a strong undergraduate background in science, including courses in general genetics, organic chemistry, biochemistry, introductory physics, and mathematics, as well as a strong commitment to genetic research and teaching. Students are able to make up deficiencies in a particular area during their first year of graduate study.

Programs

Graduate Program of Study

Major

- Doctor of Philosophy in Genetics [p. 1577]

Courses

Genetics Courses

GENE:4213 Bioinformatics **2,4 s.h.**

Overview of bioinformatics topics, including access to sequence data, pairwise and multiple sequence alignment algorithms, molecular phylogeny, microarray data analysis, protein analysis, proteomics and protein structure analysis; emphasis on each topic includes biological motivation, computational approach (practical and theoretical), and interpretation of output. Prerequisites: BIOC:3120 or MICR:3170 or BIOL:2512 or BIOC:3110. Recommendations: grade of B+ or higher in BIOL:2512 or BIOC:3120, or graduate standing. Same as BIOL:4213, IGPI:4213.

GENE:5173 Computational Genomics **3 s.h.**

Introduction to computational methods used in genome analysis and functional genomics; biological sequence analysis, sequence database search, microarray data analysis, biological network analysis; in-depth coverage of principal genome science challenges and recent solutions. Prerequisites: (BIOS:4120 or STAT:3510) and (CS:5110 or ENGR:1300). Recommendations: completion of BME:5320. Same as BIOL:5320, BME:5330, ECE:5220, IGPI:5330.

GENE:6150 Genetic Analysis of Biological Systems **3 s.h.**

Genetic techniques and approaches for analysis of biological processes; comparison of strengths, weaknesses of a variety of experimental systems.

GENE:6200 Special Topics in Genetics **1 s.h.**

Current research in a selected field of genetics; different topic each year. Companion to a genetics seminar series. Same as ACB:6200.

GENE:6210 Seminars in Genetics **1 s.h.**

Attendance at weekly forum and presentation of research data to foster oral communication, presentation skills, and collaboration.

GENE:6234 Basic Biostatistical Methods with Genetics Applications **1 s.h.**

Introduction to terminology, fundamental concepts, and methods of biostatistics as applied to genetic research; genetic investigation examples used to illustrate statistical approaches.

GENE:6280 Directed Study in Genetics **arr.**

GENE:7191 Human Molecular Genetics **3 s.h.**

Molecular genetic approaches to human disease; the human genome project, linkage analysis, candidate gene screening, special features of inbred populations, triplet repeat expansions, mitochondrial genetics, genetics of complex traits. Requirements: fundamental genetics and molecular biology.

GENE:7301 Graduate Research in Genetics **arr.**

Genetics, Ph.D.

Requirements

The Doctor of Philosophy program in genetics requires a minimum of 72 s.h. of graduate credit. The program is designed to promote collaborative investigation and intellectual interaction among students and faculty participants affiliated with several different departments.

Students who enroll in the Ph.D. program are encouraged to obtain a broad background in genetics, including molecular, population, and human genetics. Within this context, course requirements are flexible enough to permit students to tailor their formal coursework to their individual needs. All students are required to do some teaching as part of their development as future scientists and faculty members.

Students have the option to declare a Ph.D. emphasis in computational genetics.

All students enrolled in the program are required to take the following courses.

Code	Title	Hours
All of these:		
GENE:6150	Genetic Analysis of Biological Systems	3
GENE:6200	Special Topics in Genetics (seminar)	1
GENE:6210	Seminars in Genetics	1
GENE:6234	Basic Biostatistical Methods with Genetics Applications	1
BMED:5207	Principles of Molecular and Cellular Biology	3
One of these:		
GENE:7191	Human Molecular Genetics	3
BIOL:3172	Evolution	4
BIOL:4333	Genes and Development	3
All of these:		
BMED:7270	Scholarly Integrity/Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/Responsible Conduct of Research II	0
Elective coursework in molecular and microbial genetics, cell and development genetics, human genetics, or computational genetics		8
Seminar courses approved by the program		5

Even more important than formal coursework is the opportunity to do significant research in genetics. Research interests of the participating faculty include virtually all areas of genetics, ranging from bacteriophage genetics to human medical genetics. In each area of genetics, there is a group of faculty members who have closely related interests.

The University is also strong in several related disciplines, including microbial physiology, enzymology, virology, protein biochemistry, computational genetics, and developmental and cell biology, all of which contribute significantly to the overall training program.

In addition to completing research and coursework, students must pass a comprehensive examination, usually at the end of their second year in the program.

Associated Courses

Credit earned in the following courses may be counted toward the Ph.D. in genetics. Not all courses are offered every year.

Code	Title	Hours
GENE:4213	Bioinformatics	4
GENE:5173	Computational Genomics	3
GENE:7191	Human Molecular Genetics	3
BIOL:3172	Evolution	4
BIOL:3713	Molecular Genetics	4
BIOL:4333	Genes and Development	3
BME:5320	Bioinformatics Techniques	3
MICR:6268	Biology and Pathogenesis of Viruses	2
MMED:6215	Transcription and Multifunctional Regulation by RNA	1
MMED:6220	Mechanisms of Cellular Organization	3
MMED:6225	Growth Factor Receptor Signaling	1

Ph.D. and Dental Scientist Training Program

Ph.D. students in genetics who have earned a D.D.S. degree may be candidates for advanced training programs in dentistry. For information, contact the College of Dentistry.

Combined Programs

Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in genetics in a combined degree program offered by the Carver College of Medicine and the Graduate College. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1711] (Carver College of Medicine) in the Catalog.

Admission

Prospective students should have a strong undergraduate science background and a strong commitment to research in genetics. Previous coursework should include general genetics, biochemistry, organic chemistry, and introductory physics and mathematics. However, deficiencies can be rectified during the first year as a graduate student.

Students who want to apply online should view the Interdisciplinary Graduate Program in Genetics website. For additional information, see the program website.

Students generally begin graduate work in the fall semester.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Financial Support

All students receive a financial stipend of \$30,500 plus tuition for the 2020-21 academic year. Financial support comes from training grants, research assistantships, teaching assistantships, scholarships, individual research grants, or other departmental or college funds. All students are required to teach as part of their development as future scientists and faculty members.

See Financial Assistance on the Interdisciplinary Graduate Program in Genetics website and Finances on the Graduate Admissions website for more information.

Human Toxicology

Director

- Peter S. Thorne (Occupational and Environmental Health/Civil and Environmental Engineering)

Director, Graduate Studies

- Gabriele Ludewig (Occupational and Environmental Health)

Graduate degrees: M.S. in human toxicology; Ph.D. in human toxicology

Faculty: <https://toxicology.grad.uiowa.edu/faculty>

Website: <https://toxicology.grad.uiowa.edu>

Toxicology is the study of how biological, chemical, physical, and radiological agents affect living organisms and the ecosystem, and how to prevent or lessen the adverse effects of those agents. The Human Toxicology Program prepares toxicologists to identify and assess environmental exposures, identify mechanisms by which toxicants affect homeostasis or induce disease, identify interventions to prevent adverse effects, and estimate acceptable levels of exposure to protect public health.

The program is interdisciplinary, involving the Graduate College, the Carver College of Medicine, and the Colleges of Engineering, Liberal Arts and Sciences, Pharmacy, and Public Health.

The Human Toxicology Program is supported by the Graduate College and the Iowa Superfund Research Program. Human toxicology faculty members are supported by the Environmental Health Sciences Research Center, a National Institute of Environmental Health Center of Excellence.

Programs

Graduate Programs of Study

Majors

- Master of Science in Human Toxicology [p. 1580]
- Doctor of Philosophy in Human Toxicology [p. 1581]

Facilities

Training is conducted primarily in laboratories and teaching facilities of the departments and colleges of Human Toxicology Program faculty members. These are among the best-equipped laboratories on campus. Together with the University's central research facilities, they provide access to the most up-to-date research equipment and expertise.

Courses

Human Toxicology Courses

TOX:7171 Special Problems in Toxicology arr.
Didactic material that may include tutorial, seminar, or faculty-directed research work; or a special topic.

TOX:7173 Professional Development in Toxicology arr.
Presentations and discussion on professional development topics including toxicology research methods and analysis, grant writing, proposal development, oral presentation skills, networking, and creating a portfolio framework that can be used after graduation.

TOX:7180 Toxicology Research Seminar 0-1 s.h.
Contemporary research topics.

TOX:7201 Toxicology Research arr.
Research that constitutes part of the thesis.

TOX:7300 Thesis/Dissertation arr.
Thesis or dissertation research; seminar preparation.

Human Toxicology, M.S.

Requirements

The Master of Science program in human toxicology requires a minimum of 39 s.h. of graduate credit and a thesis. The program is designed for students who wish to pursue a master's degree as a second degree or through part-time study, particularly those who perform toxicologists' functions in their jobs and who need additional training.

Entering students should have backgrounds in the biological, engineering, and physical sciences and should have completed courses in introductory chemistry and biology, and organic chemistry.

After entering the program, students work with their mentor to choose an advisory committee, which meets at least once a semester to help them explore their research interests. The committee also provides consultation on coursework and research activities and serves as the committee for the final examination (thesis defense).

The Human Toxicology Program is flexible. Students work with their advisory committees to plan a course of study tailored to their individual interests and goals within the field of toxicology.

M.S. students with a major in human toxicology must successfully complete the following coursework as part of their course of study.

Code	Title	Hours
This course:		
OEH:6710	Human Toxicology and Risk Assessment	3
Or these three courses:		
PHAR:6501	Principles and Mechanisms of Chemical Toxicology	1
PHAR:6502	Toxic Agents and Concepts in Toxicology	1
PHAR:6503	Target-Organ Toxicity	1
And all of these:		
TOX:7173	Professional Development in Toxicology	arr.
TOX:7180	Toxicology Research Seminar (enrollment is required each semester)	0-1
BMED:7270	Scholarly Integrity/Responsible Conduct of Research I	0
OEH:6720	Advanced Toxicology	4

Upon successful completion of all requirements, including the thesis and its oral defense, students are awarded the Master of Science degree.

Admission

Prospective students may apply to the program via a centralized application system; see Admission Information on the Human Toxicology Program website.

Completed applications should be submitted by January 1; applications submitted after that date are reviewed as they are received and are considered for any remaining openings.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Human Toxicology, Ph.D.

Requirements

The Doctor of Philosophy program in human toxicology requires a minimum of 72 s.h. of graduate credit. The program is designed for students with backgrounds in the biological, engineering, and physical sciences. Entering students should have solid training in science, including courses in introductory chemistry and biology, and organic chemistry; knowledge of biochemistry and molecular biology also is useful. Students may remedy deficiencies by taking appropriate courses during their first year of graduate study.

Students begin the program with three two-month rotations in the laboratories of participating faculty members, in order to identify a mentor. After the first year, the mentor assumes financial responsibility for the student. With advice from the mentor, each student chooses an advisory committee, which meets at least once a semester to help the student explore the student's research interests. The committee also provides consultation on coursework and research activities and serves as the committee for the comprehensive examination and the final examination (dissertation defense).

The Human Toxicology Program is flexible. Students work with their advisory committees to plan a course of study tailored to their individual interests and goals within the field of toxicology.

Ph.D. students with a major in human toxicology must successfully complete the following coursework as part of their course of study.

Code	Title	Hours
This course:		
OEH:6710	Human Toxicology and Risk Assessment	3
Or these three courses:		
PHAR:6501	Principles and Mechanisms of Chemical Toxicology	1
PHAR:6502	Toxic Agents and Concepts in Toxicology	1
PHAR:6503	Target-Organ Toxicity	1
And all of these:		
TOX:7173	Professional Development in Toxicology	arr.
TOX:7180	Toxicology Research Seminar (enrollment is required each semester)	0-1
BMED:7270	Scholarly Integrity/Responsible Conduct of Research I (must be completed within first two years of graduate study)	0
OEH:6720	Advanced Toxicology	4

After successfully completing the comprehensive examination, usually at the end of the second year of graduate study, the student advances to Ph.D. candidacy. Students devote all of their time to dissertation research and writing. Upon successful completion of all requirements, including the dissertation and its oral defense, students are awarded the Doctor of Philosophy degree.

Combined Programs

Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in human toxicology in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1711] (Carver College of Medicine) in the Catalog.

Admission

Prospective students may apply to the program via a centralized application system; see Admission Information on the Human Toxicology Program website.

Completed applications are encouraged to be submitted by December 1, but applications after that date are given full consideration. Applications submitted after March 1 are reviewed when received and are considered for any remaining openings.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Financial Support

Doctoral students in human toxicology receive stipends and tuition support from University of Iowa sources, including internal fellowships and graduate research assistantships, and from non-University sources, such as training grants from the National Institutes of Health (NIH).

Immunology

Director

- Kevin L. Legge (Microbiology and Immunology/Pathology)

Graduate degree: Ph.D. in immunology

Faculty: <https://immuno.grad.uiowa.edu/people/faculty>

Website: <https://immuno.grad.uiowa.edu/>

The Immunology Program provides interdisciplinary training in the concepts and methodologies of basic and applied immunology. Faculty members are involved in a variety of research projects dealing with the immune system at all levels—structural, functional, cellular, biochemical, and molecular. Students take coursework in immunology and related disciplines and are directly involved in laboratory research throughout their study.

Programs

Graduate Program of Study

Major

- Doctor of Philosophy in Immunology [p. 1583]

Facilities

Training is conducted in laboratories and teaching facilities of the Carver College of Medicine Stead Family Department of Pediatrics and the Departments of Internal Medicine, Otolaryngology—Head and Neck Surgery, Pathology, Microbiology and Immunology, Pharmacology, and Urology; and the College of Public Health Department of Epidemiology. Faculty laboratories and central research core facilities provide students with access to state-of-the-art research equipment.

Courses

Immunology Courses

IMMU:2040 Summer Undergraduate IDGP Research **0 s.h.**

IMMU:6201 Graduate Immunology **3 s.h.**
Ontogeny, activation, and function of T lymphocytes and B lymphocytes; innate immune effector mechanisms; major histocompatibility complex; antigen presentation; thymocyte positive and negative selection; signaling of T lymphocytes, B lymphocytes; emphasis on experimental methods for analysis of these processes. Prerequisites: MICR:3147. Requirements: for IMMU:6201—college biology, general chemistry, and introductory immunology courses; for MICR:6201—courses in college biology, genetics, general chemistry, and introductory immunology. Recommendations: for IMMU:6201—courses in biochemistry and genetics; for MICR:6201—biochemistry course. Same as MICR:6201.

IMMU:6211 Immunology Seminar **1 s.h.**
Requirements: immunology graduate standing.

IMMU:6231 Research in Immunology **arr.**
Laboratory research. Requirements: immunology graduate standing.

IMMU:6241 Writing a Scientific Proposal **2 s.h.**
How to write a scientific proposal. Prerequisites: IMMU:6201. Requirements: enrollment in immunology graduate program.

IMMU:6247 Graduate Immunology and Human Disease **4 s.h.**

Important principles and key concepts in immunology with a focus on the involvement of the immune system in disease pathogenesis; overview of innate and adaptive immune systems and their functions at cellular and molecular levels; learning enhanced by case-based, small-group discussion and writing exercises. Same as MICR:6247.

IMMU:7221 Advanced Topics in Immunology **3 s.h.**
In-depth analysis of selected areas. Prerequisites: IMMU:6201 or MICR:6201. Same as MICR:7207.

Immunology, Ph.D.

Requirements

The Doctor of Philosophy in immunology requires 72 s.h. of graduate credit. The degree requires 72 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the degree. The program provides interdisciplinary training in the concepts and methodologies of basic and applied immunology.

They complete coursework in immunology and related disciplines, and are directly involved in laboratory research throughout their study. Immunology graduate courses are offered not only to teach students the current concepts and paradigms within the field, but to emphasize the scientific approaches and methods used to attain this understanding.

The Ph.D. with a major in immunology requires the following coursework.

Core Curriculum

Code	Title	Hours
IMMU:6201/ MICR:6201	Graduate Immunology	3
IMMU:6211	Immunology Seminar	1
IMMU:6247/ MICR:6247	Graduate Immunology and Human Disease	4
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
PCOL:5204	Basic Biostatistics and Experimental Design	1
Elective		3

Typical Curriculum

First Year, Fall

Code	Title	Hours
IMMU:6211	Immunology Seminar	1
IMMU:6247/ MICR:6247	Graduate Immunology and Human Disease	4
BMED:5207	Principles of Molecular and Cellular Biology	3
PCOL:5204	Basic Biostatistics and Experimental Design	1

First Year, Spring

Code	Title	Hours
IMMU:6201/ MICR:6201	Graduate Immunology	3
IMMU:6211	Immunology Seminar	1
Elective (optional)		1-3

Second Year, Fall

Code	Title	Hours
IMMU:6211	Immunology Seminar	1
IMMU:6241	Writing a Scientific Proposal	2
IMMU:7221/ MICR:7207	Advanced Topics in Immunology	3
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
Elective (optional)		1-3

Second Year, Spring

Code	Title	Hours
IMMU:6211	Immunology Seminar	1
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
Elective (optional)		1-3

Electives

The following are possible elective choices.

Code	Title	Hours
ACB:5218/ BIOL:5218/ MICR:5218	Microscopy for Biomedical Research	3
ACB:8121	General Histology for Dental Students	4
BIOC:7251	Introduction to Protein Structures	1
BIOC:7252	Enzymes, Carbohydrates, Nucleic Acids, and Bioenergetics	1
BIOC:7253	Metabolism I	1
BIOC:7254	Cellular Biochemistry	1
BIOC:7255	Metabolism II	1
BIOC:7256	Molecular Biology	1
BIOS:4120	Introduction to Biostatistics	3
MICR:6259	Graduate Bacteria and Human Disease	3
MICR:6260	Graduate Bacterial Physiology and Cell Biology	2
MICR:6267	Graduate Viruses and Human Disease	4
MICR:6268	Biology and Pathogenesis of Viruses	2
MICR:6270	Graduate Microbial Genetics	2
MMED:3310	Practical Data Science and Bioinformatics	3
MMED:6215	Transcription and Multifunctional Regulation by RNA	1
MMED:6220/ ACB:6220/ MPB:6220	Mechanisms of Cellular Organization	3
MMED:6225/ ACB:6225/ MPB:6225	Growth Factor Receptor Signaling	1
MMED:6226/ ACB:6226/ MPB:6226	Cell Cycle Control	1

MMED:6227/ ACB:6227/ MPB:6227	Cell Fate Decisions	1
PATH:5260	Translational Histopathology	3
PATH:5270/ IGPI:5270/ MMED:5270	Pathogenesis of Major Human Diseases	3
PCOL:6207	Ion Channel Pharmacology	1
PCOL:6208	G Proteins and G Protein- Coupled Receptors	1
PCOL:6209/ MPB:6209/ NSCI:6209	Steroid Receptor Signaling	1

Additional Requirements

Laboratory Rotations

Prior to selecting a laboratory for dissertation work, students are expected to perform three laboratory rotations, with each rotation lasting approximately 12 weeks in duration. During the first semester, students should become acquainted with the research interests of the faculty members in the immunology program. This learning process is facilitated by faculty presentations in IMMU:6211 Immunology Seminar during the fall semester. Students also are encouraged to meet with specific faculty to discuss their research programs. This enables students to make an informed decision about their laboratory rotations, with the guidance and approval of their advisor and the graduate studies committee.

At the latest, students should begin their first rotation within the first week of graduate study. Medical Science Training Program (MSTP) students and students with M.S. degrees that included a research-based dissertation may be excused from one rotation. Students having difficulty choosing a laboratory for dissertation work may perform a fourth rotation.

The rotations are graded either satisfactory or unsatisfactory. This grade is based upon a number of criteria including attendance and work habits. When not in classes or seminars, students are expected to spend the remaining portion of the day in the laboratory. Without a strong commitment to the rotation project, it is difficult to fulfill the purpose and aims of the rotation. A satisfactory grade is required in each of the laboratory rotations. If a satisfactory grade is not received in one of the rotations, an additional rotation is assigned. Failure to receive a satisfactory grade in the extra rotation results in the student being placed on academic probation. Following each rotation, an evaluation is given to each student by the faculty member and submitted to the graduate studies committee.

Teaching

Students complete a teaching requirement lasting one semester. A variety of courses are available in several departments, and the program leadership place students in courses based upon interest, expertise, and scheduling.

Publication Requirements

It is expected that the dissertation project be of sufficient breadth, depth, and novelty to result in first-author research publications in high quality peer-reviewed journals. A minimum of one peer-reviewed paper must be published or in press prior to the completion of the Ph.D. degree. In addition, a second publication, in which the student is a coauthor on a peer-reviewed article, a review, or book chapter must be published or in press prior to the completion of the

degree. Students are not permitted to schedule a dissertation defense until it has been demonstrated that both of these requirements have been met.

Comprehensive Examination

The comprehensive examination is generally taken in the spring semester of the second year of study. MSTP students or students entering the program with a M.S. degree may choose to take the examination in the fall semester of their second year.

Students taking the comprehensive examination prepare a single abstract of an original research proposal. The examination committee determines if the abstract topic is appropriate as nonoverlapping, and if the abstract is scientifically sound to potentially serve as the basis for a defensible research proposal. After the abstract is accepted, students are given four weeks to complete and submit the written comprehensive examination proposal. The oral defense is scheduled 10-14 days after the exam is submitted, depending on availability of the committee members. The comprehensive exam is written in the form of a NIH-style pilot grant proposal based on the abstract and instructions from the comprehensive examination. A detailed student handbook is available on the Immunology Program website.

Final Examination

The five members of the thesis committee serve as an advisory body for preparation of the thesis. The committee meets with each student to review the material that they expect to be incorporated into the thesis. Although meetings with the committee should be yearly, the candidate, thesis advisor, or the committee can request a meeting at any time. A final draft of the thesis must be given to all members of the committee two weeks before the final examination.

The final examination takes the form of a seminar presented to the program. This presentation is announced according to Graduate College policy. Questions, comments, and discussion follow. After the seminar, the candidate meets with the committee for the final thesis defense. In some cases revisions may be required. The degree is not awarded until the thesis is signed.

Combined Programs

Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in immunology in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1711] (Carver College of Medicine) in the Catalog.

Admission

For information regarding admission and application procedures, visit the Immunology Graduate Program website.

Applicants must meet the admission requirements of the Graduate College; see the **Manual of Rules and Regulations of the Graduate College** on the Graduate College website.

Financial Support

Tuition and fees are paid for, and students receive a competitive stipend as well as health and dental benefits. Continued support beyond the first year is guaranteed, provided that progress toward degree completion of requirements is satisfactory. Sources of support include departmental funds, training and research grants, and individual fellowships.

Informatics

Chair

- Juan Pablo Hourcade (Computer Science/Nursing)

Graduate degrees: M.S. in informatics; Ph.D. in informatics

Graduate certificate: informatics

Faculty: <https://informatics.uiowa.edu/about-us/people>

Website: <https://informatics.grad.uiowa.edu/>

The field of informatics springs from the intersection of computational disciplines related to the humanities, the arts, and the biological, health, natural, and social sciences. As the rapid development of information technology transforms the world of human pursuits, informatics offers ways to solve new problems and to examine existing problems from new perspectives.

The Informatics Program provides graduate students the opportunity to study informatics in the broadest sense. The program is interdisciplinary, involving the Graduate College, the Carver College of Medicine, the Tippie College of Business, and the Colleges of Dentistry, Engineering, Liberal Arts and Sciences, Nursing, Pharmacy, and Public Health.

The Master of Science and Doctor of Philosophy degrees in informatics, and the Certificate in Informatics, are offered in four subprograms: bioinformatics and computational biology, geoinformatics, health informatics, and information science.

Bioinformatics and computational biology are on the cutting edge intersecting basic life and biomedical science with high-performance computing and networking, mathematics, statistics, and engineering. They are strongly influenced and directed by the ongoing development of high-throughput data collection assays such as DNA sequencing, gene expression, and proteomics.

Geoinformatics provides methods and technologies needed to measure, store, analyze, manage, and visualize information about phenomena occurring on or near the earth's surface. It is an increasingly essential technology for understanding and managing the complex world.

Health informatics uses contemporary information technologies to improve the storage, organization, retrieval, and evaluation of health information in order to support clinical, clinical research, and public health applications.

Information science addresses the broad spectrum of data, information, and knowledge in seeking to identify and address recurring themes of representation, manipulation, retrieval, and comprehension. It draws from a diverse range of disciplines.

Programs

Graduate Programs of Study

Majors

- Master of Science in Informatics [p. 1592]
- Doctor of Philosophy in Informatics [p. 1594]

Certificate

- Certificate in Informatics [p. 1597]

Courses

Informatics Courses

IGPI:3010 Geographic Information Systems and Science 3 s.h.

Solid foundation and introduction to GIS and digital map making; what GIS is and how GIS can contribute to research, careers, and everyday life; fundamentals that underlie GIS, including methods for GIS data collection and georeferencing, spatial modeling, spatial data analysis, and visualization; GIS trends including mobile GIS and the Web. Same as GEOG:3010.

IGPI:3011 Identifying and Developing a Global Health Project 2-3 s.h.

Review of major components of global health related research process; preparation for a local or international project which addresses a global health issue in a systematic way. Same as GHS:3010.

IGPI:3050 Geospatial Programming 3 s.h.

Introduction to geospatial programming with Python; programming basics, data structures, and algorithms; spatial data models and structures; vector-based and raster-based geoprocessing; automating GIS tasks and models; spatial libraries (e.g., ArcPy, GeoPandas, GDAL, PySAL). Prerequisites: GEOG:1050. Same as GEOG:3050.

IGPI:3100 Introduction to Mathematical Statistics I 3 s.h.

Descriptive statistics, probability, conditional probability, discrete and continuous univariate and multivariate distributions, sampling distributions. Prerequisites: MATH:1860 or MATH:1560. Same as STAT:3100.

IGPI:3101 Introduction to Mathematical Statistics II 3 s.h.

Point and interval estimation, testing statistical hypotheses, simple regression, nonparametric methods. Prerequisites: STAT:3100. Same as STAT:3101.

IGPI:3120 Probability and Statistics 4 s.h.

Models, discrete and continuous random variables and their distributions, estimation of parameters, testing statistical hypotheses. Prerequisites: MATH:1560 or MATH:1860. Same as STAT:3120.

IGPI:3200 Applied Linear Regression 3 s.h.

Regression analysis with focus on applications; model formulation, checking, selection; interpretation and presentation of analysis results; simple and multiple linear regression; logistic regression; ANOVA; hands-on data analysis with computer software. Prerequisites: STAT:2020 or STAT:2010 or STAT:3120. Same as ISE:3760, STAT:3200.

IGPI:3314 Genomics 3 s.h.

Major areas of genomics, including DNA and protein sequence analysis, structural diversity of whole genomes, microarray applications, proteomics; computer workshop experience in applying bioinformatics tools. Prerequisites: BIOL:2512 or BIOC:3120 or BIOC:3110. Same as BIOL:3314.

IGPI:3330 Introduction to Software Design 3 s.h.

Design of software for engineering systems; algorithm design and structured programming; data structures; introduction to object-oriented programming in JAVA; applications to engineering problems; lab arranged. Prerequisites: ENGR:2730. Same as ECE:3330.

- IGPI:3500 Introduction to Environmental Remote Sensing** 3 s.h.
Basic concepts and principles of remote sensing; sources of data; georegistration; digital processing and classification of remotely sensed images for extraction of environmental information; linkage of remote sensing techniques with GIS analysis. Same as GEOG:3500.
- IGPI:3510 Biostatistics** 3 s.h.
Statistical concepts and methods for the biological sciences; descriptive statistics, elementary probability, sampling distributions, confidence intervals, parametric and nonparametric methods, one-way ANOVA, correlation and regression, categorical data. Requirements: MATH:0100 or MATH:1005 or ALEKS score of 30 or higher. Same as STAT:3510.
- IGPI:3520 GIS for Environmental Studies** 3 s.h.
Students learn new, more advanced techniques for the representation and study of human and natural systems using geographic information systems (GIS); application of this new knowledge to environmental management and problem solving. Prerequisites: GEOG:1050. Same as GEOG:3520.
- IGPI:3540 Introduction to Geographic Visualization** 3 s.h.
Introduction of basic concepts and techniques that underlie cartographic representation, interaction, and geovisualization; map symbolization and visual variables; spatiotemporal visualization, multivariate mapping, interactive cartography, animation, geovisual analytics, 3-D visualization, virtual and augmented reality. Prerequisites: GEOG:1050. Same as GEOG:3540.
- IGPI:4100 Mathematical Statistics I** 3 s.h.
Probability, conditional probability, random variables, distribution and density functions, joint and conditional distributions, various families of discrete and continuous distributions, mgf technique for sums, convergence in distribution, convergence in probability, central limit theorem. Prerequisites: MATH:2850 and MATH:2700. Same as STAT:4100.
- IGPI:4101 Mathematical Statistics II** 3 s.h.
Transformations, order statistics, point estimation, sufficient statistics, Rao-Blackwell Theorem, delta method, confidence intervals, likelihood ratio tests, applications. Prerequisites: STAT:4100. Same as STAT:4101.
- IGPI:4115 Finite Element I** 3 s.h.
One- and two-dimensional boundary value problems; heat flow, fluid flow, torsion of bars; trusses and frames; isoparametric mapping; higher order elements; elasticity problems; use of commercial software. Prerequisites: ENGR:2750. Same as CEE:4533.
- IGPI:4150 Health and Environment: GIS Applications** 3 s.h.
Introduction to how geographic information systems (GIS) and spatial statistics are used in the study of patterns of health and disease in space and time. Same as GEOG:4150, GHS:4150.
- IGPI:4159 Air Pollution Control Technology** 3 s.h.
Sources, environmental and health impacts, regulations, modeling of air pollution; processes and alternative strategies for control; global climate considerations. Same as CBE:4459, CEE:4159.
- IGPI:4200 Statistical Methods and Computing** 3 s.h.
Methods of data description and analysis using SAS; descriptive statistics, graphical presentation, estimation, hypothesis testing, sample size, power; emphasis on learning statistical methods and concepts through hands-on experience with real data. Recommendations: graduate standing in non-statistics or less quantitative major. Same as STAT:4200.
- IGPI:4213 Bioinformatics** 2,4 s.h.
Overview of bioinformatics topics, including access to sequence data, pairwise and multiple sequence alignment algorithms, molecular phylogeny, microarray data analysis, protein analysis, proteomics and protein structure analysis; emphasis on each topic includes biological motivation, computational approach (practical and theoretical), and interpretation of output. Prerequisites: BIOC:3120 or MICR:3170 or BIOL:2512 or BIOC:3110. Recommendations: grade of B+ or higher in BIOL:2512 or BIOC:3120, or graduate standing. Same as BIOL:4213, GENE:4213.
- IGPI:4220 Advanced Database Management and Big Data** 3 s.h.
Advanced database management topics; basics of semi-structured data and web services; how to retrieve real-world big data sets from web services; use of SQL and PL/SQL to analyze data in relational databases; big data related topics such as Hadoop and Hive. Prerequisites: MSCI:3200 or BAIS:3200. Same as BAIS:4220.
- IGPI:4373 Molecular Evolution: Genes, Genomes, and Organisms** 3 s.h.
Theory underlying phylogenetic analysis with application of these methods to molecular data sets; analysis of multigene data, organellar, and nuclear genome sequences to reconstruct the history of cells. Prerequisites: BIOL:3172 with a minimum grade of C-. Same as BIOL:4373.
- IGPI:4500 Applications in Environmental Remote Sensing** 4 s.h.
Theory and practice of remote sensing and digital image processing; practical applications to human-environment interactions. Recommendations: GEOG:3500 or EES:3110 or ENVS:3110. Same as GEOG:4500.
- IGPI:4520 GIS for Environmental Studies: Applications** 3 s.h.
Project-driven course to advance student knowledge of geographic information systems (GIS); application of GIS to environmental change analysis, environmental assessment, hazard/risk analysis, and environmental decision making. Prerequisites: GEOG:3520. Same as GEOG:4520.
- IGPI:4522 Bayesian Statistics** 3 s.h.
Bayesian statistical analysis, with focus on applications; Bayesian and frequentist methods compared; Bayesian model specification, choice of priors, computational methods; hands-on Bayesian data analysis using appropriate software; interpretation and presentation of analysis results. Prerequisites: STAT:3200 and (STAT:3101 or STAT:4101 or STAT:3120). Same as PSQF:4520, STAT:4520.

- IGPI:4540 Statistical Learning** **3 s.h.**
Introduction to supervised and unsupervised statistical learning, with a focus on regression, classification, and clustering; methods will be applied to real data using appropriate software; supervised learning topics include linear and nonlinear (e.g., logistic) regression, linear discriminant analysis, cross-validation, bootstrapping, model selection, and regularization methods (e.g., ridge and lasso); generalized additive and spline models, tree-based methods, random forests and boosting, and support-vector machines; unsupervised learning topics include principal components and clustering. Requirements: an introductory statistics course and a regression course. Recommendations: prior exposure to programming and/or software, such as R, SAS, and Matlab. Same as STAT:4540.
- IGPI:4580 Data Visualization and Data Technologies** **3 s.h.**
Introduction to common techniques for visualizing univariate and multivariate data, data summaries, and modeling results; how to create and interpret these visualizations and assess effectiveness of different visualizations based on an understanding of human perception and statistical thinking; data technologies for obtaining and preparing data for visualization and further analysis; students learn how to present results in written reports and use version control to manage their work. Requirements: an introductory statistics course and a regression course. Recommendations: prior exposure to basic use of statistical programming software (e.g., R or SAS) as obtained from a regression course strongly recommended. Same as STAT:4580.
- IGPI:4581 Introduction to Geographic Databases** **3 s.h.**
Introduction to basic building blocks of spatial database design, spatial data models, structures, relationships, queries (SQL), indexing, and geoprocessing; design and construction of various types of spatial databases, including relational and big data approaches such as ArcGIS geodatabase, PostGIS/PostgreSQL, and MongoDB. Prerequisites: GEOG:1050. Same as GEOG:4580.
- IGPI:4740 Large Data Analysis** **3 s.h.**
Current areas that deal with problem of big data; techniques from computer science, mathematics, statistics; high performance and parallel computing, matrix techniques, cluster analysis, visualization; variety of applications including Google PageRank, seismology, Netflix-type problems, weather forecasting; fusion of data with simulation; projects. Prerequisites: (CS:1210 with a minimum grade of C- or ENGR:2730 with a minimum grade of C-) and (MATH:3800 or CS:3700) and (STAT:3200 or ISE:3760 or IGPI:3200). Same as CS:4740, MATH:4740, STAT:4740.
- IGPI:5001 Introductory Methodology** **3-4 s.h.**
Introduction to quantitative techniques in political science; set theory, probability distributions, estimation, testing; emphasis on acquiring mathematical skills for more advanced quantitative work in political science. Requirements: M.A. or Ph.D. standing in political science. Same as POLI:5001.
- IGPI:5010 Research for Master's Thesis** **arr.**
Requirements: admission to M.S. program.
- IGPI:5015 Independent Study** **arr.**
- IGPI:5043 Special Libraries** **3 s.h.**
Management, organizational structures, collections, client services in special libraries; site visits to a variety of special libraries, information centers; projects that apply theoretical principles. Prerequisites: SLIS:5010. Corequisites: SLIS:5010, if not taken as a prerequisite. Same as SLIS:5043.
- IGPI:5055 Introduction to Geospatial Programming** **3 s.h.**
Introduction to geospatial programming with Python; programming basics, data structures, and algorithms; spatial data models and structures; vector- and raster-based geoprocessing; automating GIS tasks and models; spatial libraries (e.g., ArcPy, GeoPandas, GDAL, PySAL). Same as GEOG:5055.
- IGPI:5110 Introduction to Informatics** **3 s.h.**
Fundamentals of computer science: algorithms, complexity, relational databases, systems concepts, programming in Python. Same as CS:5110.
- IGPI:5120 Regression Modeling and ANOVA in the Health Sciences** **3 s.h.**
Continuation of BIOS:4120; correlation, simple and multiple linear regression, confounding, interactions, model selection, single and multiple factor ANOVA (analysis of variance) models, contrasts, multiple comparisons, nested and block designs, and an introduction to mixed models; designed for non-biostatistics majors. Offered spring semesters and summer sessions. Prerequisites: BIOS:4120. Same as BIOS:5120, STAT:5610.
- IGPI:5130 Applied Categorical Data Analysis** **3 s.h.**
Analysis of proportions, risk measures, and measures of association; Mantel-Haenszel method; logistic regression for binary responses and for matched data; logistic regression for multi-category responses; analysis of count data (Poisson regression and negative binomial regression); analysis of clustered data (generalized estimating equations and generalized linear mixed effects model); special topics include the application of propensity score methods; designed for non-biostatistics majors. Offered fall semesters. Prerequisites: BIOS:5120. Same as BIOS:5130.
- IGPI:5199 Applied Statistics I** **4 s.h.**
Descriptive statistics, basic inferential methods (confidence intervals, chi-square tests); linear models (regression and ANOVA models—specification and assumptions, fitting, diagnostics, selection, testing, interpretation); nonlinear models, logistic regression. Prerequisites: STAT:3101. Corequisites: STAT:4100 or STAT:5100. Requirements: facility with matrix algebra. Same as STAT:5200.
- IGPI:5200 Health Informatics** **3 s.h.**
Technological tools that support health care administration, management, and decision making. Same as HMP:5370, ISE:5860, MED:5300, SLIS:5900.
- IGPI:5203 User Education: Multimedia** **3 s.h.**
Develop multimedia projects for educational use in libraries; develop a portfolio of projects using multimedia technology; explore applications of multimedia for teaching and learning; explore and evaluate platforms for delivering multimedia in educational environments. Same as SLIS:5200.
- IGPI:5206 Medical Imaging Physics** **3 s.h.**
Physics and data acquisition techniques of major medical imaging modalities (X-ray, CT, MR, ultrasound, PET, SPECT); physical interactions of energy with living tissue; principles and methods for acquiring imaging data and subsequent image construction; how individual modalities influence image quality; MATLAB programming required. Second in a medical imaging sequence. Prerequisites: BME:2200 and BME:2210. Same as BME:5210, ECE:5470.

IGPI:5211 Genes, Genomes, and the Human Condition Graduate Lecture 3 s.h.

Organization, expression, and evolution of genes in context of genomes; focus on human genome; distribution and transmission of variation in human population. Recommendations: BIOL:1411 highly recommended. Same as BIOL:5211.

IGPI:5212 Biomedical Signal Processing 3 s.h.

Application of signal processing methods (e.g., Fourier, Laplace, z-transforms) to biomedical problems, such as analysis of cardiac signals, circadian rhythm, the breathing cycle; computer simulation lab. Same as BME:5200.

IGPI:5220 Principles of Public Health Informatics 3 s.h.

Systematic applications of information science, computer science, and technology to public health practice, research, and learning; methods of disease surveillance, data collection, analysis, and reporting with health informatics. Offered fall semesters. Same as EPID:5200.

IGPI:5251 Advanced Biosystems 3 s.h.

Biological systems unique to systems analysis; operation under nonequilibrium conditions; tools for systems analysis developed from models of systems at equilibrium (i.e., mechanical systems); fundamental difference between biological and mechanical systems that impact systems analysis; expand knowledge of linear systems and begin work with nonlinear systems; various modeling and analysis approaches useful in biomedical and biomedical engineering research. Prerequisites: BME:2200. Same as BME:5251.

IGPI:5270 Pathogenesis of Major Human Diseases 3 s.h.

Critical analysis of pathogenesis models in a series of major human diseases; clinical presentation, analysis of cellular and molecular events leading to the disease, discussion of key papers. Offered spring semesters of even years. Same as MMED:5270, PATH:5270.

IGPI:5310 Research Data Management 3 s.h.

Introduction to data management techniques and problems encountered in gathering and processing data from biomedical investigations; introduction to SAS, techniques taught in SAS; designed for non-biostatistics majors. Offered fall and spring semesters. Recommendations: prior programming experience with C, C++, Python, Java, or other. Same as BIOS:5310, STAT:5810.

IGPI:5311 Informatics for Sustainable Systems 3 s.h.

Introduction to fundamental and advanced environmental informatics concepts and procedures including automated data collection, data management, data transformations, and processing to support modeling and analysis; scientific visualization of environmental data to support management of food, energy, and water (FEW) resources; sustainability in FEW systems. Same as CEE:5310.

IGPI:5321 Bioinformatics Techniques 3 s.h.

Informatics tools and techniques applied to modern problems in biomedicine and basic life sciences; common tools, experience applying tools in contemporary problem settings; genomics and genetics, how to sequence a genome, transcription and expression, SNPs, Perl, BioPerl, Perl modules, Ensembl API, BLAST/BLAT, NCBI, UCSC, Ensembl Genome browsers, linkage, association, disease gene identification. Prerequisites: BIOL:1411 and (ENGR:2730 or CS:2110 or CS:5110). Same as BME:5320, ECE:5210.

IGPI:5330 Computational Genomics 3 s.h.

Introduction to computational methods used in genome analysis and functional genomics; biological sequence analysis, sequence database search, microarray data analysis, biological network analysis; in-depth coverage of principal genome science challenges and recent solutions. Prerequisites: (BIOS:4120 or STAT:3510) and (CS:5110 or ENGR:1300). Recommendations: completion of BME:5320. Same as BIOL:5320, BME:5330, ECE:5220, GENE:5173.

IGPI:5331 Graph Algorithms and Combinatorial Optimization 3 s.h.

Combinatorial optimization problems; time complexity; graph theory and algorithms; combinatorial optimization algorithms; complexity theory and NP-completeness; approximation algorithms; greedy algorithms and matroids. Prerequisites: ECE:3330. Same as ECE:5330.

IGPI:5400 Computing in Statistics 3 s.h.

R; database management; graphical techniques; importing graphics into word-processing documents (e.g., LaTeX); creating reports in LaTeX; SAS; simulation methods (Monte Carlo studies, bootstrap, etc.). Prerequisites: CS:1210 and STAT:3200 and (STAT:3120 or STAT:3101 or STAT:4101). Corequisites: STAT:5100 and STAT:5200 if not already completed. Same as STAT:5400.

IGPI:5415 Satellite Image Processing and Remote Sensing of Atmosphere 3 s.h.

Introduction to principles of atmospheric radiation and techniques for satellite image processing; hands-on experience with data calibration, image registration and enhancement, noise filtering and (supervised and unsupervised) multi-spectral classification of satellite imageries; various satellite sensors used for monitoring of different atmospheric processes and constituents. Same as CBE:5415.

IGPI:5417 Physical Meteorology and Atmospheric Radiative Transfer 3 s.h.

Physical processes for weather and climate including radiative transfer, cloud and precipitation formation, and atmospheric electricity; theory of scattering by atmospheric particles (e.g., clouds, aerosols, molecules), atmospheric radiative transfer equations, and numerical techniques and tools to solve these equations. Requirements: senior or graduate standing. Same as CBE:5417.

IGPI:5436 Electronic Structure and Informatics in Chemistry 3 s.h.

Basic principles of molecular electronic structure theory; molecular structure and reactivity; molecular orbital theory; density functional theory; introduction to informatics and data science; how calculations can be used to enhance experimental research projects. Recommendations: CHEM:4432. Same as CHEM:5436.

IGPI:5450 Machine Learning 3 s.h.

Mathematical foundations and practical techniques of pattern recognition; adaptation, learning, description; statistical pattern recognition; syntactic pattern recognition, neural networks for recognition; fuzzy logic for recognition; nonstandard and combined pattern recognition approaches. Prerequisites: ECE:2400 or BME:2200. Same as ECE:5450.

IGPI:5460 Digital Signal Processing 3 s.h.

Theory, techniques used in representing discrete-time signals; system concepts in frequency and sampling domains; FIR and IIR digital filter theory, design and realization techniques; theory, application of discrete Fourier transforms/FFT. Prerequisites: ECE:3400. Same as ECE:5460.

- IGPI:5480 Digital Image Processing** **3 s.h.**
Mathematical foundations and practical techniques for digital manipulation of images; image sampling, compression, enhancement, linear and nonlinear filtering and restoration; Fourier domain analysis; image pre-processing, edge detection, filtering; image segmentation. Prerequisites: ECE:2400 or BME:2200. Same as ECE:5480.
- IGPI:5510 Biostatistical Computing** **2 s.h.**
Introduction to computer programming using SAS and R statistical software packages; programming language syntax, constructs, procedures, and techniques for data management, data analysis, and statistical programming commonly encountered in biostatistics; designed for first-year biostatistics majors. Offered fall semesters. Corequisites: BIOS:5710. Same as BIOS:5510.
- IGPI:5540 Geographic Visualization** **3 s.h.**
Concepts and techniques that underlie cartographic representation, interaction, and geovisualization; map symbolization and visual variables; user-centered design, map use and usability engineering; web mapping, spatiotemporal visualization, multivariate mapping, interactive cartography, animation, geovisual analytics, 3-D visualization, virtual and augmented reality. Same as GEOG:5540.
- IGPI:5641 Computer-Based Control Systems** **3 s.h.**
Discrete and digital control systems; application of computers in control; sampling theorem; discrete time system models; analysis and design of discrete time systems; control design by state variable and input/output methods; advanced topics in digital controls; lab. Prerequisites: ECE:5600. Same as ECE:5640.
- IGPI:5710 Biostatistical Methods I** **4 s.h.**
Probability distributions, moments, estimation, parametric and nonparametric inference for one-sample and two-sample problems, analysis of frequency data; emphasis on use of computers; designed for first-year biostatistics majors. Offered fall semesters. Requirements: two semesters of calculus. Same as BIOS:5710.
- IGPI:5720 Biostatistical Methods II** **4 s.h.**
Continuation of BIOS:5710; multi-factor ANOVA (analysis of variance), multiple comparisons, orthogonal contrasts, linear regression and correlation, regression diagnostics and remedial measures, model selection, and mixed models; designed for first-year biostatistics majors. Offered spring semesters. Prerequisites: BIOS:5710. Requirements: one semester of linear algebra. Same as BIOS:5720.
- IGPI:5730 Biostatistical Methods in Categorical Data** **3 s.h.**
Estimation of proportions, rates, risks, relative risks, and odds ratios; Mantel-Haenszel method; logistic regression (including ordinal logistic regression and multi-category nominal logistic regression); Poisson regression and negative binomial regression; methods for correlated or clustered data (conditional logistic regression, generalized estimating equations, and mixed effects models); special topics include an introduction to generalized linear models and likelihood-based inferential techniques in this framework; designed for first-year biostatistics majors. Offered spring semesters. Prerequisites: BIOS:5510 and BIOS:5710. Corequisites: BIOS:5720. Same as BIOS:5730.
- IGPI:6100 Database Management** **3 s.h.**
Principles and practices of database design and management; discussion and practice cover database application lifecycle, data modeling, relational database design, SQL queries, reports and other interfaces to database data, documentation; individual and group projects. Prerequisites: SLIS:5020. Same as SLIS:6100.
- IGPI:6120 Natural Language Processing** **3 s.h.**
Tools and techniques for computational processing of text, including lexical analysis, part-of-speech tagging, named entity recognition, relationship extraction, topic detection and tracking, sentiment analysis, question answering; example corpora and applications drawn from multiple disciplines including biomedicine, digital humanities, and social science. Prerequisites: SLIS:5020. Same as SLIS:6120.
- IGPI:6140 Digital Environments** **3 s.h.**
Methods and models for building digital libraries; organization with metadata; standards such as those for object identifiers, open access, building cross-linkages between collections; automatic harvesting of content. Prerequisites: SLIS:5020. Same as SLIS:6140.
- IGPI:6155 Information Visualization** **3 s.h.**
Information visualization is to unveil the underlying structure of large or abstract data sets using visual representations that utilize the powerful processing capabilities of the human visual perceptual system; introduction to theories, techniques, and examples of information visualizations for different presentations of data. Prerequisites: SLIS:5020. Same as SLIS:6155.
- IGPI:6210 Applied Survival Analysis** **3 s.h.**
Nonparametric, parametric, and semi-parametric methods for time-to-event data; types of censoring; Kaplan-Meier estimation; Cox proportional hazards models, including methods for assessing adequacy of the proportional hazards assumption; time varying covariates; sample size calculations for comparison of two or more groups; focus on analysis of real data sets and examples using statistical software. Offered spring semesters. Prerequisites: BIOS:5120 or BIOS:5720. Same as BIOS:6210.
- IGPI:6216 Finite Element II** **3 s.h.**
Computer implementation; plate and shell elements; mixed and hybrid formulations; nonlinear analysis; recent development; introduction to boundary element method. Prerequisites: CEE:4533. Same as CEE:6532, ME:6215.
- IGPI:6310 Introductory Longitudinal Data Analysis** **3 s.h.**
Introduction to statistical models and estimation methods for outcome variables (normal and non-normal) clustered or measured repeatedly in time or space; focus on applications and computer software methods for ANOVA based methods, hierarchical linear models, linear mixed models, correlated regression models, generalized estimating equations, and generalized linear mixed models. Offered fall semesters. Prerequisites: BIOS:5120 or STAT:3200. Same as BIOS:6310, STAT:6550.
- IGPI:6380 Analysis of Scholarly Domains** **3 s.h.**
Information transfer in academic disciplines; scientific method, other means of knowledge construction, resulting literatures; reference tools used to control literature for a variety of audiences; emphasis on humanities, social sciences, or sciences. Same as SLIS:6380.

- IGPI:6480 Knowledge Discovery** 3 s.h.
Knowledge discovery process including data reduction, cleansing, and transformation; advanced modeling techniques from classification, prediction, clustering, and association; evaluation and integration. Same as BAIS:6480.
- IGPI:6490 Information Policy and Ethics** 3 s.h.
Ethical and legal issues as they relate to information policy development and interpretation; application of information policies to address problems in information organizations. Same as SLIS:6490.
- IGPI:6501 Seminar in Spatial Analysis and Modeling** 1-3 s.h.
Research themes in spatial analysis, GIScience, simulation, remote sensing. Same as GEOG:6500.
- IGPI:6510 Readings in Informatics** arr.
Topics not covered in other courses; individual study.
- IGPI:6511 Applied Generalized Regression** 3 s.h.
Applications of semiparametric models, generalized linear models, nonlinear normal errors models, correlated response models; use of statistical packages, especially R and SAS. Requirements: introductory statistics and applied linear models. Same as STAT:6510.
- IGPI:6515 Independent Study** arr.
- IGPI:6520 Research for Dissertation** arr.
Requirements: Ph.D. candidacy.
- IGPI:6530 Environmental and Spatial Statistics** 3 s.h.
Geostatistics kriging, variogram estimation, trend estimation, sampling design, extensions to river networks and the globe, lattice data analysis, analysis of spatial point patterns. Prerequisites: STAT:4101 and STAT:3200. Same as STAT:6530.
- IGPI:6600 Linear Programming** 3 s.h.
Mathematical programming models; linear and integer programming, transportation models, large-scale linear programming, network flow models, convex separable programming. Requirements: calculus and linear algebra. Same as BAIS:6600, ISE:6600.
- IGPI:6610 Statistical Methods in Clinical Trials** 3 s.h.
Survey of statistical methods commonly used in clinical trials; primary focus on methodologic perspective for the design, conduct, analysis, and interpretation of all phases of clinical trials; logistical and operational aspects of conducting multisite clinical trials; designed for biostatistics majors. Offered spring semesters. Prerequisites: BIOS:5720. Requirements: familiarity with SAS and R programming. Same as BIOS:6610.
- IGPI:6650 Causal Inference** 3 s.h.
Concepts of causal inference, counterfactuals, confounding, causal graphs, internal/external validity, heterogeneity of treatment effect; methods covered include propensity score matching (optimal pair, multiple control and full matching; near-exact, fine-balance, and risk set matching) and stratification; covariate balance checks; sensitivity analysis; inverse probability of treatment weighted estimation; doubly robust estimators; mediation analysis; marginal structural models. Offered fall semesters of odd years. Prerequisites: BIOS:5720 and BIOS:5730 and ((STAT:4100 and STAT:4101) or (STAT:5100 and STAT:5101)). Same as BIOS:6650.
- IGPI:6700 Discrete Optimization** 3 s.h.
Introduction to modeling and solving discrete optimization problems; integer programming, network flows, dynamic programming. Prerequisites: MSCI:6600 or BAIS:6600. Same as BAIS:6700.
- IGPI:7000 Business Analytics Topics** 3 s.h.
Same as BAIS:7000.
- IGPI:7210 Survival Data Analysis** 3 s.h.
Types of censoring and truncation; survival function estimation; parametric inference using exponential, Weibull, and accelerated failure time models; nonparametric tests; sample size calculation; Cox regression with stratification and time-dependent covariates; regression diagnostics; competing risks; topics may include analysis of correlated survival data and/or recurrent events; designed for biostatistics and statistics majors. Offered fall semesters. Prerequisites: BIOS:5720 and ((STAT:4100 and STAT:4101) or (STAT:5100 and STAT:5101)). Same as BIOS:7210, STAT:7570.
- IGPI:7310 Longitudinal Data Analysis** 3 s.h.
Statistical models and estimation methods for outcome variables (normal and non-normal) clustered or measured repeatedly in time or space; includes ANOVA based methods, hierarchical linear models, linear mixed models, error structures, generalized estimating equations, and generalized linear mixed models; may include Bayesian approaches; designed for biostatistics and statistics majors. Offered spring semesters of odd years. Prerequisites: (BIOS:5720 and STAT:4100 and STAT:4101) or (STAT:5100 and STAT:5101). Same as BIOS:7310.
- IGPI:7400 Computer Intensive Statistics** 3 s.h.
Computer arithmetic; random variate generation; numerical optimization; numerical linear algebra; smoothing techniques; bootstrap methods; cross-validation; MCMC; EM and related algorithms; other topics per student/instructor interests. Prerequisites: (BIOS:5710 or STAT:5200) and STAT:3101. Requirements: proficiency in Fortran or C or C++ or Java. Same as STAT:7400.
- IGPI:7470 Image Analysis and Understanding** 3 s.h.
Mathematical foundations and practical techniques of digital image analysis and understanding; image segmentation (from edges and regions), object description (from boundaries, regions, scale, scale insensitive descriptions, 3-D shape, texture) pattern recognition (statistical and syntactic methods, cluster analysis), image understanding (knowledge representation, control strategies, matching, context, semantics), image analysis and understanding systems; lab arranged. Prerequisites: ECE:5480. Same as ECE:7470.
- IGPI:7480 Advanced Digital Image Processing** 3 s.h.
Advanced local operators (scale-space imaging, advanced edge detection, line and corner detection), image morphology (binary/gray scale operators, morphological segmentation and watershed), digital topology and geometry (binary/fuzzy digital topology, distance functions, skeletonization), color spaces, wavelets and multi-resolution processing (Haar transform, multi-resolution expansions, wavelet transforms in one or two dimensions, fast wavelet transform, wavelet packets), image registration (intensity correlation, mutual information, and landmark-based deformable registration methods). Prerequisites: ECE:5460 and ECE:5480. Same as ECE:7480.
- IGPI:7600 Advanced Biostatistics Seminar** 0-3 s.h.
Current topics; supervised experience in reading and interpreting biostatistical literature. Same as BIOS:7600.

Informatics, M.S.

Requirements

The Master of Science program in informatics requires a minimum of 31-33 s.h. of graduate credit, depending on a student's choice of subprogram: the bioinformatics and computational biology subprogram requires a minimum of 31 s.h. of credit, the geoinformatics subprogram requires a minimum of 32 s.h. of credit, the health informatics subprogram requires a minimum of 32 s.h. of credit, and the information science subprogram requires a minimum of 33 s.h. of credit. Students working toward a Doctor of Philosophy in informatics may be granted a Master of Science degree upon completion of the M.S. requirements.

Credit required for the M.S. includes foundations of informatics coursework and at least 9 s.h. in disciplinary applications of informatics.

Students select an advisor from their subprogram's affiliated faculty members. In consultation with their advisor, students prepare a study plan, which is reviewed at least once a year. A final master's degree examination, either oral or written, is required for the geoinformatics subprogram.

For more information about the Master of Science requirements, see the Interdisciplinary Graduate Program in Informatics website.

Bioinformatics and Computational Biology

Bioinformatics and computational biology students complete the following coursework.

Core Courses

Code	Title	Hours
This course:		
ENGR:7270	Engineering Ethics	1
At least 12 s.h. from these:		
IGPI:4213/ BIOL:4213/ GENE:4213	Bioinformatics	4
IGPI:5110/CS:5110	Introduction to Informatics	3
IGPI:5211/ BIOL:5211	Genes, Genomes, and the Human Condition Graduate Lecture	3
IGPI:5321/ BME:5320/ ECE:5210	Bioinformatics Techniques	3
BME:4310/ BIOC:4310	Computational Biochemistry	3
BME:5330/ BIOL:5320/ ECE:5220/ GENE:5173/ IGPI:5330	Computational Genomics	3

Statistics

Students complete 6 s.h. in approved graduate statistical coursework; consult advisor.

Electives

Students complete 12 s.h. in approved elective coursework; consult advisor.

Geoinformatics

Geoinformatics students complete the following coursework.

Core Informatics Courses

Code	Title	Hours
This course:		
IGPI:5110/CS:5110	Introduction to Informatics	3
One of these:		
CS:3210	Programming Languages and Tools (when topic is programming with C++ or when topic is programming with Java)	3
GEOG:3050	Introduction to Geospatial Programming	3
One of these:		
IGPI:3200/ISE:3760/ STAT:3200	Applied Linear Regression	3
IGPI:4220/ BAIS:4220	Advanced Database Management and Big Data	3
IGPI:4581/ GEOG:4580	Introduction to Geographic Databases	3
IGPI:5120/ BIOS:5120/ STAT:5610	Regression Modeling and ANOVA in the Health Sciences	3
IGPI:5199/ STAT:5200	Applied Statistics I	4
IGPI:5400/ STAT:5400	Computing in Statistics	3
IGPI:6100/ SLIS:6100	Database Management	3
BAIS:4480/CS:4480/ ECE:4480	Knowledge Discovery	3
CS:4400	Database Systems	3

Core Geoinformatics Courses

Code	Title	Hours
All of these:		
GEOG:3010/ IGPI:3010	Geographic Information Systems and Science	3
Core geoinformatics courses (consult advisor)		
		9

Electives

Students complete 11 s.h. of elective coursework (consult advisor).

Health Informatics

Health informatics students complete the following coursework.

Core and Foundation Courses

Code	Title	Hours
All of these:		
IGPI:5110/CS:5110	Introduction to Informatics	3

IGPI:5200/ HMP:5370/ ISE:5860/ MED:5300/ SLIS:5900	Health Informatics	3
IGPI:5220/ EPID:5200	Principles of Public Health Informatics	3
One of these:		
IGPI:5321/ BME:5320/ ECE:5210	Bioinformatics Techniques	3
CS:3210	Programming Languages and Tools (when topic is programming with C++ or when topic is programming with Java)	3
One of these:		
IGPI:4220/ BAIS:4220	Advanced Database Management and Big Data	3
IGPI:6100/ SLIS:6100	Database Management	3
CS:4400	Database Systems	3
One of these:		
IGPI:3011/ GHS:3010	Identifying and Developing a Global Health Project	3
IGPI:3120/ STAT:3120	Probability and Statistics	4
IGPI:5120/ BIOS:5120/ STAT:5610	Regression Modeling and ANOVA in the Health Sciences	3
NURS:7002	Designing Research	3

Electives

Students complete 14 s.h. of approved elective coursework (consult advisor).

Information Science

Information science students complete the following coursework.

Core Courses

Code	Title	Hours
All of these:		
IGPI:5110/CS:5110	Introduction to Informatics	3
BAIS:4480/CS:4480/ ECE:4480	Knowledge Discovery	3
CS:3210	Programming Languages and Tools (when topic is programming with C++ or when topic is programming with Java)	3
One of these:		
IGPI:6120/ SLIS:6120	Natural Language Processing	3
CS:4980	Topics in Computer Science II (consult advisor)	3
One of these:		
IGPI:6100/ SLIS:6100	Database Management	3
BAIS:4220/ IGPI:4220	Advanced Database Management and Big Data	3
CS:4400	Database Systems	3

One of these:

IGPI:3120/ STAT:3120	Probability and Statistics	4
IGPI:5001/ POLI:5001	Introductory Methodology	4

Electives

Students complete 14 s.h. of approved elective coursework (consult advisor).

Combined Programs

M.S. (Health Informatics Subprogram)/Pharm.D.

The College of Pharmacy and the Graduate College offer the combined Doctor of Pharmacy/Master of Science in informatics with a health informatics subprogram. The combined degree program requires completion of 32 s.h. beyond the bachelor's degree. Students who complete the program are granted both degrees.

The Pharm.D./M.S. program assists students to develop special expertise in information technology, including management of electronic health records, health information exchange standards, electronic prescribing, medication management, decision support, as well as other competencies. Graduates will be prepared for employment in industry or academic institutions with skills to address pharmacotherapy issues as well as information technology management.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. It is recommended that students apply to the Graduate College for admission to the M.S. program before entering the spring semester of their first year in the pharmacy program. For more information, see Doctor of Pharmacy, Pharm.D. [p. 1862] in the College of Pharmacy section of the Catalog.

Admission

Applicants to the M.S. program should apply to the degree subprogram of their choice; the subprograms make independent admission decisions.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website. They also must meet the admission requirements of the informatics subprogram they want to enter; see Admission Information M.S. and Ph.D. on the program's website.

Informatics, Ph.D.

Requirements

The Doctor of Philosophy program in informatics requires a minimum of 72 s.h. of graduate credit. It is offered in four subprograms: bioinformatics and computational biology, geoinformatics, health informatics, and information science.

The 72 s.h. required for the Ph.D. includes foundations of informatics coursework and at least 9 s.h. in disciplinary applications of informatics. Other course requirements are outlined in the curriculum specific to each subprogram.

Students select an advisor from their subprogram's affiliated faculty members. In consultation with their advisors, students prepare a study plan, which is reviewed by their mentors and curricular advisory committees at least once a year.

Ph.D. students must pass a comprehensive examination at or near completion of their coursework requirements. The exam may be written, oral, or both, depending on the structure of the student's subprogram or the decision of the student's committee.

A student who does not already hold an M.S. in informatics from the University of Iowa and who has passed the Ph.D. comprehensive examination may be granted an M.S. degree in informatics without taking the final master's degree exam in the health informatics, geoinformatics, or information science subprogram, upon recommendation of the Informatics Program. The bioinformatics and computational biology subprogram does not grant an M.S. degree when a student passes the comprehensive exam.

Upon successful completion of all requirements, including the dissertation and its oral defense, students are awarded the Doctor of Philosophy degree.

For more information about the Doctor of Philosophy requirements, see the Interdisciplinary Graduate Program in Informatics website.

Bioinformatics and Computational Biology

Bioinformatics and computational biology students complete the following coursework.

Core Courses

Code	Title	Hours
At least 9 s.h. from these:		
IGPI:4213/ BIOL:4213/ GENE:4213	Bioinformatics	4
IGPI:5110/CS:5110	Introduction to Informatics	3
IGPI:5211/ BIOL:5211	Genes, Genomes, and the Human Condition Graduate Lecture	3
IGPI:5321/ BME:5320/ ECE:5210	Bioinformatics Techniques	3
BME:4310/ BIOC:4310	Computational Biochemistry	3

BME:5330/ BIOL:5320/ ECE:5220/ GENE:5173/ IGPI:5330	Computational Genomics	3
---	------------------------	---

One of these:

BIOL:3713	Molecular Genetics	4
IGPI:4373/ BIOL:4373	Molecular Evolution: Genes, Genomes, and Organisms	3

All of these:

IGPI:5331/ECE:5330	Graph Algorithms and Combinatorial Optimization	3
BIOL:5412	Fundamental Genetics - Graduate Lecture	3
ENGR:7270	Engineering Ethics	1

Statistics

Students complete 6 s.h. in approved graduate statistical coursework; consult advisor.

Electives

Students complete 12 s.h. in approved elective coursework and the remainder of their coursework; consult advisor.

Dissertation

Students complete dissertation coursework in consultation with their advisor.

Geoinformatics

Geoinformatics students complete the following coursework.

Core Informatics Courses

Code	Title	Hours
This course:		
IGPI:5110/CS:5110	Introduction to Informatics	3
One of these:		
CS:3210	Programming Languages and Tools (when topic is programming with C++ or when topic is programming with Java)	3
GEOG:3050	Introduction to Geospatial Programming	3
One of these:		
IGPI:3200/ISE:3760/ STAT:3200	Applied Linear Regression	3
IGPI:4220/ BAIS:4220	Advanced Database Management and Big Data	3
IGPI:4581/ GEOG:4580	Introduction to Geographic Databases	3
IGPI:5120/ BIOS:5120/ STAT:5610	Regression Modeling and ANOVA in the Health Sciences	3
IGPI:5199/ STAT:5200	Applied Statistics I	4
IGPI:5400/ STAT:5400	Computing in Statistics	3
IGPI:6100/ SLIS:6100	Database Management	3

BAIS:4480/CS:4480/ Knowledge Discovery ECE:4480	3
CS:4400 Database Systems	3

Core Geoinformatics Courses

Code	Title	Hours
All of these:		
GEOG:3010/ IGPI:3010	Geographic Information Systems and Science	3
Core geoinformatics courses (consult advisor)		9

Electives

Students complete 51 s.h. of elective coursework; consult advisor.

Dissertation

Students complete up to 6 s.h. in dissertation coursework in consultation with their advisor.

Health Informatics

Health informatics students complete the following coursework.

Core and Foundation Courses

Code	Title	Hours
All of these:		
IGPI:5110/CS:5110	Introduction to Informatics	3
IGPI:5200/ HMP:5370/ ISE:5860/ MED:5300/ SLIS:5900	Health Informatics	3
IGPI:5220/ EPID:5200	Principles of Public Health Informatics	3
One of these:		
CS:3210	Programming Languages and Tools (when topic is programming with C++ or when topic is programming with Java)	3
IGPI:5321/ BME:5320/ ECE:5210	Bioinformatics Techniques	3
One of these:		
IGPI:4220/ BAIS:4220	Advanced Database Management and Big Data	3
IGPI:6100/ SLIS:6100	Database Management	3
CS:4400	Database Systems	3
One of these:		
BAIS:4480/CS:4480/ ECE:4480	Knowledge Discovery	3
CS:4980	Topics in Computer Science II	3
CS:5430	Machine Learning	3
All of these:		
IGPI:5120/ BIOS:5120/ STAT:5610	Regression Modeling and ANOVA in the Health Sciences	3
IGPI:3011/ GHS:3010	Identifying and Developing a Global Health Project	3

ENGR:7270	Engineering Ethics	1
NURS:7002	Designing Research	3

Health Informatics Electives

Students complete 9 s.h. of approved health informatics electives; consult advisor.

Electives

Students complete the remainder of their coursework in approved electives; consult advisor.

Dissertation

Students complete dissertation coursework in consultation with their advisor.

Information Science

Information science students complete the following coursework.

Core Courses

Code	Title	Hours
All of these:		
IGPI:5110/CS:5110	Introduction to Informatics	3
BAIS:4480/CS:4480/ ECE:4480	Knowledge Discovery	3
CS:3210	Programming Languages and Tools (when topic is programming with C++ or when topic is programming with Java)	3
One of these:		
IGPI:6120/ SLIS:6120	Natural Language Processing	3
CS:4980	Topics in Computer Science II (consult advisor)	3
One of these:		
IGPI:4220/ BAIS:4220	Advanced Database Management and Big Data	3
IGPI:6100/ SLIS:6100	Database Management	3
CS:4400	Database Systems	3
One of these:		
IGPI:3120/ STAT:3120	Probability and Statistics	4
IGPI:5001/ POLI:5001	Introductory Methodology	3-4

Electives

Students complete 54 s.h. of approved elective coursework; consult advisor.

Dissertation

Students complete dissertation coursework in consultation with their advisor.

Combined Programs

Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in informatics in a combined degree program offered by the Carver College of Medicine and the Graduate College.

Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1711] (Carver College of Medicine) in the Catalog.

Admission

Applicants to the Ph.D. program should apply to the degree subprogram of their choice; the subprograms make independent admission decisions.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website. They also must meet the admission requirements of the informatics subprogram they want to enter; see Admission Information M.S. and Ph.D. on the program's website.

Informatics, Graduate Certificate

Requirements

The graduate Certificate in Informatics requires a minimum of 18-21 s.h. of graduate credit, depending on a student's choice of subprogram: the subprograms in health informatics and information science require a minimum of 18 s.h.; the bioinformatics and computational biology and the geoinformatics subprograms require a minimum of 21 s.h.

The certificate program is designed for students enrolled in University of Iowa graduate degree programs who wish to study informatics as a complement to their degree program and for nondegree students who are interested in increasing their knowledge of informatics.

All subprograms require a minimum of 9 s.h. in the foundations of informatics.

For more information about certificate requirements, see the Interdisciplinary Graduate Program in Informatics website.

Admission

Applicants to the certificate program should apply to the degree subprogram of their choice; the subprograms make independent admission decisions. Certificate program applicants may be degree or nondegree graduate students. Applicants who are enrolled in a University of Iowa graduate degree program must be in good academic standing in their program.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website. They also must meet the admission requirements of the informatics subprogram they want to enter; see Admission Information Certificate on the program's website.

International Writing Program

Director

- Christopher Merrill

Faculty: <https://iwp.uiowa.edu/about-iwp/iwp-staff>

Website: <https://iwp.uiowa.edu>

The International Writing Program (IWP) conducts a unique fall residency program for established writers from outside the United States, and a summer writing program for American and international high school students. During spring semester, IWP offers courses related to the program's general mission, including collaborative distance learning courses for writing students overseas. The program regularly offers Massive Open Online Courses (MOOCs) on literary topics.

Residency Program

Each fall the International Writing Program assembles a community of poets, fiction writers, essayists, playwrights, and journalists for a 10-week residency on campus. Participants range from emerging talents to writers who are among their countries' leading literary figures and writers of world stature. For most, their time in the program is their first, or their first extended, stay in the United States.

At the University they live and interact with each other while working on writing and translation projects and participating in public events. Throughout their residency, they present their work in IWP:3191 International Literature Today and IWP:5205 International Translation Workshop, and participate as guests in many other courses on campus. They also meet with the public through readings, panel discussions, a film series, and other presentations.

Since 1967 over 1,500 writers from over 150 countries have participated in the program.

International Writing Program participants are supported by the U.S. Department of State, through bilateral agreements with many countries, by grants from cultural institutions and governments abroad, and by private funds. The program does not provide grants for writers.

For more information, contact the International Writing Program, or visit its website.

Summer Programs

Between the Lines

Between the Lines is a creative writing and cultural exchange summer program for American and international high school students. Students explore creative writing and world literature in a multilingual, multicultural environment, attend writing workshops, and participate in a literature seminar and a series of master classes.

Between the Lines offers two sessions for participants who are 15-18 years old:

Between the Lines: Peace and the Writing Experience brings together young writers from the U.S. and select countries along the historic Silk Road land route for a two-week creative writing residency. The program is supported by the Bureau of Education and Cultural Affairs at the U.S. Department of State.

Between the Lines: Identity and Belonging is sponsored through grant funds provided by the Doris Duke Foundation for the Islamic Art (DDFIA) Building Bridges Program. The two-week session, free for all participants, brings together Americans who are Muslims and Americans who are non-Muslims. Those who are first- or second-generation immigrants, from refugee communities, low-income households, or marginalized positions are particularly encouraged to apply.

International students are nominated for Peace and the Writing Experience by embassies in their home countries. American students may apply directly to IWP for both sessions; candidates must complete an online application, submit samples of their creative work, a statement of purpose, and respond to two writing prompts. Contact Between the Lines for more information.

Summer Institute

The Summer Institute is a summer program that brings together U.S., Indian, and Pakistani college-age students (18-22 years old) for two weeks in July to focus on creative writing and the power of narrative. Summer Institute attendees take part in master classes in the craft of writing and the history and culture of South Asia, in collaborative workshops, and in activities designed to forge a community of writers. The program, funded by a grant from the U.S. Embassy in Islamabad, Pakistan, is free for selected participants.

Students from the three countries apply online. Contact the Summer Institute for more information.

Courses

International Writing Program Courses

IWP:1009 Undergraduate Internship **arr.**

Professional experience for students interested in arts management and international literature. Requirements: undergraduate standing, minimum of 36 s.h. of coursework, and consultation with IWP director.

IWP:1102 On Campus Independent Study **arr.**

Independent study arranged in collaboration with instructor.

IWP:3191 International Literature Today **1,3 s.h.**

English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Postcolonial Studies. PERIOD: 20th/21st-Century Literature. Same as ENGL:3595, WLLC:3191.

IWP:3201 Writing and Publishing for the Literary Web **arr.**

Technical aspects of web publishing, including step-by-step instruction on using content management systems (Drupal and Wordpress); specific stylistic and editorial protocols associated with contributing to literary websites; utilize and navigate a content management system; create a contributor portfolio of online work, including media items, reviews, interviews, and blog posts.

IWP:3210 Comparative Arts **3 s.h.**

Cultural and aesthetic issues arising from side-by-side investigation of several art forms, including literature, cinema, painting, music, opera, architecture; periods, schools, styles, and their theories. Taught in English. Same as ASIA:3210, FREN:3210, RUSS:3210, SPAN:3211, WLLC:3210.

IWP:5205 International Translation Workshop 1-3 s.h.

International writers pair with University of Iowa translators to write new works of poetry and fiction in English; second-language fluency not required for international writers. Same as TRNS:5205.

IWP:5230 Writing Across Genres: A Workshop arr.

Writing across genres; exploration of modes and voices different from chosen genres (i.e., poets may test the waters of playwriting, nonfiction writers of translation, translators of fiction); rotations by guest faculty; workshop includes students from Writing University M.F.A. programs and International Writing Program residents.

IWP:6635 Crossing Borders Seminar 2-3 s.h.

Taught in English. Same as AFAM:6635, ANTH:6635, CINE:6635, COMM:6635, ENGL:6635, FREN:6142, GEOG:6635, GRMN:6635, HIST:6135, POLI:6635, SPAN:6904.

IWP:7460 Translation Workshop 3 s.h.

Requirements: at least one foreign language. Same as TRNS:7460.

Library and Information Science

Director

- David A. Eichmann

Graduate degree: M.A. in library and information science

Graduate certificate: special collections librarianship

Faculty: <https://www.slis.uiowa.edu/faculty-and-staff/profiles>

Website: <https://www.slis.uiowa.edu/>

Today's age is defined by the intersection of information, technology, and human creativity. In this context, library and information science is dedicated to understanding the nature of information, the interaction between information and communication technologies, the relationship between information and knowledge, the cognitive and affective aspects of knowledge acquisition, and the interface between people and information. It offers new knowledge, technological benefits, and professional expertise for every dimension of human affairs.

Library and information professionals take on many challenges in serving the needs of their constituencies—children and teachers, members of academic communities, employees of profit and nonprofit organizations, and the public at large—constituencies that range from information poor to information rich. They work in the contexts of issues such as information and communication technology, public and private information policy, managerial policy, and regional, national, and international economics.

The School of Library and Information Science prepares professionals to meet these diverse challenges. It offers a graduate-level program of preparation for careers in all types of libraries and information centers, providing students with a strong, well-rounded education in an environment that supports individuals from all segments of a multicultural, multiethnic, and multilingual society. Its curriculum reflects the profession's immediate and long-range needs and prepares students to be leaders in a changing field.

By promoting excellence in research, the school contributes to the base of theoretical and practical knowledge in library and information science and helps develop an understanding of how to meet the varied and changing information needs of individuals and society. It also provides public service through continuing education programs, selective consulting services for library and information centers, and participation in professional organizations. The school strongly encourages its students, faculty members, and alumni to shape the future of the profession by filling key roles in organizations involved in all aspects of the information cycle.

Graduate students working toward a degree in library and information science may elect to pursue a combined degree program offered by the school in collaboration with the College of Law or a graduate degree program in book arts offered by the Center for the Book. See Combined Programs [p. 1606] in the M.A. in library and information science section of the Catalog.

Students interested in school librarianship may earn a teaching license through a joint program with the College of Education; see "School Teacher Librarian" under Requirements [p. 1604] in the M.A. in library and information science section of the Catalog.

Library and information science M.A. students may earn the Certificate in Book Studies/Book Arts and Technologies [p. 1570] or the Certificate in Special Collections Librarianship [p. 1608]. In addition, they may earn the Certificate in Informatics [p. 1597] and choose a subprogram in bioinformatics and computational biology, geoinformatics, health informatics, or information science. In addition, other graduate students may earn the Certificate in Special Collections Librarianship.

Related Certificate

Public Digital Humanities

The Certificate in Public Digital Humanities is especially for students with humanities backgrounds who want to gain expertise and credentials to work more intensively with technology. The program brings students together with varied academic backgrounds to learn how to communicate, sort out the roles required for fully functioning teams, and understand the unique contributions made by individuals across disciplines. Students learn to appreciate the diversity of humanities research methods while identifying core digital activities that underlie research projects. For more information, see the Certificate in Public Digital Humanities [p. 1626].

Student Organizations and Activities

All M.A. students in the school are automatically members of LISSO, the Library and Information Science Student Organization, which also serves as the student chapter of the American Library Association. LISSO sponsors various activities, such as speaker series, workshops, brown bag lunches, and social events. Participation in LISSO events provides students with significant opportunities for professional and extracurricular growth. Students also are encouraged to join other state and national professional organizations.

B Sides is a student-run project from the School of Library and Information Science. The journal and podcast aim to provide an interactive and accessible space where library and information science students, faculty, alumni, and community professionals can dialog about all aspects of the profession, study, research, and practice of library and information science and related fields.

Honor Society

The Beta Beta Theta Chapter of Beta Phi Mu, the international honor society for library and information science, is located at the University of Iowa. Each year new members are chosen from the top 25 percent of the preceding year's graduating class. To be eligible for membership, graduates must achieve a g.p.a. of at least 3.75, demonstrate professional promise, and be recommended by the faculty.

Programs

Graduate Programs of Study

Major

- Master of Arts in Library and Information Science [p. 1604]

Certificate

Certificate in Special Collections Librarianship [p. 1608]

Facilities

The School of Library and Information Science (SLIS) is housed in the south wing of the University's Main Library, in a setting that promotes community among students, faculty, and staff and provides easy access to resources of the University of Iowa Libraries. Facilities are provided for the varied instructional and research activities of the school.

The school includes classrooms dedicated for use by SLIS faculty and students. These rooms include a wired workstation technology classroom with Windows and Macintosh computers fully equipped for videoconferencing, and seminar classrooms with videoconferencing systems and large high-definition screens.

Gunther Commons

Gunther Commons, a state-of-the-art collaboratory equipped with workstations, is the school's combined student center and technology lab. Individuals and teams of students gather in the collaboratory to work on course assignments and to gain experience with specialized software that supports the latest teaching technologies. Students have access to Windows and Macintosh computers, with gigabit access to the campus network and wireless service throughout the Main Library.

University of Iowa Libraries

All of the resources of the University of Iowa Libraries are available to the school's students and faculty. The system contains more than 4 million volumes in the Main Library and six departmental libraries.

The web-based catalog provides access to books and periodicals, electronic indexes, and full-text databases held by University Libraries. In addition, InfoHawk+ provides online resource access to selected internet and CD-ROM resources arranged by subject and academic discipline. Wireless internet access is available in the Main Library.

The school benefits with proximity to the Learning Commons. It encompasses the majority of public space on the first floor of the Main Library. The Learning Commons is a technology-infused, comfortable and flexible learning space, and an academic and information help center.

The third floor of the Main Library houses the map collection, Special Collections, and University Archives, including the Iowa Women's Archives.

Other Libraries

Students have access to a variety of libraries through field trips, practicum experience, and personal use: the State Historical Society of Iowa library in Iowa City; the Iowa City, Coralville, and Cedar Rapids public and school libraries; the Augustana, Coe, Cornell, Mount Mercy, and Grinnell College libraries; and the Herbert Hoover Presidential Library and Museum in West Branch.

Other Resources

The second floor of the University Capitol Centre (UCC) houses the instructional services and campus services departments of the University's Information Technology Services. It provides instructional and research computing facilities and services for the University community. All University students, staff, and faculty may use the center's computers for University-related research, thesis preparation, and class work. Instructional

Technology Centers provide campuswide access to the University's academic computing resources and the internet.

Courses

Library and Information Science Courses

- SLIS:4150 Introduction to Book Studies** **3 s.h.**
Theory and practice of book studies; meanings of word and image in the book format; comparative study of other media, applied study of the codex as physical artifact. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: Varies by semester. Same as ENGL:4150, UICB:4150.
- SLIS:4910 The Book in the Middle Ages** **3 s.h.**
Relation of text, decoration, function, creators, and audience in different genres of medieval manuscript books 400-1500 A.D. Same as HIST:4910, UICB:4910.
- SLIS:4920 The Transition from Manuscript to Print** **3 s.h.**
History of the book and communication in Europe 1400-1800; production, distribution, and use of texts in cultural context. Same as HIST:4920, UICB:4920.
- SLIS:5010 Cultural Foundations** **1-3 s.h.**
The role of libraries and information agencies in society; major issues, including information policy, professional ethics, literacy, diversity, technology, pedagogy. Requirements: admission to library and information science.
- SLIS:5020 Computing Foundations** **3 s.h.**
Review of technology in context of library and information science; introduction to computer basics (hardware, software), markup languages (HTML, XML), security and privacy, databases, and basic programming languages; focus on basic concepts and troubleshooting techniques. Requirements: admission to library and information science.
- SLIS:5030 Conceptual Foundations** **3 s.h.**
Theory, principles, and standards in organization of information; function of catalogs, indexes, bibliographic networks; introduction to metadata descriptions, name and title access, subject analysis, controlled vocabularies, classification systems. Requirements: admission to library and information science.
- SLIS:5041 College and University Libraries** **3 s.h.**
Objectives, organization, unique functions, and services of academic libraries; educational environment in which academic libraries function; examination of issues and problems affecting academic libraries. Prerequisites: SLIS:5010. Corequisites: SLIS:5010, if not taken as a prerequisite.
- SLIS:5042 Public Libraries** **3 s.h.**
Historical development of public libraries; current issues in public library management and policy making, including intellectual freedom; readers advisory service and genres of popular materials for adults. Prerequisites: SLIS:5010. Corequisites: SLIS:5010, if not taken as a prerequisite.
- SLIS:5043 Special Libraries** **3 s.h.**
Management, organizational structures, collections, client services in special libraries; site visits to a variety of special libraries, information centers; projects that apply theoretical principles. Prerequisites: SLIS:5010. Corequisites: SLIS:5010, if not taken as a prerequisite. Same as IGPI:5043.

- SLIS:5044 School Library Media Administration 3 s.h.**
Design of K-12 library programs including major functions of teaching and learning, information access, and leadership and program administration. Prerequisites: SLIS:5010. Corequisites: SLIS:5010, if not taken as a prerequisite.
- SLIS:5200 User Education: Multimedia 3 s.h.**
Develop multimedia projects for educational use in libraries; develop a portfolio of projects using multimedia technology; explore applications of multimedia for teaching and learning; explore and evaluate platforms for delivering multimedia in educational environments. Same as IGPI:5203.
- SLIS:5220 Resources for Children 3 s.h.**
Evaluation and use of books, magazines, electronic media, and other sources of information and recreation in relation to youth development.
- SLIS:5230 Resources for Young Adults 3 s.h.**
Topics related to populations served by youth services departments (e.g., societal issues, informational needs); seminar.
- SLIS:5240 Resources for Adults 3 s.h.**
Role of public libraries in meeting adults' informational and recreational needs; popular culture materials, reader's advisory services, lifelong learning.
- SLIS:5520 Studies in Book History and Technologies 0-3 s.h.**
Topics related to production, distribution, and consumption of books through history and into the future. Same as UICB:5520.
- SLIS:5530 Topics in Preservation 3 s.h.**
Care, conservation, and preservation of cultural heritage artifacts; readings, discussion, hands-on sessions. Same as UICB:5530.
- SLIS:5535 Book Conservation 3 s.h.**
Practical methods, materials assessment, conservation history and evolution. Prerequisites: UICB:4270. Same as UICB:5220.
- SLIS:5600 History of Readers and Reading 3 s.h.**
Cultural nature of reading practices in historic and contemporary contexts; print and digital culture; reading communities; examples of recent scholarship; use of primary resources; seminar. Same as UICB:5600.
- SLIS:5630 Introduction to Special Collections Librarianship 3 s.h.**
Introduction to history of collecting in special collections and key areas of praxis (e.g., appraisal, arrangement and description, preservation, reference and access, outreach).
- SLIS:5700 Cultural Heritage 3 s.h.**
Increased use of digital technologies in collection, organization, dissemination, and use of heritage resources that generate intellectual, social, technological, legal, and ethical challenges to—and opportunities for—the heritage practice; exploration of challenges and opportunities, as well as their impact on the heritage profession; students become familiar with key heritage-related concepts and topics, apply them to a concrete project, and write a report of their findings.
- SLIS:5900 Health Informatics 3 s.h.**
Technological tools that support health care administration, management, and decision making. Same as HMP:5370, IGPI:5200, ISE:5860, MED:5300.
- SLIS:5950 Health Information and Communication 3 s.h.**
Fundamentals of medical librarianship, including how to engage with consumers and practitioners in need of health information; overview of health information resources and seeking skills; how to interact with users in need of health information; basic skills requisite to medical librarianship; community engagement, understanding health literacy, interacting with diverse user populations, and ethical considerations central to health information.
- SLIS:6020 Literacy and Learning 3 s.h.**
Learning and literacy theory relevant to work in information services; how librarians can help people process information and use it to form understanding and create new knowledge. Prerequisites: SLIS:5010.
- SLIS:6100 Database Management 3 s.h.**
Principles and practices of database design and management; discussion and practice cover database application lifecycle, data modeling, relational database design, SQL queries, reports and other interfaces to database data, documentation; individual and group projects. Prerequisites: SLIS:5020. Same as IGPI:6100.
- SLIS:6110 Evidence-Based Practice in Library and Information Science 3 s.h.**
Structured approach to improved libraries through decision making that supports the collection, interpretation, and evaluation of data; assessment of the effectiveness of library programs and services.
- SLIS:6115 Information and Inquiry 3 s.h.**
Expert skills in seeking and evaluating information that responds to patron needs, supplemented by trajectory of and contemporary practices for library reference work, including tools that support library users' inquiries and information seeking.
- SLIS:6120 Natural Language Processing 3 s.h.**
Tools and techniques for computational processing of text, including lexical analysis, part-of-speech tagging, named entity recognition, relationship extraction, topic detection and tracking, sentiment analysis, question answering; example corpora and applications drawn from multiple disciplines including biomedicine, digital humanities, and social science. Prerequisites: SLIS:5020. Same as IGPI:6120.
- SLIS:6130 Community Engagement 3 s.h.**
Ways in which information professionals in libraries and other settings learn about, collaborate with, and provide services and outreach to community members; introduction and overview of community engagement theory and practice; service learning or community-based research projects. Prerequisites: SLIS:5010.
- SLIS:6140 Digital Environments 3 s.h.**
Methods and models for building digital libraries; organization with metadata; standards such as those for object identifiers, open access, building cross-linkages between collections; automatic harvesting of content. Prerequisites: SLIS:5020. Same as IGPI:6140.
- SLIS:6145 Digital Preservation and Stewardship 3 s.h.**
Introduction to concepts and theories related to preservation and continued stewardship of born-digital and digitized materials; taught from an archival perspective, focusing on current methods of collection, maintenance, and access for digital collections in libraries, archives, and museums.
- SLIS:6150 Information Behavior 3 s.h.**
Understanding how information users approach their information needs; concepts for understanding information use; analysis of user communities.

- SLIS:6155 Information Visualization** **3 s.h.**
Information visualization is to unveil the underlying structure of large or abstract data sets using visual representations that utilize the powerful processing capabilities of the human visual perceptual system; introduction to theories, techniques, and examples of information visualizations for different presentations of data. Prerequisites: SLIS:5020. Same as IGPI:6155.
- SLIS:6170 Organizational Management** **3 s.h.**
Survey of management issues common to all information environments—understanding organizations, decision making, hiring and personnel, grant writing, and marketing.
- SLIS:6250 Beginning Cataloging and Classification** **3 s.h.**
Systems for describing materials and information in catalogs and organizing them for effective retrieval in libraries, museums, and other information centers; AACR2 descriptive principles, Dewey and Library of Congress classifications, Sears and LC subject headings, cataloging networks and services. Prerequisites: SLIS:5030. Corequisites: SLIS:5030, if not taken as a prerequisite.
- SLIS:6255 Beginning Rare Books Cataloging** **3 s.h.**
Concepts and application of descriptive cataloging of rare materials (books); rare books and how their special features shape cataloging; course format includes lecture and discussion, in-class and hands-on (if available) cataloging of rare books, and possible visits to the UI Center for the Book, the John Martin Rare Book Room, and UI Libraries Special Collections; students gain confidence and critical skills to start cataloging rare, special, and unusual books encountered in the workplace.
- SLIS:6330 Collection Development** **3 s.h.**
Collecting as a core library activity; various types of media collected from traditional print media to new digital media; how collections are structured and managed to provide for selection, organization, and access. Prerequisites: SLIS:5010 and SLIS:5030.
- SLIS:6335 Metadata Theories and Applications** **3 s.h.**
Principles of describing materials in both traditional and digital contexts; standards for writing and implementing metadata. Prerequisites: SLIS:5020 and SLIS:5030. Corequisites: SLIS:5030, if not taken as a prerequisite. Requirements: admission to library and information science program.
- SLIS:6345 Stewardship of Information and Collections** **3 s.h.**
Principles for creating, building, and maintaining digital and print collections in libraries and other information organizations. Prerequisites: SLIS:5010. Corequisites: SLIS:5010, if not taken as a prerequisite. Requirements: admission to library and information science program.
- SLIS:6350 Archives and Media** **3 s.h.**
Collecting as a core library activity; various types of media collected from traditional print media to new digital media; how archives are structured and managed to provide for selection, organization, access, and perpetual storage; work on sample collections, presentation of techniques, and concepts. Prerequisites: SLIS:5010 and SLIS:5030.
- SLIS:6370 Topics in Book Studies** **3 s.h.**
Topics relevant to book studies and special collections. Same as UICB:6370.
- SLIS:6380 Analysis of Scholarly Domains** **3 s.h.**
Information transfer in academic disciplines; scientific method, other means of knowledge construction, resulting literatures; reference tools used to control literature for a variety of audiences; emphasis on humanities, social sciences, or sciences. Same as IGPI:6380.
- SLIS:6411 Topics in Library and Information Science** **1-3 s.h.**
Current topics in the field of library and information science.
- SLIS:6490 Information Policy and Ethics** **3 s.h.**
Ethical and legal issues as they relate to information policy development and interpretation; application of information policies to address problems in information organizations. Same as IGPI:6490.
- SLIS:6520 Practicum in Libraries and Information Centers** **3 s.h.**
Supervised field experience in selected libraries and information centers; emphasis on application of theory to practice; at least 120 hours of fieldwork. Requirements: 15 s.h. of SLIS coursework.
- SLIS:6521 Distance and Online Education: Practicum in Library and Information Centers** **3 s.h.**
Supervised field experience in selected libraries and information centers; emphasis on application of theory to practice; at least 120 hours of fieldwork. Prerequisites: SLIS:5010 and SLIS:5020 and SLIS:5030 and (SLIS:6110 or SLIS:6170) and SLIS:6115. Requirements: minimum of 15 s.h. of SLIS coursework.
- SLIS:6530 School Library Media Practicum** **3 s.h.**
Supervised field experience in library media centers at elementary and secondary school levels; emphasis on application of theory to practice; at least 40 hours of fieldwork; seminar meetings. Prerequisites: SLIS:5044.
- SLIS:6570 Independent Study** **1-3 s.h.**
Formal contract between student and faculty member. Requirements: formal proposal.
- SLIS:6571 Distance and Online Education: Independent Study** **1-3 s.h.**
Formal contract between student and faculty member; opportunity to pursue in-depth research in a particular area of interest that does not duplicate an existing course in the curriculum; students meet with faculty member to design a plan of study and submit a bibliography and description of the final project. Requirements: formal proposal.
- SLIS:6580 Thesis** **0-6 s.h.**
Prerequisites: SLIS:5010 and SLIS:5020 and SLIS:5030 and SLIS:6110 and SLIS:6170.
- SLIS:6590 Digital Humanities Capstone** **arr.**
Application and practice of classroom experience to a specific project under guidance from a faculty member and project team leader. Prerequisites: CLAS:7290 or SLIS:7290. Requirements: admission to public digital humanities certificate program, an approved certificate plan of study on file, completion of 12 s.h. of approved coursework, and good standing in all required certificate coursework. Same as GRAD:6590.
- SLIS:7290 Digital Humanities Theory and Practice** **3 s.h.**
Overview of theories and use of technology to preserve, deploy, visualize, map, and analyze concepts; discussions with practicing digital public scholars; assignments consist of a digital portfolio tailored to student research; introductory course in public digital humanities certificate. Same as CLAS:7290.

Library and Information Science, M.A.

Students who pursue the master's degree in library and information science gain an understanding of the foundations of the library and information profession, including the history of the field, ethical and philosophical concerns, the information cycle, principles and procedures for dealing with a variety of information carriers, and the theory and practice of strategic management. They examine future trends, with emphasis on cutting-edge technological concerns. Students study the discipline's research base, gaining heightened awareness of the synergism between library and information science and other disciplines, as well as the close relationship between research and practice. Finally, students become knowledgeable about the factors that underlie users' information needs and appropriate strategies to assist them.

The University of Iowa offers students the option of completing their degree either on campus or online through a video conferencing system. The School of Library and Information Science combines web-based education with on-campus instruction and collaboration that allows distance students to participate real-time with their campus classmates. Both full- and part-time enrollment options are available for on-campus or virtual coursework. For more information about the online program, see Online M.A. in LIS on the School of Library and Information Science website.

Requirements

The Master of Arts in library and information science requires 36 s.h. of graduate credit. Students must earn a grade of B or higher in all courses for the major. They may repeat a course to remedy a lower grade; see the SLIS Handbook for further details. A thesis option is available for students who seek additional research experience.

Students may apply a maximum of 12 s.h. of graduate transfer credit in library and information science or related areas toward the degree, subject to applicable rules and approval of the transfer credit committee. Approval is determined by the course's content, currency, and applicability to a student's program.

The program may be completed on campus or in a synchronous distance mode, and is designed to be completed in two years with enrollment of 9 s.h. during the fall and spring semesters. The School of Library and Information Science strongly recommends that students not register for more than 12 s.h. during fall and spring semesters and 8 s.h. during summer sessions. The program also may be completed through part-time study.

The curriculum includes two levels of coursework. Core courses consist of five required courses that provide a solid grounding for all successive coursework. Students select seven elective courses based on their areas of interest. This two-level arrangement allows students to concentrate in an area that most closely matches their professional goals.

The Master of Arts in library and information science has held continuous accreditation from the American Library Association since 1971.

The M.A. with a major in library and information science requires the following coursework.

Code	Title	Hours
Core Courses		15
Electives		21
Total Hours		36

Core Courses

Code	Title	Hours
All of these:		
SLIS:5010	Cultural Foundations (taken in student's first semester)	3
SLIS:5020	Computing Foundations (taken in student's first semester)	3
SLIS:5030	Conceptual Foundations	3
SLIS:6115	Information and Inquiry	3
One of these:		
SLIS:6110	Evidence-Based Practice in Library and Information Science	3
SLIS:6170	Organizational Management	3

Electives

Code	Title	Hours
With their advisor's guidance, students select seven of these (21 s.h.):		
SLIS:4150	Introduction to Book Studies	3
SLIS:4910	The Book in the Middle Ages	3
SLIS:4920	The Transition from Manuscript to Print	3
SLIS:5041	College and University Libraries	3
SLIS:5042	Public Libraries	3
SLIS:5043	Special Libraries	3
SLIS:5044	School Library Media Administration	3
SLIS:5200	User Education: Multimedia	3
SLIS:5220	Resources for Children	3
SLIS:5230	Resources for Young Adults	3
SLIS:5240	Resources for Adults	3
SLIS:5520	Studies in Book History and Technologies	0-3
SLIS:5530	Topics in Preservation	3
SLIS:5535	Book Conservation	3
SLIS:5600	History of Readers and Reading	3
SLIS:5700	Cultural Heritage	3
SLIS:5900	Health Informatics	3
SLIS:5950	Health Information and Communication	3
SLIS:6020	Literacy and Learning	3
SLIS:6100	Database Management	3
SLIS:6110	Evidence-Based Practice in Library and Information Science	3
SLIS:6120	Natural Language Processing	3
SLIS:6130	Community Engagement	3
SLIS:6140	Digital Environments	3

SLIS:6145	Digital Preservation and Stewardship	3
SLIS:6150	Information Behavior	3
SLIS:6155	Information Visualization	3
SLIS:6170	Organizational Management	3
SLIS:6250	Beginning Cataloging and Classification	3
SLIS:6255	Beginning Rare Books Cataloging	3
SLIS:6330	Collection Development	3
SLIS:6335	Metadata Theories and Applications	3
SLIS:6345	Stewardship of Information and Collections	3
SLIS:6350	Archives and Media	3
SLIS:6370	Topics in Book Studies	3
SLIS:6380	Analysis of Scholarly Domains	3
SLIS:6411	Topics in Library and Information Science	1-3
SLIS:6490	Information Policy and Ethics	3
SLIS:6520	Practicum in Libraries and Information Centers	3
SLIS:6530	School Library Media Practicum	3
SLIS:6570	Independent Study	1-3
SLIS:6580	Thesis	0-6
SLIS:6590	Digital Humanities Capstone	3
SLIS:7290	Digital Humanities Theory and Practice	3

Specializations

Students' programs often are designed around particular career goals. Examples of possible general specializations are listed below. Information also is available regarding Specialized Focus Areas and Certificates on the School of Library and Information Science website.

Public Libraries

Public libraries provide informational, educational, and recreational materials and a wide range of services for a diverse clientele. Although public libraries receive the bulk of their funding from local taxes, they also may be organized on a regional or statewide cooperative basis. The variety of uses, services, materials, and organizational structures of public libraries makes this a challenging area of librarianship. Public librarians need to develop skills in analyzing the communities they serve, designing comprehensive marketing plans to meet their needs, implementing the plans in a cost-effective way, and evaluating the success of their efforts.

Academic Libraries

The academic library, whether in a community college, a four-year college, or a university, provides information services in support of the parent institution's teaching, research, and public service missions. These services include instruction in the use of the library and its resources. Management skills and subject or language competence often are required. Since librarians in this setting usually are considered academic faculty members, a second master's or other advanced degree is desirable.

Special Libraries and Information Centers

Special libraries serve corporations, private companies, government agencies, technical and academic institutions, museums, medical facilities, and information management consulting firms. They are organized to anticipate and quickly respond to the specific information needs of their users. Special librarians are information resource experts who collect, analyze, evaluate, package, and disseminate information to facilitate accurate decision making. Knowledge of information technology and the ability to design services suitable to the parent organization are professional necessities. In addition, substantial subject expertise may be required.

School Teacher Librarian

School teacher librarians provide instruction to students in accessing, evaluating, and using information; collaborate with teachers on the use of resources in instruction; provide leadership in the use of instructional and information technologies; offer reading guidance; provide reference service; and manage the library media center.

The University of Iowa offers a state-approved program leading to endorsement as school teacher librarian K-12. In order to fulfill state requirements for this endorsement, students must hold or be eligible for a teaching license and must complete a designated sequence of courses that leads both to certification and to the M.A. degree.

Licensed teachers employed in Iowa schools may enroll in a distance education program that leads to an M.A. in library and information science and endorsement for school librarianship. Contact the School of Library and Information Science for details.

Students who are interested in school libraries but lack a valid Iowa teaching license may earn licensure as a school teacher librarian by completing 30 s.h. in the College of Education. The Master of Arts in library and information science with teacher licensure requires 66 s.h. of credit. Students must apply and be admitted to both programs.

Certificate Opportunities

Book Studies/Book Arts and Technologies

Students can earn the Certificate in Book Studies/Book Arts and Technologies offered by the Center for the Book (Graduate College). The certificate prepares them for careers in special collections librarianship while training them in the production and legacy of the book as a physical artifact. For more information, see Combined Programs [p. 1606] in this section of the Catalog.

Informatics

M.A. students have the opportunity to earn the Certificate in Informatics. Specialty areas include bioinformatics and computational biology, geoinformatics, health informatics, and information science. For more information, see the Certificate in Informatics [p. 1597] in the Catalog.

Public Digital Humanities

Students also may apply to earn the Certificate in Public Digital Humanities. The program requires 12 s.h. of graduate credit and offers credentials to students who plan to incorporate digital technology into their future research,

training, or careers. For more information, see the Certificate in Public Digital Humanities [p. 1626] in the Catalog

Certificate Program Application

Separate application to each certificate program is required. For more information, see Degrees and Certificates on the School of Library and Information Science website.

Combined Programs

M.A./J.D.

The School of Library and Information Science and the College of Law offer a combined Master of Arts/Juris Doctor program. Students in the combined program may apply a limited amount of credit toward both degrees. Up to 6 s.h. in law coursework may be applied toward the M.A. in library and information science; up to 12 s.h. in library and information science coursework may be applied to the J.D. degree. Students take law courses their first year and begin taking School of Library and Information Science courses in their second year.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information about the J.D., see Juris Doctor, J.D. [p. 1650] (College of Law) in the Catalog.

Elective courses also are available for students who wish to specialize in law librarianship but who do not wish to pursue the J.D. degree.

M.A./M.F.A. in Book Arts

The School of Library and Information Science and the Center for the Book offer a combined Master of Arts/Master of Fine Arts in book arts. The combined program allows students with strong interests in the physical book to acquire training in the book arts, book history, and material book studies. The earned expertise in the production and legacy of the book as a physical artifact combined with expertise in library and information science can be an asset for those focused on careers in special collections libraries and archives.

Students in the combined program earn both degrees by completing fewer semester hours than if each degree was completed separately. Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information, see the M.F.A. in book arts [p. 1568] in the Catalog.

Students interested in a librarianship career with a more general interest in the physical book should consider the book studies, book arts and technologies/library and information science (BLIS) certificate program; see "Certificate Opportunities" under Requirements [p. 1604] in this section of the Catalog.

M.A./Certificate in Book Studies/Book Arts and Technologies

The Center for the Book and the School of Library and Information Science (SLIS) collaborate to offer the book studies/book arts and technologies/library and information science (BLIS) program. The combined program enables students to earn an M.A. in library and information science and a certificate in book studies. It requires admission to the

School of Library and Information Science M.A. program and the Center for the Book certificate program.

The M.A./Certificate in Book Studies/Book Arts and Technologies offers multiple pathways into professional engagement with artifacts available in archives and libraries, such as rare and artist books. Students select courses that enable them to gain skills and knowledge in areas of service such as conservation, cataloging, instruction, and outreach. The combined program requires 51 s.h. of coursework. Students take 27 s.h. of SLIS courses; 15 s.h. of book arts, studies, and technologies courses; and the remaining 9 s.h. may be taken in either SLIS or Center for the Book coursework, or from another unit with approval from the SLIS advisor.

Admission deadline is February 1 for fall entry. For more information, see the Certificate in Book Studies/Book Arts and Technologies [p. 1570] in the Catalog.

Admission

Applicants begin the admission process by submitting an online graduate application through the Office of Admissions. Applicants then receive a HawkID and can upload the remaining application documents through MyUI. Transcripts of all academic work, a written statement of purpose and goals, a résumé or curricula vitae, and three letters of recommendation are required. Applicants to the teacher librarian program are asked to include a copy of their current teaching certificate. The admission committee considers each applicant's letters of recommendation, statement of purpose, résumé or curricula vitae, and other appropriate criteria, as well as an applicant's grade-point average. Applicants for admission to the M.A. program should have a g.p.a. of at least 3.00 on a 4.00 scale. Graduate Record Examination (GRE) General Test scores are not required. Admission is competitive.

Applicants whose first language is not English must score at least 81 (internet-based) on the Test of English as a Foreign Language (TOEFL). Applicants with TOEFL scores below 100 on the internet-based test are required by the University to take an English Proficiency Test if admitted to the program. In place of TOEFL, the school also accepts International English Testing System (IELTS) scores of 7.0 or higher, with no subscore below 6.0. Applicants who submit IELTS scores are required to take an on-campus English proficiency evaluation.

Completed applications should be received by February 1 for priority consideration for fall admission. Decisions of the admissions committee are announced approximately six weeks after the application deadline. Late applications are considered if places are still available. Financial aid often is not available for late applicants. Admitted students are assigned a faculty advisor for program planning during their first semester.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and

should be discussed with an academic advisor. For additional sample plans, see MyUI.

Course	Title	Hours
Academic Career		
Any Semester		
36 s.h. of graduate level coursework must be completed; up to 12 s.h. of graduate transfer credits allowed upon approval. More information is included in the General Catalog and on department website. ^a		
Students must earn grade B or higher in all courses for the major.		
Students may design their program around particular career goals such as Public Librarianship, Information Processes, Medical Librarianship, Youth Services, Archives and Media, and Academic Librarianship by working with their advisor to determine coursework and sequence.		
Students may pursue select degrees, certificates or a certification simultaneously in less time than would be required to complete the programs of study independently. ^b

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

b Students can complete a combined degree with the SLIS MA and either a Juris Doctor or the Book Arts MFA, or may consider the SLIS MA with the Book Studies/Book Arts and Technologies CER, Informatics CER, or Public Digital Humanities CER. The SLIS MA may also be combined with the School Library Media CERT.

c SLIS core course

d Course should be taken during the first semester of the program.

e Students must complete 7 courses (21 s.h.) of SLIS elective graduate coursework in an area of professional specialization. Work with an academic advisor to determine coursework and sequence. Additional information can be found in the General Catalog and the department website.

f Course should be taken in the second semester of the program.

g Course can be taken in year 1 or 2 based on individual schedule.

Financial Support

The School of Library and Information Science (SLIS) typically offers limited partial-tuition scholarships and graduate assistantships. To be considered for scholarships or assistantships, applicants must meet the M.A. program's grade-point average requirement for admission; see Admission [p. 1606] in this section of the Catalog. At the discretion of the admissions committee, limited graduate assistantships may be offered to incoming students based on academic merit and prior experience. In addition, available assistantships in SLIS and in other programs and departments throughout the University are advertised as they become available; students should apply for specific assistantships.

For information on departmental scholarships, contact the School of Library and Information Science or visit its website to learn about available opportunities. Part-time employment usually is available in the University of Iowa Libraries or other campus units.

Applications for student loans, work-study eligibility, or other financial assistance should be submitted directly to the University's Office of Student Financial Aid.

Career Advancement

Library and information science graduates have many options for employment. Alumni hold positions in public, school, special, and academic libraries as well as other information settings. They serve in varied roles, such as information consultant, database manager, library administrator, webmaster, network coordinator, cataloger, children's librarian, school library media specialist, and archivist.

The school shares announcements of national and international job opportunities through an electronic mailing list. In addition, the Library and Information Science Student Organization (LISSO) sponsors talks by speakers versed in areas of librarianship as well as workshops on résumé writing, social media networking, and interviewing. Internships and other opportunities provide students with hands-on experience that may enhance their job prospects.

For recent information on library and information science placement, see the Library Research Service (LRS) website and the annual Placement and Salaries 2019 report on the Library Journal website.

Special Collections Librarianship, Graduate Certificate

UICB:4920

The Transition from Manuscript to Print

3

For more information, see the School of Library and Information Science website.

Requirements

The graduate Certificate in Special Collections Librarianship requires 15 s.h. of coursework. Students must maintain a g.p.a. of at least 3.00 in work for the certificate.

The certificate program includes 12 s.h. of required coursework that introduces students to the core theories supporting the collection and management of rare books, archival records, and manuscript collections. One elective course allows students to further specialize and focus on archival work, rare books, or digital curation and preservation, and prepares students for the diverse range of careers in libraries, archives, special collections, and manuscript repositories.

The certificate program is designed to meet the guidelines for a graduate program in archival studies by the Society of American Archivists (SAA). The certificate may be earned by any student currently enrolled in the M.A. in library and information science [p. 1604] degree program, the Certificate in Book Studies/Book Arts and Technologies [p. 1570] program, as well as in other graduate programs of study. The Certificate in Special Collections Librarianship is awarded by the Graduate College.

The Certificate in Special Collections Librarianship requires the following coursework.

Required Courses

Code	Title	Hours

Molecular Medicine

Director

- Matthew J. Potthoff (Pharmacology)

Faculty: <https://medicine.uiowa.edu/mcb/faculty>

Website: <https://medicine.uiowa.edu/mcb/>

The Molecular Medicine Program provides interdisciplinary training in the concepts and methodologies fundamental to the investigation of biological processes and molecular mechanisms that relate to human disease.

The program provides the curriculum for the molecular medicine subprogram for the Doctor of Philosophy in biomedical science. It is a sequence of required and elective coursework, which provides students with broad exposure to areas, including molecular biology, cell biology, biochemistry, and integrative sciences. The curriculum ensures comprehensive exposure to conceptual and experimental aspects of molecular and cellular biology and of translational studies. Sufficient flexibility is provided so that students can adapt the program to allow specialization in their own area of interest. See the Ph.D. in biomedical science [p. 1552] (molecular medicine subprogram) in the Graduate College section of the Catalog.

Faculty members are involved in a variety of research projects involving molecular and cellular biology and molecular medicine.

Programs

Graduate Program of Study

Major

- Doctor of Philosophy in Molecular and Cellular Biology

Students interested in doctoral studies in molecular medicine should apply under the umbrella program in Biomedical Science [p. 1549] (select molecular medicine subprogram). Direct application to the Ph.D. in molecular and cellular biology is not currently being considered.

Facilities

Training is conducted primarily in laboratories and teaching facilities of the Carver College of Medicine Stead Family Department of Pediatrics and the Departments of Anatomy and Cell Biology, Biochemistry, Internal Medicine, Microbiology and Immunology, Molecular Physiology and Biophysics, Neurology, Obstetrics and Gynecology, Ophthalmology and Visual Sciences, Otolaryngology—Head and Neck Surgery, Pathology, Pharmacology, Psychiatry, Radiation Oncology, and Surgery; and the College of Liberal Arts and Sciences Departments of Biology and Chemistry. Faculty laboratories and central research facilities available to students provide access to the most up-to-date research equipment.

Courses

Molecular Medicine Courses

MMED:3310 Practical Data Science and Bioinformatics 3 s.h.

Understanding how to access large biological data sets and use them to answer biological questions is an important skill for researchers; immersive introduction to computational handling of data; how to access and analyze publicly available data; critically evaluate data quality and analysis in context of measuring gene expression; basic coding in R/RStudio, plotting and data display, fitting and regression, statistical inference, statistical models, downloading and data wrangling; basic introduction to machine learning (clustering); for students with no computational background. Prerequisites: BIOL:1411 with a minimum grade of C- and BIOL:1412 with a minimum grade of C-. Requirements: college algebra. Recommendations: BIOC:3110, or BIOC:3120 and BIOC:3130, or other upper-level life sciences courses. Same as CBIO:3310.

MMED:5270 Pathogenesis of Major Human Diseases 3 s.h.

Critical analysis of pathogenesis models in a series of major human diseases; clinical presentation, analysis of cellular and molecular events leading to the disease, discussion of key papers. Offered spring semesters of even years. Same as IGPI:5270, PATH:5270.

MMED:6215 Transcription and Multifunctional Regulation by RNA 1 s.h.

Principles and techniques for investigating mechanisms of controlling eukaryotic gene expression; basic genome organization, chromatin structure, transcription, RNA processing, translation; cloning methods, use of electronic sequence databases, footprinting, chromatin immunoprecipitation, in vivo and in vitro transcription assays, DNA microarray analysis, information retrieval. Prerequisites: BMED:5207.

MMED:6220 Mechanisms of Cellular Organization 3 s.h.

Current understanding of basic cell biological processes; key experiments that led to guiding insights; mechanisms that cells use for compartmentalization and how those mechanisms are regulated; biogenesis of major organelles (e.g., mitochondria, peroxisomes, nucleus, secretory/endocytic membrane system); functions of cytoskeleton in cell motility, organelle motility, and cell division. Prerequisites: BIOC:3130. Same as ACB:6220, MPB:6220.

MMED:6225 Growth Factor Receptor Signaling 1 s.h.

Mechanisms of signaling by growth factors; cytokines and related molecules that regulate cell proliferation, development, differentiation, and survival; emphasis on molecular mechanisms of signaling, relevance of these signaling processes to various human diseases. Same as ACB:6225, MPB:6225.

MMED:6226 Cell Cycle Control 1 s.h.

Cell cycle regulation, DNA damage-dependent cell cycle regulation, redox-dependent cell cycle regulation, cellular senescence. Same as ACB:6226, MPB:6226.

MMED:6227 Cell Fate Decisions 1 s.h.

Cellular fate decisions including signal integration, terminal differentiation in development, mechanisms of embryonic stem cell gene regulation/cellular reprogramming, cell death paradigms, and cell death in development and cancer. Same as ACB:6227, MPB:6227.

MMED:6230 Pathogenesis of Metabolic and Cardiovascular Disorders **3 s.h.**

Students focus on metabolic and cardiovascular diseases—the leading cause of morbidity and mortality in the United States; introduction to major subclasses of metabolic and cardiovascular diseases, definition of pathogenesis and clinical features of diseases, and exploration of methodologies used to study diseases; course format includes lecture, critical examination of literature, and demonstration of experimental models.

MMED:6250 Mechanisms of Parasitism Journal Club **1 s.h.**

Reviews of recent publications in molecular parasitology research and thesis research by training grant or journal club students. Same as MICR:6250.

MMED:6260 Methods for Molecular and Translational Medicine **1 s.h.**

Basic and advanced scientific techniques used to integrate biological questions in molecular and translational medicine; particularly useful for comprehensive exam preparation.

MMED:6270 Pathogenesis of Cardiovascular Disorders **3 s.h.**

Students focus on cardiovascular diseases—the leading cause of morbidity and mortality in the United States; introduction to major subclasses of cardiovascular diseases, definition of pathogenesis and clinical features of diseases, and exploration of methodologies used to study diseases; format includes lecture, critical examination of literature, and demonstration of experimental models.

MMED:6280 Critical Thinking in Molecular Medicine **1 s.h.**

Opportunity to work closely with participating faculty to gain skill in critical reading of research literature and facility in presenting material to an audience. Requirements: advanced graduate standing.

MMED:7290 Seminars in Molecular Medicine **1 s.h.**

Research findings in molecular biology. Requirements: molecular and cellular biology graduate standing.

MMED:7305 Molecular Medicine Research **arr.**

Requirements: molecular and cellular biology graduate standing.

MMED:7310 Translational Medicine Education Rounds **1 s.h.**

Students obtain clinical insights into their area of specialty in biomedical research through selection of a clinical mentor to complement the expertise of their research mentor; clinical mentors provide students with case studies, clinical scenarios, and physician shadowing opportunities which may allow students to gain new perspectives and insight into applications of biomedical research. Requirements: enrollment in Molecular Medicine Program, completion of rotations, and selection of a research mentor.

MMED:8115 Molecular Physiology **4 s.h.**

Principles of human physiology, organ systems, cell function. Offered fall semesters.

Neuroscience

Chair

- Daniel T. Tranel (Neurology/Psychological and Brain Sciences)

Graduate degree: Ph.D. in neuroscience

Faculty: <https://neuroscience.grad.uiowa.edu/faculty/directory>

Website: <https://neuroscience.grad.uiowa.edu>

The Neuroscience Program provides an interdisciplinary and interdepartmental approach to graduate education and research training in the structure, function, and development of the nervous system and its role in cognition and behavior. Students obtain training at all levels of the nervous system, from cellular/molecular to the behavioral/cognitive.

Programs

Graduate Program of Study

Major

- Doctor of Philosophy in Neuroscience [p. 1612]

Facilities

Training is conducted primarily in the laboratories and teaching facilities of the Carver College of Medicine graduate Departments of Anatomy and Cell Biology, Biochemistry, Internal Medicine, Molecular Physiology and Biophysics, Neurology, Pharmacology, and Psychiatry; the College of Liberal Arts and Sciences Departments of Biology, Communication Sciences and Disorders, Health and Human Physiology, and Psychological and Brain Sciences; and the Neuroscience Program.

Students use faculty laboratories and central research facilities for ultrastructural analysis; histochemistry and immunocytochemistry; electrophysiology; fluorescence-activated cell sorting; cellular and subcellular biochemistry; cell, tissue, and organ culture; operant and classical conditioning; molecular biology; behavioral genetics; neural substrates of complex behavior; brain-behavior relationships in humans; neuropsychology; and functional neuroimaging (PET, fMRI).

Courses

Neuroscience Courses

NSCI:4353 Neurophysiology: Cells and Systems 3-4 s.h.

Physiological properties of nerve cells, nervous systems; axonal conduction, synaptic transmission, sensory transduction, integrative processes, higher functions. Prerequisites: (BIOL:2753 or BIOL:3253) and (MATH:1460 or MATH:1380 or MATH:1550 or MATH:1850) and ((PHYS:1511 and PHYS:1512) or (PHYS:1611 and PHYS:1612)). Same as BIOL:4353.

NSCI:5212 Foundations in Behavioral and Cognitive Neuroscience 4 s.h.

Concepts, methods, and findings in behavioral and cognitive neurosciences. Prerequisites: BIOL:3253 or PSY:5210 or NSCI:5210. Same as PSY:5212.

NSCI:5365 Seminar: Neuropsychology and Neuroscience arr.

Clinical neuropsychology and cognitive neuroscience: cutting-edge research from scientific journals, case presentations in clinical neuropsychology, and current research. Same as NEUR:5365, PSY:5365.

NSCI:5653 Fundamental Neurobiology 3 s.h.

Neurobiology from molecular/cellular to systems levels, including cell biology of the neuron; membrane electrophysiology; synaptic transmission and plasticity, functional neuroanatomy, peripheral and CNS sensory systems, emotion, memory, sleep, language, attention and cognition, neuronal development. Same as BIOL:5653, PSY:5203.

NSCI:5658 Fundamental Neurobiology Discussion 1 s.h.

Discussion of selected papers, including classics from neurobiology literature; coordinated with BIOL:5653 lecture material. Same as BIOL:5658, PSY:5204.

NSCI:6050 Advanced Quantitative Training for Neuroscience 4 s.h.

Review of statistical inference, type-I errors, statistical power, measurement reliability issues in context of between-/within-subjects t-tests, ANOVAs, correlations, and regressions with attention to causality and generalizability; multiple linear regression, model building, model testing, confounding/mediation, interactions; mixed models with nested/crossed, fixed/random factors, and repeated measure designs. Offered spring semesters. Prerequisites: PSY:5050.

NSCI:6209 Steroid Receptor Signaling 1 s.h.

Structure-function relationship and genomic and nongenomic actions of the steroid hormone receptor family; basis for actions of novel new ligands on these receptors. Offered spring semesters of even years. Same as MPB:6209, PCOL:6209.

NSCI:6240 Topics in Cognitive Neuroscience 1-3 s.h.

Key topics in the neural basis of human cognition; research literature. Recommendations: graduate courses in basic neuroscience and cognitive psychology. Same as NEUR:6240.

NSCI:6265 Neuroscience Seminar 0-1 s.h.

Research presentations. Same as ACB:6265, BIOL:6265, MPB:6265, PSY:6265.

NSCI:7235 Neurobiology of Disease 3 s.h.

Broad, thematic understanding of disease mechanisms in neurobiological disorders. Same as NEUR:7235.

NSCI:7301 Directed Study in Neuroscience arr.

NSCI:7305 Neuroscience Research arr.

Requirements: neuroscience graduate standing.

Neuroscience, Ph.D.

For information about predoctoral training opportunities in neuroscience, contact the Neuroscience Program or visit its website.

Requirements

The Doctor of Philosophy program in neuroscience requires a minimum of 72 s.h. of graduate credit. The program's curriculum is designed around three tracks: molecular/cellular, developmental/systems, and cognitive/behavioral. Following broad-based instruction in a core curriculum, students specialize in one of the tracks.

Within a framework of core, track-specific, and elective courses, students pursue a program of study individually designed according to their undergraduate training and graduate research goals. After enrolling in the Neuroscience Program, entering students consult with the advisory committee regarding their level of preparation for the program's required courses.

The Student Advisory Committee meets with all first- and second-year graduate students once each semester, helping students explore their research interests and select faculty mentors for the required laboratory rotations. Each student is expected to complete three rotations in faculty laboratories before selecting a thesis advisor. Rotations ordinarily last 12 weeks but may last from 8 to 16 weeks. Under special circumstances, two rotations may be in the same laboratory, an arrangement that permits a student to learn a variety of techniques and approaches before settling down to work on the dissertation project. Students usually choose a dissertation lab at the end of their first year.

Background Requirements

Students are expected to demonstrate competency, through prerequisites or coursework, in each of four fields: biochemistry, general physiology, cell biology, and statistics. These requirements ordinarily should be fulfilled by the end of the first year of graduate study. Waivers of background course requirements may be requested by students who have taken equivalent courses before entering the Neuroscience Program.

Neuroscience Core

The following courses form the core of the neuroscience graduate curriculum.

Code	Title	Hours
NSCI:5653	Fundamental Neurobiology	3
ACB:6252	Functional Neuroanatomy	arr.
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
PSY:6370	Principles of Neuropsychology	3
One statistics course		3-4

In addition, students register for the following two courses each semester:

NSCI:6265	Neuroscience Seminar	0-1
NSCI:7305	Neuroscience Research	arr.

Electives

Elective requirements may be met by completing 8 s.h. from a list of courses offered by the Departments of Anatomy and Cell Biology, Biology, Molecular Physiology and Biophysics, Pharmacology, Psychological and Brain Sciences, and other departments as appropriate. With permission of the Student Advisory Committee, students may satisfy the elective requirement wholly or in part by registration in the following course.

Code	Title	Hours
NSCI:7301	Directed Study in Neuroscience	arr.

Combined Programs

Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in neuroscience in a combined degree program offered by the Graduate College and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1711] (Carver College of Medicine) in the Catalog.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Financial Support

All students receive a financial stipend of \$30,500 plus tuition for the 2020-21 academic year. Financial support comes from training grants, research assistantships, teaching assistantships, scholarships, individual research grants, or other departmental or college funds. All students are required to teach as part of their development as future scientists and faculty members.

The Neuroscience Program is committed to supporting its graduate students for their entire training period. Students normally are supported in the first year by the program. After that, support is expected to come from a student's primary research mentor. Occasionally, advanced students are supported through teaching assistantships.

See Financial Assistance on the Interdisciplinary Graduate Program in Neuroscience website and Finances on the Graduate Admissions website for more information.

NIH Training Grant

The Neuroscience Program is supported by a training grant from the National Institutes of Health. The grant provides stipend and tuition support for a select group of first- and second-year graduate students.

Planning and Public Affairs

Director

- Charles E. Connerly

Graduate degrees: M.P.Aff.; M.S. in urban and regional planning

Faculty: <https://sppa.uiowa.edu/faculty-and-staff>

Website: <https://sppa.uiowa.edu/>

Planning and public affairs encompasses the development and implementation of public policies that improve the quality of life in cities and regions as well as protects the environment and sustains the earth. Areas of concentration include economic development, geographic information systems (GIS), land use and environmental planning, housing and community development, and transportation. Focus is on analytical urban planning, public policy, and sustainability.

The School of Planning and Public Affairs is a campus leader in community engagement and hosts the Iowa Initiative for Sustainable Communities (IISC) through which students from disciplines across campus provide key answers to important sustainability questions for communities in Iowa.

Related Certificate

Transportation Studies

The Transportation Studies Program offers the Certificate in Transportation Studies. The program focuses on the varied and complex problems of transportation and on interdisciplinary approaches to addressing them. The Departments of Civil and Environmental Engineering, Industrial and Systems Engineering, Mechanical Engineering (College of Engineering), Economics (Tippie College of Business), and the School of Planning and Public Affairs (Graduate College) participate in the program.

The certificate is coordinated by the School of Planning and Public Affairs. See the Certificate in Transportation Studies [p. 1632] (Graduate College) in the Catalog.

Programs

Graduate Programs of Study

Majors

- Master of Public Affairs [p. 1619]
- Master of Science in Urban and Regional Planning [p. 1622]

Courses

Planning and Public Affairs Courses

- Urban and Regional Planning Courses [p. 1613]
- Public Affairs Courses [p. 1616]

Urban and Regional Planning Courses

URP:2013 Introduction to Sustainability **arr.**

Introduction to sustainability knowledge, skills, and habits as a means to shape one's vision of a sustainable citizen; emphasis on basic skills of literacy, applied math, and finding information; traditional sustainability knowledge areas related to society, economy, and environment; intersecting themes (e.g., informed consumerism, eco-economics, and livable environments). Same as BUS:2013, GEOG:2013, SUST:2013.

URP:3001 Planning Livable Cities **3 s.h.**

Development of livable cities in the United States; economic, physical, environmental, and political forces that shape their growth; impact of planning, how it shapes the future of cities. Same as GEOG:3920.

URP:3134 Regional and Urban Economics **3 s.h.**

Theory of location and regional development; central place theory; why cities exist and trade with one another; models of land use patterns, rents; empirical tests of models; policy applications. Prerequisites: ECON:1100. Same as ECON:3640.

URP:3135 Environmental and Natural Resource Economics **3 s.h.**

Environmental and resource use problems; efficient mechanisms and other policies for environmental protection, management of common property resources. Prerequisites: ECON:1100. Same as ECON:3625.

URP:3217 Negotiation and Conflict Resolution **3 s.h.**

Strategies of successful negotiation across a wide range of conflict situations; keys to success in peacefully resolving conflicts; personal, professional, legal, and political negotiations; apologizing; mediation as alternative to litigation; analysis of conflict characteristics to determine optimal negotiation strategies; development of negotiation interpersonal skills; practice negotiating under real world scenarios. Prerequisites: RHET:1030 or RHET:1040 or RHET:1060. Same as PBAF:3217, RHET:3009.

URP:3350 Transportation Economics **3 s.h.**

Overview of transportation markets—intercity, rural, urban; transportation modes—rail, highway, air, water, pipeline, transit; issues in finance, policy, planning, management, physical distribution, and environmental, economic, and safety regulation. Recommendations: ECON:1100 and ECON:1200. Same as ECON:3750, GEOG:3940.

URP:3360 Urban Transportation **arr.**

Transportation in the urban market; urban transport modes, technologies, costs, pricing, and ways to develop and analyze urban policy in order to promote city livability and sustainability; development of urban transportation and transport operations in the U.S. and worldwide; urban transport policies, plans, and policy development processes; major urban transportation issues, investigation of possible means of attacking urban transportation issues. Prerequisites: ECON:1100. Same as ECON:3770.

URP:4170 Megacities Seminar **1-3 s.h.**

Global historical, political, economic, urban, and cultural aspects of megacity development; planning methods to address contemporary and emerging issues; critical analysis of peer-reviewed literature and computational simulations; topics include urban sprawl, poverty and inequality, economies, food scarcity, population growth, governance models, environmental and health concerns, sustainability.

- URP:4262 Transportation Demand Analysis 3 s.h.**
City planning procedures and traffic engineering techniques applied to transportation problems; trip generation, distribution, assignment, mode choice models; travel surveys, data collection techniques; arterial flow, intersection performance, parking; transit system analysis. Same as CEE:4176.
- URP:4750 Environmental Impact Analysis 3 s.h.**
In-depth exposure to the history and evolution of the U.S. Environmental Impact Assessment (EIA) process; discussion of major court cases; ecological, economic, and political aspects of current environmental controversies; exposure to real-world scenarios that are crucial to understanding the EIA process in action; field trips to six or seven environmental control facilities in Iowa City and neighboring areas. Prerequisites: GEOG:1070. Same as GEOG:4750.
- URP:4752 Eight Generational Planning: Envisioning Cities for Year 2228 3 s.h.**
Star Trek tells us that Captain Kirk will be born in Iowa in 2228, what should cities look like in that year? Students envision and design great regenerative cities in the age of Anthropocene—the period we are in which features substantial human influence on climate and the environment; exploration of contemporary philosophies and urban strategies for sustainability, resilience, post-scarcity abundance, human well-being, social inclusiveness, and justice in an era of rapid changes in society, technology, climate, and environment.
- URP:4760 Sustainable Urban Development: The Hong Kong Experience 3 s.h.**
Today about 52 percent of the world's population lives in urban areas; by 2050 almost 70 percent will be living in cities and towns; how the shape, size, and form of urban areas and how people live in them have significant impact on the environment; students explore theories and practices pertaining to sustainable urban development and learn about urban environmental issues around the world and significant socioeconomic problems arising from current patterns of urban development that are, on the whole, not sustainable; introduction to many innovative approaches for making cities more sustainable.
- URP:5678 Application Simulation to Transportation 3 s.h.**
Transportation system management and traffic engineering; application of real-time simulation and visualization. Prerequisites: CEE:3763 or CEE:4763. Same as CEE:5678.
- URP:5800 Environmental Economics and Policy 3 s.h.**
Reasons why markets fail in environmental realm (e.g., externalities, common pool resources, club goods, public goods); ecosystem services and techniques used for their valuation; revealed and stated preferences; cost-benefit analysis and role in policy-making process; tools to address environmental market failures, particularly command and control, taxes and subsidies, and mitigation markets; focus on air pollution, climate change, and water-related policies. Same as GEOG:5800, PBAF:5800.
- URP:6200 Analytic Methods I 1-3 s.h.**
Methods used in planning and policy analysis; emphasis on application of statistical techniques and quantitative reasoning to planning problems; use of computers and data systems in planning analysis. Same as PBAF:6200.
- URP:6201 Analytic Methods II 3 s.h.**
Integration of methods with the planning process; application of multiple regression, population estimation and projection, survey methods, time series analysis, industrial growth and change; presentation of results to decision makers and the public. Prerequisites: URP:6200. Same as PBAF:6201.
- URP:6202 Land Use Planning: Law and Practice 4 s.h.**
Legal, social foundations of land use planning; comprehensive planning, zoning and subdivision review; legal aspects of land use, environmental planning; ordinance drafting; staff report writing; citizen participation.
- URP:6203 History and Theories of Planning 3 s.h.**
History of urban planning and policy in America as a reflection of social and economic forces; alternative planning philosophies, roles, and ethical choices open to planners and policy leaders; special attention given to ways in which urban planning has confronted issues of racism and social justice, as well as climate change and its implications for cities and social justice. Same as HIST:6203.
- URP:6205 Economics for Policy Analysis 1,3 s.h.**
Principles of economics for planners; concepts and techniques of microeconomic analysis; income inequality; the role of government in the economy; tax and pricing policy; project evaluation; externalities. Same as PBAF:6205.
- URP:6208 Program Seminar 1 s.h.**
Planning process, roles of planners, professional ethics and standards. Same as PBAF:6208.
- URP:6209 Field Problems in Planning I 3 s.h.**
Experience working on a two-semester project involving a current planning issue, usually for a client. Requirements: urban and regional planning graduate standing.
- URP:6210 Field Problems in Planning II 3 s.h.**
Continuation of URP:6209. Prerequisites: URP:6209. Requirements: urban and regional planning graduate standing.
- URP:6211 Community Outreach Practicum 1-3 s.h.**
Application of planning skills to community work by nonprofit organizations in local area; urban planners contributing to their communities; community outreach.
- URP:6225 Applied GIS for Planners 3 s.h.**
Analysis of Census of Population data using GIS software; data and analytical needs of urban planners; coverage of GIS topics to plan functions of GIS and spatial analysis, varied GIS software in a planning organization; structure of the Census.
- URP:6227 Spatial Analysis in Planning and Policy Making 3 s.h.**
Databases, GIS, planning support systems; spatial model building and use of spatial statistics; applications to substantive problems in transportation, environment, housing, economic development. Recommendations: completion of an introductory GIS course.
- URP:6228 GIS for Local Government 1 s.h.**
Development, maintenance, and operation of an enterprise-wide Geographic Information System (GIS); implementation of a parcel-based data system model common to government entities; practical experience using data for land-use planning analysis.
- URP:6229 Practicum 1-5 s.h.**
Full-time internship of at least five months with a planning-related organization. Requirements: urban and regional planning graduate standing.

- URP:6233 Public Finance and Budgeting** 3 s.h.
Local budgeting process and revenue instruments available for local governments to finance their infrastructure; local budgeting process, mechanics of property tax and other revenue sources, connection between taxation and land use, economic development, growth management, and transportation; issues regarding financing K-12 public schools. Prerequisites: URP:6205 or PBAF:6205. Same as PBAF:6233.
- URP:6235 Geodatabases and GIS** 1 s.h.
Geodatabase implementation in the management of large GIS data sets. Prerequisites: URP:6225.
- URP:6240 Public Management** 3 s.h.
Public management in a democratic society; balancing of administrative and democratic values and interests; examination of institutional, political, organizational, and ethical context of public management and policy making; students acquire important management, leadership, and decision making skills, as well as reflect on their values and behaviors with regard to administration and public service, particularly in a diverse and changing society; service in public sector contrasted with service in private and nonprofit sectors. Same as PBAF:6240.
- URP:6242 Planning and City Administration** 1 s.h.
Relationship of planners and other local government personnel; how planning fits into city management; city management view of local political process, provision of city services, finance and budgeting, human resources, intergovernmental relations, how meetings are run, dealing with the public.
- URP:6243 The Land Development Process** 3 s.h.
How land is developed; analysis of site suitability, preparation of subdivision plan, site plan review, development approval process, infrastructure and site preparation, negotiating local development politics; field trips. Prerequisites: URP:6202.
- URP:6245 Growth Management** 3 s.h.
Causes and consequences of urban sprawl, shortfalls in conventional land use planning; local and state growth management policies, techniques of policy implementation, positive and negative impacts of such policies; Smart Growth; emerging challenges. Prerequisites: URP:6202. Same as PBAF:6245.
- URP:6249 Sustainability Seminar** 1 s.h.
Focus of increasing interest for planning students and practicing planners; involves environmental effects, economy, social justice; discussion and investigation of sustainability practice applied to local and regional efforts of public and private entities; greater awareness and understanding of the effectiveness and resource requirements of local activities addressing sustainability; presentations by the instructor, local tours, guest lectures.
- URP:6253 Designing Sustainable and Healthy Cities** 1-3 s.h.
Principles and practical elements of urban design for sustainable and healthy cities; general urban design background for policy makers and planners; impacts of urban design for environmental sustainability and for community health and well-being; physical, mental, social, and environmental health as they are affected by urban form, air and water quality, green spaces and climate change impacts. Same as PBAF:6253.
- URP:6256 Environmental Policy** 3 s.h.
Environmental policy formation and politics; comparative international perspective on the United States' experience. Same as PBAF:6256.
- URP:6257 Environmental Management** 3 s.h.
Environmental best management practices for sustainable management of natural resources; open space and habitat protection, prairie and wetland restoration, water supplies management, natural hazard mitigation, farmland protection. Same as PBAF:6257.
- URP:6258 Modeling Dynamic Systems** 3 s.h.
Nonlinear dynamics in human-environment relationships; quantitative modeling of global environment processes; environment modeling for policy and land use planning; introduction to fundamentals of linked global-scale environment processes from a systems perspective, focus on historical and contemporary role of human activities in altering flows of energy and mass within the Earth system; hands-on simulation and group games to understand feedback loops in complex systems, with applications to land use, water, climate, ecosystems, and nutrient cycles across time and spatial scales; emphasis on quantifying effects of policies and planning on environmental change. Same as PBAF:6258.
- URP:6260 Transportation Policy and Planning** 3 s.h.
Institutional setting for transportation planning, evolution of domestic transportation policy, international influences, transportation modes and markets, current sources of transportation planning information, emerging policy issues. Same as PBAF:6260.
- URP:6265 Planning Sustainable Transportation** 3 s.h.
Theories and methods of exerting public control over passenger and freight transportation; social and environmental regulation; effects of changing finance, regulation, and pricing policies, including privatization, tolls, impact fees. Same as GEOG:6264, PBAF:6265.
- URP:6266 Transportation and Land Use Planning** 3 s.h.
Policies and interactions between transportation and land use; location theories and practices; transportation infrastructure, land use, travel behavior modeling; current policies that influence travel behavior and urban form. Same as PBAF:6266.
- URP:6268 Freight Transportation Planning** 3-4 s.h.
Freight transportation planning in the United States; surface modes, primarily trucking and rail, as well as trade-offs in bulk movements by inland waterways and pipelines; comparison with recent developments in policy, planning, and practice for surface transportation in other developed economies (e.g., Europe).
- URP:6269 Transportation Program Seminar** 1 s.h.
Transportation finance, safety and economic regulation, planning processes, management, government policy issues at federal, state, and local levels.
- URP:6271 Housing Policy** 3 s.h.
Recent housing policy initiatives at federal, state, and local levels. Same as PBAF:6271.
- URP:6273 Community Development in the Upper Midwest** 3 s.h.
Examination of issues, challenges, and possible solutions confronting small-to-medium sized towns, typically under 50,000 people, in Iowa and elsewhere in the Upper Midwest (Illinois, Wisconsin, Minnesota); students and faculty partner with an Iowa community to develop ideas and plans for community revitalization. Same as PBAF:6273.
- URP:6277 Affordable Housing Finance** 3 s.h.
Financing development or rehabilitation of affordable housing; low-income housing tax credits, the housing finance system and current regulatory issues, mortgage discrimination, improving financing for rental housing.

URP:6278 Nonprofit Organizational Effectiveness

I **3 s.h.**
Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as HMP:6360, MGMT:9150, PBAF:6278, RELS:6070, SPST:6010, SSW:6247.

URP:6279 Nonprofit Organizational Effectiveness

II **3 s.h.**
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Requirements: for HMP:6365—HMP:6360 or MGMT:9150. Same as HMP:6365, MGMT:9160, PBAF:6279, RELS:6075, SPST:6020, SSW:6248.

URP:6280 Planning for Disaster Mitigation and Recovery

2-3 s.h.
Types of disasters that communities face; what role planners play, what role should they play; importance of hazard mitigation and planning for post-disaster recovery; where planners' unique skills play the most significant roles in aiding a community to redesign a safer future. Same as PBAF:6280.

URP:6282 Grant Writing

1-2 s.h.
Same as PBAF:6282, SSW:6282.

URP:6290 Economic Impact Assessment

3 s.h.
Economic impact and growth analysis, including economic base, income expenditure, input-output analysis; use of economic impact analysis in a cost-benefit context; industrial location and mobility theory with statistics applications. Prerequisites: URP:6205.

URP:6295 Economic Development Policy

3 s.h.
Analysis of policies and programs at national, regional, state, and local levels that address problems of economic growth, development, decline. Same as PBAF:6295.

URP:6297 Economic Development Finance

3 s.h.
Business financial statements and evaluation of loan proposals; small business finance including financing working capital, fixed assets, and real estate; economic development agencies and institutions; and case studies of economic development financing. Prerequisites: URP:6205. Same as PBAF:6297.

URP:6305 Readings

arr.

URP:6315 Independent Study in Planning

1-6 s.h.
Research and analysis of a special planning problem; opportunity to apply knowledge in area of specialization.

URP:6320 Introduction to Graphic Communications

2 s.h.
Visual communication techniques through use of print and digital media; how to graphically convey concepts and information to a variety of audiences; basic design principles to build a foundation in graphic communication; relationships between various software packages; advantages and shortcomings of various digital tools; development of professional graphic media that is beautiful and effective.

URP:6325 Thesis: Urban and Regional Planning

arr.

URP:6330 Developing Graphic Content

1 s.h.
Skills necessary to develop graphic content utilized by professionals in the field of urban and regional planning; students learn to use programs such as SketchUp, LayOut, Google Earth, and Lumion; produce maps, diagrams, experiential perspectives, renderings, and other visuals; and convey a variety of ideas pertaining to the urban environment.

URP:6335 Internship

2 s.h.
Work in a planning or related agency or nonprofit organization.

URP:6340 Public Policy Analysis

3 s.h.
Rationales and goals of public policy; major steps, key methods, and tools in policy analysis; professional delivery of policy recommendations. Same as PBAF:6340.

URP:6400 Sustainable Development: The Kerala Experience

3 s.h.
Exploration of student interests in social entrepreneurship, global health, microfinance, cultural production, environmental sustainability, or other development issues in India; varied disciplinary perspectives (i.e., public health, business, social work, geography, art); student work with Indian NGOs employing a diverse variety of techniques to address social problems such as child labor, health care for the poor, illiteracy, and disability services. Winter session. Same as PBAF:6400.

Public Affairs Courses**PBAF:3217 Negotiation and Conflict Resolution**

3 s.h.
Strategies of successful negotiation across a wide range of conflict situations; keys to success in peacefully resolving conflicts; personal, professional, legal, and political negotiations; apologizing; mediation as alternative to litigation; analysis of conflict characteristics to determine optimal negotiation strategies; development of negotiation interpersonal skills; practice negotiating under real world scenarios. Prerequisites: RHET:1030 or RHET:1040 or RHET:1060. Same as RHET:3009, URP:3217.

PBAF:5111 American Public Policy

3 s.h.
Introduction to study of public policy in the United States; development of analytical skills necessary to better understand and explain contemporary policy debates and public policy decision making that takes place at the local, state, and national levels in the United States; topics include a mix of theoretical approaches and substantive policy areas to better understand how policy is made, manipulated, and maintained; examination of demands and supports, institutional, and environmental variables that drive American public policy. Same as POLI:5111.

PBAF:5117 Bureaucratic Politics and Public Administration

3 s.h.
Examination of the federal bureaucracy from political, theoretical, and practical perspectives; what we mean by "federal bureaucracy," how it developed over time, how it performs its tasks, and how it affects American policy and politics. Same as POLI:5117.

PBAF:5200 American State Politics

3 s.h.
Approaches to analysis of political behavior in American state governments; emphasis on cultures, parties, actors, processes, issues. Same as POLI:5200.

PBAF:5800 Environmental Economics and Policy

3 s.h.
Reasons why markets fail in environmental realm (e.g., externalities, common pool resources, club goods, public goods); ecosystem services and techniques used for their valuation; revealed and stated preferences; cost-benefit analysis and role in policy-making process; tools to address environmental market failures, particularly command and control, taxes and subsidies, and mitigation markets; focus on air pollution, climate change, and water-related policies. Same as GEOG:5800, URP:5800.

- PBAF:6200 Analytic Methods I** 1-3 s.h.
Methods used in planning and policy analysis; emphasis on application of statistical techniques and quantitative reasoning to planning problems; use of computers and data systems in planning analysis. Same as URP:6200.
- PBAF:6201 Analytic Methods II** 3 s.h.
Integration of methods with the planning process; application of multiple regression, population estimation and projection, survey methods, time series analysis, industrial growth and change; presentation of results to decision makers and the public. Prerequisites: URP:6200. Same as URP:6201.
- PBAF:6205 Economics for Policy Analysis** 1,3 s.h.
Principles of economics for planners; concepts and techniques of microeconomic analysis; income inequality; the role of government in the economy; tax and pricing policy; project evaluation; externalities. Same as URP:6205.
- PBAF:6208 Program Seminar** 1 s.h.
Planning process, roles of planners, professional ethics and standards. Same as URP:6208.
- PBAF:6210 Public Affairs Capstone** 3 s.h.
Students work on a community, state, federal, or nonprofit-based project with focus on research and development of policy proposals and management action steps. Requirements: M.P.Aff. graduate standing.
- PBAF:6233 Public Finance and Budgeting** 3 s.h.
Local budgeting process and revenue instruments available for local governments to finance their infrastructure; local budgeting process, mechanics of property tax and other revenue sources, connection between taxation and land use, economic development, growth management, and transportation; issues regarding financing K-12 public schools. Prerequisites: URP:6205 or PBAF:6205. Same as URP:6233.
- PBAF:6238 Public Human Resource Management** 3 s.h.
Fundamental human resource management principles; application to a variety of human resource issues in public and nonprofit organizations including recruitment, employee development and evaluation, compensation and benefits, diversity, performance management systems, health/safety systems, and employee relations.
- PBAF:6239 Organizational Dynamics and Leadership** 3 s.h.
Dynamics of public and nonprofit organizations and the role of leadership—especially in a democratic context—in shaping the direction of those organizations; major theories of public organizations as well as of leadership; examination of distinctive attributes of public organizations and the environments they occupy, including political environments; organizational goals and goal setting; organizational structure and management; leadership and teamwork; management of organizational change; reflection on the role that leadership plays in context of public organizations.
- PBAF:6240 Public Management** 3 s.h.
Public management in a democratic society; balancing of administrative and democratic values and interests; examination of institutional, political, organizational, and ethical context of public management and policy making; students acquire important management, leadership, and decision making skills, as well as reflect on their values and behaviors with regard to administration and public service, particularly in a diverse and changing society; service in public sector contrasted with service in private and nonprofit sectors. Same as URP:6240.
- PBAF:6241 Strategic Management of Public and Nonprofit Organizations** 3 s.h.
Application of well-known concepts of strategic planning and management to public and nonprofit organizations; topics include environmental assessment, mission identification, strategic issue identification, strategy formulation, strategic budgeting, strategic management and human relations, information technology and strategic management, performance measurement, strategic communication, strategic management and collaboration, strategic management and politics.
- PBAF:6245 Growth Management** 3 s.h.
Causes and consequences of urban sprawl, shortfalls in conventional land use planning; local and state growth management policies, techniques of policy implementation, positive and negative impacts of such policies; Smart Growth; emerging challenges. Prerequisites: URP:6202. Same as URP:6245.
- PBAF:6253 Designing Sustainable and Healthy Cities** 1-3 s.h.
Principles and practical elements of urban design for sustainable and healthy cities; general urban design background for policy makers and planners; impacts of urban design for environmental sustainability and for community health and well-being; physical, mental, social, and environmental health as they are affected by urban form, air and water quality, green spaces and climate change impacts. Same as URP:6253.
- PBAF:6256 Environmental Policy** 3 s.h.
Environmental policy formation and politics; comparative international perspective on the United States' experience. Same as URP:6256.
- PBAF:6257 Environmental Management** 3 s.h.
Environmental best management practices for sustainable management of natural resources; open space and habitat protection, prairie and wetland restoration, water supplies management, natural hazard mitigation, farmland protection. Same as URP:6257.
- PBAF:6258 Modeling Dynamic Systems** 3 s.h.
Nonlinear dynamics in human-environment relationships; quantitative modeling of global environment processes; environment modeling for policy and land use planning; introduction to fundamentals of linked global-scale environment processes from a systems perspective, focus on historical and contemporary role of human activities in altering flows of energy and mass within the Earth system; hands-on simulation and group games to understand feedback loops in complex systems, with applications to land use, water, climate, ecosystems, and nutrient cycles across time and spatial scales; emphasis on quantifying effects of policies and planning on environmental change. Same as URP:6258.
- PBAF:6260 Transportation Policy and Planning** 3 s.h.
Institutional setting for transportation planning, evolution of domestic transportation policy, international influences, transportation modes and markets, current sources of transportation planning information, emerging policy issues. Same as URP:6260.
- PBAF:6265 Planning Sustainable Transportation** 3 s.h.
Theories and methods of exerting public control over passenger and freight transportation; social and environmental regulation; effects of changing finance, regulation, and pricing policies, including privatization, tolls, impact fees. Same as GEOG:6264, URP:6265.

PBAF:6266 Transportation and Land Use Planning 3 s.h.

Policies and interactions between transportation and land use; location theories and practices; transportation infrastructure, land use, travel behavior modeling; current policies that influence travel behavior and urban form. Same as URP:6266.

PBAF:6271 Housing Policy 3 s.h.

Recent housing policy initiatives at federal, state, and local levels. Same as URP:6271.

PBAF:6273 Community Development in the Upper Midwest 3 s.h.

Examination of issues, challenges, and possible solutions confronting small-to-medium sized towns, typically under 50,000 people, in Iowa and elsewhere in the Upper Midwest (Illinois, Wisconsin, Minnesota); students and faculty partner with an Iowa community to develop ideas and plans for community revitalization. Same as URP:6273.

PBAF:6278 Nonprofit Organizational Effectiveness I 3 s.h.

Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as HMP:6360, MGMT:9150, RELS:6070, SPST:6010, SSW:6247, URP:6278.

PBAF:6279 Nonprofit Organizational Effectiveness II 3 s.h.

Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Requirements: for HMP:6365—HMP:6360 or MGMT:9150. Same as HMP:6365, MGMT:9160, RELS:6075, SPST:6020, SSW:6248, URP:6279.

PBAF:6280 Planning for Disaster Mitigation and Recovery 2-3 s.h.

Types of disasters that communities face; what role planners play, what role should they play; importance of hazard mitigation and planning for post-disaster recovery; where planners' unique skills play the most significant roles in aiding a community to redesign a safer future. Same as URP:6280.

PBAF:6282 Grant Writing 1-2 s.h.

Same as SSW:6282, URP:6282.

PBAF:6295 Economic Development Policy 3 s.h.

Analysis of policies and programs at national, regional, state, and local levels that address problems of economic growth, development, decline. Same as URP:6295.

PBAF:6297 Economic Development Finance 3 s.h.

Business financial statements and evaluation of loan proposals; small business finance including financing working capital, fixed assets, and real estate; economic development agencies and institutions; and case studies of economic development financing. Prerequisites: URP:6205. Same as URP:6297.

PBAF:6335 Internship 3 s.h.

Internship; 240 hours of public affairs work with a public or nonprofit organization.

PBAF:6340 Public Policy Analysis 3 s.h.

Rationales and goals of public policy; major steps, key methods, and tools in policy analysis; professional delivery of policy recommendations. Same as URP:6340.

PBAF:6400 Sustainable Development: The Kerala Experience 3 s.h.

Exploration of student interests in social entrepreneurship, global health, microfinance, cultural production, environmental sustainability, or other development issues in India; varied disciplinary perspectives (i.e., public health, business, social work, geography, art); student work with Indian NGOs employing a diverse variety of techniques to address social problems such as child labor, health care for the poor, illiteracy, and disability services. Winter session. Same as URP:6400.

Master of Public Affairs, M.P.Aff.

One of the enduring grand challenges is how we collectively, creatively, and democratically respond to key challenges facing our communities, nation, and the world. Among these challenges are environmental change, including an increased incidence and intensity of disasters such as flooding, sea level rise, and wildfires attributable to climate change; health care; an aging population; addiction; inadequate infrastructure; inequality; unaffordable housing; racism; transportation; immigration; economic development; and public safety.

In response, the Master of Public Affairs program will train future leaders to systematically and creatively address these and other challenges in the coming years. With its interdisciplinary public affairs infrastructure—representing colleges, departments, and centers across campus—the University of Iowa is a leader in public affairs locally and nationally. The program will educate public affairs leaders who will creatively and knowledgeably address society's most critical issues and contribute to addressing the grand challenges of the 21st century.

Requirements

The graduate Master of Public Affairs (M.P.Aff.) requires 42 s.h. of credit. Students must earn a grade of B-minus or higher in all core and concentration area courses and must maintain an overall program g.p.a. of at least 3.00.

The required curriculum includes seven core courses, an internship, five electives (including three taken within a concentration), and a one-semester capstone project. Courses are offered by the School of Planning and Public Affairs (Graduate College), the Department of Political Science and the M.A. in strategic communication program in the School of Journalism and Mass Communication (College of Liberal Arts and Sciences), as well as from the Department of Management and Entrepreneurship (Tippie College of Business), the Larned A. Waterman Iowa Nonprofit Resource Center (College of Law), the College of Public Health, and the Department of Civil and Environmental Engineering (College of Engineering).

The Master of Public Affairs requires the following work.

Core Courses

Code	Title	Hours
All of these:		
PBAF:5111	American Public Policy	3
PBAF:5117	Bureaucratic Politics and Public Administration	3
PBAF:5200	American State Politics	3
PBAF:6200	Analytic Methods I	3
PBAF:6205	Economics for Policy Analysis	3
PBAF:6233	Public Finance and Budgeting	3
PBAF:6240	Public Management	3

Concentration Area

Students complete a total of 15 s.h. in consultation with their advisor, with at least 9 s.h. of these in coursework taken

in the public and nonprofit management or public policy concentration area, and 6 s.h. in coursework taken from any of the two concentration areas or other courses as deemed appropriate. Students further develop in their concentration area by applying the concepts and skills gained in core coursework.

Public and Nonprofit Management Concentration

Nonprofit Management

Code	Title	Hours
LAW:8753	Nonprofit Organizations: Structure, Governance, and Strategy	3
LAW:8755	Nonprofit Organizations: Advocacy, Collaboration, and Fundraising	3

URP:6265	Planning Sustainable Transportation	3
URP:6266	Transportation and Land Use Planning	3

Capstone Course

Students take the public affairs capstone course, typically in their final semester. They work on a community, state, federal, or nonprofit project in which they focus their efforts on an analysis of a contemporary public policy problem, research, development of policy proposals, and recommended action steps. This is done in tandem with the University's Iowa Initiative for Sustainable Communities (IISC), that for ten years has been providing public consultation to communities in Iowa.

Code	Title	Hours
This course:		
PBAF:6210	Public Affairs Capstone	3

Internship Course

Students are required to complete an approved internship with a public agency or a nonprofit organization. They engage in 240 hours of internship work under the supervision of a public affairs professional.

Code	Title	Hours
This course:		
PBAF:6335	Internship	3

Final Examination

An oral and written exam constitutes the final exam.

Admission

Admission requires an undergraduate degree and fulfillment of the minimum requirements of the Graduate College.

For fall 2020 admission, prospective students should submit completed materials to Graduate Admissions by March 1 if funding is requested. For fall 2021 and subsequent years, the deadline for funding consideration is January 15 of that year. Funding for those who submit materials after these dates is considered only as funding permits. Applications for

admission are accepted until July 15; April 15 for international students.

To apply, follow the directions on the Graduate Admissions website. Applicants can apply online and upload all supporting materials. International students without a U.S. degree or whose first language is not English must submit official Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores before admission and then funding decisions can be made. All students requesting funding also must complete and upload the Funding Application/Award Form.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

	Hours	9
	Total Hours	42

- Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
- Work with faculty advisor to select appropriate graduate level coursework. 9 s.h. must be taken in public and nonprofit management or public policy concentration area; 6 s.h. may be taken from either of the two concentration areas or may include other coursework with approval of faculty advisor.
- Work with faculty advisor to complete an approved internship with a public agency or nonprofit organization; 240 hours of internship work required under the supervision of a public affairs professional.
- Typically taken in final semester.
- Consists of both oral and written components.

Financial Support

Students receive financial support from the program primarily from teaching or research assistantships and from contract or grant-funded assistantships. Assistantships typically require 13-20 hours of work per week under the direction of a faculty member and are accompanied by a tuition scholarship.

Students initiate applications for financial support, and awards are made on the basis of merit, experience, and interests. Assistantships may be renewed for a total of up to four semesters.

Students applying for financial support are encouraged to submit application materials and requests for support by March 1. Students who apply after that date are considered as remaining funds permit. Financial support usually is not available for students who begin the program in the spring semester.

Career Advancement

Graduates land positions in professional policy analytical and/or managerial service in the public and nonprofit sectors. The degree builds knowledge and skills in a mix of topics that includes policy, economics, statistics, research, and management and prepares students for professions that influence public policy through analysis, application, or management. They have a number of career choices available, many of which lead to executive positions in federal, state, and local governments, or in nonprofit agencies.

Example positions in the local, state, federal, nonprofit, and private sectors include:

- Local: government specialist leading to a city manager, community health director, or public housing manager
- State: program manager for a state housing authority or a policy analyst/program manager for a variety of state agencies
- Federal: presidential management fellow, or starting as a GS-9 position in the federal government in a variety of federal agencies
- Nonprofit: program director leading to a nonprofit organization director
- Public, private, and nonprofit: public and government relations specialist, lobbyist, or elected official

The School of Planning and Public Affairs provides career assistance efforts for both internship and post-graduation job seekers. It offers job information access and one-on-one advising support from the school's career services coordinator.

Urban and Regional Planning, M.S.

The M.S. in urban and regional planning is a two-year degree program fully accredited by the Planning Accreditation Board. It is built on the premise that planners must be educated in methods of policy analysis and that there is a common body of knowledge, represented in the core curriculum, that provides a solid foundation for all specializations in the field.

A wide range of educational backgrounds provide good preparation for graduate study in urban and regional planning. Students with undergraduate majors such as environmental policy and planning, architecture, anthropology, ethics, public policy, geographic information science, metalsmithing, literature, computer science, economics, engineering, communication studies, finance, geography, education, marketing, political science, sociology, and sustainable development currently study in the school. With an increasingly diverse student body and a low student-faculty ratio, the School of Planning and Public Affairs is committed to creating an environment that is inclusive and welcoming of all students. Approximately 35 full-time students and some part-time students are enrolled, and about 29 percent are international students.

The common core of courses and the design of the facilities allow students to get to know each other quickly. Students interact closely with faculty members in the classroom, in informal conversation, and while working on research projects. Students and faculty also collaborate in the second year capstone courses, URP:6209 Field Problems in Planning I and URP:6210 Field Problems in Planning II, to prepare plans and reports for communities throughout Iowa. This work is supported by the University's Iowa Initiative for Sustainable Communities, which was created by the School of Planning and Public Affairs.

Graduate students working toward a master's degree in urban and regional planning may elect to pursue one of the combined degree programs offered by the school in collaboration with the College of Engineering, the College of Law, the College of Public Health, the Department of Geographical and Sustainability Sciences, the School of Social Work, and with Higher Education and Student Affairs (HESA).

Requirements

The Master of Science program in urban and regional planning requires 50 s.h. of graduate credit. The 50 s.h. required to complete the degree must include a minimum of 38 s.h. in the School of Planning and Public Affairs. Students must earn a grade of B-minus or higher in all core and concentration area courses and must maintain an overall program g.p.a. of at least 3.00.

The graduate curriculum is based on the philosophy that planners must develop the theoretical and analytic skills that will permit them to analyze social problems and evaluate public policies. Planners also must cultivate professional skills such as report writing, oral presentation, computer use, and team management in order to work effectively in various organizational and political environments.

Work for the master's degree includes core courses, an area of concentration, electives, and capstone courses. A final examination is required. A thesis is not required, although

students may petition to write one. Students are encouraged to complete an approved internship or practicum.

The M.S. with a major in urban and regional planning requires the following work.

Core Curriculum

The core curriculum helps students develop an understanding of the institutions—social, economic, political, administrative, and legal systems—that provide the context for policy analysis and that constrain public choices. It also promotes development of the ability to identify social goals and normative criteria for evaluating public policies, as well as the analytic skills to perform such investigations.

The core requires a total of 23 s.h., including at least 3 s.h. in an advanced economic methods course. The advanced economics methods course usually is taken during the first three semesters. Early core courses are drawn primarily from traditional disciplines, particularly economics and statistics, and include an introduction to land use planning and to theories and practice of planning. As students proceed through the curriculum, increasing emphasis is placed on the development of critical judgment and insight, achieved through the application of theory and methods to realistic planning problems and case studies.

The core curriculum includes the following courses; students may request a waiver of selected core courses on the basis of previous coursework.

Code	Title	Hours
All of these:		
URP:6200	Analytic Methods I	3
URP:6201	Analytic Methods II	3
URP:6202	Land Use Planning: Law and Practice	4
URP:6203	History and Theories of Planning	3
URP:6205	Economics for Policy Analysis	3
URP:6208	Program Seminar	1
URP:6258	Modeling Dynamic Systems	3
Advanced Economic Methods		
At least one of these:		
URP:6233	Public Finance and Budgeting	3
URP:6290	Economic Impact Assessment	3

Concentration Area

Beginning in the second semester, students choose a concentration area and develop it by applying the concepts and skills developed in the core. Currently, the school's faculty and course offerings support five concentration areas: transportation planning, housing and community development, economic development, land use and environmental planning, and geographic information systems.

Students complete at least 9 s.h. of courses in their concentration area. Courses offered by other University departments and programs may supplement those offered by the School of Planning and Public Affairs.

Students may combine two concentration areas. Examples of combined areas are environmental and economic development planning, and transportation and community

development planning. Students also may design other concentration areas, subject to faculty approval. For example, they may specialize in health services planning with appropriate coursework in the Department of Health Management and Policy or Occupational and Environmental Health, or in human services planning with courses in the School of Social Work.

Capstone Courses

Students complete the following two capstone courses, usually during the third and fourth semesters. Students who complete a practicum are exempt from this requirement.

Code	Title	Hours
URP:6209	Field Problems in Planning I	3
URP:6210	Field Problems in Planning II	3

Internship

Students are encouraged to complete an internship in a planning agency or related organization. To earn 2 s.h. of credit for the internship, students must submit a brief paper summarizing and evaluating their experience. Internships usually are paid staff positions and are completed during the summer between the first and second years or during the academic year.

Code	Title	Hours
This course:		
URP:6335	Internship	2

Practicum

An extended internship, consisting of at least five months of full-time employment in a planning-related organization, may qualify as a practicum. A practicum generally takes place during summer after the first year and into the fall semester of the second year. It carries 5 s.h. of credit and substitutes for the internship and the capstone courses.

Code	Title	Hours
This course:		
URP:6229	Practicum	1-5

Thesis

A thesis is not required, although students may petition to write one. Students may register for up to 6 s.h. of thesis credit. In addition, they may take up to 8 s.h. of readings to develop a thesis topic and prepare a literature review.

Code	Title	Hours
This course:		
URP:6325	Thesis: Urban and Regional Planning	arr.

Final Exam

A final examination is required for all students. An oral and written exam constitutes the final exam for students who do not write a thesis.

Combined Programs

The School of Planning and Public Affairs participates in several combined degree programs, in which students work toward an M.S. in urban and regional planning at the same time they work toward another degree. Combined degree programs enable students to earn both degrees in less

time than it would take to earn the two degrees separately (see "Two Master's Degrees" under Master's Degrees in the Manual of Rules and Regulations of the Graduate College for information on earning concurrent master's degrees). The following combined degree programs are available.

- B.A. or B.S. in environmental policy and planning/M.S.; see Environmental Policy and Planning [p. 440] (College of Liberal Arts and Sciences) in the Catalog.
- B.S.E. in civil engineering/M.S.; see the Bachelor of Science in Engineering [p. 1428] and the B.S.E. in civil engineering [p. 1471] (College of Engineering) in the Catalog.
- J.D./M.S.; see Juris Doctor, J.D. [p. 1650] (College of Law) in the Catalog.
- M.A. in educational policy and leadership studies (higher education and student affairs subprogram)/M.S.; see the M.A. in educational policy and leadership studies [p. 1300] with a higher education and student affairs subprogram (College of Education) in the Catalog.
- M.S. in civil and environmental engineering with a sustainable water development subprogram/M.S.; see the M.S. in civil and environmental engineering [p. 1476] (College of Engineering) in the Catalog.
- M.S. in occupational and environmental health/M.S.; see the M.S. in occupational and environmental health [p. 1943] (College of Public Health) in the Catalog.
- M.S.W./M.S.; see the Master of Social Work, M.S.W. [p. 1000] (College of Liberal Arts and Sciences) in the Catalog.

Requirements for each combined degree program can vary. The minimum requirements for the urban and regional planning part of any combined degree include completion of at least 35 s.h. in School of Planning and Public Affairs courses (prefix URP), the core and capstone courses, 9 s.h. of a concentration, and the master's degree final examination. In the case of two master's degrees, all programs require at least 60 s.h. of credit.

Students who wish to enter a combined degree program must apply to the two degree programs separately; they must be admitted to both programs before they may be admitted to the combined program. Contact the admissions coordinator at the School of Planning and Public Affairs for more information about combined degree programs.

Admission

Admission to the School of Planning and Public Affairs requires an undergraduate degree and fulfillment of the minimum requirements of the Graduate College. For fall admission, prospective students should submit complete materials to Graduate Admissions by January 15 if funding is requested. Funding for those who submit materials after these dates is considered only as funding permits. Applications for admission are accepted until July 15; April 15 for international students.

To apply, follow the directions on the Graduate Admissions website. Applicants can apply online and upload all supporting materials. International students without a U.S. degree or whose first language is not English must submit official Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores before admission and then funding decisions can be made. All students requesting funding also must complete and upload the Funding Application/Award Form.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Urban and Regional Planning, M.S.

Exam: Final Oral Exam^g

Hours	9
Total Hours	58

- Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
- Advanced Economic Methods course; taken once during first three semesters.
- Complete at least 9 s.h. Students may design their program around particular career goals in Economic Development, Geographical Information Systems (GIS), Housing and Community Development, Land Use & Environmental Planning, or Transportation Planning by working with their advisor to determine graduate coursework and sequence; 3 s.h. may be Readings; grade of B- or better.
- Complete at least 12 s.h. of electives; work with faculty advisor to select appropriate graduate level coursework and determine sequencing.
- Typically done during the summer semester; credit can be taken during the summer, fall or spring. To earn 2 s.h. of credit for the internship, submit a brief paper summarizing and evaluating the experience.
- Capstone coursework; grade of B- or better required.
- If oral exam not passed, must pass written exam.

Financial Support

Students in the School of Planning and Public Affairs receive financial support from the program primarily from teaching or research assistantships and from contract or grant-funded assistantships. Assistantships typically require 13-20 hours of work per week under the direction of a faculty member and are accompanied by a tuition scholarship.

Students initiate applications for financial support, and awards are made on the basis of merit, experience, and interests. Assistantships may be renewed for a total of up to four semesters.

Students applying for financial support are encouraged to submit application materials and requests for support by January 15. Students who apply after that date are considered only as remaining funds permit. Financial support usually is not available for students beginning the program in the spring semester.

Career Advancement

Today's planners find themselves in demand for such diverse jobs as sustainability coordinator and planner, environmental analyst/planner, land use planner, transportation planner, community development planner, zoning coordinator, water resources planner, community organizer, economic development planner, recycling coordinator, planning director, neighborhood planner, state legislative analyst, planning consultant, and nonprofit project manager or director.

Recent graduates have taken positions with city, metropolitan, and regional planning agencies; state and federal government; nonprofit organizations; and private consulting firms. They work in all geographic regions of the United States and in countries around the world.

Public Digital Humanities

Director

- Deborah E. Whaley (American Studies/African American Studies)

Graduate certificate: public digital humanities

Faculty: <http://www.lib.uiowa.edu/studio/people/>

Website: <http://www.lib.uiowa.edu/studio/pdh-certificate/>

The Certificate in Public Digital Humanities welcomes students with no prior training in the digital humanities. The certificate program offers credentials to graduate students who plan to incorporate digital technology into their future research, teaching, or careers. Students learn interdisciplinary ways of conceiving of their own and other's digital work, while exploring digital tools that underlie many humanistic and social scientific research projects. Students also learn important skills such as how to manage an original project, collaborate with digital humanities scholars and practitioners across different departments, programs, units, and centers, participate in teams, and communicate technical information to a nonspecialist audience.

The certificate provides crucial training and education for the 21st-century humanist interested in the intersection between technology and research.

The Certificate in Public Digital Humanities is administered by the Graduate [p. 1536] College.

Public Digital Humanities, Graduate Certificate

Requirements

The graduate Certificate in Public Digital Humanities requires 12 s.h. of coursework. Students must maintain a g.p.a. of at least 3.00 in work for the certificate.

The Certificate in Public Digital Humanities requires the following coursework.

Required Course

Code	Title	Hours
This course:		
CLAS:7290/ SLIS:7290	Digital Humanities Theory and Practice	3

Electives

Students choose elective coursework to suit their disciplinary or technical needs. Since electives are updated every semester, students can view a full list of available elective courses as well as access an elective course petition form on the Public Digital Humanities Certificate website.

Code	Title	Hours
6 s.h. from these:		
AFAM:6500/ AMST:6500	Critical Readings in Cultural Studies: Stuart Hall's Legacy and Influences	3
AMST:3600/ AFAM:3600	Digitizing Blackness	3
AMST:5000	Interdisciplinary Research in American Studies	3
ARTH:3000	Digital Approaches to the Study of Art	3
CINE:4620	Topics in Film Form, Style, and Theory (when topic is film adaptation)	3
CLSL:6014	Later Empire (when topic is digital text analysis)	arr.
COMM:6336	Seminar in Rhetorical Theory (when topic is critical approaches to digital culture)	1-4
DANC:3890/ DIGA:3890/ INTM:3890/ THTR:3890	Producing and Directing Digital Video	3
EDTL:4210/ INTM:4210/ MUSM:4210	Museum Without Walls: Museum, Art Education, and Community Engagement in the Digital Age	3
ENGL:3182	Digital Cultures and Literacies	3
ENGL:6080	New Media Poetics	3
GEOG:3540/ IGPI:3540	Introduction to Geographic Visualization	3
GEOG:4150/ GHS:4150/ IGPI:4150	Health and Environment: GIS Applications	3

GWSS:3050	Topics in Gender, Women's, and Sexuality Studies (when topic is race, gender, and sexuality in the digital humanities)	1,3
HIST:6002	Introduction to Graduate Studies in History: Historiography and Methods (when topic is digital related)	3
IGPI:4580/ STAT:4580	Data Visualization and Data Technologies	3
JMC:3122	Digital and Gaming Culture	3
JMC:3425	Applied Digital and Social Media	3-4
JMC:3640	Data Journalism	3-4
JMC:6333	Seminar in Media Communication (when topic is critical media studies or digital cultures or global digital media)	3
RHET:7500	Science Communication in the Digital Age	2-3
SLIS:6100/ IGPI:6100	Database Management	3
SLIS:6120/ IGPI:6120	Natural Language Processing	3
SLIS:6140/ IGPI:6140	Digital Environments	3
SLIS:6145	Digital Preservation and Stewardship	3
SLIS:6155/ IGPI:6155	Information Visualization	3
SLIS:6350	Archives and Media	3
SLIS:6411	Topics in Library and Information Science (when topic is designing "dataviz")	1-3
UICB:4340/ ARTS:4340	Digital Design for Artists' Books	3

Capstone Course

Students should complete all certificate coursework before they enroll in the capstone course.

Translational Biomedicine

Executive Associate Dean

- Patricia L. Winokur

Education Directors

- Donna A. Santillan (Obstetrics and Gynecology), Marin L. Schweizer (Epidemiology/Internal Medicine)

Graduate degree: M.S. in translational biomedicine

Website: <https://icts.uiowa.edu/>

The Translational Biomedicine Program offers training in translational biomedicine, biostatistics, ethics, and in various elective areas while providing time to conduct mentored research under the direction of an interdisciplinary team. It is specifically tailored to clinicians in medicine, nursing, pharmacy, dentistry, and psychology, as well as to Ph.D. researchers conducting translational research in the biomedical sciences.

Related Certificate

Translational and Clinical Investigation

The Department of Epidemiology and the Institute for Clinical and Translational Science offer the graduate certificate program in translational and clinical investigation; see the Certificate in Translational and Clinical Investigation [p. 1951] (College of Public Health) in the Catalog.

Programs

Graduate Program of Study

Major

- Master of Science in Translational Biomedicine [p. 1628]

Facilities

Training is conducted mainly in the laboratories and teaching facilities of the Carver College of Medicine and the College of Public Health. The University's Institute for Clinical and Translational Science is available for research training. The program also is linked with the Carver College of Medicine's graduate training program in clinical research.

Courses

Translational Biomedicine Courses

TBM:5000 Translational Biomedical Research arr.
Student research guided by mentor.

TBM:5001 Introduction to Translational Biomedicine 3 s.h.

Basis for clinical and translational research; introduction to principles of experimental design for patient- and population-oriented research; approaches available to clinical and translational investigators (e.g., statistics, questionnaires, ethics, imaging, information technology); infrastructure that supports clinical and translational investigators at the University of Iowa and nationally; for early-career clinicians/scientists and established investigators. Requirements: enrollment in translational biomedicine M.S. program.

TBM:5002 Critical Thinking and Communication: Study Design and Commercialization 1 s.h.

Various study design methodologies and process of commercialization; presentations of current projects. Requirements: candidacy for M.S. in translational biomedicine.

TBM:5003 Critical Thinking and Communication: Scientific Writing and Presentation Strategies 1 s.h.

Grant development and journal writing process; development of effective scientific presentations.

TBM:5004 Critical Thinking and Communication: Career Development and the Funding Process 1 s.h.

Introduction to a variety of career development awards and their requirements; opportunity to work on personal career development grant applications.

TBM:5005 Critical Thinking and Communication: Leadership, Team Science, and Community Engagement 1 s.h.

Leadership skills for managing and developing a research team; leading and organizing a team; managing and sharing resources with other faculty and fellows; finding, hiring, and keeping good people; leading productive meetings; delegation strategies, resources and tools for quality community engagement; information on applying and teaching leadership skills to mentees.

Translational Biomedicine, M.S.

The goals of the M.S. program in translational biomedicine are to:

- promote interaction and collaboration among researchers across the translational research spectrum;
- enrich understanding of T1 research (laboratory), T2 research (application to evidence-based practice), T3 research (implementation and dissemination), and T4 research (population studies and policy development) for basic and clinical scientists to expand the relevance of their work in these areas; and
- develop skills in ethical decision making, scientific leadership, team building, networking, and research program management.

Requirements

The Master of Science program in translational biomedicine (TBM) requires a minimum of 34 s.h. of graduate credit plus a final project. Students must maintain a cumulative graduate g.p.a. of at least 3.00 in all UI coursework. The plan of study for students in the two-year program is tailored to their scientific goals and interests.

The program is designed to teach members of scientific teams how to move biomedical discoveries into clinical applications and beyond. It is tailored for individuals who have completed doctoral-level training in one area of biomedicine and wish to apply their expertise to the translational research spectrum. The program admits individuals who hold medical or graduate degrees (e.g., M.D., D.O., D.D.S., D.N.P., Ph.D., Pharm.D., D.V.M., or the equivalent) and are employed by the University of Iowa at the faculty ranks of associate professor, assistant professor, instructor/associate, fellow physician, or postdoctoral scholar/fellow.

The M.S. with a major in translational biomedicine requires the following coursework.

Core Courses

Code	Title	Hours
All of these:		
TBM:5000	Translational Biomedical Research	9
TBM:5001	Introduction to Translational Biomedicine	3
TBM:5002	Critical Thinking and Communication: Study Design and Commercialization	1
TBM:5003	Critical Thinking and Communication: Scientific Writing and Presentation Strategies	1
TBM:5004	Critical Thinking and Communication: Career Development and the Funding Process	1

TBM:5005	Critical Thinking and Communication: Leadership, Team Science, and Community Engagement	1
BIOS:4120	Introduction to Biostatistics	3
EPID:4400	Epidemiology I: Principles	3
EPID:6400	Epidemiology II: Advanced Methods	4
EPID:6950	Clinical Research Ethics	2
Total Hours		28

Electives

Students must earn a minimum of 6 s.h. in graduate-level elective coursework pertinent to their educational goals. Electives may be selected from the lists below, or students may obtain approval for other courses with program administration approval.

Biostatistics

Code	Title	Hours
BIOS:5120	Regression Modeling and ANOVA in the Health Sciences	3
BIOS:5130	Applied Categorical Data Analysis	3
BIOS:5310	Research Data Management	3
BIOS:6210	Applied Survival Analysis	3
BIOS:6310	Introductory Longitudinal Data Analysis	3
BIOS:7600	Advanced Biostatistics Seminar	0-3

Device Development

Code	Title	Hours
BME:5101	Biomaterials and Implant Design	3
BME:5530	Design of Circulatory Implants and Artificial Organs	3
BME:5640	Ergonomics of Occupational Injuries	3

Drug Discovery

Code	Title	Hours
BME:5330	Computational Genomics	3
PCOL:4130	Drug Mechanisms and Actions	3
PCOL:5135	Principles of Pharmacology	1
PCOL:5136	Pharmacogenetics and Pharmacogenomics	1
PCOL:6203	Pharmacology for Graduate Students	6
PCOL:6250	Advanced Problem Solving in Pharmacological Sciences	1
PHAR:5512	Drug Discovery and Mechanisms	3

Epidemiology

Code	Title	Hours
EPID:5214	Meta-Analysis of Epidemiologic Studies	3

EPID:5241	Statistical Methods in Epidemiology	4
EPID:5500	Introduction to Clinical Epidemiology	3
EPID:5560	Introduction to Molecular Epidemiology	3
EPID:5610	Intermediate Epidemiology Data Analysis with SAS and R	3
EPID:6400	Epidemiology II: Advanced Methods	4
EPID:6900	Design of Intervention and Clinical Trials	3

Genetics

Code	Title	Hours
ACB:6200	Special Topics in Genetics	1
BIOL:3713	Molecular Genetics	4
BIOL:3373	Human Population Genetics and Variation	3
BIOL:5412	Fundamental Genetics - Graduate Lecture	3
GENE:5173	Computational Genomics	3
GENE:6150	Genetic Analysis of Biological Systems	3
GENE:7191	Human Molecular Genetics	3
MMED:6215	Transcription and Multifunctional Regulation by RNA	1
MMED:6250	Mechanisms of Parasitism Journal Club	1
PCOL:5136	Pharmacogenetics and Pharmacogenomics	1

Informatics

Code	Title	Hours
BIOL:4213	Bioinformatics	2,4
BIOL:4386	Introduction to Scientific Computing for Biologists	3
CS:5110	Introduction to Informatics	3
IGPI:3314	Genomics	3

Innovation

Code	Title	Hours
ENTR:2000	Entrepreneurship and Innovation	3
ENTR:9400	Evaluating Innovation Opportunities	2-3
LAW:9717	Iowa Medical Innovation Group Seminar	arr.
MED:8073	Biomedical Innovation	1
NURS:6553	Seminar on Innovations	4

Neuroscience

Code	Title	Hours
BIOL:2753	Introduction to Neurobiology	3
NSCI:5212	Foundations in Behavioral and Cognitive Neuroscience	4
NSCI:5653	Fundamental Neurobiology	3

NSCI:6240	Topics in Cognitive Neuroscience	1-3
PSY:6370	Principles of Neuropsychology	3

Final Project

In addition to completion of the 34 s.h. in required coursework, scholars must submit a final project. The project may be in one of the following formats.

- A complete grant application for a K01, K08, K23, K08, R01, R03, R21, a U.S. Department of Veterans Affairs career development award, or the equivalent. The R03 completed as part of the required grant writing course may not be submitted as the final project.
- An original research manuscript that is of acceptable quality for a peer-reviewed biomedical journal (the paper can be ready for submission, under review, or already published). The manuscript must contain the following components:
 - a structured abstract;
 - an introductory section that adequately frames the research question addressed; and
 - a methodology section that sufficiently describes the following elements (study design, study sample, data collection strategies and sources, data elements, and data analysis), results of the study, and a discussion including a description of the relationship of the current findings to prior relevant research and/or policy implications of the findings and methodological limitations.

Admission

The Translational Biomedicine Program welcomes applicants who have diverse educational and scientific backgrounds and varied research interests. Applicants must have a strong interest and background in a health science profession and knowledge of basic sciences and medicine.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Translational biomedicine applicants must:

- have a doctoral-level degree in a biomedical discipline (e.g., M.D., D.O., D.D.S., D.N.P., Ph.D., Pharm.D., D.V.M., or the equivalent);
- be employed by the University of Iowa as an associate professor, assistant professor, instructor/associate, a fellow physician, or a postdoctoral scholar/fellow;
- be engaged in scientific research with a University of Iowa mentor who has funding from a peer-reviewed source (e.g. National Institutes of Health, National Science Foundation, and so forth);
- hold a bachelor's degree from a regionally accredited American college or university or an equivalent degree from an international institution, as determined by the University of Iowa Office of Admissions;
- have a g.p.a. of at least 3.00 or the international equivalent, as determined by the University of Iowa Office of Admissions; and
- have a Graduate Record Exam (GRE) General Test combined verbal and quantitative score of 300 on the revised test (or 1050 on the old test) and an analytical

writing score of 4.0 or above; applicants who already hold a graduate or professional degree may seek a waiver of the GRE requirement.

Applicants whose first language is not English must score at least 100 (internet-based) on the Test of English as a Foreign Language (TOEFL), or they must have a score of at least 7.0, with no subscore lower than 6.0, on the International English Language Testing System (IELTS).

Applicants must submit a curriculum vitae, a statement of research interest and career goals, and three letters of recommendation. One letter must be from the applicant's UI research mentor; the program recommends that the second be a letter of support from the applicant's department chair.

Students and their mentors must guarantee sufficient time for coursework and research. The program does not require a specific percent effort, but successful candidates would likely devote 50-75 percent of their time to a combination of coursework and research.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

- Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
- Complete one of the following formats: a complete grant application (K23, K08, K01, R01, R03, R21, or VA career award) or an original research manuscript (>2500 words) of published or in-publishable quality for a peer-reviewed journal. Additional requirements apply.
- Elective coursework pertinent to educational goals and background may be selected from specific lists in Biostatistics, Device Development, Drug Discovery, Epidemiology, Genetics, Informatics, Innovation, and Neuroscience. Program administration approval required for other courses.

Transportation Studies

Director, School of Planning and Public Affairs

- Charles E. Connerly

Coordinator, Transportation Studies

- Steven Spears (Planning and Public Affairs)

Graduate certificate: transportation studies

Faculty: <https://sppa.uiowa.edu/faculty-and-staff>

Website: <https://sppa.uiowa.edu/>

Transportation is vital to modern society. The United States, like other nations, faces many critical transportation problems and issues. The highway system is reaching an advanced stage of its life cycle, transportation finance is unsustainable, public transit operating deficits are growing, the quality of transportation available to many citizens is unacceptably low, serious inequities exist between transportation modes, and extensive changes are called for in traditional transportation institutions. New approaches to financing the nation's road system are badly needed.

Transportation engineers and planners draw on a number of skills to respond to the challenges they face. They must analyze and forecast the movement of people and goods within and between cities; identify effective and efficient means for providing desired transportation services; price these services properly; and evaluate the impact that transportation changes have on land use, environmental quality, economic activity, the local or regional economy, and various subgroups within society.

No single academic discipline can supply all of the theories, principles, or methods needed to address the varied and complex problems in transportation. Recognizing this, the Department of Civil and Environmental Engineering [p. 1462] and the School of Planning and Public Affairs [p. 1613] participate in the interdisciplinary Transportation Studies Program, through which students in the participating units can earn the Certificate in Transportation Studies along with their graduate degrees.

The Departments of Industrial and Systems Engineering [p. 1500] and Mechanical Engineering [p. 1516] also participate in the transportation certificate program, offering courses in human factors and safety issues in transportation. The Certificate in Transportation Studies is coordinated by the School of Planning and Public Affairs [p. 1613].

Programs

Graduate Program of Study Certificate

- Certificate in Transportation Studies [p. 1632]

Transportation Studies, Graduate Certificate

Requirements

The graduate Certificate in Transportation Studies requires 15 s.h. of graduate credit. Students may earn the certificate in conjunction with a M.S. or Ph.D. in civil and environmental engineering or with a M.S. in urban and regional planning.

Individuals working toward degrees in other transportation-related disciplines are encouraged to apply to the Transportation Studies Program. Depending on a student's background, additional coursework in statistics, computer programming, simulation, mathematics, and operations research may be required for the certificate. Credit earned in these courses may not be applicable to a student's degree program.

Students enrolled in the certificate program may wish to participate in faculty-led transportation research, which may explore topics such as system planning, traffic operations and engineering, spatial data systems and analysis, simulation applications, and policy issues.

Certificate/M.S. or Ph.D. in Civil and Environmental Engineering

Students working toward a Master of Science or a Doctor of Philosophy in civil and environmental engineering may earn the Certificate in Transportation Studies by completing a total of 15 s.h. from the courses listed below. Not all courses are offered every semester; view MyUI to determine when specific courses are offered.

Code	Title	Hours
Fall Semester		
Students must take at least two of these fall semester courses:		
CEE:4762	Design of Transportation Systems	3
CEE:4763	Traffic Engineering	3
CEE:5678	Application Simulation to Transportation	3
URP:6266	Transportation and Land Use Planning	3
Spring Semester		
Students must take all of these spring semester courses:		
CEE:4160	Introduction to Bridge Engineering	3
CEE:4176	Transportation Demand Analysis	3
URP:6260	Transportation Policy and Planning	3

Engineering students may apply to the certificate program through the Graduate College and the Department of Civil and Environmental Engineering. See Civil and Environmental Engineering [p. 1462] (College of Engineering) in the Catalog for information about graduate study and degree requirements in that department.

Certificate/M.S. in Urban and Regional Planning

Students working toward a Master of Science in urban and regional planning may earn the Certificate in Transportation Studies by completing a total of 15 s.h. from the courses listed below. Not all courses are offered every semester; view MyUI to determine when specific courses are offered.

Code	Title	Hours
Fall Semester		
URP:6265	Planning Sustainable Transportation	3
URP:6266	Transportation and Land Use Planning	3
URP:6290	Economic Impact Assessment	3
Spring Semester		
URP:4262	Transportation Demand Analysis	3
URP:6233	Public Finance and Budgeting	3
URP:6260	Transportation Policy and Planning	3
CPH:4220	Global Road Safety	3

Master of Science in urban and regional planning students may apply to the certificate program through the Graduate College and the School of Planning and Public Affairs. See Planning and Public Affairs [p. 1613] (Graduate College) in the Catalog for information about graduate study and degree requirements in the school.

College of Law

Dean

- Kevin K. Washburn

Associate Deans

- Carin N. Crain, Ann Laquer Estin, Thomas P. Gallanis, Emily A. Hughes, Adrien K. Wing

Assistant Deans

- Collins B. Byrd, Jill De Young, Gordon S. Tribbey

Executive Librarian

- Katherine Hall

Undergraduate certificate: human rights

Professional degrees: J.D.; LL.M.; M.S.L.; S.J.D.

Faculty: <https://law.uiowa.edu/faculty-research/meet-our-faculty>

Website: <https://law.uiowa.edu>

The University of Iowa College of Law is the oldest law school west of the Mississippi River. Founded in 1865 as the Iowa Law School, the college is a charter member of the American Association of Law Schools and an American Bar Association-approved law school.

One of 11 colleges at the University of Iowa, the College of Law is part of Iowa City's unique cultural community. Students, faculty, and staff work together in a friendly, relaxed, and productive environment that puts students' needs first.

A longstanding commitment to inclusion and diversity is a source of pride for the College of Law, which was one of the first schools in the nation to grant a law degree to a woman (1873) and to an African American (1879). Diversity is central to the college's educational philosophy and to its core mission of preparing culturally proficient graduates who are capable of intellectual inquiry, critical and reflective thinking, and engagement.

Iowa's challenging law school curriculum carefully balances substantive courses, perspective offerings, examination of ethical values and professionalism, and experiential programs, including a highly active in-house legal clinic. The college's low student-faculty ratio and the faculty's open-door policy ensure that students have opportunities for interaction and collaboration with their law professors.

The college's writing program—one of the strongest among law schools nationwide—is integral to all students' academic experience. During both semesters of their first year, students take a small-section course in legal analysis, writing, and research. During the second and third years, they complete four additional writing units. Among opportunities for completing the writing requirement is work on one of the law school's four student-run scholarly journals: *Iowa Law Review*; *Journal of Corporation Law*; *Journal of Gender, Race & Justice*; and *Transnational Law & Contemporary Problems*.

Programs

Undergraduate Program of Study

- Certificate in Human Rights (under University of Iowa Center for Human Rights [p. 1656])

Professional Programs of Study

- Juris Doctor [p. 1650]
- Master of Laws [p. 1653]
- Master of Studies in Law [p. 1654]
- Doctor of Juridical Science [p. 1655]

Facilities

Facilities and Resources

Boyd Law Building

The Willard L. Boyd Law Building, completed in 1986, exemplifies Iowa's continuing commitment to legal education and the legal profession. The building's large, circular structure reflects the special character of the Iowa law school and allows the college to operate in a physical environment in which every square foot of space is designed to promote the college's academic and professional programs.

Among the building's facilities are classrooms, the Levitt Auditorium, the Law Library, faculty and administrative offices, offices for the college's cocurricular programs, meeting rooms, and a bookstore. The first floor features the new Lauridsen Family Law Commons, a renovation project completed in 2016. This space provides ample areas for studying, including two conference rooms, two seminar rooms, and the Court Café. The third floor of the Boyd Law Building is where the college's clinical law programs are located. This suite functions as a teaching law firm, offering ease of access, usability, and visibility.

Law Library

The centerpiece of the Boyd Law Building is the University of Iowa Law Library. The Law Library has one of the most comprehensive collections of legal materials in the country, containing more than 1.4 million separately cataloged titles. A particular strength of the library is its collection of U.S. legal materials. The Law Library also holds an exceptionally strong collection of materials in foreign, comparative, and international law, including a print collection comprising more than 280,000 volumes and over 1,500 serials and subscriptions.

Research Centers and Programs

Participation in research centers and outreach programs is an important part of the College of Law's service to professional and civic communities.

Iowa Innovation, Business & Law Center

The Iowa Innovation, Business & Law Center is an interdisciplinary teaching and research venture that brings together faculty members who teach and study problems of business, technology, innovation, regulation, and legal policy from diverse perspectives. The center's purpose is twofold: first, it offers an innovative curriculum and outstanding legal training in areas pertaining to government regulation of entrepreneurship, innovation, and management of resources; second, it encourages creative individual and collaborative interdisciplinary research in these areas.

Labor Center

The University of Iowa Labor Center provides educational programs and research support to Iowa's working people and

their organizations. Since 1951, the Labor Center has acted as a bridge between the University and Iowa's labor community.

Larned A. Waterman Iowa Nonprofit Resource Center

The Larned A. Waterman Iowa Nonprofit Resource Center offers information and assistance from across the University of Iowa to help Iowa's charitable nonprofit organizations become more effective in building their communities.

Law, Health Policy & Disability Center

The Law, Health Policy & Disability Center is a leader in law, technology, education, and research focused on improving the quality of life for persons living with disabilities. Based at the University of Iowa College of Law, the center concentrates on public policy and its impact on persons with disabilities, emphasizing employment, self-determination, and self-sufficiency.

National Health Law and Policy Resource Center

The National Health Law and Policy Resource Center, founded in 1981, promotes laws and public policies that foster and facilitate accessible, affordable, and quality health services and related services for all Americans, particularly members of vulnerable and disadvantaged populations. The center provides a nonpartisan forum for informed dialogue between academics, practitioners, and public policy makers based on the best available data and information about important health law and policy issues.

University of Iowa Center for Human Rights

The University of Iowa Center for Human Rights was founded in 1999 as an outgrowth of the University's year-long commemoration celebrating the 50th anniversary of the Universal Declaration of Human Rights. Based in the College of Law, the center engages in human rights teaching, scholarship, and public engagement.

Courses

- Law Courses [p. 1634]
- Law Study Abroad Courses [p. 1649]

The following courses are those offered by the College of Law during the past four academic years and those scheduled to be offered during the coming academic year. See the Guide to Courses under Courses and Curriculum on the College of Law website for a list of College of Law courses defined by Interpretation 509-1 of the American Bar Association Standards for the Approval of Law Schools.

Law Courses

LAW:4800 Undergraduate Clinical Law Internship Program 3,5 s.h.

Students learn about the law school experience and legal careers through intensive training in a range of lawyering skills and collaboration with teams of law students on actual client matters; students enrolled in CELP work with law students representing a nonprofit or other entity using nonlitigation means to advance social or economic justice; students enrolled in the Federal Criminal Defense Clinic work as investigators with law students representing indigent criminal defendants in the Northern District of Iowa; involves weekly seminars and team supervision, biweekly undergraduate supervision meetings.

LAW:8006 Civil Procedure 4 s.h.

Procedure before trial; commencement of a suit; subject matter jurisdiction; jurisdiction over the person and venue; pleadings, motion practice, including summary judgment, simple joinder of parties and claims in determining scope and size of the lawsuit; pretrial discovery procedures, the trial, claim and issue preclusion.

LAW:8010 Constitutional Law I 3 s.h.

Constitutional allocation of governmental powers; doctrine of judicial review and nature of judicial function in constitutional cases; relationships among several branches of national government; the federal system, including powers delegated to national government, powers reserved to states, and intergovernmental immunities; role of judicial process in structuring limits within which society operates; institutional development of legal system, relationship among institutions within the system.

LAW:8017 Contracts 4 s.h.

Law that governs the otherwise unregulated sector of the economy and concerns the making and enforcement of promises, usually as part of a bargain; basics-formation of agreements, consideration, invalidating causes, parole evidence and interpretation, conditions, remedies; roles of promises and promissory exchanges in a modern economy; limitations the law places on freedom of contract.

LAW:8022 Criminal Law 3 s.h.

Basic understanding of substantive criminal law; underlying premises of and justifications for criminal law; emphasis on general doctrines that dictate the minimum elements necessary to impose criminal liability, essential requirements of culpable conduct (an *actus reus*, or guilty act), blameworthy mental state (a *mens rea* or guilty mind); rape, homicide, causation, attempt, conspiracy, accomplice liability; various defenses to criminality, such as self-defense, duress, intoxication, insanity, diminished capacity.

LAW:8026 Introduction to Law and Legal Reasoning 1 s.h.

Basic concepts and intellectual skills necessary for understanding the first-year curriculum.

LAW:8032 Legal Analysis Writing and Research I 2 s.h.

Structured development of effective skills in legal analysis, writing, and research; first of a two-semester sequence.

LAW:8033 Legal Analysis Writing and Research II 3 s.h.

Structured development of effective skills in legal analysis, writing, and research; second of a two-semester sequence. Prerequisites: LAW:8032.

LAW:8037 Property**4 s.h.**

Concept of private property as one of the legal system's basic foundations; historical development of Anglo-American property law examined in conjunction with changing currents of economic, social, and political thought; emphasis on understanding decision making by courts in the common-law tradition, and its interplay with legislative enactments intended to change the common law; fundamental notions relating to the origins of property rights; relationship of possession and ownership, with emphasis on capacity of property law to recognize a wide range of interest configurations; impetus for promoting ease and reliability in conveyance of property interests, commercially and gratuitously; function of public recording in providing stability to transfers of interest in land; role of adverse possession and prescriptive use in recognizing expectations based on long-standing property relationships; responsiveness of property law to social change as illustrated by modern reforms in landlord-tenant act.

LAW:8046 Torts**4 s.h.**

Development of tort principles; civil responsibility for harms to tangible personal and property interests; roles of legislatures, judges, juries; intentional harms, negligence, and strict liability considered from perspectives of jurisprudence, economics, and moral philosophy.

LAW:8105 Administrative Law**3 s.h.**

Formal and informal procedures, processes, and functions of state and federal administrative agencies; legislative, executive, and judicial control of their actions; nature and definition of administrative agencies; permissible delegation of authority to administrative agencies; scope of agency authority; agencies' right to obtain information from members of the public; citizens' right to obtain information in agencies' possession; definition and types of administrative rules; rule-making procedure; agency discretion to make law by rule or adjudication; right to a trial-type hearing before an agency; parties' specific rights in an administrative hearing, including notice, open or closed hearing, right to counsel, evidence, nature and exclusivity of the record; agency decision-making process, including role of hearing officers, separation of functions and bias of decision makers, nature of opinion required; judicial review of administrative action, including reviewability of agency action, primary jurisdiction of agencies, exhaustion of administrative remedies, standing, scope of judicial review, mechanics of judicial review.

LAW:8112 Advanced Civil Procedure**arr.**

Complex civil litigation; advanced civil procedure topics not taught in first year; essential aspects of civil procedure (e.g., personal and subject matter jurisdiction); joinder devices (intervention, necessary parties, interpleader, consolidation), discovery and confidentiality orders, appellate jurisdiction, mechanisms to structure the trial (e.g., bifurcation of issues); class. Prerequisites: LAW:8006.

LAW:8121 Advanced Legal Research Methods in Specialized Subjects**1 s.h.**

Legal research methods in specific legal practice and research areas; specific topic rotates each year (litigation and ADR legal research, business and tax legal research, federal legislative history legal research, legal history research); students work with real-world examples to improve research skills related to a particular legal subject.

LAW:8123 Advanced Legal Research**2 s.h.**

Builds on LAW:8032 and LAW:8033; in-depth exploration of American legal resources; current print and electronic resources that help students develop better, more efficient search techniques and select the most effective formats for their research; opportunity to review the basic sources of legal information, use varied techniques to access legal information, develop personal strategies for managing information; advanced training in LEXIS, WESTLAW, the internet; nonlegal information sources important to the legal community.

LAW:8125 State Legal Research**1 s.h.**

Legal resources available for a particular state; exploration of current print and electronic resources, particularly low-cost electronic resources such as FastCase and the internet are explored for purposes of developing better, more efficient search techniques; selection of the most effective formats for research; sources of legal information; techniques for accessing legal information.

LAW:8133 American Governance: Theory and Practice**2-3 s.h.**

Tracing the evolution of our constitutional system by examining specific events in American history; particular emphasis will be given to the role of Congress and its relationship with the Executive Branch and court system. Requirements: open only to students educated outside the United States.

LAW:8146 Antitrust Law**3 s.h.**

Laws dealing with restraints of trade, monopolization and mergers; history of these laws and their development in the courts; current doctrine and its underlying legal and economic theories; analytical tools of trade: sufficiency of economic efficiency as the measure of justice.

LAW:8153 Applied Evidence**2 s.h.**

Opportunities to apply the rules of evidence; use of mock case problems presenting evidentiary issues that attorneys in real practice would address by filing motions in limine; students are enabled to more fully comprehend the reasoning and rationale behind the rules, and appreciate the intricacies of applying the rules to a set of facts; focus on pretrial evidentiary litigation and specific rules of evidence. Prerequisites: LAW:8460.

LAW:8158 Arbitration Principles and Practice**2-3 s.h.**

Introduction to law of arbitration and essential skills and procedures involved in its practice; role of arbitration in modern conflict resolution in various settings in which it is used; conceptual framework and explanatory theories for analysis of issues frequently encountered in arbitration; statutory and contractual grounds for arbitration (e.g., labor relations, employment, consumer and commercial transactions); development of skills and understanding of procedure through use of problems and exercises simulating common arbitration scenarios in which students participate as lawyers, arbitrators, and parties.

LAW:8161 Arbitration Advocacy Competition**1-2 s.h.**

Development and application of arbitration advocacy skills in preparation for the Iowa intramural and regional competitions; addresses arbitration presentation methodology, procedure, prehearing preparation, and advocacy skills; students who advance in the intramural Iowa Arbitration Tournament are selected to represent Iowa in the ABA Arbitration Competition the following fall.

LAW:8169 The American Legal Experience 3 s.h.

Historical role of law in American social, political, and economic life from the 17th century through 1980s; legal issues involving religion and state, early national period and the Constitution, law of slavery, common law and economic development, changing legal status of women, law's engagement with the social sciences, race discrimination, crime, legal realism, and development of modern welfare and business policy.

LAW:8186 Bankruptcy 3 s.h.

Students study the rights of individuals and entities under the federal bankruptcy laws from the perspective of both debtors and creditors; there are three types of bankruptcy proceedings—liquidation bankruptcy for consumers and businesses (Chapter 7), consumer reorganization, known as "wage earner's plans" (Chapter 13), and business reorganization (Chapter 11); students survey foundational topics relevant to all these forms of bankruptcy—in general, equal weight given to both consumer and business bankruptcies; attention given to some of the intricacies of business reorganizations towards the end of the course.

LAW:8194 Basic Federal Income Taxation 3-4 s.h.

Operation, policies, principles of federal income tax, including gross income, deductions, property dispositions, tax accounting, assignment of income among family members, time value of money, leveraging.

LAW:8198 Building the State 2 s.h.

Examination of state building and deconstruction; taxing, spending, fiscal citizenship, theories about state building; topics may include statelessness, legibility and state building, utopian tax regimes, revolutionary tax systems (French, U.S.A., Confederate States of America, potential Scottish state), voluntary taxation and non-state "tax" regimes (ISIS, organized crime).

LAW:8216 Civil Procedure in Pre-Trial Theory and Practice arr.

The law of pleadings and other pretrial matters presented in LAW:8006; hypothetical case developed from interview to pleading to early pretrial stages; experience drafting relevant pleadings and motions. Prerequisites: LAW:8006.

LAW:8218 Civil Rights Law 3 s.h.

Civil rights law; constitutional litigation brought under Section 1983 to enforce the 4th, 8th, and 14th Amendments, specifically exploring prisoners' rights, police abuse, and substantive Due Process claims; examination of Reconstruction Era civil rights statutes (Sections 1981 and 1982) and modern federal statutes prohibiting discrimination such as Title VII and the Americans with Disabilities Act (ADA); cutting-edge civil rights issues such as affirmative action, sexual harassment, and racial identity; interpretive and strategic challenges that arise in civil rights litigation.

LAW:8224 Client Counseling 1-2 s.h.

Immersion in practice skills fundamental to any attorney-client relationship—interviewing and counseling; exploration of critical unseen factors which impact interviewing and counseling (e.g., self-awareness, cultural competence, bias, beliefs about the role of the lawyer in an attorney-client relationship); introduction and critique of three models of representation including traditional or regnant lawyering, client-centered lawyering, and rebellious or democratic lawyering.

LAW:8237 Comparative Corporate Governance 2 s.h.

Today's global economy has resulted in a proliferation of multi-national corporations, where frequently the parent corporation is governed by the law of one country, and one or more subsidiaries are governed by the laws of other countries; comparative assessment of advantages and disadvantages to incorporating in a particular country; focus on corporations considering mergers, acquisitions, or joint ventures with corporations outside of their own jurisdiction; and consideration of reasons why a corporation might form a subsidiary under the law of another jurisdiction.

LAW:8241 Comparative Constitutional Law 2-3 s.h.

Comparative focus on the United States Constitution with particular emphasis on the Constitution of France and the freedom of expression in areas such as libel law, hate speech, and more; suitably tailored writing component to help students master course material while also improving their own expressive abilities.

LAW:8245 Comparative Equality arr.

Affirmative action or "positive discrimination" for examining/ comparing inequality and inclusion in the countries of France, Brazil, Canada, India, South Africa, and the United States; historical context in which affirmative action or positive discrimination programs have been implemented for certain groups within Brazil, Canada, India, South Africa, and the United States as arguments in favor of and against such programs in those countries; lessons learned from these countries applied to France to answer the question, "is France in need of affirmative action?"

LAW:8263 Comparative Law 2-3 s.h.

Comparative study of origins, development, and principal features of the world's main legal systems; common and civil law traditions; historical development of the main legal systems, their sources, ideologies, techniques; subjects important to international legal practice (e.g., international judicial assistance, application of foreign law in American courts; in-depth study of modern legal systems of the United States, Britain, France, Germany, Japan, Russia; introduction to other legal traditions, including preliterate tribal law, traditional Chinese and Islamic law.

LAW:8265 English Law and Literature 2 s.h.

Exploration of relationships between English law and English literature at historical, practical, imaginative, and theoretical levels; students read novels, short stories, plays, poems, and nonfiction works—the earliest piece written by Geoffrey Chaucer in 1387 and most recent piece written by a barrister working in London in 2018; selections intended to provide a diverse cross-section of English literary writings that engage with and are shaped by English law.

LAW:8272 Conflict of Laws 2-3 s.h.

Examination of legal problems created when a transaction or relationship has associations with more than one state or nation; students examine questions of judicial jurisdiction (which state's or nation's courts should hear a case?), choice of law (which state's or nation's laws should determine the outcome of a case?), and enforcement of judgments (when will a state or nation enforce the judicial judgments of a different state or nation?).

LAW:8280 Constitutional Law II 3 s.h.

Limits on governmental power imposed by the national constitution for protection of individuals; protection of life, liberty, and property by due process and equal protection; freedom of expression and association; religious freedom and the guarantee against establishment of religion; 1st and 14th Amendments.

- LAW:8288 Consumer Finance Law** 2 s.h.
Consumer spending drives the economy; system of consumer finance—the way in which consumers consumption is financed; focus on empirical state of household finances, psychology and sociology of consumer finance, business of consumer finance, and regulation and political economy of consumer finance.
- LAW:8301 Copyrights** 3-4 s.h.
Federal law of copyrights, primarily the Copyright Act of 1976; emphasis on copyright protections affecting new technologies, such as videotape, computer hardware and software, electronic data transfer, cable television rebroadcast; ability of legal concepts to keep pace with technological developments. Recommendations: LAW:8643.
- LAW:8303 Corporate Compliance Overview** 2-3 s.h.
Areas of corporate and regulatory law that impose requirements on corporations including financial services institutions and health care provider organizations; importance of corporate compliance for these organizations and an overview of relevant regulatory authorities and their underlying theories and rationales; pertinent government regulations, guidance documents, and enforcement initiatives forming the framework for corporate compliance; focus on the process of compliance which should be established internally, regardless of the relevant regulatory authority involved; evolving role of compliance and the chief compliance officer. Corequisites: LAW:8331.
- LAW:8307 Corporate Finance** 1-3 s.h.
Introduction to fundamental principles of corporate finance, including financial statement analysis, valuation of corporate securities and of businesses, capital structure decisions, portfolio theory, and efficient capital markets hypothesis; focus on financial and accounting aspects of corporate decisions than with any particular body of law. Prerequisites: LAW:8331.
- LAW:8309 Principles of Corporate Finance** 1 s.h.
Fundamental concepts of corporate finance and accounting as accepted by the courts and applied in matters relating to securities regulation and disputes arising from mergers and acquisitions: cash versus accrual accounting; how to read and interpret schedules and disclosures contained in a company's balance sheet, income statement, and statement of cash flows; how to interpret and apply various financial ratios derived from a company's financial statements; how to understand, calculate, and apply net present value principles to evaluate investment opportunities; how to calculate equity values using the CapM equation.
- LAW:8318 Corporate Governance and Control** 1-4 s.h.
Principal issues in creation of appropriate governance and control systems for large publicly held corporations; questions of corporate structure, shareholder voting rights, duties of directors, derivative suits, indemnification and transfers of control viewed from perspective of Delaware's statutory and common law. Recommendations: LAW:8331.
- LAW:8322 Corporate Taxation** arr.
Influence of tax considerations on the structure of corporate transaction, from a merger to a restructuring to a securities offering; examination of primary Internal Revenue Code provisions that affect corporations and their shareholders; corporate formations, dividends, redemptions, liquidations, taxable asset and stock acquisitions, tax-free reorganizations; analysis of statutory and regulatory materials; tax reform proposals. Prerequisites: LAW:8194. Corequisites: LAW:8331.
- LAW:8329 Comparative Criminal Procedure** 2 s.h.
Study abroad program.
- LAW:8331 Business Associations** 3-4 s.h.
Structure, characteristics of both large publicly and closely held corporations; distribution of powers among management, directors, shareholders; fiduciary duties that limit those powers; enforcement of such duties by shareholder suits; may include basic principles of agency, partnership, and limited partnership law.
- LAW:8342 Topics in Criminal Law Practice** 1-3 s.h.
Substantive and procedural aspects of criminal law not covered in regular College of Law criminal law and criminal procedure courses; students divided into teams (prosecutors and defense attorneys); hands-on exercises designed to reflect substantive criminal law and procedure discussion; jury selection, jury instructions, pretrial motions, client and witness interviews, depositions, investigation; ethical considerations for prosecutors and defense attorneys, including prosecutorial discretion in charging decisions and conflicts of interest. Prerequisites: LAW:8022.
- LAW:8348 Criminal Procedure: Adjudication** 3-4 s.h.
Adjudicatory phases of the criminal justice system: indictments and the charging process, preliminary hearings, applications for release on bail and pretrial detention, processes of discovery, guilty pleas, jury selection, conduct of criminal trials, sentencing proceedings and post-trial motions, appellate review, collateral remedies; focus on constitutional rights, specifically the Fifth, Sixth, Eighth, and Fourteenth Amendments; statutory provisions, rules of criminal procedure.
- LAW:8350 Criminal Procedure: Investigation** 3-4 s.h.
Guarantees and rights of the Fourth, Fifth, and Sixth Amendments to the U.S. Constitution against police and prosecutorial practices designed to investigate and prove criminal cases; protection against unreasonable searches and seizures, guarantee against extraction of involuntary confessions, privilege against self-incrimination constraints upon securing confessions (i.e., *Miranda* doctrine), due process protection against unreliably suggestive identification procedures, right to counsel, protection against inculpatory admissions and identification practices; exclusionary rules and remedies that enforce constitutional guarantees.
- LAW:8362 Critical Race Theory** arr.
Race relations and racial discrimination in America from perspectives of the Critical Race Theory movement (CRT); affirmative action, hate speech, queer theory, voting rights, postmodernism, liberalism, Asian-critical theory, Latin-critical theory, federal Indian law, critical white studies; critical race feminism—essentialism, motherhood, lawbreaking, employment law, sexual harassment, global issues.
- LAW:8373 Secured Transactions** 3 s.h.
Article 9 of the Uniform Commercial Code; establishment and perfection of security interests pursuant to credit sales contracts; problems focusing on the interface between Article 9 and federal bankruptcy law, Article 9 and real property security; priority disputes among collateral claimants; rules related to default and rights after default; emphasis on developing an understanding of and facility with a code-based statutory scheme.

- LAW:8374 Debt Transactions** 4 s.h.
Examination of laws and practices of modern lending; procedures for collection of unsecured debts including enforcement of judgments, exemptions, prejudgment remedies, fraudulent conveyances, and statutory liens; examination of secured transactions that involve both real property (mortgages) and personal property (security interests governed by Article 9 of the Uniform Commercial Code); equal weight given to consumer and commercial transactions.
- LAW:8375 Iowa Debt Collection Law** 1 s.h.
Examination of legal procedures for judicial enforcement of unsecured debts; complements secured transactions coverage of consensual liens in personal property (security interests) and Iowa real estate finance law coverage of consensual liens in real estate (mortgages). Requirements: no prior enrollment in LAW:8374.
- LAW:8376 Iowa Real Estate Finance Law** 1 s.h.
Examination of performance and enforcement of payment obligations secured by interests in real property (i.e., mortgages, land contracts); complements secured transactions coverage of consensual liens in personal property (security interests) and Iowa debt collection law coverage of legal procedures for judicial enforcement of unsecured debts. Requirements: no prior enrollment in LAW:8374.
- LAW:8399 Election Law** 3 s.h.
The Supreme Court has long declared that the right to vote is fundamental, because it is preservative of all other rights; the right to vote in theory and practice, with focus on its relationship to racial and economic justice; what has been done and what should be done to move us closer to the ideal of political equality; proper role of unelected judges in our democracy; history of the right to vote, "one person, one vote" principle, Voting Rights Act, partisan gerrymandering, voter identification, voter registration, political parties, and campaign finance.
- LAW:8415 Employment Discrimination** 2-3 s.h.
Legal prohibitions against discrimination in employment on the basis of race, sex, national origin, age; focus on Title VII of the Civil Rights Act of 1964; procedural and remedial problems, elementary issues of proof.
- LAW:8421 Employment Law** 3 s.h.
Legal rights of employers and employees in private workplaces that do not have unions—which is more than 90 percent of work settings; hiring, minimum wage, independent contractors, termination, workplace privacy, employment-related intellectual property issues, covenants not to compete, occupational safety and health, and unemployment eligibility set into a context of historical origins, new developments, and contemporary trends.
- LAW:8428 British Legal System** 1-2 s.h.
Taught in London Law Consortium.
- LAW:8433 Environmental Law** 2-3 s.h.
Role of the legal system in addressing problems of environmental disruption, with special emphasis on air, water, hazardous waste pollution.
- LAW:8452 European Union Law** 2-3 s.h.
Law of the European Union; EU legal and institutional structure; role of the European Court of Justice in elaborating constitutional and administrative law for the EU on the basis of treaties and legislation; principle of free movement; progress of European integration.
- LAW:8460 Evidence** 3 s.h.
Rules of evidence developed in common-law courts and under statutes; judicial notice; examination of witnesses; privilege and competence; remote and prejudicial evidence; hearsay; burden of proof and presumptions; roles of judge and jury.
- LAW:8467 Family Law** 3-4 s.h.
Creation, dissolution of marriage and parent-child relationships; lawyer's practical approach to family law problems combined with a broader view of how the law might treat those problems in light of findings from social and behavioral sciences.
- LAW:8481 Federal Courts** 3-4 s.h.
Role of the federal courts in our federal system of government; the federal courts' original and appellate jurisdiction; Supreme Court review of state courts' judgments; Congress' power to strip the federal courts of jurisdiction; development of federal common law; federal writ of habeas corpus; abstention doctrines; state sovereign immunity; federal remedies against state and local action; and Congress' power to create non-Article III adjudicative tribunals. Prerequisites: LAW:8006 and LAW:8010.
- LAW:8497 Federal Criminal Practice** 2 s.h.
Introduction to each step in the criminal process together with instruction in advocacy skills required for the effective practice of law; complete chronology of a typical federal criminal case, from grand jury investigation through post-trial motions; importance of strategic thinking. Prerequisites: LAW:8350.
- LAW:8504 Corporate Crimes** 1-3 s.h.
Introduction to corporate criminal law; black letter doctrines of corporate liability and sentencing; Department of Justice policies and practices that shape the course of corporate prosecutions; criminal statutes that are of frequent concern for corporations, including those that address false claims, securities fraud, bribery, and mail and wire fraud; developments occurring in this evolving area of law.
- LAW:8513 Foreign Comparative and International Legal Research** 1-2 s.h.
Treaty research, locating and identifying documents from international organizations and tribunals, legal research in selected jurisdictions outside the United States; variety of print and electronic sources; research methods in foreign and international law.
- LAW:8527 The Constitution and U.S. Foreign Relations** arr.
Introduction to law of foreign relations in the United States; impact of constitutional distribution of powers on conduct of U.S. foreign relations; influence of separation of powers doctrines on conduct of foreign relations, status of international law in U.S. legal system, role of courts in adjudicating issues affecting foreign relations, and controversy over distribution of war powers between President and Congress.
- LAW:8558 Genetics and the Law** 3 s.h.
Introduction to legal issues raised by genetic and genomic technologies; genetic privacy, uses and abuses of genetic testing, prenatal diagnosis, mandatory screening, genetic discrimination, regulation of genetic research, DNA banking, research on stored tissue samples, ownership of genetic material and information, and provision of genetic services including informed consent, disclosure, and duties to family members at risk for genetic disease.

LAW:8562 Health Law**2-3 s.h.**

Major areas of concern in health law; tension between quality, access, costs; may include malpractice, quality control, health care financing, access (insurance, Medicare, and Medicaid), licensing, bioethics (end-of-life decisions, informed consent, surrogacy, organ transplantation).

LAW:8563 Global Health Law**3 s.h.**

Examination of legal, economic, social, ethical, and political aspects of global health; emergence of global health law commencing with acknowledgment of the human right to the highest attainable standard of health; establishment of the World Health Organization; use of international treaties and other understandings to address cross-border disease threats, including bilateral and multilateral assistance to low-income countries; increasing adoption by countries, including the United States, of a standard core of public health laws.

LAW:8570 Human Rights in the World Community**1-3 s.h.**

Introduction to established and developing legal rules, procedures, and enforcement mechanisms that govern protection of international human rights; liberal western and developing world notions of human rights, recent examples of human rights controversies worldwide; international human rights of women.

LAW:8577 Immigration Law and Policy**1-3 s.h.**

Legal, historical, social, philosophical, and policy foundations of immigration control; modern debate over immigration; criteria and procedures that govern admission of non-U.S. citizens to the United States for permanent residence and temporary visits; deportation criteria and processes; national security and civil liberties implications of immigration policy; refugees and political asylum; undocumented migrants; acquisition, loss, and significance of U.S. citizenship; focus on U.S. law with introduction to perspectives from comparative and international law; experience analyzing varied fact problems that require strategic decision making and interpretation of complex statutory provisions.

LAW:8584 Insurance Law**1-3 s.h.**

State regulation of insurance, adverse selection and moral hazard, risk classification and rate regulation, and insurance contracts; emphasis on life, long-term care, and disability insurance; may include health insurance, reinsurance, and other types of insurance; focus on social and economic underpinnings of insurance; practical experience conducting research regarding insurer use of genetic information in risk classification; students contribute to and conduct research for the professor's NIH grant examining life, long-term care, and disability insurer use of genetic information.

LAW:8593 Federal Indian Law**arr.**

Specialized body of law allocating power and authority in Indian country that has grown up around native American peoples and their reservations; sovereignty, jurisdiction, federal Indian policy, tribal self-government.

LAW:8594 Interest-Based Negotiation for Lawyers**2-3 s.h.**

Theory and practice of an approach to negotiation, known as interest-based or problem-solving negotiation; focus of this negotiation model is not on positions of disputants, but interests that underlie these positions; interest-based negotiators attempts to generate options that satisfy, at least minimally, interest of all parties and can lead agreements from which all parties realize some gains; emphasis on acquisition and enhancement of skills necessary to apply this negotiation approach; in-class exercises. Requirements: no prior enrollment in LAW:8720.

LAW:8599 International and Comparative Inequality Law**3 s.h.****LAW:8600 International Business Transactions****1-3 s.h.**

Legal and practical issues in international trade and investment; typical private transactions, such as the sale of goods (documentary sales transaction, INCOTERMS, letters of credit, agency, distribution), transfer of technology (franchising, licensing), and direct investment across national borders; how private international sales, investment, and licensing transactions are structured to permit private businesses to minimize and plan for the risks associated with conducting business on a global scale.

LAW:8615 International Commercial Arbitration**arr.**

Formation and enforcement of agreements to enter arbitration in order to settle international business disputes; process of arbitrating an international business dispute; recognition and enforcement of arbitral awards.

LAW:8618 International and Comparative Family Law**1-3 s.h.**

Introduction to family law system in England; issues of international legal practice in family cases; international legal instruments for protection of children, including U.N. Convention on the Rights of the Child, Hague Convention on the Civil Aspects of International Child Abduction, and Hague Convention on Intercountry Adoption. Corequisites: LAW:8467.

LAW:8622 International Environmental Law**3 s.h.**

Laws and institutions developed by the international community to deal with international environmental problems, including those of the atmosphere (acid rain, ozone depletion, radioactive fallout, climate change), hydrosphere (land-based sea pollution, sea-based vessel pollution, transboundary groundwater diversion), lithosphere (hazardous waste disposal, toxic pollutants, decertification), biosphere (driftnet fishing, endangered elephants, loss of tropical rainforests).

LAW:8627 International Securities Regulation**1 s.h.**

In today's securities markets, cross-border transactions have become very common, and activities in one country frequently impact securities markets and regulation in other countries; to understand global issues with which securities regulators around the world have been tackling, topics include global securities markets, extraterritorial application of U.S. securities regulation, enforcement against cross-border market misconduct, and international organization and cooperative framework. Recommendations: securities regulation recommended, but not essential.

LAW:8629 Taxation of International Business Transactions**3 s.h.**

Introduction to U.S. aspects of international taxation and international tax policy issues; how the United States taxes foreign persons on income they derive from U.S. sources; taxation of U.S. persons on their worldwide income; United States bilateral tax treaty network, under which many of the statutory rules regarding the taxation of foreigners are modified or supplanted; solving problems that illustrate the operation of the Code and regulations. Prerequisites: LAW:8194. Corequisites: LAW:8331.

LAW:8631 International Trade Law: Basic Norms and Regulations**3 s.h.**

Basic norms and legal framework of international trade as expressed in the GATT/WTO regime and U.S. trade laws; issues raised by regional trade blocs such as NAFTA; controversies such as the economic and philosophical justifications for, and objections to, free trade from a variety of perspectives.

LAW:8643 Introduction to Intellectual Property**1,3-4 s.h.**

Introduction to some of the most important intellectual property rules; goals and theories underlying these rules; common ways in which ideas may be protected—from basic form of protection (secrecy and trade secrecy) to exclusive rights granted over inventions (patents) and creative works (copyright), and concluding with rights related to market-based identities (trade and service marks); brief exploration of ways in which debates over intellectual property rights have permeated modern culture.

LAW:8645 Introduction to Quantitative and Computational Legal Reasoning**3 s.h.**

Basic principles of probability, statistics, and computational reasoning (including elementary programming) for law students; emphasis on mathematically modest intuition, practical skills, and legal applications; introductory level, no mathematical background beyond high school algebra is assumed. Requirements: no substantial preexisting computer programming or statistical background.

LAW:8649 Foundations of International Law**1-3 s.h.**

Introduction to fundamentals of international law; focus on aspects of international law that concern interests in the United States; survey of sources, methodology, and major doctrines of international law within framework of understanding diverse jurisprudential approaches; international law's relationship to U.S. domestic law and institutions; procedural aspects of international law involving international institutions, including the International Court of Justice; foundation course for students interested in international trade, business, family law, human rights, environmental law, and an interest in European Union law.

LAW:8653 Juries and Jury Selection**1-2 s.h.**

The law and art regarding juries and jury selection; legal issues arising in jury selection and trial advocacy in context of jury selection; legal issues (challenges to representation of jury venires, changes of venue due to pretrial publicity, challenges for cause to prospective jurors, Batson challenges to exercise of peremptory strikes, anonymous juries, sequestered juries, attorney errors and juror misconduct during jury selection); trial advocacy (drafting and use of jury questionnaires, role and effectiveness of jury consultants, viewing jury selection as part of entire process, effective voir dire techniques, strategy in making for cause challenges, exercising peremptory strikes).

LAW:8658 Jurisprudence**2-3 s.h.**

Exploration of questions central to jurisprudence by looking at positions that have been adopted by legal positivist, natural law theory, and sociological models of jurisprudence (i.e., is there more to legal argument than the strategic battle for a favorable judicial ruling? How would one have to conceive of legal reasoning if one were a judge? Are there right answers to legal questions? Do they presuppose a necessary connection between law and morality? Is any exchange of pros and cons merely a spectacle created in order to hide from the dumbfounded public that legal reasoning does not really matter?); comparative dimension provided in readings with background in civil law.

LAW:8666 Law and Development**2-3 s.h.**

Origin of development law and institutions that were created in order to advance it, including the World Bank and International Monetary Fund.

LAW:8670 Labor Law**3-4 s.h.**

How national labor law regulates labor relations in the private sector; law relating to unionized employees and firms; right of employees to organize into unions; limits of concerted activities by employees; scope and provisions of collective bargaining; enforcement of the collective bargaining agreement; rights of individual employees in collective units and in labor organizations; lawyer's role in dealing with judicial, administrative, and arbitral tribunals involved in enforcing labor law; lawyer's role in complex interrelationships between policy, statute, judicial, and administrative decisions.

LAW:8677 Accounting, Tax, and Business Considerations for Lawyers**1-3 s.h.**

Accounting, tax, and business considerations for lawyers and why these are important considerations for lawyers; changes occurring in today's business models; discussions on choosing a legal structure for a business; financial statements basics, detailed example of a financial statement, and discussion on accounting basics expanded; advanced topics in accounting to allow some background on these topics.

LAW:8680 Law and Economics**arr.**

Introduction to economics analysis of law; how economic reasoning is used to explain and predict the effects of legal rules; fundamental areas of American law (e.g., property, contracts, torts, criminal law); use of economic efficiency as a normative criterion for evaluating legal rules; efficiency compared to various moral concepts to evaluate such rules.

LAW:8683 Law and Economics of Money and Banking**3 s.h.**

Money as a legal institution, legal structure and powers of the Federal Reserve System, multiple deposit creation, and the money supply process; tools and goals of monetary policy, and theory of interest rates; legal structure of banking industry including dual banking system, regulation by the Office of the Comptroller of the Currency of national banks under the National Bank Act (with special emphasis on capital regulation), deposit insurance and the Federal Deposit Insurance Corporation, and regulation of bank holding companies by the Federal Reserve.

LAW:8698 Law in the Muslim World**2-3 s.h.**

International and comparative law issues relevant to countries in the Muslim world; legal cultures, institutions, rules, actors, processes of several jurisdictions including Afghanistan, Saudi Arabia, Iran, Iraq, Algeria, Nigeria, Palestine, Pakistan; Islamic sharia law as practiced in Sunni and Shiite countries; the role of church versus state, fundamentalism versus secularism, as manifested in the legal system; tension between communitarianism and individualism in modern constitutionalism; intertwining of customary and religious legal practices; first, second, and third generations of human rights; international law on issues such as terrorism, self-determination; women's rights, including polygamy, divorce, child custody, inheritance. Requirements: junior or senior standing.

LAW:8709 Introduction to French Law**1-3 s.h.**

Introduction to laws of France, characteristic features, and role of main institutions; civil law, contracts, tort, family law, commercial law, criminal law, labor law; visits to a French law school, Paris Court, and Ecole of Magistrature National (ENM), the National Judge School in Bordeaux. Summer abroad program.

LAW:8712 Legislation**2-3 s.h.**

Issues related to legislation and legislative process; introduction to legislation, legislative process, legislative advocacy, statutory interpretation, and statutory drafting; students gain an understanding of the role of lawyers in legislative process and formation of public policy.

LAW:8720 Mediation: Theory and Practice**2-4 s.h.**

Essential characteristics; comparison of mediation with litigation and other alternative dispute resolution processes; stages of mediation; confidentiality; enforceability of agreement; ethical problems, particularly lawyer-mediator; student role playing; short writing assignments.

LAW:8726 Mergers and Acquisitions**3 s.h.**

Significant legal and financial aspects of business combination transactions; transaction documents (e.g., stock purchase agreements, asset purchase agreements, merger agreements); valuation of companies and pricing of deals; legal and financial considerations affecting the structuring of deals; tender offers and their regulation under the Williams Act, tender offer rules; fiduciary duties of target board, including Revlon duties and the Unocal standard; anti-takeover devices (e.g., poison pills and staggered boards, deal protection devices, freezeout transactions); state anti-takeover statutes. Prerequisites: LAW:8331.

LAW:8736 Natural Resource Law**2-3 s.h.**

Survey of federal natural resources law; emphasis on current legal issues and focus on judicial resolution of disputes; history of public land law, constitutional issues in federal control of natural resources, environmental planning, wildlife protection, public land management, fisheries and marine resources, onshore and offshore minerals; history and politics of natural resources law, aspects of practicing in this area; various resources that pose different sorts of problems, regulatory responses to these problems used to build a toolkit of regulatory models that can be helpful in solving any resource problem.

LAW:8742 Negotiations**1-3 s.h.**

Nature and theory of negotiations, diverse rhetorics (including the rhetoric of legal argument) relevant to conduct of negotiations, conflict between ethics and effectiveness; readings from game theory, social psychology, anthropology, rhetoric and ethics.

LAW:8753 Nonprofit Organizations: Structure, Governance, and Strategy**3 s.h.**

Focused examination of internal operations of nonprofit organizations; introduction to historical conditions that generated an incredible expansion of diverse and complex organizations that make up the nonprofit sector in the U.S., as well as a multitude of contemporary, real-world obstacles and opportunities leaders and managers navigate within their organizations; topics include issues of accountability, board governance, budgeting, financial management, leadership, strategic planning, taxation, and more; what is a nonprofit organization and what makes a nonprofit organization effective; development of valuable skills necessary to improve the performance of nonprofit organizations.

LAW:8755 Nonprofit Organizations: Advocacy, Collaboration, and Fundraising**3 s.h.**

Broad overview of the role nonprofit organizations play in building and enhancing communities; focused examination of the external operations of these organizations; students explore numerous threads that connect nonprofit organizations to outside individuals and entities and are presented with a multitude of contemporary, real-world obstacles and opportunities that leaders and managers navigate outside their organizations; topics focus on issues of advocacy, government relations, fundraising, leadership, marketing, partnerships, public relations, volunteerism, and more.

LAW:8763 Patent Law**2-4 s.h.**

All aspects of U.S. patent law; patent claims, adequacy of disclosure, statutory subject matter, validity, inequitable conduct, infringement, remedies, varied specialized doctrines; focus on recent pronouncements from the Court of Appeals for the Federal Circuit. Recommendations: LAW:8643.

LAW:8766 Remedies in Patent Law**1 s.h.**

Continuation of LAW:8763; in-depth coverage of issues relating to remedies for patent infringement; specific topics may include International Trade Commission (ITC) proceedings, apportionment, lost profits, reasonable royalties, enhanced damages, attorneys' fees, design patent damages, patent marking, standard-essential patents, FRAND agreements, and comparative remedies law. Prerequisites: LAW:8763.

LAW:8770 Payment Law**1-3 s.h.**

Law that governs methods by which businesses and consumers typically pay for goods and services in modern economy; legal rules applicable to traditional paper-based payment system, including negotiable instruments (checks and notes) and bank collection of checks; modern payment methods (credit cards, debit cards, wire transfers); focus on Articles 3, 4, and 4A of the Uniform Commercial Code and related federal law and regulations.

LAW:8789 Private Companies**3 s.h.**

Successful business lawyers are expected to advise clients about the business entity most suitable for their needs and then customize it to fit specific requirements of their business strategy; general focus on one entity—the corporation—and a brief introduction to agency law and general partnerships; a wide number of popular business entities receive little to no coverage and this gap is filled with an introduction to structure and substance of private company forms including limited partnership, limited liability partnership (LLP), and limited liability company (LLC). Prerequisites: LAW:8331.

LAW:8791 Professional Responsibility**2-3 s.h.**

Public and private professional responsibility of lawyers; organization of the profession; its economics, ethics, and sociology.

- LAW:8796 Property II** **3 s.h.**
Continuation of LAW:8037; limits on landowner's use of property by private agreements, judicial actions, public regulations; problem areas (servitudes, nuisance, eminent domain); constitutional limits on government activities adversely affecting private property, community planning, zoning, other forms of local land use control; discrimination related to land development, housing; effectiveness of private ordering, judicial decisions, legislative enactments, administrative processes for resolving conflicts over use of land resources; relationships between law and other disciplines in forging solutions to land use issues; law as instrument for achieving societal objectives regarding land use.
- LAW:8819 Judicial Remedies** **3 s.h.**
The law of remedies is the working tool kit for civil litigators, offering various ways to redress a given wrong; remedies to be examined include compensatory damages, injunctive orders, restitution, declaratory judgment, contempt, garnishment, asset tracing, punitive damages, and methods to preserve assets before judgment; cases are drawn from diverse substantive fields, including tort, contract, intellectual property, civil rights, administrative, antitrust, attorneys' fees, and constitutional law.
- LAW:8856 Securities Regulation** **arr.**
Examination of law regulating the issuance and sale of securities (i.e., stocks, bonds, other investment vehicles) in the United States; topics include initial public offerings (IPOs), regulation of stock exchanges, private placements of stock, securities fraud litigation, and insider trading law; relevant statutes are the Securities Act of 1933 and the Securities Exchange Act of 1934. Corequisites: LAW:8331.
- LAW:8877 Sex-Based Discrimination** **2-3 s.h.**
Survey of sex-based discrimination and legal responses in the United States and worldwide; American context—constitutional guarantees and various statutory guarantees, including Title VII of the Civil Rights Act of 1964 and Title IX of the Education Amendments of 1972; global context—examination of various regions of the world, emphasis on France, South Africa, and countries with majority Muslim populations; issues involving customary law, affirmative action/quotas, and constitutional reform.
- LAW:8879 Sports Law** **2-3 s.h.**
Various legal issues relating to the structure and operation of amateur and professional sports industries; topics include labor law and collective bargaining in professional sports, history and status of collective bargaining efforts by college athletes, antitrust law as applied to professional and intercollegiate sports, the NCAA enforcement process, Title IX as applied to intercollegiate sports, the NCAA principle of amateurism and legal challenges, representation of professional athletes and negotiation of sports contracts.
- LAW:8880 Baseball Salary Arbitration** **1-3 s.h.**
Major league baseball salary arbitration process that sports agents, attorneys, and team executives participate in, presided over by panels of lawyer arbitrators; students develop written and oral advocacy skills while participating in mock salary arbitration hearings; three students are chosen to represent the UI College of Law at the Tulane University Law School International Baseball Arbitration Competition in mid-January.
- LAW:8891 State and Local Taxation** **3 s.h.**
Limitations on state taxing powers under the United States Constitution, including Commerce, Due Process, and Privileges and Immunities Clauses; subnational jurisdictions, particularly states with an emphasis on sales tax and corporate income taxes, gross receipts taxes, and excise taxes; issues relating to ecommerce.
- LAW:8917 Substitute Decision Making for Incapacitated Individuals** **1-2 s.h.**
Types and forms of substitute decision making for individuals whose decision making capacity is impaired due to conditions such as dementia, mental disabilities, or mental illnesses and who need a surrogate (or substitute decision maker) to make decisions about matters such as finances; health care, personal care, living arrangements; financial powers of attorney; guardianships; conservatorships; advance directives including living wills, health care powers of attorney, out-of-hospital do-not-resuscitate orders (OOH-DNR); representative payees; introduction to probate court procedures and processes.
- LAW:8919 Survey of Work Law** **2-3 s.h.**
Introductory survey of four types of legal regulation of the workplace: labor law, employment discrimination, law of private employment, and law of public employment.
- LAW:8929 Taxation of Partnerships** **2-3 s.h.**
Introduction to federal tax treatment of partnerships and limited liability companies, the most common business entities in use in the United States today; classification of entities as partnerships for federal tax purposes; formation of partnership and subsequent contributions to partnership capital; flow-through tax treatment of partnership operations; tax-sensitive allocations of items of partnership income, deduction, credit and loss; partnership distributions and related tax-sheltering strategies, liquidation or sale of partnership interests; death or retirement of partners, tax treatment of partnerships compared with S corporations. Prerequisites: LAW:8194.
- LAW:8933 Tax Practice and Procedure** **2-3 s.h.**
Issues relating to proper tax liability of a taxpayer, not necessarily how the IRS collects taxes and administers tax laws; judicial deference to agency guidance; procedural issues related to examination and filing of returns and payment of taxes; attorney-client and other privilege matters; ethical issues related to tax practice; IRS investigatory powers; IRS assessment and collection procedures; assignment of problems and discussion of current issues in tax policy. Corequisites: LAW:8194.
- LAW:8936 Estate and Gift Tax** **1-3 s.h.**
Justification for wealth taxation, effectiveness of current law, and alternative methods of wealth taxation; two key wealth transfer taxes—estate tax and gift tax; emphasis on identification of tax base and taxpaying unit; may include income tax effects which flow from an individual's death, income taxation of grantor trusts, and related income tax issues. Corequisites: LAW:8194.
- LAW:8938 Technology in Law Practice** **2 s.h.**
Introduction to selected technologies that affect modern law practice including cloud computing, document preparation tools and techniques, e-discovery tools and issues, practice management, professional responsibility concerns, legal project management, courtroom technology, and legal research analytics.

LAW:8954 Trademarks and Unfair Competition Law**3 s.h.**

Law of unfair competition with primary emphasis on trademarks; subjects include policies underlying unfair competition law, creation and establishment of trademark and trademark-like rights, enforcement of those rights, non-trademark concepts of false advertising, rights in one's persona, and the intersection of the First Amendment and trademark law; practical aspects of trademarks including mechanics of the federal registration process; for students who have an interest in trademark and unfair competition law, both specifically and as part of a broader business law practice.

LAW:8981 Trusts and Estates I**1-4 s.h.**

Law of succession and trusts; topics include policy basis of inheritance and the changing character of intergenerational wealth transfer; intestate succession; the requirements for executing and revoking wills; the rise of will substitutes; spousal protection against disinheritance; the creation, modification, and termination of trusts; the particular rules applicable to charitable trusts; the fiduciary duties of trustees; the nature of a beneficiary's interest in trust, the range of the trustee's discretion, and the rights of a beneficiary's creditors; recurring construction problems and pitfalls in drafting.

LAW:8987 Veterans Benefits Law**2-3 s.h.**

Theory of veterans' benefits law and introduction to skills necessary to represent veteran clients at every stage of the U.S. Department of Veterans Affairs (VA) adjudication process; how many veterans struggle to navigate the complex VA benefits system without assistance of counsel; law that governs administration and adjudication of these benefits; fundamental law of VA claims adjudication process; dispute resolution and federal agency litigation practice; what is required to effectively represent veterans in their appeals for much needed benefits.

LAW:8992 Water Law**arr.**

Legal schemes for securing and using water rights in surface water and groundwater for private and public uses in the United States; riparian and prior appropriation doctrines of water allocation, groundwater management regimes, federal water management and regulation, and interstate and transboundary allocation devices; evolving role of science, economics, and policy in water allocation law; does not address issues of water quality, which are covered in environmental law.

LAW:9010 Appellate Advocacy I**1 s.h.**

Experience based on an assigned fictitious case: writing an appellate brief asserting the client's position, and arguing the case before a panel of students, faculty, community attorneys. Prerequisites: LAW:8032 and LAW:8033.

LAW:9011 Client-Centered Public Defense Advocacy**1-3 s.h.**

Introduction to core elements of court-appointed representation in criminal courts.

LAW:9021 Van Oosterhout Baskerville Moot Court Competition**1 s.h.**

Single-elimination tournament culminating in the final four advocates arguing before a panel of judges; advocates write a portion of the brief, argue for and against the issue they briefed. Prerequisites: LAW:9010.

LAW:9028 Jessup Moot Court Competition Team 1-2 s.h.

Participation as team member in Jessup International Moot Court Competition; preparation of memorials in fall, travel to February regional rounds; travel to international competition in Washington, D.C., for top two teams. Prerequisites: LAW:9010.

LAW:9033 National Moot Court Competition Team 1 s.h.

Participation by third-year students as law school's representatives in the National Moot Court Competition. Requirements: placement as one of four finalists in LAW:9021.

LAW:9034 National Moot Court Tutorial**2 s.h.**

For students participating in the National Moot Court competition; provides a problem and a substantial record, which provide basis for appellate brief and oral argument competition; integrates teaching of substantive law with development of oral and written advocacy skills in preparation and application for the national competition.

LAW:9037 Advanced Moot Court Competition Team**1 s.h.**

Advanced Moot court team; members are top advocates from previous year's Van Oosterhout/Baskerville competition. Fall of third year.

LAW:9038 Jessup International Moot Court Competition**1 s.h.**

Participation by second-year students in intramural regional and national-level moot court competition in international law; intensive criticism in appellate brief writing and oral argument. Prerequisites: LAW:9010.

LAW:9041 Vis International Moot Court**1-3 s.h.**

Participation for up to four students in the Vis International Moot Court, an annual international moot competition concerning international commercial arbitration under the Vienna Convention on the International Sale of Goods (CISG); under close supervision of instructor, students prepare two briefs, one for the claimant and one for the respondent, are mooted repeatedly by instructor and practicing attorneys (often alumni of the competition), and then participate in multiple rounds of moot court competition in the United States and, ultimately, either Hong Kong or Vienna. Recommendations: one course in international arbitration or international business transactions.

LAW:9046 Moot Court Board**1-3 s.h.**

Experience as member of the Moot Court Board administering the Appellate Advocacy Program, researching appellate cases used in the program, judging appellate arguments. Requirements: membership based on performance in LAW:9010.

LAW:9051 Advanced Arbitration Advocacy Competition Team**1-2 s.h.**

Students represent the College of Law at the ABA Regional/National Arbitration Competitions held in fall of second or third year; team members prepare to argue both sides of a dispute in front of a panel of arbitrators at the competition; topics include a review of basic presentation skills, essential elements of arbitrating a dispute, and proper decorum in front of the panel as well as in-depth practice and analysis of the national case problem assigned; students spend time crafting legal arguments, practicing the effective use of exhibits and arbitration booklets, engaging in opening statements, direct examination of witnesses, cross examination, and closing arguments.

LAW:9060 Trial Advocacy 1-2 s.h.

Opportunities to develop and refine skills used in preparation and trial of civil and criminal cases; students are "on their feet" during most class sessions, practicing the arts of voir dire, opening statement, direct and cross examination, introduction of exhibits, use of expert testimony, and closing argument; the course culminates with a full-scale trial, from filing of pretrial motions to rendering of a jury verdict conducted by student co-counsel; students receive extensive criticism on the effectiveness of their classroom and final performances, and all class sessions are frequently recorded for review and critiqued by instructors and fellow students. Prerequisites: LAW:8460.

LAW:9061 Advanced Trial Advocacy - Stephenson Competition 1-2 s.h.

Review and expansion of topics presented in the initial trial advocacy course; preparation and application of these principles in the Stephenson trials; introduction to additional advanced problems such as the evidentiary issues raised in the trial problem. Corequisites: LAW:9060.

LAW:9062 Trial Advocacy Board 1-2 s.h.

Administration of Trial Advocacy Program and Stephenson Competition; research and writing in connection with trial problems and readings used in program; critique of performances of trial problems. Prerequisites: LAW:8460 and LAW:9060.

LAW:9066 Stephenson Trial Advocacy Team arr.

Student participation as College of Law representatives in Stephenson Trial Advocacy Competition. Prerequisites: LAW:9061.

LAW:9115 Law Review 1-2 s.h.

Performance of substantive tasks to produce a first-rate scholarly journal; writing a substantial note; comprehensive legal research experience; analysis of complex legal issues with enhanced critical-reasoning skills and command of the legal standard, The Bluebook citation system; selection of students that transfer to UI College of Law after their first year and rising second-year students is based on the Write-On Competition.

LAW:9118 Student Journal Editor - Law Review arr.

Experience on the *Iowa Law Review* editorial staff: managing production, overseeing business operations, administering student writing program, selecting and editing articles for publication, supervising student research and writing. Eligibility based on previous writing for the journal. Prerequisites: LAW:9115.

LAW:9124 Journal of Corporation Law 1-2 s.h.

Experience editing articles and writing commentaries for *The Journal of Corporation Law*, a student-operated scholarly publication that examines subjects of current importance to businesses and the bar.

LAW:9127 Student Journal Editor - Journal of Corporate Law arr.

Experience on *The Journal of Corporation Law* editorial staff: managing production, overseeing business operations, administering student writing program, selecting and editing articles for publication, supervising student research and writing. Eligibility based on previous writing for the journal. Prerequisites: LAW:9124.

LAW:9142 Transnational Law and Contemporary Problems Journal 1-2 s.h.

Experience researching and writing on issues in international and comparative law for the journal *Transnational Law & Contemporary Problems*. Requirements: second- or third-year law standing.

LAW:9145 Student Journal Editor - TLCP Journal arr.

Experience researching, writing, and editing on issues in international and comparative law for the journal *Transnational Law & Contemporary Problems*. Requirements: second- or third-year law standing.

LAW:9163 Journal of Gender, Race and Justice 1-2 s.h.

Academic year experience on *The Journal of Gender, Race & Justice*: writing two journal pieces, including a recent development and a note or a comment, and performing office duties. Requirements: second- or third-year law standing.

LAW:9166 Student Journal Editor - Gender, Race and Justice arr.

Experience on *The Journal of Gender, Race & Justice* editorial staff: managing student writing program, overseeing business operations and production, selecting symposium topic and participants, selecting and editing all publications pieces; eligibility based on writing and editing experience.

LAW:9251 Legal Practice Capstone 3-7 s.h.

Preparation for professional settings in which junior attorneys are expected to manage assignments from several different supervisors at once and execute projects in areas of law not formally studied in law school; variety of legal projects covering an array of doctrinal areas; identities of participating faculty members and nature of assigned projects revealed when course commences (e.g., junior attorneys in large and mid-sized law firms often discover day-to-day who their next supervisors are and what their next projects will be). Requirements: J.D. standing and in final year of study.

LAW:9302 Clinical Law Program: Internship arr.

Experience working directly with faculty members on cases and in-house program; full participation in interviewing, fact investigation, negotiation, courtroom proceedings.

LAW:9303 Advanced Clinical Law Internship arr.

Continued representation of a specific client or matter; or continued representation of clients in the practice group in which students worked their first semester, but with more ownership and greater independence; opportunity to serve as mentors to new clinical law internship students. Prerequisites: LAW:9302.

LAW:9320 Field Placement: District of Columbia Program arr.

Students work closely with attorneys and enroll in a weekly seminar with other externs in the Washington, DC, area; through seminar and field work, students examine the role of attorneys in the nation's capital, witness the function of administrative agencies and the process of federal lawmaking, and engage in self-evaluation and reflection on field work.

LAW:9322 Field Placement: Judicial arr.

Close work with a federal district court judge or state appellate judge conducting research and drafting a wide variety of legal memoranda, orders, and opinions; assist in hearings and perform other duties generally associated with a judicial clerkship; weekly meetings with a faculty supervisor to discuss student's work in chambers; participation in biweekly classroom discussions.

- LAW:9331 Field Placement: General** arr. 5 s.h.
Students earn credit working closely with attorneys in a wide range of placements; field placements designed so that students are directly involved in activities characteristically performed by attorneys in a real-world setting; some placements routinely offered and arranged by the law school, others by students and approved by faculty; some placements are local and students take them along with their other classes; other placements are full-time, located across the country and around the world; in addition to fieldwork, students are enrolled in a seminar with other externs.
- LAW:9335 Summer Legal Placement** 1-3 s.h.
Externship opportunities for direct involvement in activities characteristically performed by attorneys (e.g., research and writing, document drafting, client interviewing and counseling, fact investigation, negotiations, court appearances); in-depth exposure to as many facets of the actual practice of law as practicable in each externship.
- LAW:9346 British Legal Methods Clinical Program** 3 s.h.
British Law externship; placement in London law office under guidance of barrister or solicitor; seminar and enrollment in course on English legal system taught by faculty of King's College, University of London.
- LAW:9413 Health and Elder Law Practicum** 1-6 s.h.
Opportunity to participate in research involving current health and elder law and policy issues, in collaboration with public health agencies, legislators, professional organizations, and advocacy organizations.
- LAW:9423 Tutorial** arr.
Different types of pedagogical techniques.
- LAW:9424 Tutorial** 1-4 s.h.
Work under faculty supervision; may involve substantive area of the law of jurisprudential ideas as they appear in various intellectual spheres; tutorials.
- LAW:9429 Intellectual Property Advocacy** 1-4 s.h.
Integrates teaching of substantive intellectual property law with development of oral and written advocacy skills in intellectual property field; builds on earlier learning in preparation for practice of law.
- LAW:9444 Tutorial for Foreign-Trained Lawyers** 1 s.h.
Introduction to the legal system and legal educational system of the United States; particular emphasis on those aspects of the U.S. system that present a strong contrast with other countries' legal systems, whether from civil or common law traditions; for foreign-trained law students (LL.M., J.D., or S.J.D.) who have not earned a U.S.-based J.D. or U.S.-based LL.M. degree that includes an introduction to U.S. law and legal system.
- LAW:9445 Foreign-Trained Lawyer Orientation** 1-2 s.h.
Orientation for foreign-trained student to U.S. legal system; introduction to U.S. patterns of legal argumentation, main institutional structures of U.S. legal system, and other distinctive aspects and/or fundamental principles of U.S. law; material drawn from basic areas of law (e.g., constitutional law, civil and criminal procedure, contracts, torts, property).
- LAW:9455 Medical Tutorial for Law Students** arr.
Participation on medical and/or surgical rounds under supervision of attending physician; didactic sessions on legal, medical, and ethical issues arising from the clinical experience, and issues such as peer review, credentialing, quality assurance, cost containment, AIDS, reproductive technology; recent developments in medical technologies. Cosponsored by Carver College of Medicine. Prerequisites: LAW:8562.
- LAW:9460 S.J.D. Tutorial** 5 s.h.
Thesis work under supervision of Doctor of Juridical Science (S.J.D.) committees; dissertation committee chairs conduct an irregular series of meetings to learn about and discuss issues common to research and writing of each thesis involved; students develop full thesis proposals and draft individual chapters; forum provided for workshopping student work and development of students' abilities to discuss and critique legal scholarship; for all S.J.D. students during their two semesters of residency at the College of Law.
- LAW:9473 Writing Tutorial** arr.
Writing project on a subject or topical area specified by the supervising faculty member; group meetings; writing tutorial.
- LAW:9481 Supplementary Writing** arr.
Supplemental writing project that is related to a student's course, but goes beyond the requirements for the course, and is supervised by the faculty member who teaches the course.
- LAW:9486 Directed Research and Writing** arr.
Research and writing project unrelated to any substantive course, supervised by a faculty member.
- LAW:9490 Independent Research Project** arr.
Work under faculty supervision; research.
- LAW:9491 Independent Research and Writing** arr.
Independent research and writing under thesis advisor/committee chair. Requirements: S.J.D. enrollment.
- LAW:9503 Advanced Immigration Law and Policy** arr.
Examination of issues arising out of contemporary problems of immigration law and policy; topics vary, may include critical analysis of initiatives for national, state, and local immigration reform; traditional class-based component, experiential component, advanced legal research component, and rigorous writing requirement. Requirements: LAW:8577 or legal clinic experience.
- LAW:9509 Advanced Problems in International Environmental Law** arr.
Research and writing seminar exploring selected topics that may be encountered in practice; topics vary.
- LAW:9511 Advanced Problems in International Law and Policy** arr.
Relationships between international law and several political visions of a world order; the United Nations Charter; other visions that have historically characterized United States, Western European, Russian, Chinese, Islamic, and other perspectives; how several of these historical perspectives appear to be at work in current conflicts involving U.N. Security Council, ISIS and other terrorist organizations, Ukraine, South China Sea, European Union, Eurozone; conflicts and potential for international law to aid in their resolution.
- LAW:9518 Advanced Topics in Corporate Law** arr.
Wide range of topics; theory of the firm, fiduciary duties, corporate counseling issues, history of corporate law, and so forth. Requirements: one law or business course in corporate law.
- LAW:9528 Advanced Topics in International Law** arr.
Contemporary problems of public international law and policy; issues arising from armed conflict, use of force, pacific settlement of disputes; human rights law and policy (individual civil, political, economic, social, and cultural rights; group rights such as self-determination, development, environment, peace); trade and development; environmental law and policy (e.g., climate change, species extinction, pollution).

- LAW:9532 Agricultural Law** arr.
Agricultural law as a complex and highly integrated field with a number of unique characteristics; examination of the field's defining laws and controversies; focus on current issues of significance including environmental regulation of agriculture, financing and economic viability of small- and medium-scale operations, discrimination against minority and female farmers, labor protections for farm workers, animal welfare, food safety, and biotechnology; students critically engage with course materials and develop well-rounded arguments for and against specific policies and legal positions.
- LAW:9545 Tax Policy** 2-4 s.h.
Tools to evaluate existing and proposed changes to state and federal tax systems; evaluation of tax systems through numerous perspectives whether economic, philosophical, or comparative, depending on student interest; specific attention to tax policy proposals that command popular and congressional attention; students write a policy paper that evaluates a current tax policy proposal. Requirements: prior or concurrent enrollment in any tax course.
- LAW:9549 Capital Punishment** arr.
Overview of the death penalty as presently applied in America; moral issues; long-term trends limiting the use of the death penalty in the United States and abroad; legal issues and Eighth Amendment jurisprudence that has developed since the 1960s regarding limits on the exercise of juror discretion, jury selection, proportionality, the execution of minors, racial discrimination, *mens rea* requirements, capital appeals and collateral attacks, and death penalty lawyering; critique of death penalty bills proposed in recent years for Iowa.
- LAW:9550 Capitalism** arr.
Economic and moral aspects of capitalism as a system for organizing a society's economic activity; major topics including the beginnings of capitalist theory in Smith, Marxist critiques of capitalism in 19th century, capitalism and its critics in the Gilded Age and Progressive Era, the Great Depression and Keynesianism, modern defenses and criticisms of capitalism in Hayek, Habermas, Friedman, Rawls, and others.
- LAW:9554 Compliance, Ethics, and Risk Management** arr.
Public and private organizations—including corporations, nonprofits, universities, and government agencies—are responsible for ensuring that their personnel comply with legal and regulatory requirements; organizations must find mechanisms to develop strategies and cultures of compliance; students develop an understanding of the field of organizational compliance and issues that compliance professionals are responsible for overseeing, establish a strong foundation in behavioral and traditional legal ethics, and develop persuasive arguments regarding strengths and weaknesses of compliance efforts undertaken by organizations. Corequisites: LAW:8331.
- LAW:9558 Corporate Boards Seminar** 2 s.h.
Simulation of seven meetings of a board of directors of a hypothetical company; students act as board members facing a discrete issue of corporate governance and take turns acting as chair of the board or as general counsel, leading the board of directors through a discussion of the issues; focus on the normal functioning of United States publicly listed companies, as well as on the duties of directors in times of crisis or significant change to the corporation.
- LAW:9559 Corporate Ethics** arr.
Examination of ethical issues that businesses and their attorneys confront in multiple contexts; particular emphasis on analyzing the meaning of ethical behavior, approaches to ethical decision making, issues of sustainability, development of social enterprise business models, and attorney's role in counseling corporate clients on ethical issues. Prerequisites: LAW:8331.
- LAW:9575 Current Trends in Higher Education Law** arr.
Introduction to the practice of law in and for a complex academic institution; selected current legal issues confronting attorneys in such an environment; doctrinal issues prevalent in a university setting; focus in a substantial measure on real or hypothetical problems considered in light of background reading rather than on doctrinal analysis.
- LAW:9582 Deals** arr.
Economic structure of complex commercial transactions as memorialized in agreements including bank credit facilities, indentures, underwriting agreements, other documents governing equity financings and financings involving convertible or preferred securities, venture capital agreements, securitization documents, business combination agreements, joint venture and shareholders agreements, limited liability company operating agreements, project finance documents; commercial agreements and how sophisticated parties order their private relationships to achieve efficient results. Prerequisites: LAW:8331.
- LAW:9591 Family Law in the World Community** arr.
Family law from a global perspective; treatment of family law problems in varied legal systems; application of international treaties and conventions to issues such as child custody, adoption and foster care, education and child labor, juvenile crime and punishment, child trafficking and exploitation, migrant and refugee children, child soldiers.
- LAW:9631 Higher Education and the Law** arr.
Introduction to the most pressing legal issues facing colleges and universities today: free speech on campus; academic freedom and tenure; diversity; student discipline; student privacy, safety, and well-being; Title IX; and intercollegiate athletics; a major goal is to consider the policy questions associated with institutional responses to these legal issues.
- LAW:9639 History of Regulation of Smoking and Tobacco** arr.
Regulation of smoking and tobacco use; history, beginning with 19th and early 20th centuries; state statutes and case law; OSHA, EPA, and FDA regulations; class action litigation, involvement of law firms in formulating tobacco company strategies, use of medical studies, economic history of the tobacco industry.
- LAW:9656 Topics in 19th-Century American Legal History** arr.
Exploration of selected focus topics, may include developments in the law of the home and the law of the workplace (free labor, worker immigration, apprenticeship, indentured labor, slavery); women's legal history; land issues and various Homestead Acts; Blackstone in America; Reconstruction of the Constitution after the Civil War; The National Archives—which houses American legal historical documents—displays the phrase, "What is past is prologue;" legal history that explains how we got to the legal present and to understand what is the law, you have to know how something got to be the law.

- LAW:9681 Elder Law** arr. With the aging population, elder law has become one of the fastest growing areas of law practice; examination of legal, policy, and planning issues related to aging in America; topics include planning for incapacity, guardianship, end-of-life planning (advance medical directives), social security, Medicare and Medicaid, planning for catastrophic illness and long-term care, elder abuse and neglect; exploration of ethical issues dealing with elderly and adult children of elderly.
- LAW:9692 Innovation, Business, and Law Colloquium** arr. Varied topics; antitrust, intellectual property, corporate and securities law, and the interfaces between those disciplines; readings, discussion.
- LAW:9701 International Criminal Law** arr. Available legal responses to ISIS; topics include the law of genocide, war crimes (including gender crimes), crimes against humanity, terrorism, human trafficking, money laundering, the International Criminal Court, and alternatives to prosecution including national truth commissions; strengths and weaknesses of international criminal law as a response to mass atrocity; practical considerations that limit and permit the effective functioning of this burgeoning legal experiment.
- LAW:9708 International and Comparative Labor and Employment Law** 2-3 s.h. Survey of labor and employment laws and norms developed and promulgated by the International Labor Organization (ILO), the European Union, free trade agreements, and corporate codes; comparative focus on laws of the United States, Germany, and China—three leading world economies with vastly different labor and employment law systems; how to make informed questions, including to local counsel, when cross-border, employment-related legal issues are encountered; why countries have different systems of labor and employment protection despite the fact that they all try to solve similar problems; how the United States is, or is not, unique.
- LAW:9717 Iowa Medical Innovation Group Seminar** arr. Interdisciplinary seminar intended to simulate the experience of product development, including potential business and legal issues; over the course of a year a team of students, with at least one law student on each team, will originate an idea for a medical device, design it and produce figures or a prototype, design a business model for marketing it, and evaluate legal issues and prepare draft legal documents; law students will analyze and counsel team members on intellectual property and business law issues and prepare draft contracts, licensing agreements, and materials for procuring intellectual property rights.
- LAW:9723 Seminar on Islamic Law and Government** 3 s.h. Islamic legal and political legacy from formative period until modern time; critical analysis of logic and context of development; development of jurisprudential, legal, and political literature; overview of theories and practices of governance in Islam beginning with Caliphate system and ending with modern nation-state models. Same as RELS:6723.
- LAW:9739 Topics in the Philosophy of Law** arr. Opportunity to explore certain questions in law and philosophy at greater depth; topics vary, ranging from foundational questions to issues with strong practical implications for public policy; readings specifically selected to fit topic area.
- LAW:9761 Law and the Trump Presidency** arr. Legal issues raised by the Trump administration that have drawn unusual public attention, ranging from matters related to immigration law, national security law, constitutional law, criminal law, campaign finance law, tax law, and administrative law, among other fields; oftentimes, issues raised lack clear legal answers or even relevant case; students study a selection of these novel issues as determined by current events and participant interest; includes substantial research and writing component; students lead a class discussion around their chosen research topic.
- LAW:9811 Law of War, Peace, and Military Affairs** arr. How does the law seek to restrain use of force in armed conflict? When may sovereign states lawfully take up arms? Once war begins, what methods may states and soldiers employ? How does and should the law of war deal with non-state actors, notably terrorists and private military contractors? Must the world reassess its answers to these questions in light of geostrategic developments since 9/11? When and why is a soldier's obedience to illegal orders an acceptable excuse? Is the Nuclear Non-Proliferation Treaty a success or failure?
- LAW:9826 LL.M. Seminar** arr. Basic research and analytical methodologies for the international and comparative law fields; workshop approach to project proposals, drafts.
- LAW:9829 Media Law** 3 s.h. Overview of law that applies to mass media, citizen media, and social media; how law has attempted to define "the Media," and how it has distinguished between distribution platforms in treatment of media rights and obligations; American press and notions of press freedom at time of founding; tracking evolution of law governing injuries inflicted by speakers beginning with common-law treatment of libel and slander to constitutionalization of those torts; examination of law that applies to various journalistic tools; problems of jurisdiction and choice of law posed by online news; examining market influence on content; comparing American system with other countries approaches to media law.
- LAW:9834 Transportation Law and Policy** 3-4 s.h. Transportation plays an outsized and understudied role in day-to-day life, economy, and society; law plays a similarly vital and underappreciated role in determining transportation policy; introduction to the law and policy of transportation.
- LAW:9838 Selected Topics in Comparative Law** arr. Selected focus topics in different offerings.
- LAW:9849 Nonprofit and Philanthropic Organizations** arr. Issues in law and policy relating to philanthropic and nonprofit institutions; creation, role, nature, and history of nonprofit entities; tax exemption, tax treatment (including property and donor tax issues); political and legislative activities; roles of members, directors, officers; problems of external regulation, accreditation, ethics; special issues for religious organizations, community foundations, private foundations, universities; development of philanthropic and nonprofit activity in foreign jurisdictions.

LAW:9855 Policy Lab Seminar**arr.**

Application of legal skills to real world policy problems; work in teams to investigate a live issue, conduct necessary research, talk to stakeholders, prepare a legal work product (proposed legislation, regulation, doctrinal changes) and a policy justification for that proposal; focused instruction on a specific policy space, general instruction in tools and methods used to analyze policy and design solutions; independent research on particular issues within that space; presentations; working through challenges that arise during process.

LAW:9860 Inside-Out: Social Justice Issues and Critical Theory**2-4 s.h.**

Use of Inside-Out model; law students (outside students) co-learn with incarcerated students (inside students) at the Iowa Medical and Classification Center (IMCC), also known as Oakdale, a medium security state prison and the site for the University of Iowa Liberal Arts Beyond Bars (UI LABB) program; analysis and discussion of current social justice issues through a critical legal theory lens (i.e., critical race theory, feminist legal theory, LatCrit, ClassCrits, queer theory, critical disability theory).

LAW:9863 Patent Prosecution Seminar**3-4 s.h.**

Drafting seminar on patent application preparation and prosecution; student drafting exercises and presentations on advanced patent law topics; administrative rules and procedures governing practice before the U.S. Patent and Trademark Office; for students who plan to practice patent law. Prerequisites: LAW:8643.

LAW:9871 Privacy Law and Technology**3 s.h.**

We have become, wittingly or not, compulsive data makers; every day we shed reams of personal information that those who have an interest in empowering, monetizing, manipulating, or suppressing us are eager to acquire; this dynamic is redrawing the line between what it means for information to be private/public, personal/commercial, ours/theirs; privacy law and technology serves an interdisciplinary introduction to technologies, laws, and policies that shape how that information is collected, who has access to it, and what it can reveal about us; class sessions alternate between focusing on legal frameworks and the technologies they implicate.

LAW:9874 Principles of Contract Drafting**3 s.h.**

Principles of drafting business contracts; focus on structure of contracts, how to draft each of the parts of a business contract, and how to translate the needs of the business into clear and understandable contractual language; examination of typical business contracts (e.g., nondisclosure agreements, letters of intent, purchase agreements, and other types of agreements); students complete drafting exercises and a series of larger contract drafting projects.

LAW:9882 Public Health Law**arr.**

Introduction to scope, function, and history of governmental activities and programs encompassed by public health regimes (primarily in the United States); legal and constitutional powers and duties of states to create prerequisites for health of population as a whole; limitations on exercise of that power to restrict individuals interests (inter alia) in liberty, autonomy, privacy, and property; tensions and conflicts that arise when collective action on behalf of public/common good constrains what the state deems to be acceptable risks triggered by actions of private individuals.

LAW:9886 Reconstruction and the Constitution**arr.**

After the Civil War, during Reconstruction, Congress enacted the 13th, 14th, and 15th Amendments that changed the constitutional course of the nation and took place during the period of most progressive reform in U.S. history; students address: How do these amendments fit together? Where did the language of these amendments come from? How did these relate to the Dred Scott case? How did this constitutional change occur? What was necessary for this reform to come about? What was necessary legally? What was necessary in terms of social context for this progressive reform to occur? How do these amendments relate to the Bill of Rights and the 17th Amendment for women's suffrage? Prerequisites: LAW:8010.

LAW:9912 Selected Issues in Family Law**arr.**

In-depth look at an issue or set of issues in family law; relevant cases, statutes, scholarship; class visits or on-the-job observations with community members who play roles in the family law process being examined.

LAW:9920 Federal Criminal Sentencing**arr.**

Sentencing as a key stage of the criminal justice system; purposes of sentences, guilty pleas, and plea bargaining; procedural rights during the sentencing process; types of sentencing statutes, federal guidelines, and the federal death penalty; supervised release, probation, and revocation of supervised release and collateral; consequences and sanctions.

LAW:9936 Selected Topics in Immigration Law**arr.**

Issues arising out of contemporary problems of immigration law and practice; topics may include immigration enforcement policy, draft immigration legislation, initiating representation, bond hearings, suppression/other motions practice, defensive asylum/related claims, appellate practice, "know your rights" counseling, establishing powers of attorney/other forms of legally binding substitute decision making pertaining to family members/property/other assets, identifying and working with local resources/community organizations that can assist with or reinforce goals of individual client representation; may involve guest speakers/field trips to local nonprofits/government agencies. Recommendations: no specialized knowledge of immigration law is presupposed and no prior immigration law courses required.

LAW:9941 State Constitutional Law**arr.**

Power of state courts to independently interpret state constitutional provisions that are identical or similar to the federal counterparts; various approaches taken by state courts with respect to this issue; in-depth analysis of cases where a state court has departed from the federal interpretation. Prerequisites: LAW:8280.

LAW:9950 S.J.D. Continuous Enrollment**1 s.h.**

Intended for S.J.D. students working on their dissertation with no mandatory classes left to take; continuous registration is a College of Law policy and students should register for continuous registration only if they are not going to register for any other tuition and fee-assessing courses. Requirements: S.J.D. enrollment, completion of required coursework, and promotion to candidacy.

LAW:9959 Supreme Court Seminar**arr.**

Supreme Court practice, procedure, jurisdiction; the art of opinion writing; in-depth analysis of cases on the court's pending docket; writing briefs, conducting research, conferencing cases, assigning and preparing opinions, and persuading colleagues; preparation of an opinion.

LAW:9960 Crime and Punishment in American History 3 s.h.

As reasons behind punishment shifted, so did its methods change; sometimes these developments occurred amidst great public debate and scrutiny; at other times, they proceeded almost without notice; students are challenged to think critically about the relationship between laws on crime and punishment on one hand, and American society, politics, and culture on the other (What did it mean to be “criminal” at various points in American history? How have criminal laws both reflected and shaped their times? And what does this history mean for modern crime control and its reform?).

LAW:9989 Litigation for Decarceration 2-3 s.h.

Analysis and discussion of recent criminal-legal reforms aimed at reducing the number of individuals who are imprisoned in the federal system.

LAW:9990 Wrongful Convictions and the American Criminal Justice System arr.

Over 300 innocent persons in the United States have been exonerated through DNA evidence after being convicted of crimes they did not commit since 1989; how wrongful convictions occur, how they are remedied, how future injustices can be prevented; introduction to criminal appeals and postconviction proceedings; examination of cases of wrongful convictions; common factors that contribute to conviction of innocent; challenges of proving innocence under statutory and constitutional law; how the system can be reformed to prevent wrongful convictions.

Law Study Abroad Courses

LWAB:8230 France Summer Program: Paris and Arcachon arr.

Intensive coursework in France taught by professors from Iowa and France; program begins in Paris where students visit courts and a law school with speakers including prominent judges and lawyers; students then travel to Arcachon for remainder of stay. Five-week courses in May and June.

LWAB:8240 London Law Consortium arr.

Study abroad program for students; American and British law.

LWAB:8250 Law Study Abroad at Peking University School of Transnational Law arr.

Exchange study program at Peking University of Transnational Law in China.

LWAB:8360 Law Study Abroad at KoGuan Law School of Shanghai Jiao Tong University arr.

Exchange student study abroad program at KoGuan Law School of Shanghai Jiao Tong University.

LWAB:8825 London Law Program 2-3 s.h.

London Law Program is open to second- and third-year law students who spend ten days taking classes in the heart of London; students visit parliament, the UK supreme court, the Inns of Court, and attend a symposium at Oxford University as part of their coursework; each course offered includes a strong comparative dimension. Winter session.

LWAB:9215 Law Study Abroad at Beijing Normal University arr.

Exchange Student study abroad program at Beijing Normal University, Beijing, China.

LWAB:9223 Law Study Abroad at Catolica University arr.

Exchange student study at the University of Católica in Lisbon, Portugal.

LWAB:9226 Law Study Abroad at Radboud University Nijmegen arr.

Exchange student study at Radboud University in Nijmegen, Netherlands.

LWAB:9230 Law Study Abroad at Ewha Womens University arr.

Exchange student study at Ewha Womens University in Seoul, South Korea.

LWAB:9234 Law Study Abroad at Korea University arr.

Exchange student study at Korea University in Seoul, South Korea.

LWAB:9238 Law Study Abroad at National University Ireland arr.

Exchange student study at National University Ireland, Galway, Ireland.

LWAB:9242 Law Study Abroad at Pontifica Comillas University arr.

Exchange student study at Pontifica Comillas University, Madrid, Spain.

LWAB:9244 Law Study Abroad at the University of Vienna arr.

Exchange student study abroad program at the University of Vienna, Austria.

LWAB:9246 Law Study Abroad at the University of Pristina arr.

Exchange student study at the University of Pristina, Kosovo.

LWAB:9300 Law Study Abroad at Zhejiang University Guanghau Law School arr.

Students enroll in classes linked to Zhejiang University's LL.M. programs and earn up to 15 credits, choosing from a variety of courses taught in English; students with adequate fluency also can take law courses taught in Chinese; exchange program is for one semester, and students can make arrangements with Zhejiang University for an additional semester to complete an LL.M.

LWAB:9301 Law Study Abroad at University of Zagreb arr.

Exchange student study abroad at University of Zagreb in Croatia.

Juris Doctor, J.D.

The Juris Doctor (J.D.) is a professional degree awarded by the College of Law. The University of Iowa College of Law is approved by the Council of the Section of Legal Education and Admissions to the Bar of the American Bar Association.

The first year of the J.D. program offers the personal connection and attention students need to develop a strong intellectual foundation for legal thinking and writing. The College of Law has one of the lowest student-faculty ratios of any law school. Professors have an open-door policy, and they serve as models for the kind of highly collaborative, rigorously professional behavior that prepares students to serve as counselor to their clients. Students get intensive, individualized instruction from legal writing faculty; the College of Law is one of the few law schools in the nation with a full-time faculty dedicated solely to a student's growth as a legal writer.

In the second and third years, students focus on the areas of law that most interest them, drawing from a rich menu of mainstream, specialized, and clinical courses. A wide array of opportunities provides experiential learning: moot court competitions, the field placement and the clinical law programs that allow students to take the lead with real clients, or allowing students to write for one of the four student-run scholarly journals. The Field Placement program, in particular, provides a wide range of placements for students still in law school. Students have worked in U.S. District Courts, legal aid centers, federal public defenders' offices, and nongovernmental organizations (NGOs) around the world. Students also may add distinction to their résumés by participating in study abroad or exchange programs.

Details about applications and admission to the program are available on the College of Law website.

Cocurricular and Extracurricular Programs

Students enrich their course of study by participating in the college's cocurricular and extracurricular programs which include Moot Court, the Trial Advocacy Program, and four student-produced journals.

Moot Court

In the Moot Court appellate advocacy programs, students draft appellate briefs, build expertise with citation form, develop research skills, and strengthen their persuasive abilities through oral arguments.

Trial Advocacy

The Trial Advocacy Program is a student-run, faculty-supervised program in which students develop and refine skills used to prepare and try civil and criminal cases. The heart of the program is LAW:9060 Trial Advocacy, a course taught by law school faculty, federal and state judges, and experienced trial attorneys. Students are on their feet during most class sessions, practicing the arts of jury selection, opening statement, direct and cross examination, introduction of exhibits, use of expert testimony, and closing argument. The course culminates with a full-scale trial—from the filing of pretrial motions to the rendering of a jury verdict—conducted by student co-counsel before a visiting judge and a jury of laypersons.

The Stephenson Competition is named after Judge Roy L. Stephenson, a U.S. District Court and Eighth Circuit Court of Appeals judge and a 1940 graduate of the College of Law. Students who demonstrate superior ability in advocacy skills during the trial advocacy courses participate in a series of mock trials judged by local members of the bench and bar. Individuals selected from the competition represent the University of Iowa in the national trial competition.

Iowa Law Review

Since its inception in 1915, the *Iowa Law Review* has served as a scholarly legal journal, noting and analyzing developments in the law and suggesting future paths for the law to follow. Students have managed the review since 1935, editing and publishing articles by professors and students. To learn more, visit the Iowa Law Review website.

Journal of Corporation Law

The *Journal of Corporation Law* is the nation's oldest and most cited student-published legal periodical specializing in corporate law. The journal's scope includes antitrust, intellectual property, labor law, securities, taxation, employment discrimination, insurance, products liability, and regulated industries, as well as traditional corporate topics. Selected articles submitted by practitioners and academics are published in each of four annual issues. See the Journal of Corporation Law website.

Journal of Gender, Race & Justice

The *Journal of Gender, Race & Justice* pushes the boundaries of legal scholarship and theory in its focus on social justice issues. The journal hosts a symposium at the College of Law every third year, bringing together nationally renowned legal scholars and practitioners to discuss the relationships among the law and race, gender, sex, sexual identity, economic class, ability, and other identity characteristics. The journal publishes an annual volume of legal works that includes symposium papers, papers from conferences outside the college, and articles written by Iowa law students. To learn more, visit the Journal of Gender, Race & Justice website.

Transnational Law & Contemporary Problems

Transnational Law & Contemporary Problems addresses issues and problems that transcend traditional political boundaries, that are of interest to the international and comparative law community, and that are not commonly found in other journals and reviews. One issue takes the form of a symposium addressing specific topics; this issue has a guest editor who is a legal scholar noted for work on the symposium topic. The second issue is submission based. Every other year the journal organizes and sponsors a symposium on a contemporary international issue; past topics include climate change, the European Union's sovereign debt crisis, and war crimes. For more information, visit the Transnational Law & Contemporary Problems website.

Requirements

The Juris Doctor (J.D.) requires a minimum of 88 s.h. to earn the degree. To be eligible for a J.D. degree, students must meet the credit hour requirements, meet the length of study requirements, achieve a cumulative g.p.a. of at least 2.1, take and complete all required courses, satisfy the writing requirements, and satisfy the experiential course requirement.

First-Year Curriculum

The first-year curriculum emphasizes development of analytical skills, a sense of the role of legal institutions in society, and essential writing skills. Each course in the first-year curriculum shares these emphases and conveys substantive knowledge about a particular area of the law.

First-year students take the following courses.

Code	Title	Hours
Fall Semester		
LAW:8017	Contracts	4
LAW:8026	Introduction to Law and Legal Reasoning	1
LAW:8032	Legal Analysis Writing and Research I	2
LAW:8037	Property	4
LAW:8046	Torts	4
Spring Semester		
LAW:8006	Civil Procedure	4
LAW:8010	Constitutional Law I	3
LAW:8022	Criminal Law	3
LAW:8033	Legal Analysis Writing and Research II	3
Elective		3

The two-semester sequence LAW:8032 and LAW:8033, Legal Analysis Writing and Research (LAWR), is designed to equip students with effective skills in legal analysis, writing and oral communication (oral advocacy), and research.

Second- and Third-Year Curriculum

Second- and third-year courses cover the range of specialties within the legal profession, allowing students to explore and follow their professional interests in a particular career specialization, to write for one of the school's four student-run scholarly journals, to pursue combined degrees in law-related graduate programs, or to simply obtain the widest possible exposure to the legal landscape.

All second- and third-year students must complete the following work.

Code	Title	Hours
LAW:8280	Constitutional Law II	3
LAW:8791	Professional Responsibility	3
Experiential course requirement		
Four writing units beyond the writing requirements of the first year		

Combined Programs

J.D./Graduate Degrees

Some students want to explore areas beyond the law, whether it is to maximize their skill sets for future careers, gain in-depth knowledge in a second subject matter, or simply to broaden their minds. Combined degree programs allow students to pursue two degrees simultaneously, taking advantage of synergies between degree requirements while gaining significant exposure to a second area of study. Juris Doctor students may pursue combined degree programs with most graduate and professional programs at the University of

Iowa. Students may earn a J.D. degree and another graduate or professional degree in a shorter amount of time than if the two degrees were pursued independently.

Admissions Qualification

To pursue a combined degree, students must apply to and be accepted separately into the J.D. program and another graduate or professional program. Students typically seek admission to the second degree-granting program after matriculation at the College of Law by applying to the graduate program of interest during their first year of law school. In some cases it is possible to apply to both programs simultaneously. Students who have already begun graduate work at the University of Iowa may apply to the College of Law. Once students have been accepted into the J.D. program and another graduate or professional program, they must obtain the permission of the associate dean for student affairs or the dean of the College of Law to be classified as a combined degree candidate. Prospective students interested in a combined degree program should contact the admissions offices of both programs to discuss the proposed program of study.

Students who wish to pursue a combined degree program and obtain admission into one college but not the other may enter the college in which they were admitted. However, they are not granted combined degree status. Likewise, combined degree students who terminate work toward one of the degree programs may typically continue to work toward the other degree.

Admissions Procedures

Prospective combined degree students must submit separate applications to the College of Law and the graduate program of interest. They must take the Law School Admission Test (LSAT) and comply with all College of Law admissions requirements. Students also must meet the admission requirements of the other graduate program by taking tests such as the Graduate Record Examination (GRE) General Test or the Graduate Management Admission Test (GMAT). Prospective students should inform the Admissions Offices of both programs that they are applying to a combined degree program to confirm the admissions requirements for the other program.

Students interested in a combined degree program at the beginning of their legal studies should indicate they are seeking a combined degree on their application. Students who are admitted to both colleges will receive separate letters of admission from those colleges as well as an official notification of being admitted to the combined degree program from the Office of Admissions.

Admission information for the Juris Doctor (J.D.) is available on the College of Law Admissions page. For information about other graduate programs of interest, visit Academics on the University of Iowa home page.

Shared Credit Policies

Students enrolled in a combined degree program must satisfy the semester hours and course requirements that all students must satisfy for each degree separately. However, they have the option of using credit for some courses toward both degrees. These courses are typically electives in each discipline. For example, students enrolled in a combined J.D./M.P.H. program may be able to count the family law and introduction to U.S. health care system courses toward the graduation requirements of both the J.D. and M.P.H. degrees.

The amount of shared credit that may be applied toward both programs of study varies by program. Generally, combined degree program students may apply up to 12 s.h. earned in their second program of study toward the J.D. provided that the courses satisfy the College of Law policy on non-law courses. The J.D./M.P.H. degree permits up to 12 s.h. of specific College of Law courses to count toward M.P.H. graduation requirements. Some degree programs allow students to count up to 6 s.h. of College of Law courses toward a non-law degree. Details on the Graduate College policy may be found in the Manual of Rules and Regulations of the Graduate College on the Graduate College website. Prospective students should check with their graduate or professional program of interest to determine the law semester hours that count for both programs as well as other rules or restrictions concerning counting of courses toward both degrees with the College of Law.

Additional details about College of Law graduation requirements and other policies may be found in the College of Law Student Handbook. Students considering a combined degree program should be aware that the first-year program in the College of Law consists of required courses and they typically may not take courses outside the College of Law.

Student Tuition Assessment Policy

Students in a J.D. and a graduate/professional degree combined program are assessed tuition at the College of Law rate if the tuition in the other college is lower than in the College of Law, except for any semester or summer session in which they are not enrolled in any law courses and none of the semester hours being earned in other colleges are applied toward their J.D. degree. All combined degree students pursuing a J.D. degree are assessed at least six semesters of law school tuition.

Master of Laws, LL.M.

The Master of Laws (LL.M.) is designed for two types of students:

Legal Practice Track: For foreign-trained jurists who seek a comparative introduction to, and specific training, in aspects of United States law and legal institutions, and a path to state bar admission. Students benefit from the College of Law's legal analysis, writing, and research course, and core courses including contracts, property, torts, and professional responsibility. An extended orientation provides an introduction to United States law.

Research Track: For foreign-trained jurists or graduates of J.D. programs in the United States who wish to deepen their understanding of law and are interested in research. The program encourages close collaboration with renowned experts in comparative law; anti-competition law; law and economics; law and society; international law, including the law pertaining to international business transactions and/or human rights; and business and innovation.

The LL.M. program admits fewer applicants so that students receive substantial attention from the faculty. Admission is competitive. All applicants must present evidence of high academic potential and strong recommendations, especially from law professors who supervised their work in classes or seminars.

Requirements

The Master of Laws program requires that students successfully complete a minimum of 24 s.h. of credit, as approved by their faculty advisor. Coursework is selected from the College of Law's general course offerings and from LL.M.-specific courses.

Legal Practice Track

This track is open to foreign-trained lawyers who do not have a J.D. earned in the United States. Students enroll in the LL.M. orientation to the U.S. legal system course in two parts (2 s.h.); a course in professional legal writing (2 s.h.); a course in professional responsibility (3 s.h.); and at least 6 s.h. of basic bar exam courses, such as contracts, torts, or constitutional law. This track is designed to qualify students to take the bar exam in states that allow graduates of LL.M. programs to complete the bar exam.

Research Track

This track is open to both foreign-trained students and students who hold a J.D. degree earned in the United States. LL.M. students without a J.D. degree must take the LL.M. orientation to the U.S. legal system course in August before the start of the fall semester (1 s.h.). Students take the LL.M. seminar, a research and writing course in which they write a research paper on a topic chosen with the approval of their advisor (for at least 1 s.h.). This track is especially suitable for those seeking to enter into an academic career or one that primarily involves policy formulation or research.

Students who earned a J.D. in the United States and international students who have been trained in another common-law jurisdiction, whose English competence is sufficiently high, and who choose the research track are required to undertake a more ambitious research project (4 s.h.) intended to lead to the production of a publishable paper.

Others suitably qualified also may attempt the longer research paper with their advisor's approval.

With the exception of the LL.M. orientation course and the LL.M. seminar, courses are taken with other J.D. students from law course offerings, especially offerings on U.S., international, and comparative law. This method of instruction ensures a very effective comparative experience through broad contact with U.S. law students and professors, and U.S.-trained students similarly benefit from close contact with foreign-trained lawyers.

Master of Studies in Law, M.S.L.

Application materials are reviewed by the M.S.L. Faculty Oversight Committee.

The Master of Studies in Law (M.S.L.) degree is primarily intended to educate students and professionals in other fields who do not wish to practice law but who need to recognize and respond effectively to legal issues arising in their work. Individuals who have completed their B.A. or B.S. degree may choose to better position themselves in the job market. Others may be on an established career path but seek to increase their skill set and enhance mobility and promotion opportunities.

The M.S.L. program provides professionals with an overview of the legal system as a whole, as well as an introduction to some of the legal issues that they are likely to confront in their fields. Students take existing courses in the College of Law alongside J.D. students.

The degree may be completed in as little as one year of full-time study or in not more than four years of part-time study. The M.S.L. program does not qualify graduates to practice law.

Requirements

The Master of Studies in Law program requires 30 s.h. of credit. With law school approval, M.S.L. students may take up to 9 s.h. in related coursework from other colleges across campus. Students complete common requirements and customize their curriculum based on interest. Students also may choose to pursue a specialty track such as the law and public policy track or the business and innovation track.

Common Requirements

All students must take the following.

Code	Title	Hours
Both of these:		
LAW:8026	Introduction to Law and Legal Reasoning	1
One or more College of Law writing seminars, independent studies, or tutorials		2
Two first-year courses required of J.D. students, including at least one of these:		
LAW:8017	Contracts	4
LAW:8037	Property	4
LAW:8046	Torts	4

Admission

Applicants must submit an application for admission; a short statement detailing their reasons for pursuing the M.S.L. degree; a current résumé; official transcripts from all institutions students have attended; two letters of recommendation; and an official ACT, SAT, Graduate Record Examination (GRE) General Test, Graduate Management Admission Test (GMAT), or Law School Admission Test (LSAT) score.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

Doctor of Juridical Science, S.J.D.

The Doctor of Juridical Science (S.J.D.) program is intended for students who wish to conduct original and advanced legal research in law under faculty supervision. S.J.D. students are expected to write a dissertation.

Requirements

The Doctor of Juridical Science program includes five requirements for earning the S.J.D. degree.

Year of Residency

Doctor of Juridical Science students must spend at least one academic year (two semesters) in residence in the S.J.D. program at the College of Law.

Students must complete 18 s.h. of credit during their first year of residency. They must enroll in the S.J.D. tutorial (5 s.h. each semester; 10 s.h. total) to conduct research and writing under the supervision of their S.J.D. dissertation committee. The work in the S.J.D. tutorial focuses on formulating a detailed dissertation proposal, beginning research for and writing of portions of the dissertation, and completing one or more chapters.

Students are expected to write a dissertation of publishable quality making a significant and original contribution to legal scholarship. The dissertation should be a book-length manuscript or a series of related articles of equivalent intellectual ambition and scope.

The balance of the required 18 s.h. will be earned through research and writing related to a student's dissertation, supervised by the student's S.J.D. chair. However, at the discretion of a student's S.J.D. committee, some of the semester hours may be allocated to courses or seminars that the committee feels a student needs to strengthen the ability to write a successful dissertation.

Admission to S.J.D. Candidacy

Admission to candidacy is a formal step that must be achieved before a student has the right to continue in the S.J.D. program to complete a dissertation and is determined by the student's committee on the basis of the work done during the student's year of residency in the program.

As part of the assessment process, the S.J.D. committee holds an oral examination toward the end of a student's year of residency that focuses on the work the candidate has completed on the dissertation, the candidate's general knowledge and understanding in relation to the subject matter of the dissertation, and the candidate's further plans for completion of the dissertation. If the committee is not able to admit the student to S.J.D. candidacy at the conclusion of the first year of residency, the committee may give an extension of up to one calendar year if it finds a sufficient basis to believe that the student likely will be able to satisfy the necessary standard within that time.

Presentation of Dissertation Work

Each student is required to make at least one substantive presentation of dissertation work at a meeting of the S.J.D.

tutorial to a specially constituted group of faculty, or in a public meeting, as arranged with the student's S.J.D. committee.

Completion of the Dissertation

Students admitted to S.J.D. candidacy continue to enroll in 1 s.h. of dissertation credit, which provides access to University resources, including the Law Library. However, students admitted to S.J.D. candidacy are free to complete their dissertation wherever they wish. In any event, they must continue to coordinate with their committee and continue to register each fall and spring semester as an S.J.D. candidate in the college.

Oral Defense of the Dissertation

Before a student's S.J.D. committee decides whether to approve the student's completed dissertation, the student must successfully defend the dissertation in an oral defense led by the committee. A student must complete the dissertation and have it approved by the committee within five calendar years from the date of admission to S.J.D. candidacy.

Admission

To be admitted to the S.J.D. program, students typically first complete the LL.M. degree at the University of Iowa or a similar masters-level degree at another law school, either in the United States or at an English language law school with academic standards equivalent to those of highly ranked United States LL.M. programs. In appropriate circumstances, the admissions committee will consider applications from excellent students without an English language master's-level degree who wish to proceed directly to work on their S.J.D. degree. All applicants must show strong evidence of scholarly research and writing abilities.

For more information, visit the S.J.D. application process web page.

University of Iowa Center for Human Rights

Director, Center for Human Rights

- Adrien K. Wing

Director, Human Rights Certificate Program

- Brian R. Farrell

Undergraduate certificate: human rights

Website: <https://uicr.uiowa.edu/>

Human rights purport that all people deserve to live life with dignity; that human beings are owed the protection of these rights simply because they are human. Universal human rights apply to all equally and without discrimination. They encompass civil and political rights; economic, social, and cultural rights; and apply to both individuals and groups. The rights set forth in human rights doctrines, such as the Universal Declaration of Human Rights, are interrelated, interdependent, and indivisible.

The curriculum for the Certificate in Human Rights introduces students to human rights theory and practice by providing students with the opportunity to understand human rights law, history, and philosophy; explore specific, pressing human rights topics in-depth from interdisciplinary perspectives; identify solutions to global challenges; learn how to translate human rights theory into effective advocacy; and strengthen one's ability to communicate successfully with academic and nonacademic audiences.

The Certificate in Human Rights is administered and awarded by the College of Law [p. 1633].

Programs

Undergraduate Program of Study Certificate

- Certificate in Human Rights [p. 1657]

Courses

University of Iowa Center for Human Rights Courses

HRTS:2115 Introduction to Human Rights 3 s.h.

Analysis and evaluation of the international human rights program; relationship between human rights and international law. Same as IS:2115.

HRTS:3905 Topics in Human Rights 1-3 s.h.

Examination of emerging human rights issues from an interdisciplinary and international perspective. Same as IS:3905.

HRTS:3906 Global Crises and Human Rights 3 s.h.

Exploration of human rights in context of global challenges; multidisciplinary; topics may include military conflict, nuclear war, human trafficking, environmental disasters, and other international human rights crises.

HRTS:3910 Human Rights Advocacy 3 s.h.

Theoretical foundations and critical issues for international human rights advocacy and international humanitarian movements. Same as IS:3910.

HRTS:3920 Seminar in Human Rights Praxis: Supervised Internship 3 s.h.

Supervised internship in human rights praxis; focus on field-based advocacy and human rights frameworks.

Human Rights, Certificate

Requirements

The undergraduate Certificate in Human Rights requires 18 s.h. of credit. The certificate program is open to current University of Iowa undergraduate students and to all individuals who hold a bachelor's degree and are not enrolled in a UI graduate or professional degree program. Students must maintain a g.p.a. of at least 2.00 in work for the certificate. They may count a maximum of 6 s.h. of transfer credit toward the certificate with approval from the certificate program's faculty advisory group.

Individuals must declare their intent to earn the certificate. See the Certificate in Human Rights website for details.

The Certificate in Human Rights requires the following coursework.

Foundations in Human Rights

Code	Title	Hours
All of these:		
HRTS:2115/IS:2115	Introduction to Human Rights	3
HIST:4101	History of Human Rights	3
PHIL:3430	Philosophy of Human Rights	3

Contemporary Global Issues in Human Rights

Code	Title	Hours
6 s.h. from these (if a course is repeatable, it can be taken with different topics):		
HRTS:3905/IS:3905	Topics in Human Rights	1-3
HRTS:3906	Global Crises and Human Rights	3

Human Rights in Practice

Code	Title	Hours
One of these:		
HRTS:3910/IS:3910	Human Rights Advocacy	3
HRTS:3920	Seminar in Human Rights Praxis: Supervised Internship	3

Career Advancement

The Certificate in Human Rights benefits students interested in careers in government, social services, the nonprofit sector, business, and education, as well as those pursuing professional or graduate schools.

Carver College of Medicine

Vice President for Medical Affairs and Dean

- J. Brooks Jackson

Executive Dean

- Patricia L. Winokur

Vice Dean, Clinical Affairs

Undergraduate majors: medical laboratory science (B.S.); nuclear medical technology (B.S.); radiation sciences (B.S.)

Undergraduate certificate: EMT paramedic program

Professional degrees: M.C.A.; M.C.N.; M.D.; M.P.A.S.

Graduate degrees: M.A.; M.M.E.; M.S.; D.P.T.; Ph.D.

Website: <https://medicine.uiowa.edu/>

The Roy J. and Lucille A. Carver College of Medicine is an integral part of the University of Iowa. It contributes to the education of thousands of University students, is home to

ground-breaking research in a wide array of disciplines, and provides a statewide health care resource.

The Carver College of Medicine is the only college in Iowa that offers a curriculum leading to the Doctor of Medicine. It also offers a Bachelor of Science in medical laboratory science, nuclear medicine technology, and radiation sciences (see "Undergraduate Programs of Study" under Programs [p. 1659] in this section of the Catalog). It offers Master of Science and Doctor of Philosophy degrees in several disciplines, the Master in Medical Education, and the Doctor of Physical Therapy (see "Graduate Programs of Study" under Programs [p. 1659] in this section of the Catalog). In addition, the Carver College of Medicine offers professional degrees: the Doctor of Medicine, the Master of Clinical Anatomy, the Master of Clinical Nutrition, the Master of Physician Assistant Studies (see "Professional Programs of Study" under Programs [p. 1659] in this section of the Catalog).

Doctor of Medicine and other health sciences students have a number of opportunities to gain experience in medical clinics, community hospitals, and a major academic medical center. M.D. graduates may pursue further training in the specialties of family medicine, internal medicine, surgery, and pediatrics at one of 13 University of Iowa-affiliated residency programs in six Iowa cities. The college also participates in the education of students in the Colleges of Dentistry, Nursing, Pharmacy, and Public Health and in the life sciences and health-related programs of the College of Liberal Arts and Sciences, the College of Engineering, and the Graduate College.

Health professionals from throughout the Midwest take part in the college's year-round continuing medical education programming, updating their knowledge and skills through refresher courses, clinics, and conferences. The college also offers a variety of services that support Iowa physicians and community hospitals.

In addition to providing education and resources for physicians and other health care organizations, the college addresses broad public issues of distribution and organization of health care services. Its faculty members advise and serve on national, state, and regional health planning councils, health boards, and various health agencies.

Accredited by the Liaison Committee on Medical Education of the American Medical Association and the Association of American Medical Colleges, the Carver College of Medicine meets the requirements of all state licensing boards. Its M.D. diploma admits the holder to all privileges granted to graduates of all medical colleges before such boards. All other professional programs administered by the college are accredited by their respective accrediting bodies.

Doctor of Medicine (M.D.)

The Doctor of Medicine is a four-year program that prepares students to practice primary care medicine and to pursue further education and training in specialized areas of medicine. For a description of the M.D. curriculum and information about admission to the program, financial support, and academic rules and procedures, see Doctor of Medicine [p. 1692] in the Catalog.

Programs

Undergraduate Programs of Study

The Carver College of Medicine offers a Bachelor of Science with majors in medical laboratory science, nuclear medicine technology, and radiation sciences. The medical laboratory science major is offered through a partnership with Allen College, in Waterloo, Iowa. See Medical Laboratory Science [p. 1708], Nuclear Medicine Technology [p. 1730], and Radiation Sciences [p. 1772] in the Catalog. In addition, the college offers an undergraduate certificate; see the EMT Paramedic Program [p. 1662] in this section of the Catalog.

Graduate Programs of Study

The Carver College of Medicine offers graduate programs leading to the M.S. in athletic training (see the Department of Orthopedics and Rehabilitation [p. 1740]), the M.S. and Ph.D. in biochemistry (see the Department of Biochemistry [p. 1675]), the M.S. and Ph.D. in microbiology (see the Department of Microbiology and Immunology [p. 1713]), the M.S. in pathology (see the Department of Pathology [p. 1747]), the Doctor of Physical Therapy and the Ph.D. in physical rehabilitation science (see the Department of Physical Therapy and Rehabilitation Science [p. 1750]), and the Master in Medical Education (see the Medical Education Program [p. 1704]). Departmental participation and teaching leads to the Graduate College's M.S. and Ph.D. in biomedical science [p. 1549] with cell and developmental biology, free radical and radiation biology, molecular physiology and biophysics, and pharmacology subprograms.

The college also offers a combined M.D./Ph.D. degree through the Medical Scientist Training [p. 1711] Program; see Combined Programs [p. 1694] in the Doctor of Medicine section of the Catalog.

Many of the college's faculty members participate in the Graduate College's interdisciplinary programs in genetics [p. 1576], immunology [p. 1582], molecular medicine [p. 1609], and neuroscience [p. 1611].

Professional Programs of Study

The Carver College of Medicine offers the Doctor of Medicine [p. 1693] degree, the Master of Clinical Nutrition [p. 1689] (M.C.N.), the Master of Physician Assistant Studies [p. 1761] (M.P.A.S.), and the Master of Clinical Anatomy [p. 1671] (M.C.A.).

Undergraduate Rules and Procedures

Undergraduate study in the Carver College of Medicine is guided by the following academic rules and procedures.

Health Insurance, Immunizations

All health professions students are required to provide proof of health insurance coverage annually. Contact the University Benefits Office or visit its website.

All health sciences students must show proof of health examinations and screenings annually. For more information, contact Student Health and see Student Requirements and Forms on its website.

Application for Degree

Students who want to be considered for graduation must submit a Degree Application with the Office of the Registrar through MyUI before the deadline for the session in which the degree is to be conferred. Students who have fulfilled the requirements for a minor must indicate this on the degree application form filed through MyUI so that completion of the requirements for the minor can be verified and noted on their transcript.

Academic Recognition

The University of Iowa and the Carver College of Medicine recognize academic achievement every fall and spring semester.

Graduation with Distinction

Graduating students may be recognized for their scholastic achievement upon recommendation by their academic program and with the dean's approval. Graduation with distinction, high distinction, or highest distinction is determined by both the cumulative and the University of Iowa grade-point average. Highest distinction requires a g.p.a. of 3.85 or higher; high distinction requires a g.p.a. of 3.75 to 3.84; and distinction requires a g.p.a. of 3.65 to 3.74.

To graduate with distinction, students must have completed a minimum of 60 s.h. of graded coursework at the University of Iowa. Both S (satisfactory) and A-F (letter) grades are included in the total semester hour total. However, S grades are not calculated into the grade-point average. Radiologic technology certificate course grades are not included in the grade-point average and are not considered graded coursework.

Students graduating with distinction have a notation added to their transcript and diploma. To be recognized for distinction, students must have completed 45 of their final 60 s.h. and earned the required grade-point average before their final semester of graduation.

Dean's List

Undergraduate students who achieve a g.p.a. of 3.50 or higher on 12 s.h. or more of University of Iowa graded coursework during a given semester or summer session and who have no semester hours of I (incomplete) or O (no grade reported) during the same semester are recognized by inclusion on the Dean's List for that semester. Students may qualify for the Dean's List with fewer than 12 s.h. of graded credit if deemed appropriate by the college.

President's List

University of Iowa undergraduate students who achieve a g.p.a. of 4.00 on 12 s.h. or more of University of Iowa graded coursework and who have no semester hours of I (incomplete) or O (no grade reported) for two consecutive semesters (excluding summer sessions) are recognized by inclusion on the President's List.

Financial Support

Students are eligible to apply for undergraduate financial aid. Scholarships, grants, loans, and part-time job placement are administered by the University's Office of Student Financial Aid. Part-time work in related areas is sometimes available.

Registration, Credit, Grading

Registration

Information about tuition and fees, registration, and deadlines is available from the Office of the Registrar. Students who add or drop a course after registration or who register late are assessed a fee. Each course dropped after the deadline results in a W (withdrawn) on the transcript (see Changes in Registration below). Students are not allowed to register for full-semester courses after the second week of the semester or the first week of the summer session. Students must register for off-cycle courses before the first day of the course.

The maximum permitted registration for fall and spring semesters is 18 s.h. per semester. The maximum registration for summer session varies: 4 s.h. for the four-week session; 9 s.h. for the eight-week session; 9 s.h. for the six- and eight-week sessions combined; 12 s.h. for the four-week session and the eight-week session; and 12 s.h. for the four-, six-, eight-, and twelve-week sessions combined. Students may register for a maximum of 16 s.h. of fall semester or spring semester coursework during early registration. Students must obtain permission from the head of the division to register for more than the maximum semester hours allowed.

Changes in Registration

Students may change their registration on MyUI. After the start of the semester, students must first initiate an add or drop on MyUI and then contact their academic advisor for permission. Additional approvals may be necessary. Changes in registration to off-cycle courses and internships may require a Change of Registration Form.

Courses may be added with the approval of the advisor at any time during the first one-fifth of the course. They may be dropped at any time during the first two-thirds of the course. Approval is required from the dean of the Carver College of Medicine for all other changes in registration and is granted only in extraordinary circumstances. Students are assigned a mark of W (withdrawn) for any course dropped after the first one-fifth of the course. Students whose drop of one or more courses results in a registration of 0 s.h. for the semester must follow the procedure for withdrawal from the University instead of the add/drop procedure.

Students who have registered for courses offered for variable or arranged credit may change the number of semester hours with the signatures of the instructor, the advisor, and the head of the division at any time before the end of the first two-thirds of the course.

Other changes in registration (such as to audit for zero credit) may be made only during the first one-fifth of the course.

It is the student's responsibility to obtain the required permissions and to understand any consequences that may happen by processing the drop. Information regarding permissions and consequences will be posted on MyUI, but the student should contact their advisor with any questions. See Drop or Withdraw Tuition Responsibility on the Office of the Registrar website.

The Course Deadlines look-up provides course specific deadlines. The cut-off time for obtaining any permissions on deadline days is 4:30 p.m. Students have until 11:59 p.m. to process a drop in MyUI if they have obtained all required permissions by 4:30 p.m.

Withdrawal of Registration

Removing all courses from a schedule (even if only registered for one course) is considered a withdrawal of registration. Students may withdraw their registration without academic penalty at any time before the end of the first four-fifths of the course, but no credit is subsequently given. Later withdrawal results in automatic assignment of an F. Students who withdraw are not reinstated after the deadline for that session.

It is the student's responsibility to obtain the required permissions and to understand any consequences that may happen by processing the withdrawal. Information regarding permissions and consequences will be posted on MyUI, but the student should contact their advisor with any questions. See Drop or Withdraw Tuition Responsibility on the Office of the Registrar website.

Auditing Courses

Students may register to audit a course with approval of the appropriate program director and course instructor. In addition to obtaining these signatures, students must register for zero credit in the course to be audited. The mark of AUS (audit successful) is assigned if a student's attendance and performance are satisfactory; if they are unsatisfactory, the mark of AUU (audit unsuccessful) is assigned. Courses completed with a mark of AUS do not meet any college requirement and carry no credit toward graduation. Auditing may not be used as a second-grade-only option.

Courses Offered by Other University of Iowa Colleges

Students who enroll in courses offered by other University of Iowa colleges are governed by those colleges' rules in matters regarding the courses. See Cross-College Enrollment and Records Policy on the College of Liberal Arts and Sciences website.

In-Residence Requirement

The in-residence requirement may be met by earning the final consecutive 30 s.h. in residence at the University of Iowa, or 45 of the last 60 s.h. in residence, or an overall total of 90 s.h. in residence.

Nonresident instruction includes coursework and correspondence study at other colleges, universities, and institutions. Undergraduate coursework in other University of Iowa colleges counts toward in-residence requirements.

Because the Carver College of Medicine partners with Allen College for the medical laboratory science major, students are not held to the University of Iowa in-residence requirement.

Duplication and Regression

Duplication occurs when students take the same course more than once or when they take a course that duplicates the content of a course they already have completed satisfactorily. Regression occurs when students take a course that is less advanced or at a lower level than one in the same subject that they already have completed satisfactorily. Duplication and regression are assessed by the registrar. Semester hours earned by duplication or regression do not count toward graduation.

Minimum Grade Requirement

Students must earn a g.p.a. of at least 2.00 each semester in all college work attempted, all work undertaken at the

University of Iowa, and all graded work attempted after admission to the Carver College of Medicine. Students enrolled in a program that uses the pass/fail/honors grading system must pass all courses required to complete the program.

Students must earn a C or higher in professional specialty (modality) courses.

Grading Procedures

Grading procedures vary from program to program. Students should consult individual program policy statements for information.

Pass/Nonpass

Students have the option of taking elective courses pass/nonpass (P/N) with the permission of the course instructor and/or the department offering the course. Students may register for the P/N grading option from the first day of classes until the last day for undergraduates to add a course; see Academic Calendar on the Office of the Registrar website.

To register for a P/N course, the student must print the Grading Option Change Form, have it signed by the course instructor and the academic advisor, and submit the completed form to the UI Service Center before the published deadline.

Semester hours graded P/N are not used in computing a student's grade-point average. Semester hours graded P count toward graduation; those graded N do not. The college accepts a maximum of 15 s.h. of University of Iowa credit graded P toward the bachelor's degree, and it accepts a maximum of 30 s.h. of credit graded P and/or S from all sources (UI and transfer credit) toward the bachelor's degree. Students must be in good academic standing to be eligible for the pass/nonpass option.

Satisfactory/Fail or Satisfactory/Unsatisfactory

A number of courses only use satisfactory/fail (S/F) or satisfactory/unsatisfactory (S/U) grading. All students registered for these courses receive a grade of S, F, or U. Students do not need special forms or permission in order to register for S/F or S/U courses.

Semester hours graded S or U are not used in computing a student's grade-point average, but semester hours graded F are used in grade-point average computation. Semester hours graded S count toward graduation; semester hours graded F or U do not.

Students may use coursework graded S to fulfill General Education Program requirements and/or the requirements of their major, a minor, or a certificate. The college accepts a maximum of 15 s.h. of University of Iowa credit graded S toward the bachelor's degree, and it accepts a maximum of 30 s.h. of credit graded P and/or S from all sources (UI and transfer credit) toward the bachelor's degree.

Second-Grade-Only Option

Repeating courses for the second-grade-only option is allowed in extraordinary circumstances. To repeat a course for the second-grade-only option, students must obtain the permission of the course instructor, the program director, and the dean before the end of the first one-fifth of the course. Both grades remain on the permanent record, but only the second one is used to calculate grade-point average and credit earned. Students using the second-grade-only option

for courses that are not part of their major must follow the procedure for the college that offers the course.

Since clinical skills development is impacted by course sequence and many courses are prerequisites to others, it may not be possible to repeat a course. If course sequencing will have an impact on program progression, the decision will be made by the program faculty and/or the promotions committee.

On the permanent record, the second-grade-only option appears as a pound symbol (#), showing that the first grade has been replaced by the second grade in grade-point average calculations, and that only the hours from the second registration have been counted as hours earned.

Students must request the second-grade-only option before the last day of class in order for the second grade to appear on the next grade report. The request also may be made after the close of the semester. The second-grade-only option cannot be applied to coursework for which a student has already been awarded a UI degree.

Incomplete

A grade of I (incomplete) may be reported if the reasons for inability to finish the course satisfactorily are acceptable to the program director and the course instructor. There also must be evidence that the coursework will be finished within a reasonable length of time, usually by the end of the next academic session. Incompletes not removed by the deadline for submission of final grades for the next session result in the assignment of a grade of F. A student must work with the instructor so that an incomplete grade may be rectified by official action.

Reports to Students

Instructors notify any student whose work falls below the minimum acceptable level once the problem is recognized. Grades are reported on a student's transcript, following University protocol. No formal midterm reports are given.

Degrees and Minors

Two Bachelor's Degrees

Students who want to earn two bachelor's degrees, each from a different college, must communicate the request to their academic advisor, who will then contact the University's Office of Admissions. Interested students must complete the degree requirements for both majors, including the residency requirements.

Second Bachelor's Degree

Students who already hold a bachelor's degree and wish to earn an additional bachelor's degree must complete at least 30 s.h. consecutively in the Carver College of Medicine and must meet college and program degree requirements. Individuals interested in earning a second bachelor's degree must apply for admission to the degree program at the University's Office of Admissions.

Minors

Students graduating from the Carver College of Medicine may earn a minor or minors in any degree-granting department or program in the college outside of their major department or in another college of the University by meeting that department's requirements for the minor.

Academic Progress, Probation, Dismissal

Students are expected to maintain satisfactory academic and professional standards and to demonstrate reasonable progress toward the Bachelor of Science. Students who fail to maintain satisfactory academic progress or professional standards of behavior as determined by their program may be placed on probation or dismissed from the program. Probation serves as a warning that students will not graduate unless their academic performance and/or professional behavior improves.

Students on probation are restored to good standing by the program director upon evidence that the problem has been corrected. Such action is usually taken at the end of a semester or session. Entering students may be admitted on probation if they fail to meet the minimum stated standards for admission.

Continued unsatisfactory scholarship or unprofessional behavior may result in dismissal from a program. Students dismissed from a program must reapply for admission through the regular, established program admissions process, following review by a faculty committee, at least four months before the requested date of readmission.

Students placed on probation or dismissed from a program are notified by email; copies are placed in their files. An academic probation notation is placed on the transcript.

Students on academic probation are restored to good standing after they successfully complete a total of 9 s.h. either in one semester or cumulatively. Their University of Iowa cumulative and semester grade-point averages must be equal to or exceed 2.00. Students on academic probation who fail to meet the grade-point average requirement in the designated time frame for restoration to good standing are subject to dismissal.

Students are expected to attend classes regularly. Students who miss classes or examinations because of illness are expected to present evidence that they have been ill. Any other absences must be approved in advance by the course instructor.

Any offense against good order committed by a student in a classroom, clinical setting, or laboratory may be dealt with by the instructor or referred to the program director. The instructor reports in writing any disciplinary action taken against a student to the program director. Repeated or exceptional instances are reported to the dean.

Academic Misconduct

Plagiarism and Cheating

All cases of plagiarism and cheating in the Carver College of Medicine are reported to the dean with a statement of relevant facts. The program director and the instructor may submit recommendations for appropriate disciplinary action.

The individual instructor may reduce the student's grade, including assignment of the grade of F in the course. A report of this action is sent to the student, the program director, and the dean.

The dean, or a faculty committee appointed by the dean, may impose the following or other penalties, as the offense warrants: disciplinary probation, requirement of additional hours for the degree, suspension from the program for a

period of time, or recommendation of expulsion from the program.

Appeals Procedure

Students who want to appeal a decision should appeal in writing to the dean within two weeks after the date of receipt of the decision in writing.

EMT Paramedic Program

Emergency Medical Technology (EMT) Paramedic Program

Website: <https://uihc.org/paramedic-education-program>

This nationally accredited 1,160-hour full-time program leads to national and Iowa certification as a paramedic. The full-time program consists of 16 weeks of intensive classroom training at University of Iowa Hospitals & Clinics, four to five days a week. A second segment consists of 280 hours of supervised clinical experience in a hospital setting. The third segment is a minimum of 360 hours of a supervised paramedic field internship with a paramedic-level ambulance service. Field internships are available at a number of approved sites in Iowa.

Students obtain credentials in advanced cardiac life support, advanced medical life support, geriatric education for EMS, neonatal resuscitation program (NRP), pediatric advanced life support, pediatric education for pre-hospital professionals, and pre-hospital trauma life support.

The program is conducted twice each year, beginning in January and August.

Goals

The goal of the Emergency Medical Services Learning Resources Center's (EMSLRC) paramedic education program is to facilitate the student's development of cognitive and technical competencies to assume the role of an entry-level paramedic.

Upon completion of the program, students demonstrate:

- the ability to comprehend, apply, and evaluate the clinical information relative to their role as an entry-level paramedic;
- the technical proficiency in all skills necessary to fulfill the role of an entry-level paramedic; and
- personal behaviors consistent with professional and employer expectations for an entry-level paramedic.

Curriculum

The program adheres to the National Emergency Medical Services Education Standards as defined by the National Highway Traffic Safety Administration (NHTSA). Students who successfully complete the program are eligible for the National Registry paramedic examination.

All students enroll in the courses EMTP:3101 Emergency Medical Technician - Paramedic I and EMTP:3102 Emergency Medical Technician - Paramedic II.

Accreditation

The Emergency Medical Services Learning Resources Center at University of Iowa Hospitals & Clinics is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) upon the recommendation of the

Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions (CoAEMSP).

Facilities

The Carver College of Medicine consists of twelve buildings containing 1.6 million square feet of space with one building (College of Medicine Administration Building) dedicated to administrative departments only. The other eleven buildings house research activities which include research centers, programs and institutes, as well as the Core Research Facilities which are a collection of centralized laboratories dedicated to developing and providing state-of-the-art research resources to facilitate biomedical research. They are available on a fee-for-service basis to the entire health sciences community along with outside entities.

The Medical Education Research Facility houses medical education space and research laboratories, including the Holden Comprehensive Cancer Center and the Institute for Vision Research. It also contains the college's four learning communities. The communities group students who are at different stages in their medical education, encouraging peer-to-peer learning and emphasizing leadership and community service. Each learning community features small-group rooms, study and social spaces, computer workstations, a kitchen area, and staff offices. The Medical Education Research Facility also houses the Performance-Based Assessment Program, which evaluates students' clinical and communication skills by reviewing simulated physician-patient encounters recorded in mock patient examination suites.

Students acquire clinical skills experience at the 761-bed, University of Iowa Hospitals & Clinics, the Iowa City VA Health Care System, and in affiliated hospitals and ambulatory care centers throughout Iowa. University of Iowa Hospitals & Clinics serves as a tertiary care center for Iowa and portions of adjoining states. Many patients are referred to University of Iowa Hospitals & Clinics for care and treatment not available in their home communities.

Eckstein Medical Research Building is the home of the Iowa Institute of Human Genetics Genomics Division, Viral Vector Core Facility, Flow Cytometry Facility, and the Biomedical Research Store.

The five basic science departments are housed in the Bowen Science Building and include the Departments of Anatomy and Cell Biology, Biochemistry, Microbiology and Immunology, Molecular Physiology and Biophysics, and Pharmacology.

The Medical Education Building houses research and educational space for the Department of Physical Therapy and Rehabilitation Science. It also houses research space for the Department of Psychiatry and is the home of the Office of Consultation and Research in Medical Education (OCRME). OCRME is staffed by education specialists from a range of disciplines who serve the faculty, staff, and administrators in all Carver College of Medicine programs. The office provides educational consultation, initiates and cooperates in educational research endeavors, and conducts faculty development activities.

There are teaching laboratories located in the Medical Education Building, the Bowen Science Building, and the Medical Research Facility.

Other buildings that house a wide range of College of Medicine departments, administration, and research activities are the Carver Biomedical Research Building, Westlawn,

Medical Laboratories, the Medical Research Facility, the Medical Research Center, and the Multi-Tenant Facility.

The newest building, completed in 2014, is the Pappajohn Biomedical Discovery Building. The Iowa Neuroscience Institute is located on the first and second floors of the building. Third and fourth floors house the Fraternal Order of Eagles Diabetes Research Center and the Abboud Cardiovascular Research Center, on the fifth floor is the Auditory Research Group, and on the sixth floor is the Lung Biology and Cystic Fibrosis Research Center. The Iowa Institute for Biomedical Imaging is on the lower basement levels housing the 7 Tesla MRI scanner (one of few such devices in the U.S.), 3T along with several smaller devices, and a 3-D visualization lab. All researchers in this building are chosen by the Pappajohn Biomedical Institute in which scientists from across the University collaborate to explore high-risk/high-yield scientific questions in the life sciences with the goal of advancing treatments for a wide array of human diseases.

Interdisciplinary Programs and Centers

The college's interdisciplinary programs and centers draw strength from college faculty members and the facilities available to them, without regard to departmental units or to the distinction between graduate and postgraduate training. For more information, contact the vice dean for research.

The following centers are subdivisions of the Carver College of Medicine.

Alzheimer's Disease Research Center

The Alzheimer's Disease Research Center studies Alzheimer's disease and related neurological conditions from the viewpoint of neuroanatomy, neuroimaging, neuropsychology, and neurochemistry. The center's purposes are to improve the diagnosis and treatment of these conditions, to disseminate information on new research to the public, and to contribute to a better understanding of the neural basis of cognition.

Carver Genetic Testing Laboratory

The John and Marcia Carver Nonprofit Genetic Testing Laboratory provides genetic testing for rare eye diseases, especially diseases so rare that commercial tests are unavailable for them. The laboratory's test results provide information to patients and their families while keeping the tests affordable.

Holden Comprehensive Cancer Center

The Holden Comprehensive Cancer Center (HCCC) coordinates the efforts of University of Iowa faculty and staff in research, education, and clinical programs related to all aspects of cancer. The HCCC is recognized by the National Cancer Institute as an NCI-designated cancer center and has "comprehensive" status, a designation that recognizes the depth and breadth of interdisciplinary cancer research activity taking place at the University of Iowa.

Iowa Mental Health Clinical Research Center

The major emphasis of the Iowa Mental Health Clinical Research Center is the study of schizophrenia. The center provides the facilities for research linking the clinical picture of the illness with its underlying neurobiology. The center's seven research units conduct the necessary integrative and

interdisciplinary research to advance knowledge about the disease.

UI Heart and Vascular Center

The UI Heart and Vascular Center coordinates research and training programs related to cardiovascular diseases. It encompasses several programs: Program Project Grant on Integrative Neurobiology of Cardiovascular Function, Program Project Grant on Cerebral Blood Vessels, Program Project Grant on Oxidative Mechanisms in Vascular Disease, Program Project Grant on Genetic and Signaling Mechanisms in the Central Regulation of Blood Pressure, Program Project Grant on Airway Physiology and Pathophysiology in a Porcine CF Model, Program Project Grant on Gene Therapy for Cystic Fibrosis Lung Disease, a Leducq Foundation Consortium grant, and a Cystic Fibrosis Foundation research and development program. It also coordinates several training programs and a program of other interdisciplinary research supported by a number of individual project grants. The center occupies two floors of cardiovascular research laboratories and administrative offices in the Medical Research Center.

Courses

- Carver College of Medicine Courses [p. 1664]
- EMT-Paramedic Program Courses [p. 1667]
- Orthoptics Teaching Program Course [p. 1667]

Most Carver College of Medicine courses are offered by the college's departments and programs. They are listed and described in the corresponding General Catalog sections. The college also offers the following nondepartmental courses.

Carver College of Medicine Courses

MED:1100 Introduction to Health Care Professions 3 s.h.
Introduction to current U.S. health care system and changes that are likely in the near future; information about distinct health care professions grouped by discipline (e.g., nursing, pharmacy, public health), and less traditional career pathways in health care fields; how health care professionals across disciplines coordinate to deliver better health care; instruction by prominent health care faculty at the University of Iowa; for students considering a career in the health care field.

MED:3740 End-of-Life Care for Adults and Families 3 s.h.
End-of-life issues in care of adults, older adults, and their families. Same as ASP:3740, NURS:3740, PHAR:3740.

MED:5300 Health Informatics 3 s.h.
Technological tools that support health care administration, management, and decision making. Same as HMP:5370, IGPI:5200, ISE:5860, SLIS:5900.

MED:5416 Foundations in Healthcare Ethics 3 s.h.
Major ethical traditions, ideas, and frameworks that have shaped contemporary approaches to healthcare ethics in morally pluralistic Western cultures; topics include four prominent frameworks in healthcare ethics—virtue based, principle based, circumstance based, and consequence based—that emphasize four aspects of ethical decision making—agent, action, context, and outcome.

MED:8001 Medical Elective arr.

MED:8003 Clinical Clerkships arr.

MED:8005 Medical Student Research Fellowships 0 s.h.

MED:8010 Introduction to Medical Education at Iowa 0 s.h.
Introduction to first-year fall courses; advanced concepts in anatomy, biochemistry, cell biology, and clinical reasoning skills; for M.D. students.

MED:8021 Community Health Outreach I 0-1 s.h.
Presentations and practical experience working with agencies that provide health care and wellness promotion to communities; substance abuse; child, adolescent, and adult health; aging; interpersonal violence; homelessness.

MED:8022 Community Health Outreach II 1-2 s.h.
Presentations, patient-based learning groups, readings, and practical experience working with agencies that provide health care and wellness promotion to communities; substance abuse; child, adolescent, and adult health; aging; interpersonal violence; homelessness.

MED:8023 Community Health Outreach III 1-2 s.h.
Presentations, patient-based learning groups, readings, and practical experience working with agencies that provide health care and wellness promotion to communities; substance abuse; child, adolescent, and adult health; aging; interpersonal violence; homelessness.

MED:8028 Introduction to U.S. Health Care System 1 s.h.
Structure, function, and finance of U.S. health care system; access, cost, quality, finance mechanisms, reform process.

MED:8031 Women's Health Seminar 1 s.h.
Education on women's health topics, service opportunities, and mentorship. Requirements: M.D. standing.

MED:8033 Clinical Skills for Responding to Sexual Violence 1 s.h.
Training that focuses specifically on epidemiology, screening, clinical presentation, initial evaluation, and medical management of sexual violence and interpersonal violence victimization; opportunity to apply preclinical and/or concurrent coursework to true-to-reality, clinically relevant, and medically complex health problems with sexual violence as the underlying cause; development of communication and clinical skills necessary to address sexual and interpersonal violence in a clinical setting. Requirements: M.D. standing or physician assistant standing or enrollment in degree-seeking graduate or health professional program.

MED:8070 The Examined Life: Writing and Medicine 1 s.h.
Literature, essays, poetry; discussion of participants' writing; students prepare portfolios of their own writing.

MED:8071 Career Life Planning 1 s.h.
Students' individual interests, values, and decision-making processes important in selecting a specialty, engaging in the match process, and integrating oneself into the medical profession; personal career development, culture and climate in which physicians work and learn.

MED:8073 Biomedical Innovation 1 s.h.
Introduction to all phases of medical device/technology development; development of knowledge of entire medical innovation process through didactic sessions, faculty, interactions, and interdisciplinary collaboration; interdisciplinary approach; research and development of a novel medical device, therapy, or model of care. Requirements: M.D. enrollment.

- MED:8074 Research Skills Seminar** 1 s.h.
Seminar series designed to bridge gap from undergraduate and medical student experiences to research during residency and beyond; topics include identification of projects and mentors, leadership, collaboration, translation, evidence-based medicine, project development, statistical analysis, presentation, publication, and career progression.
- MED:8076 Bioethics and Humanities Seminar** 1 s.h.
Broad range of topics in bioethics and medical humanities, including philosophical principles, clinical ethics, research ethics, medical professionalism, narrative ethics, and historical and cultural aspects of medicine. Requirements: enrollment in Carver College of Medicine humanities distinction track.
- MED:8077 Personal-Professional Compass** 1 s.h.
Provides help for medical students to understand, articulate, and integrate personal and professional values and goals while making their way through medical school; promote student growth as humanistic professionals through written reflections on personal experience, readings from medicine and the humanities, and discussions with peers and mentors; preparation to write an authentic and compelling personal statement for residency applications. Requirements: M.D. enrollment.
- MED:8081 Global Health Issues I** 1 s.h.
Core issues in the current field of global health, including history of global health, health and development, social determinants of health, measuring health and disease, disparities in the American health care system, poverty and health, gender issues and reproductive health, child health, immigrant and migrant health issues, and introduction of major players in global health. Requirements: M.D. enrollment.
- MED:8082 Global Health Issues II** 1 s.h.
Core issues in the current field of global health, including health care as a human right, why the Third World is the Third World, communicable disease issues, outbreaks and pandemics, noncommunicable issues, malnutrition and obesity, cultural context of health care, violence as a health issue, and emergency response and transition to development. Prerequisites: MED:8081. Requirements: M.D. enrollment.
- MED:8083 Global Cross-Cultural Elective** arr.
Cross-cultural medical program with focus on health care problems of a domestic or international community; individually arranged.
- MED:8084 Global Health Seminar** 1 s.h.
Presentations by faculty members, University special guests, and alumni on their current work in global medicine/global health; implementation of global health concepts. Requirements: M.D. enrollment.
- MED:8121 Clinical and Professional Skills I** 3 s.h.
Introduction to concepts of clinical reasoning, communication, physical examination, and evidence-based clinical practice; principles of biomedical ethics; early clinical interactions and placement of classroom experiences into context of patient care through the Early Clinical Experiences (ECE) program; interaction with students from other health sciences colleges to explore the interprofessional approach to caring for patients. Requirements: M.D. enrollment.
- MED:8122 Medicine and Society I** 3 s.h.
Delivery of individual disease prevention/health promotion services; introduction to social determinants of health; influence and impact of culture and community on health care; community resources; application of health and risk assessment to individual patients and self. Requirements: M.D. enrollment.
- MED:8123 Foundations of Cellular Life** 5 s.h.
Genetics, embryology, molecular biology, biochemistry, cell biology and histology; molecular events required for cellular life; how cells grow and interact to form basic tissues of human body; necessary framework to explore six mechanisms of health and disease. Requirements: M.D. enrollment.
- MED:8124 Mechanisms of Health and Disease I** 8 s.h.
Normal and healthy processes within and among mechanisms of oxygenation, metabolism, and genetics/development; first in a series on multisystem mechanisms of health and disease. Requirements: M.D. enrollment.
- MED:8131 Clinical and Professional Skills II** 4 s.h.
Interpersonal skills, lifelong learning, interviewing skills, physical examination skills, ethical issues in patient care, and basic approach to patients in terms of prevention, treatment, and follow-up care. Second in a sequence during preclinical semesters of medical school and continuing as an integrated strand throughout curriculum. Requirements: M.D. enrollment.
- MED:8132 Medicine and Society II** 4 s.h.
Knowledge and skills related to health promotion and disease prevention from a medicine and society perspective, including impact of behavior, environment, culture, and socioeconomics; identification of major public health problems associated with mechanisms of health and disease. Second in a sequence during preclinical semesters of medical school and continuing as an integrated strand throughout curriculum. Requirements: M.D. enrollment.
- MED:8133 Mechanisms of Health and Disease II** 7 s.h.
Normal and healthy processes within and among mechanisms of Immunology/Inflammation, locomotion/integument, and neuropsychiatry; second in a series on mechanisms of health and disease. Requirements: M.D. enrollment.
- MED:8134 Mechanisms of Health and Disease III** 11 s.h.
Abnormalities or disruptions leading to disease within and among mechanisms of oxygenation, metabolism, and genetics/development; third in a series on multisystem mechanisms of health and disease. Requirements: M.D. enrollment.
- MED:8199 First-Year Special Study** arr.
First-year special study. Requirements: M.D. enrollment.
- MED:8221 Clinical and Professional Skills III** 4 s.h.
Advanced clinical reasoning skills through focused patient encounters and interactions with special patient populations; emphasis on integration and use of concepts for cost conscious, patient-centered, interdisciplinary care. Requirements: M.D. enrollment.
- MED:8222 Medicine and Society III** 4 s.h.
Health services organization and delivery; emphasis on community dimensions of medical practice and patient safety. Requirements: M.D. enrollment.
- MED:8223 Mechanisms of Health and Disease IV** 10 s.h.
Abnormalities or disruptions leading to disease within and among mechanisms of immunology/inflammation, locomotion/integument, and neuropsychiatry; fourth in a series on multisystem mechanisms of health and disease. Requirements: M.D. enrollment.

- MED:8224 Mechanisms of Health and Disease Keystone** 7 s.h.
Transition between classroom instruction in mechanisms of health and disease and clinical practice; foundational information from mechanisms of health and disease sequence approached from perspective of what is commonly encountered in clinics; application of information to making diagnostic and management decisions of common important clinical problems. Requirements: M.D. enrollment.
- MED:8299 Second-Year Special Study** arr.
Second-year special study. Requirements: M.D. enrollment.
- MED:8301 Community-Based Primary Care** arr.
Introduction; clinical activities, work with community agencies and resources; didactic and conferences. Requirements: M.D. enrollment.
- MED:8320 Transition to Clerkships** 1-2 s.h.
Two weeks of skills training prior to start of core clinical clerkships. Requirements: M.D. or M.P.A.S. enrollment.
- MED:8401 Medicine, Literature, and Writing** arr.
Insights, freedom, joy, responsibilities, and challenges of a life in medicine; reading, discussion, individual creative writing.
- MED:8403 Teaching Skills for Medical Students** 4 s.h.
Practical teaching techniques; opportunity for students to develop teaching skills before they become medical residents.
- MED:8404 Advanced Teaching Skills for Medical Students** 2 s.h.
Opportunity to expand knowledge and experience in medical education; investigation of medical education in students' specialty of interest through literature research and interaction with faculty; primary focus is to design and successfully complete a faculty approved project. Prerequisites: MED:8403. Requirements: fourth-year M.D. enrollment.
- MED:8405 Leadership for Future Physicians** 2 s.h.
Formal training in multiple aspects of leadership; offers future leaders in health science specialties an earlier opportunity to consider leadership abilities and perspectives; for fourth-year medical, physician assistant, nursing, pharmacy, public health, and dental students. Requirements: health science enrollment.
- MED:8410 Quality Improvement and Patient Safety** 2 s.h.
Students work with faculty and staff involved in quality improvement and patient safety (QI/PS) at University of Iowa Hospitals & Clinics (UIHC); readings, didactic sessions, and hands-on activities to advance knowledge and practice of QI/PS in health care; activities include review of ongoing QI/PS projects at UIHC, application of QI/PS methodologies to project development and analysis, individual and team-based simulations, interdisciplinary collaboration and communication, participating in conferences related to QI/PS, and reflecting on these experiences with peers. Same as NURS:3728.
- MED:8411 Foundational Science and Drug Therapy** 2 s.h.
Advanced medical students partner with advanced pharmacy students and work together to devise evidence-based treatments for patients suffering from common illnesses; foundational science concepts from each student's respective discipline—including mechanisms of health and disease and principles of pharmacokinetics and pharmacodynamics—are used to design and explain proposed treatments; two weeks, case-based.
- MED:8412 Improvisation: A Life Skill** 4 s.h.
Drawing from interpersonal communication techniques, experiences that help students communicate more empathically with their patients, patients' families, and other health care team members in order to create a safe and trusting exchange.
- MED:8413 Oaths and Ethics** 4 s.h.
History and purpose of medical oaths; medical oaths compared with professional codes; content of medical oaths in terms of ethical principles and virtues; review of ethical values communicated in ethics-related seminars at University of Iowa Hospitals & Clinics; students write a medical oath that crystallizes their own most important professional commitments.
- MED:8414 Health Policy Advocacy Des Moines** 4 s.h.
Health policy advocacy experience in Des Moines while Iowa Legislature is in session; students choose an area of interest in health policy advocacy and work with senior legislators, policy advisors, state health department representatives, or advocates of various professional organizations involved in advocacy efforts for health policy; students receive prior approval regarding which health policy issue they want to work on and which individual or professional organization they plan to work with during their onsite experience. Requirements: M.D. enrollment.
- MED:8415 Financial Management for Rising Interns** 2 s.h.
Foundational concepts of personal financial management; topics include personal budgeting, educational loan management, investing, risk management and mitigation, medical practice investment, taxation, and additional relevant areas of interest for rising resident physicians. Requirements: M.D. enrollment.
- MED:8416 Foundations in Healthcare Ethics** 3 s.h.
Major ethical traditions, ideas, and frameworks that have shaped contemporary approaches to healthcare ethics in morally pluralistic Western cultures; topics include four prominent frameworks in healthcare ethics—virtue based, principle based, circumstance based, and consequence based—that emphasize four aspects of ethical decision making—agent, action, context, and outcome.
- MED:8470 Self-Directed Learning in Advanced Clinical Topics** 0 s.h.
Online learning modules on advanced clinical topics; for students in M.D. program.
- MED:8480 Global Health Clerkship** arr.
Cross-cultural medical program at an international site; focus on health care problems of a specific community; individual educational objectives set in advance.
- MED:8499 Individually Arranged Medicine Elective** arr.
Individually arranged elective through the Office of Student Affairs and Curriculum.
- MED:9701 Instructional Design and Technology** 3 s.h.
Skills and techniques necessary for analysis, design, development, implementation, and evaluation of effective instruction.
- MED:9702 Clinical Teaching in Medical Education** 3 s.h.
Principles and methods for teaching individuals and small groups in outpatient and inpatient settings. Prerequisites: MED:9701 or PSQF:6205. Recommendations: educational psychology course.
- MED:9703 Educational Research and Evaluation** 3 s.h.
Research design and program evaluation; approaches relevant to medical education.

MED:9711 Teaching Methods in Medical Education 3 s.h.

Principles and methods for teaching in large and small classrooms. Recommendations: educational psychology course.

MED:9712 Introduction to Educational Measurement in Medical Education 3 s.h.

Classical test theory; overview of medical education assessment methods; practical information for designing and critiquing assessments.

MED:9713 Assessment in Medical Education 3 s.h.

Medical education assessment methods; research methods and literature that support current practices; research project. Prerequisites: MED:9712.

MED:9714 Current Issues in Medical Education 3 s.h.

Selected issues, policies, and research.

MED:9720 Portfolio Project 3 s.h.

Production of individual student portfolios used to integrate knowledge across courses; capstone activity.

MED:9721 Study in Faculty Development 3 s.h.

Academic credit for approved project or other assigned activities for students in the Teaching Scholars program.

MED:9722 Independent Study arr.**MED:9724 Leadership in Medicine** 3 s.h.

Introduction to basic leadership and management theories pertaining to a health care setting; focus on the history of leadership development, various components of leadership, and how these components can be used to be a successful leader/administrator. Requirements: Master in Medical Education degree program enrollment.

MED:9725 Simulation in Medical Education 3 s.h.

Appropriate use of various types of simulation in medical education; how to design, deliver, and debrief a simulation activity; literature supporting use of simulation in medical education. Requirements: Master in Medical Education degree program enrollment.

MED:9726 Curriculum Development in Medical Education 3 s.h.

Curriculum development using knowledge and experience gained from MED:9701, MED:9702, and MED:9711; identification of an area/topic for creation of curriculum; conduction of a needs assessment to identify topics and/or components of curriculum; creation of plan with curriculum goals, learning objectives, methods for evaluation; development of preliminary planning and aspects of implementation and evaluation phases of the model.

MED:9727 Teaching and Assessing Communication Skills in Medical Education 3 s.h.

Explores broad issues related to both teaching and assessing clinician-patient communication skills in medical education; review literature on best practices in clinician-patient communication and on teaching and/or assessing skills among medical learners; explore observation and feedback as key technique in addressing communication skills through observation of peers and learners; video recording of interactions with patients.

Hospital Certificate Programs of Study

The following courses are conducted by University of Iowa Hospitals & Clinics staff.

EMT-Paramedic Program Courses

EMTP:3101 Emergency Medical Technician - Paramedic I 0 s.h.

Preparation for role of entry-level paramedic: comprehension, application, and evaluation of the clinical role; demonstration of technical proficiency in all required skills; demonstration of personal behaviors consistent with professional and employer expectations. Requirements: certification as an emergency medical technician-basic.

EMTP:3102 Emergency Medical Technician - Paramedic II 0 s.h.

Preparation for role of entry-level paramedic: comprehension, application, and evaluation of the clinical role; demonstration of technical proficiency in all required skills; demonstration of personal behaviors consistent with professional and employer expectations. Prerequisites: EMTP:3101.

EMTP:3103 Emergency Medical Technician - Paramedic III 0 s.h.

Preparation for role of entry-level paramedic: comprehension, application, and evaluation of the clinical role; demonstration of technical proficiency in all required skills; demonstration of personal behaviors consistent with professional and employer expectations. Prerequisites: EMTP:3101.

Orthoptics Teaching Program Course

OTP:4902 Orthoptics Program 0 s.h.

Clinical science of binocular vision, ocular motility, and related eye disorders; practical, theoretical training in the Department of Ophthalmology and Visual Sciences two-year program; written, oral and practical national board examinations required at completion. Requirements: bachelor's degree with specific class recommendations.

Anatomy and Cell Biology

Chair

- John F. Engelhardt

Professional degree: M.C.A.

Faculty: <https://medicine.uiowa.edu/acb/people/primary-appointments>

Website: <https://medicine.uiowa.edu/acb/>

The Department of Anatomy and Cell Biology performs three major functions. It teaches human anatomy to students preparing for careers in the health care professions; provides advanced courses, teaching experience, and research training to graduate students preparing for careers in academic research and related scientific fields; and conducts original research on the biological basis of cellular functions and human disease processes.

Preclinical Study

The department contributes to the preclinical education of health care professionals by providing major courses in gross anatomy, cell biology, histology, and neuroscience.

Graduate Study

The department offers the cell and developmental biology subprogram for the Ph.D. in biomedical science. It also participates in the Carver College of Medicine's Medical Scientist Training [p. 1711] Program and the Graduate College's Molecular Medicine [p. 1609], Immunology [p. 1582], Genetics [p. 1576], and Neuroscience [p. 1611] Programs. On occasion, students are directly admitted to a Department of Anatomy and Cell Biology laboratory by arrangement with the laboratory director.

Professional Study

The Department of Anatomy and Cell Biology offers a professional degree, the Master of Clinical Anatomy (M.C.A.).

Programs

Graduate Programs of Study

Majors

- Master of Science in Anatomy and Cell Biology
- Doctor of Philosophy in Anatomy and Cell Biology

Students interested in doctoral studies in cell and developmental biology should apply under the umbrella program in Biomedical Science [p. 1549] (select cell and developmental biology subprogram). Direct applications to the M.S. and Ph.D. in anatomy and cell biology are not currently being considered.

Professional Program of Study

Major

- Master of Clinical Anatomy [p. 1671]

Facilities

The department occupies more than 35,000 square feet in the Bowen Science Building on the University of Iowa health sciences campus. The building houses modern

teaching facilities and well-equipped research laboratories. The most modern instrumentation is available, including facilities and equipment for digital microscopic imaging, confocal microscopy, molecular biological techniques, tissue culture, and protein chemistry. Other specialized equipment (e.g., electron microscopes, mass spectrophotometers) is available in other facilities. Through collaborative programs with the Holden Comprehensive Cancer Center and the Abboud Cardiovascular Research Center, faculty and students also have access to outstanding research facilities throughout the University's health sciences campus.

Courses

Anatomy and Cell Biology Courses

ACB:3110 Principles of Human Anatomy 3 s.h.

Gross and microscopic human anatomy; systemic approach to regional anatomy with emphasis on clinical relevance; optional tutorial sessions. Offered fall semesters. Requirements: pharmacy, pre-nursing, or associated medical sciences major.

ACB:3122 Independent Study in Anatomy and Cell Biology arr.

Projects arranged with department faculty members.

ACB:4156 Scanning Electron Microscopy and X-Ray Microanalysis arr.

Microscopy methods for research; all aspects of research, from sample preparation to imaging to data analysis; when to use a particular microscopy procedure; theory, operation, and application of scanning electron microscopy, scanning probe microscopy, laser scanning microscopy, X-ray microanalysis. Requirements: a physical science course. Same as CBE:4156, EES:4156.

ACB:5108 Human Anatomy 5 s.h.

Regional dissection, lectures, demonstrations; areas important to physical therapists, particularly the upper and lower extremities. Offered fall semesters. Requirements: physical therapy and rehabilitation science enrollment.

ACB:5203 Gross Human Anatomy for Graduate Students 5 s.h.

Regional dissection, lectures, demonstrations, tutorials, discussions, seminars; clinically relevant areas of anatomical radiology, surface anatomy with clinical correlations. Requirements: enrollment in master of clinical anatomy program.

ACB:5206 Graduate Research in Cell and Developmental Biology arr.

Individual laboratory research training in anatomical sciences.

ACB:5210 General Histology Online 3 s.h.

Histology of all tissues of human body starting with basic tissues and working through systems of the body; linked in sequence to the human gross anatomy for graduate students course so students will be learning about related content at the same time in anatomy and histology; online course consisting of recorded lectures, online modules, and extensive use of Virtual Microscope. Requirements: enrollment in master of clinical anatomy program.

- ACB:5218 Microscopy for Biomedical Research** arr. **1 s.h.**
Basic microscopy methods for research including optics, preparation, and analysis of biomedical specimens; light, fluorescence, confocal, transmitting electron, scanning electron, atomic force microscopes, elemental analysis; immunochemistry and stereology techniques; individualized laboratory instruction. Prerequisites: BIOL:2723. Same as BIOL:5218, MICR:5218.
- ACB:5224 Graduate Seminar in Cell and Developmental Biology** **0-1 s.h.**
Current research, literature. Requirements: cell and developmental biology graduate standing.
- ACB:6000 Human Anatomy for Advanced Practice** **3 s.h.**
Integrated study of interrelationships between anatomic structure and physiological function in health and disease at various points in the lifespan; mechanisms governing and supporting cellular, organ, and system function; internal milieu; relationship of study to clinical assessment of functional integrity of individual organ systems utilizing pertinent objective and subjective data; implications of pathophysiology for anesthesia and implications of anesthesia for pathophysiology; foundation for clinical practicums and courses in nurse anesthesia. Requirements: completion of an undergraduate human anatomy and physiology course and admission to anesthesia nursing program. Same as NURS:6000.
- ACB:6200 Special Topics in Genetics** **1 s.h.**
Current research in a selected field of genetics; different topic each year. Companion to a genetics seminar series. Same as GENE:6200.
- ACB:6220 Mechanisms of Cellular Organization** **3 s.h.**
Current understanding of basic cell biological processes; key experiments that led to guiding insights; mechanisms that cells use for compartmentalization and how those mechanisms are regulated; biogenesis of major organelles (e.g., mitochondria, peroxisomes, nucleus, secretory/endocytic membrane system); functions of cytoskeleton in cell motility, organelle motility, and cell division. Prerequisites: BIOC:3130. Same as MMED:6220, MPB:6220.
- ACB:6225 Growth Factor Receptor Signaling** **1 s.h.**
Mechanisms of signaling by growth factors; cytokines and related molecules that regulate cell proliferation, development, differentiation, and survival; emphasis on molecular mechanisms of signaling, relevance of these signaling processes to various human diseases. Same as MMED:6225, MPB:6225.
- ACB:6226 Cell Cycle Control** **1 s.h.**
Cell cycle regulation, DNA damage-dependent cell cycle regulation, redox-dependent cell cycle regulation, cellular senescence. Same as MMED:6226, MPB:6226.
- ACB:6227 Cell Fate Decisions** **1 s.h.**
Cellular fate decisions including signal integration, terminal differentiation in development, mechanisms of embryonic stem cell gene regulation/cellular reprogramming, cell death paradigms, and cell death in development and cancer. Same as MMED:6227, MPB:6227.
- ACB:6237 Critical Thinking in Biochemistry and Molecular Biology** **1 s.h.**
How nucleic acids, proteins, lipids, and carbohydrates interact to influence the function of cells and tissues; how molecules drive signaling pathways and cellular processes essential for biological functions; based on research publications.
- ACB:6238 Critical Thinking in Genetics** **1 s.h.**
Current topics in molecular and classical genetics; emphasis on genetic underpinnings of disease; based on primary research publications.
- ACB:6239 Critical Thinking in Cell Biology** **1 s.h.**
Understanding subcellular organization and intercellular communication; emphasis on critical thinking and primary research publications.
- ACB:6248 Critical Thinking in Development** **1 s.h.**
Current topics in molecular basis of vertebrate development; based on primary research publications.
- ACB:6249 Critical Thinking in Cellular Physiology** **1 s.h.**
Control of physiological systems at the cellular level; emphasis on regulation by molecular signaling pathways; literature-based.
- ACB:6250 Critical Thinking in Scientific Writing and Presentations** **1 s.h.**
Scientific grant writing, particularly specific aims development, and oral presentations. Requirements: second-year standing in cell and developmental biology graduate program.
- ACB:6252 Functional Neuroanatomy** arr. **1 s.h.**
Basic principles of neuroanatomy and neurophysiology; emphasis on human central nervous system; laboratory emphasis on anatomical study of spinal cord and brain. Offered spring semesters. Requirements: physical therapy and rehabilitation science enrollment or graduate standing. Same as PTRS:6253.
- ACB:6265 Neuroscience Seminar** **0-1 s.h.**
Research presentations. Same as BIOL:6265, MPB:6265, NSCI:6265, PSY:6265.
- ACB:7001 Teaching and Learning in the Anatomical Sciences** **2 s.h.**
Strategies involved in anatomical sciences education; these include interactive lecturing, dissection, peer teaching/learning, plastination, virtual microscopy, simulation, and case presentation, as well as assessment techniques; online course delivered through recorded lectures and online modules. Requirements: enrollment in master of clinical anatomy program.
- ACB:7002 Seminar in Anatomical Sciences** **1 s.h.**
Opportunity to discuss peer-reviewed anatomical, clinical, and education research articles as they relate to issues of teaching in the anatomical sciences; student- and/or faculty-led presentations prompt further discussion of various in-depth studies that focus on bringing current information into the classroom. Requirements: enrollment in master of clinical anatomy program.
- ACB:7010 Anatomy Through Imaging** **2 s.h.**
Exploration of anatomy through basic imaging techniques; online modules and in-class activities; focus on identification of normal structures through application of anatomical concepts. Requirements: enrollment in master of clinical anatomy program.
- ACB:7020 Human Embryology Online** **2 s.h.**
Major events of embryologic development in humans; more of a morphologic focus than a molecular focus, but includes important molecular concepts of development; students come to understand the backstory of adult human anatomy and how various birth defects occur. Offered spring semesters. Prerequisites: ACB:5203 or ACB:8101 or ACB:5108. Requirements: enrollment in master of clinical anatomy program.

ACB:7227 Anatomic Study for Teaching 2-3 s.h.

Experience completing a detailed dissection of a region of the human body; opportunity to create models depicting anatomical concepts. Requirements: enrollment in master of clinical anatomy program.

ACB:7400 Practicum in College Teaching for Master of Clinical Anatomy 1-4 s.h.

Supervised college teaching experience; teaching in collaboration with faculty, observation and critiques of teaching, participation in course planning and evaluation procedures; ethical and multicultural considerations. Recommendations: enrollment in master of clinical anatomy program.

ACB:8101 Medical Gross Human Anatomy 5 s.h.

Complete dissection of the body with regional emphasis stressing relationships to the living system; clinically relevant areas of radiologic imaging, surface anatomy, embryology, and clinical correlations; anatomical knowledge through lectures, small group work, independent activities. Offered fall semesters. Requirements: M.D. or M.P.A.S. enrollment.

ACB:8120 Human Gross Anatomy for Dental Students 6 s.h.

Exploration of gross anatomy of human body including thorax, abdomen, upper limb; extensive focus on head, neck, and neuroanatomy; regional and systemic approaches; course sequence and assessment blended with general histology for dental students; cadaveric dissections closely follow lecture sequence; emphasis on correlations to dental practice. Offered spring semesters. Requirements: D.D.S. enrollment.

ACB:8121 General Histology for Dental Students 4 s.h.

Microscopic study of cells, fundamental tissues, organ systems; emphasis on tooth-related structures. Offered spring semesters. Requirements: D.D.S. enrollment or anatomy and cell biology graduate standing.

ACB:8401 Advanced Human Anatomy arr.

Regional dissection of the body with emphasis on systems relevant to student's specialty interests; discussion, reading, clinically relevant imaging, embryology. Offered spring semesters. Requirements: fourth-year M.D. enrollment or graduate standing.

ACB:8402 Teaching Elective in Regional Anatomy 2,4 s.h.

Students expand knowledge and experience in medical education; investigation of educational pedagogy in a laboratory setting coupled with self-directed learning of anatomical content relevant to professional development; preparation, design, and implementation of four teaching interactions with M1/D1/PA1 students; designing a classroom exercise (e.g., interactive lecture, learning activity, computer-based study module) that helps bridge the basic science content with clinical procedure. Requirements: M.D. standing and enrollment in teaching distinction track.

ACB:8405 Advanced Neuroanatomy and Diagnostic Neuroimaging 2 s.h.

Focused training in interpretation of cross-sectional neuroanatomy at a level far exceeding what is currently taught in preclinical curriculum; builds on prior training in diagnostic neuroimaging of the human brain during first and second phases of the medical curriculum, producing postgraduate year one (PGY-1) level of readiness interpreting structural brain images; core knowledge and skills of neurological examination applied within context of clinical problems. Requirements: M.D. enrollment.

ACB:8498 Special Study On Campus

Anatomy research on campus; individually arranged. Requirements: M.D. enrollment.

arr.

Master of Clinical Anatomy, M.C.A.

The mission of the professional degree program, Master of Clinical Anatomy (M.C.A.), is to provide clinically relevant content knowledge coupled with experiential learning activities for developing skills in teaching, education research, and enhancing advancement to professional health care programs. Graduates will be able to:

- demonstrate knowledge of the anatomical sciences (neuroanatomy, gross anatomy, and histology) at a level necessary for instruction within a professional program;
- design and deliver effective instructional activities appropriate for a cadaveric dissection course;
- design and deliver effective instructional activities appropriate for individual, small group, large group, and laboratory settings;
- evaluate the effectiveness of educational instruction using both formative and summative methods; and
- practice effective methods of self-reflection on the nature, quality, and impact of instructional activities for learning.

Requirements

The Master of Clinical Anatomy (M.C.A.) program requires a minimum of 32 s.h. of work that is distributed between required (25 s.h.) and elective (7 s.h.) coursework. Students must maintain a g.p.a. of at least 3.25. The program is designed so that students can complete the requirements in a year and a half, and provides clinically relevant content coupled with experiential learning activities to develop skills in teaching and educational research. A portion of the curriculum is offered online to complement classroom and laboratory learning.

Students with a degree in a specific biological science (e.g., genetics) for which no formal coursework in basic gross anatomy has been completed may be required to take a prerequisite undergraduate anatomy course.

The Master of Clinical Anatomy requires the following coursework.

Required Courses

Code	Title	Hours
ACB:5203	Gross Human Anatomy for Graduate Students	5
ACB:5206	Graduate Research in Cell and Developmental Biology	2
ACB:5210	General Histology Online	3
ACB:6252	Functional Neuroanatomy	4
ACB:7001	Teaching and Learning in the Anatomical Sciences	2
ACB:7002	Seminar in Anatomical Sciences (taken twice for 1 s.h. each)	2
ACB:7020	Human Embryology Online	2
ACB:7227	Anatomic Study for Teaching	3
ACB:7400	Practicum in College Teaching for Master of Clinical Anatomy	2

Electives

Students select at least 7 s.h. in elective coursework.

Code	Title	Hours
ACB:5206	Graduate Research in Cell and Developmental Biology (may earn 1-3 s.h. in addition to required course above)	1-3
ACB:7010	Anatomy Through Imaging	2
ACB:7020	Human Embryology Online	2
ACB:7400	Practicum in College Teaching for Master of Clinical Anatomy (may earn 1-2 s.h. in addition to required course above)	1-2
ACB:8401	Advanced Human Anatomy	4
ACB:8402	Teaching Elective in Regional Anatomy	2
GRAD:7385	Teaching and Learning in Higher Education	3
MED:8403	Teaching Skills for Medical Students	4
PSQF:6205	Design of Instruction	3
Other coursework with M.C.A. program approval		1-3

Comprehensive Exam

Students successfully complete a comprehensive examination during the fall semester of their second year.

Research/Education Project

Students successfully present their research/education project during the fall semester of their second year.

Admission

Applicants must:

have a B.A. or B.S. degree with a strong science background;

have a g.p.a. of at least 3.00;

have an external performance exam from the last five years, such as MCAT (minimum score of 500 or pre-2015 exam scores greater than 27) or Graduate Record Examination (GRE) General Test (score above the 50th percentile with verbal score of at least 150 and math score of at least 150);

if an international applicant whose first language is not English, have a Test of English as a Foreign Language (TOEFL) score between 550 and 600 and be required to pass an English competency certification within the first 12 months of entry into the program;

provide three letters of reference/support;

submit a personal statement; and

be available for an interview with the M.C.A. faculty.

Application deadline is May 31.

For detailed application instructions and forms, visit the Department of Anatomy and Cell Biology.

Career Advancement

Graduates are prepared for a variety of anatomical sciences education settings that include advanced professional study, faculty/lectureship positions in medicine, and allied health care fields at community colleges. Some will want to continue their studies within a health care profession, others may want to prepare for college-level teaching, and others may want to pursue a career in anatomical sciences.

Anesthesia

Chair

- Cynthia Wong

Faculty: <https://medicine.uiowa.edu/anesthesia/people/primary-appointments>

Website: <https://medicine.uiowa.edu/anesthesia/>

Since its inception, the Department of Anesthesia at the University of Iowa has educated more than 400 anesthesiologists, and at least 18 former residents have served as heads of departments of anesthesiology at American medical colleges.

The department has been, and continues to be, well-represented on editorial boards of major anesthesia journals. It provides refresher course lectures for the annual meeting of the American Society of Anesthesiologists, has physician-researchers who are recognized by the National Institute of Health as independently funded principal investigators, provides many board examiners for the oral exams of the American Board of Anesthesiology, and has earned high national ranking because of these and other objective accomplishments.

The department coordinates the Anesthesia Nursing Program, a collaboration between the Carver College of Medicine and the College of Nursing. The program, which is open to nurses who hold a bachelor's degree, prepares nurse anesthetists to serve rural hospitals in Iowa and nationwide. The curriculum provides intensive training in didactic and clinical anesthesia and includes diverse clinical experience as well as classroom instruction, seminars, and clinical case conferences. For more information, see the Doctor of Nursing Practice [p. 1828] (College of Nursing) section of the Catalog.

M.D. Training

The Department of Anesthesia introduces second-year medical students to anesthesia as a specialty; helps third-year students develop concepts and technical skills related to resuscitation, airway management, and care of the unconscious patient; and offers fourth-year students intensive study in the specialty. It offers the following courses for medical students. For course descriptions and prerequisite information, see Courses [p. 1673] in this section of the Catalog.

Code	Title	Hours
ANES:8301	Clinical Anesthesia	2
ANES:8401	Clinical Anesthesia Senior	arr.
ANES:8402	Surgical and Neurosciences Intensive Care	arr.
ANES:8403	Chronic Pain Management	2
ANES:8495	Intensive Care Off Campus	arr.
ANES:8497	Research in Anesthesia	arr.
ANES:8498	Anesthesia On Campus	arr.
ANES:8499	Anesthesia Off Campus	arr.

Residency

Postgraduate and Residency Program

The department's postgraduate and residency program involves diverse clinical experiences, seminars and teaching conferences, and ongoing research activities that help postgraduate students and residents develop the knowledge and skills required of an anesthesia specialist.

Courses

Anesthesia Courses

ANES:6004 Scientific Principles for Anesthesia Practice 4 s.h.

Applicable chemical and physical properties of molecules important in anesthesia; technological principles and equipment used to safely deliver those molecules to patients and monitor patients during anesthesia; topics include basic chemical and physical calculations, properties of substances in solution, measurement, behavior of gases and other fluids, effects of heat transfer, and the specific chemistry of inhaled and intravenous anesthetics and adjuvant drugs. Corequisites: NURS:6006. Same as NURS:6004.

ANES:6006 Pharmacology of Anesthesia Practice 3 s.h.

Builds on content from foundational graduate pharmacology course; focus on safe prescribing, administration, and management of medications used to provide general, regional, or local anesthesia and analgesia for all patient populations across lifespan undergoing varied surgical, obstetrical, or other procedures in any health care setting. Prerequisites: PCOL:6204 with a minimum grade of B-. Requirements: enrollment in anesthesia nursing program. Same as NURS:6006.

ANES:6007 Basic Principles of Anesthesia Practice 5 s.h.

Overview and integration of anesthetic agents and techniques; patient assessment, preoperative airway evaluation, anesthetic planning, principles of fluid management, and arterial blood gas interpretation; principles of general and regional anesthesia and techniques as they pertain to each surgical specialty; Occupational, Safety and Health Administration (OSHA), The Joint Commission (TJC), and institutional regulations and requirements pertinent to anesthesia practice. Prerequisites: NURS:6004 with a minimum grade of B- and NURS:6006 with a minimum grade of B-. Same as NURS:6007.

ANES:6010 Advanced Principles of Anesthesia Practice I 4 s.h.

Special needs and intraoperative anesthetic management of complex patient populations and those with advanced pathologic states; anesthetic techniques for specific surgical subspecialties including pediatrics, obstetrics, neurosurgery, cardiac, vascular, thoracic, transplant, trauma, EENT, dental, and aesthetic or reconstructive procedures; pertinent pathophysiology and anesthetic monitoring and management techniques; clinical case conferences provide opportunities to discuss perianesthetic complications and challenges. Prerequisites: NURS:6007 with a minimum grade of B- or ANES:6007 with a minimum grade of B-. Same as NURS:6010.

ANES:6012 Advanced Principles of Anesthesia Practice II **1 s.h.**

Acute and chronic pain treatment modalities for all patients presenting for a variety of medical or surgical procedures across the lifespan. Prerequisites: NURS:6007 with a minimum grade of B- or ANES:6007 with a minimum grade of B-. Same as NURS:6012.

ANES:6050 Introductory Clinical Anesthesia **2 s.h.**

Initial mentorship in clinical anesthesia; development of basic clinical skills needed for a career as nurse anesthetist; application and integration of theoretical knowledge in clinical setting. Prerequisites: NURS:6004 and NURS:6006. Corequisites: NURS:6007. Same as NURS:6050.

ANES:6051 Clinical Anesthesia I **2 s.h.**

Mentored clinical anesthesia experience; advancement and enhancement of clinical skills in providing anesthesia for various surgical subspecialties including general, orthopedic, pediatric, geriatric, gynecologic, urologic, dental, EENT, ambulatory surgery, and invasive diagnostic procedures. Prerequisites: NURS:6050 or ANES:6050. Corequisites: NURS:6010. Same as NURS:6051.

ANES:6052 Clinical Anesthesia II **2 s.h.**

Additional mentored clinical anesthesia experience; advancement and enhancement of clinical skills in providing anesthesia for various surgical subspecialties including general, orthopedic, pediatric, geriatric, gynecologic, urologic, dental, EENT, ambulatory surgery, and invasive diagnostic procedures. Prerequisites: NURS:6051 or ANES:6051. Same as NURS:6052.

ANES:6053 Advanced Clinical Anesthesia **2 s.h.**

Mentored clinical anesthesia at selected sites; development of advanced clinical skills and critical thinking by providing anesthesia for all surgical specialties and invasive diagnostic procedures in all anesthetizing locations; providing anesthesia for all patients in all settings, including on call emergency surgeries. Prerequisites: NURS:6052. Same as NURS:6053.

ANES:6054 Obstetrical Anesthesia **2 s.h.**

Experience delivering analgesia and anesthesia for parturients during labor and delivery process. Prerequisites: NURS:6052. Same as NURS:6054.

ANES:6055 Rural Anesthesia **2 s.h.**

Opportunity to develop experience providing anesthesia and associated health care services at UI-affiliated clinical sites in rural settings. Prerequisites: NURS:6052. Same as NURS:6055.

ANES:8301 Clinical Anesthesia **2 s.h.**

Clinical instruction in perioperative care of the surgical patient; preoperative evaluation, consideration of coexisting medical problems, intraoperative care, postoperative management; basic airway management; introduction to clinical management of acute and chronic pain; case conferences, simulator training.

ANES:8401 Clinical Anesthesia Senior **arr.**

Advanced clinical experience in anesthesia management of surgical patients with coexisting medical problems; clinical experience in various forms of anesthesia; general, regional (spinal, epidural, peripheral nerve block) anesthesia; practical experience in airway management; mask ventilation, endotracheal intubation, LMA placement, other alternative airway techniques; medical management of surgical patient under anesthesia; pharmacology, cardiovascular and pulmonary physiology; case conferences.

ANES:8402 Surgical and Neurosciences Intensive Care **arr.**

Evaluation and treatment of critically ill neurological and post-surgical patients; evaluation of pulmonary function, ventilator management, monitoring and management of hemodynamics, fluid balance, acid-based problems, acute kidney injury, acute neurological events, and advanced monitoring techniques.

ANES:8403 Chronic Pain Management **2 s.h.**

How to interview and assess patients with pain, work with a multidisciplinary team to determine the type of pain and/or diagnosis, and develop a multimodal treatment plan; readings, classroom discussions, and experiential activities.

ANES:8495 Intensive Care Off Campus **arr.**

Evaluation and treatment of seriously ill patients in an intensive care unit (other than University of Iowa Hospitals and Clinics); artificial ventilation, evaluation of pulmonary function, monitoring of cardiovascular status, fluid balance and acid base problems, advance monitoring techniques. Prerequisites: ANES:8401. Requirements: 4 s.h. of ANES:8401.

ANES:8497 Research in Anesthesia **arr.**

Medical research, clinical or laboratory projects; individual study.

ANES:8498 Anesthesia On Campus **arr.**

Well defined research project relating to anesthesia; arranged by student with departmental approval.

ANES:8499 Anesthesia Off Campus **arr.**

Knowledge development in anesthesia work and monitor use; ability to identify respiratory, cardiovascular, and neurologic effects of anesthetic agents; skill in airway management; basic skills in general, spinal, epidural, and peripheral nerve block anesthesia.

Biochemistry

Chair

- Charles M. Brenner

Undergraduate major: biochemistry (B.A., B.S.)

Graduate degrees: M.S. in biochemistry; Ph.D. in biochemistry

Faculty: <https://medicine.uiowa.edu/biochemistry/people/primary-appointments>

Website: <https://medicine.uiowa.edu/biochemistry/>

Biochemistry is the study of basic chemical processes that occur in and govern all living systems. Nearly all areas of the life sciences engage in biochemical research.

The Department of Biochemistry offers undergraduate and graduate degrees, and determines the curricula for those programs. Undergraduate students majoring in biochemistry receive their degrees (Bachelor of Arts or Bachelor of Science) from the College of Liberal Arts and Sciences, and their studies are governed by that college's undergraduate academic policies. The Master of Science and the Doctor of Philosophy degrees are awarded by the Graduate College.

Faculty and Research

The department's faculty members supervise research in biochemistry; molecular, cellular, developmental, computational, and structural biology; and model system genetics. Their work is supported by grants from the National Institutes of Health, the National Science Foundation, the American Heart Association, the American Cancer Society, the Muscular Dystrophy Association, and other sources. To learn more about the department's faculty members and areas of research, visit the Department of Biochemistry website.

Programs

Undergraduate Programs of Study

Majors

- Major in Biochemistry (Bachelor of Arts) [p. 1678]
- Major in Biochemistry (Bachelor of Science) [p. 1681]

Graduate Programs of Study

Majors

- Master of Science in Biochemistry [p. 1684]
- Doctor of Philosophy in Biochemistry [p. 1685]

Facilities

The Department of Biochemistry occupies 36,700 square feet on the fourth floor of the Bowen Science Building, 3,500 square feet on the third floor of the Medical Education Research Facility, 2,000 square feet in the **Eckstein Medical Research Building**, and 2,900 square feet on the fourth floor of the Pappajohn Biomedical Discovery Building in the Fraternal Order of Eagles Diabetes Research Center on the University's health sciences campus. It has a number of well-equipped research laboratories and other departmental facilities, including the Biochemistry Stores, the Mattill Biochemistry Reading Room, and the Heath Conference Room.

The department makes available a number of shared instruments, including an Applied PhotoPhysics stopped flow spectrometer SX20; a Jasco spectropolarimeter, model J815; a Horiba fluorlog-3 spectrofluorometer; and a Beckman Coulter ultra XLI analytical centrifuge.

Faculty, staff, and students in the department have access to a variety of shared Carver College of Medicine resources, including the Protein Crystallography Facility, the Iowa Institute of Human Genetics Genomics Division (DNA Facility), the Nuclear Magnetic Resonance Facility, the Proteomics Facility, the Flow Cytometry Facility, the Viral Vector Core Facility, the Small Animal Imaging Core Facility, and the Genome Editing Facility. The University also supports resources such as the Central Microscopy Research Facilities and the High Throughput Screening Facility.

Courses

Biochemistry Courses

BIOC:2120 Life-Oriented Organic Chemistry I 3 s.h.

Rigorous treatment of organic chemistry with emphasis on reactivity of biological molecules and reactions of functionalized organic molecules; prepares students to major in any life science including biochemistry, biology, health and human physiology, microbiology, neuroscience, and psychology; satisfies the organic chemistry requirement for further study in the health professions; preparation for biochemistry coursework, conducting research, teaching and/or pursuing policy, regulatory, or legal careers in the life sciences. Requirements: Advanced Placement (AP) chemistry score of 5 or CHEM:1110 or one semester of collegiate chemistry.

BIOC:3110 Biochemistry 3 s.h.

One-semester survey of basic concepts in modern biochemistry and molecular biology; emphasis on application of biochemical concepts to human metabolism; appropriate for students who plan to pursue a career in health care or want an overview of biochemistry as a discipline. Requirements: one year each of college-level biology and chemistry. Recommendations: one semester of organic chemistry.

BIOC:3120 Biochemistry and Molecular Biology I 3 s.h.

Physical and chemical foundations of biochemistry, structure of biological molecules, catalysis, transport, and oxidative reactions in biology; first course of two-semester sequence that concludes with BIOC:3130. Requirements: two semesters of general chemistry and one of organic chemistry. Recommendations: BIOL:1411, BIOL:1412, and an additional organic chemistry course.

BIOC:3130 Biochemistry and Molecular Biology II 3 s.h.

Molecular principles of photosynthesis and biosignaling; metabolism of lipids, amino acids, and nucleic acids; DNA replication, transcription, and protein translation; team-taught, didactic lecture style; second of a two-semester comprehensive biochemistry sequence. Prerequisites: BIOC:3120 with a minimum grade of C-.

BIOC:3140 Experimental Biochemistry 2 s.h.

Use of modern instruments and techniques to fractionate, identify, and characterize constituents of biochemical systems. Prerequisites: BIOC:3120 with a minimum grade of C. Requirements: two semesters of general chemistry and one semester of organic chemistry.

- BIOC:3150 Development of Senior Research Project** 2 s.h.
Preparation for biochemistry majors pursuing a senior research project in BIOC:4999; communicating technical information through writing and speaking; presenting scientific journal articles and writing experimental protocols; developing detailed proposal for one-year senior research project. Prerequisites: BIOC:3130 or BIOC:3120 or BIOC:3140. Requirements: biochemistry major, and junior or senior standing.
- BIOC:3310 Practical Data Science and Bioinformatics** 3 s.h.
Understanding how to access large biological data sets and use them to answer biological questions is an important skill for researchers; immersive introduction to computational handling of data; how to access and analyze publicly available data; critically evaluate data quality and analysis in context of measuring gene expression; basic coding in R/RStudio, plotting and data display, fitting and regression, statistical inference, statistical models, downloading and data wrangling; basic introduction to machine learning (clustering); for students with no computational background. Prerequisites: BIOL:1411 with a minimum grade of C- and BIOL:1412 with a minimum grade of C-. Requirements: college algebra. Recommendations: BIOC:3110, or BIOC:3120 and BIOC:3130, or other upper-level life sciences courses. Same as CBIO:3310, MMED:3310.
- BIOC:3800 Biochemistry Teaching Practicum** arr.
Training for qualified junior or senior undergraduates majoring in biochemistry or a related field to contribute to undergraduate courses; interns may hold review sessions, offer regular office hours, draft questions for homework or exams, assist in proctoring exams, assist students in a laboratory setting, and help with course implementation; guidance from the faculty director and instructors in each course; interns are expected to work approximately three hours per week for each semester hour of credit earned. Requirements: completion of a course covering the same or equivalent material with a grade of B or higher, and must arrange for a short interview with the appropriate course director prior to registration.
- BIOC:3993 Undergraduate Biochemistry Research** arr.
Preparation for BIOC:4999; directed research with a biochemistry faculty member; experience in an active biochemistry research lab, learning and performing experiments relevant to current projects in that lab, including exposure to scientific literature; arranged in advance by student and biochemistry faculty member.
- BIOC:4241 Biophysical Chemistry I** 3 s.h.
Principles and experimental approaches used to study structure and function of biological macromolecules; protein structure, stability, and dynamics; macromolecular interactions; common biophysical methods. Prerequisites: BIOC:3120 with a minimum grade of C- and BIOC:3130 with a minimum grade of C-. Requirements: one year of biochemistry. Recommendations: physical chemistry course and one semester of calculus.
- BIOC:4242 Biophysical Chemistry II** 3 s.h.
Principles and experimental approaches used to study structure and function of biological macromolecules; ligand binding and enzyme catalysis; X-ray crystallography; NMR spectroscopy. Prerequisites: BIOC:3120 with a minimum grade of C- and BIOC:3130 with a minimum grade of C-. Requirements: one year of biochemistry. Recommendations: physical chemistry course and one semester of calculus.
- BIOC:4310 Computational Biochemistry** 3 s.h.
Introduction to biomolecular modeling and computer simulation techniques; biomolecular structure and molecular driving forces; principles of structural optimization and conformational sampling; applications to biomolecular phenotypes; scripting and molecular visualization in PyMol, setting up and running molecular dynamics simulations using VMD and NAMD, performing refinement of X-ray diffraction data sets using Phenix, and executing Poisson-Boltzmann electrostatic calculations using APBS. Prerequisites: (MATH:1560 or MATH:1860) and CHEM:1120. Recommendations: BIOC:3110 or BIOC:3120. Same as BME:4310.
- BIOC:4999 Advanced Undergraduate Biochemistry Research** arr.
Advanced directed research with a biochemistry faculty member; work on an individualized research project relevant to research goals of that lab; learning related scientific literature and presentation of research results; arranged in advance by student and biochemistry faculty member and taken after completion of core biochemistry curriculum. Prerequisites: BIOC:3120 with a minimum grade of B- and BIOC:3130 with a minimum grade of B- and BIOC:3140 with a minimum grade of B- and BIOC:3150 with a minimum grade of B-. Requirements: BIOC:3993 or URES:3994 or HONR:3994 or prior research experience or lab practicum.
- BIOC:5215 Directed Readings for Graduate Students** arr.
Directed readings with course content arranged with professor.
- BIOC:5241 Biophysical Chemistry I** 3 s.h.
Principles and experimental approaches used to study structure and function of biological macromolecules; protein structure, stability, and dynamics; macromolecular interactions; common biophysical methods. Requirements: one year of biochemistry. Recommendations: physical chemistry course and one semester of calculus.
- BIOC:5242 Biophysical Chemistry II** 3 s.h.
Principles and experimental approaches used to study structure and function of biological macromolecules; ligand binding and enzyme catalysis; X-ray crystallography; NMR spectroscopy. Requirements: one year of biochemistry. Recommendations: physical chemistry course and one semester of calculus.
- BIOC:5243 Biophysical Chemistry I, Module I** 1 s.h.
Overview of principles of protein structure, stability, folding, and dynamics; brief treatment of structural biology approaches to help students become critical users of models derived from X-ray crystallography and NMR; taken alone or as part of BIOC:5241. Requirements: introductory course in biochemistry.
- BIOC:5244 Biophysical Chemistry II, Module I** 1 s.h.
Enzymes as unparalleled catalysts that represent a unique class of drug targets; focus on organic chemistry of enzyme catalyzed reactions and enzyme inhibition by small molecules from a medicinal chemistry perspective; chemical and enzyme kinetics, sources of catalytic power, chemical mechanisms used in enzyme catalysis, role of coenzymes; strategies in enzyme inhibition, drug resistance, drug synergism, reversible enzyme inhibitors, transition state analogs, slow tight binding inhibitors, irreversible inhibition; taken alone or as part of BIOC:5242. Requirements: introductory course in biochemistry. Same as PHAR:5542.

- BIOC:5245 Biophysical Chemistry I, Module II** 1 s.h.
In-depth examination of statistical thermodynamics and molecular forces in biological systems as related to protein structure, stability, and folding; nucleic acid structure and stability; taken alone or as part of BIOC:5241. Requirements: introductory course in biochemistry.
- BIOC:5246 Biophysical Chemistry II, Module II** 1 s.h.
Utilization of X-ray crystallography and NMR spectroscopy in determining atomic resolution biomolecular structures; crystal geometry, X-ray diffraction, the phase problem, data collection, structure solving and refinement; basic principles of NMR spectroscopy including magnetic properties of nuclei, chemical shift, resonance assignments, determination of NOEs, scalar couplings, RDCs, and simulated annealing approaches to structure determination; for students interested in structural biology; taken alone or as part of BIOC:5242. Requirements: introductory course in biochemistry.
- BIOC:5247 Biophysical Chemistry I, Module III** 1 s.h.
In-depth examination of protein-protein interactions and protein-nucleic acid interactions; implications in biological motility, transcription, and replication; taken alone or as part of BIOC:5241. Requirements: introductory course in biochemistry.
- BIOC:5248 Biophysical Chemistry II, Module III** 1 s.h.
Methods for studying biomolecular dynamics, structure of large biomolecules and biomolecular complexes; measurement and analysis of NMR parameters for characterization of dynamics including T1, T2, hetNOE, CPMG-RD, and RDCs; introduction to computational approaches (e.g., molecular dynamics); NMR methods for studying large biomolecular systems and survey of other approaches including cryoEM and SAX; for students interested in structural biology; taken alone or as part of BIOC:5242. Requirements: one year of biochemistry. Recommendations: basic knowledge of spectroscopy and some previous exposure to NMR from basic chemistry courses.
- BIOC:5261 Research Techniques** 1-6 s.h.
Laboratory rotation for first-year graduate students in biochemistry.
- BIOC:5282 Seminar** 0-2 s.h.
How to evaluate reports of scientific investigations critically; techniques for presenting scientific information.
- BIOC:5875 Perspectives in Biocatalysis** 1-3 s.h.
Applied enzymology, protein design, structure-activity relationships, biosensor technology, microbial transformations, biodegradation of environmental pollutants. Requirements: graduate standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as CBE:5875, CEE:5875, CHEM:5875, MICR:5875, PHAR:5875.
- BIOC:7251 Introduction to Protein Structures** 1 s.h.
Basics of protein structures and amino acids; module covers chapters 1-5 of Lehninger's *Principles of Biochemistry*. Recommendations: first-year graduate standing in biosciences or physical sciences.
- BIOC:7252 Enzymes, Carbohydrates, Nucleic Acids, and Bioenergetics** 1 s.h.
Basics of enzyme kinetics and enzyme mechanisms, carbohydrates, nucleic acids, and bioenergetics; module covers chapters 6, 7, 8, and 13 of Lehninger's *Principles of Biochemistry*. Recommendations: first-year graduate standing in biosciences or physical sciences.
- BIOC:7253 Metabolism I** 1 s.h.
Basics of carbohydrate metabolism (glycolysis, gluconeogenesis, the pentose phosphate pathway), hormonal regulation of carbohydrate metabolism, the citric acid cycle, amino acid catabolism, oxidative phosphorylation; assignment of an advanced topic related to material, typically a recent research paper, extending inquiry beyond that presented in class and presented orally at end of five-week module. Requirements: undergraduate biochemistry course or background in enzyme function.
- BIOC:7254 Cellular Biochemistry** 1 s.h.
Carbohydrate biosynthesis in plants and bacteria, lipid structure/function, biological membranes and transport, signaling, and protein turnover; can be taken alone or as part of BIOC:3130; for graduate students who wish to refresh or advance their knowledge of cellular biochemistry. Recommendations: first-year graduate standing in biosciences or physical sciences.
- BIOC:7255 Metabolism II** 1 s.h.
Fatty acid metabolism, lipid biosynthesis, synthesis of nitrogen containing compounds (amino acids, nucleotides) and principles of hormonal regulation of metabolic pathways; can be taken alone or as part of BIOC:3130; for graduate students who wish to refresh or advance their knowledge of metabolism. Recommendations: first-year graduate standing in biosciences or physical sciences.
- BIOC:7256 Molecular Biology** 1 s.h.
Chromosomal organization, DNA replication, gene expression, RNA processing, and translation; can be taken alone or as part of BIOC:3130; for graduate students who wish to refresh or advance their knowledge of the central dogma of molecular biology. Recommendations: first-year graduate standing in biosciences or physical sciences.
- BIOC:7292 Research Biochemistry** arr.
Thesis research.
- BIOC:8101 Biochemistry for Dental Students** 3 s.h.
Biochemical concepts and application to clinical problems. Requirements: CHEM:2210 and D.D.S. enrollment. Recommendations: CHEM:2220.

Biochemistry, B.A.

To maximize student flexibility, the curriculum for the B.A. with a major in biochemistry is identical to the B.S. degree in the first two years of study.

Requirements

The Bachelor of Arts with a major in biochemistry requires a minimum of 120 s.h., including 58 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 20].

The biochemistry major for the Bachelor of Arts degree provides a rigorous education in biochemical concepts and practice in the laboratory while giving students flexibility to specialize in additional disciplines or to obtain clinical volunteer experience. The B.A. program is intended for most students majoring in biochemistry, including those with pre-medicine, pre-pharmacy, pre-dental, and other pre-health professions interests. It also is appropriate for students earning more than one major.

Qualified students may graduate with honors in the biochemistry major; see "Honors in the Major" under Honors [p. 1678] in this section of the Catalog.

The B.A. with a major in biochemistry requires the following coursework.

Code	Title	Hours
Common Requirements		49
Additional Requirements		9
Total Hours		58

Common Requirements

Students complete the following during their first two years.

Code	Title	Hours
BIOC:3120 & BIOC:3130	Biochemistry and Molecular Biology I-II	6
BIOC:3140	Experimental Biochemistry	2
BIOL:1411- BIOL:1412	Foundations of Biology - Diversity of Form and Function	8
CHEM:1110 & CHEM:1120	Principles of Chemistry I-II	8
CHEM:2210 or CHEM:2230	Organic Chemistry I or Organic Chemistry I for Majors	3
CHEM:2220 or CHEM:2240	Organic Chemistry II or Organic Chemistry II for Majors	3
CHEM:2410 or CHEM:2420	Organic Chemistry Laboratory or Organic Chemistry Laboratory for Majors	3
MATH:1850 & MATH:1860	Calculus I-II	8
PHYS:1511 or PHYS:1611	College Physics I or Introductory Physics I	4
PHYS:1512 or PHYS:1612	College Physics II or Introductory Physics II	4

If students take PHYS:1612 Introductory Physics II, they must take the course with the lab component.

Additional Requirements

In addition to the common requirements listed above, students must complete the following.

Code	Title	Hours
One of these:		
BIOC:4241	Biophysical Chemistry I	3
BIOC:4242	Biophysical Chemistry II	3
CHEM:4430	Principles of Physical Chemistry	3
CHEM:4431	Physical Chemistry I	3
CHEM:4432	Physical Chemistry II	3
And:		
	Advanced science electives, approved by biochemistry advisor	6

Students intending to earn advanced degrees in the biological or health sciences are advised to earn at least 4 s.h. in BIOC:3993 Undergraduate Biochemistry Research or BIOC:4999 Advanced Undergraduate Biochemistry Research. There are no prerequisites for BIOC:3993. The course involves experience in an active biochemistry research lab, which must be arranged ahead of time with a supervising faculty member. Students may make arrangements directly with the faculty member, or they may request assistance from an undergraduate advisor. Credit earned in BIOC:3993 does not count toward the major, but it does count toward the minimum of 120 s.h. required to graduate.

Before students register for BIOC:4999 Advanced Undergraduate Biochemistry Research, they must have completed BIOC:3120 Biochemistry and Molecular Biology I, BIOC:3130 Biochemistry and Molecular Biology II, BIOC:3140 Experimental Biochemistry, and BIOC:3150 Development of Senior Research Project, with a grade of B-minus or higher in each course. Students also are required to have prior research experience, such as in BIOC:3993 Undergraduate Biochemistry Research, URES:3994 Undergraduate Research and Creative Projects, or HONR:3994 Honors Research Practicum, and permission of the instructor.

Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.

To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Teacher Education Program Application and Admission on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

Honors

Honors in the Major

Students have the opportunity to graduate with honors in the major. They must maintain a cumulative University of Iowa g.p.a. of at least 3.33 and a g.p.a. of at least 3.33 in work for the major. They must earn 6 s.h. in BIOC:4999 Advanced Undergraduate Biochemistry Research and present their research results in a honors thesis written in the form of a

journal article and in an oral report given at a special open departmental seminar.

University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the University's honors program.

Membership in the UI Honors Program is not required to earn honors in the biochemistry major.

Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Before the third semester begins: CHEM:1110 Principles of Chemistry I, CHEM:1120 Principles of Chemistry II, MATH:1850 Calculus I, and MATH:1860 Calculus II

Before the fifth semester begins: BIOL:1411 Foundations of Biology, BIOL:1412 Diversity of Form and Function, CHEM:2210 Organic Chemistry I or CHEM:2230 Organic Chemistry I for Majors, CHEM:2220 Organic Chemistry II or CHEM:2240 Organic Chemistry II for Majors, and CHEM:2410 Organic Chemistry Laboratory or CHEM:2420 Organic Chemistry Laboratory for Majors

Before the seventh semester begins: PHYS:1611 Introductory Physics I or PHYS:1511 College Physics I, PHYS:1612 Introductory Physics II or PHYS:1512 College Physics II, BIOC:3120 Biochemistry and Molecular Biology I, BIOC:3130 Biochemistry and Molecular Biology II, BIOC:3140 Experimental Biochemistry, a science elective, and at least 90 s.h. earned toward the degree

Before the eighth semester begins: CHEM:4430 Principles of Physical Chemistry or CHEM:4431 Physical Chemistry I or CHEM:4432 Physical Chemistry II or BIOC:4241 Biophysical Chemistry I or BIOC:4242 Biophysical Chemistry II, and a science elective

During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Fulfills a major requirement and may fulfill a GE requirement.

b Enrollment in chemistry courses requires completion of a placement exam.

c Enrollment in math courses requires completion of a placement exam.

d Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.

e GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.

f Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.

g Students intending to earn advanced degrees in the biological or health sciences are advised to earn at least 4 s.h. in BIOC:3993 or BIOC:4999.

h Students are required to complete 6 s.h. in advanced science electives approved by biochemistry advisor.

i Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>. If applicable search for "Early and Late Participation" to find this page (e.g. participate in graduation ceremony in May, degree conferral in August).

Career Advancement

Biochemistry graduates with bachelor's degrees often work as research assistants in industry, government, education, or health services; teach in secondary schools; or go on to advanced study in medicine, dentistry, or other areas. The program offers solid preparation for careers in medicine, biology, chemistry, dentistry, research, or related sciences. About one-third of biochemistry majors go on to study medicine; others enter graduate programs or professional degree programs.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Biochemistry, B.S.

To maximize student flexibility, the curriculum for the B.S. with a major in biochemistry is identical to the B.A. degree in the first two years of study.

Requirements

The Bachelor of Science with a major in biochemistry requires a minimum of 120 s.h., including 70 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 20].

All students majoring in biochemistry are initially placed in the Bachelor of Arts degree program. Students in good academic standing can switch to the Bachelor of Science degree program after completing one semester of organic chemistry (CHEM:2230 Organic Chemistry I for Majors or CHEM:2210 Organic Chemistry I). Students who wish to change their degree program to the Bachelor of Science should do so by filling out a change of degree form at the College of Liberal Arts and Sciences Office of Academic Programs and Student Development.

The biochemistry major for the Bachelor of Science degree is intended primarily for students planning careers in research. The B.S. program prepares students to pursue graduate degrees, such as an M.S., Ph.D., or a combined M.D./Ph.D. program, or to work as research technicians. The B.S. program requires 12-14 s.h. more credit in science and laboratory electives than the B.A. program does.

Qualified students may graduate with honors in the biochemistry major; see "Honors in the Major" under Honors [p. 1678] in this section of the Catalog.

The B.S. with a major in biochemistry requires the following coursework.

Code	Title	Hours
Common Requirements		49
Additional Requirements		21
Total Hours		70

Common Requirements

Students complete the following during their first two years.

Code	Title	Hours
BIOC:3120 & BIOC:3130	Biochemistry and Molecular Biology I-II	6
BIOC:3140	Experimental Biochemistry	2
BIOL:1411- BIOL:1412	Foundations of Biology - Diversity of Form and Function	8
CHEM:1110 & CHEM:1120	Principles of Chemistry I-II	8
CHEM:2210 or CHEM:2230	Organic Chemistry I or Organic Chemistry I for Majors	3
CHEM:2220 or CHEM:2240	Organic Chemistry II or Organic Chemistry II for Majors	3
CHEM:2410 or CHEM:2420	Organic Chemistry Laboratory or Organic Chemistry Laboratory for Majors	3

MATH:1850 & MATH:1860	Calculus I-II	8
PHYS:1511 or PHYS:1611	College Physics I or Introductory Physics I	4
PHYS:1512 or PHYS:1612	College Physics II or Introductory Physics II	4

If students take PHYS:1612 Introductory Physics II, they must take the course with the lab component.

Additional Requirements

In addition to the common requirements listed above, students must complete the following.

Code	Title	Hours
Two of these:		
BIOC:4241	Biophysical Chemistry I	3
BIOC:4242	Biophysical Chemistry II	3
CHEM:4430	Principles of Physical Chemistry	3
CHEM:4431	Physical Chemistry I	3
CHEM:4432	Physical Chemistry II	3
One of these options:		
BIOC:4999	Advanced Undergraduate Biochemistry Research	6
Advanced laboratory courses		6
And:		
Advanced science electives, approved by biochemistry advisor		9

Students are encouraged to begin research by taking BIOC:3993 Undergraduate Biochemistry Research, which has no prerequisites. The course involves experience in an active biochemistry research lab, which must be arranged ahead of time with a supervising faculty member. Students may make arrangements directly with the faculty member, or they may request assistance from an undergraduate advisor. Credit earned in BIOC:3993 does not count toward the major, but it does count toward the minimum of 120 s.h. required to graduate.

Before students register for BIOC:4999 Advanced Undergraduate Biochemistry Research, they must have completed BIOC:3120 Biochemistry and Molecular Biology I, BIOC:3130 Biochemistry and Molecular Biology II, BIOC:3140 Experimental Biochemistry, and BIOC:3150 Development of Senior Research Project, with a grade of B-minus or higher in each course. Students also are required to have prior research experience, such as in BIOC:3993 Undergraduate Biochemistry Research, URES:3994 Undergraduate Research and Creative Projects, or HONR:3994 Honors Research Practicum, and permission of the instructor. Students can only count 6 s.h. in BIOC:4999 toward their requirements for the degree.

Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.

To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Teacher Education Program Application and Admission on the College of Education website for details on requirements and

deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

Combined Programs

B.S./Ph.D.

The combined Bachelor of Science/Doctor of Philosophy in biochemistry program permits students to transition into the Ph.D. program during their senior year and to count 12 s.h. of credit toward both the B.S. and Ph.D. requirements. The combined program provides a research-intensive experience and shortens the training time for students interested in pursuing independent biochemistry research careers. Students in the program receive financial support during the second half of their senior year and throughout their Ph.D. study.

Students must be pursuing a Bachelor of Science with a major in biochemistry, and by the beginning of their senior year they must:

- have 108 s.h. of undergraduate credit;
- have a minimum g.p.a. of 3.50;
- have completed four semesters of research experience (summer research counts as one semester); and
- have completed BIOC:3120 Biochemistry and Molecular Biology I, BIOC:3130 Biochemistry and Molecular Biology II, and BIOC:3140 Experimental Biochemistry.

Students interested in the combined program should speak with their academic advisor and the biochemistry honors advisor during their first year or at the beginning of their sophomore year. Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information, contact the Department of Biochemistry.

Honors

Honors in the Major

Students have the opportunity to graduate with honors in the major. They must maintain a cumulative University of Iowa g.p.a. of at least 3.33 and a g.p.a. of at least 3.33 in work for the major. They must earn 6 s.h. in BIOC:4999 Advanced Undergraduate Biochemistry Research and present their research results in a honors thesis written in the form of a journal article and in an oral report given at a special open departmental seminar.

University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the University's honors program.

Membership in the UI Honors Program is not required to earn honors in the biochemistry major.

Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay

on the University's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Before the third semester begins: CHEM:1110 Principles of Chemistry I, CHEM:1120 Principles of Chemistry II, MATH:1850 Calculus I, and MATH:1860 Calculus II

Before the fifth semester begins: BIOL:1411 Foundations of Biology, BIOL:1412 Diversity of Form and Function, CHEM:2210 Organic Chemistry I or CHEM:2230 Organic Chemistry I for Majors, CHEM:2220 Organic Chemistry II or CHEM:2240 Organic Chemistry II for Majors, and CHEM:2410 Organic Chemistry Laboratory or CHEM:2420 Organic Chemistry Laboratory for Majors

Before the seventh semester begins: PHYS:1611 Introductory Physics I or PHYS:1511 College Physics I, PHYS:1612 Introductory Physics II or PHYS:1512 College Physics II, BIOC:3150 Development of Senior Research Project, one semester of BIOC:3993 Undergraduate Biochemistry Research for students planning to take BIOC:4999 Advanced Undergraduate Biochemistry Research, BIOC:3120 Biochemistry and Molecular Biology I, BIOC:3130 Biochemistry and Molecular Biology II, BIOC:3140 Experimental Biochemistry, two science electives, and at least 90 s.h. earned toward the degree

Before the eighth semester begins: CHEM:4431 Physical Chemistry I or CHEM:4432 Physical Chemistry II or BIOC:4241 Biophysical Chemistry I or BIOC:4242 Biophysical Chemistry II, a science elective, and at least 3 s.h. of BIOC:4999 Advanced Undergraduate Biochemistry Research

During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate

Biochemistry graduates with bachelor's degrees often work as research assistants in industry, government, education, or health services; teach in secondary schools; or go on to advanced study in medicine, dentistry, or other areas. The program offers solid preparation for careers in medicine, biology, chemistry, dentistry, research, or related sciences. About one-third of biochemistry majors go on to study medicine; others enter graduate programs or professional degree programs.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Biochemistry, M.S.

Students admitted to graduate study in biochemistry usually pursue the Doctor of Philosophy.

Requirements

The Master of Science program in biochemistry requires a minimum of 32 s.h. of graduate credit, thesis research, and a thesis. See Ph.D. in biochemistry [p. 1685] for information about the graduate curriculum.

Admission

Most graduate students in biochemistry work toward a Doctor of Philosophy. Applicants who wish to earn a master's degree must contact the Department of Biochemistry before they apply.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Biochemistry, Ph.D.

Requirements

The Doctor of Philosophy in biochemistry requires a minimum of 72 s.h. of graduate credit (34 s.h. of coursework and 38 s.h. of research). Students must maintain a cumulative g.p.a. of at least 3.00 to earn the degree. Qualified students interested in earning the Doctor of Medicine along with the Ph.D. may apply to the Medical Scientist Training [p. 1711] Program, which offers a combined M.D./Ph.D. program.

Students have the opportunity to tailor their curriculum with courses that enhance their educational goals. They take a combination of graduate-level courses that include a first-year laboratory research rotation course, and seminar courses.

The Ph.D. with a major in biochemistry requires the following coursework.

Core Curriculum

Code	Title	Hours
BIOC:5261	Research Techniques (first-year laboratory rotation)	1-6
BIOC:5282	Seminar	0-2
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0
Biophysical chemistry coursework (typically students take 6 s.h.)		3-6
Four molecular medicine courses		6-8
Additional courses offered by the Department of Biochemistry and other departments, as appropriate for each student		

Typical Curriculum

First Year, Fall

Code	Title	Hours
BIOC:5241	Biophysical Chemistry I	3
BIOC:5261	Research Techniques	4
BIOC:5282	Seminar (discussion section 1)	2
BMED:5207	Principles of Molecular and Cellular Biology	3

First Year, Spring

Code	Title	Hours
BIOC:5242	Biophysical Chemistry II	3
BIOC:5261	Research Techniques	4
BIOC:5282	Seminar (discussion section 1)	2
MMED:6215	Transcription and Multifunctional Regulation by RNA	1
MMED:6226/ ACB:6226/ MPB:6226	Cell Cycle Control	1

MMED:6227/ ACB:6227/ MPB:6227	Cell Fate Decisions	1
-------------------------------------	---------------------	---

Second Year, Fall

Code	Title	Hours
BIOC:5282	Seminar (discussion section 2)	1
BIOC:7292	Research Biochemistry	arr.
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0

Electives

Second Year, Spring

Code	Title	Hours
BIOC:7292	Research Biochemistry	arr.
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0

Electives

Examples of Elective Coursework

Code	Title	Hours
BME:4310/ BIOC:4310	Computational Biochemistry	3
BMED:5207	Principles of Molecular and Cellular Biology	3
MMED:6215	Transcription and Multifunctional Regulation by RNA	1
MMED:6220/ ACB:6220/ MPB:6220	Mechanisms of Cellular Organization	3
MMED:6225/ ACB:6225/ MPB:6225	Growth Factor Receptor Signaling	1
PCOL:5204	Basic Biostatistics and Experimental Design	1
PCOL:6210	Receptors and Cell Signaling	3

Additional Requirements

Laboratory Rotations

Students rotate through at least three different laboratories during their first academic year; they enroll in BIOC:5261 Research Techniques. The laboratory rotations are approximately ten weeks each. At the conclusion of each rotation, a student meets with an advisory committee of three faculty members. A student is required to present the research and training completed during that rotation. The advisory committee writes a short evaluation of the student's performance and assigns a grade for the laboratory work. The evaluation and grade becomes part of the student's departmental record.

Teaching

Students participate in the formal teaching programs of the department for at least one semester. First-year students as well as students who are within a year of receiving their Ph.D. degree are usually not asked to teach. Teaching may take a variety of forms, including tutoring, leading discussions

and laboratory groups, correcting examinations, preparing teaching materials, and lecturing.

Thesis Research Proposal

During the fall semester of the second year, a student in collaboration with the thesis advisor prepares a detailed thesis proposal that describes the proposed research to be conducted for the dissertation as part of BIOC:5282 Seminar.

The Fifth Semester Seminar

In the fall semester of the third year (the fifth semester), a student updates and revises the written Ph.D. thesis proposal prepared during the fall semester of the second year (prior to the comprehensive examination), and presents a seminar on the thesis research to the department at one of the weekly biochemistry workshops.

Comprehensive Examination

The comprehensive examination must be taken before June 30 of the second year.

Written Examination

Students receive their topic by March 1 and their written examination is submitted to their committee by April 22. The written proposal should have a cover page followed by no more than 20 pages. For more information, a detailed guide is located in the Department of Biochemistry Graduate Student Manual.

Oral Examination

Questions during the oral examination may come from the examination proposal, the Ph.D. thesis proposal, or other general areas of biochemistry. To pass the oral comprehensive examination, a student must perform satisfactorily both in defense of the examination proposal and in answering general biochemistry questions that are germane to the proposal or that are important for a full understanding of the proposed experiments and their interpretation.

Final Examination

The five-member Ph.D. thesis committee serves as an advisory body for preparation of the thesis. This committee meets with the student to review the material that is expected to be incorporated in the thesis. Although meetings of the candidate with the committee should be yearly, the candidate, thesis advisor, or the committee can request a meeting at any time. A final draft of the thesis must be given to all members of the committee two weeks before the final examination. The final examination takes the form of a seminar presented to the department. This presentation is announced according to the Graduate College policy. Questions, comments, and discussion will follow. After the seminar, the candidate meets with the committee for the final thesis defense. The Ph.D. degree is not awarded until the thesis is signed. In some cases revisions may be required.

Combined Programs

Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in biochemistry in a combined degree program offered by the Department Biochemistry and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined

degree program. See the Medical Scientist Training Program [p. 1711] (Carver College of Medicine) in the Catalog.

Admission

Applicants must have a baccalaureate degree from a regionally accredited U.S. college or university, or an equivalent degree from another country as determined by the Office of Admissions. Those who apply also must have an undergraduate g.p.a. of at least 3.00. Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Appropriate preparation includes one-year, college-level courses in organic and physical chemistry, biology, physics, and mathematics through calculus. Students are expected to have had one or more introductory courses in biochemistry.

Financial Support

Students admitted to the Ph.D. program in biochemistry routinely receive a stipend and tuition support.

Career Advancement

Graduates have secured a variety of career positions, including in academic institutions and the government, and as scientists, physicians, lecturers, and science educators. Some go on to pursue postdoctoral or additional training, and others land jobs in business and industry.

Dermatology

Chair

- Janet A. Fairley

Faculty: <https://medicine.uiowa.edu/dermatology/people/primary-appointments>

Website: <https://medicine.uiowa.edu/dermatology/>

The Department of Dermatology instructs M.D. students and trains dermatology residents in the care of patients with skin diseases. It also provides researchers with an opportunity to develop their skills in dermatology.

M.D. Training

The Department of Dermatology rotation is one of seven selective courses offered to third- and fourth-year medical students. Students spend two weeks in the clinic and attend approximately 10 one-hour lectures. They see a good cross-section of patients, including those receiving primary or tertiary care at University of Iowa Hospitals & Clinics and Iowa River Landing as well as a large number of patients referred from Student Health. Additional patients also are seen at the nearby Iowa City VA Health Care System.

Varied electives are open to fourth-year M.D. students, including further clinical experience, dermatologic research, and special studies.

Courses

Dermatology Courses

- DERM:8301 Clinical Dermatology** **2 s.h.**
Basic dermatology; lectures, independent study, clinical experience. Requirements: third-year M.D. enrollment.
- DERM:8401 Dermatology Elective** **arr.**
Advanced clinical experience, dermatologic surgery, special assignments. Requirements: fourth-year M.D. enrollment.
- DERM:8497 Research in Dermatology** **arr.**
General principles of medical research; clinical or laboratory projects; individual study.
- DERM:8498 Dermatology On Campus** **arr.**
Clinical clerkship; individually arranged by student with departmental approval.
- DERM:8499 Dermatology Off Campus** **arr.**
Arranged by student with departmental approval.

Dietary

Executive Associate Dean

- Patricia L. Winokur

Graduate degree: M.C.N.

Graduate certificate: dietetic internship program

Website: <https://uihealthcare.org/education/university-iowa-master-clinical-nutrition-program>

The dietary program is committed to patient care through dietitian service, research, and education.

Graduate-level courses for the Master of Clinical Nutrition degree are administered by the Carver College of Medicine and the College of Public Health.

Programs

Graduate Programs of Study

Major

- Master of Clinical Nutrition [p. 1689]

Certificate

- Certificate in Dietetic Internship Program [p. 1691]

Courses

Dietary Courses

DIET:9101 Advanced Medical Nutrition Therapy I 3 s.h.

Nutritional impact on health and disease as it relates to physiology and biochemistry with an emphasis on medical nutrition therapy and the relationship to various disease states. Requirements: enrollment in Master of Clinical Nutrition program.

DIET:9102 Advanced Medical Nutrition Therapy II 3 s.h.

Continuation of DIET:9101; review of the nutritional impact on health and disease as it relates to physiology and biochemistry with an emphasis on medical nutrition therapy and the relationship to various disease states. Requirements: enrollment in Master of Clinical Nutrition program.

DIET:9200 Nutrition Assessment 3 s.h.

Study of nutrition assessment methods including dietary intake, anthropometric and biochemical measures, as well as nutrition focused physical examination; utilization of nutrition care process including nutrition assessment, diagnosis, interventions, monitoring, and evaluation with individuals, groups, or populations. Requirements: enrollment in Master of Clinical Nutrition program.

DIET:9203 Clinical Dietetics 1 s.h.

Nutritional aspects of health and disease, with emphasis on medical nutrition therapy; human nutrition in the clinical state as it relates to physiology and biochemistry.

DIET:9300 Critical Care and Nutrition Support 3 s.h.

Advanced enteral and parenteral nutrition in an acute care setting; indications, calculations, potential complications, and ethical consideration of nutrition support. Requirements: enrollment in Master of Clinical Nutrition program.

DIET:9400 Pediatric Nutrition 3 s.h.

Examination of physiological, biochemical, and nutritional aspects of disease processes relevant to infants and children up to 18 years of age; emphasis on evidence-based medical nutrition therapy for a variety of disease states. Requirements: enrollment in Master of Clinical Nutrition program.

DIET:9501 Supervised Experiential Learning I 3 s.h.

Supervised hands-on training at the bedside in inpatient units, and in outpatient clinics, communities, and food service management; completion of coursework specific to Registered Dietitian and Nutritionist (RDN) training while learning in field (e.g., ServSafe certification, diet meals, event planning, professional issues and trends). Requirements: enrollment in Master of Clinical Nutrition program.

DIET:9502 Supervised Experiential Learning II 3 s.h.

Supervised hands-on training at the bedside in inpatient units, and in outpatient clinics, communities, and food service management; completion of coursework specific to Registered Dietitian and Nutritionist (RDN) training while learning in field (e.g., legislative and regulatory issues, research seminar, clinical rounds, Commission on Dietetic Registration portfolio development, RDN licensure and credentialing). Requirements: enrollment in Master of Clinical Nutrition program.

DIET:9600 Management in Foods and Nutrition 3 s.h.

Application of the principles of health care management as it pertains to food and nutrition including budgeting, cost control, and financial analysis; clinical coding and billing; quality and performance improvement measures; human resource management; and operating plan development. Requirements: enrollment in Master of Clinical Nutrition program.

Master of Clinical Nutrition, M.C.N.

The Master of Clinical Nutrition program inspires and educates students to be leaders in clinical nutrition through innovative and interprofessional graduate education as a Registered Dietitian Nutritionist (RDN).

The program is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics (AND).

Requirements

The graduate Master of Clinical Nutrition (M.C.N.) requires 36 s.h. of credit. Students must maintain a cumulative g.p.a. of at least 2.50 in major coursework. The degree requires no thesis.

The M.C.N. is a 20-month program of study. After successful completion of the program, students earn the degree and receive a verification statement that provides eligibility to take the Commission on Dietetic Registration (CDR) Entry-Level Registration Examination for Dietitians.

The Master of Clinical Nutrition requires the following work.

Code	Title	Hours
First Year, Fall Semester		
DIET:9101	Advanced Medical Nutrition Therapy I	3
DIET:9200	Nutrition Assessment	3
EPID:6360	Nutrition Intervention in Clinical Trials Research	2
EPID:6370	Nutrition Intervention in Research Lab	3
First Year, Spring Semester		
DIET:9102	Advanced Medical Nutrition Therapy II	3
EPID:6330	Global Nutrition Policy	2
EPID:6350	Nutritional Epidemiology	2
HHP:4310	Sport and Exercise Nutrition	3
First Year, Summer Session		
DIET:9300	Critical Care and Nutrition Support	3
Second Year, Fall Semester		
DIET:9400	Pediatric Nutrition	3
DIET:9501	Supervised Experiential Learning I	3
Second Year, Spring Semester		
DIET:9502	Supervised Experiential Learning II	3
DIET:9600	Management in Foods and Nutrition	3
Total Hours		36

Supervised Experiential Learning

All supervised experiential learning occurs on campus at University of Iowa Hospitals & Clinics, with the exception of community nutrition which occurs in the greater Iowa City community. The rotation schedule is developed according to the following guidelines.

Clinical dietetics (disordered eating, oncology, cardiology, critical care, pediatrics, and outpatient counseling): 18 weeks

Food service management (clinical management, food service, production, business and finance, patient services, and event planning): 11 weeks

Community nutrition: 6 weeks

Admission

Applicants to the M.C.N. program must either have completed a Didactic Program in Dietetic (DPD) or meet the course requirements listed below:

have a baccalaureate degree from a regionally accredited institution in the United States;

have a minimum cumulative g.p.a. of at least 3.00 on a 4.00 scale;

have a cumulative science g.p.a. of at least 3.20 or a science g.p.a. of at least 3.20 on the most recently completed 40 s.h. of biological and chemical science coursework;

submit Graduate Record Examination (GRE) General Test scores to the University of Iowa from Educational Testing Services (ETS) and have a minimum test score at the 25th percentile or higher on each section (verbal, quantitative, and analytical writing) taken within the last 10 years;

have health care or food service work experience in the field;

submit three recommendation letters (two from a collegiate academic reference and one from a health care or food service experience supervisor); and

meet education requirements (see below).

Applicants whose first language is not English must submit official test scores to verify English proficiency. They can do this by submitting official test scores for the Test of English as a Foreign Language (TOEFL) taken within the last two years. In order to review an application, official TOEFL scores must be received from Educational Testing Service. Only the iBT (internet-based test) is accepted. A minimum total score of 93 and a speaking score of 26 is necessary for entry into the program.

Education Requirements

Biological Sciences Coursework

- A complete introductory course sequence in biology (animal or human) or general zoology.
- An animal, exercise, or human physiology course.
- At least three additional upper-level biology or zoology courses. Examples of upper-level courses include cell biology, genetics, immunology, microbiology, molecular biology, pharmacology, anatomy, embryology, endocrinology, histology, or neuroscience.

Chemical Sciences Coursework

- A complete introductory course sequence in inorganic chemistry.
- At least one semester of organic chemistry.
- Introductory or general biochemistry coursework.

Statistical Sciences Coursework

- A general statistics or biostatistics course.

Professional Coursework

- At least one nutrition course such as introductory nutrition, lifespan nutrition, advanced nutrition, or medical nutrition therapy.
- At least one foods course such as foods class and lab, food science, or food chemistry.

Recency of Education Requirements

Additional courses in dietetic or a related area are required to update a degree which was completed five or more years prior to the current application deadline. The number of required credits is outlined below:

5-10 years (3 s.h. of medical nutrition therapy or clinical nutrition).

10 or more years (3 s.h. of medical nutrition therapy, 3 s.h. of physiology, 3 s.h. of biochemistry)

Application Process

Application should be made through the Master of Clinical Nutrition program. All materials for the application, including official Graduate Record Examination (GRE) scores, three recommendations, and college transcripts, must be received by June 1.

Official GRE scores, as well as Test of English as a Foreign Language (TOEFL) scores, should be sent to the University of Iowa using GRE Code 6681.

The University of Iowa online application for admission requires a nonrefundable application fee of \$60 for U.S. applicants and \$100 for international applicants.

Financial Support

The estimated tuition and expenses for the program are listed on the University of Iowa Health Care website; visit the Master of Clinical Nutrition Program Tuition and Expenses web page.

Students should contact the Office of Student Financial Aid for information concerning monetary assistance.

Career Development

The Master of Clinical Nutrition program prepares students to be competent as a registered dietitian nutritionist (RDN).

According to the Occupational Outlook Handbook released by the U.S. Department of Labor Statistics, the employment of registered dietitians and nutritionists is projected to grow 11 percent from 2018 to 2028, at a faster rate than the average for all occupations.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Dietetic Internship Program, Graduate Certificate

Requirements

The Certificate in Dietetic Internship Program is not accepting students at this time.

The graduate certificate requires at least 10 s.h. of credit.

The Certificate in Dietetic Internship Program requires the following coursework.

Code	Title	Hours
All of these:		
DIET:9203	Clinical Dietetics	1
EPID:6330	Global Nutrition Policy	2
EPID:6350	Nutritional Epidemiology	2
EPID:6360	Nutrition Intervention in Clinical Trials Research	2
EPID:6370	Nutrition Intervention in Research Lab	3

Doctor of Medicine

Professional degree: M.D.

Website: <https://medicine.uiowa.edu/md/>

The Doctor of Medicine is a professional degree awarded by the Carver College of Medicine. The college is accredited by the Liaison Committee on Medical Education of the American Medical Association and the Association of American Medical Colleges and meets the requirements of all state licensing boards. Its M.D. diploma admits the holder to all privileges granted to graduates of all medical colleges before such boards.

Programs

Professional Program of Study

Major

- Doctor of Medicine [p. 1693]

Academics Rules and Procedures

Student Promotion

The Carver College of Medicine has established promotion policies and procedures to ensure that each of its graduates has adequate skills, knowledge, judgment, ethical standards, and personal integrity to assume the responsibilities of a medical doctor. The student promotions committee, made up of seven faculty members and two students, performs these duties with the cooperation, advice, and judgment of course directors, faculty members, students, and administrators.

The committee recommends specific actions to be taken when a student's skills, knowledge, judgment, or ethical behavior is in any way considered consistently marginal or unsatisfactory. Possible recommendations include dismissal of the student from the college, suspension for a specified period of time, requiring the student to repeat all or any part of the curriculum on academic probation, and allowing the student to continue on academic probation with a full or partial course load. The committee's recommendations are forwarded for action to the executive dean of the Carver College of Medicine.

Specific information about student promotion policies and procedures is available from the Office of Student Affairs and Curriculum and is online in the Student Handbook.

Leaves of Absence, Withdrawal, Reinstatement

The Carver College of Medicine has established policies regarding leaves of absence, dropping courses, withdrawal from the college, and reinstatement to the college. Information about each of these policies is available on the college's Office of Student Affairs and Curriculum website and is published annually in the Student Handbook.

Disputes and Complaints

Student complaints concerning actions of faculty members or departments are pursued first through mechanisms established in the Carver College of Medicine. These procedures allow the greatest flexibility for all concerned in resolving a conflict. They are intended for situations such

as grading disputes, alleged academic dishonesty, alleged dishonesty during a clinical rotation, alleged unethical or unprofessional conduct, and perceived discrimination or harassment.

Complaints regarding sexual harassment are handled confidentially in accordance with University policy and procedures; see the University's Policy on Sexual Harassment.

For information about the established informal mechanisms, contact the Office of Student Affairs and Curriculum or see the Student Handbook.

Doctor of Medicine, M.D.

Requirements

The Doctor of Medicine is a four-year program that prepares students to practice primary care medicine and to pursue further education and training in specialized areas of medicine. The program admits 152 new students each year.

The M.D. curriculum is built on a triple-helix model whose three strands extend through all four years of medical school: the clinical and professional skills strand, the mechanisms of health and disease strand, and the medicine and society strand.

Clinical experiences begin during the first few weeks of medical school, and clinical clerkships start after just three semesters of preclinical instruction. By the end of the fifth semester, students have completed all of their core requirements and have the remaining three semesters to tailor their educational experience in preparation for their selected specialty.

Students complete in-depth clinical coursework and serve clinical clerkships primarily at University of Iowa Hospitals & Clinics, the Iowa City VA Health Care System, and the Des Moines Area Medical Education Consortium. Students also may have opportunities to gain experience in private medical offices and community hospitals.

At the conclusion of medical school, students will match into a residency program and complete their training in a chosen specialty.

Preclinical Curriculum (Phase I)

The first three semesters of the M.D. program present an integrated core of sciences basic to the study of medicine. They also introduce students to the foundations of clinical practice.

Coursework includes human anatomy, foundations of cellular life, clinical and professional skills (a three-course series), medicine and society (a three-course series), and mechanisms of health and disease (a five-course series). Each of these courses is described below.

Some elective courses are available to students during the first and second years, normally for 1 or 2 s.h. of credit. Topics include areas not specifically covered in the regular curriculum and areas related to medical practice and the role of the physician. Courses vary from year to year, but typical subject areas are global health issues, U.S. health care systems, and community health outreach.

The M.D. program's preclinical curriculum requires the following coursework.

First Semester

ACB:8101 Medical Gross Human Anatomy: complete dissection of the body with regional emphasis stressing relationships to the living system; clinically relevant areas of radiologic imaging, surface anatomy, embryology, and clinical correlations; anatomical knowledge through lectures, small group work, and independent activities.

MED:8121 Clinical and Professional Skills I: introduction to concepts of clinical reasoning, communication, physical examination, and evidence-based clinical practice; principles of biomedical ethics; early clinical interactions and placement

of classroom experiences into the context of patient care through the Early Clinical Experiences (ECE) program; interactions with students from other health sciences colleges to explore the interprofessional approach to caring for patients.

MED:8122 Medicine and Society I: delivery of individual disease prevention/health promotion services; introduction to social determinants of health; influence and impact of culture and community on health care; community resources; students apply health and risk assessment to individual patients and to themselves.

MED:8123 Foundations of Cellular Life: genetics, embryology, molecular biology, biochemistry, cell biology and histology; molecular events required for cellular life; how cells grow and interact to form basic tissues of the human body; framework necessary for exploring the mechanisms of health and disease.

MED:8124 Mechanisms of Health and Disease I: normal and healthy processes within and among mechanisms of oxygenation, metabolism, and genetics/development.

Second Semester

MED:8131 Clinical and Professional Skills II: reinforcement of clinical reasoning concepts introduced in MED:8121 and introduction of additional concepts; application of concepts through interactions with standardized patients and through clinical visits; varied experiences help students gain a deeper appreciation for issues in biomedical ethics; strengths and barriers involved in providing comprehensive interdisciplinary patient care.

MED:8132 Medicine and Society II: knowledge and skills related to health promotion and disease prevention from a medicine and society perspective, including impact of behavior, environment, culture, and socioeconomic; identification of major public health problems associated with mechanisms of health and disease; focus on public health and epidemiology, with attention to screening, global health, and environmental hazards.

MED:8133 Mechanisms of Health and Disease II: normal and healthy processes within and among mechanisms of immunology/inflammation, locomotion/integument, and neuropsychiatry.

MED:8134 Mechanisms of Health and Disease III: abnormalities or disruptions leading to disease within and among mechanisms of oxygenation, metabolism, and genetics/development.

Third Semester

MED:8221 Clinical and Professional Skills III: advanced clinical reasoning skills gained through focused patient encounters and interactions with special patient populations; emphasis on students' ability to integrate and use concepts from the M.D. curricular strands that are required for cost-conscious, patient-centered, interdisciplinary care.

MED:8222 Medicine and Society III: health services organization and delivery, with emphasis on community dimensions of medical practice and patient safety.

MED:8223 Mechanisms of Health and Disease IV: abnormalities or disruptions leading to disease within and among mechanisms of immunology/inflammation, locomotion/integument, and neuropsychiatry.

MED:8224 Mechanisms of Health and Disease Keystone: transition from classroom instruction in MED:8124, MED:8133,

MED:8134, and MED:8223 to clinical practice; foundational information from those courses approached from the perspective of common clinic encounters; diagnostic and management decisions about common important clinical problems using the foundational knowledge gained from those courses.

Clinical Curriculum (Phase II and III)

Students complete one week of skills training in MED:8320 Transition to Clerkships prior to the start of clinical clerkships. The two-and-a-half year clinical component of the medical curriculum is comprised of supervised hands-on clinical training at the bedside on in-patient units, in outpatient clinics, and in communities throughout the state. In contrast to the preclinical semesters, the clinical years vary according to a student's individual needs. This period of training begins in January of the second year with 44 weeks of core clerkships (Phase II). Students then enter various pathways where they complete a minimum of 10 weeks of selectives, four weeks of emergency or critical medicine, one four-week subinternship, and 32 weeks of advanced electives (Phase III).

After completing the core clerkships, students must successfully complete Step 1 of the United States Medical Licensing Examination (USMLE) before they may be promoted to the pathways component of the curriculum. Students take Step 2 of the USMLE during their fourth year of the M.D. program, and must pass both Step 2 exams in order to graduate.

Primary venues for clinical training of medical students include University of Iowa Hospitals & Clinics, the Iowa City VA Health Care System, and the Des Moines Area Medical Education Consortium. Students also participate in the family practice preceptorship and the community-based primary care clerkship, which are off-campus rotations. Other courses also may be assigned to off-campus sites.

The M.D. program's clinical curriculum requires the following clerkships and selectives.

Generalist Core (Phase II)

M.D. students complete the generalist core during the fourth and fifth semesters. It consists of the following 42-44 weeks of clerkships.

Code	Title	Hours
Ambulatory Practice Module		
MED:8301	Community-Based Primary Care (4 weeks; if taken before spring 2021 semester)	4
FAM:8301	Preceptorship in Family Medicine (4 weeks; if taken before spring 2021 semester)	4
FAM:8302	Family and Community Medicine (6 weeks; if taken spring 2021 semester or after)	6
IM:8302	Outpatient Internal Medicine (4 weeks)	4
Internal Medicine/Pediatrics Block		
IM:8301	Inpatient Internal Medicine (6 weeks)	6
PEDS:8301	Clinical Pediatrics (6 weeks)	6

Obstetrics and Gynecology/Surgery Block

OBG:8301	Clinical Obstetrics and Gynecology (6 weeks)	6
SURG:8301	Clinical Surgery (6 weeks)	6

Neurology/Psychiatry Block

NEUR:8301	Clinical Neurology (4 weeks)	4
PSYC:8301	Clinical Psychiatry (4 weeks)	4

Selectives

M.D. students complete 10 weeks of selectives chosen from the following.

Code	Title	Hours
ANES:8301	Clinical Anesthesia (2 weeks)	2
DERM:8301	Clinical Dermatology (2 weeks)	2
OPHT:8301	Clinical Ophthalmology (2 weeks)	2
ORTH:8301	Clinical Orthopedics (2 weeks)	2
OTO:8301	Clinical Otolaryngology (2 weeks)	2
RAD:8301	Clinical Radiology (2 weeks)	2
URO:8301	Clinical Urology (2 weeks)	2

Advanced Required Clerkships (Phase III)

M.D. students complete the following required clerkships and other work during the three advanced clinical-year semesters. In addition to the clerkships, students complete training modules in advanced clinical topics that includes MED:8470 Self-Directed Learning in Advanced Clinical Topics. They also are required to complete the Advanced Objective Structured Clinical Examination (OSCE), administered by the college in a student's final semester.

Code	Title	Hours
	Emergency medicine or critical care medicine (4 weeks)	
	Advanced inpatient subinternship (4 weeks)	
	Advanced electives (total of 32 weeks)	

Combined Programs

Students must be admitted to both of the individual degree programs before they may be admitted to a combined degree program. Those interested in the combined programs must make arrangements with the appropriate departments and with the Carver College of Medicine associate dean for student affairs and curriculum.

M.D./J.D.

The Carver College of Medicine and the College of Law offer the combined Doctor of Medicine/Juris Doctor program; see Juris Doctor, J.D. [p. 1650] in the Catalog.

M.D./M.B.A. (Professional Program)

The College of Medicine collaborates with the Tippie College of Business to offer the combined Doctor of Medicine/Professional Master of Business Administration Program.

For more information about the M.B.A., see the M.B.A. Professional Program in the Master of Business Administration, M.B.A. [p. 1227] section of the Catalog.

M.D./M.P.H.

The College of Medicine collaborates with the College of Public Health to offer the combined Doctor of Medicine/Master of Public Health program; see the Master of Public Health, M.P.H. [p. 1889] in the Catalog.

M.D./Ph.D. (Medical Scientist Training Program)

The Carver College of Medicine offers a combined M.D./Ph.D. program for students who are interested in a career that combines clinical and academic medicine with basic and clinical research; see the Medical Scientist Training Program [p. 1711] in the Catalog.

Admission

The Carver College of Medicine participates in the American Medical College Application Service (AMCAS), a nonprofit centralized application processing service for applicants to U.S. medical schools. AMCAS applications are available for completion in May of the year preceding the beginning of the class for which application is being made. Prospective students are urged to apply as early as possible. The deadline for AMCAS submission is November 1.

Secondary applications are forwarded to applicants whose AMCAS applications pass a review conducted by the college.

Admitted applicants must have an official transcript from each college they have attended sent to the University's Office of Admissions.

Technical Standards for Admission and Retention

The College of Medicine seeks candidates who will be able to best serve the needs of society and strives to graduate skilled and effective physicians. To achieve this goal, the following principles and technical standards will be applied to candidates for admission and continuing students. Review the current Technical Standards on the Carver College of Medicine Admissions website.

Admission Requirements

Applicants for admission to the Carver College of Medicine must have a bachelor's degree, or they must be enrolled in a bachelor's degree program with the expectation of receiving their degree before enrolling in the Carver College of Medicine. Applicants should refer to the Carver College of Medicine Admissions website for current admission requirements.

All students who enter the Carver College of Medicine are required to comply with the pre-entrance and annual health screening program developed by the University of Iowa Student Health in cooperation with University of Iowa Hospitals & Clinics; see Student Requirements and Forms on the Student Health website.

All registered Carver College of Medicine students are required to maintain health insurance (or an equivalent care plan) that satisfies minimum standards of coverage. Insurance

coverage must be maintained continuously throughout each year of attendance at the University.

Financial Support

The Carver College of Medicine's philosophy is that no student should be denied a medical education due to a lack of financial resources. The college's financial services staff actively seeks sources of aid so that every student interested in a medical education will be able to finance that education.

Financial assistance is provided by the Carver College of Medicine primarily on the basis of demonstrated financial need. Although a limited number of collegiate or institutional grants are available for the most economically disadvantaged students, most aid is in the form of loans. Examples of federal loan programs are the Federal Direct Unsubsidized Stafford/Ford Student Loan, the Federal Direct Grad PLUS loan, and the Primary Care Loan (PCL). Students also may qualify for collegiate loans or private loans to supplement their financial aid package.

In addition, the college supports scholarship and loan programs through permanent endowments and/or contributions from alumni and friends of the Carver College of Medicine. These funds are administered by the college's financial services staff and are awarded as a part of a student's total financial aid package. Funds to support short-term emergency loans are available for students with immediate financial need.

A small number of Dean's Scholarships are awarded by the college's admissions office to highly qualified candidates on the basis of their academic excellence, leadership abilities, and their potential to enrich the college. Dean's Scholarships are included in the recipient's overall financial aid package. About 15 percent of students enrolled in each class receive some level of Dean's Scholarship.

The Carver College of Medicine has a fully integrated Financial Literacy Program, CCOMmon Cents, which provides medical students the knowledge, tools, and resources to better understand the financial aid process, to manage their student loans more effectively, to make better informed decisions, and to encourage students to minimize their educational debt whenever possible. This program also strives to help students reach their personal financial goals while pursuing their medical education.

To learn more about financial aid, contact the Carver College of Medicine Financial Services office.

Career Advancement

An interest in science, the healing arts, helping people, and medical research can lead to a great number of satisfying careers. For information about career options in health care, review the Road to Becoming a Physician on the College of Medicine website and the Occupational Outlook Handbook on the United States Department of Labor Bureau of Labor Statistics website.

Emergency Medicine

Chair

- Andrew Nugent

Faculty: <https://medicine.uiowa.edu/emergencymedicine/people/primary-appointments>

Website: <https://medicine.uiowa.edu/emergencymedicine/>

The Department of Emergency Medicine prepares new physicians to recognize and treat a variety of urgent and emergent conditions. The program fosters basic science and clinical research relevant to emergency medicine and is dedicated to the education and training of Emergency Medical Services (EMS) personnel through the Emergency Medical Services Learning Resources Center (EMSLRC).

Resources

The Emergency Department, located on the first floor of Roy J. Carver Pavilion, is a Level I Adult and Pediatric Trauma Center. It serves as a referral center for communities across Iowa.

M.D. Training

Elective rotations for Doctor of Medicine students are available at University of Iowa Hospitals & Clinics and at several other sites throughout Iowa, including St. Luke's Hospital, Cedar Rapids; Great River Health, Burlington; MercyOne Waterloo Medical Center, Waterloo; Broadlawns Medical Center, Des Moines; UnityPoint Health, Des Moines; and Genesis Medical Center, Davenport. Students also may arrange an off-service elective independently with established residency programs throughout the United States.

The program offers an annual introductory month to emergency medicine; advanced life support; Wilderness Medicine, a rotation that includes scenario and didactic training in wilderness medicinal skills with travel to areas such as Colorado; and a two- or four-week toxicology elective.

Residency

The emergency medicine faculty directs the Emergency Medicine Residency, Iowa's only emergency medicine residency. The residency is a three-year program that prepares residents for careers in diverse areas of emergency medicine, from rural practice to academics. The program emphasizes critical care training and rotations in a wide variety of specialties. Part of the clinical component is spent at St. Luke's Hospital, Cedar Rapids.

Courses

Emergency Medicine Courses

EM:8401 Advanced Life Support 4 s.h.
Experience managing acute threats to life—including trauma, respiratory failure, poisoning, sepsis, stupor/coma, and acute MI—using ACLS and PALS courses and clinical manikin work with EMS staff. Requirements: completion of M.D. core clerkship year.

EM:8402 Emergency Medicine UIHC arr.
Preceptorship with residents and faculty; emphasis on principles of acute medicine; clinical shifts, case conferences, simulations, exams.

EM:8403 Wilderness Medicine 4 s.h.
Didactic and scenario training in physiology, diagnosis, and emergency treatment of heat- and cold-related illnesses, high altitude disorders, wilderness trauma, envenomations, and immersion injuries. Taught in wilderness areas. Requirements: completion of M.D. third year.

EM:8404 Emergency Medicine: St. Luke's, Cedar Rapids 4 s.h.
Preceptorship with full-time emergency department physicians; clinical shifts, case conferences, simulations, exams.

EM:8405 Rural Emergency Medicine at Burlington, Iowa 4 s.h.
In-depth clinical experience in a busy rural hospital emergency department under supervision of residency-trained emergency physicians; lectures, skill labs, projects.

EM:8406 Emergency Medicine Des Moines 4 s.h.
Participation in acute emergency care, management of acute illnesses, follow-up care when possible; Broadlawns Hospital, Des Moines.

EM:8407 Emergency Medicine Waterloo 4 s.h.
Participation in acute emergency care, management of acute illnesses, follow-up care when possible; Covenant Medical Center, Waterloo.

EM:8409 Introduction to Advanced Life Support 2 s.h.
Intensive program providing basic training in life support skills, experience in procedures common to inpatient hospital environment, and practice with simulated critical care scenarios; lectures, small group discussions, procedure labs, high-fidelity simulations, and self-directed online learning; students become certified in Advanced Cardiac Life Support (ACLS).

EM:8410 Medical Toxicology Sioux City 2,4 s.h.
Clerkship at the Iowa Poison Control Center; intense introduction to breadth and depth of medical toxicology; students work independently and concentrate on many different areas and interests; work with a multidisciplinary team of nurses, pharmacists, and physicians; activities may include reviewing and presenting active poisoned patient cases during daily rounds and opportunities to see toxicology patients at bedside; preparation and short presentation in any area of medical toxicology. Requirements: M.D. enrollment.

EM:8411 Medical Toxicology UIHC 2,4 s.h.
In-depth introduction to medical toxicology; how to recognize and treat various toxidromes and the most common toxicologic exposures; initial management steps for life-threatening toxicologic exposures; focus on basics of pathophysiology and pharmacology to understand how drugs affect patients, and critical assessment of laboratory and other data obtained on the poisoned patient.

EM:8412 Emergency Medicine Unity Point Des Moines 4 s.h.
Clinical shifts in emergency department and emergency medicine related didactics; advanced cardiovascular life support (ACLS), airway management, calling a consult/communication, chest pain, toxicology, trauma, sepsis, ultrasound, febrile infant, headache, and psychobehavioral disorders.

EM:8413 Emergency Medicine Genesis Davenport 4 s.h.

Clinical shifts in emergency department and emergency medicine related didactics; advanced cardiovascular life support (ACLS), airway management, calling a consult/communication, chest pain, toxicology, trauma, sepsis, ultrasound, febrile infant, headache, and psychobehavioral disorders.

EM:8497 Research in Emergency Medicine arr.

Medical research, clinical or laboratory projects; individual study.

EM:8498 Emergency Medicine On Campus arr.

Clinical research experience with a mentor in the Emergency Treatment Center and the Department of Emergency Medicine; principles of design, methodology, basic statistics.

EM:8499 Emergency Medicine Off Campus arr.

Preceptorship with residents and faculty; emphasis on principles of acute medicine; Liaison Committee on Medical Education (LCME) accredited off-campus site. Requirements: completion of M.D. third year and approval from UIHC Emergency Medicine clerkship director.

Family Medicine

Interim Chair

- Daniel S. Fick

Faculty: <https://medicine.uiowa.edu/familymedicine/people>

Website: <https://medicine.uiowa.edu/familymedicine/>

The Department of Family Medicine is nationally recognized for excellence in patient care, teaching, and research. The department is dedicated to providing primary care for the citizens of Iowa, educating medical students, training resident physicians, providing continuing education, and creating new knowledge to improve primary care and health care delivery systems.

M.D. Training

The Department of Family Medicine trains primary care physicians. The department offers coursework that is included throughout the four-year M.D. program. Twenty-one elective senior rotations give students opportunities for exposure to various Iowa communities through work in affiliated hospitals or connected facilities, in the department's model office on the University of Iowa campus, and in preceptorships with selected family physicians throughout the state. Students also have the opportunity for independent study during the fourth year.

Residency

Family Medicine Residency

The Department of Family Medicine directs a three-year residency program whose graduates are eligible for certification by the American Board of Family Medicine. The residency program trains physicians to provide continuous and comprehensive medical care to patients and their families. Residents are educated in all areas of family medicine—adult medicine, maternal and child health, behavioral science, surgical specialties, and community medicine. Training emphasizes the value of wellness and preventive medicine as well as curative medicine.

The program is organized as a progressive educational experience. It consists of formal teaching and clinical experiences on assigned rotations, structured conferences, and patient care in the Family Medicine Clinic. As residents develop clinical skills, medical judgment, and competence, their patient responsibilities increase. Some patients at the Family Medicine Clinic are assigned to residents, who provide medical care under faculty supervision. Residents are responsible for their patients for the duration of the residency program.

Residents also learn the principles of practice management, including organizational and administrative decision making, patient record and bookkeeping procedures, and chart auditing methodologies.

Residents are expected to take responsibility for their learning environment, to avail themselves of the department's diverse resources, and to collaborate with the faculty in order to have the best possible learning experience.

Family Medicine–Psychiatry Residency

The Department of Family Medicine and the Department of Psychiatry cosponsor the combined Family Medicine–Psychiatry Residency program. The program's residents acquire broad-based training in both disciplines, including focused training in geriatrics and geriatric psychiatry, substance and alcohol abuse, diagnosis and treatment of depression, delirium, eating disorders, panic disorders, and neurotic and somatizing behavior. Graduates are eligible for certification by the American Board of Family Medicine and the American Board of Psychiatry and Neurology.

Facilities

The Department of Family Medicine is located on the University of Iowa health sciences campus. Faculty offices are close to the Family Medicine Clinic, where patients are seen by appointment. The department also has community-based clinics in southeast Iowa City, Coralville, Muscatine, North Liberty, and Riverside, Iowa.

Courses

Family Medicine Courses

FAM:8005 Medical Education Community Orientation **0 s.h.**

Experience in a local health care delivery system away from the University setting, between first and second year of M.D. program.

FAM:8301 Preceptorship in Family Medicine **arr.**
One-on-one experience with a practicing physician; exposure to illnesses, conditions often seen in primary care; realistic background for evaluation of family medicine as a career alternative.

FAM:8302 Family and Community Medicine **6 s.h.**
One-on-one experience with a practicing physician; exposure to illnesses and conditions often seen in primary care; realistic background for evaluation of family medicine as a career alternative; clinical activities, work with community agencies and resources; didactic and conferences.

FAM:8401 Advanced Inpatient Subinternship in Family Medicine, University of Iowa **arr.**
Inpatient aspects of family medicine's key components; experience on the family medicine inpatient service.

FAM:8402 University of Iowa Family Medicine Clerkship **2,4 s.h.**
Work with family practice residents and staff in day-to-day delivery of primary medical care at Family Practice Center; experience in the Family Stress Clinic observing family-centered counseling; nursing home visits, work with departmental social worker and sports medicine specialist.

FAM:8403 Advanced Preceptorship in Family Medicine **2,4 s.h.**
Experience in community practice of family medicine.

FAM:8405 Geriatrics Elective **arr.**
Experience in monitoring and evaluating health and functional status of patients age 65 and older in the UI Geriatric Assessment Clinic and community settings.

- FAM:8406 Advanced Inpatient Subinternship in Family Medicine, Cedar Rapids** 4 s.h.
Experience as a junior resident in all areas of inpatient family medicine, including maternity care, child and adolescent health, adult medicine.
- FAM:8407 Clerkship in Family Medicine, Cedar Rapids** 4 s.h.
Experience as a junior resident in all areas of family medicine, including maternity care, child and adolescent health, adult medicine.
- FAM:8408 Family Medicine Clerkship, Broadlawns Hospital, Des Moines Family Health Center** 4 s.h.
Clinical experience in inpatient and outpatient care.
- FAM:8409 Advanced Inpatient Subinternship in Family Medicine, Iowa Lutheran** 4 s.h.
Patient-oriented interactive experience in an inpatient family practice environment. Requirements: fourth-year M.D. enrollment.
- FAM:8410 Family Medicine, Iowa Lutheran** arr.
Requirements: fourth-year M.D. enrollment.
- FAM:8411 Family Medicine Clerkship, Davenport** 4 s.h.
Assignment to problems commonly seen in family practice office; supervision by residents and faculty for history and physical evaluation and diagnostic workups and treatment of each specific problem; exposure to acutely ill patients in services of medicine, surgery, obstetrics, pediatrics.
- FAM:8412 Advanced Inpatient Subinternship in Family Medicine, Davenport** 4 s.h.
Experience in inpatient family medicine; assessing and managing hospitalized patients, evaluating and treating patients in the emergency room, participating in call coverage with family medicine residents.
- FAM:8413 Family Medicine Geriatrics, Davenport** 4 s.h.
Geriatric, palliative, and end-of-life care issues; assessment of competency in evaluation and management of patients; interdisciplinary nature of geriatric and palliative care.
- FAM:8415 Advanced Inpatient Subinternship in Family Medicine, Sioux City** 4 s.h.
Experience as a junior resident in all areas of family medicine. Requirements: fourth-year M.D. enrollment.
- FAM:8416 Family Medicine Clerkship, Sioux City** 2,4 s.h.
Methods common in family practice medicine; participation in care of patients seen by family practice physicians and residents.
- FAM:8417 Advanced Inpatient Subinternship in Family Medicine, Waterloo** 4 s.h.
Experience working as a member of family practice inpatient team at Allen Memorial Hospital and Covenant Medical Center, following patients from admission through discharge.
- FAM:8418 Family Medicine Clerkship, Waterloo** 4 s.h.
Rotation at the Northeast Iowa Family Practice Center; work with patients from outpatient care through hospitalization; basic concepts of family practice, team concept in medical care.
- FAM:8419 River Crossing Family Medicine Clerkship** 2,4 s.h.
Experience providing patient care in a rural setting; continuity of care for patients of all ages. Requirements: fourth-year M.D. enrollment.
- FAM:8420 Family Medicine, Mason City** 2,4 s.h.
Work with family physicians on staff at Mercy or other affiliated community hospitals; management of all patients admitted by the family physicians, participation in care rendered by consultants; primary care experience in family practice office.
- FAM:8421 Primary Care Sports Medicine** 4 s.h.
Comprehensive, diverse, and educational experience in the field of sports medicine; clinical competence to diagnose and manage medical illnesses and injuries related to sports and exercise in varied patients, recreational and organized athletes, and teams. Requirements: M.D. enrollment.
- FAM:8422 Family Medicine/Psychiatry Elective** 2,4 s.h.
Integration of mental and physical health care across outpatient family medicine and outpatient psychiatry arenas. Requirements: M.D. enrollment.
- FAM:8423 Family Medicine, Ames Student Health** 4 s.h.
Primary care of late adolescent and young adult patients in a student health center setting; students work with family medicine and mental health providers to address health care needs of this population.
- FAM:8424 Family Caregiving Transitions** arr.
Students enhance clinical learning from caregiving experiences and increase empathy and patient communication skills; students also enhance personal understanding of, and growth through, caregiving responsibilities in periods of family health transitions.
- FAM:8425 Advanced Inpatient Subinternship in Rural Family Medicine, Algona** 4 s.h.
Rural hospital-based subinternship; students provide family medicine service alongside board-certified family physician faculty, performing all admissions on weekdays, rounding on hospitalized patients each day, and call responsibilities including deliveries and ER coverage.
- FAM:8426 Disease Registry Management** 4 s.h.
Use of electronic medical record-based disease registries to investigate care, identify areas for improvement, and optimize management of chronic disease at individual and/or population level.
- FAM:8450 Continuity of Care - Family Medicine** 4 s.h.
Longitudinal continuity of care experience for fourth-year M.D. students in an outpatient family medicine setting.
- FAM:8496 Independent Studies** arr.
Work with departmental researcher on investigation in family medicine, community medicine, health care delivery, health maintenance, and other areas.
- FAM:8497 Research in Family Medicine** arr.
Medical research, clinical or laboratory projects; individual study.
- FAM:8498 Family Medicine On Campus** arr.
Clinical clerkship; individually arranged by student with departmental approval.
- FAM:8499 Family Medicine Off Campus** arr.
Clerkships; may include community hospitals.

Free Radical and Radiation Biology

Director

- Douglas R. Spitz (Radiation Oncology/Pathology)

Faculty: <https://frrbp.medicine.uiowa.edu/faculty-and-staff>

Website: <https://frrbp.medicine.uiowa.edu/>

The Free Radical and Radiation Biology Program provides in-depth training and research experience in the physical, chemical, and biological effects of radiation. It also focuses on the metabolic production of free radicals and their role in biology and medicine.

Free radicals are of interest to researchers and clinicians due to their role in a variety of diseases and pathological states, including degenerative diseases of aging and cancer. Manipulation of free radical reactions and redox biology holds great promise for the future development of new therapies for a variety of human diseases. The Free Radical and Radiation Biology Program stresses the importance of these areas of research to basic science, translational research, and public health.

Undergraduate Education

Three courses offered by the Free Radical and Radiation Biology Program are open to University of Iowa undergraduate students: FRRB:3130 Radiation Safety and Radiobiology; FRRB:4000 Special Topics: Advanced Undergraduates; and with instructor approval, FRRB:5000 Radiation Biology. Students looking for an overview of the biological effects of radiation, including the role of free radicals, will find FRRB:5000 especially appropriate.

Graduate Education

See Carver College of Medicine [p. 1658] and Graduate [p. 1536] College in the Catalog for general information about study in medicine and graduate study at the University.

Postgraduate Training

Postdoctoral training is available by arrangement with the program's director and individual faculty members. Contact the Free Radical and Radiation Biology Program.

Programs

Graduate Programs of Study

Majors

- Master of Science in Free Radical and Radiation Biology
- Doctor of Philosophy in Free Radical and Radiation Biology

Students interested in doctoral studies in free radical and radiation biology should apply under the umbrella program in Biomedical Science [p. 1549] (select free radical and radiation biology subprogram). Direct applications to the M.S. and Ph.D. in free radical and radiation biology are not currently being considered.

Facilities

The Free Radical and Radiation Biology Program is the home of the Radiation and Free Radical Research Core Lab (RFRRRC).

The lab operates a 300 kVp orthovoltage X-ray generator and other radiation sources, including an 8,000-Curie Cs-137 irradiator (Ionizing Radiation Services). Students and staff have access to additional core lab support through RFRRRC, with services and expertise related to analytical chemistry (Electron Paramagnetic Resonance services) and redox biology, biochemistry (Antioxidant Enzyme Services), and linear accelerators in the Department of Radiation Oncology.

The program has a number of radiation detectors and counters, including liquid scintillation counters. It also has ultraviolet/visible spectrophotometers; various types of equipment for densitometry, chromatography, and electrophoresis; modern tissue culture facilities; seahorse metabolic profiling instruments; molecular biology equipment, including thermal cyclers; an automatic cell counter and particle sizer; tissue culture facilities; Typhoon phosphorimager; high-performance liquid chromatography (HPLC); electron spin resonance spectrometers; and nitric oxide analyzers. Visit Research Core on the program's website to learn more.

Courses

Free Radical and Radiation Biology Courses

FRRB:3110 Medical Physics I **1-3 s.h.**

Introduction to radiation used in clinical setting; fundamental physical units, measurements, principles, atomic structure and types of radiation; X-ray generating equipment, X-ray production, and its interaction with matter. Requirements: admission to free radical and radiation biology program or acceptance to radiation sciences therapy program, and maxillofacial or radiation oncology resident. Same as RSTH:3110.

FRRB:3130 Radiation Safety and Radiobiology **2 s.h.**

Instruction on safe operation of radiation producing equipment and handling of radioactive materials; origin and/or derivation of certain formulae and techniques useful in radiation protection programs; regulatory agencies, regulations, and regulatory guides pertinent to student's field; emphasis on applied aspects of radiation protection; characteristics and biological effects of ionizing radiations, properties and uses of radioisotopes, medical applications, and biological basis for protection procedures. Requirements: enrollment in radiation sciences or nuclear medicine technology program. Same as RSP:3130.

FRRB:3215 Medical Physics II **0-3 s.h.**

Treatment units used in external radiation therapy; beam calculations, isodose distributions, brachytherapy, quality assurance and quality management, protection and safety. Prerequisites: RSTH:3110. Requirements: admission to free radical and radiation biology program or acceptance to radiation sciences therapy program. Same as RSTH:3215.

FRRB:4000 Special Topics: Advanced Undergraduates **arr.**

Readings and/or laboratory experience. Offered fall semesters.

FRRB:5000 Radiation Biology 4 s.h.

Comprehensive study of molecular and biological effects of ionizing radiations with an emphasis on biomedical therapeutic applications; mammalian radiobiology, contribution of metabolism to radiation effects, and therapeutic applications of radiation in cancer therapy. Offered fall semesters of odd years. Prerequisites: BIOC:3120 and CHEM:2210. Requirements: college-level physics.

FRRB:5001 Research: Special Topics arr.**FRRB:5005 Rigor and Reproducibility in Redox Biology 1 s.h.**

Experiments in redox biology are prone to artifact due to unwanted or unknown oxidations, misunderstanding of how laboratory tools work, assumptions by the investigator that do not hold, and more; faculty and students discuss common experimental approaches used in research in the field—their strengths, weakness, and current best approaches to avoid artifacts—and best approaches to present data to stand the test of time and are easily understood by readers.

FRRB:6000 Seminar: Free Radical and Radiation Biology 1 s.h.

Seminar presentations of cutting edge science in the field of free radical and radiation biology, given by experts in the field as well as trainees.

FRRB:6004 Research: Free Radical and Radiation Biology arr.

Representation of intensive laboratory-based studies in the field of free radical and radiation biology, determined by mutual agreement between faculty members sponsoring the research and consultation with graduate student.

FRRB:6006 Topics in Free Radical Biology and Medicine 1 s.h.

Discussion and presentation of new literature reports in the field of free radical biology and medicine in journal club format.

FRRB:6008 Topics in Radiation and Cancer Biology 1 s.h.

Emerging concepts in the biological effects of radiation and cancer biology; current topics in journal club format.

FRRB:7000 Redox Biology and Medicine 4 s.h.

Chemistry of free radicals, related oxidants, and antioxidants; antioxidant (redox) enzymes—their structure, biochemical function, regulation, and function in redox biology; targets of oxidants—lipids, proteins, DNA; redox biology of health (infants to healthy aging) and disease (cancer, cardiovascular disease, diabetes, neurodegenerative diseases). Offered spring semesters of even years. Prerequisites: BIOC:3120 or CHEM:2210.

FRRB:7001 Molecular and Cellular Biology of Cancer 3 s.h.

Fundamental aspects of oncology at the cellular and molecular levels; mechanisms of cancer initiation and progression, oncogene action, DNA damage and repair, carcinogenesis by radiation, chemicals, viruses; tumor immunology, anticancer therapies. Offered fall semesters. Requirements: strong basic science background. Same as PATH:7001.

Internal Medicine

Chair

- Evan Dale Abel

Faculty: <https://medicine.uiowa.edu/internalmedicine/people>

Website: <https://medicine.uiowa.edu/internalmedicine/>

Internal medicine is concerned with the diagnosis, prevention, and treatment of diseases of adults. The Department of Internal Medicine's educational, patient care, and research activities cover all facets of the discipline, including general internal medicine and primary care as well as the specialized areas of allergy and immunology, cardiology, clinical pharmacology, endocrinology and metabolism, gastroenterology and hepatology, hematology, oncology, blood and marrow transplant, infectious diseases, nephrology, pulmonary, critical care, occupational medicine, and rheumatology.

The department is committed to the complete spectrum of medical education, from didactic and clinical education of M.D. students to resident and fellowship training.

M.D. Training

Department of Internal Medicine faculty members bear a major share of teaching medical and physician assistant students in the preclinical curriculum. During the first year, faculty members participate in MED:8121 Clinical and Professional Skills I and MED:8131 Clinical and Professional Skills II, as well as MED:8122 Medicine and Society I and MED:8132 Medicine and Society II. They also participate in teaching MED:8124 Mechanisms of Health and Disease I, MED:8133 Mechanisms of Health and Disease II, and MED:8134 Mechanisms of Health and Disease III. Departmental faculty members are key contributors in the third semester, instructing MED:8221 Clinical and Professional Skills III, MED:8222 Medicine and Society III, MED:8223 Mechanisms of Health and Disease IV, and keystone courses.

During the core clinical clerkship year, the department's faculty members instruct students for six weeks in IM:8301 Inpatient Internal Medicine and for four weeks in IM:8302 Outpatient Internal Medicine at University of Iowa Hospitals & Clinics, Iowa River Landing, and the Iowa City VA Health Care System, or in hospitals of the Des Moines Area Medical Education Consortium. Students actively participate as members of an inpatient ward team and/or specialty consult services in IM:8301, and in IM:8302 they participate in the evaluation and management of patients at outpatient internal medicine clinics.

During their advanced clerkship students may select a clinical experience to fit their own career goals from courses offered in general medicine, subspecialties, intensive care, and a subinternship program IM:8401 Advanced Inpatient Subinternship in Internal Medicine.

Residency

The department offers a three-year residency training program in internal medicine. In addition, most of the department's specialty divisions offer two- and three-year clinical and research fellowships, in which fellows develop special knowledge and skills relevant to their specialties. Fellows who hold doctoral degrees may be accepted to programs whose major focus is laboratory research.

Facilities

Teaching in the Department of Internal Medicine takes place in the medical services and laboratories of University of Iowa Hospitals & Clinics, Iowa River Landing, and the Iowa City VA Health Care System, and in Des Moines at the VA Central Iowa Health Care System and Iowa Methodist Medical Center.

Courses

Internal Medicine Courses

IM:8301 Inpatient Internal Medicine **arr.**

Development of knowledge, diagnostic and management skills vital to care of hospitalized patients; clinical responsibilities, educational conferences, independent study.

IM:8302 Outpatient Internal Medicine **3-4 s.h.**

Development of knowledge, diagnostic and management skills in the outpatient clinical setting; clinical activities, discussion of problems, independent study.

IM:8401 Advanced Inpatient Subinternship in Internal Medicine **4 s.h.**

Student responsibility for evaluating, treating, and following patients admitted to inpatient general medicine services. Requirements: fourth-year M.D. enrollment.

IM:8410 Clinical Allergy Immunology **arr.**

Pathogenesis, diagnosis, and management of asthma and allergic and immunologic diseases; conducting and interpreting relevant specialized clinical and laboratory tests; emphasis on outpatients; formal and informal teaching sessions.

IM:8412 Clinical Cardiology **arr.**

Development of breadth and depth in diagnostic and therapeutic problems encountered in clinical cardiology; participation in evaluation and decisions regarding patients seen sometimes in the cardiovascular clinic, inpatient cardiology wards, and electrophysiology service.

IM:8413 Noninvasive Cardiovascular Assessment: EKG Interpretation and Experiences in Ultrasound **2 s.h.**

Develop and further the confidence to read basic EKG patterns and rhythms critical to the primary care physician; these are the same objectives and methods as are stressed within the EKG portion of the transitions to clinical clerkships course; students are expected to refamiliarize themselves with this ICD material before beginning the course; students will learn by reading actual EKG's on their own with facilitation of learning by direct instructor feedback of their interpretation. Requirements: M.D. enrollment.

IM:8414 Clinical Endocrinology **arr.**

New patient evaluation, inpatient referral; returning patients in diabetes, endocrine clinics; complete patient evaluations, charts; participation in clinical conferences.

IM:8416 Clinical Gastroenterology **arr.**

Work in consultation service at University Hospitals & Clinics or Iowa City VA Health Care System; assistance in diagnostic procedures for patients examined as part of consultation service; participation in patient follow-up through weekly return clinic.

IM:8418 Hematology Oncology **arr.**

Diagnostic skills in hematology and oncology.

- IM:8422 Clinical Infectious Disease** arr. Diagnosis, treatment, follow-up, study of patients with infectious diseases, under staff guidance; techniques of diagnostic microbiology; participation in conferences, teaching activities.
- IM:8424 Medical Intensive Care Unit** arr.
- IM:8426 Pulmonary Disease** arr. Breadth, depth in diagnostic, therapeutic problems encountered in clinical pulmonary disease; evaluation of outpatients and inpatients under staff supervision; interpretation of special studies carried out in pulmonary function laboratory, fiberoptic bronchoscopy and brush biopsy of lung; exposure to diagnosis and management of acute respiratory failure in intensive care units at University of Iowa Hospitals & Clinics, and Iowa City VA Health Care System.
- IM:8428 Nephrology** arr. Evaluation of patients from University of Iowa Hospitals & Clinics inpatient service, Iowa City VA Health Care System and clinics; emphasis on early kidney disease and all varieties of hypertension.
- IM:8434 Clinical Rheumatology** arr. Clinical features of rheumatic diseases, their differential diagnosis, and principles of management; patients from arthritis clinic, inpatient consultation service of University of Iowa Hospitals & Clinics, and Iowa City VA Health Care System.
- IM:8435 Palliative Care** 2,4 s.h. Requirements: M.D. enrollment.
- IM:8437 Multidisciplinary Cancer Care** 2 s.h. Basic concepts of cancer care; role of multidisciplinary team in care of cancer patients; development of attitudes, knowledge, and skills useful for entering a specialty that encounters patients with cancer. Requirements: M.D. enrollment.
- IM:8449 Editorial Writing for Medical Students** 4 s.h. Students understand and practice the skill of writing opinion editorials aimed at improving the public's understanding of health and health care; how to effectively engage a broad, non-medical audience through writing with the goal of producing an opinion editorial piece that could be submitted for publication to a local or national newspaper.
- IM:8450 Continuity of Care in Outpatient Internal Medicine** 4 s.h. Experience with longitudinal continuity of care for patients in the outpatient setting; clinical and didactic exposure to broad spectrum of general internal medicine problems. Requirements: fourth-year M.D. enrollment.
- IM:8451 Advanced Inpatient Subinternship in Internal Medicine, Des Moines** arr. Four-week rotation at Des Moines Medical Education Consortium; experience as a subintern in general internal medicine and the ICU. Requirements: fourth-year M.D. enrollment.
- IM:8452 Subinternship in Internal Medicine at VAMC, Des Moines** arr. Rotation at the Veterans Affairs Central Iowa Health Care System; subinternship on general internal medicine ward. Requirements: fourth-year M.D. enrollment.
- IM:8453 Critical Care Rotation, IMMC, ICU, DM** 4 s.h. Subinternship on medical critical care team, with daily rounds, teaching. Requirements: fourth-year M.D. enrollment.
- IM:8454 General Medicine Consult Service, IMMC** arr. Principles of consultative medicine provided by general internists to non-internal medicine patients; how to assess perioperative risk for patients evaluated before surgery.
- IM:8455 Public Health Medicine** arr. Participation in ongoing projects related to public health issues of acute disease; training and career opportunities in public health practice.
- IM:8456 Clinical Cardiology Coronary Care Experience, Iowa Methodist, Des Moines** arr.
- IM:8457 Clinical Nephrology, Iowa Methodist, Des Moines** 2,4 s.h. Exposure to common nephrology problems, including acute renal failure, chronic renal failure, acid-base disorders, common electrolyte disorders.
- IM:8495 Internal Medicine ICU Off Campus** arr. Experience as subintern in the ICU/MICU; daily rounds and teaching with medical critical care staff.
- IM:8497 Research in Internal Medicine** arr. Medical research, clinical or laboratory projects; individual study.
- IM:8498 Internal Medicine On Campus** arr.
- IM:8499 Internal Medicine Off Campus** arr.

Medical Education Program

Executive Associate Dean

- Patricia L. Winokur

Graduate degree: M.M.E.

Graduate certificate: medical education

Faculty: <https://medicine.uiowa.edu/ocrme/about/faculty-staff>

Website: <https://medicine.uiowa.edu/ocrme/program-goals>

The purpose of the Medical Education Program is to develop a community of academic medical faculty with formal training in education who will create and sustain a culture of educational excellence within the College of Medicine, University of Iowa Hospitals & Clinics, the University of Iowa, and in the medical education community. The program consists of the Master in Medical Education (M.M.E.) degree and the Certificate in Medical Education.

The program is coordinated through the Office of Consultation and Research in Medical Education (OCRME). Courses are taught by OCRME faculty, who also advise students in the program.

Programs

Graduate Programs of Study

Major

- Master in Medical Education [p. 1705]

Certificate

- Certificate in Medical Education [p. 1707]

Master in Medical Education, M.M.E.

The Master in Medical Education program gives health care education faculty members the opportunity to specialize in theory and practice of curriculum design, effective teaching, assessment, and other aspects of medical education.

Graduates of the program will be able to:

- design evidence-based education programs and materials with appropriate scope, sequence, and focus for intended learners;
- deliver effective instruction to individuals and small or large groups in classroom, laboratory, or clinical settings;
- evaluate the effectiveness of educational instruction, using formative and summative methods;
- understand basic principles of educational measurement and be able to apply them to medical education;
- use assessments to promote learning and to assess learning progress and status;
- understand basic principles of, and be able to interpret and use, educational research;
- apply the fundamental theories, designs, and methods of program evaluation to the medical education environment;
- identify current issues in medical education and resources available for monitoring developments in the field;
- develop skills in reflection on past experience, including skills of self-awareness, self-analysis, and self-evaluation, that results in the ability to generate a new perspective or plan of action; and
- identify the evolving role of technology in medical education and research.

Requirements

The Master in Medical Education requires a minimum of 30 s.h. of graduate credit. The program is designed to prepare medical faculty members to educate health professionals. It is intended for Carver College of Medicine faculty members and professional staff as well as for University of Iowa resident physicians and fellows.

The M.M.E. may be completed in as few as two years or as many as five. Students may begin the program in fall semester, spring semester, or summer session. Some of the required courses are offered online, and required on-campus courses have evening meeting times.

The curriculum includes 24 s.h. of required courses and 6-9 s.h. of electives. Students must register for at least one course each academic year in order to maintain satisfactory progress toward the degree. The program's faculty provides substantial student advising and consultation.

During their first semester, students file a plan of study. Each student's plan must include a description of the student's goals, intended graduation date, and a list of courses the student plans to take each semester. The study plan must incorporate all of the courses required for the degree and must include any requests for transfer credit. The plan must be approved by the director of the M.M.E. program and by the student's advisor. Subsequent revisions of the plan must have the advisor's approval.

The Master in Medical Education requires the following coursework.

Code	Title	Hours
MED:9701	Instructional Design and Technology	3
MED:9702	Clinical Teaching in Medical Education	3
MED:9703	Educational Research and Evaluation	3
MED:9711	Teaching Methods in Medical Education	3
MED:9712	Introduction to Educational Measurement in Medical Education	3
MED:9713	Assessment in Medical Education	3
MED:9714	Current Issues in Medical Education	3
MED:9720	Portfolio Project	3
Electives		6-9
Total Hours		30-33

Students who are not involved with clinical teaching may substitute another course for MED:9702 Clinical Teaching in Medical Education.

Students must have completed at least 18 s.h. before enrolling in MED:9720 Portfolio Project. In the portfolio, students integrate the materials they have developed over the course of the program into a document. Three faculty members review the project and evaluate the student's participation in the program.

Electives require approval of the student's advisor. They may include courses in the M.M.E. program as well as those offered by relevant departments and programs (e.g., College of Education, Tippie College of Business). Students should check with their advisors to determine which courses are graduate level.

Admission

Applicants should hold an M.D. degree and must have performed satisfactorily on the Medical College Admission Test (MCAT). Basic sciences applicants without an M.D. must hold an equivalent degree and must have performed satisfactorily on an admission test equivalent to the MCAT.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

Application materials must include an official transcript showing medical coursework and medical degree, or equivalent for basic sciences applicants (current and former University of Iowa students do not need to request a UI transcript or transcripts previously submitted to the University); a letter of reference from the applicant's department chair and one additional letter of reference; and a 300-500 word essay describing the applicant's interest in medical education and in the Master in Medical Education program.

To apply to the M.M.E. program, see Applications and Admissions on the Office of Consultation and Research in Medical Education (OCRME) website. Application materials should be submitted to the Office of Admissions.

Application deadlines are July 15 for fall semester entry, November 15 for spring semester entry, and April 15 for summer session entry.

Medical Education, Graduate Certificate

Requirements

The graduate certificate program is designed to help health care education faculty members, professional staff, residents, and fellows in the Carver College of Medicine and University Hospitals & Clinics find new ways to enhance their scholarship and skills in teaching, curriculum design, and education assessment. The Certificate in Medical Education program involves the same courses as the Master in Medical Education (M.M.E.); however, it only requires a minimum of 12 s.h. of graduate credit. Individuals who complete the certificate and then decide to earn the master's degree may count their certificate coursework toward the M.M.E.

The Certificate in Medical Education requires the following coursework.

Code	Title	Hours
Methods		
One of these:		
MED:9701	Instructional Design and Technology	3
MED:9702	Clinical Teaching in Medical Education	3
MED:9711	Teaching Methods in Medical Education	3
Research and Measurement		
One of these:		
MED:9703	Educational Research and Evaluation	3
MED:9712	Introduction to Educational Measurement in Medical Education	3
Additional Courses		
Students choose from M.M.E. requirements		6

Admission

Applicants should hold an M.D. degree and must have performed satisfactorily on the Medical College Admission Test (MCAT). Basic sciences applicants without an M.D. must hold an equivalent degree and must have performed satisfactorily on an admission test equivalent to the MCAT.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

Application materials must include an official transcript showing medical coursework and medical degree, or equivalent for basic sciences applicants (current and former University of Iowa students do not need to request a UI transcript or transcripts previously submitted to the University); a letter of reference from the applicant's department chair and one additional letter of reference; and a 300-500 word essay describing the applicant's interest in medical education and in the Certificate in Medical Education program.

To apply to the certificate program, see Applying as a Nondegree Graduate Student on the University of Iowa Office of Admissions website. Application materials should be submitted to the Office of Admissions.

Application deadlines are July 15 for fall semester entry, November 15 for spring semester entry, and April 15 for summer session entry.

Medical Laboratory Science

Coordinator, Pathology Learning Center

- Angela Briggs

Undergraduate major: medical laboratory science (B.S.)

Website: <https://medicine.uiowa.edu/pathology/education/medical-laboratory-science-program-mlsp>

Medical laboratory scientists and medical technologists perform the laboratory tests that provide health care practitioners with information vital for accurate diagnosis, proper treatment of disease, and assistance in monitoring the treatment of the disease. They are in demand in hospital, private, reference, and government laboratories; clinics; physicians' offices; and industrial, pharmaceutical, biological, veterinary, and environmental research laboratories. Medical laboratory scientists and medical technologists are highly skilled health team professionals who use complex procedures and instruments in their analysis. They possess a specialized set of knowledge and skills acquired through completion of a formal twelve-month program of academic and clinical study in laboratory medicine.

Programs

Undergraduate Program of Study Major

- Major in Medical Laboratory Science (Bachelor of Science) [p. 1709]

Medical Laboratory Science, B.S.

The Carver College of Medicine partners with Allen College in Waterloo, Iowa, to offer the major in medical laboratory science. The program is fully accredited by the National Accrediting Agency for Clinical Laboratory Sciences. All graduates are eligible for national certification examinations in medical laboratory science.

Undergraduate study in medical laboratory science is guided by the academic rules and procedures [p. 1659] outlined in the Carver College of Medicine section of the Catalog. Because the Carver College of Medicine partners with Allen College for the medical laboratory science major, students are not held to the University of Iowa in-residence requirement.

Expenses

Students are responsible for buying textbooks and paying tuition and student fees. The Medical Laboratory Science Program provides laboratory coats for professional program students.

Requirements

The Bachelor of Science with a major in medical laboratory science requires a minimum of 124 s.h., including 84 s.h. of preparatory study and 40 s.h. in the professional (clinical) program, which consists of 11 months of didactic and practical instruction and clinical rotations. Students must maintain a cumulative g.p.a. of at least 2.70 in all courses for the major and in all University of Iowa courses. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 20].

Bachelor of Science students who have completed all preparatory study (years one through three) begin the fourth-year professional program in late May with online didactic lectures. They attend several days of laboratory skills instruction on the Allen College campus, and in mid-November they begin a series of clinical rotations in the laboratories of University of Iowa Hospitals & Clinics and the Iowa City VA Health Care System. The first series ends at the end of the calendar year. January through early April involve more online courses and student laboratory skills. The last series of clinical rotations begin in mid-April and the professional program concludes with exams in preparation for national certification. Students who successfully complete the 11-month professional program graduate with a Bachelor of Science in medical laboratory science from the University of Iowa and a Bachelor of Health Science from Allen College.

Professional program requirements are taken through Allen College. To learn more about the professional program, visit Medical Laboratory Science (MLS) on the Allen College website.

As part of their preparatory study, students must complete specific courses that are prerequisites for admission to the major.

Preparatory Study: Prerequisites for Admission to the Major

Students must complete the following coursework before they may be admitted to the major in medical laboratory

science. Students must earn a grade of C-minus or higher in all prerequisite courses.

Code	Title	Hours
All of these:		
BIOL:1411- BIOL:1412	Foundations of Biology - Diversity of Form and Function	8
CHEM:1110 & CHEM:1120	Principles of Chemistry I-II	8
CHEM:2210	Organic Chemistry I	3
MICR:2157- MICR:2158	General Microbiology - General Microbiology Laboratory	5
PSY:1001	Elementary Psychology	3
RHET:1030	Rhetoric	4-5
SOC:1010	Introduction to Sociology	3-4
One of these options:		
HHP:1100 & HHP:1110	Human Anatomy - Human Anatomy Laboratory (both courses)	4
HHP:1150	Human Anatomy Lecture with Lab	4
HHP:1300 & HHP:1310	Fundamentals of Human Physiology - Human Physiology Laboratory (both courses)	4
HHP:1350	Fundamentals of Human Physiology with Laboratory	4
HHP:3115	Anatomy for Human Physiology with Lab	5
HHP:3550	Human Physiology with Laboratory	5
One of these:		
BIOC:3110	Biochemistry	3
CHEM:2220	Organic Chemistry II	3
One of these:		
MATH:1005	College Algebra	4
MATH:1020	Elementary Functions	4
MATH:1440	Mathematics for the Biological Sciences	4
One of these:		
STAT:1020/ PSQF:1020	Elementary Statistics and Inference	3
STAT:3510/ IGPI:3510	Biostatistics	3

Fourth Year: Professional Program

Students must successfully complete the professional program requirements through Allen College in order to graduate with the B.S. degree in medical laboratory science.

Admission

Admission to the medical laboratory science professional program (fourth year) is competitive; enrollment may be limited. The top 16 qualified students are admitted. Students must apply to Allen College. Most students apply during fall of their third year and begin the professional program in late May immediately after their third year.

Before beginning the professional program, students must complete all prerequisites, including the College of Liberal Arts and Sciences GE CLAS Core [p. 20] requirements, and must earn at least 84 s.h. of college credit. They satisfy the English and public speaking prerequisite requirements by fulfilling the GE CLAS Core Rhetoric requirement. Applicants must have a cumulative g.p.a. of at least 2.70 both overall and in science coursework. They must satisfy any English as a Second Language (ESL) requirements specified by the University of Iowa before beginning the professional program.

The priority application deadline is Nov. 1. Applications are reviewed after Nov. 1.

Students should consult with a Medical Laboratory Science Program advisor as early as possible to plan preclinical studies that meet all requirements.

Career Advancement

The demand for medical laboratory scientists (MLS) is much greater than the number of people qualified to fill the positions, so MLS graduates have numerous employment opportunities nationwide. They consistently find employment before or very soon after graduation.

Opportunities for advancement include positions such as lab manager, computer specialist, technical specialist, or sales/instrument representative. An advanced degree in basic sciences, medicine, hospital administration, or business can expand earning potential.

Graduates often enjoy diverse work environments, including labs in hospitals, research institutions, public health facilities, forensic units, pharmaceutical companies, or working in the armed forces. They have an impact in the field as integral members of health care teams, providing information essential for the treatment and prevention of disease.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Medical Scientist Training Program

Director

- Steven Lentz (Biomedical Engineering/Internal Medicine)

Administrative Director

- Linda M. Varvel

Faculty: <https://medicine.uiowa.edu/mstp/faculty>

Website: <https://medicine.uiowa.edu/mstp/>

The Iowa Medical Scientist Training Program (MSTP) prepares trainees for careers in academic medicine, with emphasis on basic and clinical research.

Combined Degree

M.D./Ph.D.

The combined Doctor of Medicine/Doctor of Philosophy program normally requires seven to eight years of continuous study. It provides an effective and efficient means to integrate graduate and clinical training, combining the scientific approach with clinical medicine.

Students register for MSTP:8515 Medical Scientist Training Program Topics every semester. The course focuses on a variety of topics relevant to training as a physician-scientist.

During the first three semesters of the program, trainees take coursework in the basic sciences fundamental to the study of medicine and complete experiences that introduce mechanisms of health and disease, and principles of clinical practice; see Doctor of Medicine [p. 1692] in the Catalog. This early training provides broad exposure to the language and organizing concepts that form the foundation for a career as a physician scientist. Trainees also begin the research component of the graduate phase of the program during this time, through summer laboratory MSTP:8511 Medical Scientist Training Program Research rotations, enrollment in MSTP:8513 Analyzing and Presenting Medical Research, research presentations by MSTP faculty and students, and a student-sponsored seminar series. Trainees participate in Conversations in Research, in which MSTP faculty members discuss their research and career interests, and they attend MSTP Grand Rounds, a forum for patient-based discussions that emphasizes how science and medicine intersect.

During the fourth semester, all trainees take Step 1 of the U.S. Medical Licensing Examination and enroll in core clinical clerkships, in which they gain broad exposure to the spectrum of human disease and experience direct patient care before they enter the graduate phase of training.

At the beginning of the third year, trainees select a Ph.D. thesis mentor and enroll in a graduate department or interdisciplinary graduate program to begin their scientific training. In the spring semester of the third year, students enroll in MSTP:8514 Grant Writing Basics: A Focus on Predoctoral Applications. This course builds critical thinking and writing skills associated with applications for individual predoctoral training fellowships.

The focus of the graduate years of study is engagement in academic and research experiences that promote the trainees' development into independent investigators. Clinical contact is maintained during this phase of training through participation in seminar programs, MSTP Grand Rounds,

and MSTP:8512 Medical Scientist Training Program Clinical Connections, a course that provides the opportunity for mentored clinical experiences.

Upon completing the Ph.D. dissertation, trainees return to the Carver College of Medicine's M.D. curriculum to complete the clinical clerkship requirements for the M.D./Ph.D. combined program. During this phase, trainees bring a sophistication in the scientific approach to problem solving that they apply to human disease. They renew and develop clinical skills acquired in their early training and reinforce their understanding of the scientific basis of disease through continued participation in MSTP Grand Rounds. Upon completion of the clinical curriculum, trainees are awarded the M.D. and Ph.D.

Most graduates of the program elect to enter residency programs in clinical medicine and embark on careers as medical school faculty members in clinical disciplines with opportunities for basic and applied research. Other graduates accept academic appointments in basic science departments and spend a major part of their professional activity in biomedical research and teaching.

Admission

Applicants must meet requirements for admission to the M.D. program in the Carver College of Medicine; see Admission [p. 1695] in the Doctor of Medicine section of the Catalog. They also must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Applicants should have completed requirements for a bachelor's degree at an accredited academic institution. In addition to outstanding academic credentials, including strength in biological, physical, and mathematical sciences, they must demonstrate aptitude for and commitment to scientific research through productive research experience during their undergraduate years or after. Admission normally is made for entry to the first year of the program, but applicants already enrolled in the Carver College of Medicine may request admission with advanced standing.

Application

The Carver College of Medicine participates in the American Medical College Application Service (AMCAS). Program applicants should select M.D./Ph.D. Program-Type on their AMCAS application and instruct AMCAS to forward their credentials to the Carver College of Medicine (IA131). Applications should be submitted as early as possible to allow careful review by the admissions committees of the Medical Scientist Training Program and the Carver College of Medicine.

All candidates must take the Medical College Admission Test (MCAT), according to Carver College of Medicine requirements. The Graduate Record Exam (GRE) General Test is not required for admission.

Application to the Graduate College is not required before acceptance to the MSTP. Trainees admitted to the program receive assistance with Graduate College enrollment.

Financial Support

Trainees receive stipend and full tuition support from a National Institutes of Health MSTP training grant to the University of Iowa, supplemented by other institutional and individual awards. Students in the graduate phase of training receive support from their graduate departments or interdisciplinary programs and their research advisors.

The program office also helps selected trainees apply for competitive national awards for outstanding academic and research achievement.

Courses

Medical Scientist Training Program Courses

MSTP:8511 Medical Scientist Training Program Research arr.

Research experience. Requirements: Medical Scientist Training Program enrollment.

MSTP:8512 Medical Scientist Training Program Clinical Connections arr.

Experience with physician-scientist preceptor in medical interviewing, physical examination, patient presentation through direct patient interaction. Requirements: Medical Scientist Training Program graduate phase enrollment.

MSTP:8513 Analyzing and Presenting Medical Research 1 s.h.

How to read, interpret, and present medical and scientific literature; students read and present representative papers from scientific and medical literature.

MSTP:8514 Grant Writing Basics: A Focus on Predoctoral Applications 1 s.h.

Introduction to practical and conceptual aspects of grant-writing process, with the goal of completing an NIH F30-like grant; encourages critical thinking about significance, innovation, and experimental design; relate critical information and study design in concise and clear language; practical concepts of grant writing such as specific aims, experimental design, and the grant review process; trainees will present their research ideas, establishing opportunities to give and receive scientific criticism. Requirements: Medical Scientist Training Program enrollment.

MSTP:8515 Medical Scientist Training Program Topics 1 s.h.

Workshops and speakers; focus on a variety of topics including wellness, research presentations, professional development, and on-going faculty research partnerships. Requirements: Medical Scientist Training Program enrollment.

Microbiology and Immunology

Chair

- Li Wu

Director, Undergraduate Studies

- Richard J. Roller

Director, Graduate Studies

- Timothy L. Yahr

Undergraduate major: microbiology (B.S.)

Undergraduate minor: microbiology

Graduate degrees: M.S. in microbiology; Ph.D. in microbiology

Faculty: <https://medicine.uiowa.edu/microbiology/people/primary-appointments>

Website: <https://medicine.uiowa.edu/microbiology/>

Study in the Department of Microbiology and Immunology is dedicated to the branch of biological sciences that investigates the smallest living things: microbes that include bacteria, archaea, fungi, algae, protozoa, and viruses. It is coupled with immunology that includes the study of the protective responses of higher organisms to disease-causing microbes and cancers, and mistakes in immune function. Microbiology and immunology often interact in humans at the microbiome, those microbes that live with humans on their skin and mucosal surfaces, and yet must be restricted from causing disease by the immune system.

Microbiology and immunology are at the forefront of the modern biological revolution. Microbes are experimental subjects of choice for examining genetic and biological phenomena because of their small size, rapid growth rate, relative simplicity, and variety of characteristics that allow them to cause many kinds of infections and alter normal body functions. Immunology often makes use of microbes and cancer cells to study the critical and complex human responses to eliminate microbes and cancers. A significant portion of contemporary biochemical research employs microbiological and immunological methods.

Current research is making theoretical and practical advances concerning microbes that infect animals, including humans, and the immune response to those microbes; the use of comparative genomics, gene expression profiling, and recombinant DNA methods to analyze biological processes and generate valuable products, such as antibiotics and antibodies; genetics and regulation of metabolic processes; and the genetics and regulation of the immune response, including characterization of mechanisms used by microbes to signal one another and characterization of interactions between different types of immune cells and their targets.

The Department of Microbiology and Immunology offers an undergraduate major and a minor, and graduate majors leading to an M.S. and a Ph.D, and determines the curricula for those programs. Undergraduates majoring in microbiology receive their degrees (Bachelor of Science) from the College of Liberal Arts and Sciences and are governed by that college's undergraduate academic policies. The graduate degrees are awarded by the Graduate College.

Programs

Undergraduate Programs of Study

Major

- Major in Microbiology (Bachelor of Science) [p. 1716]

Minor

- Minor in Microbiology [p. 1720]

Graduate Programs of Study

Facilities

The Department of Microbiology and Immunology is situated on the University of Iowa health sciences campus, where it shares the Bowen Science Building with the Departments of Anatomy and Cell Biology, Biochemistry, Molecular Physiology and Biophysics, and Neuroscience and Pharmacology. Laboratory space and modern equipment are available for teaching and research.

Courses

Microbiology and Immunology Courses

MICR:1000 First-Year Seminar **1 s.h.**

Small discussion class taught by a faculty member; topics chosen by instructor.

MICR:1006 Small Wonders: Microbes in Our Lives **3 s.h.**

What everyone should know about microbes; how bacteria, viruses, and fungi affect our lives and the lives of all other creatures; how microbes harm and benefit humans and animals; class discussions focus on YouTube and current news items about microbes. GE: Natural Sciences without Lab.

MICR:2157 General Microbiology **3 s.h.**

Principles of bacterial and viral diversity, structure, genetics, physiology, and metabolism in contexts of molecular biology, immunology, infectious disease, and environmental microbiology. Prerequisites: BIOL:1411.

MICR:2158 General Microbiology Laboratory **2 s.h.**

Practice of basic techniques commonly used today for study of easy-to-grow microorganisms; variety of individual and group lab activities that challenge students to apply observations about bacteria and viruses. Corequisites: MICR:2157, if not taken as a prerequisite.

MICR:3147 Immunology and Human Disease **3 s.h.**

Important principles and key concepts in immunology with a focus on the involvement of the immune system in disease pathogenesis; overview of innate and adaptive immune systems and their functions at cellular and molecular levels. Prerequisites: BIOL:1411 with a minimum grade of C and BIOL:1412 with a minimum grade of C.

- MICR:3150 Eukaryotic Pathogens and Human Disease** 2 s.h.
 Foundational understanding of the lifecycle, epidemiology, pathogenesis, diagnosis, and treatment of major eukaryotic pathogens/parasites that cause human disease. Prerequisites: MICR:2157 with a minimum grade of C. Recommendations: genetics, biochemistry, and immunology.
- MICR:3159 Bacteria and Human Disease** 3 s.h.
 Infection and replication strategies of bacteria with an emphasis on human disease; for students interested in microbiology or other biological sciences, epidemiology, and/or health-related occupations. Prerequisites: MICR:2157 with a minimum grade of C.
- MICR:3160 Bacterial Physiology and Cell Biology** 2 s.h.
 Bacterial physiology and cell biology with reference to model organisms and adaptations to extreme environments; topics include energy metabolism, growth, cell structure, macromolecular assembly, cell division, microbial development, and microbial interactions; lectures augmented with readings from primary literature to give students a strong foundation in prokaryotic biology and approaches used in modern microbiology research. Prerequisites: MICR:2157 with a minimum grade of C and (BIOC:3120 or BIOC:3110).
- MICR:3164 Microbiology and Human Health** 4 s.h.
 Microbiology for nursing, pharmacy, and pre-health professions. Prerequisites: BIOL:1411 or BIOL:1140 or BIOL:1141.
- MICR:3165 Bacteria and Human Disease Laboratory and Discussion** 3 s.h.
 Use of bacterial genetics and molecular biology techniques and methodologies to study bacteria which cause human disease; development of skills in data analysis and presentation, reading scientific literature, and writing scientific abstracts; for students interested in microbiology or other biological sciences, epidemiology, and/or health-related occupations. Prerequisites: MICR:2157 with a minimum grade of C and MICR:2158 with a minimum grade of C. Corequisites: MICR:3159 or MICR:3170, if not taken as a prerequisite.
- MICR:3166 Microbiology Literature Discussion** 1 s.h.
 Students read and discuss papers from microbiology literature that address current issues in microbiology; for students interested in microbiology or other biological sciences, epidemiology, and/or health-related occupations. Prerequisites: MICR:2157 with a minimum grade of C.
- MICR:3168 Viruses and Human Disease** 3 s.h.
 Infection and replication strategies of viruses with an emphasis on human disease; for microbiology majors as well as students interested in pre-medicine, biological sciences, epidemiology, and/or other health-related occupations. Prerequisites: BIOL:1411 with a minimum grade of C or MICR:2157 with a minimum grade of C.
- MICR:3170 Microbial Genetics** 2 s.h.
 Genetics of bacteria and bacteriophages including classical, molecular, and genome-wide approaches. Prerequisites: BIOL:2512 with a minimum grade of C or MICR:2157 with a minimum grade of C.
- MICR:3177 Virology Discussion** 1 s.h.
 Students read and discuss papers from virology literature that address current issues in virology. Prerequisites: MICR:2157 with a minimum grade of C. Corequisites: MICR:3168 (if not taken as a prerequisite).
- MICR:3178 Virology Laboratory** 2 s.h.
 Practical approaches to studying viruses; basic techniques in virology including virus detection, virus growth measurement, and virus genetics. Prerequisites: MICR:2157 with a minimum grade of C and MICR:2158 with a minimum grade of C. Corequisites: MICR:3168 (if not taken as a prerequisite).
- MICR:3190 Web-Based Nursing, Pharmacy, and Allied Health Microbiology** 4 s.h.
 Microbiology for nursing and other health sciences; principles of immunology; web-based instruction. Prerequisites: BIOL:1140 or BIOL:1411 or BIOL:1141. Recommendations: introductory biology, or pathology and general chemistry.
- MICR:4161 Undergraduate Research in Microbiology** arr.
 Experimental research under faculty supervision. Prerequisites: BIOL:1411.
- MICR:4163 Seminar: Microbiology** 2 s.h.
 Current topics in microbiology, immunology, and virology. Prerequisites: 2 of the following are required: MICR:3147 with a minimum grade of C, MICR:3159 with a minimum grade of C, MICR:3160 with a minimum grade of C, MICR:3168 with a minimum grade of C, MICR:3170 with a minimum grade of C. Requirements: senior standing.
- MICR:4171 Honors Undergraduate Research in Microbiology** arr.
 Experimental research under faculty supervision. Prerequisites: BIOL:1411. Requirements: microbiology major, junior or senior standing, 3.33 overall g.p.a., and 3.33 g.p.a. in microbiology courses.
- MICR:4175 Topics in Parasitism** 1 s.h.
 Molecular and immunologic mechanisms by which bacteria, viruses, and protozoa cause human diseases; based on manuscript readings and/or student presentations. Requirements: junior or higher standing in microbiology or related discipline, and current or prior research in a microbiology and immunology laboratory.
- MICR:5218 Microscopy for Biomedical Research** arr.
 Basic microscopy methods for research including optics, preparation, and analysis of biomedical specimens; light, fluorescence, confocal, transmitting electron, scanning electron, atomic force microscopes, elemental analysis; immunochemistry and stereology techniques; individualized laboratory instruction. Prerequisites: BIOL:2723. Same as ACB:5218, BIOL:5218.
- MICR:5264 Directed Study in Microbiology** arr.
- MICR:5875 Perspectives in Biocatalysis** 1-3 s.h.
 Applied enzymology, protein design, structure-activity relationships, biosensor technology, microbial transformations, biodegradation of environmental pollutants. Requirements: graduate standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as BIOC:5875, CBE:5875, CEE:5875, CHEM:5875, PHAR:5875.

MICR:6201 Graduate Immunology 3 s.h.

Ontogeny, activation, and function of T lymphocytes and B lymphocytes; innate immune effector mechanisms; major histocompatibility complex; antigen presentation; thymocyte positive and negative selection; signaling of T lymphocytes, B lymphocytes; emphasis on experimental methods for analysis of these processes. Prerequisites: MICR:3147. Requirements: for IMMU:6201—college biology, general chemistry, and introductory immunology courses; for MICR:6201—courses in college biology, genetics, general chemistry, and introductory immunology. Recommendations: for IMMU:6201—courses in biochemistry and genetics; for MICR:6201—biochemistry course. Same as IMMU:6201.

MICR:6240 Graduate Eukaryotic Pathogens and Human Disease 2 s.h.

Foundational understanding of the lifecycle, epidemiology, pathogenesis, diagnosis, and treatment of major eukaryotic pathogens/parasites that cause human disease. Recommendations: genetics, biochemistry, and immunology.

MICR:6247 Graduate Immunology and Human Disease 4 s.h.

Important principles and key concepts in immunology with a focus on the involvement of the immune system in disease pathogenesis; overview of innate and adaptive immune systems and their functions at cellular and molecular levels; learning enhanced by case-based, small-group discussion and writing exercises. Same as IMMU:6247.

MICR:6250 Mechanisms of Parasitism Journal Club 1 s.h.

Reviews of recent publications in molecular parasitology research and thesis research by training grant or journal club students. Same as MMED:6250.

MICR:6255 Graduate Experimental Approaches to Molecular Microbiology 2 s.h.

Exposure to common experimental approaches through examination of primary literature and facilitated discussions on application of those approaches to advance scientific inquiry. Requirements: microbiology graduate standing.

MICR:6259 Graduate Bacteria and Human Disease 3 s.h.

Infection and replication strategies of bacteria with an emphasis on human disease; discussion focuses on experimental approaches used to study mechanisms of disease.

MICR:6260 Graduate Bacterial Physiology and Cell Biology 2 s.h.

Bacterial physiology and cell biology with reference to model organisms and adaptations to extreme environments; topics include energy metabolism, growth, cell structure, macromolecular assembly, cell division, microbial development, and microbial interactions; lectures augmented with readings from primary literature to give students a strong foundation in prokaryotic biology and approaches used in modern microbiology research.

MICR:6265 Principles of Writing a Scientific Proposal 2 s.h.

How to think and write like scientists and become familiar with the elements of a research proposal; writing a grant proposal modeled on a National Institutes of Health Exploratory/Developmental Research Grant Award (NIH R21); students critique proposals written by other students; faculty read proposals and provide constructive criticism; lectures describe elements of a grant proposal and strategies for effective writing. Requirements: enrollment in microbiology graduate program.

MICR:6267 Graduate Viruses and Human Disease 4 s.h.

Infection and replication strategies of viruses with an emphasis on human disease; discussion focuses on topics and techniques used in primary literature and development of specific aims for a mini-proposal.

MICR:6268 Biology and Pathogenesis of Viruses 2 s.h.

Molecular biology of animal DNA and RNA viruses, viral immunology and pathogenesis, and interaction of these viruses with eucaryotic cells; mechanisms of viral latency, persistence, cellular transformation, oncogenesis; virology literature. Prerequisites: MICR:3168 or MICR:6267.

MICR:6270 Graduate Microbial Genetics 2 s.h.

Genetics of bacteria and bacteriophages including classical, molecular, and genome-wide approaches.

MICR:7207 Advanced Topics in Immunology 3 s.h.

In-depth analysis of selected areas. Prerequisites: IMMU:6201 or MICR:6201. Same as IMMU:7221.

MICR:7261 Graduate Research in Microbiology arr.

Requirements: microbiology graduate standing.

MICR:7263 Graduate Student Research Seminar 1 s.h.

Presentation of thesis work in progress. Requirements: microbiology graduate standing.

MICR:7265 Topics in Virology Literature 1 s.h.

Papers of current interest in primary virology literature.

MICR:8230 Dental Microbiology 3 s.h.

Medical microbiology: bacteriology, immunology, pathogenic bacteriology, virology, mycology, parasitology. Requirements: D.D.S. enrollment.

Microbiology, B.S.

Microbiology is an excellent major for undergraduate students who want a good general education with emphasis on an important and interesting branch of biological sciences.

Requirements

The Bachelor of Science with a major in microbiology requires a minimum of 120 s.h., including 63-64 s.h. of work for the major (21-28 s.h. in the Department of Microbiology and Immunology and 35-43 s.h. in supporting coursework). Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 20].

Students must complete at least 12 s.h. of the required 21-28 s.h. in Department of Microbiology and Immunology courses at the University of Iowa.

The major in microbiology can be pursued on either a pre-medicine or a scholar track.

Students in the pre-medicine track complete admission requirements for the Carver College of Medicine and for most colleges of medicine as an integral part of the completion of their major requirements. This track is recommended for pre-medical, pre-dental, and pre-pharmacy students.

Students in the scholar track pursue a curriculum with streamlined organic chemistry and physics requirements and expanded microbiology and immunology courses, including advanced laboratory and global health studies coursework. The scholar track is recommended for students interested in pursuing graduate training or in developing a career as a microbiologist.

Students may shift from one track to the other during their program of study.

The B.S. with a major in microbiology in the pre-medicine or the scholar track requires the following coursework.

Code	Title	Hours
	Microbiology and Immunology Courses	21
	Supporting Coursework	28-29
	Pre-Medicine or Scholar Track Coursework	14
	Total Hours	63-64

Microbiology and Immunology Courses

Pre-medicine and scholar track students earn 21 s.h. in Department of Microbiology and Immunology courses, as follows.

Code	Title	Hours
Both of these:		
MICR:2157	General Microbiology (with a grade of C or higher)	3
MICR:2158	General Microbiology Laboratory (with a grade of C or higher)	2

Additional microbiology and immunology courses (prefix MICR), with at least 16 s.h. in courses numbered MICR:3147 or above, excluding MICR:3164. Students select from the following:

MICR:3147	Immunology and Human Disease	3
MICR:3150	Eukaryotic Pathogens and Human Disease	2
MICR:3159	Bacteria and Human Disease	3
MICR:3160	Bacterial Physiology and Cell Biology	2
MICR:3165	Bacteria and Human Disease Laboratory and Discussion	3
MICR:3168	Viruses and Human Disease	3
MICR:3170	Microbial Genetics	2
MICR:3177	Virology Discussion	1
MICR:3178	Virology Laboratory	2
MICR:4161	Undergraduate Research in Microbiology	arr.
MICR:4171	Honors Undergraduate Research in Microbiology	arr.
MICR:5218	Microscopy for Biomedical Research	arr.

Students must earn a grade of C or higher in BIOL:1411 Foundations of Biology, or in MICR:2157 General Microbiology and MICR:2158 General Microbiology Laboratory, in order to take more advanced Department of Microbiology and Immunology courses.

A maximum of 4 s.h. earned in MICR:4161 Undergraduate Research in Microbiology may be counted toward the major. However, honors students must complete 23 s.h. of microbiology and immunology courses (prefix MICR) for the major and may count 6 s.h. earned in MICR:4171 Honors Undergraduate Research in Microbiology; see Honors [p. 1717] in this section of the Catalog.

Supporting Coursework

Pre-medicine and scholar track students must complete the supporting coursework listed below. These courses may not be taken pass/nonpass.

Code	Title	Hours
All of these:		
BIOL:1411-	Foundations of Biology	8
BIOL:1412	- Diversity of Form and Function	
CHEM:1110 & CHEM:1120	Principles of Chemistry I-II	8
CHEM:2210	Organic Chemistry I	3
BIOC:3120 & BIOC:3130	Biochemistry and Molecular Biology I-II	6
One of these:		
BIOS:4120	Introduction to Biostatistics	3
MATH:1460	Calculus for the Biological Sciences	4
MATH:1550	Engineering Mathematics I: Single Variable Calculus	4
MATH:1850	Calculus I	4
STAT:3510/IGPI:3510	Biostatistics	3
In addition, the following course may be recommended for some students:		
CNW:2680	The Art and Craft of Creative Nonfiction	3

Pre-Medicine Track

Pre-medicine track students must complete the following coursework. These courses may not be taken pass/nonpass.

Code	Title	Hours
Both of these:		
CHEM:2220	Organic Chemistry II	3
CHEM:2410	Organic Chemistry Laboratory	3
One of these sequences:		
PHYS:1511- PHYS:1512	College Physics I-II	8
PHYS:1611- PHYS:1612	Introductory Physics I-II	8

Scholar Track

Scholar track students must complete the following coursework. These courses may not be taken pass/nonpass.

Code	Title	Hours
This course:		
PHYS:1400	Basic Physics	4
One of these:		
GHS:2000/ ANTH:2103	Introduction to Global Health Studies	3
GHS:2320/ ANTH:2320	Origins of Human Infectious Disease	3

Scholar track students must earn an additional 4 s.h. of advanced coursework chosen from the following.

Code	Title	Hours
BIOL:4213/ GENE:4213/ IGPI:4213	Bioinformatics	2,4
GHS:2000/ ANTH:2103	Introduction to Global Health Studies	3
GHS:2080/ GWSS:2080	The Cultural Politics of HIV-AIDS	3
GHS:2320/ ANTH:2320	Origins of Human Infectious Disease	3

Additional work in Department of Microbiology and Immunology courses numbered MICR:3147 or above, excluding MICR:3164

Scholar track students must take at least one microbiology and immunology advanced laboratory or research course from these.

Code	Title	Hours
MICR:3165	Bacteria and Human Disease Laboratory and Discussion	3
MICR:3178	Virology Laboratory	2
MICR:4161	Undergraduate Research in Microbiology	arr.
MICR:4171	Honors Undergraduate Research in Microbiology	arr.

Combined Programs

B.S./Ph.D.

Students majoring in microbiology who are interested in earning a doctoral degree may apply to the combined

Bachelor of Science/Doctor of Philosophy in microbiology program. The combined program permits students to count 12 s.h. of credit toward both the B.S. and Ph.D. degree requirements before they have been granted the B.S. degree.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information, contact the Department of Microbiology and Immunology.

Honors

Honors in the Major

Students majoring in microbiology (either track) have the opportunity to graduate with honors in the major. They must maintain a cumulative University of Iowa g.p.a. of at least 3.33 and a g.p.a. of at least 3.33 in work for the major. To graduate with honors in the microbiology major, students must complete 23 s.h. of coursework in microbiology, including 6 s.h. in MICR:4171 Honors Undergraduate Research in Microbiology, which introduces them to experimental research. At the end of their research, they must successfully present written and oral reports.

University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the University's honors program.

Membership in the UI Honors Program is not required to earn honors in the microbiology major.

Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Before the third semester begins: BIOL:1411 Foundations of Biology, CHEM:1110 Principles of Chemistry I, CHEM:1120 Principles of Chemistry II, and an approved calculus or biostatistics course

Before the fifth semester begins: BIOL:1412 Diversity of Form and Function, CHEM:2210 Organic Chemistry I, MICR:2157 General Microbiology, and MICR:2158 General Microbiology Laboratory

Before the seventh semester begins: seven more courses in the major and at least 90 s.h. earned toward the degree

Before the eighth semester begins: another 10-12 s.h. of coursework

During the eighth semester: enrollment in all remaining coursework in the major, all remaining required GE CLAS Core courses, and a sufficient number of semester hours to graduate

Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Microbiology, B.S.

Elective course ^d		3
Elective course ^d		3
Degree Application: apply on MyUI before deadline (typically in February for spring, September for fall)		

Hours		15-17
Total Hours		125-136

- a Fulfills a major requirement and may fulfill a GE requirement.
- b Enrollment in chemistry courses requires completion of a placement exam.
- c Enrollment in math courses requires completion of a placement exam.
- d Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
- e GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
- f Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
- g Students must complete at least 16 s.h. in approved microbiology and immunology courses.
- h Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>. If applicable search for "Early and Late Participation" to find this page (e.g. participate in graduation ceremony in May, degree conferral in August).

Career Advancement

Graduates find employment opportunities in government, hospitals, public health laboratories, research laboratories, and industrial laboratories (food, dairy, chemical, pharmaceutical, and biotechnology companies). Those who pursue advanced degrees have more advanced career opportunities in these same areas, with greater responsibilities and higher salaries, as well as in college and university teaching.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Microbiology, Minor

Requirements

The undergraduate minor in microbiology requires a minimum of 15 s.h. in Department of Microbiology and Immunology courses (prefix MICR), including 12 s.h. in courses considered advanced for the minor taken at the University of Iowa. Courses numbered MICR:3147 Immunology and Human Disease and above are considered advanced for the minor, excluding MICR:3164 Microbiology and Human Health. Students must maintain a g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.

Students may count a maximum of 2 s.h. earned in MICR:4161 Undergraduate Research in Microbiology or MICR:4171 Honors Undergraduate Research in Microbiology toward the minor. They also may count MICR:5218 Microscopy for Biomedical Research toward the minor.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Microbiology, Minor

Total Hours	25
-------------	----

- a Prerequisite for BIOL:1411, which is a prerequisite for all advanced microbiology courses.
- b Enrollment in chemistry courses requires completion of a placement exam.
- c Prerequisite for all advanced microbiology courses.
- d Prerequisite with a grade of C or higher for most advanced microbiology courses.
- e Prerequisite with a grade of C or higher for advanced microbiology laboratory courses.
- f Courses numbered MICR:3147 and above are considered advanced for the minor, excluding MICR:3164.

Microbiology, M.S.

Requirements

The Master of Science program in microbiology requires a minimum of 30 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 2.80 to earn the degree. They are required to earn a minimum of 12 s.h. in microbiology courses chosen from three of the department's six subdisciplines. They may substitute a course they have already taken (at the University of Iowa or elsewhere) for a course requirement, with the M.S. advisory committee's approval.

Additional course requirements depend on students' interests and the advice of the examining committee. Students must write a thesis based on their own research and defend it satisfactorily in an oral examination. No more than 9 s.h. of credit for thesis research may be counted toward the 30 s.h. required for the degree.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website. They should have a cumulative g.p.a. of at least 3.00 and must have completed courses in biology, chemistry (inorganic and organic), mathematics including calculus, and physics. Those admitted with deficiencies must complete the relevant course work during their first year of graduate study. Admission is determined through a review and formal vote by the faculty.

Preference is given to students applying to the Ph.D. program.

Microbiology, Ph.D.

Graduate study in microbiology is designed to help students become highly qualified in microbiology research and teaching. Ph.D. students develop expertise in research in a specific area of microbiology and/or immunology.

Faculty members have strengths in bacterial genetics and physiology, animal virology, pathogenic bacteriology and virology, and immunology. Areas of research include bioinformatics, cellular microbiology, molecular virology and immunology, bacterial biochemistry and physiology, bioremediation, bacterial and viral pathogenesis, and molecular parasitology. Working in the laboratory of their Ph.D. advisor, students learn to define and experimentally investigate scientific questions and to conduct original research in preparation for positions in academia, government, and industry.

Requirements

The Doctor of Philosophy in microbiology requires a minimum of 72 s.h. of graduate credit, including at least 12 s.h. of graded coursework. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the degree. Qualified students interested in earning the Doctor of Medicine along with the Ph.D. may apply to the Medical Scientist Training Program [p. 1711], which offers a combined M.D./Ph.D. program.

Students have the opportunity to tailor their curriculum with courses that enhance their educational goals. They take a combination of graduate-level courses that include seminar courses.

The Ph.D. with a major in microbiology requires the following coursework.

Core Curriculum

Code	Title	Hours
MICR:7263	Graduate Student Research Seminar	1
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/ Responsible Conduct of Research II	0

Additional courses offered by the Department of Microbiology and Immunology and other departments, as appropriate for each student

Typical Two-Year Curriculum

First Three Semesters

Students enroll for 12 s.h. in the first three semesters and select courses from the following.

First Year, Fall

Code	Title	Hours
MICR:6247/ IMMU:6247	Graduate Immunology and Human Disease	4
MICR:6255	Graduate Experimental Approaches to Molecular Microbiology	2

MICR:6267	Graduate Viruses and Human Disease	4
MICR:6270	Graduate Microbial Genetics	2

First Year, Spring

Code	Title	Hours
MICR:6201/ IMMU:6201	Graduate Immunology	3
MICR:6240	Graduate Eukaryotic Pathogens and Human Disease	2
MICR:6259	Graduate Bacteria and Human Disease	3
MICR:6260	Graduate Bacterial Physiology and Cell Biology	2
MICR:6268	Biology and Pathogenesis of Viruses	2
MICR:7265	Topics in Virology Literature	1

Examples of Elective Coursework

Code	Title	Hours
BIOL:4213/ GENE:4213/ IGPI:4213	Bioinformatics	2,4
BIOL:5320/ BME:5330/ ECE:5220/ GENE:5173/ IGPI:5330	Computational Genomics	3
BMED:5207	Principles of Molecular and Cellular Biology	3
MMED:6220/ ACB:6220/ MPB:6220	Mechanisms of Cellular Organization	3

Additional Requirements

Laboratory Rotations

Graduate students rotate through two to three different laboratories during their first academic year. The laboratory rotations are approximately ten weeks each. At the conclusion of each rotation, a student meets with the rotation mentor for an exit interview and an evaluation of the student's performance. This evaluation becomes part of the student's departmental record. The student also is required to present the research completed during the rotation in the graduate seminar course.

Teaching

Graduate students participate in the formal teaching activities of the department for at least two semesters. First-year students as well as students who are within a year of receiving the Ph.D. degree typically are not asked to teach. Teaching may take a variety of forms, including tutoring, leading discussions and laboratory groups, correcting examinations, preparing teaching materials, and lecturing.

Comprehensive Examination

The comprehensive examination is designed to measure a student's ability to write and defend a research proposal. The format of this proposal follows guidelines for research proposals outlined by major external funding agencies (i.e., National Institutes of Health (NIH), National Science

Foundation (NSF), and U.S. Department of Agriculture (USDA). Guidance, in the design of these proposals, is provided by the director of graduate studies and the student's comprehensive examination committee.

Written Examination

During the spring semester of the second year, a student prepares a detailed research proposal. The topic of the research proposal is determined in collaboration with the comprehensive examination committee. A detailed guide can be found in the Graduate Program in Microbiology Graduate Student Handbook on the Department of Microbiology and Immunology website.

Oral Examination

Questions during the oral examination may come from the examination proposal, coursework, or other general areas of microbiology. In order to pass the comprehensive examination, a student must satisfactorily defend the written research proposal and answer questions of general microbiology that are germane to the proposal or that are important for a full understanding of the proposed experiments and their interpretation.

Final Examination

The five-member Ph.D. thesis committee serves as an advisory body for preparation of the thesis. This committee meets with the student to review the material that is expected to be incorporated in the thesis. Although meetings of the candidate with the committee should be yearly, the candidate, thesis advisor, or the committee can request a meeting at any time. A final draft of the thesis must be given to all members of the committee two weeks before the final examination. The final examination takes the form of a seminar presented to the department. This presentation is announced according to the Graduate College policy. Questions, comments, and discussion will follow. After the seminar, the candidate meets with the committee for the final thesis defense. The Ph.D. degree is not awarded until the thesis is signed. In some cases, revisions may be required.

Combined Programs

Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in microbiology in a combined degree program offered by the Department of Microbiology and Immunology and the Carver College of Medicine. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1711] (Carver College of Medicine) in the Catalog.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website. They should have a cumulative g.p.a. of at least 3.00 and must have completed courses in biology, chemistry (inorganic and organic), mathematics including calculus, and physics. Those admitted with deficiencies must complete the relevant course work during their first year of graduate study. Admission is determined through a review and formal vote by the faculty.

Financial Support

Graduate student tuition, benefits, and a stipend are fully supported during Ph.D. training, which typically spans five years.

Career Advancement

Graduates typically pursue research or teaching positions.

Molecular Physiology and Biophysics

Chair

- Kevin P. Campbell

Executive Associate Chair

- W. Scott Moye-Rowley

Faculty: <https://medicine.uiowa.edu/physiology/people/primary-appointments>

Website: <https://medicine.uiowa.edu/physiology/>

The Department of Molecular Physiology and Biophysics participates in interdisciplinary graduate programs, including the Medical Scientist Training [p. 1711] Program, a combined M.D./Ph.D. program offered by the Graduate College and the Carver College of Medicine, and it provides instruction in molecular physiology and biophysics for M.D., D.D.S., and other health professions students. The department also conducts a co-op exchange, a vigorous training program that gives undergraduate students the opportunity to develop as independent researchers in preparation for graduate studies.

The department's principal research areas include cell biology, genetics, endocrinology, neuroscience, and membrane physiology and biophysics. The unifying theme is the understanding of signal transduction mechanisms involved in regulating function at the cellular and molecular levels.

Research

Faculty research interests in the Department of Molecular Physiology and Biophysics encompass molecular and cellular endocrinology, cellular and developmental neurophysiology, and membrane structure and function. Within these, there are multiple areas of interest, including hormone receptors, reproductive endocrinology, signal transduction, regulation of gene expression, synaptic transmission, neuronal differentiation, membrane ion channels, regulation of excitability, and cardiovascular electrophysiology and regulation. Experimental models currently being investigated include rodents, yeast, *Drosophila*, and cultured cell lines from a variety of species.

Programs

Graduate Programs of Study

Majors

- Master of Science in Molecular Physiology and Biophysics
- Doctor of Philosophy in Molecular Physiology and Biophysics

Students interested in doctoral studies in molecular physiology and biophysics should apply under the umbrella program in Biomedical Science [p. 1549] (select molecular physiology and biophysics subprogram). Direct applications to the M.S. and Ph.D. in molecular physiology and biophysics are not currently being considered.

Facilities

Two floors of the Bowen Science Building are devoted to research and teaching in the Department of Molecular Physiology and Biophysics. Department faculty members also

occupy laboratory facilities in the Medical Education Research Facility, Pappajohn Biomedical Discovery Building, and the Carver Biomedical Research Building. In addition to specialized equipment in faculty research laboratories, the department provides equipment for fluorescence microscopy, isotope analysis, cell culture, and molecular biology. It also has access to the University network and the multimedia education facilities. Additional resources are available at the Hardin Library for the Health Sciences.

Courses

Molecular Physiology and Biophysics Courses

MPB:4199 Research, Independent Study **arr.**
Recommendations: closed to molecular physiology and biophysics graduate students.

MPB:5153 Graduate Physiology **4 s.h.**
Principles of human physiology, organ systems, cell function. Offered fall semesters. Requirements: grades of C- or higher in BIOL:1411 and CHEM:2210 and CHEM:2220, and graduate standing.

MPB:5200 Medical Physiology Online **5 s.h.**
Fundamental principles of cellular membranes, muscle, sensory organs, motor neurological systems, autonomic nervous systems, cardiovascular, pulmonary, renal, gastrointestinal, endocrine, and reproductive systems; interdependence of organ systems to maintain a normal physiological state using clinical correlates as applied to humans; basic physiological principles that establish a solid foundation for future pathophysiological and pharmacological concepts. Recommendations: medical, dental, physician assistant, nurse anesthesia, physical therapy, or graduate standing.

MPB:5201 Advanced Physiology Online **3 s.h.**
Examination of cellular and organ systems of medical physiology; fundamental principles of cellular membranes including muscle, sensory organs, motor neurological systems, autonomic nervous system, cardiovascular, pulmonary, renal, gastrointestinal, endocrine, and reproductive physiology; emphasis on interdependence of organ systems to maintain a normal physiological state (homeostasis) using clinical correlates as applied to humans; basic physiological principles that establish a solid foundation for future pathophysiological and pharmacological concepts.

MPB:5241 Neuromuscular Diseases: Case-Based Seminar **1 s.h.**

MPB:6209 Steroid Receptor Signaling **1 s.h.**
Structure-function relationship and genomic and nongenomic actions of the steroid hormone receptor family; basis for actions of novel new ligands on these receptors. Offered spring semesters of even years. Same as NSCI:6209, PCOL:6209.

MPB:6220 Mechanisms of Cellular Organization **3 s.h.**
Current understanding of basic cell biological processes; key experiments that led to guiding insights; mechanisms that cells use for compartmentalization and how those mechanisms are regulated; biogenesis of major organelles (e.g., mitochondria, peroxisomes, nucleus, secretory/endocytic membrane system); functions of cytoskeleton in cell motility, organelle motility, and cell division. Prerequisites: BIOC:3130. Same as ACB:6220, MMED:6220.

MPB:6225 Growth Factor Receptor Signaling 1 s.h.

Mechanisms of signaling by growth factors; cytokines and related molecules that regulate cell proliferation, development, differentiation, and survival; emphasis on molecular mechanisms of signaling, relevance of these signaling processes to various human diseases. Same as ACB:6225, MMED:6225.

MPB:6226 Cell Cycle Control 1 s.h.

Cell cycle regulation, DNA damage-dependent cell cycle regulation, redox-dependent cell cycle regulation, cellular senescence. Same as ACB:6226, MMED:6226.

MPB:6227 Cell Fate Decisions 1 s.h.

Cellular fate decisions including signal integration, terminal differentiation in development, mechanisms of embryonic stem cell gene regulation/cellular reprogramming, cell death paradigms, and cell death in development and cancer. Same as ACB:6227, MMED:6227.

MPB:6265 Neuroscience Seminar 0-1 s.h.

Research presentations. Same as ACB:6265, BIOL:6265, NSCI:6265, PSY:6265.

MPB:6302 Research Physiology and Biophysics arr.

Requirements: molecular physiology and biophysics graduate standing.

MPB:7402 Thesis arr.

Requirements: molecular physiology and biophysics Ph.D. candidacy.

MPB:8115 Human Physiology for Dental Students 4 s.h.

Principles of human physiology, organ systems, cell function. Offered fall semesters. Requirements: grades of C- or higher in BIOL:1411, CHEM:2210, and CHEM:2220; and D.D.S. enrollment.

Neurology

Chair

- George B. Richerson

Faculty: <https://medicine.uiowa.edu/neurology/people/primary-appointments>

Website: <https://medicine.uiowa.edu/neurology/>

Neurology is the branch of medical science concerned with diagnosis and management of disorders of the brain, spinal cord, peripheral nervous system, and muscle.

The Department of Neurology's hallmark is its history of carefully integrating patient care, scientific investigation, and the education of medical, postdoctoral, and graduate students. The department also offers research opportunities in various fields of neuroscience including neuropsychology, neuroimaging, and neuroanatomy to Ph.D. students in neuroscience and psychology.

Research

The faculty's investigative interests center on cognitive neuroscience, degenerative diseases, cerebrovascular disease, neurogenetics, neuromuscular diseases, electrophysiological correlates of central and peripheral nervous system disease, growth factors in the nervous system, control and regulation of autonomic functions, neuro-ophthalmology, movement disorders, epilepsy, and pain management. For more information see the Department of Neurology website.

M.D. Training

The department provides clinical and clinical research training to second-, third-, and fourth-year M.D. students.

Residency

The Department of Neurology offers an active, four-year approved residency program that qualifies physician trainees for board certification in neurology. Experience in clinical electrophysiology, pediatric neurology, psychiatry, and neuropathology is part of this training.

Courses

Neurology Courses

NEUR:5365 Seminar: Neuropsychology and Neuroscience arr.

Clinical neuropsychology and cognitive neuroscience: cutting-edge research from scientific journals, case presentations in clinical neuropsychology, and current research. Same as NSCI:5365, PSY:5365.

NEUR:6240 Topics in Cognitive Neuroscience 1-3 s.h.

Key topics in the neural basis of human cognition; research literature. Recommendations: graduate courses in basic neuroscience and cognitive psychology. Same as NSCI:6240.

NEUR:7235 Neurobiology of Disease 3 s.h.

Broad, thematic understanding of disease mechanisms in neurobiological disorders. Same as NSCI:7235.

NEUR:7238 Introduction to Neuropsychological Assessment arr.

Standard neuropsychological and behavioral assessment procedures; selection, administration, and scoring of neuropsychological tests under staff supervision; involvement in case presentation.

NEUR:7239 Advanced Neuropsychological Assessment arr.

Continuation of NEUR:7238; preparation of integrated reports on collected data; case presentations.

NEUR:8301 Clinical Neurology 2,4 s.h.

Experience in clinical neurology through ward work and case-based conferences linked to required reading; focus on neurologic examination, diagnosis of neurologic problems.

NEUR:8401 Advanced Inpatient Neurology 2,4 s.h.

Experience and management of patients with seizure disorders, headache, cerebrovascular diseases; conferences, clinical rounds; two weeks on each inpatient service for a total of four weeks. Prerequisites: NEUR:8301.

NEUR:8402 Advanced Outpatient Neurology 2,4 s.h.

Experience in evaluation, management of patients with various neurologic diseases; four weeks in clinic patient care. Prerequisites: NEUR:8301.

NEUR:8404 Advanced Inpatient Subinternship in Neurology 4 s.h.

Care of patients with acute and serious neurological diseases, management of patients with varied cerebrovascular diseases; treatment of acute brain disease, comorbid medical diseases, medical and neurological complications that occur among patients with stroke; clinical assessments of patients, writing orders and clinical notes, contribution to rounds; close communication with patients, families, and colleagues; assignment to evening calls for emergency visits and consultations.

NEUR:8497 Research in Neurology arr.

Medical research, clinical or laboratory projects; individual study.

NEUR:8498 Neurology On Campus arr.

NEUR:8499 Neurology Off Campus arr.

Neuroscience and Pharmacology

Chair

- Edwin "Ted" G. Abel

Faculty: <https://medicine.uiowa.edu/neuroscience-and-pharmacology/people>

Website: <https://medicine.uiowa.edu/neuroscience-and-pharmacology/>

The Department of Neuroscience and Pharmacology provides professional training for health science students and participates with other departments in educational and research activities such as the Medical Scientist Training [p. 1711] Program, the Physician Scientist Training Pathway, the Molecular Medicine [p. 1609] Program, the Neuroscience [p. 1611] Program, the Holden Comprehensive Cancer Center, the Abboud Cardiovascular Research Center, and the UI Fraternal Order of Eagles Diabetes Research Center.

The department was a pioneer in offering pharmacology to undergraduate students with little or no science background. Currently, undergraduates can enroll in PCOL:2220 Drug Use and Abuse. This course emphasizes the mechanisms of drug action and give students a background for rational decisions concerning use of drugs.

Department of Neuroscience and Pharmacology graduate study includes both didactic and research experience. Students interested in doctoral studies should apply under the umbrella program in Biomedical Science [p. 1549] (pharmacology subprogram). Qualified students may pursue the combined M.D./Ph.D. in the University's Medical Scientist Training Program.

Pre- and postdoctoral students pursue research training in all areas of neuroscience and pharmacology in the department in preparation for career opportunities in academia, government, and industry.

Programs

Graduate Programs of Study

Majors

- Master of Science in Pharmacology
- Doctor of Philosophy in Pharmacology

Students interested in doctoral studies in pharmacology should apply under the umbrella program in Biomedical Science [p. 1549] (select pharmacology subprogram). Direct applications to the M.S. and Ph.D. in pharmacology are not currently being considered.

Courses

Neuroscience and Pharmacology Courses

PCOL:2220 Drug Use and Abuse 3 s.h.

Principles of drug action, toxicity, sedatives, stimulants, hallucinogens, narcotics, over-the-counter agents, antibiotics, and oral contraceptives. Offered spring semesters. Requirements: closed to students enrolled in the Pharm.D. program. GE: Natural Sciences without Lab.

PCOL:3101 Pharmacology I: A Drug's Fantastic Journey 2-3 s.h.

Introduction to basic pharmacological principles by following a drug's journey from its site of administration to its site of elimination; common mechanisms by which drugs affect the body and mechanisms underlying drug actions on two primary body systems—nervous and cardiovascular; structured learning environment bolstered by highly interactive application sessions where students apply course material via collaborative work on problem sets/activities; for students interested in medicine, pharmacy, research, and industry. Prerequisites: CHEM:1110 and BIOL:1411. Recommendations: additional higher-level biology and chemistry courses helpful.

PCOL:3102 Pharmacology II: Mechanisms of Drug Action 3 s.h.

Expansion of basic pharmacological concepts and further exploration of how they are applied to define a drug's actions on the body; students continue their exploration of the body by discussing various disorders including neuropsychiatric and immune disorders, cancer, diabetes, and microbial infections in conjunction with current treatments; structured learning environment bolstered by highly interactive discussion sessions where students learn to apply course material via collaborative work on problem sets/activities; for students interested in medicine, pharmacy, research, and industry. Prerequisites: PCOL:3101. Recommendations: additional higher-level courses in biology and chemistry helpful.

PCOL:4130 Drug Mechanisms and Actions 3 s.h.

Introduction to principles of pharmacology, pharmacologic actions of drugs. Offered spring semesters. Requirements: undergraduate biochemistry and physiology courses.

PCOL:4199 Undergraduate Research in Neuroscience and Pharmacology arr.

Experimental research under faculty supervision in department laboratories.

PCOL:5130 Fundamentals of Pharmacology 3 s.h.

Basic pharmacological principles underlying drug absorption, distribution, and metabolism; how these processes determine drug dosing; drug receptor interactions and their quantitation; impact of genetic variation on the actions and metabolism of drugs; mechanisms of neurotransmission focusing on synthesis, release, actions, and degradation; central nervous system (CNS) pathways for major neurotransmitters; disease states involving various abnormal neurotransmitter function. Offered spring semesters.

PCOL:5135 Principles of Pharmacology 1 s.h.

Basic pharmacological principles underlying drug absorption, drug distribution throughout the body, drug metabolism, and drug elimination; how these processes determine drug dosing and the means by which dosing parameters are characterized; drug receptor interactions and their quantitation. Offered spring semesters.

- PCOL:5136 Pharmacogenetics and Pharmacogenomics** 1 s.h.
Impact of genetic variation on the actions and metabolism of drugs; database search techniques to identify variants. Offered spring semesters. Prerequisites: PCOL:5135. Recommendations: undergraduate or graduate biochemistry and/or genetics.
- PCOL:5137 Neurotransmitters** 1 s.h.
Mechanisms of neurotransmission focusing on mechanisms of synthesis, regulation of release, mechanisms of action, means of degradation, and CNS pathways for major neurotransmitters; disease states involving various neurotransmitter systems. Offered spring semesters.
- PCOL:5204 Basic Biostatistics and Experimental Design** 1 s.h.
Overview of theory of experimental design and data analysis in biological sciences; types of analyses available for common types of data generated in biomedical sciences; review of statistical methods used in published studies; cursory coverage of mathematical computations involved in various analytical tests. Offered fall semesters.
- PCOL:6015 Topics in Pharmacology and Neuroscience** 1 s.h.
Recent advances in pharmacology, neuropharmacology, developmental neurobiology, neuroendocrinology, and related neurosciences.
- PCOL:6020 Topics in Pharmacogenomics** 1 s.h.
Recent advances in pharmacogenomics, pharmacogenetics, and related genetic fields. Offered fall semesters.
- PCOL:6025 Topics in Cell Signaling and Cancer** 1 s.h.
Recent advances in cell signaling mechanisms, mechanisms of cancer, cancer biology, and related sciences. Offered spring semesters.
- PCOL:6030 Topics in Cardiovascular Pharmacology** 1 s.h.
Recent advances in cardiovascular pharmacology, metabolic pharmacology, and related sciences. Offered spring semesters.
- PCOL:6080 Pharmacology Seminar** 1 s.h.
- PCOL:6090 Graduate Research in Pharmacology** arr.
- PCOL:6099 Special Topics in Pharmacology** arr.
- PCOL:6203 Pharmacology for Graduate Students** 6 s.h.
Principles of pharmacology, pharmacologic actions of drugs, correlation with therapeutic uses. Offered fall semesters. Prerequisites: BIOC:5243 and MPB:5153.
- PCOL:6204 Pharmacology for Health Sciences: Nurse Anesthetist** 5 s.h.
Principles of pharmacology; pharmacologic actions of drugs, correlation with therapeutic uses. Offered fall semesters. Prerequisites: ACB:6000 or NURS:6000. Requirements: enrollment in Anesthesia Nursing Program.
- PCOL:6207 Ion Channel Pharmacology** 1 s.h.
Heuristic, semiquantitative approach to concepts in ion channel physiology and pharmacology; up-to-date physical principles, classification, and structure/function relationships for major voltage-gated ion channels that facilitate application of abstract concepts to physiological, pharmacological, and general biological problems. Offered spring semesters.
- PCOL:6208 G Proteins and G Protein-Coupled Receptors** 1 s.h.
Structure and function of small molecular weight and G proteins; heteromeric G proteins and G protein-coupled receptors. Offered spring semesters of even years. Prerequisites: BIOC:5243. Recommendations: MMED:6225.
- PCOL:6209 Steroid Receptor Signaling** 1 s.h.
Structure-function relationship and genomic and nongenomic actions of the steroid hormone receptor family; basis for actions of novel new ligands on these receptors. Offered spring semesters of even years. Same as MPB:6209, NSCI:6209.
- PCOL:6210 Receptors and Cell Signaling** 3 s.h.
Mechanisms of signaling by growth factors, cytokines and related molecules; principles of ion channel physiology and pharmacology; structure-function relationships of small molecular weight and heteromeric G proteins; G protein-coupled receptors; genomic and nongenomic actions of intracellular receptors; basis for actions of novel new ligands on intracellular receptors. Offered spring semesters.
- PCOL:6225 Growth Factor Receptor Signaling** 1 s.h.
Mechanisms of signaling by growth factors; cytokines and related molecules that regulate cell proliferation, development, differentiation, and survival; emphasis on molecular mechanisms of signaling, relevance of these signaling processes to various human diseases. Same as ACB:6225, MMED:6225, MPB:6225.
- PCOL:6250 Advanced Problem Solving in Pharmacological Sciences** 1 s.h.
Discussion of methodologies, strategies, and approaches commonly used to solve pharmacological sciences problems; use of interpersonal problem-solving skills to develop experimental study plans for solving contemporary scientific problems in pharmacology. Offered fall and spring semesters.

Neurosurgery

NSG:8499 Neurosurgery Off Campus
Arranged by student with department approval.

arr.

Chair

- Matthew A. Howard

Faculty: <https://medicine.uiowa.edu/neurosurgery/people/primary-appointments>

Website: <https://medicine.uiowa.edu/neurosurgery/>

The Department of Neurosurgery provides an experience oriented toward patient care and basic research concerning diseases and physiology of the nervous system. Students develop awareness of neurosurgery's role in treating head and spine trauma, vascular disorders, brain and spinal cord tumors, pain and peripheral nerve abnormalities, degenerative spine pathology, and surgical treatment of epilepsy and movement disorders.

Clinical courses are designed around patient-centered discussions interwoven with operating room experiences. Lectures and conferences are scheduled on specific topics.

Faculty

Neurosurgery faculty strengths are centered in physiology of spinal cord trauma, epilepsy, auditory brain function and pain, primary brain tumor genetics, central nervous system tissue culture, spinal column biomechanics, and movement disorders. The department has expertise in clinical management across the spectrum of central nervous system diseases.

M.D. Training

The department provides third- and fourth-year M.D. students with access to special expertise in selected topics of investigation regarding the central nervous system and to a clinical course through special arrangements with the faculty.

Facilities

Multiple, fully equipped laboratory space is available to support scientific research of the central nervous system. Faculty and technical assistance is available in all laboratories.

Courses

Neurosurgery courses are open only to M.D. and qualified associated health sciences students.

Neurosurgery Courses

NSG:8401 Advanced Inpatient Subinternship in Neurosurgery **4 s.h.**

Advanced clinical clerkship in neurological surgery; emphasis on diagnosis and operative management of surgical neurological disease.

NSG:8497 Research in Neurological Surgery **arr.**

Laboratory investigation of spinal cord injury, spinal column biomechanics and instrumentation, electrophysiology of pain, epilepsy and hearing, molecular genetics and physiology of brain tumors.

NSG:8498 Neurosurgery On Campus **arr.**

Clinical clerkship; individually arranged by student with departmental approval.

Nuclear Medicine Technology

Director

- Anthony W. Knight

Director, Medical

- Yusuf Menda

Director, Technical

- Daniel Petersen

Undergraduate major: nuclear medicine technology (B.S.)

Website: <https://medicine.uiowa.edu/radsci/programs/nuclear-medicine-technology>

Nuclear medicine technologists are professionals in a medical specialty that uses radioactive tracers for diagnostic, therapeutic, and research purposes. Technologists generally are employed in hospitals and clinics. They work hand-in-hand with nuclear medicine physicians, health physicists, radiopharmacists, and radiochemists as an integral part of a highly trained specialty team.

In addition to using sophisticated detectors and computers to trace the movement and localization of radioactive tracers in the human body, nuclear medicine technologists have responsibilities that include radiation safety, quality control testing, radiopharmaceutical preparation and administration, and general patient care.

The Nuclear Medicine Technology Program is fully accredited by the Joint Review Committee on Educational Programs in Nuclear Medicine Technology (JRCNMT). Nuclear medicine technology is one of two undergraduate majors in the field of medical imaging offered by the Carver College of Medicine. Students interested in radiologic technology, computed tomography, magnetic resonance imaging, cardiovascular interventional radiology, diagnostic medical sonography, or radiation therapy may complete the major in radiation sciences; see Radiation Sciences [p. 1772] in the Catalog.

The Carver College of Medicine is located on the University of Iowa health sciences campus, which includes University of Iowa Hospitals & Clinics, one of the nation's largest university-owned teaching hospitals. For information about the college's academic programs and resources, see Carver College of Medicine [p. 1658] in the Catalog.

Programs

Undergraduate Program of Study

Major

- Major in Nuclear Medicine Technology (Bachelor of Science) [p. 1732]

Courses

Nuclear Medicine Technology Courses

RSNM:3120 Fundamentals of Nuclear Medicine and PET 3 s.h.

Introduction to medical specialty of nuclear medicine and molecular imaging; basic theories of radiation protection, radiation physics and nuclear medicine instrumentation, radiopharmacy, nuclear medicine and positron emission tomography (PET) clinical procedures, professional standards of nuclear medicine technologist. Requirements: Nuclear Medicine Technology Program enrollment.

RSNM:3121 Nuclear Medicine Technology Clinical Internship I 3 s.h.

Hands-on clinical experience working with patients and performing routine nuclear medicine diagnostic imaging procedures under direct supervision of qualified clinical instructors. Requirements: Nuclear Medicine Technology Program enrollment.

RSNM:3131 Radiopharmaceuticals 3 s.h.

Introduction to radiopharmaceuticals; emphasis on physical, chemical, and biologic properties and their clinical use; fundamental aspects of radiopharmaceuticals including characteristics, preparation, quality control, and clinical use. Requirements: Nuclear Medicine Technology Program enrollment.

RSNM:3220 Nuclear Medicine and PET Clinical Procedures 3 s.h.

Proper execution of nuclear medicine and PET procedures from a technical point of view; published protocols and procedures specific to the University of Iowa Hospitals & Clinics; routine set up, common errors, artifact identification, computer processing protocols, and patient care concerns identified for each procedure; review of human anatomy, physiology, and pathology germane to understanding and proper execution of nuclear medicine procedures. Requirements: Nuclear Medicine Technology Program enrollment.

RSNM:3221 Nuclear Medicine Technology Clinical Internship II 3 s.h.

Progressive responsibility working with patients and performing nuclear medicine and PET clinical procedures under direct supervision of qualified clinical instructors. Requirements: Nuclear Medicine Technology Program enrollment.

RSNM:3231 Nuclear Medicine Instrumentation 3 s.h.

Instruments used in medical imaging to generate and detect ionizing radiation (i.e., SPECT/CT and PET/CT scanners, dose calibrators, well counters, survey meters); focus on instrument quality control testing. Requirements: Nuclear Medicine Technology Program enrollment.

RSNM:3321 Nuclear Medicine Technology Clinical Internship III 6 s.h.

Progressive responsibility working with patients and performing nuclear medicine and PET clinical procedures under direct supervision of qualified clinical instructors. Requirements: Nuclear Medicine Technology Program enrollment.

RSNM:4121 Nuclear Medicine Technology Clinical Internship IV **4 s.h.**

Progressive responsibility working with patients and performing nuclear medicine and PET clinical procedures under direct supervision of qualified clinical instructors. Requirements: Nuclear Medicine Technology Program enrollment.

RSNM:4221 Nuclear Medicine Technology Clinical Internship V **4 s.h.**

Progressive responsibility working with patients and performing nuclear medicine and PET clinical procedures under direct supervision of qualified clinical instructors. Requirements: Nuclear Medicine Technology Program enrollment.

RSNM:4222 Nuclear Medicine Technology Capstone and Certification Exam Preparation **6 s.h.**

Students in final semester of program work together to organize and deliver capstone and certification exam preparation course; review of specific topics and oral presentations by each student; preparation and distribution of detailed written outlines of exam content; series of content-specific quizzes, midterm, and final "Mock Board" exam to evaluate student learning and preparedness for taking the NMTCB and ARRT national certification exams; preparation and submission of capstone portfolios that provide evidence of scholarly and professional progress. Requirements: Nuclear Medicine Technology Program enrollment.

RSNM:4444 Independent Study in Nuclear Medicine Technology **arr.**

Topics not adequately covered by existing nuclear medicine technology or radiation science courses; students prepare a draft outline of a study plan and present it to appropriate faculty members for refinement and approval. Requirements: Nuclear Medicine Technology Program enrollment.

Nuclear Medicine Technology, B.S.

Undergraduate study in nuclear medicine technology is guided by the academic rules and procedures outlined under Undergraduate Rules and Procedures [p. 1659] in the Carver College of Medicine section of the Catalog.

Requirements

The Bachelor of Science with a major in nuclear medicine technology requires a minimum of 120 s.h. of credit. Work for the degree includes a set of courses that are prerequisite to entering the major, 60 s.h. of coursework in the major, and elective coursework sufficient to complete the minimum of 120 s.h. required for graduation. Students must maintain a cumulative g.p.a. of at least 2.00 and a grade of C or higher in each course required for the major (60 s.h.).

Students who plan to complete all requirements for the degree at the University of Iowa enter the University as students in the College of Liberal Arts and Sciences (CLAS) with a nuclear medicine technology interest. As CLAS students, they complete the coursework that is prerequisite to entering the major.

Admission to the major is competitive; the program accepts a maximum of eight students per year. Students must apply to the major by January 15 of the year in which they wish to enter the program. Personal interviews with qualified applicants are scheduled in February, and the class is selected by March 15. The program begins the following fall semester and lasts two years.

Applicants for admission to the University of Iowa whose first language is not English are strongly encouraged to complete the University of Iowa English Proficiency Evaluation and satisfy the University's English Proficiency Requirements before they apply to a professional program. Students must have permission to register for a full academic load before they may be admitted to the Nuclear Medicine Technology Program.

The nuclear medicine technology major requires students to complete a minimum of two years of a high school world language, or college-level coursework deemed by the University as equivalent, prior to admission.

Students who are admitted to the major become Carver College of Medicine students. Upon completing the program successfully, they are granted a Bachelor of Science degree. Graduates are eligible to apply for the nuclear medicine technology national certification examinations.

The program strongly advises students entering the University to pursue a course of study that is applicable to another major, most commonly biochemistry, biology, chemistry, or microbiology, so that if they are not admitted to the Nuclear Medicine Technology Program, they still may complete a major and receive a bachelor's degree.

The Bachelor of Science with a major in nuclear medicine technology requires the following work.

Prerequisites to the Nuclear Medicine Technology Major

Students must complete the following prerequisite courses and must have earned 60 s.h. of college credit with a

cumulative g.p.a. of at least 2.50 before they may enter the nuclear medicine technology major. In addition to providing a foundation for the major, the prerequisite courses are good preparation for other majors.

Rhetoric

Code	Title	Hours
RHET:1030	Rhetoric	4-5

Culture, Society, and the Arts

See GE CLAS Core [p. 20] (College of Liberal Arts and Sciences) in the Catalog for approved courses in the culture, society, and the arts areas.

Students complete two courses for 3 s.h. each in two of these areas (total of 6 s.h.):

Code	Title	Hours
	Diversity and Inclusion approved coursework	
	Historical Perspectives approved coursework	
	International and Global Issues approved coursework	
	Literary, Visual, and Performing Arts approved coursework	
	Values and Culture approved coursework	

Mathematics

Code	Title	Hours
One of these:		
MATH:1020	Elementary Functions	4
MATH:1440	Mathematics for the Biological Sciences	4

STAT:3510	Biostatistics	3
STAT:4143	Introduction to Statistical Methods	3
One of these:		
BAIS:1500	Business Computing Essentials	2
CS:1020	Principles of Computing	3

Prospective students are encouraged to consult the Nuclear Medicine Technology Program office to plan an appropriate pre-major program of study.

Coursework in the Major

Students admitted to the nuclear medicine technology major spend two years in a clinical curriculum that is organized in accordance with the Joint Review Committee on Educational Programs in Nuclear Medicine Technology (JRCNMT) Accreditation Standards for Nuclear Medicine Technologist Education. They complete coursework in the following areas:

radiopharmacy, radiation safety and radiobiology, patient care, nuclear medicine and positron emission tomography (PET) procedures, radiation physics and instrumentation, administration and management, medical and professional ethics, research methodology, and computed tomography (CT). Practical clinical rotations focus on nuclear medicine, PET and CT imaging, nuclear medicine therapy, clinical radiopharmacy, nuclear medicine computer applications, and quantification of radioactivity in vivo and in vitro.

Students must earn a grade of C or higher in each course required for the major.

The following coursework is required.

Code	Title	Hours
RSNM:3120	Fundamentals of Nuclear Medicine and PET	3
RSNM:3121	Nuclear Medicine Technology Clinical Internship I	3
RSNM:3131	Radiopharmaceuticals	3
RSNM:3220	Nuclear Medicine and PET Clinical Procedures	3

RSP:4110	Research Methodology for Radiation Sciences	3
Total Hours		60

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Nuclear Medicine Technology, B.S.

Course	Title	Hours
Academic Career		
Any Semester		

Students apply to the Nuclear Medicine Technology B.S. program through a selective process. Acceptance is not guaranteed.^a

Students must earn a grade of C or higher in all RS** courses.

The Nuclear Medicine Technology professional program is two years in duration.

Hours	0
-------	---

First Year

Any Semester

Recommended: health care experience (e.g. CNA), job shadowing in nuclear medicine and PET

Hours	0
-------	---

Fall

RHET:1030	Rhetoric	4
BIOL:1140	Human Biology ^b	4
PSY:1001	Elementary Psychology	3
RSP:1100	Introduction to the Radiation Sciences ^c	1

GE: General Education course (DI, IGI, HP, LVPA, or VC) ^d	3
--	---

Admission Application: students may be eligible to apply for early acceptance (typically due in January)^e

Hours	15
-------	----

Spring

Human Anatomy and Lab ^f	4 - 5	
CLSA:3750	Medical and Technical Terminology	2
MATH:1020	Elementary Functions ^g	4
or MATH:1440	or Mathematics for the Biological Sciences	

GE: General Education course (DI, IGI, HP, LVPA, or VC) ^d	3
--	---

Elective course	2
-----------------	---

Hours	15-16
-------	-------

Second Year

Fall

CHEM:1110	Principles of Chemistry I ^h	4
PHYS:1400	Basic Physics	3 - 4
or PHYS:1511	or College Physics I	
BAIS:1500	Business Computing Essentials ^c	2 - 3
or CS:1020	or Principles of Computing	

Elective course	3
-----------------	---

Elective course	2
-----------------	---

Admission Application: begin preparing materials for NMT program application (typically due in January)^e

Hours	14-16
-------	-------

Spring

CHEM:1120	Principles of Chemistry II ^c	4
STAT:1020	Elementary Statistics and Inference ^c	3
or STAT:4143	or Introduction to Statistical Methods	
or STAT:3510	or Biostatistics

RSNM:4222	Nuclear Medicine Technology Capstone and Certification Exam Preparation	6

RSP:3220 Radiation Sciences Quality
Management and Health Care
Administration 2

Exam: Upon completion of the program students are eligible to apply to take certification exams.

Degree Application: apply on MyUI before deadline (typically in February for spring, September for fall) ^j

Hours	12
Total Hours	120-124

- a The Academic Advising Center advises Nuclear Medicine Technology Interest students on prerequisite course planning. Students are advised for success, based on academic strength, not necessarily for a four year plan. Prerequisites may take more than two years to complete.
- b This course is strongly recommended to prepare for the anatomy and physiology courses.
- c This course is recommended not required.
- d Students must complete 6 s.h. by taking 3 s.h. courses from two of the following areas: Diversity and Inclusion, Historical Perspectives, International and Global Issues, Literary, Visual, and Performing Arts, or Values and Culture.
- e Please see the Radiation Sciences Programs' website and your academic advisor for detailed application instructions and deadlines.
- f Choose from: HHP:1150, HHP:3115, HHP:1100 and HHP:1110, ACB:3110 and HHP:1110.
- g Enrollment in math courses requires completion of a placement exam.
- h Enrollment in chemistry courses requires completion of a placement exam.
- i Choose from: HHP:1350, HHP:3550, HHP:1300 and HHP:1310, HHP:3500 and HHP:1310.
- j Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>

Career Advancement

The Nuclear Medicine Technology Program has a stellar record of job placement. Graduates typically work as nuclear medicine technologists, beginning as entry-level staff at hospitals or clinics. With experience, many earn advanced degrees in areas such as radiation biology, health physics, or medicine. Some work in the private sector as sales or marketing specialists in nuclear medicine.

Graduates also find career opportunities in education as instructors, coordinators, or program directors; and in administration, industry, or research and development. Those pursuing government-related jobs might find positions as regulatory agency inspectors or radiation safety officers. See the Occupational Outlook Handbook for nuclear medicine technologists on the United States Department of Labor Bureau of Labor Statistics website for career information and outlook.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Obstetrics and Gynecology

Chair

- Kimberly K. Leslie

Faculty: <https://medicine.uiowa.edu/obgyn/people/primary-appointments>

Website: <https://medicine.uiowa.edu/obgyn/>

Faculty in the Department of Obstetrics and Gynecology contribute to a wide spectrum of educational programs. A six-week core clerkship is taken by all Carver College of Medicine medical students. Subinternships are offered in high risk obstetrics (maternal fetal medicine) and gynecologic oncology. Advanced electives are offered in reproductive endocrinology and infertility, family planning, and night float and urogynecology. Approximately 12 physician assistant (PA) students also complete a one month rotation within the department as part of their training.

There are five Accreditation Council for Graduate Medical Education (ACGME) accredited fellowship programs—female pelvic medicine and reconstructive surgery (urogynecology), gynecologic oncology, maternal fetal medicine (high risk obstetrics), combined maternal fetal medicine/clinical genetics, and reproductive endocrinology and infertility.

M.D. Training

Courses supported by the Department of Obstetrics and Gynecology are designed to give medical students a comprehensive survey of female reproductive medicine. This is accomplished through a variety of didactic lectures, outpatient clinical assignments, inpatient rounds, and surgery.

The clerkship OBG:8301 Clinical Obstetrics and Gynecology supports students in developing the core knowledge, skills, and attitudes needed to provide basic obstetric, gynecology, and/or primary health care to female patients.

The department offers medical students a variety of advanced electives that provide training in specialty areas of obstetrics and gynecology.

Residency

The department offers a four-year obstetrics and gynecology residency. Upon completion, graduates are eligible to register and take the written and oral examinations leading to certification by the American Board of Obstetrics and Gynecology.

Residents are assigned to the various divisions and clinical services of the department. They care for hospital inpatients and outpatients with training in normal and abnormal obstetrics, gynecologic surgery, office gynecology, ultrasound, reproductive endocrinology, gynecologic oncology, urogynecology, family planning, and endoscopic procedures.

Courses

Obstetrics and Gynecology Courses

OBG:8301 Clinical Obstetrics and Gynecology arr.

Proficiency in evaluation and management of core women's health care relating to the reproductive tract; special history taking, physical examination, laboratory and imaging assessment of obstetric and/or gynecological patients, application of current concepts to well women's health care and to management of diseases and pathologies; outpatient and inpatient obstetrics and gynecology; family planning, screening and early detection of cancer and other diseases.

OBG:8401 Advanced Inpatient Subinternship High Risk Antepartum Obstetrics Subinternship arr.

Experience in evaluating new patients in a high-risk obstetric clinic; continuing antepartum care; doing work-up, ordering diagnostic studies, and following course of complicated patients admitted to obstetric ward; assisting in diagnostic, therapeutic procedures such as fetal heart rate testing, amniocentesis, ultrasonography, intrauterine fetal transfusion.

OBG:8402 Advanced Inpatient Subinternship in Gynecologic Oncology arr.

Experience on a gynecologic oncology service, including operating room, inpatient and outpatient care; team management approach to gynecologic cancer patients, treatment and follow-up of invasive gynecologic malignancies, etiology and risk factors for gynecologic neoplasias, pre- and postoperative evaluation and treatment of surgical management of gynecologic neoplasia; research project encouraged.

OBG:8403 Reproductive Endocrinology arr.

Experience evaluating new and returning patients in the Reproductive Endocrinology and Infertility Clinic; participation in preoperative, operative, and inpatient postoperative care; advanced gynecologic ultrasonography, in vitro fertilization services.

OBG:8405 Urogynecology Advanced Elective 4 s.h.

Experience as active member of urogynecology clinical team, participating in clinical care activities including outpatient clinic, outpatient procedures, inpatient surgery, hospital care; presentation to team on topic chosen by student.

OBG:8407 Family Planning 4 s.h.

Experience with the Family Planning Services team; clinical activities, including clinic and outpatient procedures. Requirements: M.D. enrollment.

OBG:8409 Obstetrics and Gynecology Night Float 4 s.h.

Four week rotation; students are paired with a night resident with responsibility for inpatients on gynecology services; when not actively engaged, students participate in resident team work on low-dynamic-range (LDR), gaining obstetrics (OB) procedural competency as well as assisting with management of inpatients and consultations as delegated by the night chief and/or staff call physician; students and night resident generally perform the initial assessment of emergency department or inpatient consults/admissions under immediate supervision of the night chief and/or faculty; students carry out plans discussed at evening sign-out for inpatient gynecology services. Requirements: M.D. enrollment.

**OBG:8450 Continuity of Care in Outpatient
Gynecology**

4 s.h.

Experience with gynecologist in longitudinal clinical experience for the academic year; students paired with faculty member to see patients in weekly clinic and provide clinical care to defined patient population.

OBG:8497 Research in Obstetrics and Gynecology arr.

Medical research, clinical or laboratory projects; individual study.

OBG:8498 Obstetrics and Gynecology On Campus arr.

OBG:8499 Obstetrics and Gynecology Off Campus arr.

Ophthalmology and Visual Sciences

Chair

- Keith D. Carter

Professional certificate: orthoptics

Faculty: <https://medicine.uiowa.edu/eye/people/>

Website: <https://medicine.uiowa.edu/eye/>

Ophthalmology is a medical and surgical specialty concerned with the diagnosis and treatment of diseases of the eye and its surrounding structures. The Department of Ophthalmology and Visual Sciences combines postgraduate training with research and patient care in all aspects of the visual sciences. Subspecialties represented in the department include cataract surgery, comprehensive ophthalmology, cornea and external diseases, contact lens and refraction services, genetics and molecular biology, glaucoma, laser refractive surgery, neuro-ophthalmology, oculoplastic surgery, ocular echography, ocular pathology, ocular vascular diseases, optometric services, pediatric ophthalmology and adult strabismus, vitreoretinal disorders, and vision rehabilitation.

Continuing Education

The department sponsors clinical conferences open to community ophthalmologists in Iowa and surrounding states where physicians can earn continuing medical education credits. The department also sponsors an annual alumni meeting with participation by nationally and internationally recognized ophthalmologists and vision scientists.

Programs

Professional Program of Study

Certificate

- Certificate in Orthoptics [p. 1739]

M.D. Training

M.D. Student Training, Graduate Education

The department offers clinical and research training to M.D. students. A three-year residency program with clinical experience in the ophthalmic subspecialties is offered to physician trainees. Graduates qualify for the written and oral examinations leading to certification by the American Board of Ophthalmology. Postgraduate fellowships of one to two years are available for qualified ophthalmologists in most subspecialty areas.

Facilities

The department maintains research laboratories for cell biology, biochemistry, morphology, tumor diagnosis, pathology, electrophysiology, pupillography, molecular biology, and vascular disease. Clinical facilities in ophthalmology are available at University of Iowa Hospitals & Clinics in the Pomerantz Family Pavilion, the University of Iowa Stead Family Children's Hospital in the Pediatric Specialty Clinic, the Iowa River Landing, the Iowa City VA Health

Care System, and the VA Central Iowa Health Care System in Des Moines. The department also manages outreach programs in other communities. The John and Marcia Carver Nonprofit Genetic Testing Laboratory, dedicated to providing affordable testing for rare eye diseases, is associated with the department.

Courses

Ophthalmology and Visual Sciences Courses

OPHT:8301 Clinical Ophthalmology	2 s.h.
All aspects of clinical ophthalmology; clinical experience, lectures, case presentations; clinical duties with staff, residents, and faculty in University of Iowa Hospitals & Clinics (UIHC) and Iowa City VA Medical Center (VAMC) ophthalmology clinics. Requirements: M.D. enrollment.	
OPHT:8401 Elective in External Eye Disease	4 s.h.
Common diseases of eyelid, conjunctiva, and cornea.	
OPHT:8402 Elective in Neuro-Ophthalmology	4 s.h.
Visual, ocular motor dysfunction due to neurologic disease; patient work-up, readings, neuro-ophthalmology rounds.	
OPHT:8403 Molecular Ophthalmology	4 s.h.
Use of recombinant DNA, tissue culture, protein electrophoresis in study of inherited eye diseases.	
OPHT:8404 Elective in Ocular Pathology	4 s.h.
Pathophysiology of eye disease.	
OPHT:8405 Advanced Ophthalmology - Veterans Affairs	4 s.h.
Opportunity for in-depth clinical experience in assessment and management of ophthalmology patients; students serve on the Iowa City VA Health Care System ophthalmology team and see outpatients and emergency room visits alongside residents and faculty.	
OPHT:8406 Plastic and Reconstructive Surgery	4 s.h.
Topics in ophthalmic plastic and reconstructive surgery.	
OPHT:8497 Research in Ophthalmology	arr.
Medical research, clinical or laboratory projects; individual study.	
OPHT:8498 Ophthalmology On Campus	arr.
OPHT:8499 Ophthalmology Off Campus	arr.

Orthoptics, Professional Certificate

Requirements

The professional Certificate in Orthoptics is a postgraduate certificate program. The orthoptic fellowship is offered by the Department of Ophthalmology and Visual Sciences. A prerequisite baccalaureate degree is required for application.

Orthoptics is an allied health profession and clinical science pertaining to the study of eye movements, visual function, and binocular cooperation. An orthoptist is an eye muscle specialist who works under the supervision of an ophthalmologist.

The majority of the 24-month training period is spent in a clinical setting. At the completion of the training period, candidates take written and practical board examinations administered by the American Orthoptic Council.

The first four to six weeks are spent reviewing general anatomy and physiology, and learning the basic anatomy, physiology, and terminology of the eye. Students are introduced to patient examination initially by observation of physicians and orthoptists, and gradually build up their exam skills as each new technique is learned. Over the first six months, optics and principles of strabismus (eye misalignment) and amblyopia (lazy eye) are taught in depth.

In the second six months of training, students expand their knowledge of basic orthoptic and ophthalmologic principles and apply them to a more complete patient examination and diagnostic skills.

The remaining months are spent examining patients in clinic, mastering examination techniques, and differential diagnosis as well as becoming proficient in the interpretation of diagnostic tests. At this stage, orthoptic students participate in the prescription of specific types of nonsurgical therapy. Each week, time is reserved for ophthalmic and orthoptic lectures, personal study time, or testing.

Contact the Department of Ophthalmology and Visual Sciences for information about the Certificate in Orthoptics.

Orthopedics and Rehabilitation

Chair

- J. Lawrence Marsh

Graduate degree: M.S. in athletic training

Faculty: <https://medicine.uiowa.edu/orthopedics/leadership>

Website: <https://medicine.uiowa.edu/orthopedics/>

The Department of Orthopedics and Rehabilitation offers a Master of Science degree in athletic training as well as a training program for residents.

Programs

Graduate Program of Study

Major

- Master of Science in Athletic Training [p. 1744]

Residency

The department offers a five-year integrated clinical program for postgraduate trainees, in which interns and residents participate simultaneously in inpatient and outpatient care, surgery, and sciences related to the neuromusculoskeletal system.

Trainees enter this program directly from medical school through the National Residency Matching Program.

During the first year, trainees gain experience not only in clinical orthopedics but also in surgical specialties, intensive care, radiology, and surgical skills.

During years two through five, residents gain experience in the diagnosis and management of adult and pediatric orthopedic disorders, including joint reconstruction; trauma, including multisystem trauma; surgery of the spine, including disk surgery, spinal trauma and deformities; hand and foot surgeries; athletic injuries and orthopedic rehabilitation; orthopedic oncology, including metastatic disease; and amputations as well as post-amputation care and nonoperative outpatient diagnosis and care, including all orthopedic anatomic areas.

Facilities

The Department of Orthopedics and Rehabilitation is housed in the John Pappajohn Pavilion of University of Iowa Hospitals & Clinics and has an active service in the Iowa City VA Health Care System. The department's facilities include 48 orthopedic beds, ten outpatient clinics, inpatient and outpatient operating rooms, a specialty library, a specialty radiology unit, and physical therapy and rehabilitation facilities. Its specialty clinics deal with virtually every orthopedic disorder known, including, but not limited to scoliosis, club feet, congenital dislocated hip, neuromuscular disease, metabolic disease, amputation, neoplasm, trauma, and neck, back, hip, foot, knee, and hand problems. Physicians in the outpatient clinic see approximately 280 patients per day and over 70,000 patients per year. Approximately 7,000 surgeries are performed each year.

The department's Sports Medicine Clinic provides MRI, X-ray, and physical therapy services, and a full range of nonoperative orthopedic ambulatory care services.

Laboratories

The orthopedics laboratories deal with problems in these major subject areas.

Biochemistry: the biochemistry of proteoglycans, collagens, and matrix proteins, both normal and altered in musculoskeletal disorders

Biomechanics: problems of the upper extremity; biomechanics of the spine, hip, and gait; total joint replacements (in conjunction with the College of Engineering [p. 1420])

Cell and molecular biology: studies of normal bone, cartilage, tendon, muscle, and tissues altered by experiment and disease

Bone healing: research toward better ways to heal bones

Courses

- Orthopedics and Rehabilitation Courses [p. 1740]
- Athletic Training Courses [p. 1741]

Orthopedics and Rehabilitation Courses

ORTH:8301 Clinical Orthopedics	arr.
ORTH:8401 Advanced Clinical Orthopedics	2,4 s.h.
Requirements: fourth-year M.D. enrollment.	
ORTH:8402 Advanced Inpatient Subinternship in Orthopedics: Trauma	4 s.h.
Requirements: fourth-year M.D. enrollment.	
ORTH:8403 Advanced Inpatient Subinternship in Orthopedics: Adult Hip/Knee Reconstruction	4 s.h.
Opportunity to enhance clinical skills by taking intern-level responsibility for management of a limited number of orthopedic patients; proficiency in perioperative patient assessment and management, including assisting in procedures and using laboratory diagnosis and radiologic studies pertinent to one faculty member's clinical practice.	
ORTH:8404 Introduction to Physical Medicine and Rehabilitation	2 s.h.
Management of a wide range of common acute and chronic neuro-musculoskeletal pain conditions (shoulder, back, knee pain) to more devastating neuromuscular injuries (spinal cord injuries, brain injury, strokes, amputations). Requirements: M.D. enrollment.	
ORTH:8405 Advanced Physical Medicine and Rehabilitation	4 s.h.
Management of a wide range of common acute and chronic neuro-musculoskeletal pain conditions (shoulder, back, or knee pain) to more devastating neuromuscular injuries (spinal cord injuries, brain injury, strokes, amputations); students work-up individual patients in outpatient clinics and perform inpatient consultations at subintern level. Prerequisites: ORTH:8404. Requirements: M.D. enrollment.	

ORTH:8406 Physical Medicine and Rehabilitation Acute Inpatient Rehab, Cedar Rapids 2 s.h.

Physical medicine and rehabilitation clerkship; participation in daily clinical activities including inpatient rounds, interdisciplinary team meetings, observing a variety of therapy sessions, and inpatient consults.

ORTH:8407 Orthopedics: Adult Hip/Knee Reconstruction 4 s.h.

Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

ORTH:8408 Orthopedics: Trauma 4 s.h.

Development of in-depth skills in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

ORTH:8409 Orthopedics: Pediatrics 4 s.h.

Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

ORTH:8410 Orthopedics: Sports Medicine 4 s.h.

Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

ORTH:8411 Orthopedics: Hand/Wrist/Elbow 4 s.h.

Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

ORTH:8412 Orthopedics: Spine 4 s.h.

Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

ORTH:8413 Orthopedics: Pathology/Tumor 4 s.h.

Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

ORTH:8414 Orthopedics: Veterans Affairs 4 s.h.

Participation in the Veterans Affairs service general orthopedics; development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

ORTH:8415 Orthopedics: Foot/Ankle 4 s.h.

Development of in-depth skill in physical diagnosis and approach to diseases of the musculoskeletal system; increase ability to establish a differential list of problems to recommend appropriate solutions to each problem and assist in management of problem and solution.

ORTH:8497 Research in Orthopedics arr.

Medical research, clinical or laboratory projects; individual study.

ORTH:8498 Orthopedics On Campus arr.

Requirements: fourth-year M.D. enrollment.

ORTH:8499 Orthopedics Off Campus arr.

Requirements: fourth-year M.D. enrollment.

Athletic Training Courses

AT:3060 Advanced Anatomy for Athletic Training 4 s.h.

Extremities and relevant body cavity anatomy; anatomical terminology, anatomical relationships of human body, 3-D view of anatomy, clinical relevance of anatomy; basic science lectures, radiologic imaging discussions, introduction to clinically relevant anatomy, gross anatomy dissection laboratories, small group learning and teaching, and computer-assisted resources.

AT:4000 Foundations of Athletic Training Practice 3 s.h.

Introduction to athletic training; basic components of a prevention program; injury/illness assessment process including general injury classifications, medical terminology, and patient documentation skills); anatomical basis and technical aspects of applying clinical proficiencies relating to orthopedic applications in the care and prevention of injuries relating to physically active individuals including taping, wrapping, and pad fabrication; basic evaluation skills including goniometric measurements, manual muscle testing, and anatomical palpations.

AT:4075 Medical Emergency Techniques 2 s.h.

Educational competencies and clinical proficiencies; focus on emergency medical practice in athletic training using current evidence-based interventions for medical, orthopedic, and environmental emergencies; knowledge of Emergency Medical Service (EMS) system and role athletic trainers play in the acute-care process; emergency pharmacological interventions and other advanced care skills.

AT:4125 Clinical Experience I 3 s.h.

Integration of clinical competencies through a supervised field experience in athletic training to link theory with practice; exposure of athletic training students to real-life situations relating to evaluation and management of patient injuries/illnesses; development and application of critical thinking skills; first in a four-part series.

AT:4200 Orthopedic Pathology and Clinical Examination I 4 s.h.

Pathomechanics, clinical examination, diagnosis, and appropriate basic treatment plans for orthopedic injuries to the lower extremity and spine; application of theories and skill practice through real-patient interactions and documentation; surgical observation and physician interactions; first in a two-part series.

AT:4250 Orthopedic Pathology and Clinical Examination II 4 s.h.

Pathomechanics, clinical examination, diagnosis, and appropriate basic treatment plans for orthopedic injuries to the upper extremity, head, and C-spine; application of theories and skill practice through real-patient interactions and documentation; surgical observation and physician interactions; second in a two-part series. Prerequisites: AT:4200.

AT:4300 Therapeutic Interventions 2 s.h.

Introduction to theory, application, and treatment of orthopedic conditions using common therapeutic modalities; application of evidence-based research in planning, implementation, documentation, and evaluation of the efficacy of each therapeutic modality in treatment of injuries and illnesses of patients involved in physical activity; emphasis on indications, contraindications, and precautions; integration of patient-based outcome measures to aid in appropriate clinical decision making.

AT:4375 Nutrition for Athletic Training 2 s.h.

Interaction between nutrition, exercise, and athletic performance; biomechanical and physiological aspects of nutrition and exercise; nutrition for training and competition; impact of nutrition on healing processes, nutritional supplements, and ergogenic aids; nutritional aspects of body composition and weight control; demonstration of ability to plan and implement proper sport nutrition.

AT:4400 Rehabilitation Techniques 3 s.h.

Rehabilitation for athletic trainers based on theory and principles of therapeutic exercise using current evidence-based concepts; focus on pathology and mechanics of exercise therapy in treatment of musculoskeletal injuries; use of mechanical exercise equipment, stressing safety and use of proper body mechanics during exercise, as well as indications and contraindications for different exercises.

AT:4450 Applied Rehabilitation Concepts 3 s.h.

Functional, scientific approach to designing strength and conditioning programs for various populations; testing protocols used for measuring fitness, body composition, flexibility, strength, power, speed, and endurance; evaluation of posture and workplace ergonomics; manual therapy theory and techniques for orthopedic injuries, indications and contradictions, skill development in soft tissue assessment, application of manual and tool-assisted techniques; review of resistance training and program prescription based on literature. Prerequisites: AT:4400.

AT:4525 Clinical Experience II 4 s.h.

Integration of clinical competencies through a supervised field experience in athletic training to link theory with practice; exposure of athletic training students to real-life situations relating to evaluation and management of patient injuries/illnesses; development and application of critical thinking skills; second of a four-part series. Prerequisites: AT:4125.

AT:5000 Pathology and Assessment of Non-Orthopedic Conditions 3 s.h.

Introduction to recognition, assessment, and appropriate intervention or referral strategies for non-orthopedic conditions and disabilities; pathophysiology at cellular, organ, and total body levels applied in each organ system; systems may include cardiovascular, pulmonary, renal, dermatologic, reproductive, endocrine, neurologic, and gastrointestinal; additional topics include gender and pediatric pathology, ENT/ophthalmology, abdominal evaluation, and common contagious illnesses.

AT:5075 Diagnostic Imaging and Lab Studies 1 s.h.

Common diagnostic tests and radiological techniques used commonly by medical community in assessment and diagnosis of common orthopedic and non-orthopedic conditions; students gain knowledge and skills to identify anatomy, pathology, and proper terminology used by health care professionals when discussing diagnostic tests/results; coverage of multiple biological systems and organs of the human body to understand indications, contraindications, and clinical implications for each technique.

AT:5200 Pathophysiology and Pharmacology in Sports Medicine 2 s.h.

Pharmacologic applications for injury/illness sustained by various physically active populations; therapeutic drug classifications, indications, contraindications, interactions of medications, drug testing in sport, and relevant governing regulations; emphasis on drugs commonly used for orthopedic injuries, common conditions and illnesses, mental health and their effects on sport performance, and tissue healing.

AT:6100 Research in Athletic Training 2 s.h.

Identification of an athletic training problem/issue and examination through theories and research; analysis of literature and derivation of evidence-based concepts for clinical decision making and data-informed practice; use of appropriate academic writing style; differentiation between quantitative and qualitative research; critically responding to research dilemma in a way that aligns professional ethics and values; first in a two-part series.

AT:6125 Clinical Experience III 6 s.h.

Complete professional immersive clinical experience; integration of basic and complex clinical competencies through a supervised clinical experience in athletic training to link theory with practice; exposure of athletic training students to real-life situations relating to evaluation and management of patient injuries/illnesses; development and application of critical thinking skills; third in a four-part series. Prerequisites: AT:4525.

AT:6200 Administration and Leadership 2 s.h.

Overview of organization and administration of athletic training services; topics include organizational structures, human resources, information management, budget and finance, risk management, legal and ethical considerations in health care, purchasing and maintenance of equipment and facilities, and development of policies and procedures for daily operation of athletic training services.

AT:6250 Applied Research in Athletic Training 2 s.h.

Application of research models to athletic training topics; use of appropriate academic writing style; application of basic statistical measures to address clinical problems; continuation and completion of research projects from AT:6100; culminates with dissemination of research findings; second in a two-part series. Prerequisites: AT:6100.

AT:6300 Psychosocial Recognition and Referral 2 s.h.

Psychological factors relative to injury, rehabilitation, and performance; strategies for identifying problems, intervening, and making referrals especially related to psychological disorders, decreased performance, and health/substance abuse; exploration of various theories and models of cultural competence through the lens of sports medicine; students examine and analyze roles of cultural differences including cultural attitudes, beliefs, and expectations as they pertain to effective health care in diverse settings.

AT:6400 Seminar in Athletic Training 2 s.h.

Review of knowledge, skills, and abilities for successful pursuit of athletic training Board of Certification (BOC) credential and processes to obtain employment; résumé development and interviewing skills; emphasis on regulation of practice; professional and ethical responsibilities contributing to practice of athletic training; creation of a professional development plan.

AT:6450 Advanced Topics in Athletic Training 1 s.h.

Investigation and discussion of current events and advanced topics in athletic training and related health professions; evaluation of current professional and legislative issues in athletic training; discussions vary depending on current relevant topics.

AT:6525 Clinical Experience IV 5 s.h.

Integration of clinical competencies through a supervised clinical experience in athletic training to link theory with practice; exposure of athletic training students to real-life situations relating to evaluation and management of patient injuries/illnesses; development and application of critical thinking skills; last in a four-part series. Prerequisites: AT:6125.

Athletic Training, M.S.

Athletics trainers are health care professionals who render service or treatment under the direction of, or in collaboration with, a physician in accordance with their education and training and the states' statutes, rules, and regulations. Services provided by athletic trainers include injury and illness prevention, wellness promotion and education, emergent care, examination and clinical diagnosis, therapeutic intervention, and rehabilitation of injuries and medical conditions.

Students who want to become certified athletic trainers may earn the M.S. degree or pursue the combined B.A. in health and human physiology (exercise science track) and the M.S. in athletic training. See the B.A. in health and human physiology [p. 611] (College of Liberal Arts and Sciences) in the Catalog.

The University of Iowa is accredited by the Commission on Accreditation of Athletic Training Education (CAATE).

Requirements

The Master of Science program in athletic training requires 62 s.h. of coursework. Students must maintain a cumulative g.p.a. of at least 3.00 and must earn a grade of C-minus or higher in all major coursework.

The program involves two full years, including summer sessions, of concentrated didactic and clinical experiences that lead to eligibility for the Board of Certification examination.

The M.S. with a major in athletic training requires the following work.

Code	Title	Hours
AT:3060	Advanced Anatomy for Athletic Training	4
AT:4000	Foundations of Athletic Training Practice	3
AT:4075	Medical Emergency Techniques	2
AT:4125	Clinical Experience I	3
AT:4200	Orthopedic Pathology and Clinical Examination I	4
AT:4250	Orthopedic Pathology and Clinical Examination II	4
AT:4300	Therapeutic Interventions	2
AT:4375	Nutrition for Athletic Training	2
AT:4400	Rehabilitation Techniques	3
AT:4450	Applied Rehabilitation Concepts	3
AT:4525	Clinical Experience II	4
AT:5000	Pathology and Assessment of Non-Orthopedic Conditions	3
AT:5075	Diagnostic Imaging and Lab Studies	1
AT:5200	Pathophysiology and Pharmacology in Sports Medicine	2
AT:6100	Research in Athletic Training	2
AT:6125	Clinical Experience III	6

AT:6200	Administration and Leadership	2
AT:6250	Applied Research in Athletic Training	2
AT:6300	Psychosocial Recognition and Referral	2
AT:6400	Seminar in Athletic Training	2
AT:6450	Advanced Topics in Athletic Training	1
AT:6525	Clinical Experience IV	5
Total Hours		62

Admission

Admission to the Master of Science program is competitive with a maximum of 26 students admitted for each cohort. Applicants are expected to meet technical standards, pass a background check, and comply with health and safety standards, including vaccination requirements.

To be considered for the Master of Science program in athletic training, applicants must:

- have completed a B.A. or B.S. degree at an accredited institution in the United States or have completed the first three years with at least 80 s.h. of undergraduate work for the 3+2 combined program at the University of Iowa;
- have completed 30 s.h. at the University of Iowa if a transfer student;
- have a cumulative undergraduate g.p.a. of at least 3.25;
- submit an application to the Graduate College through the Athletic Training Centralized Application Service (ATCAS), set up a University of Iowa account, and pay the supplemental fee;
- include two letters of recommendation—one from a medical professional and one from an academic professional;
- submit a résumé;
- include a statement of purpose and career goals;
- submit a Test of English as a Foreign Language (TOEFL) score (only the iBT—Internet-Based Test is accepted with a total score of 93 and a speaking score of 26) and the test must have been taken within the last two years, or submit a current acceptable score from the International English Language Testing System (IELTS) if an international applicant and if English is not student's first language;
- have current CPR certification obtained within one year—Basic Life Support (BLS) or professional rescuer level and consistent with Board of Certification standards;
- have current first aid certification obtained within one year;
- submit a signed copy of the program's Technical Standards for Admission form;
- have completed a minimum of 50 hours of observation under a certified athletic trainer;
- have completed required prerequisite coursework with a grade of C or higher in biology, chemistry, physics, human anatomy, human physiology, exercise physiology, general psychology, biomechanics or kinesiology, nutrition, and statistics (see list below); and
- have completed additional recommended coursework in medical terminology, introductory athletic training, public health, motor learning, or psychology courses in areas such as abnormal, adolescent, or sports psychology.

Community college coursework is accepted as well as online coursework from accredited universities. AP and CLEP coursework may satisfy course requirements if listed on a college transcript.

Students must earn a grade of C or higher in these prerequisite courses.

Code	Title	Hours
	Biology (preferred human biology; with or without lab)	3
	Biomechanics or kinesiology	3
	Chemistry (with or without lab)	3
	Exercise physiology	3
	Human anatomy (may be taken combined with human physiology; two semesters minimum, if combined)	3
	Human physiology (may be taken combined with human anatomy; two semesters minimum, if combined)	3
	Nutrition (general or sport)	3
	Physics (with or without lab)	3
	Psychology (general psychology is required; additional psychology coursework recommended)	3
	Statistics	3

All application materials are due by February 1. Following the February 1 deadline, applications will be accepted on a continuing basis until program capacity is met. A personal interview is required. Coursework begins during the summer session.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Career Advancement

Athletic trainers have opportunities for employment in many areas. They include career options in:

- public and private secondary schools, colleges and universities, professional and Olympic sports;

- youth leagues, municipal and independently owned youth sports facilities;

- physician offices;

- rural and urban hospitals, hospital emergency rooms, urgent and ambulatory care centers;

- clinics with specialties in sports medicine, cardiac rehabilitation, medical fitness, wellness, and physical therapy;

- occupational health departments in commercial settings, which include manufacturing, distribution, and offices to assist with ergonomics;

- police and fire departments, and academies, municipal departments, and branches of the military; and

- performing arts areas, including professional and collegiate-level dance and music settings.

Otolaryngology—Head and Neck Surgery

Chair

- Marlan R. Hansen

Faculty: <https://medicine.uiowa.edu/oto/people/primary-appointments>

Website: <https://medicine.uiowa.edu/oto/>

The Department of Otolaryngology—Head and Neck Surgery is one of the most comprehensive otolaryngology departments in the world. Founded in 1922, it is among the oldest in the United States. *U.S. News & World Report* has consistently ranked the department's program among the top 10 in the nation.

The department's chief focus areas are education and training, patient care, and research. M.D. students in the Carver College of Medicine, residents, and fellows benefit from a faculty dedicated to providing thorough training in all aspects of otolaryngology and patient care. Patients in the otolaryngology clinic enjoy access to comprehensive care in any of five subspecialties: pediatric otolaryngology, otology/neurotology, general otolaryngology and rhinology, head and neck oncology, and facial plastic and reconstructive surgery. University of Iowa faculty members from ophthalmology and visual sciences and radiation oncology hold joint appointments in otolaryngology, adding depth to the department's resources.

The department is home to prominent research programs in cleft palate and other craniofacial defects, head and neck oncology, cochlear implants, and molecular genetics. It also offers fellowships in otology/neurotology, pediatric otolaryngology, and head and neck oncology.

The department is located at University of Iowa Hospitals & Clinics.

Fellowships

The Department of Otolaryngology—Head and Neck Surgery offers a two-year fellowship in otology/neurotology and a one-year fellowship in pediatric otolaryngology, which are accredited by the Accreditation Council for Graduate Medical Education. It also offers a one-year fellowship in head and neck oncology accredited by the Advanced Training Council of the American Head and Neck Society.

The otology/neurotology fellowship program accepts one applicant every two years. Otology fellows spend a minimum of 20 months in clinical service. They attend all otology/neurotology clinics and neurotology cases in the operating room and are responsible for inpatient service. They also have one day of dedicated research time each week.

The pediatric otolaryngology fellowship program accepts one applicant each year. Fellows spend a year in clinical service, where they have the opportunity to train with all pediatric otolaryngology faculty members.

One applicant is accepted as a head and neck oncology fellow each year. Training is largely clinical, allowing fellows the opportunity to participate in a variety of procedures, ranging from skull base resection to laryngeal rehabilitation. Fellows routinely perform 35 to 45 free-tissue transfers during one year of training. They also complete a clinical and/or basic science research project relating to head and neck oncology.

Residency

The Department of Otolaryngology—Head and Neck Surgery offers a residency program accredited by the Accreditation Council for Graduate Medical Education. The program has two tracks: a five-year clinical track and a seven-year research track. Five applicants are accepted each year, three to the clinical track and two to the research track.

The clinical track provides five years of concentrated clinical study and application in all aspects of otolaryngology. Residents begin their training with a five-week intensive basic science course divided into an anatomy component and a 100-hour lecture series. The anatomy component includes a supervised cadaver dissection, and the lecture series details the study of otolaryngology and related disciplines. Residents also complete two research rotations in order to explore research areas that interest them.

The research track is a combined clinical-research program designed for residents interested in an otolaryngology research career. After an internship year, residents complete two years of research followed by four years of clinical training. The interaction of clinicians and basic scientists from several departments affords residents the opportunity for involvement in a wide spectrum of current research in areas such as electrophysiology of the auditory system, the genetics of head and neck cancer, and gene therapy.

Courses

Otolaryngology—Head and Neck Surgery Courses

OTO:8199 Basic Otolaryngologic Science	arr.
Supervised cadaver head and neck dissection, with 14 areas in detail. Two weeks.	
OTO:8301 Clinical Otolaryngology	2 s.h.
OTO:8401 Subinternship in Otolaryngology	arr.
OTO:8402 Advanced Otolaryngology	4 s.h.
Students become proficient in physical examination of the head and neck; increase their ability to diagnose, evaluate, and manage common disorders of the ears, nose, and throat; and work in outpatient clinic, on inpatient services, and in operating room.	
OTO:8497 Research in Otolaryngology	arr.
Medical research, clinical or laboratory projects; individual study.	
OTO:8498 Otolaryngology On Campus	arr.
OTO:8499 Otolaryngology Off Campus	arr.
Arranged by student with department approval.	

Pathology

Chair

- Nitin J. Karandikar

Director, Clinical Functions

- Roseanne Meyer

Graduate degree: M.S. in pathology

Faculty: <https://medicine.uiowa.edu/pathology/people>

Website: <https://medicine.uiowa.edu/pathology/>

The Department of Pathology offers education and training for a broad range of students, from undergraduates through postgraduate fellows and researchers. It provides basic pathology courses to health sciences students, a clinical training program for medical laboratory scientists, a Master of Science program in pathology, residency training programs leading to American Board of Pathology certification in anatomic pathology and clinical pathology, fellowship training in pathology subspecialties, and postdoctoral research training in cellular and molecular pathology.

Undergraduate Education

Pathology courses are a major component of the University's program in Medical Laboratory Science, a Bachelor of Science program that trains medical laboratory scientists; see Medical Laboratory Science [p. 1708] in the Catalog.

Postgraduate Training

The Department of Pathology offers postgraduate clinical fellowship programs in hematopathology, transfusion medicine, clinical microbiology, cytopathology, molecular genetic pathology, and surgical pathology for physicians who have completed residency training in pathology. These fellowships consist of one to two years of diagnostic work and research.

The department provides postdoctoral research training in immunology, neuropathology, apoptosis, cancer biology, and clinical microbiology as well as in other areas of cellular and molecular pathology. These positions are open to individuals who have earned a Ph.D. or an M.D. degree.

Programs

Graduate Program of Study

Major

- Master of Science in Pathology [p. 1749]

M.D. Training

The department provides five to seven 12-month fellowships for M.D. students (pathology externship), for students interested in careers as pathologists, and the Emory Warner Fellowship, a full-time research position in a facet of experimental pathology. It also offers clerkships for M.D. students in all areas of anatomical and clinical pathology.

Residency

The department offers 20 residency positions in pathology, which provide up to four years of training. Patients at

University of Iowa Hospitals & Clinics and the Iowa City VA Health Care System are integral to the residency programs.

Residents gain experience in systematic rotation through the varied laboratory services, including surgical pathology, autopsy pathology, neuropathology, dermatopathology, cytology, clinical chemistry, clinical microbiology, hematology, immunopathology, molecular pathology, and transfusion medicine. They also have the opportunity to pursue one or two years of additional fellowship training in many pathology subspecialties. To learn more, see Education on the Department of Pathology website.

Facilities

The Department of Pathology is well-equipped to carry out the sophisticated technology of modern cellular and molecular pathology. It administers more than 90,000 square feet of clinical laboratories at University of Iowa Hospitals & Clinics and has individual research and core facility laboratories, including histopathology and laser capture microscopy for cellular and molecular pathology research, in the Medical Research Center, Medical Laboratories, and at the Iowa City VA Health Care System. Also available are Carver College of Medicine research facilities for nucleic acid chemistry, hybridoma production, flow cytometry, ultrastructural studies, protein structure, image analysis, electron spin resonance, mass spectroscopy, nuclear magnetic resonance, and laboratory animal care.

Courses

Pathology Courses

PATH:4151 MLS Program Registration **0 s.h.**
Requirements: admission to Medical Laboratory Science Program.

PATH:5260 Translational Histopathology **3 s.h.**
Didactic sessions on human comparative histology, molecular and cellular pathology, and animal model applications; laboratory sessions on microscopy, histology, histotechnology, and immunohistochemistry, with group discussions of model papers; experience in scientific writing and oral presentation skills; for students who plan to investigate experimental models of human disease.

PATH:5270 Pathogenesis of Major Human Diseases **3 s.h.**
Critical analysis of pathogenesis models in a series of major human diseases; clinical presentation, analysis of cellular and molecular events leading to the disease, discussion of key papers. Offered spring semesters of even years. Same as IGPI:5270, MMED:5270.

PATH:6220 Seminar in Pathology **1 s.h.**
Current research and literature. Requirements: pathology graduate standing.

PATH:7001 Molecular and Cellular Biology of Cancer **3 s.h.**
Fundamental aspects of oncology at the cellular and molecular levels; mechanisms of cancer initiation and progression, oncogene action, DNA damage and repair, carcinogenesis by radiation, chemicals, viruses; tumor immunology, anticancer therapies. Offered fall semesters. Requirements: strong basic science background. Same as FRRB:7001.

PATH:7211 Research in Pathology arr.

Basic aspects of pathology or clinical patient material; emphasis on experimental design, methods, literature review, obtaining formal answers to specific questions. Requirements: M.D. enrollment or graduate standing.

PATH:8007 Medical Student Fellowships in Pathology (Externships) 0 s.h.

First-hand experience in autopsy, surgical and clinical pathology, teaching, and research to further understanding of disease mechanisms, normal and pathologic anatomy, laboratory use.

PATH:8008 Warner Fellowship in Experimental Pathology 0 s.h.

One-year, full-time membership in established research laboratory in the Department of Pathology or collaborating laboratory. Requirements: M.D. enrollment.

PATH:8133 Introduction to Human Pathology for Graduate Students 4 s.h.

Human disease; basic disease processes, organ-related and multisystem diseases; case analysis. Offered fall semesters. Same as PTRS:8133.

PATH:8301 Laboratory Medicine in Clinical Practice arr.

Issues in appropriate use of clinical laboratory and pathology resources in the primary care setting; case-based approach. Requirements: third- or fourth-year M.D. enrollment.

PATH:8401 Autopsy Pathology Clerkship arr.**PATH:8402 Hematopathology Clerkship arr.****PATH:8403 Surgical Pathology Clerkship arr.****PATH:8404 Transfusion Medicine arr.****PATH:8405 Clinical Microbiology 2,4 s.h.**

Students rotate through bacteriology, molecular microbiology, mycology, mycobacteriology, and virology while participating in clinical and technical activities.

PATH:8497 Research in Pathology arr.

Medical research, clinical or laboratory projects; individual study with department approval.

PATH:8498 Pathology On Campus arr.**PATH:8499 Pathology Off Campus arr.**

Pathology, M.S.

The M.S. with a major in pathology prepares postbaccalaureate science majors for a range of biomedical careers. Graduate-level coursework provides students with a foundation in cellular and molecular biology, as well as specialized knowledge in pathobiology. A laboratory intensive thesis project equips trainees with cutting edge research skills. Students typically complete the program in two and one-half years.

Requirements

The Master of Science program in pathology requires a minimum of 30 s.h. of graduate credit, including 21 s.h. of coursework and 9 s.h. of research leading up to the thesis.

The M.S. with a major in pathology requires the following coursework.

Required Coursework

Code	Title	Hours
All of these:		
PATH:5260	Translational Histopathology	3
PATH:5270/ IGPI:5270/ MMED:5270	Pathogenesis of Major Human Diseases	3
PATH:6220	Seminar in Pathology (taken two semesters for 1 s.h. each)	2
BIOS:4120	Introduction to Biostatistics	3
BMED:5207	Principles of Molecular and Cellular Biology	3
BMED:7270	Scholarly Integrity/ Responsible Conduct of Research I	0
Total Hours		14

Required coursework results in:

- a basic understanding of molecular and cellular biology;
- a basic understanding of biostatistics; and
- an advanced understanding of pathobiology, histology, and mechanisms of human disease.

Electives

Remaining graduate-level coursework consists of electives focused on the area or topic related to a student's thesis project. The elective courses are offered by a range of departments on the biomedical campus.

Thesis

The thesis project is carried out under the guidance of the mentor and thesis committee. The committee is composed of a student's mentor and two additional faculty members. In general, the thesis consists of four chapters with the first being a concise review of the literature; the second, materials and methods; and the last two, a scholarly description of the project results. The thesis must be defended before the committee prior to final approval.

For more information, view the Master of Science in Pathology on the Department of Pathology website.

Admission

Applicants must have a bachelor's degree in a science discipline and have a g.p.a. of at least 3.00. In addition, previous research experience is highly desired. Applicants who are available for an on-site interview are preferred.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

Students who are applying must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Career Advancement

The M.S. program is designed for graduates to advance into research assistant or research scientist positions in academic and private sector laboratories, or to be competitive for advanced degree programs such as the Ph.D., M.B.A., or M.D.

Physical Therapy and Rehabilitation Science

Chair

- Richard K. Shields

Graduate degrees: D.P.T.; M.A. in physical rehabilitation science; Ph.D. in physical rehabilitation science

Faculty: <https://medicine.uiowa.edu/pt/people/primary-appointments>

Website: <https://medicine.uiowa.edu/pt/>

Physical therapists provide services to patients and clients who have impairments, functional limitations, disabilities, pain, or changes in physical function resulting from injury, disease, or other causes. Physical therapists practice and collaborate with a variety of health professionals. In the area of health promotion and wellness, they provide screening examinations, prescribe fitness programs, and educate the public regarding healthy lifestyles. Research, teaching, consultation, and administration also are parts of a physical therapist's professional role.

The Department of Physical Therapy and Rehabilitation Science is located in the Carver College of Medicine on the University of Iowa health sciences campus, which includes University of Iowa Hospitals & Clinics, one of the nation's largest university-owned teaching hospitals. Students have access to faculty members in the basic sciences and medicine, basic sciences courses, clinical specialty expertise, and innovative learning experiences associated with a medical college environment.

Programs

Graduate Programs of Study

Majors

- Doctor of Physical Therapy [p. 1756]
- Master of Arts in Physical Rehabilitation Science [p. 1755]
- Doctor of Philosophy in Physical Rehabilitation Science [p. 1759]

Facilities

The department has state-of-the-art independent research laboratories and is well equipped for classroom and laboratory instruction and innovative research. The department's state-of-the-art research facilities include the Movement and Rehabilitation Laboratory and a spinal cord research laboratory at University Hospitals & Clinics; the Human Movement Control/Performance Laboratory; the Neurobiology of Pain Laboratory; the Neuromuscular Biomechanics Laboratory; the Human Integrative and Cardiovascular Physiology Laboratory; the Applied Neuroplasticity Laboratory; and the Human Performance and Clinical Outcomes Laboratory.

Courses

Physical Therapy and Rehabilitation Science Courses

PTRS:5100 Professional Issues and Ethics 1 s.h.

Contemporary issues in clinical practice and professional development; legal and ethical perspectives on human rights, ethical theory and principles for analyzing and acting on ethical problems; professional and peer relationships.

PTRS:5101 Introduction to Physical Therapy Practice 2 s.h.

Professional development of physical therapists; evolution of profession; analysis of current role in health care and public health with respect to societal health challenges; patient management terminology including medical terminology and language utilized in the *Guide to Physical Therapist Practice*; concepts of enablement models and disablement models, including World Health Organization's *International Classification of Functioning, Disability and Health* model in the biopsychosocial model of health; introduction to evidence-based practice principles.

PTRS:5102 Principles of Physical Therapy I 2 s.h.

Patient management skills: interviewing, medical history taking, vital signs, positioning, draping, transfers, body mechanics, assisted gait, wheelchairs, and negotiation of architectural barriers.

PTRS:5103 Principles of Physical Therapy II 2 s.h.

Continuation of PTRS:5102; expansion of existing skills and provides new learning experiences in documentation, assessment of joint range of motion/goniometry, manual muscle testing, preambulatory intervention strategies, gait analysis; musculoskeletal, neuromuscular, and integumentary systems review. Prerequisites: PTRS:5102.

PTRS:5131 Therapeutic Physical Agents 2 s.h.

Theoretical and practical applications for safe, effective use of physical agents (superficial and deep heat, cold, hydrotherapy), electrotherapeutic modalities (biofeedback, NMES, TENS, iontophoresis); massage and soft tissue mobilization; emphasis on problem solving, clinical decision making.

PTRS:5144 Interprofessional Education I: Team-Based Approach to Health Care 1 s.h.

Development and interaction within small group of interprofessional students from physical therapy, medicine, pharmacy, dentistry, nursing, and public health; deans and faculty from each college facilitate; three-hour initial session for all disciplines followed by informal monthly electronic scenarios, second formal meeting followed by informal monthly electronic discussions.

PTRS:5201 Musculoskeletal Therapeutics I 3 s.h.

Musculoskeletal techniques and biomechanical principles applied to assessment and evaluation of common orthopedic problems of the spine; problem solving, case-study approach to clinical methods, skill acquisition.

- PTRS:5205 Health Promotion and Wellness** 3 s.h.
Overview of health promotion, fitness, and wellness strategies, including information on levels of health promotion, risk assessment, applied physiology (skeletal muscle, energy metabolism, and physiological responses to exercise), exercise testing and training guidelines, body composition assessment, and development of individual weight management and exercise training programs; classroom and laboratory experiences.
- PTRS:5206 Cardiopulmonary Therapeutics** 3 s.h.
Cardiorespiratory anatomy, physiology, and application of basic concepts, techniques in management of patients with acute and chronic cardiac, pulmonary disorders; laboratories.
- PTRS:5209 Surface Anatomy** 1 s.h.
Laboratory teaching activities that parallel the human anatomy course; observation, palpation, and problem solving skills; upper- and lower-limb, head and neck, thorax, and abdomen.
- PTRS:5210 Kinesiology and Pathomechanics** 4 s.h.
Normal and pathological movement based on understanding of muscle mechanics, segment and joint mechanics, muscle function; instructor- and student-centered learning experiences; EMG laboratories.
- PTRS:5215 Applied Clinical Medicine** 2 s.h.
Pathological disorders frequently encountered by physical therapists in clinical practice, addressed by physicians and health professionals who are not physical therapists; physical therapy management.
- PTRS:5235 Case-Based Learning I** 1 s.h.
Small group case study seminars and simulated patient instructor learning experiences; clinical problems coordinated with concurrent courses; student-centered, problem-based learning format with emphasis on evidence-based practice objectives. First in a two-course sequence.
- PTRS:5236 Case-Based Learning II** 1 s.h.
Small-group case study seminars and simulated patient instructor learning experiences; clinical problems coordinated with concurrent courses taken in curriculum; student centered, problem-based learning format; emphasis on evidence-based practice objectives. Second in a two-part series of integrated courses. Prerequisites: PTRS:5235.
- PTRS:5790 Integrated Clinical Education in Physical Therapy I** 1 s.h.
Integrated clinical experiences in area physical therapy clinics; overview of diverse nature of practice through half-day experiences; basic skills in examination, intervention, and documentation.
- PTRS:5791 Integrated Clinical Education in Physical Therapy II** 1 s.h.
Continuation of PTRS:5790; integrated clinical experiences in area physical therapy clinics; overview of diverse nature of practice through full-day clinical experiences; basic skills in examination, intervention, and documentation. Prerequisites: PTRS:5790. Requirements: Doctor of Physical Therapy program enrollment.
- PTRS:6120 Physical Therapy Management and Administration I** 2 s.h.
The changing U.S. health care system; access to physical therapy services, reimbursement to health care providers, mechanisms for controlling costs while providing quality care; clinical vignettes, small group problem solving.
- PTRS:6121 Physical Therapy Management and Administration II** 1 s.h.
Principles of management in physical therapy practice; historical perspective, current health care environment; business principles; marketing, managing risk, medical/legal concerns, preparing for the future.
- PTRS:6122 Psychosocial Aspects of Patient Care** 1 s.h.
Emotional reactions to illness/trauma; social determinants of health; recognition of mental illness in physical therapy examination and intervention; psychosocial aspects of disability as they relate to patient-physical therapist interaction; effective communication strategies; cultural competence in professional behavior and patient care.
- PTRS:6133 Pain Mechanisms and Treatment** 1-2 s.h.
Introduction to basic science mechanisms, assessment, and management of pain; basic science mechanism involved in transmission and perception of painful stimuli after tissue injury, assessment and physical therapy management of pain; emphasis on scientific principles and published literature to support treatment techniques.
- PTRS:6134 Physical Therapy Management of Integumentary System** 2 s.h.
Overview of physical therapy examination and management of the integumentary system; wound pathology, diagnosis associated with the integumentary system, inflammation and repair, examination and reexamination techniques, documentation, clinical decision making, lecture and laboratory formats; interventions, including patient/client information, physical agents, electrotherapy, wound dressing.
- PTRS:6143 Selected Topics in Physical Therapy Practice** 2 s.h.
Specialty area of practice including wheelchair seating and prescription, pelvic health, home assessment, durable medical equipment (DME) recommendations, and geriatrics; topics dictated by changing needs of health care and the profession; emphasis on clinical decision making, synthesis and evaluation of information with respect to first-year physical therapy curriculum.
- PTRS:6145 Interprofessional Education II: Teaching Neural and Musculoskeletal Evaluation Principles** 1 s.h.
Active involvement in integrating anatomy, kinesiology, and movement control principles as applied to a select group of pathologies with the goal of being able to teach content area; preassigned student group leaders; emphasis on student as active learner; opportunity to teach academic areas previously studied in first and second years of curriculum; may include teaching several of these musculoskeletal principles in a first-year medical student anatomy course.
- PTRS:6170 Management of People with Prosthetic and Orthotic Needs** 2 s.h.
Physical therapy management and assessment of patients in need of prosthetic and orthotic devices; principles and components of prosthetic and orthotic design and use.
- PTRS:6172 Radiology/Imaging for Physical Therapists** 2 s.h.
Basic principles and procedures for acquisition and interpretation of radiology and imaging in clinical practice and research; plain film radiographs, CT, MRI, other common imaging modalities; case-based, multidisciplinary approach.

PTRS:6173 Differential Diagnosis in Physical Therapy 2 s.h.

Use of physical therapy examination and evaluation skills to diagnose physical therapy problems; focus on use of good clinical decision-making skills when analyzing a patient's history and administering physical therapy tests and measures to confirm or rule out differential diagnoses; components of the medical examination; importance of collaboration between therapists and other health professionals; interactive case studies presented by clinical experts.

PTRS:6176 Pharmacology for Physical Therapists 3 s.h.

Contemporary pharmacology; overview of basic pharmacokinetic and pharmacodynamic principles; relation of drug therapy to therapeutic interventions provided by physical therapists; small group clinical case presentations.

PTRS:6200 Pediatric Physical Therapy 2 s.h.

Preparation for physical therapy practice in pediatric settings using interdisciplinary family-centered practice; normal and abnormal development, standardized assessment, service-delivery settings, interventions, management strategies specific to pediatrics.

PTRS:6202 Musculoskeletal Therapeutics II 3 s.h.

Pathology, assessment, management of orthopedic disorders of the upper quarter; problem-solving approach to evaluation and management of patients with musculoskeletal conditions. Prerequisites: PTRS:5201.

PTRS:6203 Musculoskeletal Therapeutics III 4 s.h.

Pathology, assessment, management of orthopedic disorders of the lower quarter; problem-solving approach to evaluation and management of patients with musculoskeletal conditions. Prerequisites: PTRS:6202.

PTRS:6204 Progressive Functional Exercise 2 s.h.

Therapeutic exercise options (e.g., isometrics, isotonic, isokinetic, plyometric, endurance exercises, stretching exercises) and training principles; application to functional activities, including those of daily living, work, recreation, and sport; laboratory component.

PTRS:6224 Activity-Based Neural and Musculoskeletal Plasticity in Health Care 4 s.h.

Examination of neural, muscular, and skeletal plasticity to increased and decreased use in normal and pathological states (chronic inactivity, obesity, metabolic syndromes, orthopedic and neurological injuries); principles of genetic regulation with physical activity including underlying mechanisms contributing to acute and chronic adaptations of muscle, spinal circuitry, and supra-spinal centers; integration of movement control concepts through contemporary papers evaluating short and long latency reflexes, posture and balance control, spasticity, and motor learning in individuals with acute and chronic perturbations to the nervous system.

PTRS:6225 Neuromuscular Therapeutics 3 s.h.

Evidence-based application of clinical neuroscience, motor control, and learning principles to practice of neurological physical therapy; approaches to evaluation and therapeutic intervention for clients with adult-onset neurological conditions, with emphasis on examination, developing a diagnosis, clinical decision making, and prescribing interventions that help clients accomplish goals. Prerequisites: PTRS:6224.

PTRS:6237 Community Outreach and Engagement I 1 s.h.

Outreach and engagement activities with individuals and organizations in the community; students select service learning experiences from current community partners, or may suggest their own idea, and develop their individual learning goals for these experiences; discussion and written assignments focus on reflection of student experiences with persons who are different than themselves, and on social responsibility, advocacy, and professionalism in the field of physical therapy; first in a two-course series.

PTRS:6238 Community Outreach and Engagement II 1 s.h.

Outreach and engagement activities with individuals and organizations in the community; students select from current community partners, or may suggest their own idea, and develop their individual learning goals for these experiences; discussion and written assignments focus on reflection about student experiences with persons who are different than themselves, and on social responsibility, advocacy, and professionalism in the field of physical therapy; second in a two-course series. Prerequisites: PTRS:6237.

PTRS:6250 Critical Inquiry I: Evidence-Based Practice 2 s.h.

Topics relevant to evidence-based practice and research design; identification of appropriate questions for research and clinical applications, location and evaluation of available evidence, identification of issues that affect validity of research designs, interpretation of basic statistical analyses.

PTRS:6251 Critical Inquiry II: Rehabilitation Research 2 s.h.

Experience conducting group research projects under faculty supervision; data collection and analysis, manuscript preparation, oral defense of research findings during a formal poster presentation. Prerequisites: PTRS:6250.

PTRS:6252 Critical Inquiry III: Clinical Application 1 s.h.

Principles and procedures learned in PTRS:6250 and PTRS:6251 applied to a clinical setting; students write and present a case report with an evidence-based practice focus, using a clinical case from their final internships. Prerequisites: PTRS:6251. Requirements: Physical Therapy and Rehabilitation Science program enrollment.

PTRS:6253 Functional Neuroanatomy arr.

Basic principles of neuroanatomy and neurophysiology; emphasis on human central nervous system; laboratory emphasis on anatomical study of spinal cord and brain. Offered spring semesters. Requirements: physical therapy and rehabilitation science enrollment or graduate standing. Same as ACB:6252.

PTRS:6792 Integrated Clinical Education in Physical Therapy IV 1 s.h.

Two-week, full-time clinical experience in physical therapy clinics under guidance of physical therapists; theory and practice of physical therapy procedures, competence building in basic skills. Prerequisites: PTRS:6793. Requirements: Doctor of Physical Therapy Program enrollment.

PTRS:6793 Integrated Clinical Education in Physical Therapy III 3 s.h.

Six-week, full-time clinical education experience. Prerequisites: PTRS:5791. Requirements: Doctor of Physical Therapy program enrollment.

PTRS:6794 Terminal Clinical Education in Physical Therapy I**arr.**

Nine week, full-time clinical education experience divided among various settings; development of competence in independent examination, evaluation, and treatment of patients under supervision of clinical faculty. Prerequisites: PTRS:6792. Requirements: Doctor of Physical Therapy program enrollment.

PTRS:6795 Terminal Clinical Education in Physical Therapy II**4 s.h.**

Nine-week, full-time clinical education experience divided among various settings; development of competence in independent examination, evaluation, and treatment of patients under supervision of clinical faculty. Prerequisites: PTRS:6794. Requirements: Doctor of Physical Therapy program enrollment.

PTRS:6796 Terminal Clinical Education in Physical Therapy III**4 s.h.**

Nine-week, full-time clinical education experience divided among various settings; development of competence in independent examination, evaluation, and treatment of patients under supervision of clinical faculty. Prerequisites: PTRS:6795. Requirements: Doctor of Physical Therapy program enrollment.

PTRS:7812 Biomedical Instrumentation and Measurement**3 s.h.**

Introduction to biomedical instrumentation and measurement; understanding sources of error and noise in biomedical research applications; basic circuit analysis, calibration of measurement tools, A/D conversion, digital filtering; lab components. Offered fall semesters of even years.

PTRS:7820 Seminar in Rehabilitation Science**1 s.h.**

Exploration of research related to rehabilitation science; lectures by faculty, graduate students, and guest scholars with expertise in areas relevant to rehabilitation science (e.g., neuroscience, physiology, medicine, engineering, pharmacology, integrated physiology).

PTRS:7826 Scientific Writing in Rehabilitation Science**2 s.h.**

Knowledge of and experience related to scientific writing, critical review of scientific literature, publication in the biomedical sciences, thesis/dissertation writing, grant writing, scientific presentation, writing used in academic and scientific careers.

PTRS:7875 Analysis of Activity-Based Neural and Musculoskeletal Plasticity**3 s.h.**

Examination of neural, muscular, and skeletal plasticity to increased/decreased use in normal and pathological states (chronic inactivity, obesity, metabolic syndromes, orthopedic and neurological injuries); genetic regulation with physical activity and underlying mechanisms contributing to acute and chronic adaptations of muscle, spinal circuitry, and supra-spinal centers; integration of movement control concepts through contemporary papers evaluating short and long latency reflexes, posture and balance control, spasticity, and motor learning in individuals with acute and chronic perturbations to the nervous system; individual research projects.

PTRS:7880 Teaching Practicum**arr.**

Individual instruction, observation, experimentation in teaching, guidance, analysis of evaluation processes in Physical Therapy and Rehabilitation Science.

PTRS:7884 Practicum in Research**arr.**

Laboratory experiences connected with investigative process; individual instruction, observation, activities in methodological development, data acquisition, data analysis aspects of research.

PTRS:7895 Advanced Seminar in Rehabilitation Science**arr.**

Current status of research for biological, mechanical, psychological components pertinent to cardiopulmonary, musculoskeletal, neuromuscular areas of rehabilitation science; preparation for comprehensive exam.

PTRS:7899 Introduction to Pain: Overview of Theories, Concepts, and Mechanisms**1 s.h.**

Overview of pain concepts and mechanisms; general overview of pain, models of pain, peripheral and central mechanisms, and pain inhibition. Requirements: prior neuroscience course.

PTRS:7900 Rehabilitation Research Capstone Project**arr.**

Specific phases of the research process; development of a research question and associated hypotheses, collection and analysis of data, interpretation and discussion of the information's meaning; presentation to sponsoring mentor's laboratory/program, and written document.

PTRS:7901 Clinical Correlates of Pain: Syndromes and Management**1 s.h.**

Common pain conditions and management of pain using an interdisciplinary focus; lectures by University of Iowa Hospitals and Clinics clinicians on a variety of acute and chronic pain conditions and management approaches. Requirements: prior neuroscience course.

PTRS:7902 Molecular, Cellular, and Neural Mechanisms of Pain**2 s.h.**

Basic science mechanisms of pain and pain modulation; understanding molecular basis for pain in nociceptive afferents (peripheral sensitization), underlying molecular and neuronal mechanisms of central processing of pain (central sensitization), cortical pain processing, animal and human experimental pain models; readings from past and current literature. Prerequisites: PTRS:7899. Requirements: prior neuroscience course.

PTRS:7903 Rehabilitation Management of Pain**1 s.h.**

Basic principles of rehabilitation for pain control including education, exercise, and electrophysical modalities; evidence-based approach to rehabilitation covering mechanisms of action and clinical effectiveness; case studies. Prerequisites: PTRS:7899 and PTRS:7901.

PTRS:7925 Independent Study**arr.**

Problem-solving experience in physical therapy; commensurate with student's interest, ability.

PTRS:7927 Research in Rehabilitation Science**arr.**

Placement of physical therapy on sound scientific base; therapy; initiation, refinement, establishment of methods in physical therapy evaluation, treatment; direct clinical and laboratory approach, philosophical treatise, or research proposal.

PTRS:7930 Critical Thinking in Neuro-Mechanical Systems**arr.**

Problem solving experience in neuro-mechanical systems, commensurate with student interest, ability.

PTRS:7931 Critical Thinking in Pain**arr.**

Problem solving experience in pain, commensurate with student interest, ability.

PTRS:7932 Critical Thinking in Biomechanics and Human Performance Assessment arr.

Problem solving experience in biomechanics and human performance assessment, commensurate with student interest, ability.

PTRS:7933 Critical Thinking in Movement Control/ Human Performance arr.

Problem solving experience in movement control/human performance, commensurate with student interest, ability.

PTRS:7934 Critical Thinking in Neural Plasticity arr.

Problem solving experience in neural plasticity, commensurate with student interest, ability.

PTRS:7935 Critical Thinking in Movement Science arr.

Problem solving experience in movement science, commensurate with student interest; ability.

PTRS:7936 Critical Thinking in Cardiovascular Physiology arr.

Problem solving experience in cardiovascular physiology, commensurate with student interest, ability.

PTRS:7990 Thesis: Rehabilitation Science arr.

Investigative process: formulation of problem, literature search and analysis, procedure for collecting data, data analysis, organization and writing of thesis proposal, thesis.

PTRS:8133 Introduction to Human Pathology for Graduate Students 4 s.h.

Human disease; basic disease processes, organ-related and multisystem diseases; case analysis. Offered fall semesters. Same as PATH:8133.

Physical Rehabilitation Science, M.A.

The Master of Arts program in physical rehabilitation science is granted to students working toward the Doctor of Philosophy in physical rehabilitation science.

Requirements

The Master of Arts with a major in physical rehabilitation science is awarded to students pursuing knowledge about the underlying science of rehabilitation. The M.A. degree does not prepare students to practice physical therapy. Students often work toward the Doctor of Philosophy in physical rehabilitation science with the goal to promote scholarship in the field. See the Ph.D. in physical rehabilitation science [p. 1759] in this section of the Catalog.

Doctor of Physical Therapy, D.P.T.

The Doctor of Physical Therapy (D.P.T.) is the entry-level professional degree for physical therapists. Based on the number of outstanding applicants, approximately 45 students are annually enrolled in the D.P.T. program.

Requirements

The Doctor of Physical Therapy requires a minimum of 104 s.h. and is completed in two and a half years. The program is fully accredited by the Commission on Accreditation in Physical Therapy Education. Satisfactory completion of the professional program qualifies candidates to take the National Physical Therapy Exam for licensure to practice. The minimum passing score on the exam is the same in all jurisdictions.

Technical Standards

Physical therapy is a profession that requires physical, mental, and emotional fitness. In the program, students obtain the foundation of knowledge, skills, attitudes, and behaviors that are necessary for a successful career as a physical therapist. Technical standards reflect the abilities that a physical therapist must possess for safe and effective clinical practice. Prospective and current students must meet the following technical standards.

General Abilities

Students are expected to possess the intellectual ability to learn, integrate, analyze, and synthesize data. They must have functional use of the senses of vision, hearing, and smell, as well as unimpaired equilibrium. Their exteroceptive senses (touch, movement, stereognosis, and vibratory) must be sufficiently intact to perform activities required for a complete physical therapy education. Students must have motor function capabilities, physical endurance, and the emotional health to meet the demands of entry-level physical therapy education and the demands of total patient care, which may include extended hours of instruction and time in clinic (evenings, nights, and weekends). Students must be capable of punctual, consistent, and reliable attendance in the didactic and clinical education component of the curriculum.

Observation

The ability to observe is required for demonstrations, visual presentations in lectures, and laboratories. Observation requires the functional use of vision, hearing, smell, somatic sensations, and the use of common sense. Students must be able to observe patients accurately and completely, both at a distance and up close, attending to both verbal and nonverbal communication.

Communication

Students must be able to speak and listen to patients in order to elicit information, perceive nonverbal communication, describe changes in mood, communicate effectively and sensitively with patients and their families, as well as instruct patients and their families. Communication in oral, written, and electronic form with the health care team must be effective, efficient, and timely.

Motor/Psychomotor Function

Students are required to have sufficient motor function to ascertain information from patients by auscultation, percussion, palpation, and movement facilitation. Intervention methods may include exercising, lifting, transferring of patients, and assisting during ambulation. These methods must be completed in a manner that assures the safety of a patient as well as the safety of the student. Students must have motor function sufficient to perform the movements required to provide both nonurgent and emergent treatment. Such skills require coordination of gross and fine muscular movements, equilibrium, sensation, and muscle strength.

Intellectual—Conceptual, Integrative, and Qualitative Abilities

Problem solving is a critical skill demanded of physical therapists, and requires conceptual, integrative, and qualitative thinking abilities. Students must be able to synthesize knowledge and integrate the relevant aspects of a patient's history, laboratory results, and physical examination to provide an explanation for intervention by recalling and retaining information in an efficient and timely manner. They must have the ability to incorporate new information from peers, teachers, and research to formulate intervention plans. Students must be able to comprehend three-dimensional relationships, the spatial and functional relationships of structures, and analyze and apply this information for problem-solving and decision-making purposes. They must be able to organize, prioritize, analyze, and evaluate detailed and complex information individually, in small groups, and in clinical settings, and do so within a limited time frame.

Behavioral/Interpersonal Skills/ Professionalism

It is necessary that students have the emotional health to maximize their intellectual ability, exercise good judgment, and complete all responsibilities required for the evaluation and treatment of patients. They must be able to self-assess, accept criticism, and assume responsibility for maintaining professional behavior. Students must be able to develop mature, sensitive, and effective relationships with patients, families, caregivers, and colleagues. They must be able to tolerate physical and emotional stress and continue to function effectively. Students must possess qualities of adaptability and flexibility and be able to function in an atmosphere of uncertainty. They must be motivated to serve and demonstrate a high level of compassion for others. Students are required to demonstrate integrity and act in a manner that demonstrates consciousness of the profession's core values. They must possess sufficient interpersonal skills to interact positively with people from all levels of society, ethnic backgrounds, and belief systems.

Curriculum

The Doctor of Physical Therapy degree requires the following coursework.

Code	Title	Hours
First Year, Summer Session		
PTRS:5101	Introduction to Physical Therapy Practice	2
PTRS:5102	Principles of Physical Therapy I	2
PTRS:5205	Health Promotion and Wellness	3

First Year, Fall Semester

PTRS:5100	Professional Issues and Ethics	1
PTRS:5103	Principles of Physical Therapy II	2
PTRS:5144	Interprofessional Education I: Team-Based Approach to Health Care	1
PTRS:5209	Surface Anatomy	1
PTRS:5210	Kinesiology and Pathomechanics	4
PTRS:5235	Case-Based Learning I	1
PTRS:5790	Integrated Clinical Education in Physical Therapy I	1
PTRS:8133	Introduction to Human Pathology for Graduate Students	4
ACB:5108	Human Anatomy	5

First Year, Spring Semester

PTRS:5131	Therapeutic Physical Agents	2
PTRS:5201	Musculoskeletal Therapeutics I	3
PTRS:5206	Cardiopulmonary Therapeutics	3
PTRS:5215	Applied Clinical Medicine	2
PTRS:5236	Case-Based Learning II	1
PTRS:5791	Integrated Clinical Education in Physical Therapy II	1
PTRS:6253	Functional Neuroanatomy	4

Second Year, Summer Session

PTRS:6120	Physical Therapy Management and Administration I	2
PTRS:6143	Selected Topics in Physical Therapy Practice	2
PTRS:6176	Pharmacology for Physical Therapists	3
PTRS:6793	Integrated Clinical Education in Physical Therapy III	3

Second Year, Fall Semester

PTRS:6122	Psychosocial Aspects of Patient Care	1
PTRS:6134	Physical Therapy Management of Integumentary System	2
PTRS:6145	Interprofessional Education II: Teaching Neural and Musculoskeletal Evaluation Principles	1
PTRS:6170	Management of People with Prosthetic and Orthotic Needs	2
PTRS:6200	Pediatric Physical Therapy	2
PTRS:6202	Musculoskeletal Therapeutics II	3
PTRS:6224	Activity-Based Neural and Musculoskeletal Plasticity in Health Care	4
PTRS:6237	Community Outreach and Engagement I	1

PTRS:6250	Critical Inquiry I: Evidence-Based Practice	2
-----------	---	---

Second Year, Spring Semester

PTRS:6121	Physical Therapy Management and Administration II	1
PTRS:6133	Pain Mechanisms and Treatment	2
PTRS:6172	Radiology/Imaging for Physical Therapists	2
PTRS:6173	Differential Diagnosis in Physical Therapy	2
PTRS:6203	Musculoskeletal Therapeutics III	4
PTRS:6204	Progressive Functional Exercise	2
PTRS:6225	Neuromuscular Therapeutics	3
PTRS:6238	Community Outreach and Engagement II	1
PTRS:6251	Critical Inquiry II: Rehabilitation Research	2
PTRS:6792	Integrated Clinical Education in Physical Therapy IV	1

Third Year, Summer Session

PTRS:6794	Terminal Clinical Education in Physical Therapy I	4
-----------	---	---

Third Year, Fall Semester

PTRS:6252	Critical Inquiry III: Clinical Application	1
PTRS:6795	Terminal Clinical Education in Physical Therapy II	4
PTRS:6796	Terminal Clinical Education in Physical Therapy III	4

Total Hours	104
-------------	-----

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website. They must have completed a baccalaureate degree and all prerequisite coursework from an accredited institution in the United States, or anticipate completing the degree before enrolling in the D.P.T. program. They must have a cumulative g.p.a. of at least 3.00 and must have completed the following prerequisite coursework, preferably with a g.p.a. of at least 3.00. All science courses must include the appropriate laboratory instruction. The prerequisite courses must have been taken for a letter grade. Credit awarded through advanced placement testing may be applied only to the mathematics requirement.

Biological sciences: a complete introductory series of courses in principles of general biology or zoology and advanced coursework in biology or zoology (for which an introductory course is prerequisite) equivalent to 12 s.h.

Anatomy: human or comparative vertebrate anatomy, preferably with a lab component, equivalent to 3 s.h.

Physiology: a systemic human physiology course equivalent to 3 s.h.

A two-course sequence of anatomy and physiology equivalent to 6 s.h., preferably with a lab component, can fulfill the physiology and anatomy prerequisites.

Physics: a complete introductory series equivalent to 8 s.h.

Chemistry: a complete introductory series equivalent to 8 s.h.

Psychology: courses equivalent to 6 s.h.

Mathematics: a college-level mathematics course, at the level of trigonometry or higher, equivalent to 3 s.h.

Statistics: a statistical methods course equivalent to 3 s.h.

All applicants must take the Graduate Record Examination (GRE) General Test. They must take the test early enough for their scores to be received prior to the application deadline.

Applications are submitted online through the Physical Therapist Centralized Application Service (PTCAS). PTCAS allows applicants to use a single application and one set of materials to apply to multiple physical therapy programs. Once the application portfolio is complete with PTCAS, they will forward it to the University of Iowa.

The physical therapy admissions committee requires personal, on-campus interviews. Since the number of students admitted into each class is limited, not all who apply for admission are invited for an interview.

Applications are accepted July 1 for entry into the D.P.T. program the following summer. Applicants who apply early and by September 15 will be given priority status in the admissions process. It is to an applicant's benefit to apply as soon as possible after July 1 as the admissions committee will begin the application review process to select those for interviews. Priority status application deadline is September 15, mid-application deadline is October 1, and final application deadline is December 1.

Background Checks

Enrollment in the Doctor of Physical Therapy program is contingent on a successful criminal background check. Drug screening may be required for some clinical rotations.

Expenses

Applicants admitted to the D.P.T. program must make an advance tuition payment which is forfeited if the applicant does not enroll. In addition to paying University of Iowa tuition and fees, students are assessed laboratory fees for the human anatomy and neuroanatomy courses and are responsible for purchasing supplies, such as lab coats, patient evaluation kits, and course packets. Students also are responsible for all costs associated with professional development and clinical experiences.

All students are required to comply with the pre-entry and periodic health screening program developed by Student Health in cooperation with University of Iowa Hospitals & Clinics. All costs incurred for the health screenings are the student's responsibility. Students also are required to have health insurance.

Financial Support

Many academic and professional development scholarship opportunities are available to D.P.T. students matriculating within the department; view the awards on the Department of Physical Therapy and Rehabilitation Science website.

Entering physical therapy students are eligible for financial aid as determined on the Free Application for Federal Student Aid (FAFSA). Students must sustain a strong academic performance in order to qualify for funds.

Career Advancement

The employment outlook for physical therapy graduates is strong. Opportunities exist for professional practice in inpatient, outpatient, and community-based organizations. These include general or specialized hospitals, programs for children with disabilities, private physical therapy clinics, extended care facilities, nursing homes, community and governmental agencies, rehabilitation centers, the armed forces, foreign service, home health agencies, school systems, fitness centers, and athletic facilities. Teaching and research positions also are available as well as options for successful self-employment.

Physical therapists report a very high level of job satisfaction, driven both by prevalent employment opportunities and social interaction.

Physical Rehabilitation Science, Ph.D.

Through coursework and participation in research, the Doctor of Philosophy program in physical rehabilitation science emphasizes the development of an individual's expertise as a researcher in rehabilitation science. Approximately 20 students are enrolled in the Ph.D. program each year.

Graduates who complete the program are prepared for academic appointments that emphasize research, scholarship, and teaching. They possess:

- theoretical and scientific knowledge to perform basic, applied, or clinical-level original research that leads to scientific presentations, publication in peer-reviewed journals, and competition for extramural funding through scientific grant writing;
- breadth of knowledge in exercise physiology, biomechanic, neuroscience, or motor control specialty areas as they relate to impairment, functional limitation, and disability; and
- theoretical and practical skills required for college or university teaching at the professional entry and advanced graduate levels.

Requirements

The Doctor of Philosophy with a major in physical rehabilitation science requires a minimum of 72 s.h. of graduate credit. The program is designed to advance a student's ability to independently develop and carry out research that establishes the scientific basis for prevention, evaluation, and treatment of impairments, functional limitations, and disability. The curriculum is flexible enough to accommodate research focusing on basic, applied, or clinical studies in the rehabilitation sciences. Students have access to the program's research laboratories (see Facilities [p. 1750] in this section of the Catalog).

Curriculum

Students and their faculty advisor develop an individualized study plan. A preliminary study plan is developed within the first 9 s.h. of graduate study; a final plan is submitted to the Graduate College when the Ph.D. comprehensive examination is scheduled.

To ensure breadth of knowledge, all students complete specific core, research, and scientific specialty area content courses. Elective courses are selected to provide in-depth study of the specialty; they are complemented by an advanced seminar course specific to a student's specialty and taken in preparation for the comprehensive examination.

Students must satisfactorily complete the comprehensive examination, which is taken after all required coursework is completed. Doctoral study culminates with 12 s.h. of thesis research and an oral examination.

General Core Requirement

Ph.D. students must complete the following core requirements. In addition to the courses below, the Collaborative Institutional Training Initiative (CITI)—online, web-based training—must be completed before a student enrolls in BMED:7270 Scholarly Integrity/Responsible Conduct

of Research I and BMED:7271 Scholarly Integrity/Responsible Conduct of Research II.

Code	Title	Hours
All of these:		
PTRS:7812	Biomedical Instrumentation and Measurement	3
PTRS:7820	Seminar in Rehabilitation Science (taken twice for 1 s.h. each)	2
PTRS:7880	Teaching Practicum	arr.
BIOS:5120/ IGPI:5120/ STAT:5610	Regression Modeling and ANOVA in the Health Sciences	3
BMED:7270	Scholarly Integrity/Responsible Conduct of Research I	0
BMED:7271	Scholarly Integrity/Responsible Conduct of Research II	0
PSQF:7385/ EDTL:7385/ EPLS:7385/ GRAD:7385/ RCE:7385	Teaching and Learning in Higher Education	3
One of these:		
BIOS:4120	Introduction to Biostatistics	3
STAT:4143/ PSQF:4143	Introduction to Statistical Methods	3

Research Requirement

Students complete at least 27 s.h. from the following. The capstone course PTRS:7900 Rehabilitation Research Capstone Project is recommended but not required for students who enter the program with a master's or doctoral-level degree; however, it is required for students who enter with a bachelor's degree.

Code	Title	Hours
PTRS:7884	Practicum in Research	arr.
PTRS:7895	Advanced Seminar in Rehabilitation Science	arr.
PTRS:7900	Rehabilitation Research Capstone Project	arr.
PTRS:7927	Research in Rehabilitation Science	arr.
PTRS:7930	Critical Thinking in Neuro-Mechanical Systems	arr.
PTRS:7931	Critical Thinking in Pain	arr.
PTRS:7932	Critical Thinking in Biomechanics and Human Performance Assessment	arr.
PTRS:7933	Critical Thinking in Movement Control/Human Performance	arr.
PTRS:7934	Critical Thinking in Neural Plasticity	arr.
PTRS:7935	Critical Thinking in Movement Science	arr.
PTRS:7936	Critical Thinking in Cardiovascular Physiology	arr.
PTRS:7990	Thesis: Rehabilitation Science	arr.

Specialty Content Requirement

Students must complete at least 9 s.h. in their scientific specialty area. Students may choose courses from the following list, but other courses suited to a student's background knowledge and interest area are considered.

Code	Title	Hours
Anatomy and Cell Biology		
ACB:8401	Advanced Human Anatomy	arr.
Epidemiology		
EPID:6900	Design of Intervention and Clinical Trials	3
Health and Human Physiology		
HHP:6130	Advanced Skeletal Muscle Physiology	1,3
HHP:6150	Advanced Clinical Exercise Physiology	1,3
HHP:6300	Motor Control Seminar	1
HHP:6410	Advanced Exercise Physiology	1,3
HHP:6460	Advanced Cardiovascular Physiology	1,3
HHP:6470	Advanced Physiology of Aging	1,3
HHP:6480	Advanced Human Pharmacology	1,3
Neuroscience		
NSCI:7235/ NEUR:7235	Neurobiology of Disease	3
Nursing		
NURS:3460	Professional Role II: Research	3
Occupational and Environmental Health		
OEH:4310	Occupational Ergonomics: Principles	3
OEH:6310	Occupational Ergonomics: Applications	3
Pharmacology		
PCOL:5137	Neurotransmitters	1
PCOL:6207	Ion Channel Pharmacology	1
PCOL:6250	Advanced Problem Solving in Pharmacological Sciences	1
Physical Therapy		
PTRS:5210	Kinesiology and Pathomechanics	4
PTRS:5206	Cardiopulmonary Therapeutics	3
PTRS:6224	Activity-Based Neural and Musculoskeletal Plasticity in Health Care	4
PTRS:6250	Critical Inquiry I: Evidence-Based Practice	2
PTRS:6251	Critical Inquiry II: Rehabilitation Research	2
PTRS:6253	Functional Neuroanatomy	arr.
PTRS:7875	Analysis of Activity-Based Neural and Musculoskeletal Plasticity	3
PTRS:7899	Introduction to Pain: Overview of Theories, Concepts, and Mechanisms	1

PTRS:7901	Clinical Correlates of Pain: Syndromes and Management	1
PTRS:7902	Molecular, Cellular, and Neural Mechanisms of Pain	2
PTRS:7903	Rehabilitation Management of Pain	1

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College. They should have a cumulative g.p.a. of at least 3.00 and scores at or above the 50th percentile for each section of the Graduate Record Exam (GRE) General Test. A minimum of two years of clinical experience may be considered highly desirable, depending on the research interest area.

Applicants whose first language is not English must score at least 100 (internet-based) on the Test of English as a Foreign Language (TOEFL).

Application materials must include a complete Graduate College application form, test scores, transcripts, three letters of recommendation, and a statement of purpose.

Personal interviews are required of all applicants selected for consideration by the admissions committee. On-campus interviews are preferred, but telephone interviews may be substituted when necessary.

Application deadlines are October 15 for spring semester entry (notification by December 15); March 15 for summer entry (notification by May 15); and May 15 for fall semester entry (notification by July 15).

Financial Support

A number of assistantships are available for Ph.D. students. Faculty advisors provide guidance for students seeking external scholarship support through foundations and federal programs that support Ph.D. training.

Career Advancement

The Ph.D. program trains students to obtain positions as professors and researchers in rehabilitation science.

Physician Assistant Studies and Services

Chair

Website: <https://medicine.uiowa.edu/pa/>

The physician assistant profession is one of the newest and most exciting in health care. Physician assistants (PAs) are licensed to practice medicine with physician supervision. They are responsible for making medical decisions and providing a broad range of diagnostic and therapeutic services.

In the traditional office setting, PAs see patients, obtain histories, perform physical examinations, and order necessary laboratory and/or radiological studies. Based on this information, the PA establishes a diagnosis, develops an appropriate management plan, and initiates treatment that may include prescribing medications. The physician is consulted as needed and remains ultimately responsible for the care provided by the physician/PA team. PAs also are involved in both patient and community health education.

The Department of Physician Assistant Studies and Services is located on the University of Iowa health sciences campus, which includes University of Iowa Hospitals & Clinics, one of the nation's largest university-owned teaching hospitals.

Programs

Graduate Program of Study

Major

- Master of Physician Assistant Studies [p. 1764]

Courses

Physician Assistant Studies and Services Courses

PA:8212 Fundamentals of EKG and ACLS for Physician Assistant Students 2 s.h.

Theory and practice with basic analysis of EKG strips and interpretation, including rhythm disturbances; completion of American Heart Association's Advanced Cardiac Life Support (ACLS) program.

PA:8213 Fundamentals of Radiology for Physician Assistant Students 1 s.h.

Theory and practice for interpretation of radiographs including general radiology, body, chest, musculoskeletal, pediatrics, and neurology. Requirements: enrollment in physician assistant studies and services.

PA:8214 Fundamentals of Clinical Laboratory Medicine for Physician Assistant Students 1 s.h.

Theory and practice of selected clinical laboratory techniques and procedures; emphasis on effective utilization of clinical laboratory in diagnosis and management of disease states. Requirements: enrollment in physician assistant studies and services.

PA:8301 Seminar for Physician Assistant Students 1 s.h.

Professional issues that affect the physician assistant's practice of medicine.

PA:8302 Physician Assistant Professional and Clinical Skills 1 s.h.

Hands-on experience and activities; suturing, injections, prescription and order writing, medical records, patient confidentiality, Iowa Law governing physician assistant practice, motivational interviewing, toddler and disability exams.

PA:8303 Physician Assistant Senior Capstone 1 s.h.

Demonstration of strong clinical knowledge base and proficiency in basic clinical problem solving; focus on student's ability to think logically and critically, integrate and synthesize knowledge, access evidence-based medical resources, document patient care appropriately, apply clinical knowledge, and demonstrate professional behavior. Requirements: enrollment in physician assistant studies and services.

PA:8304 Emergency Medicine for Physician Assistant Students arr.

Obtaining and recording pertinent historical data, obtaining indicated laboratory studies, assessing the results, arriving at a diagnosis, formulating a treatment plan, implementing appropriate therapy.

PA:8305 Gynecology for Physician Assistant Students 4 s.h.

Opportunity to develop proficiency in history and physical exams of gynecological patients; outpatient, family planning, gynecological cancer, concepts of diagnostic techniques and therapy.

PA:8306 Family Practice I for Physician Assistant Students 4 s.h.

Obtaining and recording complete history and physical exams; formulation of differential diagnosis and problem list; ordering, obtaining, and interpreting lab and diagnostic studies; implementation of therapeutic procedures and treatment plans.

PA:8307 Family Practice II for Physician Assistant Students 4 s.h.

Opportunity to participate in delivery of ambulatory primary care; at a different site from PA:8306.

PA:8308 General Surgery for Physician Assistant Students 6 s.h.

Preparation for work as an assistant to the generalist; outpatient and inpatient surgical services, including surgical procedures and management of postoperative course.

PA:8309 Internal Medicine for Physician Assistant Students 6 s.h.

Eliciting a medical history, doing a pertinent physical exam, obtaining indicated lab studies, assessment of results, formulation of management plan and implementation of appropriate therapy for common internal medicine problems.

PA:8310 Pediatrics for Physician Assistant Students arr.

Knowledge and skills required for providing appropriate medical care to infants, children, and adolescents; initiation and promotion of interpersonal relationships.

PA:8311 Psychiatry for Physician Assistant Students 4 s.h.

Training in history and physical exams of psychiatry patients, including individual and family therapy, vocational testing and guidance, development of interviewing skills.

PA:8312 Long-Term Care for Physician Assistant Students arr.

Development of clinical knowledge and skill in diagnosing, treating, and performing procedures for patients of long-term care settings; knowledge of relevant conditions.

PA:8320 Dermatology Elective for Physician Assistant Students arr.

Recognizing dermatologic diseases and disorders, instituting appropriate management of patients with dermatologic problems.

PA:8321 Neurology Elective for Physician Assistant Students arr.

Performing general and neurological exams, establishing diagnosis, recommending lab studies, instituting appropriate management of common neurological diseases and disorders, recognizing the need for urgent treatment.

PA:8322 Obstetrics for Physician Assistant Students arr.

Proficiency in physical exam of OB patients; applying concepts of diagnostic techniques and therapy; following patients' course, including labor, delivery, and postpartum care.

PA:8323 Ophthalmology Elective for Physician Assistant Students arr.

Proficiency in recognizing ophthalmology problems; how to institute appropriate management of these conditions.

PA:8324 Otolaryngology Elective for Physician Assistant Students arr.

Proficiency in recognizing otolaryngology problems; how to institute appropriate management of these conditions; opportunity for involvement in varied surgical procedures.

PA:8325 Pediatric Elective for Physician Assistant Students arr.

Experience working with children and adolescents.

PA:8326 Radiology Elective for Physician Assistant Students arr.

Proficiency in systematic evaluation of normal and abnormal routine radiologic examinations; listing indications for special exam procedures, including details of prepping the patient.

PA:8327 Pediatric Elective (Hematology/Oncology) for Physician Assistant Students arr.

Basic clinical knowledge and skills for diagnosis, treatment, and management of pre- and post-bone marrow transplant patients.

PA:8328 Pediatric (Cardiology) Elective for Physician Assistant Students arr.

Cardiovascular assessment and problem management of pediatric patients; experience with a range of acute, chronic, common, and rare cardiology diseases.

PA:8329 Psychiatry Elective for Physician Assistant Students arr.

Training in evaluation and treatment of psychiatry patients.

PA:8330 Surgery Elective for Physician Assistant Students arr.

Experience in a wide range of surgical problems, procedures, and treatments, including diagnosis, care and treatment, and postoperative courses of surgical patients.

PA:8331 Surgery Elective (Transplant/Organ Retrieval) for Physician Assistant Students arr.

Extensive experience in care of patients with end-stage organ failure; evaluation of potential transplant candidates, participation in surgical procedures on transplant service.

PA:8332 Surgery Elective (Burn Unit) for Physician Assistant Students arr.

Involvement in care on burn unit and in operating room; skills in burn debridement, grafting techniques, skin storage techniques, dressing changes, tub baths, and physical therapy procedures.

PA:8333 Surgery Elective (Cardiac Surgery) for Physician Assistant Students arr.

Development of technical skills in operating room; essentials of preoperative evaluation and postoperative management of cardiac surgical patient.

PA:8334 Orthopedics Elective for Physician Assistant Students arr.

Recognition of varied orthopedic problems and treatments; musculoskeletal diseases and disorders, both emergencies and common conditions, and how to establish appropriate management.

PA:8335 Internal Medicine Elective for Physician Assistant Students arr.

Training in varied internal medicine problems; recognition, appropriate treatment.

PA:8336 Internal Medicine (Cardiology) Elective for Physician Assistant Students arr.

Cardiovascular assessment and problem management; experience with wide range of acute, chronic, common, and rare diseases.

PA:8337 Internal Medicine (EKG) Elective for Physician Assistant Students arr.

Experience reading electrocardiograms, interpreting cardiac arrhythmias, performing and evaluating EKG stress tests.

PA:8338 Internal Medicine (Gastroenterology) Elective for Physician Assistant Students arr.

Experience with a wide range of gastrointestinal pathology; history and physical exams of gastrointestinal diagnostic procedures, follow-up care of patients through outpatient clinics.

PA:8339 Internal Medicine (Oncology) Elective for Physician Assistant Students arr.

Experience to develop diagnostic skills in clinical oncology and gain familiarity with methods of staging common cancers; assistance in therapy and outpatient management of cancer patients.

PA:8340 Internal Medicine (Geriatrics) Elective for Physician Assistant Students arr.

Familiarity with broad spectrum of medical conditions among the elderly; experience in history and physical exams, diagnosis of geriatric patients along with follow-up visits.

PA:8341 Internal Medicine (Pulmonary) Elective for Physician Assistant Students**arr.**

Development of basic clinical knowledge and skills for diagnosis, treatment, and management of pulmonary diseases.

PA:8342 Internal Medicine (Palliative Care/Hospice) Elective for Physician Assistant Students**arr.**

Work on a hospice care team performing evaluation, treatment, and education of patients with terminal illnesses; dealing with the prospect of death.

PA:8343 Internal Medicine (Infectious Disease) Elective for Physician Assistant Students**arr.**

Development of basic clinical knowledge and skills for diagnoses, treatment, and management of infectious diseases.

PA:8345 Urology Elective for Physician Assistant Students**arr.**

Proficiency in managing patients with urologic conditions; skill in taking a urologic history, performing physical exams, interpreting laboratory studies and data.

PA:8346 Family Practice Elective for Physician Assistant Students**arr.**

Proficiency in delivering ambulatory primary care.

PA:8347 Gynecology Elective (Women's Health) for Physician Assistant Students**arr.**

Experience in annual gynecologic exams, PAP screening, gynecology problems, contraception issues, STD screening and counseling, common gynecologic procedures.

PA:8348 Migrant Health Elective for Physician Assistant Students**arr.**

Basic clinical knowledge and skills for diagnosis, treatment, and prevention of diseases, injuries, and conditions related to environmental exposure in migrant worker populations.

PA:8349 Occupational Medicine Elective for Physician Assistant Students**arr.**

Basic clinical knowledge and skills for diagnosis, treatment, and prevention of work-related diseases, injuries, and conditions related to environmental exposure.

PA:8350 Pediatrics (Neonatology) Elective for Physician Assistant Students**arr.**

Basic clinical knowledge and skill for diagnosis, treatment, and management of critically ill infants.

PA:8351 Internal Medicine (Rheumatology) for Physician Assistant Students**arr.**

Basic clinical knowledge and skills for diagnosis, treatment, and management of rheumatologic diseases.

PA:8352 Medical Intensive Care for Physician Assistant Students**arr.**

Basic clinical knowledge and skills for diagnosis, treatment, and management of critically ill patients.

PA:8353 International Medicine for Physician Assistant Students**arr.**

Basic clinical knowledge and skills for diagnosis, treatment, and prevention of diseases, injuries, and conditions relevant to international medicine.

PA:8354 Interventional Radiology for Physician Assistant Students**arr.**

Basic clinical knowledge and skills for diagnosis and treatment of conditions requiring interventional therapy.

PA:8355 Gynecologic Oncology Elective for Physician Assistant Students**arr.**

Experience developing diagnostic skills in clinical gynecologic oncology, learning methods of staging specific cancers; and assisting in therapy and outpatient management of patients with varied cancers.

PA:8356 Wilderness Medicine for Physician Assistant Students**arr.**

Four-week emergency medicine elective taken in conjunction with Carver College of Medicine; mix of didactic and experiential learning; ten-day trip to Colorado to learn about hypothermia, altitude medicine, search and rescue, field evaluation, treatment and evacuation of common back country injuries; lectures and simulations.

PA:8357 Physician Assistant Transitions to Clinical Rotations**1 s.h.**

Additional didactic and hands-on skills essential for preparation prior to core and elective clinical rotations. Requirements: enrollment in physician assistant studies and services.

PA:8358 Internal Medicine (Endocrinology) Elective for Physician Assistant Students**arr.**

Basic clinical knowledge and skills for diagnosis treatment and management for common endocrinology diseases.

PA:8359 Surgery Elective for Physician Assistant Students (Plastics and Reconstruction)**arr.**

Experience in a wide range of surgical problems, procedures, and treatments in medical reconstruction, plastics, and trauma; includes diagnosis, care and treatment, and postoperative courses for surgical patients.

PA:8360 Physician Assistant Summer Clinicals**6 s.h.**

Clinical course for physician assistant students during their second summer session.

PA:8361 Physician Assistant Remediation and Self Study**arr.**

Completion of remediation or self-study program requirements.

PA:8362 Independent Study for Physician Assistant Students**arr.**

Students work on alternative experiences to supplement coursework and/or clinical experiences throughout various areas of the physician assistant program; self-guided experiences with faculty supervision.

PA:8363 Primary Care Academic Rotation**arr.**

Additional academic opportunities that enhance previous experiences gained in a clinical setting; emphasis on student participation in direct activities to supplement primary care experiences with observation and simulation activities as needed to provide a balanced experience in meeting course objectives.

Master of Physician Assistant Studies, M.P.A.S.

The Master of Physician Assistant Studies (M.P.A.S.) program emphasizes primary care medicine, particularly family medicine. It also offers elective clinical rotations in selected medical subspecialties. Students who complete the program are eligible to take the National Certifying Examination for Primary Care Physician Assistants, which they must complete successfully in order to register as physician assistants in the United States.

The Department of Physician Assistant Studies and Services is accredited by the Accreditation Review Commission on Education for the Physician Assistant and is a member of the Physician Assistant Education Association.

Requirements

The Master of Physician Assistant Studies requires a minimum of 114 s.h. of credit. The curriculum spans 28 months and consists of a preclinical phase and a clinical phase. The program begins in August.

The Master of Physician Assistant Studies requires the following work.

Preclinical Curriculum

The M.P.A.S. program's preclinical phase is built on a triple-helix model whose three strands consist of clinical and professional skills (CAPS), mechanisms of health and disease (MOHD), and medicine and society (MAS). The strands are interwoven, assuring that their material is integrated and revisited throughout the preclinical phase, so that students' understanding and mastery of the material deepens progressively.

The preclinical curriculum consists of the following courses.

Human Anatomy and Foundations of Life

ACB:8101 Medical Gross Human Anatomy involves complete dissection of the human body. Students learn to identify the human body's components and learn how their structures and locations relate to their functions. They also learn much of the language they will need in order to communicate accurately and specifically with patients and other physicians.

MED:8123 Foundations of Cellular Life covers genetics, embryology, molecular biology, biochemistry, cell biology, and histology. Students learn the molecular events required for cellular life and how cells grow and interact to form the basic tissues of the human body. This course provides the necessary framework students will need in order to begin the mechanisms of health and disease series.

Clinical and Professional Skills

The clinical and professional skills (CAPS) strand provides students with the knowledge, skills, and attitudes required for professional development and clinical excellence, including the sense of inquiry and lifelong habits of skill acquisition, self-assessment, and reflective practice. CAPS features developmental learning through increasingly challenging

experiences across the curriculum, repeated practice opportunities, observation and feedback, and self-directed learning and reflection. CAPS requires the following three courses.

MED:8121 Clinical and Professional Skills I introduces students to concepts of clinical reasoning, communication, physical examination, and evidence-based clinical practice as well as the principles of biomedical ethics. The Longitudinal Clinical Mentor (LCM) program allows early clinical interactions and helps place classroom experiences into the context of patient care. Through interactions with students from other health sciences colleges, M.P.A.S. students begin to explore the interprofessional approach to caring for patients.

MED:8131 Clinical and Professional Skills II reinforces clinical reasoning concepts from MED:8121 and introduces additional elements of clinical reasoning, which are practiced through interactions with standardized patients and through Longitudinal Clinical Mentor clinical visits. The varied experiences help students gain a deeper appreciation for issues in biomedical ethics. As part of interprofessional education, students focus on the strengths and barriers involved in providing comprehensive interdisciplinary patient care.

MED:8221 Clinical and Professional Skills III develops advanced clinical reasoning skills through focused patient encounters and interactions with special patient populations. Emphasis is on students' ability to integrate and use concepts from the other curricular strands that are required for cost-conscious, patient-centered, interdisciplinary care.

Mechanisms of Health and Disease

The mechanisms of health and disease (MOHD) strand focuses on multisystem mechanisms. MOHD requires the following five courses.

MED:8124 Mechanisms of Health and Disease I covers normal and healthy processes within and among the mechanisms of oxygenation, metabolism, and genetics/development.

MED:8133 Mechanisms of Health and Disease II covers normal and healthy processes within and among the mechanisms of immunology/inflammation, locomotion/integument, and neuropsychiatry.

MED:8134 Mechanisms of Health and Disease III covers abnormalities or disruptions leading to disease within and among the mechanisms of oxygenation, metabolism, and genetics/development.

MED:8223 Mechanisms of Health and Disease IV covers abnormalities or disruptions leading to disease within and among the mechanisms of immunology/inflammation, locomotion/integument, and neuropsychiatry.

MED:8224 Mechanisms of Health and Disease Keystone provides a transition from classroom instruction in MED:8124, MED:8133, MED:8134, and MED:8223 to clinical practice. Foundational information from those courses is approached from the perspective of common clinic encounters. Students make diagnostic and management decisions about common important clinical problems using the foundational knowledge they gained from those courses.

Medicine and Society

The medicine and society (MAS) strand teaches students about disease prevention, health promotion services, public health, epidemiology, health services organizations and

delivery, and community dimensions of medical practice. MAS requires the following three courses.

MED:8122 Medicine and Society I introduces social determinants of health. Students investigate the influence and impact of culture and the community on health care, learn about community resources, and apply health and risk assessment to individual patients and to themselves.

MED:8132 Medicine and Society II focuses on public health and epidemiology, with attention to screening, global health, and environmental hazards.

MED:8222 Medicine and Society III focuses on health services organization and delivery, with emphasis on community dimensions of medical practice and patient safety.

Foundational Clinical Experience

The foundational clinical experience consists of a six-week summer session that includes preclinical workshop material in cardiology and radiology. Students complete a two-week introduction to clinical medicine before beginning the clinical rotations. Foundational clinical experience requires the following five courses.

Code	Title	Hours
PA:8212	Fundamentals of EKG and ACLS for Physician Assistant Students	2
PA:8213	Fundamentals of Radiology for Physician Assistant Students	1
PA:8214	Fundamentals of Clinical Laboratory Medicine for Physician Assistant Students	1
PA:8301	Seminar for Physician Assistant Students	1
PA:8302	Physician Assistant Professional and Clinical Skills	1

Clinical Curriculum

The program's second phase concentrates on clinical education. Students complete four weeks of preclinical workshops and rotations and a 36-week core of required primary care clinical rotations, including general internal medicine, surgery, family medicine, pediatrics, emergency medicine, gynecology, and psychiatry. Students then select eight weeks of electives, which may include rotations such as geriatrics, cardiology, dermatology, and orthopedics.

The primary care clinical rotations are designed to provide instruction and experience in caring for patients in a way that enables students to integrate the knowledge, skills, behaviors, and attitudes they learned in the program's didactic phase. Clinical training is provided at University of Iowa Hospitals & Clinics, the Iowa City VA Health Care System, the VA Central Iowa Health Care System and Broadlawns Medical Center in Des Moines, and other affiliated hospitals throughout Iowa. In elective rotations, students gain additional clinical experience through placement with selected preceptors involved in office-based practices, typically in medically underserved rural areas.

Students also complete a master's degree project as part of the clinical curriculum.

Required Clinical Rotation

The following clinical rotations are required.

Code	Title	Hours
PA:8304	Emergency Medicine for Physician Assistant Students	4
PA:8305	Gynecology for Physician Assistant Students	4
PA:8306	Family Practice I for Physician Assistant Students	4
PA:8307	Family Practice II for Physician Assistant Students	4
PA:8308	General Surgery for Physician Assistant Students	6
PA:8309	Internal Medicine for Physician Assistant Students	6
PA:8310	Pediatrics for Physician Assistant Students	4
PA:8311	Psychiatry for Physician Assistant Students	4

Elective Clinical Rotations

Students select elective clinical rotations from these.

Code	Title	Hours
PA:8320	Dermatology Elective for Physician Assistant Students	arr.
PA:8321	Neurology Elective for Physician Assistant Students	arr.
PA:8322	Obstetrics for Physician Assistant Students	arr.
PA:8323	Ophthalmology Elective for Physician Assistant Students	arr.
PA:8324	Otolaryngology Elective for Physician Assistant Students	arr.
PA:8325	Pediatric Elective for Physician Assistant Students	arr.
PA:8326	Radiology Elective for Physician Assistant Students	arr.
PA:8327	Pediatric Elective (Hematology/Oncology) for Physician Assistant Students	arr.
PA:8328	Pediatric (Cardiology) Elective for Physician Assistant Students	arr.
PA:8329	Psychiatry Elective for Physician Assistant Students	arr.
PA:8330	Surgery Elective for Physician Assistant Students	arr.
PA:8331	Surgery Elective (Transplant/Organ Retrieval) for Physician Assistant Students	arr.
PA:8332	Surgery Elective (Burn Unit) for Physician Assistant Students	arr.
PA:8333	Surgery Elective (Cardiac Surgery) for Physician Assistant Students	arr.
PA:8334	Orthopedics Elective for Physician Assistant Students	arr.

PA:8335	Internal Medicine Elective for Physician Assistant Students	arr.
PA:8336	Internal Medicine (Cardiology) Elective for Physician Assistant Students	arr.
PA:8337	Internal Medicine (EKG) Elective for Physician Assistant Students	arr.
PA:8338	Internal Medicine (Gastroenterology) Elective for Physician Assistant Students	arr.
PA:8339	Internal Medicine (Oncology) Elective for Physician Assistant Students	arr.
PA:8340	Internal Medicine (Geriatrics) Elective for Physician Assistant Students	arr.
PA:8341	Internal Medicine (Pulmonary) Elective for Physician Assistant Students	arr.
PA:8342	Internal Medicine (Palliative Care/Hospice) Elective for Physician Assistant Students	arr.
PA:8343	Internal Medicine (Infectious Disease) Elective for Physician Assistant Students	arr.
PA:8345	Urology Elective for Physician Assistant Students	arr.
PA:8346	Family Practice Elective for Physician Assistant Students	arr.
PA:8347	Gynecology Elective (Women's Health) for Physician Assistant Students	arr.
PA:8348	Migrant Health Elective for Physician Assistant Students	arr.
PA:8349	Occupational Medicine Elective for Physician Assistant Students	arr.
PA:8350	Pediatrics (Neonatology) Elective for Physician Assistant Students	arr.
PA:8351	Internal Medicine (Rheumatology) for Physician Assistant Students	arr.
PA:8352	Medical Intensive Care for Physician Assistant Students	arr.
PA:8353	International Medicine for Physician Assistant Students	arr.
PA:8354	Interventional Radiology for Physician Assistant Students	arr.
PA:8355	Gynecologic Oncology Elective for Physician Assistant Students	arr.

Admission

Applicants must:

- be citizens or permanent residents of the United States;
- hold a baccalaureate degree from an accredited institution in the United States (the degree does not have to be

completed at the time of admission, but must be conferred prior to the start of the program)*;

- have a minimum cumulative g.p.a. of 3.00 on a 4.00 scale;
- have a minimum overall science g.p.a. of 3.20 on a 4.00 scale or a science g.p.a. of at least 3.20 on a 4.00 scale on the most recent 40 s.h. of college-level, science-based coursework (science courses are subject to department approval);
- have completed the prerequisite courses no more than 10 years before they apply and all courses must be taken for letter grades (see "Prerequisite Science Courses" below);
- have taken the Graduate Record Examination (GRE) General Test no more than 10 years before they apply (must score at the 25th percentile or higher in each of the individual sections—quantitative, verbal, and analytical) or the Medical College Admission Test (MCAT) no more than 10 years before they apply (no minimum MCAT score is required at this time);
- have completed a minimum of 1,000 hours of direct patient health care experience by December 31 of the application year (hours subject to departmental approval and applicants can be awarded between 0-100 percent of hours completed);
- submit three letters of recommendation (one must be from a collegiate academic reference and one must be from a health care supervisor (shadowing experience does not count, but may be used for the third recommendation letter));
- meet the admission requirements of the Graduate College (see the Manual of Rules and Regulations of the Graduate College on the Graduate College website);
- have taken the Test of English as a Foreign Language (TOEFL) if English is not their native language (only the internet-based test will be accepted and applicants must have a total score of at least 93 with a speaking score of at least 26)**; and
- be able to meet the program's technical standards (see "Technical Standards" below).

*International applicants will have their credentials reviewed for degree completion and equivalency.

**International applicants who do not speak English as their native language should have TOEFL scores sent from the Educational Testing Service (ETS) to the Department of Physician Assistant Studies and Services. The TOEFL requirement may be waived for applicants with a master's or doctoral degree from an accredited U.S. institution.

Prerequisite Science Courses

Applicants must have completed preparatory science courses in biological, chemical, and statistical sciences. Prerequisite courses can be in progress at the time of admission unless stated below. Science-based courses are subject to the approval by the Physician Assistant Studies and Services Program.

Biological Science

These courses are required:

An introductory biology or zoology course sequence (minimum of a two semester sequence unless otherwise approved).

An animal, exercise, or human physiology course.

A minimum of three additional upper-level biological science courses. To qualify as upper level, the biological

science courses must require a prerequisite course to enroll. Courses that have been used to satisfy this requirement include cell biology, cell physiology, endocrinology, genetics, histology, immunology, microbiology, molecular biology, neurobiology, pharmacology, and other related disciplines.

Chemical Science

These courses are required:

An introductory chemistry course sequence (a minimum of a two-semester sequence, unless otherwise approved).

At least one semester of organic chemistry (must be at a higher level than a survey of organic chemistry course).

At least one semester of biochemistry (must be at a higher level than a survey of biochemistry course and be completed at the time of application).

Statistical Science

This course is required:

Any course with a statistical focus, such as a general, introductory, psychological, or business statistics course; or biostatistics; or a qualitative research methods course.

Satisfaction of the basic admission requirements does not ensure acceptance to the program. The admission committee selects the applicants it considers best qualified. The admission committee requests interviews with the most qualified applicants.

Technical Standards

Individuals admitted to the Department of Physician Assistant Studies and Services must possess the capability to complete the entire curriculum and earn the Master of Physician Assistant Studies degree. The curriculum requires demonstrated proficiency in a variety of cognitive, problem-solving, manipulative, communicative, and interpersonal skills. Therefore, the following abilities and expectations must be possessed by all students admitted to the program.

Observation

Students must have the functional ability to observe demonstrations and experiments in the basic sciences and have sufficient use of the senses necessary to perform history taking and a physical examination. They must be able to acquire and evaluate relevant information in multiple formats—written, electronic, and radiographic data. If students are not able to observe or acquire information through the senses, they must demonstrate abilities to acquire the necessary information through satisfactory alternative means.

Communication

Students must be able to establish sensitive and professional relationships with patients, colleagues, and staff. They are expected to communicate the results of the history and physical examination to the patient and their colleagues with accuracy, clarity, and efficiency. In any instances where students' ability to communicate is compromised, students must demonstrate comparable alternative means or abilities to communicate.

Motor Skills

Students are expected to participate in basic diagnostic and therapeutic maneuvers and procedures. In any instances

where students' ability to acquire information and perform a physical examination is compromised, they must demonstrate satisfactory alternative means or abilities to acquire information and perform a physical examination.

Intellectual, Conceptual, Integrative, and Quantitative Abilities

Students must be able to learn to analyze and synthesize available information, solve problems, and reach reasonable diagnostic and therapeutic judgments. They are expected to be able to display sound judgment in the assessment and treatment of patients. Students must be able to learn to respond with prompt and appropriate action in emergencies.

Behavioral and Social Attributes

Students are expected to be able to accept constructive criticism and respond with appropriate modification of their behavior. They are expected to possess the perseverance, diligence, and consistency necessary to complete the medical school curriculum and enter the independent practice of medicine within a reasonable time frame. Students must demonstrate professional demeanor and ethical behavior in all dealings with peers, faculty, staff, and patients.

Cultural Competency

Medical students must be able to communicate with and care for persons whose culture, sexual orientation, or religious beliefs are different from their own. They must be able to perform a complete history and physical exam on any patient regardless of the student's and patient's race, religion, ethnicity, socioeconomic status, gender, age, or sexual preference. Similarly, students must be able to interact professionally with colleagues and other health care professionals without regard to race, religion, ethnicity, socioeconomic status, gender, age, or sexual preference.

Any candidate who is admitted to the Department of Physician Assistant Studies and Services will be required to sign a statement that verifies that they have read, fully understand, and meet each of the technical standards. Applicants with additional questions about these standards should email the director of administrative and student services for the physician assistant program.

Application Timeline and Process

Applications are accepted from the end of April to October 1 for entry into the program the following August. Applicants must apply through the Central Application Service for Physician Assistants (CASPA).

The admission committee prefers that the majority of prerequisite course requirements be completed by the October 1 application deadline date.

All materials must be received and verified by CASPA, and all additional information requested by the Physician Assistant Studies and Services Program submitted by the October 1 deadline.

All final decisions related to admission deadlines, process, and decisions regarding admission are up to the department administrator, in collaboration with the admission committee.

Career Advancement

Physician assistants work in a variety of settings, including medical offices, hospital emergency rooms, nursing homes,

rural satellite clinics, health maintenance organizations, and patients' homes.

Psychiatry

Chair

- Peggy C. Nopoulos

Faculty: <https://medicine.uiowa.edu/psychiatry/people/primary-appointments>

Website: <https://medicine.uiowa.edu/psychiatry/>

The Department of Psychiatry teaches M.D. students, principally during their third year, and trains resident physicians for academic and clinical careers in psychiatry.

Research

Department of Psychiatry staff members are involved in genetic and family studies of psychiatric disorders and research in genetic and biological psychiatry, neurochemistry, neuroimaging, neurophysiology, neuropsychiatry, psychosocial aspects of behavior, and neuroinvasive brain stimulation.

The department's students and residents have many research opportunities in psychiatry and in the basic science areas of neurochemistry, neurophysiology, and electrophysiology. The clinical areas of psychology, child psychiatry, and psychotherapy also offer opportunities for research and further study to a limited number of students.

Residency

The department offers a four-year training program approved by the Residency Review Committee of the American Medical Association. Training experiences are available at University of Iowa Hospitals & Clinics and at the Iowa City VA Health Care System. Additional experiences are available at affiliated institutions: Broadlawns Medical Center in Des Moines, the Iowa Medical and Classification Center at Oakdale, the Community Mental Health Center for Mid-Eastern Iowa in Iowa City, and the Independence Mental Health Institute (Iowa Department of Human Services).

The department also offers an approved two-year residency in child psychiatry. Fellowships in consult/liaison psychiatry and addiction medicine are available after residency training.

Courses

Psychiatry Courses

- PSYC:8267 Psychiatric Epidemiology** **3 s.h.**
Population-based studies of psychiatric disorders and associated etiologic tools; diagnostic criteria used in psychiatric research, common structured interviews and rating scales; recent research relevant to common psychiatric disorders; experience writing a research idea using NIH PHS grant form. Recommendations: EPID:6400 or two years of resident training in psychiatry. Same as EPID:6670.
- PSYC:8301 Clinical Psychiatry** **4 s.h.**
Requirements: third-year M.D. enrollment.
- PSYC:8401 Adult Psychiatry, Pappajohn Pavilion** **arr.**
Requirements: M.D. enrollment.
- PSYC:8402 Child Psychiatry, Pappajohn Pavilion** **arr.**
Roles of child psychiatry as a consultation service. Requirements: M.D. enrollment.

- PSYC:8403 Adult Outpatient Psychiatry and Psychotherapy** **2,4 s.h.**
Diagnostic assessment, evaluation, treatment of psychiatric patients; exposure to both psychotherapeutic, psychopharmacologic treatments. Requirements: M.D. enrollment.

- PSYC:8404 Women's Wellness and Counseling Service** **4 s.h.**
Experience evaluating and treating women with mental illness, with some emphasis on practitioner's autonomy; four-week rotation. Requirements: psychiatry clerkship.

- PSYC:8405 Advanced Inpatient Subinternship in Medical Psychiatry** **4 s.h.**
Hands-on experience in evaluation and treatment of patients with combined medical and psychiatric disease; decisions regarding appropriate consultations, diagnostic tests, treatment; etiology and pathophysiology. Requirements: M.D. enrollment.

- PSYC:8408 Advanced Inpatient Subinternship in Mood/Psychotic Disorders** **4 s.h.**
Subinternship in adult psychiatry; experiences that maximize autonomy and responsibility; inpatient rotation focuses on one subspecialty area (psychotic disorders or mood disorders); emphasis on substantial medical comorbidity; assess and address medical and psychiatric needs of assigned patients in a collaborative and integrative fashion; assess and manage patients independently at the level of a psychiatry intern, reporting directly to the attending; call is required; didactic curriculum focuses on critical appraisal of medical literature. Prerequisites: PSYC:8301. Requirements: fourth-year M.D. enrollment.

- PSYC:8409 Eating Disorders** **2,4 s.h.**
Inpatient rotation; emphasis on co-occurring psychiatric and comorbid medical conditions associated with eating disorders; patient assessment and management at an advanced level; direct patient care and engagement in clinical decision making for complex patients with substantial comorbidity; call is required; student experience maximizes autonomy and responsibility; didactic curriculum; focus on critical appraisal of relevant medical literature. Prerequisites: PSYC:8301. Requirements: fourth-year M.D. enrollment.

- PSYC:8410 Intellectual Disability** **2,4 s.h.**
In-depth two week clinical experience in the interdisciplinary approach to assessment and management of individuals with intellectual disability. Requirements: M.D. enrollment.

- PSYC:8411 Substance Use** **2,4 s.h.**
In-depth clinical experience in assessment and management of individuals with alcohol and drug abuse. Requirements: M.D. enrollment.

- PSYC:8412 Emergency Psychiatry** **2,4 s.h.**
In-depth clinical experience in assessment and management of acute psychiatric illness under supervision of faculty with expertise in care within this setting; clinical experiences centered in emergency department at University of Iowa Hospitals & Clinics. Prerequisites: PSYC:8301. Requirements: third- or fourth-year M.D. enrollment.

PSYC:8413 The Thriving Physician 2 s.h.

Two-week elective for medical students in their clinical years; designed to promote awareness, wellbeing, compassion, and career satisfaction through contemplative practices and the integration of concepts of positive psychology into daily living; through readings, discussions, and experiential activities, physicians-in-training will learn how to engage in reflective personal and professional self-care; classes will be half-day in length with time outside of class dedicated to practicing and incorporating skills into everyday activities. Requirements: M.D. enrollment.

PSYC:8414 Consultation Psychiatry 2,4 s.h.

Opportunity for in-depth clinical experience in psychiatric assessment and management of general medical and surgical patients; elective clerks serve on consultation-liaison psychiatry teams at the University of Iowa Hospitals & Clinics and the Iowa City Veterans Affairs Health Care System; may include opportunities for outpatient work in relevant settings (e.g., emergency psychiatry, outpatient clinics providing integrated psychiatric and medical care). Requirements: M.D. enrollment.

PSYC:8415 Geriatric Inpatient Psychiatry 4 s.h.

Rotation in Department of Psychiatry specialized inpatient geriatric psychiatry unit; students work under faculty and resident supervision.

PSYC:8450 Continuity of Care in Psychiatry 4 s.h.

Experience in Psychiatry Continuity of Care Clinic; maximizes autonomy and responsibility in an outpatient continuous care setting. Requirements: fourth-year M.D. enrollment.

PSYC:8497 Research in Psychiatry arr.

Experience and training in practical application of scientific methodology; work with research project at psychiatric service or affiliated cooperating research centers.

PSYC:8498 Psychiatry On Campus arr.

Arranged by student with departmental approval. Requirements: M.D. enrollment.

PSYC:8499 Psychiatry Off Campus arr.

Requirements: M.D. enrollment.

Radiation Oncology

Chair

- John M. Buatti

Director, Medical Physics Residency Program

- Joël J. St-Aubin

Director, Physician Residency Program

- Carryn M. Anderson

Faculty: <https://medicine.uiowa.edu/radiationoncology/people/primary-appointments>

Website: <https://medicine.uiowa.edu/radiationoncology/>

Radiation oncology specializes in the delivery of radiation treatments for cancer patients. It includes treatments with linear accelerators as well as isotopes and temporary and permanent surgically implanted sources. Radiation oncologists also use these methods to treat some benign diseases, such as Graves' ophthalmopathy and trigeminal neuralgia. Treatments often employ stereotactic CT-image guided and MR-image guided techniques.

The Department of Radiation Oncology is dedicated to educating undergraduate and graduate students, M.D. and other health professions students, and residents. Its faculty members provide instruction for Doctor of Philosophy students in the Free Radical and Radiation Biology [p. 1700] Program through their participation in FRRB:3110 Medical Physics I, FRRB:3215 Medical Physics II, FRRB:5000 Radiation Biology, FRRB:7000 Redox Biology and Medicine, and FRRB:7001 Molecular and Cellular Biology of Cancer.

The department's professional staff provides training in radiation therapy technology for undergraduate students in the Radiation Sciences [p. 1772] Program by teaching courses RSTH:3120 Radiation Therapy Clinical Internship I, RSTH:3225 Radiation Therapy Clinical Internship II, RSTH:3325 Radiation Therapy Clinical Internship III, RSTH:4125 Radiation Therapy Clinical Internship IV, and RSTH:4225 Radiation Therapy Clinical Internship V.

The department also offers specialized research projects and sponsors postdoctoral students in biology, physics, and clinical disciplines by arrangement with the instructor or mentor. Frequently, students from the Departments of Biomedical Engineering and Electrical and Computer Engineering are involved.

Residency

The department provides a four-year physician residency training program in radiation oncology that includes clinical care and education. It also has a two-year residency program in medical physics.

M.D. students can elect a four-week radiation oncology rotation and/or a two-week multidisciplinary cancer care elective. Nursing students, dental residents, and fellows in gynecologic oncology, breast cancer, and in adult and pediatric hematology and oncology complete rotations in the department.

Courses

Radiation Oncology Courses

RADO:8401 Radiation Oncology for Medical Students **4 s.h.**

Integration of clinical oncology, physics, and cancer biology; clinical work with faculty mentors; experience in clinical evaluation, technical physics, biological application.

RADO:8497 Research in Radiation Oncology **arr.**
Medical research, clinical or laboratory projects; individual study.

RADO:8498 Radiation Oncology Research **arr.**
Arranged by student with department approval.

RADO:8499 Radiation Oncology Off Campus **arr.**
Arranged by student with department approval.

Radiation Sciences

Director, Undergraduate Program

- Anthony W. Knight

Director, Diagnostic Medical Sonography Program

- Stephanie Ellingson

Director, Radiation Therapy Program

- Jared L. Stiles

Director, Radiologic Technology Program

- Jean E. Wiese

Director, Student Affairs

- Jennifer J. Maiers

Undergraduate major: radiation sciences (B.S.)

Website: <https://medicine.uiowa.edu/radsci/>

Radiation sciences professionals work with physicians to gather accurate patient information for diagnosis, treatment, and/or research of disease and injury. They provide direct patient care, produce quality images, and deliver treatment using a variety of radiation sources. The radiation sciences professional must apply knowledge, skill, and mature judgment while operating complex equipment safely and efficiently. Strong communication, organizational, and patient care skills are essential for a successful career in radiation sciences.

The University of Iowa's radiation sciences educational programs are designed to provide students with opportunities for intellectual, professional, and social growth. Students learn with faculty members and instructors who are committed to radiation sciences education.

Radiation sciences is one of two undergraduate majors in the field of medical imaging offered by the Carver College of Medicine. It encompasses radiologic technology, breast imaging, computed tomography, magnetic resonance imaging, cardiovascular interventional, diagnostic medical sonography, and radiation therapy programs. The other undergraduate major in medical imaging is nuclear medicine technology; see Nuclear Medicine Technology [p. 1730] in the Catalog.

The Carver College of Medicine is located on the University of Iowa health sciences campus, which includes University of Iowa Hospitals & Clinics, one of the nation's largest university-owned teaching hospitals. For information about the college's academic programs and resources, see Carver College of Medicine [p. 1658] in the Catalog.

Programs

Undergraduate Program of Study Major

- Major in Radiation Sciences (Bachelor of Science) [p. 1780]

Courses

- Breast Imaging Courses [p. 1772]
- Cardiovascular Interventional Courses [p. 1773]

- Computed Tomography Courses [p. 1773]
- Diagnostic Medical Sonography Courses [p. 1774]
- Magnetic Resonance Courses [p. 1776]
- Radiation Sciences Courses [p. 1777]
- Radiation Therapy Courses [p. 1777]
- Radiologic Technology Courses [p. 1778]

Breast Imaging Courses

RSBI:3310 Patient Care for Breast Imaging 3 s.h.

Foundation for providing high quality patient care during breast imaging exams and procedures; patient communication, patient assessment and treatment options including surgical and nonsurgical and reconstruction. Requirements: radiation sciences major.

RSBI:3315 Breast Imaging Clinical Internship I 2 s.h.

Breast imaging clinical internship practicum at UI Health Care; rotation through department imaging rooms; competency and objective-based education with required clinical performance evaluations; participation in routine and advanced breast imaging exams; performance expectations become progressively higher as students gain experience and skills. Requirements: radiation sciences major.

RSBI:4110 Breast Imaging Procedures and Analysis 3 s.h.

Breast imaging exams including technique, image evaluation, and positioning.

RSBI:4115 Breast Imaging Clinical Internship II 4 s.h.

Breast imaging clinical internship scheduled at University of Iowa Hospital & Clinics; rotation through department imaging rooms; competency and objective-based education with required clinical performance evaluations; experience facilitated by breast imaging technologists, radiologists, residents, and clinical coordinator; participation in routine and advanced breast imaging exams; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSBI:3315. Requirements: radiation sciences major.

RSBI:4120 Anatomy and Pathology for Breast Imaging 2 s.h.

Anatomy, localization terminology, histology, and cytology; pathology including mammographic appearance and reporting terminology; benign, high risk, and malignant conditions and their mammographic appearances.

RSBI:4130 Breast Imaging Acquisitions and Principles 2 s.h.

Physics and hardware used in obtaining exams in breast imaging; equipment operations including design characteristics of mammography units, digital acquisition, display, and informatics.

RSBI:4210 Breast Imaging Advanced Procedures and Analysis 3 s.h.

Advanced breast imaging modalities including breast sonography, breast MRI, sentinel node mapping, and interventional procedures.

RSBI:4215 Breast Imaging Clinical Internship III 4 s.h.

Breast imaging clinical internship schedules at University of Iowa Hospital & Clinics; rotation through department imaging rooms; competency and objective-based education with required clinical performance evaluations; experience facilitated by breast imaging technologists, radiologists, residents, and clinical coordinator; participation in routine and advanced breast imaging exams; performance expectations become progressively higher as students gain experience and skills.

RSBI:4220 Quality Control in Breast Imaging 3 s.h.

Quality control aspects related to breast imaging; quality assurance and evaluation including accreditation, certification, and Mammography Quality Standards Act (MQSA) regulations; quality control including mammographers tests and digital quality control tests; medical physicist test including general quality control tests and quality control tests specific to digital imaging and tomosynthesis.

Cardiovascular Interventional Courses

RSCI:4110 Vascular Anatomy 3 s.h.

Normal arterial and venous anatomy of the circulatory system, illustrated through angiographic, magnetic resonance imaging (MRI), and computed tomography (CG) images; common variants. Prerequisites: ACB:3110 or HHP:1100 or HHP:1150 or HHP:3105 or HHP:3115.

RSCI:4120 CVI Principles 4 s.h.

Imaging and accessory equipment for vascular interventional and cardiac interventional procedures; imaging equipment quality control; fundamental principles of vascular and cardiac procedures; patient preparation and care, radiation safety, contrast medium, pharmacology, and sedation. Corequisites: RSCI:4110. Requirements: acceptance to B.S. radiation science RT/CVI track or ARRT primary RT certification.

RSCI:4130 Electrocardiogram and Hemodynamics 3 s.h.

ECG analysis, hemodynamic principles and waveform analysis, cardiac output, vascular resistance, calculations of stenotic valves. Prerequisites: ACB:3110 or HHP:1100 or HHP:1150.

RSCI:4140 CVI Peripheral Procedures and Pathology 3 s.h.

Angiographic and interventional procedures of the abdomen, thorax, and upper and lower extremities; associated pathologies. Prerequisites: RSCI:4110. Corequisites: RSCI:4120, if not taken as a prerequisite. Requirements: RSCI:4110 or three months CVI experience.

RSCI:4150 CVI Neurology and Nonvascular Procedures and Pathology 3 s.h.

Angiographic and interventional procedures of the head and neck; associated pathologies. Prerequisites: RSCI:4110. Corequisites: RSCI:4120, if not taken as a prerequisite. Requirements: RSCI:4110 or three months CVI experience.

RSCI:4160 CVI Cardiac Procedures and Pathology 4 s.h.

Cardiac diagnostic and interventional procedures; associated pathologies. Prerequisites: RSCI:4110. Corequisites: RSCI:4120 and RSCI:4130, if not taken as prerequisites. Requirements: RSCI:4110 or three months CVI experience.

RSCI:4170 Cardiac Interventional Clinical Internship 4 s.h.

Scheduled cardiac-interventional clinical time at University of Iowa Hospitals & Clinics and Mercy Hospital, Iowa City; rotations in adult cardiac, electrophysiology, and pediatric catheterization; competency and objective-based education provided with clinical performance evaluations and constructive feedback from CI staff and clinical coordinator; clinical coordinator facilitates schedules, rotations, learning objectives, evaluations, and competencies. Corequisites: RSCI:4130 and RSCI:4160, if not taken as prerequisites. Requirements: acceptance to B.S. radiation sciences RT/CVI track.

RSCI:4180 Vascular Interventional Clinical Internship 4 s.h.

Scheduled vascular-interventional clinical time at University of Iowa Hospitals & Clinics; labs specialize in peripheral, neuro- and non-vascular procedures; competency and objective-based education; clinical performance evaluations providing constructive feedback from VI staff and clinical coordinator; clinical coordinator facilitates schedules, rotations, learning objectives, evaluations, and competencies. Corequisites: RSCI:4140 and RSCI:4150, if not taken as prerequisites. Requirements: acceptance to B.S. radiation sciences RT/CVI track.

RSCI:4190 CVI Clinical Internship 2 s.h.

Introduction to VI and CI labs, including basic set up, equipment, and procedures; preparation to spend more concentrated time in each area for future internships; provides 192 hours of clinical experience over a 12-week period. Requirements: acceptance to radiation sciences RT/CVI degree track or CVI clinical internship.

Computed Tomography Courses

RSCT:4100 Sectional Anatomy for Imaging Sciences 3 s.h.

Sectional anatomy identifiable on computed tomography and magnetic resonance imaging, including transverse, coronal, and sagittal planes. Prerequisites: ACB:3110 or HHP:1100 or HHP:1150 or HHP:3105 or HHP:3115.

RSCT:4105 Computed Tomography Clinical Internship I 2 s.h.

Clinical internship scheduled at University of Iowa Hospitals & Clinics; rotation through CT scanners, 3-D lab, and radiation therapy departments; competency and objective-based education with required clinical performance evaluations; clinical coordinator facilitates schedules, rotations, learning objectives, evaluations, and competencies; experience facilitated by CT technologists, radiologists, residents, and coordinator; participation in routine and advanced CT scans; performance expectations become progressively higher as student gains experience and skills. Requirements: acceptance to B.S. radiation sciences RT/CT track.

RSCT:4110 CT/MRI Pathology 3 s.h.

Common pathological conditions found in CT and MRI images; protocol appearance variations; units of CNS, musculoskeletal, neck/thorax, and abdominopelvic pathology; textbook readings, in-class discussions, special projects including case studies and presentations. Requirements: concurrent enrollment in RSCT:4100, if not taken as a prerequisite, or at least 3 months fulltime CT/MRI clinical experience.

RSCT:4115 Computed Tomography Clinical Internship II 4 s.h.

CT scanners, 3-D lab, and radiation therapy department rotation at University of Iowa Hospitals & Clinics; competency and objective-based education with required clinical performance evaluations; clinical coordinator facilitates schedule, rotations, learning objectives, evaluations, and competencies; experience facilitated by CT technologists, radiologists, residents, and coordinator; participation in routine and advanced CT scans; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSCT:4105.

RSCT:4120 Computed Tomography Procedures I 3 s.h.

Computed tomography procedures of the head, neck, thorax, mediastinum, abdomen, and pelvis; positioning techniques, patient preparation, monitoring and care, indications and contraindications for procedures; contrast media usage; basic protocol information with adjustments to tailor procedures for patient's indications; brief units on patient care relevant to CT; CT parameters and equipment. Corequisites: RSCT:4100. Requirements: acceptance to B.S. radiation sciences RT/CT track or ARRT primary certification in radiologic technology, nuclear medicine, or radiation therapy.

RSCT:4125 Computed Tomography Procedures II 3 s.h.

Imaging information in musculoskeletal exams, 3-D reconstruction, CTAs; cardiac, including gating, biopsies, drains, post-myelography, radiation therapy planning, and 4-D imaging; CT arthrography, PET/CT, SPECT/CT, virtual colonoscopy; procedure indications and contraindications, patient and room preparation, positioning techniques, contrast media usage, and scan parameters; basic protocol information and how to tailor procedures to a patient's indications. Prerequisites: RSCT:4120. Corequisites: RSCI:4110, if not taken as a prerequisite.

RSCT:4130 Computed Tomography Physical Principles and QC 4 s.h.

Physical principles and instrumentation; historical development and evolution of CT; characteristics of radiation, beam attenuation, linear attenuation coefficients, tissue characteristics, Hounsfield numbers, data acquisition, image manipulation techniques, tube configuration, collimation design and function, detectors, image quality factors, functions of CT computer and array processor; image processing and display examined from data acquisition through postprocessing and archiving; radiation protection practices and QC. Requirements: acceptance to B.S. radiation sciences RT/CT degree track or ARRT primary certification in radiologic technology, nuclear medicine, or radiation therapy.

RSCT:4215 Computed Tomography Clinical Internship III 4 s.h.

CT scanners, 3-D lab, and radiation therapy department rotation at University of Iowa Hospitals & Clinics; competency and objective-based education with required clinical performance evaluations; clinical coordinator facilitates schedule, rotations, learning objectives, evaluations, and competencies; experience facilitated by CT technologists, radiologists, residents, and coordinator; participation in routine and advanced CT scans; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSCT:4115.

Diagnostic Medical Sonography Courses**RSMS:3100 Cardiac Sonography I** 3 s.h.

Anatomy and physiology of cardiovascular system imaged sonographically; proper sonographic imaging techniques, normal anatomy, exam protocol, and proper instrument settings; pathology and pathophysiology of common conditions related to adult cardiovascular system. Prerequisites: RSMS:3110 with a minimum grade of C.

RSMS:3101 Cardiac Sonography I Lab 1 s.h.

Laboratory-based learning and simulation experience involving basic sonographic adult cardiac imaging and clinical history analysis; students will perform sonographic exams utilizing scanning simulation to develop skills in sonographic anatomy recognition, scan plane orientation, transducer manipulation, instrumentation, and exam protocols. Prerequisites: RSMS:3111 with a minimum grade of C. Corequisites: RSMS:3100.

RSMS:3110 Foundations of Sonography 3 s.h.

Sonography history, ergonomics, terminology, image orientation; basic theories of sound waves, echo production, transducers, equipment operation, body imaging, Doppler, hemodynamics.

RSMS:3111 Foundations of Sonography Lab 1 s.h.

Sonography history, ergonomics, terminology, image orientation; basic theories of sound waves, echo production, transducers, equipment operation, body imaging, Doppler, and hemodynamics. Corequisites: RSMS:3110.

RSMS:3115 Diagnostic Medical Sonography Clinical Internship I 2 s.h.

Introductory clinical experience in healthcare setting developing a basic understanding of sonography clinical environment and professional practice standards; applying patient care techniques and developing professional communication skills. Prerequisites: RSP:2120.

RSMS:3120 Abdominal Sonography I 3 s.h.

Embryology, anatomy, and physiology of various abdominal structures imaged sonographically; abdominal vasculature, hepatobiliary system, pancreas, urinary system, adrenals, spleen, male anatomy; proper sonographic imaging techniques, including appearance of normal anatomy, imaging protocol, proper instrument settings. Prerequisites: RSMS:3110 with a minimum grade of C.

RSMS:3121 Abdominal Sonography I Lab 1 s.h.

Laboratory-based learning and simulation experience in sonographic abdominal imaging; students will perform exams utilizing scanning simulation to develop skills in sonographic anatomy recognition, scan plane orientation, transducer manipulation, instrumentation, and exam protocols. Prerequisites: RSMS:3111 with a minimum grade of C. Corequisites: RSMS:3120.

RSMS:3130 Obstetrical and Gynecological Sonography I 3 s.h.

Embryology, anatomy, and physiology of the female reproductive system and developing fetus; proper sonographic imaging techniques, including appearance of normal anatomy, imaging protocol, proper instrument settings. Prerequisites: RSMS:3110 with a minimum grade of C.

- RSMS:3131 Obstetrical and Gynecological Sonography I Lab** 1 s.h.
Laboratory-based learning and simulation experience involving basic sonographic obstetrical and gynecological imaging and clinical history analysis; students will perform sonographic exams utilizing scanning simulation to develop skills in sonographic anatomy recognition, scan plan orientation, transducer manipulation, instrumentation, and exam protocols. Prerequisites: RSMS:3111 with a minimum grade of C. Corequisites: RSMS:3130.
- RSMS:3140 Vascular Sonography I** 3 s.h.
Anatomy and physiology of peripheral and cerebral vascular systems; analysis of hemodynamics, Doppler waveforms, pressure measurements, plethysmography, sonographic appearance, scanning techniques; evaluation of pathology and pathophysiology common to the lower extremity arterial and venous systems, and cerebrovascular system. Prerequisites: RSMS:3110 with a minimum grade of C.
- RSMS:3141 Vascular Sonography I Lab** 1 s.h.
Laboratory-based learning and simulation experience involving basic vascular sonographic imaging and clinical history analysis; students will perform non-imaging vascular physiologic tests and sonographic exams utilizing scanning simulation to develop skills in sonographic anatomy recognition, scan plane orientation, transducer manipulation, instrumentation, and exam protocols. Prerequisites: RSMS:3111 with a minimum grade of C. Corequisites: RSMS:3140.
- RSMS:3150 Cardiac Physiology and Hemodynamics** 3 s.h.
Analysis of cardiac physiology and hemodynamics related to sonography; correlation with Doppler application in cardiovascular imaging, ECG, auscultation, cardiac catheterization; advanced and developing imaging techniques.
- RSMS:3205 Cardiac Sonography II** 3 s.h.
Sonographic evaluation of advanced pathophysiology of human heart; sonographic appearance, imaging techniques, and exam modification. Prerequisites: RSMS:3100.
- RSMS:3206 Cardiac Sonography II Lab** 1 s.h.
Laboratory-based learning and simulation experience involving the application of advanced sonographic cardiac imaging and clinical history analysis. Prerequisites: RSMS:3101. Corequisites: RSMS:3205.
- RSMS:3215 Diagnostic Medical Sonography Clinical Internship II** 3 s.h.
Application of the basic skills of sonographic imaging and physiologic vascular testing in the healthcare setting.
- RSMS:3230 Sonography Principles, Physics, and Instrumentation** 3 s.h.
Physical principles of sound waves, their applications to imaging of the human body, operation and physical characteristics of various ultrasound transducers, method by which the sound wave is converted into a visual image, instrumentation components and their functions, Doppler principles, image artifacts, advanced hemodynamics, and spectral Doppler waveform analysis. Prerequisites: RSMS:3110.
- RSMS:3231 Sonography Principles, Physics, and Instrumentation Lab** 1 s.h.
Laboratory-based learning and simulation experience in the application of sonographic imaging emphasizing physics principles, instrumentation, and quality assurance testing. Corequisites: RSMS:3230.
- RSMS:3240 Abdominal Sonography II** 3 s.h.
Pathology and pathophysiology of abdominal and superficial structures imaged sonographically; interventional sonographic procedures; post-procedure protocol; associated clinical and laboratory findings; imaging techniques, analysis of findings, and documentation of pathology. Prerequisites: RSMS:3120.
- RSMS:3250 Obstetrical and Gynecological Sonography II** 3 s.h.
Sonographically related pathological and abnormal congenital conditions of gynecology and obstetrics, infertility, assisted reproductive therapy, invasive procedures in obstetrics and gynecology, postpartum complications and maternal-fetal bonding; clinical findings, laboratory studies, and prognosis correlated with sonographic findings; appropriate image analysis and documentation of pathology. Prerequisites: RSMS:3130.
- RSMS:3260 Breast Sonography** 2 s.h.
Embryology, anatomy, physiology, and pathophysiology of the breast as it relates to sonographic imaging; proper sonographic imaging techniques, including appearance of normal anatomy, imaging protocol, proper instrument settings; sonographic findings of diseases involving the breast.
- RSMS:3270 Vascular Sonography II** 3 s.h.
Pathology and pathophysiology of complex diseases of the peripheral, cerebral, and abdominal vascular systems evaluated sonographically; associated clinical findings; techniques in physiologic, nonimaging tests, and duplex sonography; analysis of findings and documentation of pathology. Prerequisites: RSMS:3140.
- RSMS:3300 Pediatric Sonography** 3 s.h.
Anatomy, sonographic anatomy, pathophysiology, sonographic appearance and Doppler correlation of disorders affecting the pediatric population, including abdominal, musculoskeletal, peripheral vascular, and cerebrovascular systems, neonatal brain and spinal cord.
- RSMS:3305 Pediatric Cardiac Sonography** 3 s.h.
Anatomy, sonographic anatomy, pathophysiology, sonographic appearance, and Doppler correlation of disorders affecting the pediatric cardiac population; associated clinical findings; techniques in sonographic imaging, analysis of findings, and documentation of pathology. Requirements: completion of or current enrollment in a diagnostic medical sonography program.
- RSMS:3306 Pediatric Cardiac Sonography Laboratory** 1 s.h.
Laboratory-based learning and simulation experience involving basic sonographic pediatric cardiac imaging and clinical history analysis; students perform sonographic exams utilizing scanning simulation to develop skills in sonographic anatomy recognition, scan plane orientation, transducer manipulation, instrumentation, and exam protocols. Corequisites: RSMS:3305. Recommendations: completion of or current enrollment in a diagnostic medical sonography program.
- RSMS:3315 Diagnostic Medical Sonography Clinical Internship III** 4 s.h.
Application of the skills of sonographic imaging and physiologic vascular testing in the healthcare setting; students develop competency in basic exams.

RSMS:3325 Abdominal Sonography II Lab 1 s.h.

Laboratory-based learning and simulation utilizing computer-aided learning and scanning simulation to develop skills in interventional sonographic procedures with real-time ultrasound guidance; advanced abdominal and superficial structure imaging; exploring case studies; image analysis in identifying pathologies and differential diagnoses. Prerequisites: RSMS:3121.

RSMS:3376 Vascular Sonography II Lab 1 s.h.

Laboratory-based learning and simulation experience to develop skills in advanced sonographic imaging of the vascular system and performance of advanced nonimaging vascular physiologic tests; analysis of findings and documentation of pathology. Prerequisites: RSMS:3141.

RSMS:4110 Advanced Sonography 3 s.h.

Exploration of advanced sonographic imaging techniques and new technologies. Prerequisites: (RSMS:3240 with a minimum grade of C and RSMS:3250 with a minimum grade of C and RSMS:3270 with a minimum grade of C) or (RSMS:3205 with a minimum grade of C and RSMS:3270 with a minimum grade of C).

RSMS:4111 Advanced Sonography Lab 1 s.h.

Laboratory-based learning and simulated application of advanced sonographic imaging techniques and new technologies. Prerequisites: (RSMS:3325 with a minimum grade of C and RSMS:3376 with a minimum grade of C) or (RSMS:3206 with a minimum grade of C and RSMS:3376 with a minimum grade of C). Corequisites: RSMS:4110.

RSMS:4115 Diagnostic Medical Sonography Clinical Internship IV 5 s.h.

Application of the skills of sonographic imaging and physiologic vascular testing in the health care setting; students develop competency in high level procedures. Prerequisites: RSMS:3315 with a minimum grade of C and RSMS:3376 with a minimum grade of C.

RSMS:4120 Advanced Cardiac Sonography 3 s.h.

Study of advanced cardiac sonographic imaging techniques, quantifications, and new technologies; analysis of applications and limitations of imaging techniques. Prerequisites: RSMS:3205 with a minimum grade of C and RSMS:3270 with a minimum grade of C.

RSMS:4121 Advanced Cardiac Sonography Lab 1 s.h.

Laboratory-based learning and simulated application of advanced cardiac sonographic imaging techniques, quantifications, and new technologies. Prerequisites: RSMS:3206 with a minimum grade of C. Corequisites: RSMS:4120.

RSMS:4215 Diagnostic Medical Sonography Clinical Internship V 5 s.h.

Application of the skills of sonographic imaging and physiologic vascular testing in the health care setting; students develop advanced skills. Prerequisites: RSMS:4115 with a minimum grade of C and RSMS:4110 with a minimum grade of C and RSMS:4111 with a minimum grade of C.

RSMS:4220 Multidisciplinary Capstone Seminar 3 s.h.

Case-based learning course; students are expected to analyze and synthesize data, determine the proper course of action, evaluate outcomes; this course will complete the student's preparation for the professional work environment. Prerequisites: RSMS:4110.

Magnetic Resonance Imaging Courses

RSMR:4110 Fundamentals for the MRI Technologist 3 s.h.

Caregiving skills specific to patients undergoing MRI examinations, including techniques in effectively communicating for safety and comfort; maintaining patient and personnel safety; patient preparation, monitoring, and venipuncture; technologist's role in a wide variety of MRI examinations and patient conditions. Requirements: acceptance to B.S. radiation sciences RT/MRI track or ARRT primary certification in radiologic technology, nuclear medicine, sonography, or radiation therapy.

RSMR:4120 MRI Procedures I 4 s.h.

Imaging techniques related to central nervous and musculoskeletal systems; specific clinical applications; available coils and their use; considerations in imaging parameters; specific choices in protocols and positioning criteria; anatomical structures and the plane that best demonstrates anatomy; signal characteristics of normal and abnormal structures. Prerequisites: RSCT:4100 and RSMR:4110. Requirements: concurrent registration in RSMR:4110, if not taken as a prerequisite; or three months MRI experience.

RSMR:4130 MRI Procedures II 3 s.h.

MRI techniques related to neck, thorax, breast, abdomen, and pelvis; specific clinical applications; available coils and their use; considerations in imaging parameters; specific choices in protocols and positioning criteria. Prerequisites: RSMR:4120.

RSMR:4140 MRI Acquisition and Principles I 3 s.h.

Physics and hardware used in obtaining a magnetic resonance signal, including magnetism, NMR signal production, tissue characteristics, spatial localization, pulse sequencing, imaging parameters and options, and special applications; exploration of skills useful in maximizing MR image quality. Prerequisites: RSMR:4110. Requirements: concurrent registration in RSMR:4110, if not taken as a prerequisite; or three months MRI experience.

RSMR:4150 MRI Acquisition and Principles II 3 s.h.

Advanced MRI techniques; MR angiography and further investigation of fast image acquisition sequences; overview of MR magnets, installation, operation, and facility design; computers and digital image acquisition as they apply to MR; outline of quality assurance procedures. Prerequisites: RSMR:4140.

RSMR:4160 MRI Clinical Internship I 2 s.h.

MRI clinical internship scheduled at University of Iowa Hospitals & Clinics; rotation through each MRI department scanning room; competency and objective-based education with required clinical performance evaluations; clinical preceptor facilitates schedules, rotations, learning objectives, evaluations, and competencies; experience facilitated by MRI technologists, radiologists, residents, and preceptor; participation in routine and advanced MRI scans; performance expectations become progressively higher as student gains experience and skills. Prerequisites: RSMR:4110. Corequisites: RSMR:4120 and RSMR:4140, if not taken as prerequisites. Requirements: acceptance to B.S. radiation sciences RT/MRI track.

RSMR:4170 MRI Clinical Internship II 4 s.h.

MRI clinical internship scheduled at University of Iowa Hospitals & Clinics; rotation through each MRI department scanning room; competency and objective-based education with required clinical performance evaluations; clinical preceptor facilitates schedules, rotations, learning objectives, evaluations, and competencies; experience facilitated by MRI technologists, radiologists, residents, and preceptor; participation in routine and advanced MRI scans; performance expectations become progressively higher as student gains experience and skills. Prerequisites: RSMR:4160. Corequisites: RSMR:4140, if not taken as a prerequisite. Requirements: acceptance to B.S. radiation sciences RT/MRI track.

RSMR:4175 MRI Clinical Internship III 4 s.h.

Rotation through MRI department scanning rooms at University of Iowa Hospitals & Clinics; competency and objective-based education with required clinical performance evaluations; clinical preceptor facilitates schedules, rotations, learning objectives, evaluations, and competencies; experience facilitated by MRI technologists, radiologists, residents, and preceptor; participation in routine and advanced MRI scans; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSMR:4170.

Radiation Sciences Courses

RSP:1100 Introduction to the Radiation Sciences 1 s.h.

Exploration of radiation sciences field (radiologic technology, nuclear medicine and PET, diagnostic medical sonography, radiation therapy, computed tomography, magnetic resonance imaging, cardiovascular interventional); introduction to basic principles and modalities associated with the field in preparation for application to radiation sciences or nuclear medicine technology major.

RSP:2110 Pathology for Radiation Sciences 2 s.h.

General pathologic processes; introduction to imaging modalities; pathological terms that describe the body's response to stress and disease; how the body responds to and forms pathological diseases (e.g., infectious and parasitic diseases, inflammation and repair, immunopathology, neoplasia, genetic disorders, dietary deficiencies and excesses, hemodynamic disorders, trauma and emergencies). Requirements: acceptance to radiation science degree track.

RSP:2120 Patient Care for the Radiation Sciences 3 s.h.

Foundation for providing care to clients during radiographic examinations; taking medical histories, basic life support, medical emergencies, vital sign assessment, body mechanics, infection control, sterile techniques, intravenous equipment, administration; advance concepts in client assessment and monitoring, including evaluation and monitoring of clients in pain, and clients in acute and chronic states of illness; communication techniques, role playing. Requirements: acceptance to radiation science degree track.

RSP:3130 Radiation Safety and Radiobiology 2 s.h.

Instruction on safe operation of radiation producing equipment and handling of radioactive materials; origin and/or derivation of certain formulae and techniques useful in radiation protection programs; regulatory agencies, regulations, and regulatory guides pertinent to student's field; emphasis on applied aspects of radiation protection; characteristics and biological effects of ionizing radiations, properties and uses of radioisotopes, medical applications, and biological basis for protection procedures. Requirements: enrollment in radiation sciences or nuclear medicine technology program. Same as FRRB:3130.

RSP:3210 Medical Ethics and Law 2 s.h.

Introduction to ethical reasoning and problem solving; integration of knowledge about patient care and ethical/legal issues which occur in process of providing care; ethical principles of autonomy, beneficence, justice, nonmaleficence, paternalism, Patient's Bill of Rights, resolving moral dilemmas; legal principles of malpractice, intentional torts, negligence. Requirements: radiation science or nuclear medicine technology major.

RSP:3220 Radiation Sciences Quality Management and Health Care Administration 2 s.h.

Introduction to health care administration; quality management, safety, and patient satisfaction concepts for the radiation sciences professional. Requirements: radiation sciences or nuclear medicine technology major.

RSP:4110 Research Methodology for Radiation Sciences 3 s.h.

Introduction to research concepts and methods for the radiation science professional. Requirements: radiation sciences or nuclear medicine technology major.

Radiation Therapy Courses

RSTH:3100 Introduction to Radiation Therapy 3 s.h.

Introduction to cancer as a disease; defining methods to treat cancer with emphasis on radiation therapy; simulation, planning, and treatment delivery of radiation therapy. Requirements: acceptance to radiation sciences therapy program.

RSTH:3110 Medical Physics I 1-3 s.h.

Introduction to radiation used in clinical setting; fundamental physical units, measurements, principles, atomic structure and types of radiation; X-ray generating equipment, X-ray production, and its interaction with matter. Requirements: admission to free radical and radiation biology program or acceptance to radiation sciences therapy program, and maxillofacial or radiation oncology resident. Same as FRRB:3110.

RSTH:3120 Radiation Therapy Clinical Internship I 3 s.h.

Student rotations through different radiation therapy related areas; assist, practice, and test radiation therapy principles learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Requirements: acceptance to radiation sciences therapy program.

RSTH:3205 Principles of Radiation Therapy I 3 s.h.

Didactic and laboratory work in principles of radiation therapy; historic and current aspects of cancer treatment; role of radiation therapist; patient care, treatment delivery accessories, tumor localization treatment delivery protocols. Prerequisites: RSTH:3100. Requirements: enrollment in radiation sciences therapy program.

RSTH:3215 Medical Physics II 0-3 s.h.

Treatment units used in external radiation therapy; beam calculations, isodose distributions, brachytherapy, quality assurance and quality management, protection and safety. Prerequisites: RSTH:3110. Requirements: admission to free radical and radiation biology program or acceptance to radiation sciences therapy program. Same as FRRB:3215.

RSTH:3225 Radiation Therapy Clinical Internship II 3 s.h.

Student rotations through different radiation therapy related areas; assist, practice, and test radiation therapy principles learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSTH:3120. Requirements: acceptance to radiation sciences therapy program.

RSTH:3325 Radiation Therapy Clinical Internship III 4 s.h.

Student rotations through different radiation therapy related areas; assist, practice, and test radiation therapy principles learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSTH:3225. Requirements: acceptance to radiation sciences therapy program.

RSTH:4105 Principles of Radiation Therapy II 2 s.h.

Evaluation and management of neoplastic disease using knowledge in arts and sciences; critical thinking and basis of ethical clinical decision making; epidemiology, etiology, detection, diagnosis, patient condition, treatment and prognosis of neoplastic disease. Prerequisites: RSTH:3205. Requirements: enrollment in radiation sciences therapy program.

RSTH:4125 Radiation Therapy Clinical Internship IV 4 s.h.

Student rotations through different radiation therapy related areas; assist, practice, and test radiation therapy principles learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSTH:3325. Requirements: acceptance to radiation sciences therapy program.

RSTH:4225 Radiation Therapy Clinical Internship V 5 s.h.

Student rotations through different radiation therapy related areas; assist, practice, and test radiation therapy principles learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSTH:4125. Requirements: acceptance to radiation sciences therapy program.

RSTH:4230 Radiation Therapy Capstone 3 s.h.

Professional development; review of concepts. Requirements: acceptance to radiation sciences therapy program.

Radiologic Technology Courses**RSRT:2110 Radiographic Procedures and Analysis I** 4 s.h.

Introduction to radiographic positioning principles; technical, positioning, and analysis information needed to perform and evaluate images of chest and abdomen on adult and pediatric patients; emphasis on quality patient care and adaptation to a variety of client conditions; labs. Requirements: acceptance to radiation sciences RT/CT, CVI, or MRI degree track.

RSRT:2120 Radiologic Technology Clinical Internship I 1 s.h.

Student rotations through different radiography-related areas of University of Iowa Hospitals & Clinics; assist, practice, and test radiographic examinations learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Requirements: acceptance to radiation sciences RT/CT, CVI, or MRI degree track.

RSRT:2225 Radiologic Technology Clinical Internship II 4 s.h.

Student rotation through different radiography-related areas of University of Iowa Hospitals & Clinics; assist, practice, and test radiographic examinations learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSRT:2120.

RSRT:2230 Radiographic Procedures II 3 s.h.

Technical and radiographic positioning information needed to perform images of upper and lower extremity; emphasis on quality patient care and adaptation to a variety of client conditions. Prerequisites: RSRT:2110.

RSRT:2240 Radiographic Analysis II 3 s.h.

Radiographic procedure and image analysis information needed to evaluate images of upper and lower extremity and shoulder; emphasis on quality patient care and adaptation to a variety of client conditions; labs. Prerequisites: RSRT:2110.

RSRT:2250 Radiographic Fluoroscopic Procedures 2 2 s.h.

Technical, radiographic positioning, and analysis information needed to perform radiographic procedures that utilize fluoroscopy; emphasis on quality patient care and adaptation to a variety of client conditions. Prerequisites: RSRT:2110.

RSRT:2325 Radiologic Technology Clinical Internship III 3 s.h.

Student rotation through different radiography-related areas of University of Iowa Hospitals & Clinics; assist, practice, and test radiographic examinations learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSRT:2225.

RSRT:3115 Radiographic Procedures and Analysis III 4 s.h.

Technical, positioning, and analysis information needed to perform and evaluate images of hip, pelvis, spine, thorax, skull, and GU system radiographic procedures; emphasis on quality patient care and adaptation to a variety of client conditions; labs.

RSRT:3125 Radiologic Technology Clinical Internship IV 4 s.h.

Student rotation through different radiography-related areas of University of Iowa Hospitals & Clinics; assist, practice, and test radiographic examinations learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSRT:2325.

RSRT:3140 Radiographic and Digital Imaging 5 s.h.

Factors that govern and influence production of radiographic image; X-ray and scatter production; patient interactions; function of kVp, mAs, and distance as applied to contrast and spatial resolution; practical issues concerning automatic exposure control and grid usage; labs to practice and apply theoretical principles associated with production of quality images. Requirements: acceptance to radiation sciences RT/CT, CVI or MRI degree track.

RSRT:3220 Emotional Intelligence for the Health Care Professional 2 s.h.

Introduction to emotional intelligence; scientific background for why emotional intelligence exists and exploring its applications to the health care setting; connection of emotional intelligence to interactions that occur between health care professional and their patients, patient families, and coworkers.

RSRT:3225 Radiologic Technology Clinical Internship V 3 s.h.

Student rotation through different radiography-related areas of University of Iowa Hospitals & Clinics; assist, practice, and test radiographic examinations learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSRT:3125.

RSRT:3230 Radiographic Physics and Imaging Equipment 4 s.h.

Characteristics of atomic structure, electricity, and X-ray machines; properties of X-rays and their interaction with matter; measurement of radiation exposure; construction principles and theories of operation of specialized imaging equipment, including fundamentals of acquisition for imaging intensification, geometric tomography, mobile/portable radiography, and magnification principles.

RSRT:3325 Radiologic Technology Clinical Internship VI 2 s.h.

Student rotation through different radiography-related areas of University of Iowa Hospitals & Clinics; assist, practice, and test radiographic examinations learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSRT:3225.

RSRT:4125 Radiologic Technology Clinical Internship VII 1 s.h.

Student rotation through different radiography-related areas of University of Iowa Hospitals & Clinics; assist, practice, and test radiographic examinations learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSRT:3325.

RSRT:4225 Radiologic Technology Clinical Internship VIII 1 s.h.

Student rotation through different radiography-related areas of University of Iowa Hospitals & Clinics; assist, practice, and test radiographic examinations learned in didactic setting; skill building for care and management of patients; conduction of performance assessments and completion of guideline objectives for each rotation; performance expectations become progressively higher as students gain experience and skills. Prerequisites: RSRT:4125.

Radiation Sciences, B.S.

The Radiation Sciences Program offers two paths toward completing the major:

- an on-campus program in radiologic technology, diagnostic medical sonography, or radiation therapy for students who have not completed a radiation sciences modality; or
- an online program for registered radiologic technologists and nuclear medicine technologists who would like to earn a Bachelor of Science degree by distance education.

Undergraduate study in radiation sciences is guided by the academic rules and procedures outlined under Undergraduate Rules and Procedures [p. 1659] in the Carver College of Medicine section of the Catalog.

Requirements

The Bachelor of Science with a major in radiation sciences requires a minimum of 120 s.h. Work for the on-campus degree includes a set of courses that are prerequisite to entering the radiation sciences major, completion of one of seven radiation sciences professional programs, and elective coursework sufficient to complete the minimum of 120 s.h. required for graduation. Students must complete the radiation sciences professional program at the University of Iowa. Registered radiologic technologists interested in earning the degree by distance education should see RT to B.S. (Online) [p. 1788] in this section of the Catalog.

Admission to the radiation sciences major is competitive and selective; acceptance into a professional program or the major is not guaranteed. Students who wish to enter the major must first be admitted to the University of Iowa as College of Liberal Arts and Sciences (CLAS) students with a radiation sciences interest. As CLAS students, they must apply to the radiation sciences professional program of their choice by January 15 of the year in which they wish to enter; see Apply on the Radiation Sciences Program website. Transfer students are encouraged to apply in early December to allow for time for transfer course articulation. Accepted students enter a professional program, the radiation sciences major, and the Carver College of Medicine the following fall semester.

Applicants for admission to the University of Iowa whose first language is not English are strongly encouraged to complete the University of Iowa English Proficiency Evaluation and satisfy the University's English Proficiency Requirements before they apply to a professional program. Students must have permission to register for a full academic load before they may be admitted to a radiation sciences professional program.

The radiation sciences major requires students to complete a minimum of two years of a high school world language prior to admission.

For additional information on UI admission requirements, contact the University's Office of Admissions.

First-year and transfer applicants admitted to the College of Liberal Arts and Sciences as radiation sciences interest students must complete all courses that are prerequisite to the radiation sciences major (including approved transfer equivalents) by June 1 before they may begin one of the radiation sciences professional programs and enter the major. The only exception to this deadline is that the physics course required for the diagnostic medical sonography program may

be completed in the summer session. Prerequisite courses vary slightly depending on which professional program a student wishes to enter.

Students who have declared a radiation sciences interest but have not yet applied and been accepted to a professional program are advised at the University's Academic Advising Center. After they have been accepted to a professional program, they are advised by the Radiation Sciences Program.

Upon successful completion of the professional program, students are eligible to apply for national certification exams for their program's specialty area(s). Once they have completed the professional program and all other requirements for graduation, they are granted a Bachelor of Science degree.

The Bachelor of Science with a major in radiation sciences requires the following work.

Prerequisites to the Radiation Sciences Major

Students must complete the following prerequisite courses (25-33 s.h.) before they may enter the program and the major. Students who wish to enter the radiation therapy professional program must complete a total of 60 s.h. of college coursework, including the following prerequisites, before they may enter the program and the major. Students are advised for success, based on academic strength, not necessarily for a four-year plan. Prerequisite courses for the radiologic technology and diagnostic medical sonography professional programs may take more than one year to complete. Prerequisite courses for the radiation therapy professional program may take more than two years to complete.

Rhetoric

Diversity and Inclusion		
Historical Perspectives		
International and Global Issues		
Literary, Visual, and Performing Arts		
Values and Culture		

See GE CLAS Core [p. 20] (College of Liberal Arts and Sciences) in the Catalog for approved courses in the culture, society, and the arts areas listed above.

Recommended Pre-Major Work

The Radiation Sciences Program recommends that before students submit an application to a radiation sciences professional program and the major, they job-shadow a professional who works in their area of interest, gain hands-on patient care experience, and complete the following additional preparatory courses.

Code	Title	Hours
These courses:		
RSP:1100	Introduction to the Radiation Sciences	1
BIOL:1140	Human Biology	4
One of these:		
CHEM:1070	General Chemistry I	3
CHEM:1110	Principles of Chemistry I	4
One of these:		
PHYS:1400	Basic Physics	3-4
PHYS:1511	College Physics I	4

BAIS:1500	Business Computing Essentials	2
CS:1020	Principles of Computing	3
One of these:		
STAT:1020	Elementary Statistics and Inference	3
STAT:3510	Biostatistics	3
STAT:4143	Introduction to Statistical Methods	3

Electives

In order to earn the minimum of 120 s.h. required for graduation, students may need to complete elective coursework in addition to the prerequisite coursework listed above and one of the professional programs in medical imaging. They should plan their elective courses in consultation with their advisor.

Radiation Sciences Professional Programs

Students must complete one of the following on-campus radiation sciences professional programs at University of Iowa Hospitals & Clinics:

- radiologic technology and breast imaging [p. 1783];
- radiologic technology and cardiovascular interventional [p. 1783];
- radiologic technology and computed tomography [p. 1783];
- radiologic technology and magnetic resonance imaging [p. 1783];
- diagnostic medical sonography and cardiac/vascular [p. 1781];
- diagnostic medical sonography and general/vascular [p. 1781]; or
- radiation therapy [p. 1786].

Each program offers modality-specific didactic and supervised clinical education courses. Graduates of the professional programs and associated internships are eligible to apply for one or more certification exams.

The radiologic technology programs and diagnostic medical sonography programs last three years, and the radiation therapy program lasts two years. Each program begins in the fall.

Students must apply to the program of their choice by January 15 of the year in which they intend to enter the program. Students must first apply to the College of Liberal Arts and Sciences (CLAS) as a radiation sciences interest major and complete all prerequisite coursework. Students with transfer credit are encouraged to apply to CLAS by early December to allow time for transcript course articulation.

Admission to all radiation sciences professional programs is competitive; each program accepts a limited number of students and acceptance is not guaranteed. In addition to the prerequisite courses listed above, students must have earned a cumulative college g.p.a. of at least 2.50 prior to professional program admission.

Diagnostic Medical Sonography

A diagnostic medical sonographer is a skilled professional who uses high-frequency sound wave equipment to

create diagnostic images and data that assist health care professionals in their diagnosis of patients with disease. Ultrasound imaging is used on many parts of the body, including the abdomen, heart, blood vessels, and the developing fetus of a pregnant woman. When determining normal and abnormal findings, the sonographer must demonstrate sectional anatomy through transducer manipulation. The sonographer uses independent judgment in recognizing the need to extend the scope of the study according to the diagnostic findings. The sonographer spends extended time with the patient obtaining a thorough history of symptoms, explaining the exam, answering questions, and performing the exam.

Each of the radiation sciences diagnostic medical sonography (DMS) degree tracks consist of two professional programs —DMS and cardiac and vascular sonography or DMS and general and vascular sonography. Each of these three-year programs is selective and competitive; acceptance is not guaranteed. Students must satisfy all UI admission requirements, complete all prerequisites, and be accepted into the diagnostic medical sonography professional program following an application and selection process; see Diagnostic Medical Sonography on the Radiation Sciences Program website.

Diagnostic Medical Sonography and Cardiac and Vascular Sonography

The diagnostic medical sonography program in cardiac and vascular sonography provides a multispecialty education in cardiac (echocardiography) and vascular sonography (ultrasound imaging). Students learn about sonographic imaging and evaluation, hemodynamics and Doppler evaluation, sonography equipment, sectional anatomy, pathology, patient care, medical ethics, and quality assurance methods. They become proficient in using sonographic imaging equipment and in performing cardiac and vascular sonographic procedures, including invasive procedures, emergency exams, and 3-D imaging. They also participate in supervised clinical education. Elective courses are available in pediatric cardiac sonography.

Upon completing the program, graduates are eligible to apply for the national certification exams in diagnostic medical sonography in the specialty areas of cardiac (echocardiography) and vascular technology.

Students who have completed all prerequisite courses by June 1 (except physics, which may be completed in the summer session) are eligible to apply to this three-year program. Application deadline is January 15. Six students are accepted into this track each year, which begins in the fall.

Diagnostic Medical Sonography and General and Vascular Sonography

The diagnostic medical sonography program in general and vascular sonography provides a multispecialty education in obstetrical, abdominal, and vascular sonography (ultrasound imaging). Students learn about sonographic imaging and evaluation, hemodynamics and Doppler evaluation, sonography equipment, sectional anatomy, pathology, patient care, medical ethics, and quality assurance methods. They become proficient in using sonographic imaging equipment and in performing obstetrical and gynecological, abdominal, and vascular sonographic procedures, including invasive procedures, emergency exams, and 3-D imaging. They also participate in supervised clinical education. Elective courses are available in pediatric and breast sonography.

Upon completing the program, graduates are eligible to apply for the national certification exams in diagnostic medical sonography in the specialty areas of obstetrics and gynecology, abdomen, and vascular technology.

Students who will have completed all prerequisite courses by June 1 (except physics, which may be completed in the summer session) are eligible to apply to this three-year program. Application deadline is January 15. Nine students are accepted into this track each year, which begins in the fall.

Radiologic Technology

A radiologic technologist is a professional, qualified by education and clinical experience, who provides radiological (x-ray) services using a variety of exams and procedures. While utilizing excellent patient care skills, the technologist operates radiological equipment so that optimum radiographic quality is achieved with the minimum radiation exposure to the patient. Radiographers are employed primarily in hospitals, clinics, and doctors' offices, where they work closely with other members of the health care team to help diagnose and treat patients.

Each of the radiation sciences radiologic technology (RT) degree tracks consist of four professional programs—RT and breast imaging (BI), RT and cardiovascular interventional (CVI), RT and computed tomography (CT), or RT and magnetic resonance imaging (MRI). Each of these three-year programs is selective and competitive; acceptance is not guaranteed. Students must satisfy all UI admission requirements, complete all prerequisites, and be accepted into the radiologic technology professional program following an application and selection process; see Radiologic Technology on the Radiation Sciences Program website.

Radiologic Technology and Breast Imaging

The radiologic technology component of this program provides education in pathology, radiation biology, radiation protection, patient care, and ethics. Students learn about radiographic procedures, imaging, and evaluation. They become acquainted with imaging equipment, study quality assurance, and participate in supervised clinical education in radiography and breast imaging (BI). The breast imaging component offers intensive study and practice in BI, including patient care procedures, pathology, anatomy, imaging procedures and analysis, mammography quality standards act (MQSA) quality control, and image acquisition principles.

Upon completion of the program, graduates are eligible to apply for the national certification exams in radiography and mammography.

Students typically apply to this three-year program during their first year and begin in the fall of their sophomore year. Application deadline is January 15. Two student are accepted into this track each year.

Radiologic Technology and Cardiovascular Interventional

The radiologic technology component of this program provides education in pathology, radiation biology, radiation protection, patient care, and ethics. Students learn about radiographic procedures, imaging, and evaluation. They become acquainted with imaging equipment, study quality assurance, and participate in supervised clinical education in radiography, cardiac interventional, and peripheral/neurological interventional. The cardiovascular interventional component concentrates on imaging equipment; pharmacology; sterile techniques; cardiac monitoring; vascular anatomy and physiology; cardiovascular, peripheral, and neurological procedures and pathology; therapeutic intervention techniques; and digital angiography.

Upon completing the program, graduates are eligible to apply for the national certification exams in radiography, vascular interventional technology, and cardiac interventional technology.

Students who will have completed all prerequisite courses by June 1 are eligible to apply to this three-year program. Application deadline is January 15. Two students are accepted into this track each year, which begins in the fall.

Radiologic Technology and Computed Tomography

The radiologic technology component of this program provides education in pathology, radiation biology, radiation protection, patient care, and ethics. Students learn about radiographic procedures, imaging, and evaluation. They become acquainted with imaging equipment, study quality assurance, and participate in supervised clinical education in radiography and computed tomography (CT). The computed tomography component concentrates on sectional anatomy, single and multislice CT, electron beam CT, physiologic and 3-D imaging, CT simulation, physics and imaging, and procedures and pathology.

Upon completion of the program, graduates are eligible to apply for the national certification exams in radiography and computed tomography.

Students who will have completed all prerequisite courses by June 1 are eligible to apply to this three-year program. Application deadline is January 15. Six students are accepted into this track each year, which begins in the fall.

Radiologic Technology and Magnetic Resonance Imaging

The radiologic technology component of this program provides education in pathology, radiation biology, radiation protection, patient care, and ethics. Students learn about radiographic procedures, imaging, and evaluation. They become acquainted with imaging equipment, study quality assurance, and participate in supervised clinical education in radiography and magnetic resonance imaging (MRI). The magnetic resonance imaging component offers intensive study and practice in MRI, including patient care procedures, pathophysiology, physics, sectional anatomy, and instrumentation.

Upon completion of the program, graduates are eligible to apply for the national certification exams in radiography and magnetic resonance imaging.

Students who will have completed all prerequisite courses by June 1 are eligible to apply to this three-year program. Application deadline is January 15. Six students are accepted into this track each year, which begins in the fall.

Required Courses

Code	Title	Hours

RSRT:4125	Radiologic Technology Clinical Internship VII	1
RSRT:4225	Radiologic Technology Clinical Internship VIII	1

Radiation Therapy

A radiation therapist functions as a member of a team with physicians (radiation oncologist), physicists, dosimetrists, and nurses to provide treatment using ionizing radiation sources for patients with malignant and some benign diseases. The radiation therapist is responsible for the daily delivery of the prescribed treatment according to the treatment plan prepared by their physician in consultation with the medical physicist. The therapist works with the oncology nurse in the daily assessment of the patient's status and needs during their course of therapy. Radiation therapists are employed in radiation therapy facilities located in hospitals and freestanding centers.

Students completing the Radiation Therapy Program are trained to deliver therapeutic radiation. This two-year program

is selective and competitive; acceptance is not guaranteed. Since the program duration is two years, students must have completed a total of 60 s.h., including prerequisite courses by June 1, prior to the start of the program. Students must satisfy all UI admission requirements, complete all prerequisites, and be accepted into the Radiation Therapy professional program following an application and selection process; see Radiation Therapy on the Radiation Sciences Program website. Clinical and didactic education is provided by University of Iowa Hospitals & Clinics faculty in the Department of Radiation Oncology, with a hands-on component under the close guidance of licensed radiation therapists.

Radiation Therapy

The radiation therapy professional program teaches theory and techniques of radiation therapy technology, with emphasis on competence in areas of oncology treatment planning, treatment delivery, dosimetry, and use of megavoltage radiation-producing equipment to administer treatment. Students participate in clinical education in radiation therapy. Radiation therapy students also complete coursework in sectional anatomy and computed tomography (CT)/magnetic resonance imaging (MRI) pathology. Students have the option of completing coursework in CT procedures and physics, MRI fundamentals and acquisition, or courses in both modalities.

Upon completing the program, graduates are eligible to apply for the national certification exam in radiation therapy. Students will have completed the coursework but not the clinical component to be eligible to apply for the national certification exam in computed tomography and/or magnetic resonance imaging.

Students typically apply to this two-year program during their sophomore year and begin it in fall of their junior year. Application deadline is January 15. Seven students are accepted into this track each year.

Additional Prerequisites

The radiation therapy professional program requires two years of prerequisite coursework. The first year of coursework is listed under "Prerequisites to the Radiation Sciences Major" in the Requirements [p. 1780] section.

Code	Title	Hours
One of these:		
PHYS:1400	Basic Physics	3
PHYS:1511	College Physics I	4
Recommended:		
PHYS:1512	College Physics II	4
CHEM:1070	General Chemistry I	3-4
or CHEM:1110	Principles of Chemistry I	
CHEM:1080	General Chemistry II	3-4
or CHEM:1120	Principles of Chemistry II	
CS:1020	Principles of Computing	2-3
or BAIS:1500	Business Computing Essentials	
STAT:1020	Elementary Statistics and Inference	3
or STAT:3510	Biostatistics	
or STAT:4143	Introduction to Statistical Methods	
Electives to reach a total of 60 s.h.		6

Required Courses

Upon acceptance into the radiation therapy professional program, students will complete required courses and internships during their third and fourth years.

Code	Title	Hours

RSTH:4225	Radiation Therapy Clinical Internship V	5
RSTH:4230	Radiation Therapy Capstone	3

Students choose from three options for coursework in their last year of the program, starting with the summer before the fourth year.

Option 1 (MRI Coursework)

Code	Title	Hours
Both of these:		
RSMR:4110	Fundamentals for the MRI Technologist (online)	3
RSMR:4140	MRI Acquisition and Principles I (online)	3
Recommended:		
RSCI:4110	Vascular Anatomy (online elective)	3
RSMR:4120	MRI Procedures I (online elective)	4
RSMR:4130	MRI Procedures II (online elective)	3
RSMR:4150	MRI Acquisition and Principles II (online elective)	3

Option 2 (CT Coursework)

Code	Title	Hours
Both of these:		
RSCT:4120	Computed Tomography Procedures I (online)	3
RSCT:4130	Computed Tomography Physical Principles and QC (online)	4
Recommended:		
RSCI:4110	Vascular Anatomy (online elective)	3
RSCI:4130	Electrocardiogram and Hemodynamics	3
RSCT:4125	Computed Tomography Procedures II (online elective)	3

Option 3 (CT and MRI Coursework)

Code	Title	Hours
Both of these:		
RSCT:4130	Computed Tomography Physical Principles and QC (online)	4
RSMR:4110	Fundamentals for the MRI Technologist (online)	3
Recommended:		
RSCI:4110	Vascular Anatomy (online elective)	3
RSCT:4120	Computed Tomography Procedures I (online elective)	3
RSCT:4125	Computed Tomography Procedures II (online elective)	3
RSMR:4120	MRI Procedures I (online elective)	4
RSMR:4130	MRI Procedures II (online elective)	3
RSMR:4140	MRI Acquisition and Principles I (online elective)	3
RSMR:4150	MRI Acquisition and Principles II (online elective)	3

RT to B.S. (Online)

The RT to B.S. is an online program designed for registered radiologic technologists and nuclear medicine technologists who wish to earn a Bachelor of Science degree with a major in radiation sciences by distance education. The program requires a minimum of 120 s.h. Students who successfully complete a radiologic technology (RT) or a nuclear medicine technology (NMT) program are awarded 60 s.h. of credit. They also are awarded credit for equivalent coursework that is prerequisite to entering the major. Upon admission to the major, students complete an online modality, advanced courses, and electives for graduation.

Students choose one of five online modalities: breast imaging (BI), cardiovascular interventional (CVI), computed tomography (CT), magnetic resonance imaging (MRI), or a multi-modality option. The modalities do not require an internship.

In order to be admitted to the radiation sciences major, students must pass the American Registry of Radiologic Technologists (ARRT) radiography, ARRT nuclear medicine technology, or Nuclear Medicine Technology Certification Board (NMTCB) exam. They also must have completed all coursework prerequisite to entering the major with a g.p.a. of at least 2.50, not including RT or NMT program courses. Students may count approved transfer credit toward the required prerequisites; learn more by visiting Transfer Courses in MyUI.

Applicants for admission to the University of Iowa whose first language is not English are strongly encouraged to complete the University of Iowa English Proficiency Evaluation and satisfy the University's English Proficiency Requirements.

The radiation sciences major requires students to complete a minimum of two years of a high school world language prior to admission.

For additional information on UI admission requirements, contact the University's Office of Admissions.

Prerequisites to the Radiation Sciences Major

In addition to the completion of an RT or NMT program, students must complete the following prerequisite courses (25-29 s.h.) before they may enter the radiation sciences major.

Rhetoric

Culture, Society, and the Arts

Code	Title	Hours
Two courses for 3 s.h. each in two of these areas:		
	Diversity and Inclusion	
	Historical Perspectives	
	International and Global Issues	
	Literary, Visual, and Performing Arts	
	Values and Society	

See GE CLAS Core [p. 20] (College of Liberal Arts and Sciences) in the Catalog for approved courses in the culture, society, and the arts areas listed above.

Once students are admitted to the Carver College of Medicine and the radiation sciences major, they must at least complete their final consecutive 30 s.h. at the University of Iowa, including an online modality (22-25 s.h.), two advanced courses (6 s.h.), and sufficient elective coursework to complete the minimum 120 s.h. and the final consecutive 30 s.h. required for graduation.

Online Modality

Students complete one of the following online modalities.

Breast Imaging

The breast imaging online modality requires the following coursework (22 s.h.).

Code	Title	Hours
RSBI:3310	Patient Care for Breast Imaging	3
RSBI:4110	Breast Imaging Procedures and Analysis	3
RSBI:4120	Anatomy and Pathology for Breast Imaging	2
RSBI:4130	Breast Imaging Acquisitions and Principles	2
RSBI:4210	Breast Imaging Advanced Procedures and Analysis	3
RSBI:4220	Quality Control in Breast Imaging	3
RSCI:4110	Vascular Anatomy	3
RSCT:4100	Sectional Anatomy for Imaging Sciences	3

Cardiovascular Interventional

The cardiovascular interventional online modality requires the following coursework (23 s.h.).

Code	Title	Hours
RSCI:4110	Vascular Anatomy	3
RSCI:4120	CVI Principles	4
RSCI:4130	Electrocardiogram and Hemodynamics	3
RSCI:4140	CVI Peripheral Procedures and Pathology	3
RSCI:4150	CVI Neurology and Nonvascular Procedures and Pathology	3
RSCI:4160	CVI Cardiac Procedures and Pathology	4
RSCT:4100	Sectional Anatomy for Imaging Sciences	3

Computed Tomography

The computed tomography online modality requires the following coursework (22 s.h.).

Code	Title	Hours
RSCI:4110	Vascular Anatomy	3
RSCI:4130	Electrocardiogram and Hemodynamics	3
RSCT:4100	Sectional Anatomy for Imaging Sciences	3
RSCT:4110	CT/MRI Pathology	3
RSCT:4120	Computed Tomography Procedures I	3
RSCT:4125	Computed Tomography Procedures II	3
RSCT:4130	Computed Tomography Physical Principles and QC	4

Magnetic Resonance Imaging

The magnetic resonance imaging online modality requires the following coursework (25 s.h.).

Code	Title	Hours
RSCI:4110	Vascular Anatomy	3
RSCT:4100	Sectional Anatomy for Imaging Sciences	3
RSCT:4110	CT/MRI Pathology	3
RSMR:4110	Fundamentals for the MRI Technologist	3
RSMR:4120	MRI Procedures I	4
RSMR:4130	MRI Procedures II	3
RSMR:4140	MRI Acquisition and Principles I	3
RSMR:4150	MRI Acquisition and Principles II	3

Multi-Modality Option

The multi-modality online modality requires the following coursework (22 s.h.).

Code	Title	Hours
RSCT:4100	Sectional Anatomy for Imaging Sciences	3
RSCI:4110	Vascular Anatomy	3

Additional 16 s.h. of breast imaging (RSBI), computed tomography (RSCT), cardiovascular interventional (RSCI), or magnetic resonance imaging (RSMR) coursework. 16

Course schedules can be found on the Online RT to BS page of the Radiation Sciences Program website.

Advanced Courses

Management and Leadership

Code	Title	Hours
One of these:		
COMM:1819	Organizational Leadership	3
MGMT:2100	Introduction to Management	3
MGMT:3500	Nonprofit Organizational Effectiveness I	3

Statistics

Code	Title	Hours
One of these:		
STAT:1020	Elementary Statistics and Inference	3
STAT:4143	Introduction to Statistical Methods	3

Electives

Students choose elective coursework to complete the minimum 120 s.h. required and the final consecutive 30 s.h. necessary to qualify for graduation.

Academic Plans

Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

- j If needed for full-time status or to reach the total s.h. required for graduation.
- k Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>

Radiologic Technology and Breast Imaging

Course	Title	Hours
Academic Career		
Any Semester		
Students apply to the Radiation Sciences B.S. program through a selective process. Acceptance is not guaranteed. ^a		
Students must earn a grade of C or higher in all RS** courses.		
The Radiologic Technology and Breast Imaging professional program is four years in duration.		
Hours		0
First Year		
Any Semester		
Recommended: health care experience (e.g. CNA), job shadowing in radiologic technology, computed tomography, magnetic resonance imaging, cardiovascular interventional, and breast imaging.		
Hours		0
Fall		
RHET:1030	Rhetoric	4
BIOL:1140	Human Biology ^{b, c}	3 - 4
MATH:1440	Mathematics for the Biological Sciences ^d	4
GE: General Education course (DI, IGI, HP, LVPA, or VC) ^e		3
RSP:1100	Introduction to the Radiation Sciences ^f	1
Admission Application: begin preparing materials for Radiation Sciences application (typically due in January) ^g		
Hours		15-16
Spring		
Human Physiology ^h		
Human Anatomy ^{b, i}		
PSY:1001	Elementary Psychology	3
CLSA:3750	Medical and Technical Terminology	2
GE: General Education course (DI, IGI, HP, LVPA, or VC) ^e		3
Hours		14-18
Second Year		
Any Semester		
The curriculum shown in the second, third, and fourth years on this plan begins upon acceptance into the Carver College of Medicine, Radiologic Technology Professional Program.		
Hours		0
Fall		
RSRT:2110	Radiographic Procedures and Analysis I	4
RSRT:2120	Radiologic Technology Clinical Internship I	1

- j Please see the Radiation Sciences Programs' website and your academic advisor for detailed application instructions and deadlines.
- k Students opting to complete only CT courses will not register for RSMR:4110.
- l Students opting to complete only MRI courses will not register for RSCT:4130.

m Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>

Career Advancement

The majority of radiation sciences graduates are employed shortly after graduation. Graduates generally find jobs in hospitals, clinics, imaging centers, and physicians' offices. With experience, and sometimes additional education, they may find related jobs in management, sales, education, or as application specialists. Some students choose to continue their education in a master's, physician assistant, or other related medical program.

Most radiation sciences professionals with full-time jobs work 40 hours a week and may have holiday, weekend, evening, night, and on-call hours.

Students who complete Iowa's professional radiation sciences programs are eligible to apply for national certification exams administered by the appropriate agency in order to practice.

Licensure laws for radiographers, sonographers, and radiation therapists vary from state to state. Iowa is a licensing state, requiring radiographers to have a permit to practice. Passing the national exam is a criterion used to issue a permit to practice.

More information on radiation sciences careers and outcomes may be found on the Radiation Sciences Program website. The Pomerantz Career Center offers multiple resources to help students find jobs.

Radiology

Chair

- Colin P. Derdeyn

Faculty: <https://medicine.uiowa.edu/radiology/our-people>

Website: <https://medicine.uiowa.edu/radiology/>

The Department of Radiology has a three-fold mission of education, research, and patient care. It trains Doctor of Medicine students, residents, and fellows and offers programs for medical professionals. It is a leader in innovative research relating to diagnosis and treatment across the clinical subspecialties, including MRI, PET, breast imaging, cardiac and pulmonary imaging, and imaging informatics. Residents, fellows, medical students, and graduate students have opportunities to participate in research projects in the department. The radiology library provides varied resources and services for department faculty and staff.

The department also provides diagnostic and therapeutic radiology services for patients and families in Iowa and surrounding states through its clinical services at University of Iowa Hospitals & Clinics. Visit the Department of Radiology website to learn more about the department's activities and resources.

Undergraduate Education

The Department of Radiology offers clinical education to students in the Nuclear Medicine Technology [p. 1730] and Radiation Sciences [p. 1772] Programs.

M.D. Training

The Department of Radiology offers a clerkship for Doctor of Medicine students and provides additional courses, research experiences, and externships for students interested in learning more about radiology. Several of the department's programs are open to medical students from other institutions. See Medical Student Training and Externship Program on the Department of Radiology website.

Residency

The department offers three residency programs in diagnostic radiology, interventional radiology, and nuclear medicine; see Education on the Department of Radiology website.

Fellowships are available in these specialties: body imaging, breast imaging, endovascular surgical neuroradiology, musculoskeletal radiology, neuroradiology, pediatric radiology, PET-CT imaging, and interventional radiology. Practicing radiologists have access to several departmental traineeships that provide category 1 continuing medical education credit through the Carver College of Medicine.

Courses

Radiology Courses

RAD:8301 Clinical Radiology 2 s.h.
Two-week clerkship. Requirements: M.D. enrollment.

RAD:8401 Advanced Clinical Radiology arr.
Requirements: M.D. enrollment.

RAD:8402 Vascular and Interventional Radiology arr.
Requirements: M.D. enrollment.

RAD:8497 Research in Radiology arr.
Medical research, clinical or laboratory projects; individual study.

RAD:8498 Radiology On Campus arr.
Requirements: M.D. enrollment.

RAD:8499 Radiology Off Campus arr.
Requirements: M.D. enrollment.

Stead Family Department of Pediatrics

Interim Chair

- Eva Tsalikian

Faculty: <https://medicine.uiowa.edu/pediatrics/people>

Website: <https://medicine.uiowa.edu/pediatrics/>

The Stead Family Department of Pediatrics provides a solid foundation for M.D. students and postgraduate trainees. It offers extensive opportunities for general pediatrics and subspecialties training.

Affiliated programs add depth to the educational program in community pediatrics and primary care. The department is affiliated with the child and material health programs of the Bureau of Family Health, Iowa Department of Public Health, University of Iowa Stead Family Children's Hospital, the Center for Disabilities and Development, the Blank Children's Hospital in Des Moines, and community sites.

M.D. Training

Didactic lectures and physical examination of newborns, toddlers, and older children provide M.D. students with their initial pediatric patient contact. This experience includes taking a history, performing a physical examination, appraisal of growth and development, nutrition, and symptomatology of newborns, toddlers, and adolescents.

For core and advanced medical students, the inpatient service provides training in the complex problems of disease and critical illness. Students participate in daily rounds involving general pediatrics and all subspecialties. Challenging and interesting cases are presented for discussion of diagnosis and treatment.

Outpatient experience, available in the core clerkship and advanced electives, stresses principles and practices required for the maintenance of children's health, treatment of common general pediatric disorders, and the diagnosis and treatment of subspecialty ambulatory patients.

Residency

Residency Program, Fellowships

The department offers an accredited three-year residency program designed to prepare trainees for professional careers in general pediatrics or for further fellowship training. The program meets the eligibility requirements of the American Board of Pediatrics (ABP) and is approved for 15 residents and one child neurology resident per year by the Accreditation Council for Graduate Medical Education (ACGME).

Fellowships are available in multiple pediatrics subspecialties. Fellowship programs encourage development of knowledge and skill through research and clinical experiences in the chosen discipline. Upon satisfactory completion of the program, fellows meet the ABP eligibility requirements in their subspecialty.

Facilities

The Stead Family Department of Pediatrics has inpatient and outpatient facilities in the University of Iowa Stead Family

Children's Hospital. Additional outpatient facilities are located at Iowa River Landing in Coralville, UI Health Care—North Liberty, UI Health Care—Scott Boulevard, and Cedar Rapids Pediatrics.

The pediatric inpatient service has approximately 189 beds, and more than 60,000 patients are seen each year in the general, specialty, continuity care, and field clinics and in University of Iowa Hospitals & Clinics Emergency Medicine. The Center for Disabilities and Development provides resources for children with intellectual or developmental disabilities and cerebral palsy.

The department maintains a number of laboratories that perform both clinical and research studies.

Courses

Pediatrics (Stead Family Department of Pediatrics) Courses

PEDS:6101 Primary Care: Infants, Children, and Adolescents II

3 s.h.

Enhancement of clinical knowledge and skills for infant, child, adolescent care; development and refinement of knowledge and skills in primary health care delivery. Prerequisites: NURS:6100. Corequisites: NURS:6702. Same as NURS:6101.

PEDS:7245 Evaluation of Children with ADHD and LD

arr.

Clinical experience in conducting pediatric neuropsychology examinations in the Pediatric Attention/Learning Disorders Clinic. Requirements: course on psychological testing (including IQ) and graduate psychology standing (school, counseling, rehabilitation, clinical). Same as PSQF:7245.

PEDS:7255 Autism Spectrum Disorders

2 s.h.

Overview of autism spectrum disorders (ASDs), including autistic disorder, Asperger's disorder, other pervasive developmental disorders; ASD diagnoses and their etiology; tools used in assessing individuals with ASDs; common interventions for ASDs; resources for work with individuals who have ASDs.

PEDS:7262 Biobehavioral Assessment and Intervention

1-3 s.h.

Experience conducting brief functional assessments and behavioral treatments for children and adults with developmental disabilities; interviews with caregivers, behavioral assessments, matched treatments (e.g., functional communication training); follow-up with caregivers.

PEDS:7263 Evaluation and Treatment of Pediatric Feeding Disorders

1-3 s.h.

Experience evaluating children with varied feeding disorders, such as food overselectivity by texture or type, dependence on gastrostomy or nasogastrostomy tubes, failure to grow adequately due to inadequate caloric intake; methods to evaluate feeding behaviors, evaluate design interventions, and measure outcomes; caregiver training and follow-up.

PEDS:7264 Clinical Applications of Applied Behavior Analysis

1-3 s.h.

Experience behavioral observations, consultation, and/or conducting behavioral assessments (including preference assessments and functional analyses), matched treatments; interviews with care providers, collect behavioral data, conduct behavioral assessments, matched treatments; follow-up with care providers.

- PEDS:8301 Clinical Pediatrics** **6 s.h.**
Principles, practices of health maintenance and treatment of acute and chronic illnesses in children; emphasis on diagnosis and evaluation, nutrition, behavior problems, disorders affecting children; patient care, daily rounds, ward work. Requirements: third-year M.D. enrollment.
- PEDS:8401 Advanced Inpatient Subinternship in Pediatric Care** **arr.**
Experience on pediatric inpatient team caring for patients ranging from infants through adolescents; evaluation, formulation of differential diagnoses, diagnostic workups, appropriate therapy programs. Requirements: fourth-year M.D. enrollment.
- PEDS:8402 Advanced Inpatient Subinternship in Pediatrics: Blank Children's Hospital, Des Moines** **arr.**
Experience in the care of general pediatric inpatients; daily rounds and teaching by senior residents and faculty members; daily didactic conferences. Requirements: fourth-year M.D. enrollment.
- PEDS:8403 Neonatology (NICU)** **arr.**
Experience caring for ill neonates, proficiency in using diagnostic tests and procedures; responsibility for care of several infants; reference and literature review, conferences, teaching, clinical rounds. Requirements: fourth-year M.D. enrollment.
- PEDS:8404 Critical Care (PICU)** **4 s.h.**
Direct care of critically ill children in a multidisciplinary medical/surgical/cardiac intensive care unit, under supervision of pediatric residents and staff; participation in educational activities and formal clinical rounds. Requirements: fourth-year M.D. enrollment.
- PEDS:8405 Emergency Room Blank Children's Hospital, Des Moines** **arr.**
Pediatric emergencies and urgent care, proficiency in pediatric medicine procedures; expansion of basic knowledge. Requirements: fourth-year M.D. enrollment.
- PEDS:8406 Pediatric Allergy/Immunology and Pulmonary** **arr.**
Experience in evaluating and treating respiratory and allergic diseases in infants, children, and adolescents. Requirements: fourth-year M.D. enrollment.
- PEDS:8407 Pediatric Cardiology** **arr.**
Participation in clinical activities; observation of cardiac catheterization; experience in cardiac auscultation, ECG, radiography; emphasis on physical diagnosis, approach to heart disease and murmurs in children. Requirements: fourth-year M.D. enrollment.
- PEDS:8408 Pediatric Gastroenterology** **arr.**
Diagnosis, management, treatment of diseases of gastrointestinal tract, liver, pancreas in children; ward rounds, consultations, clinics, diagnostic procedures, conferences. Requirements: fourth-year M.D. enrollment.
- PEDS:8409 Pediatric Hematology/Oncology** **arr.**
Basic concepts of clinical approach to hematologic and oncologic problems in children and adolescents; primarily outpatient experience. Requirements: fourth-year M.D. enrollment.
- PEDS:8410 Pediatric Neurology** **arr.**
Participation in outpatient and inpatient activities, teaching, morning ward rounds. Requirements: fourth-year M.D. enrollment.
- PEDS:8411 Child Abuse and Neglect** **2,4 s.h.**
Hospital- and community-based multidisciplinary responses to child abuse and neglect; experience developing diagnostic skills to recognize, assess, and report cases of child abuse and neglect. Requirements: fourth-year M.D. enrollment.
- PEDS:8412 Developmental and Behavioral Pediatrics** **2,4 s.h.**
Normal developmental sequence of gestation and early childhood, impact of environmental influences; antecedents of developmental disabilities; methods to detect cognitive and motor delays in preschool children; long-term consequences of developmental disabilities for children, their families; advantages of interdisciplinary teamwork. Requirements: fourth-year M.D. enrollment.
- PEDS:8415 Medical Genetics for the Senior Student** **arr.**
Participation in diagnostic, therapeutic problems; techniques for evaluation, appropriate counseling in genetic cases; conferences. Requirements: fourth-year M.D. enrollment.
- PEDS:8416 Neonatal Intensive Care Unit, Blank Children's Hospital** **4 s.h.**
Experience equivalent to intern on neonatal intensive care unit teaching service at Blank Children's Hospital, Des Moines; four-week rotation.
- PEDS:8417 Community Pediatric Outpatient Elective** **2 s.h.**
Opportunity to participate as active members of a community-based general pediatric office; work directly with community-based faculty and non-physician team members; build on clinical skills developed in M3 pediatric clerkship. Requirements: M.D. enrollment.
- PEDS:8418 Pediatric Intensive Care Unit, Blank Children's Hospital** **4 s.h.**
Development of knowledge and clinical skills in recognition of critical illness in children; basic strategies of initial resuscitation and management.
- PEDS:8420 Pediatric Palliative Care** **2,4 s.h.**
Palliative medicine as a specialty which enhances quality of life, reduces suffering for patients with serious illnesses, and provides education and support for their families; interdisciplinary consult teamwork with patient's primary medical providers for inpatient or outpatient management of symptoms, goal setting, and decision making; introduction to pediatric palliative care with option to be involved in adult palliative care and local hospice services. Requirements: M.D. enrollment.
- PEDS:8421 Pediatric Endocrinology** **2,4 s.h.**
Diagnosis, management, and treatment of pediatric endocrine diseases: growth disorders (short stature, tall stature, delayed puberty, precocious puberty), thyroid disorders (hypothyroidism, hyperthyroidism, thyroid nodules), diabetes mellitus, diabetes insipidus, dysgenetic syndromes, ambiguous genitalia, adrenal insufficiency or adrenal steroid excess, and hypopituitarism. Requirements: M.D. enrollment.
- PEDS:8431 Pediatric Nephrology** **2,4 s.h.**
Introduction to general pediatric nephrology cases and management. Requirements: M.D. enrollment.

PEDS:8450 Continuity of Care in Outpatient General Pediatrics **4 s.h.**

Work with experienced general pediatrician in a longitudinal clinical experience for the academic year; paired with faculty pediatrician to see patients in a weekly clinic, provide clinical care to a defined patient population; growth and development, health supervision, and management of common acute and chronic clinical problems. Requirements: fourth-year M.D. enrollment.

PEDS:8495 Pediatric Intensive Care Off Campus **arr.**

Arranged by student and department. Requirements: fourth-year M.D. enrollment.

PEDS:8497 Research in Pediatrics **arr.**

Medical research, clinical or laboratory projects; individual study.

PEDS:8498 Pediatrics On Campus **arr.**

Requirements: fourth-year M.D. enrollment.

PEDS:8499 Pediatrics Off Campus **arr.**

Requirements: fourth-year M.D. enrollment.

Surgery

Chair

- Ronald Weigel

Interim Director, Perfusion Technology

- Shahna L. Helmick

Undergraduate certificate: perfusion technology

Faculty: <https://medicine.uiowa.edu/surgery/people/primary-appointments>

Website: <https://medicine.uiowa.edu/surgery/>

The Department of Surgery offers didactic instruction as well as clinical and other practical experiences for medical students. It also hosts a wide spectrum of clinical and scientific research. In addition, it offers the undergraduate Certificate in Perfusion Technology.

Cardiothoracic Surgery

The University of Iowa cardiothoracic surgery program is the third oldest program of its kind in the United States. Since its establishment in 1948 as a division within the Department of Surgery, the program has advanced from providing operative interventions for patients with diseases of the chest to performing a broad range of the most current and innovative surgical procedures.

Cardiothoracic surgery's facilities are located at University of Iowa Hospitals & Clinics. Each year cardiothoracic surgeons at the hospitals perform more than 500 adult and pediatric heart surgeries, including coronary bypasses, transplants, and placement of mechanical cardiac assist devices; minimally invasive procedures such as mitral valve replacement and epicardial lead placement; and more than 600 general thoracic surgeries with emphasis on esophageal and lung diseases. Preparations are under way for providing coronary artery bypass grafting using robotics.

Postbaccalaureate Training

The Department of Surgery plays a primary instructional role in University of Iowa Hospitals & Clinics' 20-month postbaccalaureate Perfusion Technology Program; see the perfusion courses listed under Courses [p. 1805] in this section of the Catalog. For more information about the Perfusion Technology Program, contact the Department of Surgery or visit the Perfusion Technology Program website.

Faculty

The faculty's strengths center in pathophysiology and problems of severe burns, trauma, organ transplantation, surgical control of morbid obesity, surgical oncology, bowel disease, biliary tract disease, pediatric surgery, endocrine disease, plastic surgery, diseases of the esophagus, artificial organs, pediatric cardiac surgery, transplantation, and vascular surgery. Research also is under way in the sequence of mutations and in localization of genes predisposed to cancer.

Programs

Undergraduate Program of Study Certificate

- Certificate in Perfusion Technology [p. 1806]

M.D. Training

Department of Surgery courses provide a unique combination of experience oriented toward patient care and understanding of surgery's place among a physician's skills. Surgery courses are open only to M.D. students and qualified students in associated health sciences.

Students develop an awareness of surgery's role in the treatment of disease. Emphasis is placed on general surgery, basic emergency surgery, trauma, oncology, burns, gastrointestinal and biliary tract disease, endocrine disease, pediatric surgery, transplantation, plastic and reconstructive surgery, and peripheral vascular surgery.

The majority of surgery courses involve patient-centered discussions and practical exercises interwoven with operating room experience. Lectures and conferences are scheduled regularly on specific topics.

The department offers independent study courses in selected surgery topics and clinical experiences; some are available to fourth-year M.D. students by arrangement with the faculty.

Residency

Iowa's cardiothoracic surgery residency program was established in 1948 and is fully accredited by the Accreditation Council for Graduate Medical Education (ACGME). It is the only cardiothoracic surgery training program in Iowa. One resident is accepted into the two-year program each year. Cardiothoracic surgery was approved by the ACGME to start a six-year integrated thoracic residency. Medical students begin the program after they graduate from medical school. A new resident enters the program each year.

Facilities

Abundant patient contact provides education in a wide variety of surgical diseases. The Department of Surgery provides training in the only burn unit in Iowa approved by the American College of Surgeons and in the Level I Trauma Center at University of Iowa Hospitals & Clinics.

Laboratories provide equipment, space, and technical expertise to support teaching and a wide spectrum of clinical and scientific research. Projects are available in gastrointestinal surgery, surgical microbiology, peripheral vascular surgery, transplantation, wound healing, organ preservation, vascular surgery, pediatric surgery, and surgical oncology.

Cardiothoracic surgery has specialty laboratories in gastric motility, analytical chemistry, transplantation, tissue culture, surgical bacteriology, shock, and cardiac bypass. These facilities permit study of experimental procedures such as heart valve replacement in large animals and heterotopic heart transplantation in mice and rats.

The laboratories also are used for supervised teaching exercises in surgical technique for medical students and junior residents, and for refinement of technique for senior residents and faculty members.

Courses

- Surgery Courses [p. 1805]
- Cardiothoracic Surgery Courses [p. 1805]
- Perfusion Technology Courses [p. 1805]

Surgery Courses

SURG:8301 Clinical Surgery 6 s.h.

Experience as active member of surgical team; work on inpatient units, in clinics and operating room; assist in elective and emergency patient care.

SURG:8401 Advanced General Surgery 4 s.h.

Opportunity to strengthen clinical skills through experiences in the operating rooms, clinics, wards, and intensive care units of University of Iowa Hospitals & Clinics.

SURG:8402 Advanced Inpatient Subinternship in General Surgery 4 s.h.

Responsibility for management of selected surgical inpatients, on a surgical service. Prerequisites: SURG:8301.

SURG:8406 General Surgery, Des Moines, IA 4 s.h.

Care of general surgery patients in private hospital setting. Prerequisites: SURG:8301.

SURG:8407 Intensive Care Unit - Trauma, Iowa Methodist 4 s.h.

Subinternship on trauma service team; evaluation and management of critically ill patients in the emergency room, operating room, intensive care unit. Prerequisites: SURG:8301. Requirements: fourth-year M.D. enrollment.

SURG:8409 General Surgery, Davenport, IA 4 s.h.

Participation in diagnosis and management of general surgical patients under supervision of attending surgeons from Davenport Surgical Group, Genesis Medical Center. Prerequisites: SURG:8301. Requirements: fourth-year M.D. enrollment.

SURG:8411 Multidisciplinary Breast Elective 2,4 s.h.

Evaluation and management of benign and malignant breast diseases; focus on multidisciplinary nature of treatment of breast disease; for students who plan to pursue residency in general surgery, obstetrics and gynecology, family practice, or other field with focus on women's health. Requirements: M.D. enrollment.

SURG:8497 Research in Surgery arr.

Medical research, clinical or laboratory projects; individual study.

SURG:8498 Surgery On Campus arr.

Surgery on campus; individually arranged. Prerequisites: SURG:8301.

SURG:8499 Surgery Off Campus arr.

Prerequisites: SURG:8301.

Cardiothoracic Surgery Courses

CTS:8401 Advanced Inpatient Subinternship in Cardiothoracic Surgery arr.

Participation in diagnosis, preoperative, operative, and postoperative care of thoracic and cardiac patients; attendance at division conferences; students assume responsibility and act as an intern; may concentrate interest in cardiac surgery or thoracic surgery; diagnosis and management of patients on an inpatient service under close supervision by an upper-level resident/fellow and faculty member.

CTS:8497 Research in Cardiothoracic Surgery arr.

Work on a short- or long-term research project arranged with instructor; may involve clinical material or laboratory; students organize and complete a project, finishing with a publishable manuscript.

CTS:8498 Cardiothoracic Surgery On Campus arr.

Clinical clerkship individually arranged by student with department approval.

CTS:8499 Cardiothoracic Surgery Off Campus 4 s.h.

Individually arranged by student with approval of department to rotate outside of University of Iowa Hospitals & Clinics. Requirements: M.D. enrollment.

Perfusion Technology Courses

PERF:4161 Instrumentation in Perfusion Technology 3 s.h.

Electrical circuitry, filters, pressure transducers, thermistors, cardiac output computers, fluid dynamics, intra-aortic balloon pumps, blood gas analyzers. Requirements: Perfusion Technology Program enrollment.

PERF:4162 Pathophysiology of Perfusion Technology 5 s.h.

Hemostasis, acid base physiology, gas transfer, heart anatomy, heart embryology, congenital cardiac defects. Requirements: Perfusion Technology Program enrollment.

PERF:4163 Clinical Experience I 2 s.h.

Perfusion in operating room: patient workup, observation, and reporting on extracorporeal setup, surgical procedure. Requirements: Perfusion Technology Program enrollment.

PERF:4164 Clinical Experience II 3 s.h.

Continuation of PERF:4163; setup of extracorporeal circuit; ancillary duties of perfusionist. Requirements: Perfusion Technology Program enrollment.

PERF:4165 Clinical Experience III 12 s.h.

Continuation of PERF:4164; management of cardiopulmonary bypass system. Requirements: Perfusion Technology Program enrollment.

PERF:4166 Clinical Experience IV 12 s.h.

Continuation of PERF:4165; emphasis on supply maintenance, perfusion department management. Requirements: Perfusion Technology Program enrollment.

PERF:4167 Perfusion Seminar 1 s.h.

Ethics in perfusion. Requirements: Perfusion Technology Program enrollment.

PERF:4168 Research in Perfusion 1 s.h.

From topic selection to manuscript. Requirements: Perfusion Technology Program enrollment.

PERF:4169 Clinical Experience V 12 s.h.

Continuation of PERF:4166. Requirements: Perfusion Technology Program enrollment.

PERF:4170 Principle and Practice of Perfusion Technology 6 s.h.

Hypothermia, hemodilution, left heart bypass, dialysis, ultrafiltration, membrane and bubbler oxygenation. Requirements: Perfusion Technology Program enrollment.

PERF:4171 Devices in Perfusion Technology 3 s.h.

Components of extracorporeal circuit; in vitro laboratory evaluation of components. Requirements: Perfusion Technology Program enrollment.

Perfusion Technology, Certificate

Requirements

The undergraduate Certificate in Perfusion Technology requires 74 s.h. of credit. Students must maintain a g.p.a. of at least 2.00 in work for the certificate. The certificate is a 20-month program over five semesters. The program is accredited by the Commission on Accreditation of Allied Health Education Programs upon the recommendation of The Accreditation Committee for Perfusion Education. Students are awarded the certificate upon successful completion of the program making them eligible to take the American Board of Cardiovascular Perfusion certification exam.

Three to five students are accepted annually and begin the program the fall semester. During the first two semesters of the program, students pursue a core curriculum that provides a solid scientific base while the second year (three semesters) is reserved for the completion of an independent research project, clinical training in the operation of the heart-lung machine, and learning ancillary procedures such as blood salvaging, circulatory support, and artificial hearts.

The Certificate in Perfusion Technology requires the following work.

Code	Title	Hours
PERF:4161	Instrumentation in Perfusion Technology	3
PERF:4162	Pathophysiology of Perfusion Technology	5
PERF:4163	Clinical Experience I	2
PERF:4164	Clinical Experience II	3
PERF:4165	Clinical Experience III	12
PERF:4166	Clinical Experience IV	12
PERF:4167	Perfusion Seminar (taken five times for 1 s.h. each)	5
PERF:4168	Research in Perfusion (taken four times for 1 s.h. each)	4
PERF:4169	Clinical Experience V	12
PERF:4170	Principle and Practice of Perfusion Technology	6
PERF:4171	Devices in Perfusion Technology	3
PATH:8133	Introduction to Human Pathology for Graduate Students	4
PCOL:4130	Drug Mechanisms and Actions	3

Prerequisites

The following coursework is required before admission to the certificate program.

- Baccalaureate degree
- Chemistry, including biochemistry or organic chemistry (9 s.h.)
- Human anatomy and physiology (7 s.h.)
- Physics (4 s.h.)

- Precalculus (5 s.h.) or calculus
- Statistics (3 s.h.)

Admission

Admission to the program is based on the decision of the Admissions Committee. Decisions are based upon a combination of grade-point average, references, an essay, and interview scores.

For information about application materials, see Admissions on the Perfusion Technology Program website.

Applications must be submitted by December 1 for early admission consideration; applications received after this date will be processed on a space-available basis.

Urology

Chair

- Karl Kreder

Faculty: <https://medicine.uiowa.edu/urology/people/primary-appointments>

Website: <https://medicine.uiowa.edu/urology/>

Urology encompasses the subspecialty areas of urologic nephrology, oncology, and endocrinology; male reproductive physiology; erectile dysfunction; neurourology; pediatric urology; urinary tract stone and infection, including endourology; laparoscopic and robotic urology; trauma and reconstructive urology; urodynamics and female urology; diagnostic urology; and urinary tract obstruction.

The Department of Urology offers instruction in all of these areas to M.D. and graduate students and provides continuing education for the delivery of urologic care.

Continuing Education

The department offers continuing education activities throughout the year for urologic and family practitioners. These activities are conducted by the faculty, whose interests include pediatric urology, reproductive physiology and male infertility, urologic oncology, urinary tract stone (including endourology/laparoscopy), robotic surgical procedures, trauma and reconstructive urology, female urology, and prostatic diseases.

Research

The department has earned international recognition for its studies of prostatic diseases. The urological laboratories conduct research and offer instruction in experimental oncology, cellular immunology, and infertility.

M.D. Training

The Department of Urology cooperates with several University of Iowa basic science departments to educate first-year M.D. students in the relationship between urology and the basic sciences. It collaborates with the Department of Microbiology and Immunology [p. 1713] in teaching and research concerning immunology of genitourinary cancers and renal transplantation.

In the first-year M.D. course, MED:8134 Mechanisms of Health and Disease III, and the second-year courses, MED:8221 Clinical and Professional Skills III and MED:8224 Mechanisms of Health and Disease Keystone, the department presents illustrative lectures and demonstrations related to diagnosis and treatment of genitourinary tract diseases.

Second-, third-, and fourth-year M.D. students take Department of Urology courses that provide experience in all areas of urology. The department's selective two-week clerkship covers the fundamentals of these areas through experience in outpatient clinics, surgical settings, and inpatient units at University of Iowa Hospitals & Clinics, the Iowa River Landing, and the Iowa City VA Health Care System. M.D. students can take advanced elective courses of intensive study in any of the urologic subspecialties after completion of URO:8301 Clinical Urology.

Courses

Urology Courses

- URO:8301 Clinical Urology** **2 s.h.**
Work in urology unit, clinic; responsibility for patient care, working with residents.
- URO:8401 Advanced Urology** **4 s.h.**
Experience as integral member of urological staff, junior resident level. Requirements: M.D. enrollment.
- URO:8402 Pediatric Urology** **2,4 s.h.**
In-depth study of pediatric urology topics. Requirements: M.D. enrollment.
- URO:8403 Urologic Oncology** **2,4 s.h.**
Multispecialty exposure to diagnosis and treatment of patients with current and newly diagnosed urologic malignancies. Requirements: M.D. enrollment.
- URO:8404 Female Pelvic Floor Dysfunction** **2,4 s.h.**
Requirements: M.D. enrollment.
- URO:8497 Research in Urology** **arr.**
Medical research, clinical or laboratory projects; individual study.
- URO:8498 Urology On Campus** **arr.**
Clinical clerkship; individually arranged by student with departmental approval.
- URO:8499 Urology Off Campus** **arr.**
Individually arranged by students with department approval.

College of Nursing

Dean

- Julie Zerwic

Interim Executive Associate Dean

- Sandra E. Daack-Hirsch

Associate Dean for Faculty

- Keela Herr

Associate Dean for Research

- Barbara A. Rakel

Associate Dean for Undergraduate Programs

- Anita C. Nicholson

Assistant Dean for Graduate Practice Programs

- Mary S. Dirks

Director, Ph.D. Program

- Stephanie Gilbertson-White

Undergraduate degree: B.S.N.

Graduate degrees: M.S.N.; D.N.P.; Ph.D. in nursing

Graduate certificates: adult gerontology acute care nurse practitioner; adult gerontology primary care nurse practitioner; family nurse practitioner; health systems; pediatric nurse practitioner-acute care; pediatric nurse practitioner-primary care; psychiatric/mental health nurse practitioner

Faculty: <https://nursing.uiowa.edu/faculty-staff/faculty-directory>

Website: <https://nursing.uiowa.edu/>

The College of Nursing is an integral part of the University of Iowa health science campus, sharing in and contributing to teaching, research, and patient care resources that have earned international recognition. The University provides an unusually fine setting for nursing preparation because the educational and clinical resources vital to educating nurses are available on or near the campus. Faculty and students participate fully in University life and contribute their time, interests, and abilities to the many general and special activities of a major research university.

The college's Bachelor of Science in Nursing (B.S.N.), the Clinical Nurse Leader (CNL) program (in the Master of Science in Nursing), and the Doctor of Nursing Practice (D.N.P.) programs are accredited by the Commission on Collegiate Nursing Education (CCNE), an autonomous accrediting arm of the American Association of Colleges of Nursing (AACN). They also are approved by the Iowa Board of Nursing. The anesthesia nursing program (in the Doctor of Nursing Practice) is accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs.

Graduates of the prelicensure B.S.N. qualify to take the National Council Licensure Examination (NCLEX) required for practice as registered nurses (RN). Graduates of advanced practice majors in the graduate program are eligible to take certification examinations and apply for Advanced Registered Nurse Practitioner (ARNP) licensure.

Related Minor and Certificates

Aging and Longevity Studies

College of Nursing students may participate in the Aging and Longevity Studies Program, which provides undergraduate students with a multidisciplinary approach to gerontology. The program offers a certificate and a minor. Students plan their course of study with their academic advisor in close cooperation with the Aging and Longevity Studies Program coordinator. The Aging and Longevity Studies Program is administered by the School of Social Work (College of Liberal Arts and Sciences). For more information, see Aging and Longevity Studies [p. 44] in the Catalog (College of Liberal Arts and Sciences).

Informatics (Health Informatics Subprogram)

The Graduate College offers the Certificate in Informatics with a health informatics subprogram. The subprogram emphasizes the organization, management, and use of health care information; health care research, education, and practice; and information technology developments in the socioeconomic context of health care.

College of Nursing students working toward the certificate complete IGPI:5200 Health Informatics, which explores decision-making processes and technological tools to support health care administration, management, and practice; and EPID:5200 Principles of Public Health Informatics, which focuses on systematic applications of information science, computer science, and technology to public health practice, research, and learning; methods of disease surveillance, data collection, analysis, and reporting with health informatics.

Students earn additional credit in foundational informatics coursework, including one elective chosen in consultation with their major program advisor and their certificate advisor. Students who earn credit for a thesis, project, or independent study in their major program of study may apply the credit as an elective if the certificate advisor determines that the subject matter is pertinent.

To learn more, see the Certificate in Informatics [p. 1597] (Graduate College) in the Catalog. For additional information, see Health Informatics on the Graduate College website.

Professional Improvement

Registered nurses who wish to take University of Iowa coursework to fulfill professional or personal improvement objectives may request admission in the professional improvement (PI) category. This admission status allows students to take some graduate courses at the University without committing to a degree objective.

Admission as a nursing professional improvement student requires a formal application, including submission of three current written recommendations and all academic transcripts. Graduate Record Examination (GRE) General Test scores, required by the University, must be submitted before the end of first semester registration.

Application deadlines are July 15 for fall semester admission, December 1 for spring semester admission, and May 1 for summer session admission.

Since acceptance as a PI student does not influence acceptance to the college's graduate degree programs, PI students interested in earning a graduate degree in nursing must apply for admission to the degree program

(see Programs [p. 1809] and then "Admission" under each graduate program of study in this section of the Catalog). Students may count a maximum of 6 s.h. or two required nursing core courses that they complete as PI students toward M.S.N. requirements. Professional improvement students may not enroll in Ph.D. courses.

Continuing Education

The college offers nonacademic, short-term continuing education programs for nurses. Contact hours are awarded for these programs. The College of Nursing is an Iowa Board of Nursing approved provider of continuing education (Provider Number 1).

Student Organizations

All College of Nursing B.S.N. prelicensure students are members of the National Student Nurses Association and its local chapter, the Iowa Association of Nursing Students (IANS). The University of Iowa Association of Nursing Students (UIANS) provides opportunities for professional growth and development in nursing. UIANS representatives are members of the Undergraduate Student Government (USG).

The University of Iowa Multicultural Nursing Association (UIMNA) provides support, network opportunities for leadership and professional growth, and development for underrepresented students who are undergraduate nursing interest and nursing majors, graduate nursing students, and underrepresented nursing professionals in the region.

University of Iowa Men in Nursing (UIMiN) provides opportunities for nurses to meet, to recruit, to talk, and to influence the environment for men in nursing. It is open to all nursing students.

The college's Association of Graduate Nursing Students (AGNS) provides opportunities for professional growth, sharing of research, and representation on varied college and University committees.

See Nursing Student Organizations on the College of Nursing website.

Programs

Undergraduate Program of Study

Major

- Bachelor of Science in Nursing [p. 1820]

Graduate Programs of Study

Majors

- Master of Science in Nursing [p. 1826]
- Doctor of Nursing Practice [p. 1828]
- Doctor of Philosophy in Nursing [p. 1839]

Certificates

- Adult Gerontology Acute Care Nurse Practitioner [p. 1841]
- Adult Gerontology Primary Care Nurse Practitioner [p. 1842]
- Family Nurse Practitioner [p. 1843]
- Health Systems [p. 1844]
- Pediatric Nurse Practitioner-Acute Care [p. 1845]

- Pediatric Nurse Practitioner-Primary Care [p. 1846]
- Psychiatric/Mental Health Nurse Practitioner [p. 1847]

Facilities

The College of Nursing Building is centrally located on the University's main campus, in close proximity to the Carver College of Medicine, the College of Dentistry, the College of Pharmacy, the College of Public Health, University of Iowa Hospitals & Clinics, and the Hardin Library for the Health Sciences.

The newly renovated College of Nursing Building boasts collaborative spaces, flexible learning spaces, and state-of-art classroom technology. The renovated spaces include two 84-seat flexible classrooms, two 42-seat flexible classrooms, and an Instructional Technology Services (ITS) computer lab on the ground floor; collaboration rooms for quiet study and group learning, student commons, and graduate student space are on the first floor; five seminar seating classrooms on the third floor; and flexible conference room and office space on the fourth floor.

The Nursing Clinical Education Center (NCEC), located at University of Iowa Hospitals & Clinics (UIHC), provides hands-on simulation and laboratory experiences for both undergraduate and graduate nursing students. The center also is a training hub for the University's Department of Nursing Services and Patient Care. The NCEC houses state of the art health care simulation technology. It has multiple classrooms, a resource library, a lobby with ample seating, and gathering spaces for private meetings. The center is codirected by the College of Nursing and the UIHC Department of Nursing Services and Patient Care.

Courses

College of Nursing Courses

NURS:1020 First-Year Seminar **1 s.h.**

Introduces first-year undergraduate students to the intellectual life of the University of Iowa; provides an opportunity to work closely with a faculty member or senior administrator; seminars help students make the transition to college-level learning through active participation in their own learning.

NURS:1030 Human Development and Behavior **3 s.h.**

Normal developmental transitions experienced by individuals and family systems throughout the lifespan, including physical, cognitive, and social-emotional development. Requirements: nursing or nursing-interest major.

NURS:1800 Aging Matters: Introduction to Gerontology **3 s.h.**

Overview of the field of gerontology from a bio-psycho-social framework; how the human body and brain age, effects of these biological changes on physical and cognitive functions, and interaction of these individual factors with societal contexts; broad perspective to give students a foundation in gerontology, paving the way for more advanced courses in biology of aging, psychology of aging, and global aging; for students from a wide range of disciplines and levels, no prior knowledge of aging required. GE: Social Sciences. Same as ASP:1800, CSD:1800, SSW:1800, TR:1800.

NURS:3099 Leadership U**1-3 s.h.**

Development of leadership in nursing; application of leadership theory in practice by participating in activities such as attending professional organization meetings, acting as a delegate, writing legislation, holding a board position, or being part of a multidisciplinary or international team to organize events for community involvement. Requirements: nursing major.

NURS:3110 Healthcare Finance**3 s.h.**

Basic structure of U.S. health care system and how it is funded; tools for making decisions about available financial resources.

NURS:3128 Health Assessment and Communication Across the Lifespan**3 s.h.**

Assessment and communication skills; development and application of cognitive skills to perform systematic, holistic, and culturally competent health assessments; emphasis on application of clinical reasoning involving assessment, nursing diagnoses, interventions, and outcomes. Corequisites: NURS:3138 and NURS:3150 and NURS:3160 and NURS:3518. Requirements: admission to the College of Nursing.

NURS:3138 Nursing and Pharmacological Interventions I**5 s.h.**

First of a two-part series focusing on basic biophysical concepts that inform nursing and pharmacological interventions, including sleep, immobility, skin care, wound healing, infection, and human response to illness; selected disorders and/or diseases, including GI disease, disorders of bowel and urine elimination, diabetes, and cancer; introduction to health literacy and principles of health education. Prerequisites: CHEM:1070 and MATH:1440 and BIOL:1141 and ACB:3110 and MICR:3164 and (HHP:1300 or HHP:3500) and CHEM:1080. Corequisites: NURS:3128 and NURS:3150 and NURS:3160 and NURS:3518. Requirements: 64 s.h. of undergraduate coursework, including successful completion of required science courses and general education liberal arts and sciences requirements and electives.

NURS:3151 Introduction to Clinical Concepts for Nursing**2 s.h.**

Introduction to aspects of nursing care including physical exam, health assessment, and psychomotor nursing interventions; students practice strategies to promote safe care of patients, including calculation of medications prior to administration; emphasis on effective patient communication, education, and integration of medical terminology; application of nursing interventions, psychomotor skills, and medication dosages and calculation; health, physical, and psychosocial assessment; first of a three-part laboratory and simulation series. Corequisites: NURS:3128 and NURS:3138 and NURS:3160 and NURS:3518. Requirements: admission to College of Nursing.

NURS:3160 Professional Role I: Professionalism and Patient Safety**3 s.h.**

Introduction to inherent nursing values, history, theories, and scope of professional nursing; concepts of safety, risk identification, and clinical decision making; information technologies that promote quality and safety. Requirements: admission to the College of Nursing.

NURS:3198 Distance Education: Independent Study**1-3 s.h.**

Supervised study designed for individual undergraduate students.

NURS:3199 Independent Study**1-3 s.h.**

Supervised study designed for individual undergraduate students.

NURS:3438 Nursing and Pharmacological Interventions II**5 s.h.**

Second of a two-part series focusing on complex biophysical concepts that inform nursing and pharmacological interventions, including fluids and electrolytes, shock, and perioperative care; focus on selected disorders and/or diseases, including neurological, immune, musculoskeletal, cardiovascular, respiratory, renal, and endocrine disorders. Prerequisites: NURS:3518 and NURS:3138 and NURS:3128 and NURS:3150 and NURS:3160. Corequisites: NURS:3450 and NURS:3460 and NURS:3620 and NURS:3625.

NURS:3451 Basic Clinical Concepts for Nursing**1 s.h.**

Caring for the adult patient with diverse disease processes through experiential learning; emphasis on complex physical and psychosocial assessment, clinical reasoning, team building, interprofessional education and communication, and application of the nursing process to provide safe and effective nursing care; second of a three-part laboratory and simulation series. Prerequisites: NURS:3128 and NURS:3138 and NURS:3151 and NURS:3160 and NURS:3518. Corequisites: NURS:3438 and NURS:3460 and NURS:3615 and NURS:3620 and NURS:3625.

NURS:3460 Professional Role II: Research**3 s.h.**

Introduction to concepts and process of research in nursing; primary focus on understanding research and its foundation for nursing practice. Requirements: basic statistics. Recommendations: upper-level statistics.

NURS:3518 Pathology**3 s.h.**

Introduction to abnormal functioning of cells, tissues, organs, and systems over the human lifespan; focus on hematological, immune, neurological, musculoskeletal, cardiovascular, respiratory, renal, gastrointestinal, endocrine, and reproductive system; alterations in metabolic processes and alterations in homeostatic mechanisms impacting the internal milieu; emphasis on critical thinking. Prerequisites: (CHEM:1080 and ACB:3110 and BIOL:1141 and MICR:3164 and CHEM:1070 and (HHP:1300 or HHP:3500)) or NURS:3734. Requirements: admission to the College of Nursing.

NURS:3595 Nonprofit Organizational Effectiveness I**3 s.h.**

Operational and financial aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as ENTR:3595, MGMT:3500, MUSM:3500, RELS:3700, SSW:3500.

NURS:3600 Nonprofit Organizational Effectiveness II**3 s.h.**

Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Same as MGMT:3600, RELS:3701, SSW:3600.

NURS:3615 Adult Medical/Surgical Nursing Practicum**3 s.h.**

In-depth clinical experience; application of basic and complex concepts of nursing care for adults of all ages in a variety of settings, focus on older adults; development and application of critical thinking skills necessary to understand disease process, associated signs and symptoms; emphasis on interventions and outcomes. Prerequisites: NURS:3150 and NURS:3128 and NURS:3138 and NURS:3160 and NURS:3518. Corequisites: NURS:3438 and NURS:3450 and NURS:3460 and NURS:3620 and NURS:3625.

NURS:3620 Gerontological Nursing 3 s.h.

Nurse's role in promoting, maintaining, and restoring the health of aging adults; internal and external influences on older adults, application of nursing science to the care of older adults in diverse settings. Prerequisites: NURS:3128 and NURS:3138 and NURS:3518 and NURS:3160 and NURS:3150. Corequisites: NURS:3438 and NURS:3450 and NURS:3460 and NURS:3625.

NURS:3625 Gerontological Nursing Practicum 2 s.h.

In-depth clinical experience designed to apply basic and complex concepts of nursing care for adults of all ages in a variety of settings; focus on older adults; development and application of critical thinking skills necessary to understand disease process and the associated signs and symptoms, interventions, and outcomes. Prerequisites: NURS:3160 and NURS:3150 and NURS:3138 and NURS:3128 and NURS:3518. Corequisites: NURS:3438 and NURS:3450 and NURS:3460 and NURS:3615 and NURS:3620.

NURS:3631 Nursing Care of Children and Families 2 s.h.

Promoting, maintaining, and restoring the health of parents, infants, children, and adolescents in childbearing families; examination of nursing care of newborns, well children, and children with acute and chronic illness within the context of family and community. Prerequisites: NURS:3438 and NURS:3451 and NURS:3460 and NURS:3615 and NURS:3620 and NURS:3625. Corequisites: NURS:3632 and NURS:3635 and NURS:3640 and NURS:3645 and NURS:3651 and NURS:3660.

NURS:3632 Nursing Care of Childbearing Families 2 s.h.

Promoting, maintaining, and restoring health for women of reproductive age, childbearing families, and newborns; examination of nursing care for family planning, preconception health, prenatal care, childbirth, newborn care, and maternal and neonatal complications within the context of family and community. Prerequisites: NURS:3438 and NURS:3451 and NURS:3460 and NURS:3615 and NURS:3620 and NURS:3625. Corequisites: NURS:3631 and NURS:3635 and NURS:3640 and NURS:3645 and NURS:3651 and NURS:3660.

NURS:3635 Parent Child Nursing Practicum 2 s.h.

Application of nursing knowledge to promote, maintain, and restore health; vulnerable populations of interest including persons with mental health disorders, infants, children, adolescents, their families; processes of childbearing and childrearing within context of families. Prerequisites: NURS:3450 and NURS:3625 and NURS:3620 and NURS:3438 and NURS:3615 and NURS:3460. Corequisites: NURS:3630 and NURS:3640 and NURS:3645 and NURS:3660. Requirements: successful completion of two semesters in B.S.N. curriculum.

NURS:3640 Psychiatric/Mental Health Nursing 3 s.h.

General principles and practices of psychiatric/mental health nursing; psychiatric disorders, populations at risk, continuity of care, and problems in daily living; unique needs of diverse populations. Prerequisites: NURS:3438 and NURS:3620 and NURS:3615 and NURS:3625 and NURS:3460 and NURS:3450. Corequisites: NURS:3630 and NURS:3645 and NURS:3660.

NURS:3645 Mental Health Nursing Practicum 2 s.h.

Application of nursing knowledge to promote, maintain, and restore health; vulnerable populations of interest including persons with mental health disorders, infants, children, adolescents, their families; processes of childbearing and childrearing within context of families. Prerequisites: NURS:3625 and NURS:3438 and NURS:3620 and NURS:3450 and NURS:3615 and NURS:3460. Corequisites: NURS:3630 and NURS:3635 and NURS:3640 and NURS:3660. Requirements: successful completion of two semesters in B.S.N. curriculum.

NURS:3650 Community and Public Health Nursing 3 s.h.

Role of nursing in the relationship between community conditions and public health; emphasis on principles of public health combined with nursing knowledge and skills to address health needs of individuals, families, communities, and populations. Prerequisites: (NURS:3660 and NURS:3640 and NURS:3635 and NURS:3645 and NURS:3630) or NURS:3460. Corequisites: NURS:3655. Requirements: for pre-licensure B.S.N. student—successful completion of NURS:3620, NURS:3625, NURS:3630, NURS:3640, and NURS:3645, and concurrent enrollment in NURS:4155 and NURS:4160; for post-licensure RN-B.S.N. student—successful completion of NURS:4160, 6 s.h. of required nursing elective courses, and completion of general education electives.

NURS:3651 Advanced Clinical Concepts for Nursing 1 s.h.

Advanced and specialty nursing skills; focus on pediatric and obstetric simulation as well as advanced, medical-surgical skills; opportunity for ongoing development of essential clinical skills including team communication, clinical reasoning, patient safety, evidence-based practice, incorporation of the nursing process, patient education, and nursing care across the lifespan; third of a three-part laboratory and simulation series. Prerequisites: NURS:3438 and NURS:3451 and NURS:3460 and NURS:3615 and NURS:3620 and NURS:3625. Corequisites: NURS:3631 and NURS:3632 and NURS:3635 and NURS:3640 and NURS:3645 and NURS:3660.

NURS:3655 Community and Public Health Nursing Practicum 2 s.h.

Learning opportunities to apply principles of public health with nursing knowledge and skills to address health promotion, disease and injury prevention, and nursing management of infectious disease and chronic health conditions; nursing activities focus on improvement of health outcomes at individual, family, community, and global levels within the context of population-focused practice. Prerequisites: (NURS:3645 and NURS:3635 and NURS:3640 and NURS:3630 and NURS:3660) or NURS:3460. Corequisites: NURS:3650. Requirements: for pre-licensure B.S.N. student—successful completion of NURS:3625 and NURS:3645, and concurrent enrollment in NURS:4155 and NURS:4160; for post-licensure RN-B.S.N. student—successful completion of NURS:3110 and NURS:3160 and NURS:3460 and NURS:3518 and NURS:3660 and NURS:3734 and NURS:4160, 6 s.h. of required nursing electives, completion of general education electives, RN licensure in state of practicum, and concurrent enrollment in NURS:3734, if not taken as a prerequisite.

NURS:3660 Professional Role III: Improving Health Systems 2-3 s.h.

Legal and regulatory processes that impact health care, how disparities influence health care, and evidence-based approaches for improving quality of care; strategies for working effectively in intra and interdisciplinary teams; integration of a culture of safety. Prerequisites: (NURS:3450 and NURS:3615 and NURS:3625 and NURS:3620 and NURS:3460 and NURS:3438) or (NURS:3160 and NURS:3460).

NURS:3712 Human Sexuality, Diversity, and Society**1-3 s.h.**

Introduction to human sexuality from a biopsychosocial, sex-positive perspective; sexuality as a normal and essential component of human existence and expression throughout the life span; influence of gender, class, religion, race, ethnicity, sexual orientation, ability status, age, and culture on sexuality interwoven and highlighted; diversity of perspectives and experiences shared through active participation and respectful dialogue. Same as SSW:3712.

NURS:3728 Quality Improvement and Patient Safety**2 s.h.**

Students work with faculty and staff involved in quality improvement and patient safety (QI/PS) at University of Iowa Hospitals & Clinics (UIHC); readings, didactic sessions, and hands-on activities to advance knowledge and practice of QI/PS in health care; activities include review of ongoing QI/PS projects at UIHC, application of QI/PS methodologies to project development and analysis, individual and team-based simulations, interdisciplinary collaboration and communication, participating in conferences related to QI/PS, and reflecting on these experiences with peers. Same as MED:8410.

NURS:3732 Global Health Nursing**3 s.h.**

Complexity of health and nursing in a global context; overview of biological, social, epigenetic, and environmental contributors to health and diseases in populations around the world and nursing's role in improving health; includes case studies of various global organizational and educational structures and systems relative to population health, selected infectious diseases, nutritional deficiencies, and health effects of environmental change. Same as GHS:3732.

NURS:3734 Introduction to Human Genetics**3 s.h.**

Introduction to organization of the human genome and basic principles of inheritance in humans; cells and development, chromosome structure and function, gene structure and function, genes in pedigrees and populations, implications of genetic variation on health.

NURS:3736 Legal Issues for Health Care Providers**3 s.h.**

Legal issues faced by health care providers, counselors, and social services providers; administrative and regulatory requirements, civil lawsuits, issues that affect students as providers, advocates, and individuals.

NURS:3737 Care of the Patient in Pain**3 s.h.**

Foundational and advanced content in the area of pain management across populations, the lifespan, and settings of care; content and learning focus on core competencies for pain management recommended of all health care professionals; emphasis on development of interdisciplinary team, including nurses, as an advocate for quality and safe pain management; content areas include type of pain, pain therapies, assessment and measurement, treatment, self-management, evaluation/monitoring, disparities, and bioethics; no clinical component. Requirements: upper-division standing. Recommendations: pharmacology and pathophysiology.

NURS:3739 Women and Their Bodies in Health and Illness**3 s.h.**

Basic facts about structure and functioning of female body; particular attention to adjustments the body makes during normal physiological events (menstruation, sexuality, reproduction, menopause) and during illness processes; women's mental and physical health issues in relation to women's lives and roles in society; relationship of women as consumers, practitioners, and activists to health system; achievements and limitations of women's health movements; anti-oppression, intersectionalities, and cross-cultural perspectives. Same as GWSS:3177.

NURS:3740 End-of-Life Care for Adults and Families**3 s.h.**

End-of-life issues in care of adults, older adults, and their families. Same as ASP:3740, MED:3740, PHAR:3740.

NURS:3741 Nurse Residency Role Transition Seminar**3 s.h.**

New graduate nurses entering practice are enrolled in transition-to-practice programs focused on integration of knowledge, skills, and professional behaviors necessary to provide safe, quality care; associate degree nurses evaluate how they achieved mastery of core knowledge and competencies and discuss Commission on Collegiate Nursing Education (CCNE) Entry-to-Practice Competencies; students examine transition-to-practice experience and document ways in which knowledge, skills, and attitudes are impacted and improved; engage in group discussion and reflective writing assignments to evaluate professional growth during transition-to-practice. Requirements: associate degree nurse graduate currently enrolled in or recent completion of a nurse residency program accredited by Commission on Collegiate Nursing Education (CCNE) or UI online nurse residency program (nurse residency program completed within two years or current enrollment with completion in a minimum of five months).

NURS:3742 Selected Topics in Nursing**1-2 s.h.**

In-depth study of topics in professional nursing practice and health care; workshop format.

NURS:3743 Perioperative Nursing**3 s.h.**

Patient assessments, nursing interventions, and patient responses for individuals undergoing surgical procedures; emphasis on phases of perioperative care including preoperative assessment, patient education, intraoperative care, and post-anesthesia care. Prerequisites: NURS:3615. Requirements: prerequisite course or RN licensure.

NURS:3744 Critical Care Nursing**3 s.h.**

Provides nursing students with the knowledge required to safely and competently care for critically ill or injured patients; builds upon foundational courses in medical/surgical acute care. Prerequisites: NURS:3615. Requirements: prerequisite course or RN licensure.

NURS:4096 Distance Education: Honors Independent Study**3 s.h.**

Building on honors seminar, students implement the project they designed in the seminar with guidance from the student's contracted honors faculty mentor; honors project is expected to apply current professional evidence and result in a rigorous scholarly product; the specific type of product is negotiated with honors faculty mentor; while a minimum of 90 hours is required for honors project, honors faculty mentor and student work together to determine the specific schedule commitments. Prerequisites: NURS:4098.

- NURS:4098 Honors Seminar** 1 s.h.
Crafting a meaningful honors project; structured steps for development of a project idea, measurable learning objectives, GANTT chart timeline, beginning literature review related to the independent study subject; identification/ completion of organizational requirements such as approval processes, access to electronic systems, and training.
- NURS:4099 Honors Independent Study** 3 s.h.
Building on honors seminar, students implement the project they designed in the seminar with guidance from the student's contracted honors faculty mentor; honors project is expected to apply current professional evidence and result in a rigorous scholarly product; specific type of product negotiated with honors faculty mentor; while a minimum of 90 hours is required for honors project, honors faculty mentor and student work together to determine specific schedule commitments. Prerequisites: NURS:4098.
- NURS:4155 Senior Nursing Internship** 5 s.h.
Immersion capstone experience to engage in practice under direct supervision of a professional registered nurse mentor; design, provide, coordinate, and evaluate care; work with teams to deliver evidence-based care; improve quality, patient safety, and outcomes. Prerequisites: NURS:3640 and NURS:3660 and NURS:3635 and NURS:3630 and NURS:3645. Corequisites: NURS:3650 and NURS:3655 and NURS:4160.
- NURS:4160 Professional Role IV: Leadership and Professional Engagement** 3,5 s.h.
Concepts of leadership, followership, management, informatics, and professional engagement; quality improvement strategies and skills; professional development, career trajectory, and role transitions. Prerequisites: (NURS:3660 and NURS:3645 and NURS:3635 and NURS:3630 and NURS:3640) or (NURS:3460 and NURS:3160 and NURS:3660). Corequisites: NURS:3660, if not taken as a prerequisite.
- NURS:4170 Baccalaureate Seminar** 1 s.h.
Examination of didactic and clinical learning experiences; documentation of changes in knowledge, skills, and attitudes to demonstrate achievement of relevant competencies; group discussion and reflective writing assignments to evaluate professional growth that has occurred during the B.S.N. program.
- NURS:5002 Leadership and Management Essentials** 3 s.h.
Roles and strategies for leading and managing others in health care environments to influence health care delivery and provide a healthy, innovative working environment; focus on selected leadership and organizational concepts essential to leaders in health care.
- NURS:5007 Applied Epidemiology** 3 s.h.
Introduction to basic principles and methods of epidemiology and demonstration of applicability in field of nursing and nursing research; topics include historical perspectives of epidemiology, epidemiological models of health and disease, measures of disease occurrence and association, disease screening, causal inference, study design and application of epidemiological approaches to clinical practice, program planning and evaluation.
- NURS:5009 Evaluating Evidence for Practice** 3 s.h.
Opportunity for clinicians to develop proficiency in use of research- and evidence-based practice; essentials of the research process, qualitative and quantitative research, components of evidence-based practice; acquisition of knowledge and skills necessary for research (knowledge) utilization initiatives and application of evidence-based practice principles in clinical settings; identification of appropriate research questions, synthesis of knowledge base for evidence-based practice, revision of clinical practice guidelines, and evaluation of research utilization and evidence-based practice initiatives.
- NURS:5010 Clinical Data Management and Evaluation** 3 s.h.
Clinical data management essential for evaluating evidence-based practice/performance improvement projects; a high caliber data management plan will provide key stakeholders with information necessary to make decisions and includes components of identified processes and outcomes linked to variables and data sources, adequate statistical power, data cleaning and manipulation techniques, statistical methods, and a meaningful presentation of variables that addresses the concerns and questions of key stakeholders; knowledge and skills necessary to develop and execute data management plan for final project. Prerequisites: NURS:5009. Requirements: master's or doctoral standing.
- NURS:5015 Health Systems, Finance, and Economics** 3 s.h.
Global, economic, organizational, legal, political, and technological contexts in advanced nursing practice; knowledge and skills necessary for understanding the evolution of health services organizations, financing of health care, and relationships among socioeconomic systems influencing health care and nursing practice; impact of macrosystems on distribution, acquisition, and use of financial and economic principles in delivery of health care services. Prerequisites: NURS:5002.
- NURS:5016 Health Care Infrastructure and Informatics** 3 s.h.
Health care infrastructure with a focus on the United States; role of information and technology in its development and implementation; role of data sets, information technology, and emerging technologies in supporting providers in managing patient care and population health of vulnerable groups. Prerequisites: NURS:5002 and NURS:5015.
- NURS:5017 Quality and Safety** 3 s.h.
Foundation for understanding concepts of safety and quality across health care settings; focus on providing a safe environment, elevating staff performance and clinical outcomes related to safety and quality, and methods for continuous improvement.
- NURS:5018 Clinical Education in the Care Environment** 3 s.h.
Preparation to assume role of educator with individuals, groups, and communities, including staff and students; teaching/learning process for providing client education; knowledge and skills needed to effectively fill role of preceptor/mentor.

NURS:5019 Role Development: Educator in a Practice Discipline **3 s.h.**

Becoming an educator in a practice discipline; unique knowledge, skills, approaches to didactic and clinical teaching; overview of curriculum development process that affects revision/development; faculty role in curriculum development and evaluation; knowledge and skills to create a learner-centered environment for professional students; key facilitation and evaluation strategies; application of concepts during field experience working directly with experienced faculty.

NURS:5020 Application of Educator Role Competencies **1-3 s.h.**

Individually designed activities to strengthen performance as an educator in a practice discipline; meet with experienced instructor to develop specific objectives and related activities to be completed during a 45-hour field experience. Prerequisites: NURS:5019.

NURS:5021 Physiology, Pathophysiology, and Pharmacology I for the Clinical Nurse Leader **3 s.h.**

Basic scientific concepts required for B.S.N. and clinical nursing experience; matches physiology and pathophysiology with pharmacological treatments as combined core elements; focus on regulation of cellular, organ, and system functions; regulation of internal milieu; functional interrelationships among body systems; cellular and body-wide defense mechanisms; synthesis of information related to pathophysiological phenomena; pharmacokinetic and pharmacodynamics principles essential for general practice; specific drug classes used in management of clinical conditions. Two semesters.

NURS:5022 Physiology, Pathophysiology, and Pharmacology II for the Clinical Nurse Leader **3 s.h.**

Basic scientific concepts required for B.S.N. and clinical nursing experience; matches physiology and pathophysiology with pharmacological treatments as combined core elements; focus on regulation of cellular, organ, and system functions; regulation of internal milieu; functional interrelationships among body systems; cellular and body-wide defense mechanisms; synthesis of information related to pathophysiological phenomena; pharmacokinetic and pharmacodynamics principles essential for general practice; specific drug classes used in management of clinical conditions. Two semesters. Prerequisites: NURS:5021.

NURS:5023 Pathophysiology for Advanced Clinical Practice **4 s.h.**

In-depth study of pathophysiologic processes across the lifespan; emphasis on dysregulation of cellular, organ, and system functions; clinical manifestations of common disease states; resultant physiological responses to internal milieu; interrelationships among body system; cellular and body-wide defense mechanisms; synthesis of evidence-based information from a variety of sources related to selected pathophysiological phenomena. Requirements: graduate-level physiology course.

NURS:5031 Health Promotion and Assessment for Advanced Clinical Practice **3-4 s.h.**

Emphasis on health promotion and advanced health assessment; didactic and clinical laboratory instruction allows students to develop and demonstrate mastery of advanced knowledge and skills in health assessment; content related to promotion of health and prevention of disease; focus on application of content with individuals within the student's respective population-based scope of practice. Requirements: admission to post-B.S.N. D.N.P. program.

NURS:5032 Mental Disorders in Advanced Practice **3 s.h.**

Foundation for advanced practice nurse to provide care for common mental health disorders; presentation of neurophysiological, genomic, environmental/social, and developmental theories to understand etiology and presentation of common mental health conditions; psychopharmacological and nonpharmacological principles and modalities for treatment of common mental health problems.

NURS:5033 Pharmacotherapeutics for Advanced Practice Nursing **3 s.h.**

Examination of pharmacotherapeutic principles essential for advanced clinical practice nursing and prescribing; specific drug classes frequently used in management of clinical conditions experienced by various patient populations; legal considerations related to prescriptive authority and prescribing patterns. Prerequisites: NURS:5023.

NURS:5035 Graduate Pharmacology Specialty **3 s.h.**

Principles of pharmacology learned in NURS:5033; principles and practices necessary for safe prescribing and medication management of a specialty population (e.g., pediatrics, geriatrics, acute care, mental health). Prerequisites: NURS:5033.

NURS:5036 Psychopharmacology for Advanced Clinical Practice **3 s.h.**

Scientific knowledge of psychopharmacology and its application to treatment of clients with psychiatric disorders across the lifespan; advanced concepts in neuroscience, neurobiology of mental disorders, pharmacokinetics and pharmacodynamics of psychotherapeutic medications in the management of targeted symptoms of psychiatric disorders in clients across the lifespan. Prerequisites: NURS:5023 and NURS:5033.

NURS:5037 Health Promotion and Assessment for Clinical Nurse Leaders **3-4 s.h.**

Emphasis on health promotion and advanced health assessment; didactic and clinical laboratory instruction allows students to develop and demonstrate mastery of advanced knowledge and skills in health assessment; content related to promotion of health and prevention of disease; focus on application of course content with individuals across the lifespan. Requirements: admission to M.S.N.-CNL program.

NURS:5038 Advanced Diagnostic and Therapeutic Procedures for Acute Care **1 s.h.**

Introduction to use of advanced diagnostic and therapeutic techniques commonly encountered in acute and critical care; students are provided opportunities to interpret and incorporate technologically derived data; discussion of practices to protect patients, such as informed consent, risk benefit analysis, infection control, and pain management; laboratory experiences allow students to practice techniques used to perform invasive procedures. Prerequisites: NURS:5023 and NURS:5031 and NURS:5033. Requirements: graduate-level physiology course.

NURS:5039 Advanced Diagnostic and Therapeutic Procedures for Primary Care 1 s.h.

Introduction to use of advanced diagnostic and therapeutic techniques commonly encountered in primary care; selected laboratory experiences designed to enhance familiarity with use of technologies and interpretation of technologically derived data; discussion of practices used to protect patients (e.g., informed consent, risk benefit analysis, infection control, pain management). Prerequisites: NURS:5023 and NURS:5031 and NURS:5033. Requirements: graduate-level physiology course.

NURS:5040 Genetics/Genomics for Advanced Nursing Practice 2 s.h.

Essential content for understanding the role genetics/genomics plays in health and disease; focus on the core competencies of American Nurses Association (ANA), which provides a framework for advanced nursing practice preparation to incorporate genetics/genomics knowledge for development of prevention, diagnosis, and treatment options in order to optimize health outcomes relevant to clinical role and specialty. Requirements: master's or doctoral standing.

NURS:5041 Psychotherapeutics for Advanced Practice Nursing Across the Lifespan 3 s.h.

Scientific knowledge of psychotherapies and its application to treatment of clients with psychiatric disorders across the lifespan; focus on advanced concepts of effective communication and utilizing evidenced-based psychotherapy theories in the management of targeted symptoms of psychiatric disorders in clients across the lifespan. Prerequisites: NURS:5036.

NURS:5401 The Care of the Frail Elderly 3 s.h.

Clinical management of the elderly; emphasis on economic considerations, principles of gerontological care, common syndromes, ethical issues; clinical application experience in a long-term care setting. Prerequisites: NURS:5035. Corequisites: NURS:6200 and NURS:6701. Same as ASP:5401.

NURS:5636 Clinical Nurse Leader Seminar 2-3 s.h.

Evolution of clinical nurse leader (CNL) role, eight core role functions, and the process of integration of CNL role into health care system. Requirements: admission to M.S.N.-CNL program.

NURS:5666 Leadership in the Microsystem 3 s.h.

Assessment of the microsystem of practice, clinical nurse leader role as leader embedded in a microsystem, and identification of opportunities to enhance care delivery in the microsystem.

NURS:5696 Clinical Nurse Leader Capstone Clinical Immersion 6 s.h.

Intensive immersion in role and practice expectations of the clinical nurse leader (CNL); experienced leaders within the microsystem, who are experts in the provision of clinical services at the point of care/services, serve as mentors. Requirements: enrollment in final semester of M.S.N.-CNL program.

NURS:5800 Independent Study arr.

Supervised study and/or clinical practice adjusted to needs of master's degree students.

NURS:5801 Master's Project 2-3 s.h.

Opportunity for in-depth analysis and synthesis of a chosen topic that contributes to some aspect of nursing practice.

NURS:5802 Master's Portfolio 0 s.h.

Opportunity for clear and cohesive synthesis of clinical or professional experiences and competencies, including those gained in graduate study, that portray students' clinical or professional strengths and career goals.

NURS:5803 Distance Education: Master's Independent Study arr.

Supervised study and/or clinical practice adjusted to needs of master's degree students.

NURS:5804 Distance Education: Master's Portfolio 0 s.h.

Clear and cohesive synthesis of clinical or professional experiences and competencies, including those gained in graduate study; students' clinical or professional strengths and career goals.

NURS:5806 Distance Education: Master's Project 2-3 s.h.

In-depth analysis and synthesis of a chosen topic that contributes to some aspect of nursing practice.

NURS:6000 Human Anatomy for Advanced Practice 3 s.h.

Integrated study of interrelationships between anatomic structure and physiological function in health and disease at various points in the lifespan; mechanisms governing and supporting cellular, organ, and system function; internal milieu; relationship of study to clinical assessment of functional integrity of individual organ systems utilizing pertinent objective and subjective data; implications of pathophysiology for anesthesia and implications of anesthesia for pathophysiology; foundation for clinical practicums and courses in nurse anesthesia. Requirements: completion of an undergraduate human anatomy and physiology course and admission to anesthesia nursing program. Same as ACB:6000.

NURS:6004 Scientific Principles for Anesthesia Practice 4 s.h.

Applicable chemical and physical properties of molecules important in anesthesia; technological principles and equipment used to safely deliver those molecules to patients and monitor patients during anesthesia; topics include basic chemical and physical calculations, properties of substances in solution, measurement, behavior of gases and other fluids, effects of heat transfer, and the specific chemistry of inhaled and intravenous anesthetics and adjuvant drugs. Corequisites: NURS:6006. Same as ANES:6004.

NURS:6006 Pharmacology of Anesthesia Practice 3 s.h.

Builds on content from foundational graduate pharmacology course; focus on safe prescribing, administration, and management of medications used to provide general, regional, or local anesthesia and analgesia for all patient populations across lifespan undergoing varied surgical, obstetrical, or other procedures in any health care setting. Prerequisites: PCOL:6204 with a minimum grade of B-. Requirements: enrollment in anesthesia nursing program. Same as ANES:6006.

NURS:6007 Basic Principles of Anesthesia Practice**5 s.h.**

Overview and integration of anesthetic agents and techniques; patient assessment, preoperative airway evaluation, anesthetic planning, principles of fluid management, and arterial blood gas interpretation; principles of general and regional anesthesia and techniques as they pertain to each surgical specialty; Occupational, Safety and Health Administration (OSHA), The Joint Commission (TJC), and institutional regulations and requirements pertinent to anesthesia practice. Prerequisites: NURS:6004 with a minimum grade of B- and NURS:6006 with a minimum grade of B-. Same as ANES:6007.

NURS:6010 Advanced Principles of Anesthesia Practice I**4 s.h.**

Special needs and intraoperative anesthetic management of complex patient populations and those with advanced pathologic states; anesthetic techniques for specific surgical subspecialties including pediatrics, obstetrics, neurosurgery, cardiac, vascular, thoracic, transplant, trauma, EENT, dental, and aesthetic or reconstructive procedures; pertinent pathophysiology and anesthetic monitoring and management techniques; clinical case conferences provide opportunities to discuss perianesthetic complications and challenges. Prerequisites: NURS:6007 with a minimum grade of B- or ANES:6007 with a minimum grade of B-. Same as ANES:6010.

NURS:6012 Advanced Principles of Anesthesia Practice II**1 s.h.**

Acute and chronic pain treatment modalities for all patients presenting for a variety of medical or surgical procedures across the lifespan. Prerequisites: NURS:6007 with a minimum grade of B- or ANES:6007 with a minimum grade of B-. Same as ANES:6012.

NURS:6050 Introductory Clinical Anesthesia**2 s.h.**

Initial mentorship in clinical anesthesia; development of basic clinical skills needed for a career as nurse anesthetist; application and integration of theoretical knowledge in clinical setting. Prerequisites: NURS:6004 and NURS:6006. Corequisites: NURS:6007. Same as ANES:6050.

NURS:6051 Clinical Anesthesia I**2 s.h.**

Mentored clinical anesthesia experience; advancement and enhancement of clinical skills in providing anesthesia for various surgical subspecialties including general, orthopedic, pediatric, geriatric, gynecologic, urologic, dental, EENT, ambulatory surgery, and invasive diagnostic procedures. Prerequisites: NURS:6050 or ANES:6050. Corequisites: NURS:6010. Same as ANES:6051.

NURS:6052 Clinical Anesthesia II**2 s.h.**

Additional mentored clinical anesthesia experience; advancement and enhancement of clinical skills in providing anesthesia for various surgical subspecialties including general, orthopedic, pediatric, geriatric, gynecologic, urologic, dental, EENT, ambulatory surgery, and invasive diagnostic procedures. Prerequisites: NURS:6051 or ANES:6051. Same as ANES:6052.

NURS:6053 Advanced Clinical Anesthesia**2 s.h.**

Mentored clinical anesthesia at selected sites; development of advanced clinical skills and critical thinking by providing anesthesia for all surgical specialties and invasive diagnostic procedures in all anesthetizing locations; providing anesthesia for all patients in all settings, including on call emergency surgeries. Prerequisites: NURS:6052. Same as ANES:6053.

NURS:6054 Obstetrical Anesthesia**2 s.h.**

Experience delivering analgesia and anesthesia for parturients during labor and delivery process. Prerequisites: NURS:6052. Same as ANES:6054.

NURS:6055 Rural Anesthesia**2 s.h.**

Opportunity to develop experience providing anesthesia and associated health care services at UI-affiliated clinical sites in rural settings. Prerequisites: NURS:6052. Same as ANES:6055.

NURS:6100 Primary Care: Infants, Children, and Adolescents I**3 s.h.**

Enhancement of clinical knowledge and skills for infant, child, adolescent care. Prerequisites: NURS:5035. Corequisites: NURS:6701.

NURS:6101 Primary Care: Infants, Children, and Adolescents II**3 s.h.**

Enhancement of clinical knowledge and skills for infant, child, adolescent care; development and refinement of knowledge and skills in primary health care delivery. Prerequisites: NURS:6100. Corequisites: NURS:6702. Same as PEDS:6101.

NURS:6104 Essentials of Pediatric Primary Care: Infants, Children, and Adolescents**3 s.h.**

Builds on prior graduate coursework to enhance foundational knowledge and skills in infant, child, and adolescent population; application of essential concepts of pediatric primary care to identify, diagnose, and manage health issues; emphasis on concepts (e.g., growth and development, anticipatory guidance, common pediatric health concerns) managed in ambulatory health care systems. Prerequisites: NURS:5031. Corequisites: NURS:5035.

NURS:6200 Primary Care: Adults and Older Individuals I**3 s.h.**

Pathophysiologic alterations and clinical management of associated health care problems in adults, the elderly. Prerequisites: NURS:5035. Corequisites: NURS:6701.

NURS:6201 Primary Care: Adults and Older Individuals II**3 s.h.**

Continuation of NURS:6200. Prerequisites: NURS:6200. Corequisites: NURS:6702.

NURS:6400 Pediatric Acute Care I**3 s.h.**

First of two courses exploring management of complex acute, critical, and chronically ill patients with urgent and emergent conditions; focus on alterations in pathophysiology, advanced assessment, diagnosis, and collaborative management of infants, children and adolescents with selected episodic/chronic health problems in acute/critical care. Prerequisites: NURS:5035. Corequisites: NURS:6701.

NURS:6401 Pediatric Acute Care II**3 s.h.**

Second of two courses exploring management of complex acute, critical, and chronically ill patients with urgent and emergent conditions; focus on alterations in pathophysiology, advanced assessment, diagnosis, and collaborative management of infants, children and adolescents with selected episodic/chronic health problems in acute/critical care. Prerequisites: NURS:6400. Corequisites: NURS:6702.

NURS:6410 Adult-Gerontology Acute Care I**3 s.h.**

First of two courses exploring management of complex acute, critical, and chronically ill patients with urgent and emergent conditions; focus on alterations in pathophysiology, advanced assessment, diagnosis, and collaborative management of adults and older adults with selected episodic/chronic health problems in acute/critical care. Prerequisites: NURS:5035. Corequisites: NURS:6701.

NURS:6411 Adult-Gerontology Acute Care II 3 s.h.

Second of two courses building on prior acute care content and focusing on critical, complex, and end of life care; emphasis on evidence-based strategies to stabilize patient's condition, assessment of risk for and prevention of complications, restoration and maintenance of optimal health and functioning, and/or provision of palliative care in context of patient's physical and psychosocial environment. Prerequisites: NURS:6410. Corequisites: NURS:6702.

NURS:6500 Psychiatric/Mental Health Nursing for Advanced Practice Didactic I 3 s.h.

Introduction to psychological principles and theories as they relate to mental health across the lifespan, intersections between physical and mental health, and role of advanced practice nurse in psychiatric/mental health care; examination of psychological theory within a life span developmental framework from infancy to older adult; introduction to role of cultural diversity in mental health; emphasis on assessment, diagnosis, and management of mental disorders that are common in adults. Prerequisites: NURS:5032 and NURS:5036. Corequisites: NURS:6701.

NURS:6501 Psychiatric/Mental Health Nursing for Advanced Practice Didactic II 3 s.h.

Builds on prior lifespan content with specific focus on selected populations, families, and groups; students further define and expand their practice of psychiatric/mental health nursing based on the integration of theory, standardized languages, and research; exploration of a variety of approaches and issues of service delivery; emphasis on methods and skills for completing a comprehensive mental health assessment and managing common psychiatric illness in childhood/adolescence and late life. Prerequisites: NURS:6500. Corequisites: NURS:6702.

NURS:6550 Executive Leadership and Management 3-4 s.h.

Leadership and management concepts and theories; application to roles unique to executive nurse leader in health care organizations in institutional and community settings; emphasis on executive leadership roles for facilitating, integrating, and coordinating complex structures, processes, and outcomes in health care systems.

NURS:6551 Financial Management 3-4 s.h.

Preparation for nurse leaders and practitioners to use techniques for financial analysis and decision making for patient care programs across the health care continuum; focus on efficient and effective management of resources for delivery of quality health care services.

NURS:6552 Managing Care in an Organizational Environment 3-4 s.h.

Manage operations of patient care services across health care continuum within the framework of an established health care organization; focus on efficient and effective management of the structure, governance, patient care delivery system of care, and outcomes of care.

NURS:6553 Seminar on Innovations 4 s.h.

Strategizing about taking meaningful action, disrupting stable processes, diffusing innovation, and sustaining change; emerging innovations in nursing and health care systems that impact the functions and responsibilities of nurse leaders.

NURS:6554 Seminar on Healthy Work Environments 3 s.h.

Application of leadership and management knowledge specific to creating and sustaining healthy work environments in health care; current and emerging issues focused on health care work environments.

NURS:6555 Care Coordination Across Professional and Organizational Boundaries 3-4 s.h.

Structures, processes, concepts, tools and experience that leads to effective coordination of patient care, case and population health management as well as information, management and financial systems supporting care coordination; knowledge and skills for understanding structures, processes, challenges, solutions and innovations in coordinating patient care across professional disciplines and organizational boundaries; impacts of care coordination issues on patient experience, care quality and costs; evaluate interventions for informed and effective care processes in field experience.

NURS:6556 Marketing and Communications for Health Care Leaders 3 s.h.

Preparation to strategically plan, establish, and manage a customer-centric marketing strategy; focus on marketing frameworks and theories, and development of a strategic marketing approach with appropriate leadership strategy and positioning to ensure customer value; health care leaders' role in the marketing mix, mobilization of partners, crisis management, and crisis communication planning and response skills.

NURS:6557 Clinical Practice Management and Leadership for Advanced Practice Providers 3-4 s.h.

Overview of key aspects for health care provider leadership in clinical practice management and health care enterprise; advanced practice providers are expected to deliver health care services, lead to deliver value, achieve maximum reimbursement, and meet the Institute for Healthcare Improvement's quadruple aims; focus on value management, revenue cycle management, professional leadership, provider leadership, and clinical practice management; students read, discuss, explore, critique, and practice skills related to course topics.

NURS:6701 Advanced Practice Clinical Practicum I 3-4 s.h.

Application of advanced physical assessment, pathophysiology, and diagnostic reasoning in a clinical setting appropriate to a specific population. Prerequisites: NURS:5035 or NURS:5036. Corequisites: NURS:6100 or NURS:6400 or NURS:6410 or NURS:6500 or (NURS:5401 and NURS:6200) or (NURS:6100 and NURS:6200).

NURS:6702 Advanced Practice Clinical Practicum II 3-4 s.h.

Continuation of NURS:6701; emphasis on diagnostic reasoning and formulation of treatment plans. Prerequisites: NURS:6701. Corequisites: NURS:6101 or NURS:6201 or NURS:6401 or NURS:6411 or NURS:6501 or (NURS:6101 and NURS:6201).

NURS:6703 Advanced Practice Clinical Practicum III 3-4 s.h.

Synthesis of role expectations for advanced practice with focus on clinical competencies appropriate to the specialization. Prerequisites: NURS:6702.

NURS:6704 Practicum in Executive Leadership and Management 4 s.h.

Immersion experience in application of principles and methods of leadership, management, and evaluation to facilitate health care operations in various settings; student collaboration with a preceptor for mentored in-depth immersion in systems practice.

NURS:6802 Health Policy, Law, and Advocacy 3 s.h.

Issues that shape health care economics and policy development; framework for understanding work of legislators and other policy makers; emphasis on state and national level; health issues in developing countries; health care system, its economics, financing, role of government, not-for-profit entities, and nongovernmental organizations.

NURS:6808 Population Health for Advanced Practice 3 s.h.

Coordination and integration of care delivery for population health and clinical effectiveness across the continuum of care; management of optimized outcomes; emphasis on informatics infrastructure and translation of evidence-based practice to managing care provision and achieving desired outcomes as a result of care provision.

NURS:6809 Advanced Practice Role I: Introduction 2-3 s.h.

Introduction to competencies necessary for advanced nursing practice at the doctoral level; introduction to topics related to knowledge, skills, and abilities that enable doctorate of nursing practice graduates to function as leaders in a health care and nursing practice; topics may include advanced nursing practice role development, communication, collaboration, leadership, ethics, finance, organizational structure, and scope of practice and regulatory issues; first in a two-course sequence. Requirements: doctoral standing.

NURS:6810 Advanced Practice Role II: Integration 2-3 s.h.

Focus on transition to leadership roles that nurses prepared with a Doctor of Nursing Practice degree are expected to fill in practice; students are called upon to demonstrate synthesis of content from previous D.N.P. program courses; discussion of topics pertinent to advanced roles in nursing practice including challenges and opportunities, leadership in health systems and the profession, interprofessional communication and collaboration, conflict management, dissemination of evidence and expertise to improve health care, advocacy and ethical decision making. Prerequisites: NURS:6809.

NURS:6811 Social Determinants of Health and Health System Inequities 3 s.h.

Social determinants of health outcomes and inequities; social and economic forces that shape them using various perspectives and lenses; conceptualization and measurement of variables representing risk and inequities that serve as the organizing framework for course discussions, including individual and social factors; critical analysis of research studies for social bias.

NURS:6826 Doctor of Nursing Practice Project I 2 s.h.

Identification and analysis of a practice, system, or policy problem related to advanced nursing practice; development of an evidence-based proposal to improve outcomes for a group, population, or community; project will reflect student's independent scholarship and includes 370 minimum cumulative hours in the Doctor of Nursing Practice project series; first in a four-course sequence. Requirements: doctoral standing.

NURS:6827 Doctor of Nursing Practice Project II 1-2 s.h.

Students obtain project site approvals, complete human subjects review, begin implementation once approved, and prepare for project evaluation; project will reflect student's independent scholarship; Doctor of Nursing Practice project series; second in a four-course sequence. Prerequisites: NURS:6826. Requirements: doctoral standing.

NURS:6828 Doctor of Nursing Practice Project III 1-2 s.h.

Students continue implementation, begin to evaluate outcomes of their chosen project, and prepare a rough draft of documents for defense of the project; project will reflect the student's independent scholarship; Doctor of Nursing Practice project series; third in a four-course sequence. Prerequisites: NURS:6827. Requirements: doctoral standing.

NURS:6829 Doctor of Nursing Practice Project IV 1-2 s.h.

Students finish evaluation; prepare and defend their project to faculty, peers, and the community; and give a final report to the project site; project will reflect student's independent scholarship; Doctor of Nursing Practice project series; fourth in a four-course sequence. Prerequisites: NURS:6828. Requirements: doctoral standing.

NURS:6900 Computational Intelligence 3 s.h.

Concepts, models, algorithms, and tools for development of intelligent systems; data mining, expert systems, neural networks for engineering, medical and systems applications. Prerequisites: ISE:3700. Same as ISE:6350.

NURS:7000 Philosophy and Sociology of Nursing Science 3 s.h.

Introduction to philosophical, historical, and sociological underpinnings of contemporary science and traces history of nursing as scientific and applied discipline; exploration of the nature of knowledge, different ways of knowing, history of science, various philosophical approaches, goals of knowledge generation; analysis of sociology of science to identify the norms, cultural and political influences, differences among scientific disciplines; emphasis on interdisciplinary science; identification of concepts and conceptual definitions, especially as these differ across disciplines. Requirements: Ph.D. standing.

NURS:7001 Qualitative Research 4 s.h.

Provides a foundation in the design of qualitative and mixed methods research and analysis of qualitative and mixed methods data; emphasis on interactions among research purpose, question, aims, and interaction of that triad with sampling, setting, data collection, and analysis; using interpretive description as an exemplar, students design and conduct a small qualitative study relevant to their own interests; College of Nursing faculty present overviews of methods in which they have expertise, such as feminist research, ethnography, and narrative. Prerequisites: NURS:7000 and NURS:7002 and NURS:7006. Requirements: Ph.D. standing.

NURS:7002 Designing Research 3 s.h.

Introduction to designing research studies; identifying a problem and determining overall goal of the study; research goal subsequently leading to purpose, specific aims, and choice of a specific design; focus on issues related to maintaining continuity throughout the design of a study. Prerequisites: NURS:7000 and NURS:7006. Requirements: Ph.D. standing.

NURS:7003 Quantitative Research 4 s.h.

Refinement of student's understanding of the application of scientific logic; discussion of various quantitative methods; sampling theory and approaches to sample selection, recruitment, and methods to avoid bias; issues related to study validity, intervention development and evaluation, instrument selection, management of large data sets, and maintenance of data integrity; lab is designed as a workshop using guided exercises, peer sharing, and collaborative work groups to provide experiences integrated with content covered in didactic section of the course. Prerequisites: NURS:7002 and NURS:7006.

NURS:7006 Theory and Model Development 3 s.h.

Critical role of theories in science and the importance of continuous refinement of theory throughout a program of research; focus on theory construction and model building; examination of relationships linking concepts; analysis of structure, scope, and forms of theories/models; construction of micro- or mid-range theories/models using positivistic and inductive approaches; emphasis on critical analysis of literature. Prerequisites: NURS:7000. Requirements: Ph.D. standing.

NURS:7310 Measurement in Health Research 3 s.h.

How to develop and employ measures that are operationalized within the context of theories and conceptual models; sound measurement principles and practices, as well as adequate testing for reliability and validity using appropriate methods and procedures. Prerequisites: NURS:7006.

NURS:7404 Biological Markers in Health Research 3 s.h.

Use of biomarkers as surrogate clinical endpoints, measure of behavior, and measures of exposures; judicious integration of biomarkers into an overall program of health research in light of pertinent considerations, including validity and reliability, feasibility and cost. Prerequisites: NURS:6811 and NURS:7002 and NURS:7003.

NURS:7509 Research Residency 1-3 s.h.

Participation in a research project based on an individualized plan of study, under guidance of an experienced researcher; students register with the respective faculty member for a residency that takes place at the University of Iowa, or register with their advisor for a residency that takes place outside the University of Iowa. Requirements: admission to the Ph.D. in nursing.

NURS:7800 Independent Study arr.

Supervised study adjusted to needs of doctoral degree students. Requirements: doctoral enrollment.

NURS:7801 Seminar: Research Scholarship Role Development 3 s.h.

Preparation for successful completion of doctoral coursework, comprehensive examination, and dissertation; faculty-guided structure provides opportunities for students to assimilate knowledge and behavior of a scholar and activities that facilitate and optimize socialization and success as nurse scientists and academic faculty. Requirements: Ph.D. standing.

NURS:7803 Research Practicum I 2 s.h.

First of two practicums that serve as a system of apprenticeship by which students are mentored through selected aspects of scientific processes, methodologies, analysis, and dissemination of results; projects relevant to student's area of study. Requirements: Ph.D. standing.

NURS:7804 Research Practicum II 2 s.h.

Second of two practicums that serve as a system of apprenticeship by which students are mentored through selected aspects of scientific processes, methodologies, analysis, and dissemination of results; project relevant to student's area of study. Requirements: Ph.D. standing.

NURS:7805 Dissertation Research arr.

Bachelor of Science in Nursing, B.S.N.

The College of Nursing offers two paths to the Bachelor of Science in Nursing (B.S.N.): a prelicensure program for students who do not hold a nursing license (see the Bachelor of Science in Nursing [p. 1820] in this section of the Catalog) and a program for registered nurses (see RN-B.S.N. for Registered Nurses [p. 1822] in this section of the Catalog).

The B.S.N. programs prepare students for careers caring for patients in hospitals and in community agencies such as public health services, schools, homes, and industries. They also provide a base for graduate study in nursing.

In addition to combining general education with specialized career preparation, the University of Iowa programs in nursing offer the advantages of full participation in the social, cultural, and recreational activities of a highly diverse campus community. A university education enables students to prepare for a career as well as a life of thought and action informed by knowledge, introspection, and contemplation.

The B.S.N. programs provide a basis for nurses' roles in wellness and health promotion, in acute care, and in long-term care for chronic illness. The professional nurse may provide care to individuals, families, groups, and communities along a continuum of health, illness, and disability in any sector of the health care system.

In addition to providing care, the nurse serves as a coordinator of health care by organizing and facilitating the delivery of comprehensive, efficient, and appropriate service to individuals, families, groups, and communities. The nurse demonstrates the ability to conceptualize the total continuing health needs of the patient, including legal and ethical aspects of care. The University of Iowa programs' goal is to produce graduates who are competent, committed, creative, and compassionate.

Expenses and Insurance

Students pay University of Iowa student fees throughout the B.S.N. program. They must purchase uniforms, shoes, a stethoscope, and a watch with a full-sweep second hand, and they must pay the cost of computer testing, supplies, and materials for required nursing courses. All nursing students arrange and pay for their own health screening requirements, health insurance, and transportation once they are enrolled in clinical nursing courses. They also pay fees that cover the cost of criminal background checks, laboratory equipment, professional liability insurance, and simulation.

Mandatory Health Insurance

Upon admission to the College of Nursing and each August afterward, all students must provide verification that they have obtained and currently hold health insurance that satisfies the following minimal standards of coverage (or an equivalent alternative health care plan):

\$250,000 lifetime benefit;

coverage for hospitalization, including coverage for room and board, physician visits, surgeon services, X-ray, and lab services;

inpatient deductible under an individual policy not exceeding \$500 per admission and a 20 percent copayment/coinsurance requirement; and

coverage for medically necessary care, including physician services, X-ray, and lab services for treatment of emergencies, illness, accident, and injury.

Professional Liability Insurance

All students in the College of Nursing are required to carry professional liability insurance throughout the duration of their program. Agencies that provide clinical practicums for College of Nursing programs require that students have insurance coverage. The College of Nursing provides students with information about the liability insurance requirement during orientation.

B.S.N. prelicensure students and RN-B.S.N. students are covered by a group policy supported by student fees.

Bachelor of Science in Nursing

The Bachelor of Science in Nursing prelicensure program of study requires 128 s.h., including 64 s.h. in the nursing major and 64 s.h. in supporting coursework that is prerequisite to the nursing major. The program is intended for students beginning their education in nursing. A B.S.N. program for registered nurses is described under RN-B.S.N. for Registered Nurses [p. 1822] in this section of the Catalog.

B.S.N. students may complete their entire program at Iowa, enrolling in the College of Liberal Arts and Sciences to complete courses that are prerequisite to the nursing major, or they may transfer from an institution that offers comparable prerequisite courses that are approved by the University of Iowa and the College of Nursing. They must earn competitive admission to the College of Nursing once they have completed the prerequisite coursework. Highly qualified applicants may be admitted to the College of Nursing directly from high school under the B.S.N. early admission program; see Admission [p. 1822] in this section of the Catalog.

Students who are part of the B.S.N. early admission program spend their first four semesters (two years) on prerequisite coursework and complete the requirements for the nursing major during the next four semesters (their third and fourth years), earning the B.S.N. in a total of four academic years. Students who earn competitive admission to the College of Nursing have five semesters to complete prerequisite coursework. They begin work for the nursing major in spring of their third year and complete the major in four semesters, earning the B.S.N.

University of Iowa students who have declared an interest in the prelicensure nursing program are advised at the University's Academic Advising Center until they are admitted to the College of Nursing. After admission to the college, each student is assigned a professional advisor in the college's Office of Student Services.

Nursing courses are based on concepts of health, deviations from health, and nursing intervention. Coursework progresses in complexity across the curriculum. The curriculum reflects the current trend in health care delivery toward emphasis on nursing as a service provided both inside and outside hospitals. Students have access to clinical experiences selected from a multitude of agencies in Iowa and around the country.

The following coursework is required for B.S.N. students.

Code	Title	Hours
Prerequisite Courses		
	General Education Prerequisites	13

Natural Science Prerequisites	23
Social Science Prerequisites	9-10
Other Prerequisites	19
Courses Required for the Major	64
Total Hours	128-129

The B.S.N. prelicensure program requires the following coursework. Students must complete the prerequisite coursework before beginning work required for the major in nursing.

Prerequisite Courses

Early admission students complete all of the following prerequisites during their first and second years of enrollment at the University of Iowa. Competitive admission students must complete all of the following prerequisites, with the exception of two natural science courses and two social science courses, before they may apply for admission to the College of Nursing.

Code	Title	Hours
General Education Prerequisites		
All of these:		
RHET:1030	Rhetoric	4
	International and Global Issues course	3
	Literary, Visual, and Performing Arts course	3
	Values and Culture or Diversity and Inclusion course	3
Natural Science Prerequisites		
All of these:		
ACB:3110	Principles of Human Anatomy	3
BIOL:1141	Introductory Animal Biology	4
CHEM:1070	General Chemistry I	3
CHEM:1080	General Chemistry II	3
HHP:1300	Fundamentals of Human Physiology	3
HHP:2310	Nutrition and Health	3
MICR:3164	Microbiology and Human Health	4
Social Science Prerequisites		
Both of these:		
NURS:1030	Human Development and Behavior	3
PSY:1001	Elementary Psychology	3
And one of these:		
SOC:1010	Introduction to Sociology	3-4
SOC:1030	Contemporary Social Problems	3-4
Other Prerequisites		
All of these:		
NURS:3110	Healthcare Finance	3
MATH:1440	Mathematics for the Biological Sciences	4
Electives		12

Courses Required for the Major

Early admission and competitive admission students complete the following courses for the major in nursing.

Code	Title	Hours
All of these:		
NURS:3128	Health Assessment and Communication Across the Lifespan	3
NURS:3138	Nursing and Pharmacological Interventions I	5
NURS:3151	Introduction to Clinical Concepts for Nursing	2
NURS:3160	Professional Role I: Professionalism and Patient Safety	3
NURS:3438	Nursing and Pharmacological Interventions II	5

See B.S.N. Plans of Study on the College of Nursing website for semester-by-semester study plans for early admission and competitive admission students.

Honors in Nursing

The College of Nursing Honors Program provides seminars and independent study experience for qualified students. In order to pursue honors studies in nursing, students must maintain a University of Iowa g.p.a. and a nursing major g.p.a. of at least 3.50.

The honors program in nursing enables students to explore subject matter based on individual interests, needs, and goals. It provides opportunities for self-initiative, research experience, scholarly writing, intellectual and personal development, and challenges students to grow and excel. Students who fulfill the requirements of the program graduate with honors in nursing.

In addition to honors in their majors, prelicensure B.S.N. students have a variety of opportunities for honors study and activities through membership in the University of Iowa Honors Program; visit Honors at Iowa to learn about the University's honors program.

RN-B.S.N. for Registered Nurses

The RN-B.S.N. program of study requires 32 s.h. of credit. RN-B.S.N. students must hold a valid Iowa nursing license (RN) and an Associate Degree in Nursing or Diploma in Nursing.

The program is designed to offer registered nurses the opportunity to build on their nursing knowledge and experience by earning a Bachelor of Science in Nursing. RN-B.S.N. students take courses that focus on professionalism and patient safety, research, improvement of health systems, leadership, professional engagement, and community and public health.

Students may transfer coursework completed at other colleges and universities to satisfy the prerequisites, general education requirements, electives, and the world language requirement for admission to the College of Nursing (see "Admission to the RN-B.S.N. Program" under Admission [p. 1822] in this section of the Catalog). Once a student is admitted to the RN-B.S.N. program, the student has the option of completing the required 32 s.h. in three semesters or in five semesters.

The RN-B.S.N. program is delivered online, with limited face-to-face meetings for the community health practicum experience and leadership project. Students must complete a practicum experience in Iowa and may be required to drive up to 100 miles to a regional practicum setting.

The College of Nursing participates as a receiving institution in the Iowa Statewide Articulation Plan for Nursing Education: RN to Baccalaureate.

The RN-B.S.N. program requires the following College of Nursing coursework.

Courses Required for the Major

Code	Title	Hours
NURS:3110	Healthcare Finance	3
NURS:3160	Professional Role I: Professionalism and Patient Safety	3
NURS:3460	Professional Role II: Research	3
NURS:3518	Pathology	3
NURS:3650	Community and Public Health Nursing	3
NURS:3655	Community and Public Health Nursing Practicum	2
NURS:3660	Professional Role III: Improving Health Systems	3
NURS:3734	Introduction to Human Genetics	3

NURS:4160	Professional Role IV: Leadership and Professional Engagement	5
NURS:4170	Baccalaureate Seminar	1
Nursing electives		3
Total Hours		32

See RN-B.S.N. Plans of Study on the College of Nursing website for semester-by-semester views of required coursework for full-time (three semesters) and part-time (five semesters) study.

Honors in Nursing

The College of Nursing Honors Program provides seminars and independent study experience for qualified students. In order to pursue honors studies in nursing, students must maintain a University of Iowa g.p.a. and a nursing major g.p.a. of at least 3.50.

The honors program in nursing enables students to explore subject matter based on individual interests, needs, and goals. It provides opportunities for self-initiative, research experience, scholarly writing, intellectual and personal development, and challenges students to grow and excel. Students who fulfill the requirements of the program graduate with honors in nursing.

Combined Programs

RN-B.S.N./D.N.P. (Adult Gerontology Primary Care Nurse Practitioner or Health Systems or Pediatric Nurse Practitioner—Primary Care Subprograms)

RN-Bachelor of Nursing students who are interested in earning a Doctor of Nursing Practice degree with an adult gerontology primary care nurse practitioner, health systems, or pediatric nurse practitioner—primary care subprogram may apply to the combined RN-B.S.N./D.N.P. program offered by the College of Nursing. For information about the D.N.P. degree, see the Doctor of Nursing Practice, D.N.P. [p. 1828] in the Catalog.

Admission

Students entering the University who are not licensed registered nurses (RN) apply to the B.S.N. prelicensure program. Registered nurses apply to the RN-B.S.N. program.

All entering first-year and undergraduate transfer students who have earned fewer than 24 s.h. when they apply for admission to the University of Iowa must complete the American College Test (ACT) or the Scholastic Aptitude Test (SAT). For information about the American College Test, visit the ACT website; for information about the Scholastic Aptitude Test, visit the College Board website.

Applicants to the B.S.N. and RN-B.S.N. programs whose first language is not English must score at least 100 (internet-based) on the Test of English as a Foreign Language (TOEFL). Registered nurses educated outside the United States are required to present verification of having passed the Commission on Graduates of Foreign Nursing Schools (CGFNS) examination and specified Excelsior baccalaureate nursing examinations.

Applicants admitted to the College of Nursing are expected to be able to meet the curriculum's performance standards; see "Technical Standards" below.

A criminal background check is conducted for all prelicensure and undergraduate students before they begin the nursing major. Admission to all programs is conditional pending successful review of criminal background and abuse registry.

Admission to the B.S.N. Prelicensure Program

All applicants to the B.S.N. prelicensure program (early admission applicants and competitive admission applicants) must have satisfied the following minimum high school course requirements.

English: four years

Mathematics: three years, including algebra I, algebra II, and geometry

Science: one year of biology, one year of chemistry, and one year of physics

Social science: three years

World languages: four years (fourth-level proficiency) of the same world language; or two years (second-level proficiency) in two different world languages; or two years of the same world language plus one 3 s.h. course from the GE CLAS Core [p. 20] International and Global Issues, Values and Culture, or Diversity and Inclusion.

B.S.N. Early Admission Program: Early Decision Admission/Direct Admission

A select group of highly qualified students are admitted to the College of Nursing directly from high school through the B.S.N. Early Admission Program (EAP). To be considered for the EAP, students must meet the following requirements:

- an ACT composite score of at least 28 or SAT combined score of at least 1300,

- a g.p.a. of at least 3.80, and

- completion of all the minimum high school course requirements listed under "Admission to the B.S.N. Prelicensure Program" above.

Students who lack one of the requirements can submit an application for the early admission program. High school requirements must be satisfied prior to enrollment at the University of Iowa.

Students admitted through the Early Admission Program must maintain a cumulative g.p.a. of at least 3.00 and have clean criminal and student life records during their first four semesters in the program. Students who fail to meet these requirements may be subject to probation or dismissal from the EAP.

B.S.N. Competitive Admission

In order to apply for competitive admission to the College of Nursing, students must:

- have a cumulative g.p.a. of at least 3.00;

- have a minimum of 48 s.h. of college credit;

- have completed the minimum high school course requirements listed under "Admission to the B.S.N.

Prelicensure Program" above, with any deficiencies satisfied through college coursework;

- have completed all B.S.N. prerequisite coursework listed under the Bachelor of Science in Nursing [p. 1820] (a maximum of two natural science prerequisites and two social science prerequisites may be in progress or planned at the time of application); and

- must have a grade of C (2.00) or higher on all prerequisite coursework.

In order to enter the College of Nursing, successful competitive admission applicants must:

- maintain a cumulative g.p.a. of at least 3.00;

- have a minimum of 64 s.h. of college credit; and

- have completed any remaining prerequisite coursework listed under the Bachelor of Science in Nursing [p. 1820], including any remaining natural science and/or social science prerequisites.

Successful competitive admission students must complete any remaining natural science prerequisite no more than 10 years before they enter the College of Nursing and enroll in coursework for the nursing major.

Admission to the RN-B.S.N. Program

Applicants to the RN-B.S.N. program must hold an RN license and an Associate Degree in Nursing or Diploma in Nursing. They must have a cumulative g.p.a. of at least 3.00. Admission is highly competitive, with emphasis on the natural sciences (anatomy, biology, chemistry, microbiology, physiology), writing (composition I and II), and mathematics (statistics).

Applicants must be enrolled in or have completed prerequisite coursework at the time of application to the RN-B.S.N. program and additional elective coursework before entering the program. They may complete these requirements at a community college.

World language is not an admission requirement.

Technical Standards

Applicants to the College of Nursing are expected to be capable of completing the entire nursing curriculum and of earning a B.S.N. degree. Nursing is a practice discipline with cognitive, sensory, affective, and psychomotor performance requirements. The college's technical standards provide an objective measure on which to base informed decisions about whether individual students will be able to participate in the nursing program. Technical standards also help students determine whether they will need accommodations or modifications in order to participate.

The technical standards are provided to all students before matriculation and are available online in the Bachelor of Science in Nursing Handbook; see Section VIII: Clinical Course and Health Science Student Requirements. Students with disabilities who believe that they may need assistance in meeting the core performance standards should contact Student Disability Services.

Selection

The college's admission committee recommends to the dean the applicants who appear to be best qualified. Fulfillment of minimum admission requirements does not guarantee

admission to the College of Nursing. The committee may require personal interviews. A physical examination report and specific health screening requirements must be on file at University of Iowa Student Health 10 days before the class opens for the first clinical nursing course.

Application Deadlines

B.S.N. prelicensure early admission: January 1 for fall entry

B.S.N. prelicensure competitive admission: April 1 for spring entry

RN-B.S.N. program: March 1 for fall entry; September 1 for spring entry

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Nursing, B.S.N.

Degree Application: apply on MyUI before deadline (typically in February for spring, September for fall)^j

Exam: NCLEX (upon completion of the program students are eligible to sit for this board exam)

Hours	13
Total Hours	128

- a For further details and application instructions, see the College of Nursing website.
- b A grade of C or higher is required. A grade of C-minus is not considered a passing grade for the College of Nursing.
- c Enrollment in math courses requires completion of a placement exam.
- d Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
- e Choose either a course that fulfills the Diversity and Inclusion GE or a course that fulfills the Values and Culture GE.
- f GE courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
- g Register for on-campus section.
- h Alternative is MICR:3190 offered in summer.
- i Recommended. If considering graduate studies please contact your desired school to learn about the statistics requirements.
- j Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>

Financial Support

In addition to general assistance available to University students, there are assistance programs specifically for nursing students. Information about financial aid is available from the University's Office of Student Financial Aid.

Career Advancement

The University of Iowa's B.S.N. program provides broad preparation in clinical, scientific, community health, and patient education skills, and promises outstanding career options. With a B.S.N. degree, students are eligible to work as a staff nurse; flight nurse; a nurse on medical, oncology, surgical, pediatric, emergency, or intensive care units; a nurse in outpatient or neighborhood clinics; or a home health care nurse.

The U.S. Bureau of Labor Statistics projects that employment for registered nurses will grow faster than most other occupations through 2020.

Master of Science in Nursing, M.S.N.

Requirements

The Master of Science in Nursing requires a minimum of 39 s.h. of graduate credit. The program has a clinical nurse leader focus. It is designed to build on general and professional baccalaureate study.

The M.S.N. curriculum consists of a core component of 21 s.h., which students take with College of Nursing doctoral students, and a specialization component of 18 s.h. that centers on the clinical nurse leader role.

Students must maintain a g.p.a. of at least 2.75 and must successfully complete a capstone project.

Graduate students in the College of Nursing must adhere to all Graduate College policies regarding academic standing, probation, and dismissal. Transfer credit applicable to the M.S.N. is limited and must be approved by the College of Nursing associate dean for academic affairs. Coursework taken 10 years or more before the M.S.N. final examination must be updated according to University policy.

The M.S.N. requires the following coursework every year for the clinical nurse leader focus two-year plan.

Code	Title	Hours
First Year		
NURS:5009	Evaluating Evidence for Practice	3
NURS:5017	Quality and Safety	3
NURS:5018	Clinical Education in the Care Environment	3
NURS:5021	Physiology, Pathophysiology, and Pharmacology I for the Clinical Nurse Leader	3
NURS:5022	Physiology, Pathophysiology, and Pharmacology II for the Clinical Nurse Leader	3
NURS:5636	Clinical Nurse Leader Seminar	3
NURS:5666	Leadership in the Microsystem	3
Second Year		
NURS:5007	Applied Epidemiology	3
NURS:5010	Clinical Data Management and Evaluation	3
NURS:5016	Health Care Infrastructure and Informatics	3
NURS:5037	Health Promotion and Assessment for Clinical Nurse Leaders	3
NURS:5696	Clinical Nurse Leader Capstone Clinical Immersion	6
Total Hours		39

The M.S.N. requires the following coursework every year for the clinical nurse leader focus three-year plan.

Code	Title	Hours
First Year		
NURS:5009	Evaluating Evidence for Practice	3
NURS:5018	Clinical Education in the Care Environment	3
NURS:5021	Physiology, Pathophysiology, and Pharmacology I for the Clinical Nurse Leader	3
NURS:5022	Physiology, Pathophysiology, and Pharmacology II for the Clinical Nurse Leader	3
NURS:5636	Clinical Nurse Leader Seminar	3
Second Year		
NURS:5007	Applied Epidemiology	3
NURS:5017	Quality and Safety	3
NURS:5037	Health Promotion and Assessment for Clinical Nurse Leaders	3
NURS:5666	Leadership in the Microsystem	3
Third Year		
NURS:5010	Clinical Data Management and Evaluation	3
NURS:5016	Health Care Infrastructure and Informatics	3
NURS:5696	Clinical Nurse Leader Capstone Clinical Immersion	6
Total Hours		39

See the M.S.N. course plan on the College of Nursing website for a semester-by-semester course schedule.

Admission

Applicants to College of Nursing graduate programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Applicants must have a g.p.a. of at least 3.00. A criminal background check is required for all students upon admission. The College of Nursing has additional application requirements, as follows.

Admission to the M.S.N. Program

Application requirements specific to the M.S.N. program are:

- a bachelor's degree with a major in nursing from an accredited program;
- satisfaction of the legal requirements for the practice of nursing in Iowa;
- current written recommendations from three persons knowledgeable about the applicant's competence in the practice of nursing and potential for leadership and scholarship (forms required);
- a current résumé, goal statement, and supplemental/information form;
- transcripts from all undergraduate and graduate coursework; and
- completion of an upper-level statistics course within five years of the application deadline (acceptable University

of Iowa courses include BIOS:4120 Introduction to Biostatistics, PSQF:4143 Introduction to Statistical Methods, STAT:3510 Biostatistics, and STAT:4143 Introduction to Statistical Methods).

Application deadline for the M.S.N. program is February 1.

Applications are reviewed once a year. In order to be reviewed, the application must be complete with all materials submitted.

Applicant interviews are required for the M.S.N. program; in some cases, virtual interviews such as through Zoom may be arranged.

Due to the level of web-based coursework required, international students in the M.S.N. Clinical Nurse Leader program are not eligible for F-1 or J-1 student immigration status. Questions regarding visas and immigration documentation should be directed to International Student and Scholar Services (ISSS).

Career Advancement

Students who constantly envision new ways to create change or innovate to improve health care delivery or nursing practice can thrive in a M.S.N. Clinical Nurse Leader (CNL) role. The program prepares the CNL with the necessary knowledge and skills to make a difference both in a microsystem or a changing work environment. Upon graduation, CNL students are eligible for the certification exam.

The M.S.N. Clinical Nurse Leader provides students with eight essential roles to ensure job flexibility, including clinician, educator, advocate, outcomes manager, information manager, systems analyst, a role as a member of the profession, and with outcomes-based skills.

Doctor of Nursing Practice, D.N.P.

Requirements

The Doctor of Nursing Practice requires a minimum of 72 s.h. of graduate credit. Students may complete the program in three to five years, depending on their focus area. Individuals who have been granted an M.S.N./APRN may complete the D.N.P. with a minimum of 29 s.h. of graduate credit.

Students choose from a number of specialties, including adult gerontology acute care nurse practitioner, adult gerontology primary care nurse practitioner, anesthesia nursing, family nurse practitioner, pediatric nurse practitioner—acute care, pediatric nurse practitioner—primary care, psychiatric/mental health nurse practitioner; and in health systems. For yearly plans that detail coursework in these specialty areas, see "Plans of Study" below. Visit D.N.P. Plans of Study on the College of Nursing website for a semester-by-semester view of required coursework for each D.N.P. specialty. A dual certification program also is available that allows students to combine two of the specialties, except for anesthesia nursing or health systems.

D.N.P. students complete basic graduate core courses, specialty courses, advanced core courses, and practicums. In didactic coursework, they explore clinical leadership, public policy and advocacy, specialty systems, change theory, finance and business, and entrepreneurial tools.

Students must complete a minimum of 1,000 practice experience hours. Individuals who enter the program having completed an M.S.N. may transfer approved clinical hours from their M.S.N. program to the D.N.P. program. The clinical hours requirement is evaluated for each student who has completed an M.S.N. with a specialty program. Students who completed more than 1,000 practice experience hours in an M.S.N. advanced practice program still must complete the number of D.N.P. practicum and project hours determined in consultation with their advisor and the D.N.P. program director.

Transfer credit applicable to the D.N.P. is limited and must be approved by the College of Nursing assistant dean for graduate practice programs. Transcripts for individuals who have completed an M.S.N. are evaluated individually.

Students must adhere to all Graduate College policies regarding academic standing, probation, and dismissal. Coursework taken 10 or more years before a student plans to graduate from the D.N.P. program must be updated according to University policy.

Plans of Study

- D.N.P. Adult Gerontology Acute Care Nurse Practitioner Subprogram [p. 1828]
- D.N.P. Adult Gerontology Primary Care Nurse Practitioner Subprogram [p. 1829]
- D.N.P. Anesthesia Nursing Subprogram [p. 1830]
- D.N.P. Family Nurse Practitioner Subprogram [p. 1831]
- D.N.P. Pediatric Nurse Practitioner—Acute Care Subprogram [p. 1832]
- D.N.P. Pediatric Nurse Practitioner—Primary Care Subprogram [p. 1833]

- D.N.P. Psychiatric/Mental Health Nurse Practitioner Subprogram [p. 1834]
- D.N.P. Health Systems Subprogram [p. 1835]
- D.N.P. for M.S.N. and Advanced Practice Registered Nurses [p. 1837]

Total Hours	29

Admission

Applicants to College of Nursing graduate programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Applicants must have a g.p.a. of at least 3.00. A criminal background check is required for all students upon admission. The College of Nursing has additional application requirements, as follows.

Admission to the D.N.P. Program

Application requirements specific to the D.N.P. program are:

- a bachelor's degree with a major in nursing from an accredited program;
- satisfaction of the legal requirements for the practice of nursing in Iowa;
- current written recommendations from three persons knowledgeable about the applicant's competence in the practice of nursing and potential for leadership and scholarship (forms required);
- a current résumé, goal statement, and supplemental/information form;
- transcripts from all undergraduate and graduate coursework;
- D.N.P. applicants to the direct care programs with master's degrees in nursing from other schools must provide verification of completed clinical hours from their institution's graduate director or must submit appropriate course syllabi; and
- an upper-level statistics course (undergraduate course at junior/senior level) completed within five years of application deadline; acceptable University of Iowa courses are as follows—STAT:3510 Biostatistics, PSQF:4143 Introduction to Statistical Methods, STAT:4143 Introduction to Statistical Methods, or BIOS:4120 Introduction to Biostatistics (equivalent courses from other colleges also will be accepted).*

* For statistics courses taken at another institution, please refer to that institution's catalog or registrar's office to verify course numbering scheme. Community college courses are considered to be at a lower level (first-year/sophomore) and are not acceptable as an admission prerequisite statistics course. For further questions, regarding the admission upper-level statistics course requirement contact the graduate nursing programs office.

Application deadline for the D.N.P. program is February 1 for all specialties except anesthesia nursing, which has a June 1 application deadline.

Applications are reviewed once a year. In order to be reviewed, the application must be complete, with all materials submitted.

Applicant interviews are required for the D.N.P. program; in some cases, virtual interviews such as through Zoom may be arranged.

Due to the level of web-based coursework required, international students in the D.N.P. program of study are not eligible for F-1 or J-1 student immigration status. Questions regarding visas and immigration documentation should be directed to International Student and Scholar Services (ISSS).

Career Advancement

The D.N.P. program prepares nurses for leadership and advanced practice roles within today's complex health care system. Graduates acquire the knowledge and skills to provide the highest standard of care for individuals, families, and communities.

Nursing, Ph.D.

Requirements

The Doctor of Philosophy program in nursing requires a minimum of 72 s.h. of graduate credit. The program prepares students to advance nursing science and contribute to the body of nursing knowledge. It emphasizes student participation with faculty members on research teams; focused coursework; presentation and publication of research-based knowledge; and interdisciplinary learning experiences.

Graduate students in the College of Nursing must adhere to all Graduate College policies regarding academic standing, probation, and dismissal. Coursework taken 10 or more years before a student plans to graduate from the Ph.D. program must be updated according to University policy.

The Ph.D. with a major in nursing requires the following work.

Required Courses

Code	Title	Hours
NURS:6802	Health Policy, Law, and Advocacy	3
NURS:6811	Social Determinants of Health and Health System Inequities	3
NURS:7000	Philosophy and Sociology of Nursing Science	3
NURS:7001	Qualitative Research	4
NURS:7002	Designing Research	3
NURS:7003	Quantitative Research	4
NURS:7006	Theory and Model Development	3
NURS:7310	Measurement in Health Research	3
NURS:7404	Biological Markers in Health Research	3
NURS:7801	Seminar: Research Scholarship Role Development	3
NURS:7803	Research Practicum I	2
NURS:7804	Research Practicum II	2
CPH:7270	Principles of Scholarly Integrity: Public Health	0, 1
Specialization courses (B.S.N.-Ph.D. only)		6
Intermediate statistics		3-4
Advanced statistics		3-4

Cognate Area

Code	Title	Hours
Cognate courses (B.S.N.-Ph.D. only)		6

Comprehensive Exam and Dissertation

Students must complete a written and oral comprehensive examination before they begin work on the dissertation. They must write the dissertation and defend it orally.

Dissertation

Code	Title	Hours
A minimum of 11 s.h. in this course:		
NURS:7805	Dissertation Research	arr.

Admission

Applicants to College of Nursing graduate programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

The program is open to individuals who have earned a bachelor's degree in nursing, an associate's degree in nursing with a bachelor's or advanced degree in any field, an advanced degree in nursing, or an advanced degree in a health-related field.

A criminal background check is required for all students upon admission. The College of Nursing has additional application requirements, as follows.

Admission to the Ph.D. Program

Ph.D. applicants who have completed an accredited basic nursing program must hold a current license to practice nursing.

Applicants must have a g.p.a. of at least 3.00. They also must have successfully completed an upper-level statistics course within five years prior to the application deadline.

Applicants must submit along with their application:

- a two-to-three-page statement describing their educational objectives, career goals, and an area of research for their doctoral study;

- three recommendations from nursing professionals that speak to the applicant's potential as a scholar;

- a current résumé or curriculum vitae; and

- a complete transcript of all college programs and courses.

Applicants whose first language is not English must score at least 81 (internet-based) on the Test of English as a Foreign Language (TOEFL); or they must score at least 7.0 on the International English Language Testing System (IELTS), with no subscore less than 6.

Application deadline for the Ph.D. program is January 15. In order to be reviewed, the applicant's file must be complete, with all materials submitted.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Nursing, Ph.D.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

b Online training modules to be completed during first semester.

c Other coursework includes the following: electives, additional methods courses, Research Practicum, or Research Residency. Work with faculty advisor to determine courses and sequence.

d Take PSQF:6243 if doing the PSQF stats sequence or take other coursework if doing the BIOS stats sequence.

e Take PSQF:6244 if doing PSQF stats sequence or take BIOS:5120 if doing BIOS stats sequence.

f Take BIOS:5130 if doing BIOS stats sequence or take other coursework if PSQF stats sequence already completed.

g For students admitted fall 2017 or later, the Comprehensive Exam must be completed no later than the end of the fall semester of year three.

h Or take an advanced/specific methods course, third stats course, or an elective.

i Minimum of 11 s.h. Dissertation Research credits required, generally distributed over multiple semesters until degree completion.

Career Advancement

The Ph.D. program prepares scholars to move nursing and health science forward. Graduates are prepared for careers as faculty members in college and university settings as well as researchers, consultants, and leaders in military, academic or industry venues, and in other nonacademic settings.

Adult Gerontology Acute Care Nurse Practitioner, Graduate Certificate

Requirements

The graduate Certificate in Adult Gerontology Acute Care Nurse Practitioner requires 21 s.h. of credit. Students must maintain a cumulative g.p.a. of at least 2.50 in coursework for the certificate. The certificate is available for post-master's Advanced Practice Registered Nurse (APRN) degree students who would like to pursue a second specialty.

The curriculum includes didactic and clinical core courses as well as specialty courses, as determined by the director of the program. Coursework and clinical hours are determined by a gap analysis.

The Certificate in Adult Gerontology Acute Care Nurse Practitioner requires the following work.

Code	Title	Hours
First Year		
NURS:5035	Graduate Pharmacology Specialty	3
NURS:5038	Advanced Diagnostic and Therapeutic Procedures for Acute Care	1
NURS:6410	Adult-Gerontology Acute Care I	3
NURS:6411	Adult-Gerontology Acute Care II	3
NURS:6701	Advanced Practice Clinical Practicum I	4
NURS:6702	Advanced Practice Clinical Practicum II	4
Second Year		
NURS:6703	Advanced Practice Clinical Practicum III	3
Total Hours		21

Visit the Post-Graduate Certificate Programs plans of study on the College of Nursing website for information about certificate program requirements.

Adult Gerontology Primary Care Nurse Practitioner, Graduate Certificate

Requirements

The graduate Certificate in Adult Gerontology Primary Care Nurse Practitioner requires 22 s.h. of credit. Students must maintain a cumulative g.p.a. of at least 2.50 in coursework for the certificate. The certificate is available for post-master's Advanced Practice Registered Nurse (APRN) degree students who would like to pursue a second specialty.

The curriculum includes didactic and clinical core courses as well as specialty courses, as determined by the director of the program. Coursework and clinical hours are determined by a gap analysis.

The Certificate in Adult Gerontology Primary Care Nurse Practitioner requires the following work.

Code	Title	Hours
First Year		
NURS:5035	Graduate Pharmacology Specialty	3
NURS:5039	Advanced Diagnostic and Therapeutic Procedures for Primary Care	1
NURS:5401	The Care of the Frail Elderly	3
NURS:6200	Primary Care: Adults and Older Individuals I	3
NURS:6201	Primary Care: Adults and Older Individuals II	3
NURS:6701	Advanced Practice Clinical Practicum I	3
NURS:6702	Advanced Practice Clinical Practicum II	3
Second Year		
NURS:6703	Advanced Practice Clinical Practicum III	3
Total Hours		22

Visit the Post-Graduate Certificate Programs plans of study on the College of Nursing website for information about certificate program requirements.

Family Nurse Practitioner, Graduate Certificate

Requirements

The graduate Certificate in Family Nurse Practitioner requires 26 s.h. of credit. Students must maintain a cumulative g.p.a. of at least 2.50 in coursework for the certificate. The certificate is available for post-master's Advanced Practice Registered Nurse (APRN) degree students who would like to pursue a second specialty.

The curriculum includes didactic and clinical core courses as well as specialty courses, as determined by the director of the program. Coursework and clinical hours are determined by a gap analysis.

The Certificate in Family Nurse Practitioner requires the following work.

Code	Title	Hours
First Year		
NURS:5035	Graduate Pharmacology Specialty	3
NURS:5039	Advanced Diagnostic and Therapeutic Procedures for Primary Care	1
NURS:6100	Primary Care: Infants, Children, and Adolescents I	3
NURS:6101	Primary Care: Infants, Children, and Adolescents II	3
NURS:6200	Primary Care: Adults and Older Individuals I	3
NURS:6201	Primary Care: Adults and Older Individuals II	3
NURS:6701	Advanced Practice Clinical Practicum I	3
NURS:6702	Advanced Practice Clinical Practicum II	3
Second Year		
NURS:6703	Advanced Practice Clinical Practicum III	4
Total Hours		26

Visit the Post-Graduate Certificate Programs plans of study on the College of Nursing website for information about certificate program requirements.

Health Systems, Graduate Certificate

Requirements

The graduate Certificate in Health Systems is built on the foundational courses from the Doctor of Nursing Practice (D.N.P.) with a health systems subprogram. The certificate requires 19 s.h. of credit. Students must maintain a cumulative g.p.a. of at least 2.50 in coursework for the certificate. The certificate is available to post-master's degree students seeking additional preparation in the area of health systems with a focus in administration or health systems and in administration with practice management.

The Certificate in Health Systems with a focus in administration requires the following coursework.

Code	Title	Hours
First Year		
NURS:6550	Executive Leadership and Management	4
NURS:6551	Financial Management	4
NURS:6554	Seminar on Healthy Work Environments	3
Second Year		
NURS:6552	Managing Care in an Organizational Environment	4
NURS:6553	Seminar on Innovations	4
Total Hours		19

The Certificate in Health Systems with a focus in administration with practice management requires the following coursework.

Code	Title	Hours
First Year		
NURS:6550	Executive Leadership and Management	4
NURS:6551	Financial Management	4
NURS:6554	Seminar on Healthy Work Environments	3
Second Year		
NURS:6553	Seminar on Innovations	4
NURS:6557	Clinical Practice Management and Leadership for Advanced Practice Providers	4
Total Hours		19

Visit the Post-Graduate Certificate Programs plans of study on the College of Nursing website for a semester-by-semester view of required coursework.

Pediatric Nurse Practitioner—Acute Care, Graduate Certificate

Requirements

The graduate Certificate in Pediatric Nurse Practitioner—Acute Care requires 21 s.h. of credit. Students must maintain a cumulative g.p.a. of at least 2.50 in coursework for the certificate. The certificate is available for post-master's Advanced Practice Registered Nurse (APRN) degree students who would like to pursue a second specialty.

The curriculum includes didactic and clinical core courses as well as specialty courses, as determined by the director of the program. Coursework and clinical hours are determined by a gap analysis.

The Certificate in Pediatric Nurse Practitioner—Acute Care requires the following work.

Code	Title	Hours
First Year		
NURS:5035	Graduate Pharmacology Specialty	3
NURS:5038	Advanced Diagnostic and Therapeutic Procedures for Acute Care	1
NURS:6400	Pediatric Acute Care I	3
NURS:6401	Pediatric Acute Care II	3
NURS:6701	Advanced Practice Clinical Practicum I	4
NURS:6702	Advanced Practice Clinical Practicum II	4
Second Year		
NURS:6703	Advanced Practice Clinical Practicum III	3
Total Hours		21

Visit the Post-Graduate Certificate Programs plans of study on the College of Nursing website for information about certificate program requirements.

Pediatric Nurse Practitioner—Primary Care, Graduate Certificate

Requirements

The graduate Pediatric Nurse Practitioner—Primary Care requires 20 s.h. of credit. Students must maintain a cumulative g.p.a. of at least 2.50 in coursework for the certificate. The certificate is available for post-master's Advanced Practice Registered Nurse (APRN) degree students who would like to pursue a second specialty.

The curriculum includes didactic and clinical core courses as well as specialty courses, as determined by the director of the program. Coursework and clinical hours are determined by a gap analysis.

The Certificate in Pediatric Nurse Practitioner—Primary Care requires the following work.

Code	Title	Hours
First Year		
NURS:5035	Graduate Pharmacology Specialty	3
NURS:5039	Advanced Diagnostic and Therapeutic Procedures for Primary Care	1
NURS:6100	Primary Care: Infants, Children, and Adolescents I	3
NURS:6101	Primary Care: Infants, Children, and Adolescents II	3
NURS:6701	Advanced Practice Clinical Practicum I	3
NURS:6702	Advanced Practice Clinical Practicum II	4
Second Year		
NURS:6703	Advanced Practice Clinical Practicum III	3
Total Hours		20

Visit the Post-Graduate Certificate Programs plans of study on the College of Nursing website for information about certificate program requirements.

Psychiatric/Mental Health Nurse Practitioner, Graduate Certificate

Requirements

The graduate Certificate in Psychiatric/Mental Health Nurse Practitioner requires 22 s.h. of credit. Students must maintain a cumulative g.p.a. of at least 2.50 in coursework for the certificate. The certificate is available for post-master's Advanced Practice Registered Nurse (APRN) degree students who would like to pursue a second specialty.

The curriculum includes didactic and clinical core courses as well as specialty courses, as determined by the director of the program. Coursework and clinical hours are determined by a gap analysis.

The Certificate in Psychiatric/Mental Health Nurse Practitioner requires the following work.

Code	Title	Hours
First Year		
NURS:5036	Psychopharmacology for Advanced Clinical Practice	3
NURS:5041	Psychotherapeutics for Advanced Practice Nursing Across the Lifespan	3
NURS:6500	Psychiatric/Mental Health Nursing for Advanced Practice Didactic I	3
NURS:6501	Psychiatric/Mental Health Nursing for Advanced Practice Didactic II	3
NURS:6701	Advanced Practice Clinical Practicum I	3
NURS:6702	Advanced Practice Clinical Practicum II	4
Second Year		
NURS:6703	Advanced Practice Clinical Practicum III	3
Total Hours		22

Visit the Post-Graduate Certificate Programs plans of study on the College of Nursing website for information about certificate program requirements.

- Jonathan A. Doorn

Head, Pharmaceutics and Translational Therapeutics

- Aliasger K. Salem

Director, University of Iowa Pharmaceuticals

- Dennis M. Erb

Undergraduate certificates: drug delivery; drug discovery; drug disposition and metabolism

Professional degree: Pharm.D.

Professional certificate: palliative care

Graduate degrees: M.S. in pharmacy; Ph.D. in pharmacy

Faculty: <https://pharmacy.uiowa.edu/directory/faculty>

Website: <https://pharmacy.uiowa.edu/>

The hallmarks of a University of Iowa pharmacy degree are patient-centered practice, strong grounding in science and evidence-based practice, exploration of career choices

through required and elective courses, and exposure to leadership opportunities within the college, the University, and the profession. Career options may include community and/or hospital pharmacy, public service, consulting and long-term care, teaching and research in academia, managed care, pharmaceutical industry, or research careers.

The University of Iowa's Pharm.D. program synthesizes basic scientific principles and practice through caring and communication in an integrated professional program. The role of a pharmacist ranges from managing medication for individuals to shaping national health care policy. Students learn to manage aspects of practice, to solve problems, make clinical decisions, clearly communicate ideas, practice ethically, and become leaders in their communities and profession. Students study with professors who, in many cases, are pioneering the development of new drugs and defining the appropriate use of others to solve chronic health problems.

In addition to offering the Doctor of Pharmacy (Pharm.D.) degree, the professional Certificate in Palliative Care, the Master of Science in pharmacy, the Doctor of Philosophy in pharmacy, and three undergraduate certificates in drug delivery, drug discovery, and drug disposition and metabolism, the College of Pharmacy collaborates with the College of Public Health to offer the combined Doctor of Pharmacy/M.P.H. degree, and with the Graduate College to offer the Doctor of Pharmacy/M.S. in informatics degree.

College Organization

The College of Pharmacy's faculty and programs are organized in two academic units, each with two divisions. These units provide coursework for the Doctor of Pharmacy curriculum and for the college's graduate programs.

Pharmacy Practice and Science

Faculty in Pharmacy Practice and Science (PPS) provide expertise and education in the professional practice of pharmacy. They specialize in a wide variety of clinical pharmacy practices; conduct research on patient and population outcomes related to medication therapy; contribute to the scholarship of teaching and learning in pharmacy education; and provide instruction in the pharmacist's professional role and the safe, effective use of medications.

This unit offers Master of Science and Doctor of Philosophy curricula in health services research, which encompasses the behavioral, economic, social, and administrative sciences; and elements of pharmacy practice. It offers coursework through its Applied Clinical Sciences Division and its Health Services Research Division.

Applied Clinical Sciences (ACS) Division: Teaching and research in this division focus on the delivery of care and related services to patients and the education of student and resident pharmacists in practice settings. Courses are offered in pharmacotherapy, communication and practice skill development, clinical problem solving, and patient care. Professional practice mentoring and education are provided in introductory and advanced pharmacy practice experiences.

Health Services Research (HSR) Division: Teaching and research in this division involve economic, social, behavioral, and administrative components of pharmacy practice and medication use. Courses are offered on the health care system, practice management, the professional and business aspects of pharmacy practice, and on learning and applying

economic and social psychological theories to the study of health services and medication use.

To learn more about the department and its two divisions, visit Pharmacy Practice and Science on the College of Pharmacy website.

Pharmaceutical Sciences and Experimental Therapeutics

Faculty in Pharmaceutical Sciences and Experimental Therapeutics (PSET) provide expertise and education in clinical pharmaceutical sciences, medicinal and natural products chemistry, and pharmaceuticals. Their interests include dosage form development and performance, industrial and manufacturing pharmacy, pharmacokinetics and pharmacodynamics, and the chemistry of drugs and their action on human systems. This unit offers courses through its Medicinal and Natural Products Chemistry Division and its Pharmaceuticals and Translational Therapeutics Division.

Medicinal and Natural Products Chemistry (MNPC)

Division: Coursework in this division relates to understanding the chemistry of drugs and their action on human systems, principles of drug discovery and drug design, natural product chemistry, and biotechnology and genomic strategies for producing new drug molecules. The division's curricula for the M.S. and Ph.D. programs provide abundant opportunities for interface with researchers in other areas, including medicine, pharmacology, biochemistry, chemistry, and pharmaceuticals.

Pharmaceutics and Translational Therapeutics (PTT)

Division: This division prepares students to become leaders in developing and evaluating drugs, drug products, and drug delivery systems. It offers two M.S. and Ph.D. subprograms: the pharmaceutics subprogram, which focuses on characterization of pharmaceuticals and their component materials, development of delivery systems for optimal human or veterinary use, and the pharmacokinetic and pharmacodynamic evaluation of drug actions and interactions; and the clinical pharmaceutical sciences subprogram, which focuses on investigating drug therapy outcomes in patients and identifying factors responsible for specific drug actions in individual patients, related patient groups, and large patient populations. The division also offers multidisciplinary opportunities with programs in chemistry, engineering, biomedical science, dentistry, and veterinary medicine. Its national and international collaborations enhance the breadth of research activities available to students.

To learn more about the divisions, visit Medicinal and Natural Products Chemistry and Pharmaceutics and Translational Therapeutics on the College of Pharmacy website.

Facilities

Pharmacy Building

A new, state-of-the-art building has set the stage for advancements in science and discovery, and for world-class pharmacy education to continue to grow and thrive. Classroom space is designed for collaborative and hands-on learning. The building boasts 16 collaborative research spaces and 23 learning spaces—centers and team rooms with aspects of universal design. In addition, the college has added 16,000 square feet of manufacturing space with a sterile products processing facility.

The original facility, now called the Pharmaceutical Sciences Research Building, continues to house classrooms, labs, offices, and a manufacturing facility.

The College of Pharmacy is located on the University's health sciences campus in close proximity to five professional schools. Students collaborate with expert health care providers at the Carver College of Medicine, and at the Colleges of Dentistry [p. 1239], Nursing [p. 1808], and Public Health [p. 1870]. The College of Pharmacy is located in close proximity to University of Iowa Hospitals & Clinics, the Bowen Science Building, and the Hardin Library for the Health Sciences.

For more than 125 years, the University of Iowa College of Pharmacy has led the way in educating pharmacists and pharmaceutical scientists. The college is well known for its high quality pharmacy education, advanced practice models, patient care, drug discovery, product development, and contract manufacturing.

University of Iowa Pharmaceuticals

University of Iowa Pharmaceuticals is a pharmaceutical manufacturing facility registered with the U.S. Food and Drug Administration that develops pharmaceutical dosage forms and has manufactured clinical supplies in compliance with Good Manufacturing Practices since 1974. University of Iowa Pharmaceuticals has clients worldwide, including pharmaceutical companies, biotechnology firms, medical departments, and government agencies. Its staff works closely with clients and pharmaceuticals faculty members to produce virtually every type of pharmaceutical dosage form, supplying new pharmaceutical agents for use in clinical trials and other research. For more information, visit the University of Iowa Pharmaceuticals website.

Courses

Students must be enrolled in the College of Pharmacy to enroll in professional-level (Pharm.D.) coursework numbered 8000-9999. Students who meet prerequisite requirements may register for the college's undergraduate- and graduate-level courses numbered 1100-7999.

College of Pharmacy Courses

PHAR:1000 First-Year Seminar **1 s.h.**

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

PHAR:1100 Introduction to Pharmaceutical Sciences: Drug Development **1-2 s.h.**

Introduction to drug discovery, development, and approval pathways used in the United States; specific focus on career pathways related to pharmaceutical development including the natural and biomedical sciences, clinical, regulatory and legal affairs, sales and marketing, and business development.

PHAR:1111 Need a New Drug? **1 s.h.**

Introduction to drug discovery, development, and approval process in the United States; focus on preclinical and clinical development activities and role of the FDA and other regulatory bodies in approval and oversight of available drug products.

PHAR:1200 Medicines That Changed or Will Change the World **1 s.h.**

Herbal remedies and ancient traditional medicines have led to the discovery of life-saving drug therapies; as science has evolved, how the discovery of other important medicines have come about through advances in chemistry and biology and now through advances in computer science and informatics; students learn about the discovery history of some of the most important drug therapies of the 20th and 21st centuries and how those discoveries are leading to even more important, life-saving treatments.

PHAR:1800 Introduction to Nutraceuticals: Activity and Action **2 s.h.**

Introduction to the role and actions of nutritional supplements in health and disease; evidence-based information regarding roles of common nutritional supplements available to consumers. Prerequisites: BIOL:1140 or BIOL:1141 or BIOL:1411 or BIOL:1412.

PHAR:1812 What's in My Medicine Cabinet? An Introduction to Over-the-Counter Medications and Self Care **2 s.h.**

Introduction to nonprescription medications for treatment of minor illness and health maintenance; causes, signs, and symptoms of common ailments with information about selection of appropriate over-the-counter therapies and considerations for the need for further care; self-care strategies for disease prevention and wellness.

PHAR:3740 End-of-Life Care for Adults and Families **3 s.h.**

End-of-life issues in care of adults, older adults, and their families. Same as ASP:3740, MED:3740, NURS:3740.

PHAR:3994 Undergraduate Research in Pharmaceutical Sciences **1-4 s.h.**

Individual scientific research conducted under the guidance of a faculty member.

PHAR:3995 Undergraduate Independent Study **1-4 s.h.**
Supervised study. Requirements: enrollment in College of Pharmacy undergraduate certificate program.

PHAR:4146 Drug Disposition and Pharmacokinetics **2 s.h.**

Introduction to drug absorption, distribution, and elimination processes controlling overall drug exposure in humans; basic quantitative measurements presented and used to demonstrate the influence of drug properties and physiologic action on drug disposition. Prerequisites: (MATH:1380 or MATH:1460 or MATH:1550 or MATH:1850) and (BIOL:1140 or BIOL:1141 or BIOL:1411 or BIOL:1412) and (STAT:1020 or PSQF:1020 or STAT:1030 or STAT:2010).

PHAR:4480 Introduction to Human Pharmacology **3 s.h.**

Basic overview of ligand-receptor theory and pharmacokinetics (e.g., administration, distribution, metabolism, and elimination of drugs); pharmacology of selected drug classes, pathophysiologic aspects of select diseases relevant to drug classes, how different classes of drugs modify pathophysiologic effects to restore health or reduce disease's impact; focus on mechanisms of drug actions in humans; adverse effects, pharmacokinetic considerations, and drug interactions. Prerequisites: HHP:1300 or HHP:3500 or HHP:3550. Requirements: human physiology B.S. majors must complete HHP:3550. Same as HHP:4480.

PHAR:4501 Basic Principles of Toxicology **1 s.h.**

Basic principles and mechanisms of toxicology as it relates to drugs and environmental agents. Prerequisites: BIOC:3110.

PHAR:4502 Toxic Agents **1 s.h.**

Specific toxicants and toxicity not related to organ systems including carcinogenesis and oxidative stress; clinical toxicology and antidotes. Prerequisites: BIOC:3110.

PHAR:4503 Organ and Organism Toxicity **1 s.h.**

How toxicants, such as drugs, interact with organ systems and organisms. Prerequisites: BIOC:3110.

PHAR:4512 Principles of Drug Discovery **3 s.h.**

Focus on understanding drug targets as receptors, receptor theory, drug discovery, and new drug approval processes; areas of novel drug target identification, pharmacological characterization of new drugs, G protein coupled receptors as targets, and analysis of drug-receptor interactions. Prerequisites: BIOC:3110.

PHAR:4521 High Throughput Screening in Drug Discovery **1 s.h.**

Introduction to high throughput screening (HTS) and its application in pharmaceutical and biomedical sciences; description and use of HTS in identification of biologically active small molecules for use as probes, tool compounds, and drug leads; detection systems, robotic liquid handling instruments, and compound libraries; case studies of HTS approaches used in drug discovery. Prerequisites: (CHEM:2220 or CHEM:2240) and BIOC:3110 or (BIOC:3120 and BIOC:3130). Requirements: one semester of analytical chemistry or analytical biochemistry.

PHAR:4537 Principles of Drug Metabolism **3 s.h.**

Principles of drug metabolism based on current knowledge of involved enzymes. Prerequisites: (CHEM:2220 or CHEM:2240) and (BIOC:3120 or BIOC:3110).

PHAR:4700 Pharmaceutical Chemical Analysis **4 s.h.**

Introduction to the use and selection of analytical methods used to evaluate pharmaceutical products; basic laboratory skills, data analysis, and record keeping. Prerequisites: (CHEM:2220 or CHEM:2240) and (CHEM:2410 or CHEM:2420). Requirements: no prior enrollment in PHAR:5700.

- PHAR:4736 Properties of Dosage Forms I** 3 s.h.
Introduction to principles of physical and chemical sciences important in drug product development; solubility, colligative properties, and partitioning behavior, as well as ionic equilibria, pH control, and chemical stability are evaluated in context of their importance in liquid dosage forms; emphasis on issues impacting drug product quality. Prerequisites: (CHEM:2220 or CHEM:2240) and (MATH:1460 or MATH:1380 or MATH:1550 or MATH:1850).
- PHAR:4737 Properties of Dosage Forms II** 3 s.h.
Physical and chemical properties and measurements of materials used in pharmaceuticals; introduction to material properties of drugs and excipients used in development of semi-solid and solid pharmaceuticals; emphasis on material selection, dosage form performance characteristics, and evaluation of drug product quality. Prerequisites: PHAR:4736.
- PHAR:4740 Materials in Drug and Gene Delivery** 3 s.h.
Different types of materials used in drug and gene delivery including synthetic and natural polymers (poly lactic-co-glycolic acid and chitosan respectively); different forms of delivery systems including (but not limited to) liposomes, micelles, biodegradable nanoparticles, nondegradable nanoparticles, and solid porous scaffolds; applications of these material-based delivery systems from targeted chemotherapy to bone regeneration to vaccination applications.
- PHAR:4741 Immunology and Immunotherapies** 2 s.h.
Introduction to basics of the immune system and how it protects against infection and disease; in-depth lectures on vaccines against infectious diseases and cancer in terms of their formulations and how they work; focus on past seminal findings, current treatment modalities, and cutting-edge technologies likely to impact future immunotherapeutic strategies.
- PHAR:4745 Drug Delivery I** arr.
Advanced design and development of drug delivery systems; emphasis on selection of materials and designs suitable for specific applications; comparison and evaluation of available and emerging technologies. Prerequisites: (BIOC:3110 or BIOC:3120) and (MATH:1460 or MATH:1550 or MATH:1850 or MATH:1380) and (CHEM:2220 or CHEM:2240) and PHAR:4737. Corequisites: PHAR:4146 (if not taken as a prerequisite). Requirements: one semester of human anatomy and physiology.
- PHAR:4799 Special Topics in Pharmaceutics** arr.
Current topics in pharmaceutics. Prerequisites: MATH:2560 and CHEM:4431.
- PHAR:4800 Chemical and Biophysical Properties of Drugs** 1 s.h.
Introduction to design of drug molecules based on an understanding of drug-like properties including chemical reactivity and structural optimization; minimization of potentially toxic biotransformations; optimization of absorption; screening methods for selection and classification of optimized molecules. Prerequisites: (CHEM:2220 or CHEM:2240) and BIOC:3110 or (BIOC:3120 and BIOC:3130).
- PHAR:4850 Upstream Biotechnology Processes** 2 s.h.
Introduction to fermentation, fermenter preparation, cell growth and medium requirements, inoculation, sampling, process termination, separation of cells, fermentation case study, enzyme activity, and biocatalysis. Same as CHEM:4850.
- PHAR:4851 Radiopharmaceuticals in Diagnostics and Therapy** 2 s.h.
Use of radionuclides for diagnosis and monitoring of disease and in development of new therapeutic agents; strategies for provision of effective agents, regulatory processes, and safe handling and administration. Prerequisites: CHEM:2220 or CHEM:2240. Recommendations: one semester of physics, one semester of biology, and one semester of anatomy or physiology.
- PHAR:5110 Clinical Pharmaceutical Sciences Seminar** 1-2 s.h.
Research by faculty, graduate students.
- PHAR:5310 Health Services Research Seminar** 1-2 s.h.
Recent research in pharmacy administration.
- PHAR:5350 Introduction to Research Methods** 3 s.h.
Scientific inquiry, experimental design, data collection, statistical methods used in the study of health services and clinical investigations; focus on understanding the research process and evaluating published studies. Recommendations: introductory statistics.
- PHAR:5510 Pharmaceutical Sciences and Experimental Therapeutics Seminar** 1-2 s.h.
- PHAR:5512 Drug Discovery and Mechanisms** 3 s.h.
Process of modern drug discovery, focus on high throughput screening strategies, target validation, pharmacological characterization of new compounds; mechanism of drugs targeting G protein coupled receptors, ion channels and transporters, targets in biological systems.
- PHAR:5515 Perspectives in MNPC Research** 2 s.h.
Contemporary research in medicinal chemistry and natural products.
- PHAR:5520 Medicinal and Natural Products Chemistry Research** arr.
- PHAR:5521 High Throughput Screening for Pharmaceutical and Biomedical Sciences** 1 s.h.
Broad introduction to high throughput screening (HTS) and its application in pharmaceutical and biomedical sciences; HTS as a modern technology platform integrated with robust detection systems and robotic liquid handling instruments; use of HTS platforms to identify biologically active small organic molecules to validate drug targets, screen compound libraries; identification of biologically active small molecules for use as probes, tool compounds, drug leads; systematic, unbiased, and/or focused hypothesis-based approaches for mechanistic studies in biological and medical sciences. Recommendations: bachelor degree in biochemistry, chemistry, molecular biology, pharmacology, or equivalent.
- PHAR:5525 Drug Delivery Systems for Insoluble Compounds** 3 s.h.
Specialized disperse systems (e.g., emulsions, nanoemulsions, microemulsions, micelle) used for insoluble systems; introduction to basics of lipid systems to understand behavior in aqueous media when delivered to the body.
- PHAR:5530 Pharmaceutical Sciences and Experimental Therapeutics Seminar** 1-2 s.h.
- PHAR:5537 Enzymatic Basis of Drug Metabolism** 3 s.h.
Current literature on catalytic and physical properties, distribution, and substrate specificity of enzymes involved in mammalian drug metabolism. Prerequisites: CHEM:2220.

- PHAR:5541 Total Synthesis of Biologically Active Natural Products** 3 s.h.
Total synthesis of natural products; use of strategies and tactics for synthetic maneuvering; selectivity of important and complex medicinal compounds; modern chemical methods for construction of carbon-carbon bonds.
- PHAR:5542 Biophysical Chemistry II, Module I** 1 s.h.
Enzymes as unparalleled catalysts that represent a unique class of drug targets; focus on organic chemistry of enzyme catalyzed reactions and enzyme inhibition by small molecules from a medicinal chemistry perspective; chemical and enzyme kinetics, sources of catalytic power, chemical mechanisms used in enzyme catalysis, role of coenzymes; strategies in enzyme inhibition, drug resistance, drug synergism, reversible enzyme inhibitors, transition state analogs, slow tight binding inhibitors, irreversible inhibition; taken alone or as part of BIOC:5242. Requirements: introductory course in biochemistry. Same as BIOC:5244.
- PHAR:5545 Current Medicinal Chemistry** 3 s.h.
Modern techniques used in drug discovery; important drug classes, their chemical mechanism of action.
- PHAR:5549 Analytical Biochemistry** 3 s.h.
Application of modern chromatographic and detection methods used to isolate, characterize, and quantify drugs and macromolecules.
- PHAR:5700 Quantitative Research Methods in Pharmacy I** 3-4 s.h.
Collection and interpretation of analytical data; instrumental analysis and separation techniques.
- PHAR:5702 Clinical Pharmacokinetics** 2 s.h.
Fundamental concepts in pharmacokinetics and pharmacodynamics; application in dose regimen optimization and rational drug use.
- PHAR:5745 Drug Delivery: Principles and Applications I** arr.
Advanced design and development of drug delivery systems with emphasis on selection of materials and designs suitable for specific applications; comparison and evaluation of available and emerging technologies. Prerequisites: (BIOC:3110 or BIOC:3120) and (MATH:3600 or MATH:2560) and (CHEM:2220 or CHEM:2240) and PHAR:4737. Corequisites: PHAR:4146 (if not taken as a prerequisite). Requirements: one semester of human anatomy and physiology.
- PHAR:5875 Perspectives in Biocatalysis** 1-3 s.h.
Applied enzymology, protein design, structure-activity relationships, biosensor technology, microbial transformations, biodegradation of environmental pollutants. Requirements: graduate standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as BIOC:5875, CBE:5875, CEE:5875, CHEM:5875, MICR:5875.
- PHAR:6120 Clinical Pharmaceutical Sciences Research** arr.
- PHAR:6305 Foundation Literature in Health Services Research** arr.
Issues related to pharmacy administration, social and behavioral pharmacy, pharmacy education.
- PHAR:6320 Health Services Research** arr.
- PHAR:6330 Models of Patient Behavior and Choice** 3 s.h.
Theoretical models used to describe behavior and choice in pharmaceutical socioeconomic research; models from economics, health services research, health behavior, clinical decision making.
- PHAR:6331 Models of Provider Behavior and Choice** 3 s.h.
Theoretical background for study of provider decision making and behavior; models based on a classic economic approach, models used to study provider behavior.
- PHAR:6501 Principles and Mechanisms of Chemical Toxicology** 1 s.h.
General principles and basic mechanisms of chemical and pharmaceutical toxicology; drug/toxicant disposition, including biotransformation and bioactivation to electrophiles.
- PHAR:6502 Toxic Agents and Concepts in Toxicology** 1 s.h.
Specific classes of toxicants and non-organ directed toxicity, including chemical carcinogenesis, oxidative stress, teratogenesis; clinical toxicology, antidotes, methods and models in toxicology.
- PHAR:6503 Target-Organ Toxicity** 1 s.h.
Role of drugs/toxicants in systems toxicity (target organ); hepatotoxicity, neurotoxicity, cardiotoxicity, and toxic responses of immune system.
- PHAR:6504 Mastering Reproducible Science** 1 s.h.
Training in methods for conducting rigorous and reproducible science; features an array of faculty who provide lectures and discussions based on their areas of expertise (i.e., research with animals, synthetic chemistry, high throughput screening, etc.) to provide broad exposure and training in these areas; critical evaluation of literature outside of student's own specific field of study.
- PHAR:6700 Advanced Pharmacokinetics and Pharmacodynamics** 3 s.h.
Application of pharmacokinetics and pharmacodynamics principles in pharmaceutical research. Prerequisites: PHAR:8146 or PHAR:4146. Requirements: two semesters of calculus and one semester of statistics.
- PHAR:6701 Stability of Pharmaceuticals** 3 s.h.
Mechanisms of degradation of pharmaceuticals; prediction of shelf life of pharmaceuticals, stabilization. Prerequisites: CHEM:4432.
- PHAR:6706 Equilibria Processes** 3 s.h.
Equilibria pertaining to ionic systems, complexation, partitioning, solubility. Prerequisites: CHEM:2220 or CHEM:2240.
- PHAR:6710 Pharmaceutics Graduate Seminar** 1-2 s.h.
- PHAR:6720 Pharmaceutics Research** arr.
- PHAR:7101 Principles of Experimental Therapeutics** 3 s.h.
Introduction to key principles and concepts for research in experimental therapeutics; basic principles related to drug disposition, toxicity, and efficacy.
- PHAR:7102 Applied Clinical and Translational Science** 3 s.h.
Application of clinical and translational science in a multidisciplinary collaborative environment to develop, conduct, and report research.

- PHAR:7331 Analytic Issues in Health Services Research II** 3 s.h.
Continuation of HMP:7960; advanced applications, including panel data and qualitative response models. Prerequisites: HMP:7960. Same as HMP:7965.
- PHAR:7701 Surface Phenomena** arr.
Behavior of matter in phase boundaries, especially adsorptive processes at liquid-solid and vapor-solid interfaces. Prerequisites: CHEM:4431.
- PHAR:7703 Transport Phenomena** 3 s.h.
Diffusion and mass transport phenomena related to pharmaceutical systems.
- PHAR:8130 Foundations of Pharmacy Practice I** 4 s.h.
Introduction to contemporary pharmacy practice; small-group discussion, application of core concepts through active hands-on learning approaches; for first-year student pharmacists. Requirements: P1 standing.
- PHAR:8131 Engagement: Professional Skills and Values** 2 s.h.
Opportunity for student engagement in the College of Pharmacy prior to Professionalism Ceremony; development as a responsible partner in learning process by nurturing collaboration, leadership, service, compassion, community, self development, and social enrichment among students, faculty, and staff. Requirements: P1 standing.
- PHAR:8132 Continuing Professional Development** 1 s.h.
Engagement with profession of pharmacy and community through service and leadership activities, reflection; use of Continuous Professional Development Cycle (CPD) approach to learning. Requirements: P3 standing.
- PHAR:8133 Introductory Pharmacy Practice Experience Career Exploration** 1 s.h.
Hands-on exposure to various pharmacist career opportunities in four different pharmacy practice patient care settings; settings include practice areas and rotation types required for P4 Advanced Pharmacy Practice Experience (APPE) sites in community pharmacy, hospital pharmacy, ambulatory care/family practice, acute care medicine, and other elective practice settings; work with faculty mentor. Requirements: P1 standing.
- PHAR:8134 Foundations of Health Services** 3 s.h.
Foundation issues for pharmacist practice related to social, cultural, behavioral, economic, and organization design components of pharmacy care. Requirements: P1 standing.
- PHAR:8135 Health Information Retrieval and Informatics** 3 s.h.
Introduction and overview of health care information retrieval, organization, and dissemination; retrieval and organization of health information from pharmacy and medical primary and tertiary literature using secondary resources; knowledge and skills to manage, analyze, and legally share health information in electronic health records, pharmacy information systems, and automated systems. Requirements: P1 standing.
- PHAR:8136 Foundations of Pharmaceutical Sciences** 6 s.h.
Introduction and overview of foundations of pharmaceutical sciences. Requirements: P1 standing.
- PHAR:8140 Foundations of Pharmacy Practice II** 4 s.h.
Introduction to contemporary pharmacy practice for first-year student pharmacists; classroom methods include small group discussion-based and active hands-on learning approaches where students will apply core concepts.
- PHAR:8141 Discovery I: Introduction and Background** 3 s.h.
Create and disseminate new knowledge related to pharmacy or health care; broadly based scholarly effort with topics ranging from patient case studies, literature reviews, and analysis of pharmacy practice problems or basic research.
- PHAR:8142 Foundations of Health, Wellness, and Disease** 2 s.h.
Overview of the basic processes of good health and practices that promote wellness; emphasis on the mechanistic causes of human disease.
- PHAR:8146 Foundations of Pharmaceutical Sciences III** 2 s.h.
Continuation of PHAR:8137.
- PHAR:8147 Foundations of Pharmaceutical Sciences IV** 3 s.h.
Continuation of PHAR:8146.
- PHAR:8148 Pharmacokinetics and Dose Optimization** 2 s.h.
- PHAR:8149 Foundations of Pharmacology and Toxicology** 3 s.h.
Principles of pharmacology and toxicology.
- PHAR:8150 Foundations of Health, Wellness, and Disease** 2 s.h.
Overview of basic processes of good health and practices that promote wellness; emphasis on mechanistic causes of human disease.
- PHAR:8151 Discovery I: Introduction and Background** 3 s.h.
Creation and dissemination of new knowledge related to pharmacy or health care; broadly based scholarly effort with topics ranging from patient case studies, literature reviews, and analysis of pharmacy practice problems or basic research.
- PHAR:8152 Fundamentals of Compounding** 1 s.h.
Introduction to personalized drug delivery systems through the art of compounding.
- PHAR:8153 Integrated Pharmacotherapy: Dermatology and Sensory** 2 s.h.
Key elements of science and practice of pharmacy presented in an integrated manner and focused on particular organ systems or disease states. Requirements: P1 standing.
- PHAR:8202 Pharm.D. Learning Portfolio I** 1 s.h.
Students demonstrate and document mastery of experiential and didactic coursework and assignments, as well as self-assessment of their progress. Requirements: P2 standing.
- PHAR:8205 Student Pharmacist Professionalism** 1 s.h.
Participation in activities promoting leadership and professional learning, and service learning; required participation P1 through P3 years.
- PHAR:8207 Introductory Pharmacy Practice Experiences Community** 3 s.h.
Exposure to the provision of care in a community pharmacy setting; activities focus on those experiences related to the community pharmacy environment, medication distribution, special products and populations, and related professional activities; delivered in set time blocks over winter break and during summer session before or after the P2 year.

PHAR:8209 Introductory Pharmacy Practice Experiences Hospital 3 s.h.

Exposure to the provision of care in a hospital pharmacy setting; activities focus on those experiences related to the hospital pharmacy environment, medication distribution, special products and populations, and related professional activities.

PHAR:8250 Applications of Pharmacy Practice I 1 s.h.

Expands on skills and concepts taught in the foundations of pharmacy practice course series and includes skills relevant to the disease states in the specific aligned component courses; taught using a variety of classroom methods including small-group, discussion-based, and active hands-on learning approaches where students will apply core concepts.

PHAR:8251 Integrated Pharmacotherapy: Dermatology and Sensory 3 s.h.

Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.

PHAR:8252 Integrated Pharmacotherapy: Musculoskeletal 4 s.h.

Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.

PHAR:8253 Integrated Pharmacotherapy: Genitourinary and Reproductive 3 s.h.

Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.

PHAR:8254 Integrated Pharmacotherapy: Endocrine 3 s.h.

Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.

PHAR:8255 Discovery II: Design and Methods arr.

Create and disseminate new knowledge related to pharmacy or health care with emphasis on design methods and data collection.

PHAR:8260 Integrated Pharmacotherapy: Cardiovascular 4 s.h.

Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.

PHAR:8261 Integrated Pharmacotherapy: Neurology and Psychiatry 4 s.h.

Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.

PHAR:8262 Integrated Pharmacotherapy: Oncology 3 s.h.

Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.

PHAR:8263 Integrated Pharmacotherapy: Infectious Diseases 4 s.h.

Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.

PHAR:8264 Discovery III: Data Collection and Results 1 s.h.

Create and disseminate new knowledge related to pharmacy or health care with emphasis on data collection and results.

PHAR:8265 Applications of Pharmacy Practice II 1 s.h.

Expands on skills and concepts taught in the foundations of pharmacy practice course series and includes skills relevant to the disease states in the specific integrated pharmacotherapy courses; taught using a variety of classroom methods including small group, discussion-based, and active hands-on learning approaches where students apply core concepts.

PHAR:8300 Introduction to Clinical Pharmacy Practice 1 s.h.

Clinical practice experience observing and participating in clinical activities with P4 students, faculty, and other health care providers. Requirements: P3 standing.

PHAR:8301 Introductory Pharmacy Practice Experience Clinical 1 s.h.

This third IPPE clinical is completed as an introduction to the Advanced Pharmacy Practice Experiences (APPE) to which student pharmacists are exposed during their P4 year; the IPPE clinical involves a P3 student observing and participating with a P4 student currently on an APPE rotation.

PHAR:8303 Clinical Practice Skills III: Applied Patient Management 2 s.h.

Continuation of PHAR:8302; development of professional skills required for delivery of patient care; patient assessment, clinical decision making, communication (written and oral), teamwork. Corequisites: PHAR:8342. Requirements: P3 standing.

PHAR:8306 Pharmacy Practice Lab VI 2 s.h.

Practical application of scientific and clinical knowledge in the provision of patient-centered care; activities include medication therapy management for patients, prescription and self-care counseling, and application of drug information skills. Corequisites: PHAR:8342 and PHAR:8343, if not taken as prerequisites. Requirements: P3 standing.

PHAR:8309 Pharmacy Management and Marketing 2 s.h.

Application of management principles to pharmacy practice; marketing techniques for pharmacy practice; operations, human resources, finance, quality improvement and service marketing management.

PHAR:8342 Neurology/Psychiatry Therapeutics 2 s.h.

Pharmacotherapy for psychiatric and neurologic disorders; review of disorders, therapeutic goals, treatment plans, patient counseling, monitoring of patient outcomes. Requirements: P3 standing.

PHAR:8343 Infectious Disease Therapeutics 2 s.h.

Pharmacotherapy for infectious diseases; review of disease, therapeutic goals, treatment plans, patient counseling, monitoring of patient outcomes. Requirements: P3 standing.

PHAR:8370 Integrated Pharmacotherapy: Respiratory and Allergy 3 s.h.

Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.

PHAR:8371 Integrated Pharmacotherapy: Oncology and Hematology 3 s.h.

Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.

PHAR:8372 Integrated Pharmacotherapy: Gastroenterology and Nutrition 3 s.h.

Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.

PHAR:8373 Integrated Pharmacotherapy: Renal, Fluids, and Electrolytes 2 s.h.

Key elements of the science and practice of pharmacy presented in an integrated manner focused on particular organ systems or disease states.

PHAR:8374 Applications of Pharmacy Practice III 1 s.h.

Expands on skills and concepts taught in the foundations of pharmacy practice course series and includes skills relevant to the disease states in the specific aligned component courses; taught using a variety of classroom methods including small group, discussion-based, and active hands-on learning approaches where students apply core concepts.

PHAR:8375 Advanced Topics in Health Services 2 s.h.

Exploration of advanced topics in health service.

PHAR:8376 Discovery IV: Presentation of Results 1 s.h.

Dissemination and presentation of new knowledge related to pharmacy or health care with emphasis on design methods and data collection.

PHAR:8377 Integrated Pharmacotherapy: Capstone 4 s.h.

Capstone serves as a culminating academic and research project for students and mentors, integrating all areas of professional discovery.

PHAR:8378 Pharmacy Law and Ethics 2 s.h.

Topics include ethical behavior for pharmacists and student of pharmacy law.

PHAR:8379 Advanced Pharmacy Practice Experiences Preparation 1 s.h.

Guidance provided for advanced pharmacy practice experiences.

PHAR:8380 Learning Portfolio 1 s.h.

Compilation of student work.

PHAR:8387 Capstone: Skills-Based Assessment 1 s.h.

Further development of assessment skills.

PHAR:8400 Introductory Pharmacy Practice Experience Transitions 1 s.h.

This final IPPE transitions is completed as an introduction to the Advanced Pharmacy Practice Experiences (APPE) to which student pharmacists are exposed during the P4 year; student pharmacists work alongside a pharmacist preceptor to assist them in making a smooth transition to the APPE curriculum; students identify, collect pertinent information, evaluate, and document a patient case or problem encountered at a pharmacy practice site.

PHAR:8402 Pharm.D. Learning Portfolio II 1 s.h.

Students continue to demonstrate and document mastery of experiential and didactic coursework and assignments, as well as self-assessment of progression. Requirements: P4 standing.

PHAR:8500 Advanced Drug Literature Evaluation and Application 2 s.h.

Critical evaluation, utilization, and clinical application of drug literature.

PHAR:8501 Introduction to Nuclear Pharmacy 2 s.h.

Nuclear pharmacy as a specialty area of pharmacy practice that involves preparation of radioactive materials for patient administration.

PHAR:8502 Advanced Pharmacopalliation of Pain 2 s.h.

Exploration of symptom management across the trajectory of serious illness through a series of longitudinal patient cases.

PHAR:8503 Advanced Pharmacopalliation of Non-Pain Symptoms 3 s.h.

Terminal extubation, terminal agitation, discontinuing life sustaining therapies, and pharmacokinetic and pharmaceutical issues in advanced illness.

PHAR:8504 Sustained Clinical Pharmacy Services 2 s.h.

Pharmacists may find themselves needing to justify their salary, the cost effectiveness of their pharmacy services, or may wish to create a new clinical service; introduction to pharmacists' role in initiating and sustaining clinical services in the ambulatory setting; writing a business plan; identifying and communicating with key stakeholders; finding billable opportunities.

PHAR:8505 Advanced Topics in Infectious Disease, HIV, and Antimicrobial Therapy 2 s.h.

Topics in antimicrobial treatment of infectious diseases beyond those in the required pharmacy curriculum, including topics covered in the infectious disease therapeutics course; lectures, case discussion, class participation, and summary presentations of an uncommon organism or antimicrobial agent.

PHAR:8506 Health Informatics Essentials 2 s.h.

Health informatics as a multidisciplinary field that uses health information technology to improve health care services for patients.

PHAR:8507 Personal and Professional Transformation 2 s.h.

How to maximize personal and professional goals; focus on what students want to achieve in their personal and professional life.

PHAR:8508 Interprofessional Case Studies 2 s.h.

Interdisciplinary collaboration to formulate pharmacologic treatments of common diseases; case-based learning utilized with peer teaching; medical and pharmacy students revisit and share foundational science concepts from their disciplines, including mechanisms of health and disease and principles of pharmacokinetics and pharmacodynamics; discussions led by students and facilitated with a Carver College of Medicine clinician and a College of Pharmacy clinical pharmacist; students formulate treatment plans using the World Health Organization's six step approach to good prescribing. Requirements: P3 standing.

PHAR:8702 Dean's Pharmacy Forum II 2 s.h.

Contemporary issues in pharmacy practice, pharmacy education, and health care.

PHAR:8706 Pharmacy Projects arr.

Basic and applied research problems of pharmaceutical interest.

PHAR:8708 Substance Abuse 2 s.h.

Themes and concepts in substance abuse and treatment; stimulants, depressants, alcohol, opiates, hallucinogenics, steroids; drug abuse prevention and treatment, including dual diagnosis, from cradle to the grave.

PHAR:8709 Pharmacist Role in Health Coaching and Nutrition 2 s.h.

Exploration of pharmacist role in health coaching and nutrition.

PHAR:8712 Nonprescription Pharmacotherapy and Self-Care 2 s.h.

Introduction to nonprescription medications; development of patient assessment and consultation skills; understanding of pharmacist's role in patient self-care. Requirements: P3 standing.

- PHAR:8717 Ambulatory Care Pharmacy** 2 s.h.
Additional experience in the practice of clinical pharmacy; focus on key therapeutic areas where ambulatory care clinical pharmacists currently have a significant impact improving patient care, including anticoagulation management, hyperlipidemia management, and diabetes management; opportunity to develop expertise in clinical decision making, improve problem solving abilities, and continued development in writing and oral presentation skills. Prerequisites: PHAR:8243. Requirements: P3 standing.
- PHAR:8718 Special Topics in Acute Care** 2 s.h.
Pharmacotherapy for common but varied inpatient medicine topics; review of disorder, therapeutic goals, treatment plans, patient education, monitoring; lecture or case-based classes; anticoagulation, hemostasis, diabetic ketoacidosis, ICU overview, hepatic failure, renal replacement therapies, ACLS, antimicrobial and antifungal selection, septic shock, cardiogenic shock, neurogenic shock and neuro/neurosurgical emergencies, burns, sedation.
- PHAR:8721 Leadership and Political Advocacy** arr.
Contemporary issues in pharmacy; role of leadership and advocacy in shaping profession; becoming effective advocates within political and policy making process; development of advocacy and leadership skills essential to improve self, profession, and community. Requirements: P1, P2, or P3 standing. Recommendations: PHAR:8702 and PHAR:8722.
- PHAR:8722 Current Topics in Health Policy** 2 s.h.
Legislative process and broad range of current issues in health policy; general- and pharmacy-specific health policy topics at state and federal levels. Requirements: P1, P2, P3, or graduate standing.
- PHAR:8723 Infectious Disease for Acute Care Practice** 1 s.h.
Contemporary issues related to infectious diseases; unusual pathogens such as Ebola, tropical medicine, bioterrorism, resistance, travel medicine, epidemiology.
- PHAR:8724 Hospital Pharmacy Practice Management Elective** 2 s.h.
Organizational structure of pharmacy departments in hospitals and health care systems; models for delivery of pharmaceutical care; pharmacy's role in drug-policy decision making; provision of drug information; clinical and distributive pharmacy services; control of pharmacy and pharmacy costs; use of information technology and automation for service delivery; supervisory management; quality improvement. Requirements: P3 standing.
- PHAR:8725 Career Pathways in Pharmacy** 1 s.h.
Career preparation through writing, speaking, reading, and listening; writing résumés, curricula vitae, cover letters; interviewing techniques; electronic portfolios; web-based career information; guest speakers from pharmacy associations, major chains; workshop approach. Requirements: P2 or P3 standing.
- PHAR:8790 Sustainable Clinical Pharmacy Services: Leadership, Management, and Implementation** 2 s.h.
Practical knowledge and understanding of how to implement and sustain clinical pharmacy services in a variety of practice settings; how to identify outcomes to evaluate the success of ongoing services; students explore the perspective of leadership and management as it pertains to clinical pharmacy services.
- PHAR:8791 Survey of Basic Pharmaceutical Sciences** 1 s.h.
Aspects of drug discovery and development; seminar with guest speakers from industry. Requirements: admission to Pharm.D. program.
- PHAR:8792 Spanish for the Pharmacy Profession** 2 s.h.
Intermediate to advanced professional Spanish communication skills for the pharmacist. Requirements: one year of college-level Spanish.
- PHAR:8793 Introduction to Global Health Studies** 1 s.h.
Overview of topics pertaining to international health and cultural diversity in relation to pharmacy and global health; preparation for student pharmacists to become health care practitioners who optimize the health of patients and society; inspires students to advance the profession by fostering collaboration, global and public health leadership, professionalism and civic engagement; introduction and discussion of important topics in global health, focusing specifically on care of the underserved in a global context.
- PHAR:8794 Emergency Medicine and Toxicology** 2 s.h.
Pharmacology in the world of emergency medicine and toxicology; students learn through lecture, case discussion, class participation, and evaluation of evidence-based medicine literature in emergency medicine and toxicology.
- PHAR:8795 Foundations of Palliative Care** 2 s.h.
Introduction to palliative care as a public health issue; exploration of the principles and practice of palliative care including interdisciplinary care of the whole person and family, communication, and self care.
- PHAR:8796 Introduction to Travel Medicine** 1 s.h.
Overview of services provided to travelers to prevent and management conditions that may arise prior to, during, and after international travel; students learn about topics pertaining to each of these areas.
- PHAR:8797 Ethics and Spirituality in Health Care** 3 s.h.
Case-based examination of ethical issues in caring for patients with serious illness; exploration of suffering, spirituality, death, and dying. Requirements: P2 or P3 standing.
- PHAR:8798 Continuing Professional Development in Palliative Care** 1 s.h.
Self-directed learning and development in palliative care; creation and implementation of a professional development plan including activities in service, scholarship and education, leadership and advocacy, and self-care and personal resilience.
- PHAR:8799 Active Residency Preparation** 2 s.h.
Students develop the best understanding of what a residency is, what programs exist, the usual qualifications for placement, and the necessary pathway and components of residency attainment; hands-on experience with preparation process; for pharmacy students interested in pursuing residency training following graduation. Requirements: P3 standing.
- PHAR:8811 New Drugs for New Therapies: Introduction to Drug Discovery, Development, and Registration** 1-2 s.h.
From "magic bullets" to "personalized medicine," the quest for new drugs to treat disease involves serendipity, science, and business success; through lectures, presentations, readings, and discussion, students will learn how potential new drug therapies are identified and what happens between finding a drug that seems to work and the launch of a commercial drug product.

- PHAR:8818 Nutritional Supplements in Health and Disease: Mechanisms and Actions** 3 s.h.
Mechanisms of action and current use of common dietary supplements including vitamins, minerals, herbals and botanicals, amino acids, and enzymes; focus on evidence-based approaches to functional use of supplements and their roles in achieving and maintaining health.
- PHAR:9401 Ambulatory Care Rotation** 6 s.h.
Clinical experience in providing pharmaceutical care in outpatient clinic settings. Requirements: P4 standing.
- PHAR:9402 Elective Ambulatory Care Rotation** 6 s.h.
Clinical experience providing pharmaceutical care in specialty outpatient settings. Requirements: P4 standing.
- PHAR:9403 Elective Nuclear Pharmacy Rotation** 6 s.h.
Practical experience in the handling and clinical use of radiopharmaceuticals. Requirements: P4 standing.
- PHAR:9404 Community Clinical Rotation** 6 s.h.
Clinical experience in the community setting; emphasis on delivery of pharmaceutical care. Requirements: P4 standing.
- PHAR:9405 Elective Hospice and Palliative Care Rotation** 6 s.h.
Clinical experience providing pharmacotherapy for end-of-life care. Requirements: P4 standing.
- PHAR:9406 Elective: Drug Information Rotation** 6 s.h.
Practice experience applying drug information knowledge to service and research projects. Requirements: P4 standing.
- PHAR:9407 Elective Family Medicine Rotation** 6 s.h.
Clinical practice experience applying primary care therapeutics in family medicine practice settings. Requirements: P4 standing.
- PHAR:9408 Elective Hematology/Oncology Rotation** 6 s.h.
Drug therapy management of oncology patients and patients with hematologic malignancies, aplastic anemia, sickle cell disease, hemophilia. Requirements: P4 standing.
- PHAR:9409 Elective Home Health Care Rotation** 6 s.h.
Clinical experience in the team approach to health care delivery, including total parenteral nutrition, chemotherapy, intravenous antibiotics, lab analysis, hospice care, and pain management. Requirements: P4 standing.
- PHAR:9410 Hospital Pharmacy Rotation** 6 s.h.
Instruction and practical experience in various components of hospital pharmacy; emphasis on hospital organization, inpatient and outpatient services, IV admixtures, unit dose, and clinical services. Requirements: P4 standing.
- PHAR:9411 Elective Long Term Care Rotation** 6 s.h.
Practice in consulting and providing services to varied long-term patient care environments. Requirements: P4 standing.
- PHAR:9412 Elective Managed Care Rotation** 6 s.h.
Practice experience in providing pharmaceutical care or pharmacy-related services in a managed care organization. Requirements: P4 standing.
- PHAR:9413 Acute Care Medicine Rotation** 6 s.h.
Clinical experience applying therapeutic skills for the pharmacotherapeutic management of patients on general medicine or specialty inpatient areas. Requirements: P4 standing.
- PHAR:9415 Elective: Pediatrics Rotation** 6 s.h.
Clinical experience in drug therapy management of general and specialty pediatric patients. Requirements: P4 standing.
- PHAR:9416 Elective: Pharmacy Rotation** 6 s.h.
Selected practice experiences in various pharmacy practice settings. Requirements: P4 standing.
- PHAR:9417 Elective Psychiatry Rotation** 6 s.h.
Clinical experience in the rational use of drugs in psychiatric disorders. Requirements: P4 standing.
- PHAR:9418 Elective Research Rotation** 6 s.h.
Practice experience in basic pharmaceutical or clinical research; proposal, study design, data collection and analysis, presentation of results. Requirements: P4 standing.
- PHAR:9419 Elective: Surgery Rotation** 6 s.h.
Clinical experience in drug therapy management on a surgery unit. Requirements: P4 standing.
- PHAR:9420 Elective Pharmacy Practice Underserved Population Rotation** 6 s.h.
Opportunity to learn the best practices for pharmaceutical management; approaches to enhance access to and appropriate use of medicines in underserved and resource-limited environments. Requirements: P4 standing.
- PHAR:9421 Elective Community Management Rotation** 6 s.h.
Practice exposure to community pharmacy operations and management at the store, district, or corporate level. Requirements: P4 standing.
- PHAR:9422 Elective: Compounding/Complementary Alternative Medicine Rotation** 6 s.h.
Clinical work in a community setting with focus on team approach; experience developing extemporaneous compounds to optimize patient care and/or integrating traditional and nontraditional medicine. Requirements: P4 standing.
- PHAR:9423 Elective: Critical Care Medicine Rotation** 6 s.h.
Practice experience providing pharmaceutical services to intensive care unit patients. Requirements: P4 standing.
- PHAR:9424 Elective Emergency Medicine Rotation** 6 s.h.
Clinical experience providing pharmaceutical care for patients treated in the emergency department. Requirements: P4 standing.
- PHAR:9425 Elective Hospital Management Rotation** 6 s.h.
Practice experience in hospital pharmacy operations and management. Requirements: P4 standing.
- PHAR:9426 Elective Infectious Disease Rotation** 6 s.h.
Clinical experience providing pharmacotherapeutic management of patients receiving antimicrobial medications. Requirements: P4 standing.
- PHAR:9427 Elective Medication Use Evaluation Rotation** 6 s.h.
Practical experience in drug use evaluation to improve patient outcomes. Requirements: P4 standing.
- PHAR:9428 Elective Pharmacy Industry Rotation** 6 s.h.
Practice experience in an area of the pharmaceutical or related industries. Requirements: P4 standing.
- PHAR:9429 Elective: Pharmacy Regulatory Rotation** 6 s.h.
Practice experience with a pharmacy regulatory body. Requirements: P4 standing.

**PHAR:9430 Elective: Professional Association
Rotation 6 s.h.**

Practice experience in professional association management environment at the state or national level. Requirements: P4 standing.

**PHAR:9431 Elective: Veterinary Pharmacy
Rotation 6 s.h.**

Practice experience in managing drug therapy for animals. Requirements: P4 standing.

PHAR:9432 Elective Community Rotation 6 s.h.

Community pharmacy experience emphasizing patient-centered care. Requirements: P4 standing.

PHAR:9433 Elective Academic Rotation 6 s.h.

Practice experience delivering pharmacy education with a College of Pharmacy faculty member. Requirements: P4 standing.

PHAR:9434 Elective International Pharmacy Non-Patient Care Rotation 6 s.h.

Practice experiences in pharmacy practice outside the United States with a focus on research, health care policy, and/or pharmacy education. Requirements: P4 standing.

PHAR:9435 Administrative Bye Rotation 6 s.h.

PHAR:9436 Elective Transitions of Care Rotation 6 s.h.

Practice experience consulting and providing services to patients transitioning through different patient care environments.

PHAR:9437 Elective Informatics Rotation 6 s.h.

Practice experience in informatics in health care setting.

PHAR:9438 Elective International Pharmacy Patient Care Rotation 6 s.h.

Practice experiences in pharmacy practice outside the United States with a patient care focus.

PHAR:9440 Elective Virtual Rotation 6 s.h.

Experience with disease state management and board preparation; students examine medical literature to answer drug information questions, reflect on current issues facing the medical community, and identify potential solutions to problems for individual patients and populations; activities are intended to guide students toward professional competency. Requirements: P4 standing.

Drug Delivery, Certificate

Requirements

The undergraduate Certificate in Drug Delivery requires a minimum of 18 s.h. of credit. Students must maintain a g.p.a. of at least 2.50 in required coursework for the certificate. The certificate may be earned by any student admitted to the University of Iowa who is not concurrently enrolled in a UI graduate or professional degree program.

Students may count a maximum of 6 s.h. completed for a major, minor, or another certificate toward the Certificate in Drug Delivery.

The certificate program offers students the opportunity to become knowledgeable about techniques used to provide and administer drugs to humans and to animals. Students learn about the selection of materials for use in drug products; characteristics of delivery systems used for injectable, oral, and topical drugs; targeting strategies to limit side effects; design strategies to match drugs with biologics; product quality standards and testing; and the role of drug development in the regulatory approval process. They will be prepared for opportunities in the biopharmaceutical and pharmaceutical industries; health sciences professions; regulatory agencies; or for advanced graduate or professional education.

Some of these courses have prerequisites; students must complete all of a course's prerequisites before they may register for a course. Prerequisite coursework does not count toward certificate requirements.

The Certificate in Drug Delivery requires the following coursework.

Code	Title	Hours
One of these:		
PHAR:1100	Introduction to Pharmaceutical Sciences: Drug Development	2
PHAR:1111	Need a New Drug?	1
All of these:		
PHAR:4146	Drug Disposition and Pharmacokinetics	2
PHAR:4736	Properties of Dosage Forms I	3
PHAR:4737	Properties of Dosage Forms II	3
PHAR:4740	Materials in Drug and Gene Delivery	3
PHAR:4745	Drug Delivery I	3
PHAR:4800	Chemical and Biophysical Properties of Drugs	1
One of these:		
Pharmaceutical chemical analysis course (consult advisor)		4
Bioanalytical techniques course (consult advisor)		2

Admission

Applicants must have a cumulative g.p.a. of at least 3.00, and earn a minimum grade of B-minus in all prerequisite coursework. Those who do not meet the admission requirements should contact the associate dean for

undergraduate education to discuss admission to the certificate program.

Students must submit an enrollment questionnaire to the College of Pharmacy's Office of Undergraduate Education (OUE) to request admission to the certificate program.

Drug Discovery, Certificate

Requirements

The undergraduate Certificate in Drug Discovery requires a minimum of 16 s.h. of credit. Students must maintain a g.p.a. of at least 2.50 in required coursework for the certificate. The certificate may be earned by any student admitted to the University of Iowa who is not concurrently enrolled in a UI graduate or professional degree program.

Students may count a maximum of 6 s.h. completed for a major, minor, or another certificate toward the Certificate in Drug Discovery.

The certificate program provides an introduction to the properties of molecules that influence their suitability and effectiveness as drug therapies. Students learn about concepts and approaches used in successful drug design; synthetic and biological approaches to produce high-quality drug substances; common metabolic and toxicologic pathways that affect drug safety; biological targets for drug action and high throughput methods leading to the discovery of active drug molecules; chemical and material properties of active agents suitable for drug product development; and the approval process for drug candidates. They will be prepared for opportunities in the pharmaceutical and biotechnology industries, regulatory agencies or sciences, or for advanced graduate or professional education.

Some of these courses have prerequisites; students must complete all of a course's prerequisites before they may register for a course. Prerequisite coursework does not count toward certificate requirements.

The Certificate in Drug Discovery requires the following coursework.

Code	Title	Hours
One of these:		
PHAR:1100	Introduction to Pharmaceutical Sciences: Drug Development	2
PHAR:1111	Need a New Drug?	1
All of these:		
PHAR:1200	Medicines That Changed or Will Change the World	1
PHAR:4501	Basic Principles of Toxicology	1
PHAR:4502	Toxic Agents	1
PHAR:4503	Organ and Organism Toxicity	1
PHAR:4512	Principles of Drug Discovery	3
PHAR:4800	Chemical and Biophysical Properties of Drugs	1
Principles and approaches to medicinal chemistry course (consult advisor)		3
Small molecule drug design course (consult advisor)		3
One of these:		
PHAR:4521	High Throughput Screening in Drug Discovery	1

Introduction to biocatalysis in drug discovery course (consult advisor)

2

Admission

Applicants must have a cumulative g.p.a. of at least 3.00, and earn a minimum grade of B-minus in all prerequisite coursework. Those who do not meet the admission requirements should contact the associate dean for undergraduate education to discuss admission to the certificate program.

Students must submit an enrollment questionnaire to the College of Pharmacy's Office of Undergraduate Education (OUE) to request admission to the certificate program.

Drug Disposition and Metabolism, Certificate

Requirements

The undergraduate Certificate in Drug Disposition and Metabolism requires a minimum of 17 s.h. of credit. Students must maintain a g.p.a. of at least 2.50 in required coursework for the certificate. The certificate may be earned by any student admitted to the University of Iowa who is not concurrently enrolled in a UI graduate or professional degree program.

Students may count a maximum of 6 s.h. completed for a major, minor, or another certificate toward the Certificate in Drug Disposition and Metabolism.

The certificate program prepares students to quantitatively describe the distribution properties of drugs throughout the body in order to optimize drug action and predict and prevent toxicity. Courses focus on the molecular basis for drug action; identification of common chemical properties and biochemical transformations that result in toxic responses; and recognition of biochemical pathways affected by environmental, drug, food, and accidental exposures. Additional courses provide an understanding of the role of drug development in the regulatory approval process. Students will be prepared to play important roles in biomedical and clinical investigation with additional opportunities in the biotechnology, biopharmaceutical, and pharmaceutical industries; health sciences professions; regulatory agencies; or for advanced graduate or professional education.

Some of these courses have prerequisites; students must complete all of a course's prerequisites before they may register for a course. Prerequisite coursework does not count toward certificate requirements.

Certificate students have the option to select from two certificate subprograms—kinetic processes and modeling, or toxicology. Students take the courses required for all certificate students and the course(s) for their subprogram from the following.

Code	Title	Hours
Required Courses		
All students complete the required coursework below.		
One of these:		
PHAR:4480	Introduction to Human Pharmacology	3
PCOL:2220	Drug Use and Abuse	3
PCOL:4130	Drug Mechanisms and Actions	3
One of these:		
PHAR:1100	Introduction to Pharmaceutical Sciences: Drug Development	2
PHAR:1111	Need a New Drug?	1
All of these:		
PHAR:1200	Medicines That Changed or Will Change the World	1
PHAR:4146	Drug Disposition and Pharmacokinetics	2

PHAR:4480	Introduction to Human Pharmacology	3
PHAR:4512	Principles of Drug Discovery	3
PHAR:4537	Principles of Drug Metabolism	3
PHAR:4800	Chemical and Biophysical Properties of Drugs	1

Kinetic Processes and Modeling Subprogram

Kinetic processes and modeling students take this course:

PHAR:6700	Advanced Pharmacokinetics and Pharmacodynamics	3
-----------	--	---

Toxicology Subprogram

Toxicology students take these courses:

PHAR:4501	Basic Principles of Toxicology	1
PHAR:4502	Toxic Agents	1
PHAR:4503	Organ and Organism Toxicity	1

Admission

Applicants must have a cumulative g.p.a. of at least 3.00, and earn a minimum grade of B-minus in all prerequisite coursework. Those who do not meet the admission requirements should contact the associate dean for undergraduate education to discuss admission to the certificate program.

Students must submit an enrollment questionnaire to the College of Pharmacy's Office of Undergraduate Education (OUE) to request admission to the certificate program.

Doctor of Pharmacy, Pharm.D.

Requirements

The Doctor of Pharmacy (Pharm.D.) program provides professional education in a number of areas, including pharmaceutical technology, biopharmaceutics, medicinal chemistry and natural products, pharmaceutical socioeconomics, pharmacotherapy, patient care, clinical and hospital pharmacy, and aspects of biotechnology. Graduates of the program are qualified to take the Iowa Board of Pharmacy examination that is required for licensure as a pharmacist.

The program requires four years of full-time pharmacy study preceded by at least two years of pre-pharmacy study in the College of Liberal Arts and Sciences at the University of Iowa or at an accredited community or liberal arts college in the United States or Canada. During pre-pharmacy study, students complete the prerequisites for admission to the Pharm.D. program (see Admission [p. 1864] in this section of the Catalog for a list of prerequisite coursework). If possible, students should complete all 20 s.h. of their general education work before they enter the Pharm.D. program. Courses in moral reasoning or ethics, communication, computer science, business, behavioral and social sciences, and the humanities are recommended. Courses in physical education skills, applied music, and studio art do not count toward the general education electives requirement. Students must maintain a pharmacy and cumulative g.p.a. of at least 2.00.

For rules and regulations concerning academic probation, pass/nonpass, credit by examination, maximum schedule, second-grade-only option, waiver or substitution of courses, cancellation of registration, and drop date, see Student Resources on the College of Pharmacy website.

The College of Pharmacy provides students with the highest possible quality in the professional experiential program. Faculty and adjunct faculty serve as preceptors, providing introductory and advanced practice experience at institutions and pharmacies in Iowa, nationwide, and around the world.

Professional Curriculum

The Pharm.D. degree requires the coursework listed below, including at least 6 s.h. of professional electives. In addition, students must complete all prerequisites for admission to the Pharm.D. program, including a minimum of 12 s.h. of general education courses chosen from behavioral, social, humanistic, and business disciplines (see Admission [p. 1864] in this section of the Catalog). They also must complete an additional 8 s.h. of general education coursework either before or after admission to the Pharm.D. program.

First Year

Code	Title	Hours
Fall Semester		
PHAR:8130	Foundations of Pharmacy Practice I	4
PHAR:8131	Engagement: Professional Skills and Values	2

PHAR:8133	Introductory Pharmacy Practice Experience Career Exploration (unless taken spring semester)	1
PHAR:8134	Foundations of Health Services	3
PHAR:8135	Health Information Retrieval and Informatics	3
PHAR:8136	Foundations of Pharmaceutical Sciences	6

PHAR:8378	Pharmacy Law and Ethics	2
PHAR:8379	Advanced Pharmacy Practice Experiences Preparation	1

One additional rotation numbered PHAR:9401 through PHAR:9433 may be taken

Third Year Spring Semester and Fourth Year: Advanced Pharmacy Practice Rotations

During the spring semester of the third year and the fourth year, students are required to complete nine or ten advanced pharmacy practice rotations. All students must complete the first four rotations listed below (24 s.h.); the remaining rotations may be selected by the student.

Code	Title	Hours
All of these:		
PHAR:9401	Ambulatory Care Rotation	6
PHAR:9404	Community Clinical Rotation	6
PHAR:9410	Hospital Pharmacy Rotation	6

Professional Electives

Pharm.D. students must complete at least 6 s.h. of professional electives, which they may choose from the following list.

Code	Title	Hours
PHAR:4146	Drug Disposition and Pharmacokinetics	2

PHAR:4740	Materials in Drug and Gene Delivery	3
PHAR:4741	Immunology and Immunotherapies	2
PHAR:8500	Advanced Drug Literature Evaluation and Application	2
PHAR:8501	Introduction to Nuclear Pharmacy	2
PHAR:8502	Advanced Pharmacopalliation of Pain	2
PHAR:8503	Advanced Pharmacopalliation of Non-Pain Symptoms	3
PHAR:8505	Advanced Topics in Infectious Disease, HIV, and Antimicrobial Therapy	2
PHAR:8506	Health Informatics Essentials	2
PHAR:8508	Interprofessional Case Studies	2
PHAR:8706	Pharmacy Projects	1-3
PHAR:8708	Substance Abuse	2
PHAR:8709	Pharmacist Role in Health Coaching and Nutrition	2
PHAR:8712	Nonprescription Pharmacotherapy and Self-Care	2
PHAR:8717	Ambulatory Care Pharmacy	2
PHAR:8718	Special Topics in Acute Care	2
PHAR:8721	Leadership and Political Advocacy	arr.
PHAR:8722	Current Topics in Health Policy	2
PHAR:8724	Hospital Pharmacy Practice Management Elective	2
PHAR:8725	Career Pathways in Pharmacy	1
PHAR:8790	Sustainable Clinical Pharmacy Services: Leadership, Management, and Implementation	2
PHAR:8791	Survey of Basic Pharmaceutical Sciences	1
PHAR:8793	Introduction to Global Health Studies	1
PHAR:8794	Emergency Medicine and Toxicology	2
PHAR:8795	Foundations of Palliative Care	2
PHAR:8796	Introduction to Travel Medicine	1
PHAR:8797	Ethics and Spirituality in Health Care	3
PHAR:8798	Continuing Professional Development in Palliative Care	1
PHAR:8799	Active Residency Preparation	2
PHAR:8811	New Drugs for New Therapies: Introduction to Drug Discovery, Development, and Registration	1-2

Combined Programs

Pharm.D./M.P.H.

The College of Pharmacy and the College of Public Health offer the combined Doctor of Pharmacy/Master of Public Health program. The combined program requires 42 s.h. of graduate credit in addition to the requirements of the Pharm.D. degree. Students who complete the program are granted both degrees.

The Pharm.D./M.P.H. program helps students develop expertise in public health related to pharmacotherapy, health promotion, disease prevention, and medication safety. Its graduates may work in areas of interest common to pharmacy and public health, such as spread and treatment of disease, community health, and immunology; bioterrorism, terrorism, and preparedness; genetics; insurance; managed care; family and juvenile health; and protection of special populations. Employment opportunities are available in hospitals and clinics and with health care providers; private practice; insurance and managed care organizations; local, county, state, and federal government; public health governmental agencies; and colleges and universities.

Separate admission to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program.

See the Master of Public Health, M.P.H. [p. 1889] in the Catalog to learn about curriculum and admission requirements.

Pharm.D./M.S. in Informatics (Health Informatics Subprogram)

The College of Pharmacy and the Graduate College offer the combined Doctor of Pharmacy/Master of Science in informatics with a health informatics subprogram. The combined degree program requires completion of 32 s.h. beyond the bachelor's degree. Students who complete the program are granted both degrees.

The Pharm.D./M.S. program assists students to develop special expertise in information technology, including management of electronic health records, health information exchange standards, electronic prescribing, medication management, decision support, as well as other competencies. Graduates will be prepared for employment in industry or academic institutions with skills to address pharmacotherapy issues as well as information technology management.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. It is recommended that students apply to the Graduate College for admission to the M.S. program before entering the spring semester of their first year in the pharmacy program.

For information about the Master of Science degree, see the M.S. in informatics [p. 1592] (Graduate College) in the Catalog.

Admission

Individuals apply to the Pharm.D. program using PharmCAS, the American Association of College of Pharmacy application service. Applicants also must submit a supplemental application, including the application fee, to the University

of Iowa College of Pharmacy; see Doctor of Pharmacy on the University of Iowa Graduate Admissions website for more information.

All application materials must be received by November 1 of the year before the applicant intends to enter the College of Pharmacy. Entry is for fall semester. All Pharm.D. applicants must take the Pharmacy College Admission Test (PCAT) before December 1 of the year before they wish to enter the College of Pharmacy in order to be considered by the admissions committee.

Applicants must complete the college-level work listed under "Prerequisites for Admission to the Pharm.D. Program" below. They also must have an overall cumulative g.p.a. of at least 2.50 and must submit two letters of recommendation and a personal statement. Applicants considered for admission must have a personal interview; the college contacts applicants to arrange interview appointments.

Fulfillment of the admission requirements listed above does not ensure admission to the College of Pharmacy. The admissions committee considers applicants who meet these requirements and selects individuals who, in their judgment, are the best qualified for the study and practice of pharmacy.

Applicants who are accepted for admission are required to submit to a criminal background check and pay an admission acceptance fee. The fee is applied to tuition for the student's first semester of enrollment in the college. The deposit is not refunded to applicants who do not enroll in the College of Pharmacy.

Entering health sciences students are required to have an annual tuberculin skin test (TST) and proof of immunization against mumps, measles and rubella (2 MMRs), tetanus, diphtheria and varicella before classes begin. The usual regimen of three doses of Hepatitis B vaccine and a Hepatitis B titre must be completed by the second semester of the first year. All students are required to have hospitalization and health insurance.

Prerequisites for Admission to the Pharm.D. Program

Applicants to the Pharm.D. program must have completed the following college-level work.

Rhetoric: 4 s.h. (RHET:1030 Rhetoric) or 6 s.h. of transfer credit in English composition and rhetoric and 3 s.h. in speech

Biochemistry: 3 s.h. (BIOC:3110 Biochemistry)

General biology: 8 s.h. (BIOL:1411 Foundations of Biology and BIOL:1412 Diversity of Form and Function)

General chemistry: 8 s.h. (CHEM:1110 Principles of Chemistry I and CHEM:1120 Principles of Chemistry II)

Human anatomy: 3 s.h. (ACB:3110 Principles of Human Anatomy)

Human physiology: 3 s.h. (HHP:3500 Human Physiology)

Organic chemistry: 6 s.h. (CHEM:2210 Organic Chemistry I and CHEM:2220 Organic Chemistry II)

Mathematics: 3-4 s.h. of a satisfactory differential and integral calculus course (MATH:1460 Calculus for the Biological Sciences)

Microeconomics: 3-4 s.h. (ECON:1100 Principles of Microeconomics)

Physics: one year of high school physics or one semester of college-level physics with a lab (PHYS:1400 Basic Physics)

Statistics: 3 s.h.

General education electives: a minimum of 12 s.h.

Courses in moral reasoning or ethics, communications, computer science, and business, behavioral and social sciences, and the humanities are accepted. Courses in physical education skills, applied music, and studio art do not count toward the general education requirement.

Financial Support

All second-, third-, and fourth-year pharmacy students are encouraged to apply for College of Pharmacy scholarships. Applications are available each April from the College of Pharmacy Graduate Program Office. Students complete a single application form in order to be considered for all scholarships. Award amounts vary. The Awards and Recognition Committee selects the best-qualified applicant for each scholarship.

Steve and Teresa Berge Scholarship: for a pharmacy student who is a U.S. citizen and has a g.p.a. of at least 3.00; experience doing volunteer work highly desirable.

Albrecht/Winckler Scholarship: for a deserving pharmacy student

Seymour M. Blaug Memorial Award: for a pharmacy student with above-average academic achievement.

Dennis and Bev Boussetol Scholarship: life insurance gift bequeath.

Ilse O. Buckner Scholarship: for a pharmacy student who maintains satisfactory academic progress; nonrenewable, financial need is considered.

Burroughs-Wellcome Scholarship Fund: for a student of the committee's choice.

David and James Carlson Scholarship: for two pharmacy students interested in clinical or hospital practice; preference is given to students from north of U.S. Interstate 80 and west of U.S. Interstate 35 who show financial need.

Class of 1970 Award: qualifications vary.

Class of 2009 Award: qualifications vary.

Jordan and Jana Cohen Doctor of Pharmacy Scholarship: for a pharmacy student in good academic standing; based on merit and need; renewable.

College of Pharmacy Executive Leadership Board Excellence Fund: for the senior class president and/or qualifications vary.

Vernon Conzemius Scholarship: for a pharmacy student who demonstrates financial need; preference is given to students in the upper half of their class.

John and Margo Daniel Scholarship: preference is given to a student from Webster County, Iowa.

Max Eggleston Scholarship: for a student who has completed one year; preference is given to students from Iowa; based on financial need.

Lori A. Grimes Memorial Scholarship: based on financial need; renewable.

Dick and Brenda Hartig Scholarship: for a student who demonstrates financial need; preference is given to students

from Dubuque, Waukon, Dyersville, and Iowa City, Iowa; and Galena and Stockton, Illinois.

Thomas D. Hill Scholarship: for a pharmacy student in good academic standing.

Janet Hinderliter Scholarship: for a P3 or P4 student with a g.p.a. of at least 3.00 and demonstrated involvement in campus and community affairs.

Frances T. and Charles Holub Memorial Award: for a third-year pharmacy student; financial need is considered; renewable once.

Iowa Pharmacy Foundation Scholarships: for selected pharmacy students who are residents of Iowa and who demonstrate outstanding academic ability; financial need is considered (Eggleston-Granberg Scholarship is awarded from this fund).

R.A. Kuever Scholarship Fund: for a pharmacy student from Iowa who is in good academic standing.

Ronald Madden Scholarship: for an Iowa high school graduate in good academic standing.

Charles J. Malecek Pharmacy Scholarship: for a student of the committee's choice.

Virgil R. McCutchan Memorial Scholarship: for a deserving pharmacy student.

J. Patrick McDonnell Scholarship: qualifications vary.

Carleton Mikkelsen Scholarship: for the top P4 student based on final P3 grade-point average; in case of a tie, the committee chooses the recipient.

Miller-Ruegnitz Scholarships: based on financial need; nonrenewable.

NACDS Scholarship: for a student interested in community pharmacy.

Petersen Linder Scholarship: for a pharmacy student in excellent academic standing who has outstanding leadership skills; based on financial need.

Pharmacists Mutual Scholarship: for a student of the committee's choice.

Pharmacy Student Aid Scholarship: for a student of the committee's choice.

Quad Cities Area Pharmacists Association Scholarships: for students who demonstrate financial need; preferably one student from Iowa and one from Illinois.

Robert E. and Barbara J. Rehal Family Scholarship: for a student who has interest in independent or community pharmacy; preferably from Sioux City, Iowa.

Sattler Family Scholarship: for a student of the committee's choice, alternates with the Carver College of Medicine.

Scherling Scholarship: for a student who demonstrates superior academic achievement in organic chemistry.

Hal Schimmelpfenning Scholarship Fund: for a pharmacy student from Sigourney, Iowa.

Schlumberger Scholarship: qualifications vary.

Chuck and Jacqueline Schwenke Scholarship: for a student of the committee's choice.

Gordon H. Sheffield Scholarship: for a P3 or P4 student from Iowa; preference is given to a student who demonstrates leadership and financial need.

Shutt Pharmacy Scholarship: preference is given to Iowa residents; based on financial need.

H. Curtis Snyder Award: for a pharmacy student in good standing.

Paul G. and Vivian Soderdahl: for a student of the committee's choice.

Wilber J. Teeters and the Teeters/Wahl Scholarships: for a pharmacy student who has completed at least one year in the college; financial need is considered.

Thompson Scholarship Fund in Memory of Rob Chabal: preference is given to a fourth-year student committed to community pharmacy practice.

John S. Thor (Nash) Scholarship Fund: for a pharmacy student in good standing; renewable.

Donald J. and Nancy L. Unash Scholarship: qualifications vary.

Colonel Thomas C. Veach Class of 1952 Scholarship Fund: preference is given to a student interested in compounding or industrial pharmacy.

Walgreens Diversity Scholarship: for a student who has made significant efforts toward raising awareness about matters of diversity that affect the pharmacy profession.

Jo H. and Robert A. Wiley Scholarship Fund: for a pharmacy student who is an Iowa native and shows financial need.

Louis C. Zopf Memorial Award: for a pharmacy student who is academically qualified; financial need is considered.

John D. Zuelke Scholarship: for a pharmacy student (preferably P3 or P4) from Wapello County, Iowa.

Career Advancement

The College of Pharmacy has had nearly a 100 percent placement rate for its graduates for many years.

Pharmacists often choose to practice in a community pharmacy or a hospital setting. They hold positions in government, independent businesses, home health care, consulting, clinical pharmacy, managed care facilities, higher education, or the pharmaceutical industry.

Palliative Care, Professional Certificate

Requirements

The professional Certificate in Palliative Care requires 17 s.h. of credit. Students must maintain a pharmacy and cumulative g.p.a. of at least 3.00 in work for the certificate.

The certificate program prepares students to practice as palliative care generalists upon graduation from the Doctor of Pharmacy (Pharm.D.) program. Students who complete the certificate will possess the knowledge, skills, and attitudes to serve patients living with serious illnesses across the trajectory of life in a variety of general pharmacy practice environments and non-palliative pharmacy specialties, including critical care, emergency medicine, geriatrics, and cardiology. The program addresses the educational needs of pharmacy students who may provide pharmaceutical care in a community pharmacy setting, a long-term care pharmacy, oncology, cardiology, infectious disease, critical care, transplant, and emergency medicine. The certificate also prepares graduates to pursue advanced postgraduate clinical training in palliative care and hospice, including palliative care residencies and fellowships.

The Certificate in Palliative Care requires the following coursework.

Code	Title	Hours
PHAR:8795	Foundations of Palliative Care	2
PHAR:8797	Ethics and Spirituality in Health Care	3
PHAR:8798	Continuing Professional Development in Palliative Care	1
PHAR:8502	Advanced Pharmacopalliation of Pain	2
PHAR:8503	Advanced Pharmacopalliation of Non-Pain Symptoms	3
PHAR:9405	Elective Hospice and Palliative Care Rotation	6

Admission

Applicants must have a cumulative g.p.a. of at least 3.00.

They should submit an application that includes:

- a letter of intent;
- one letter of recommendation from the student's College of Pharmacy faculty mentor; and
- one letter of recommendation from a professional reference outside the College of Pharmacy, such as an employer, previous professor, coach, colleague or supervisor of a volunteer experience.

Applicants are then selected for an interview with certificate committee members. Students will be notified if they are selected.

Pharmacy, M.S.

Requirements

The Master of Science in pharmacy requires at least 30 s.h. of credit, which may include 6 s.h. of research. The degree usually requires a thesis. Students must maintain an overall g.p.a. of at least 2.75. Programs are offered in four areas: clinical pharmaceutical sciences, health services research, medicinal and natural products chemistry, and pharmaceuticals.

The clinical pharmaceutical sciences area is designed for students interested in clinical research. The goal of the program is to advance the science of human pharmacology and therapeutics and to improve the safe, effective, and economical use of medications by patients. The program emphasizes the integration of clinical and basic research. It involves advanced studies of clinical pharmacology, pharmacokinetics, pharmacodynamics, pharmacogenetics, and the requirements for regulatory approval of new drugs.

The health services research area provides an innovative approach to studying the challenges facing the health care system and provides evidence to support policy-based solutions. The program combines ideas across several distinct scientific paradigms (sociology, economics, psychology, business, and anthropology) to better understand the factors leading to decisions in health care and the consequences of these decisions. Students gain broad knowledge of health and pharmaceutical care, informed by theories from economics and social psychology. The program teaches intellectual and practical skills to investigate research questions dealing with current issues.

The medicinal and natural products chemistry area educates students in the chemistry and biology of drug discovery. The program offers an interdisciplinary course of study and challenging opportunities to do fundamental drug-related research in the basic chemical and biological sciences. Contemporary research geared toward drug discovery and design is the cornerstone of graduate study in this area. Students design a course of study, including core courses in synthesis, spectroscopy, enzymology, pharmacology, analytical chemistry, toxicology, and drug design as well as elective courses to maintain breadth and achieve depth in a research area.

The pharmaceuticals area is a multidisciplinary science that examines the development, production, and characterization of dosage forms, as well as the disposition and action of drugs in the body. As pharmaceutical scientists have been engaged in the development of novel biomaterials for sophisticated drug delivery systems, they also have expanded into research with applications in the development of medical devices and tissue engineering.

For more information about graduate study, visit the College of Pharmacy website.

Admission

Applicants must meet the admission requirements of the Graduate College. They must:

- hold a bachelor's degree from a U.S. institution or an equivalent degree from another country as determined by the University of Iowa Office of Admissions;
- have a g.p.a. of at least 3.00;

- submit a Graduate Record Examination (GRE) General Test score; and
- if an international applicant, receive a minimum Test of English as a Foreign Language (TOEFL) score of 81 or a minimum International English Language Testing System (IELTS) overall score of 7.0 with no individual score below 6.0 (if an applicant has a master's degree from a U.S. institution, this requirement is waived).

Visit Apply on the College of Pharmacy website for a list of program requirements and application deadlines. Academic requirements for maintaining graduate registration are determined by the Graduate College and by the individual divisions in the College of Pharmacy.

Career Advancement

Advanced study in the pharmaceutical sciences prepares students for research, teaching, and administrative positions in the pharmaceutical industry, in colleges and universities, in government agencies, and in health-related institutions and organizations.

Pharmacy, Ph.D.

Requirements

The Doctor of Philosophy requires 72 s.h. of credit. Students must maintain an overall g.p.a. of at least 3.00. The College of Pharmacy offers programs in four areas: clinical pharmaceutical sciences, health services research, medicinal and natural products chemistry, and pharmaceuticals.

The clinical pharmaceutical sciences area is designed for students interested in clinical research. The goal of the program is to advance the science of human pharmacology and therapeutics and to improve the safe, effective, and economical use of medications by patients. The program emphasizes the integration of clinical and basic research. It involves advanced studies of clinical pharmacology, pharmacokinetics, pharmacodynamics, pharmacogenetics, and the requirements for regulatory approval of new drugs.

The health services research area provides an innovative approach to studying the challenges facing the health care system and provides evidence to support policy-based solutions. The program combines ideas across several distinct scientific paradigms (sociology, economics, psychology, business, and anthropology) to better understand the factors leading to decisions in health care and the consequences of these decisions. Students gain broad knowledge of health and pharmaceutical care, informed by theories from economics and social psychology. The program teaches intellectual and practical skills to investigate research questions dealing with current issues.

The medicinal and natural products chemistry area educates students in the chemistry and biology of drug discovery. The program offers an interdisciplinary course of study and challenging opportunities to do fundamental drug-related research in the basic chemical and biological sciences. The program spans many aspects of the subdisciplines of chemistry, biochemistry, and pharmacology with a common theme of drug discovery. This includes extensive laboratory research aimed at testing a novel hypothesis, which is written and defended as a student's thesis. Contemporary research geared toward drug discovery and design is the cornerstone of graduate study in this area. Students design a course of study, including core courses in synthesis, spectroscopy, enzymology, pharmacology, analytical chemistry, toxicology, and drug design as well as elective courses to maintain breadth and achieve depth in a research area.

The pharmaceuticals area is a multidisciplinary science that examines the development, production, and characterization of dosage forms, as well as the disposition and action of drugs in the body. As pharmaceutical scientists have been engaged in the development of novel biomaterials for sophisticated drug delivery systems, they also have expanded into research with applications in the development of medical devices and tissue engineering.

Associate Dean, Research

- Corinne Peek-Asa

Interim Associate Dean, Academic Affairs

- Thomas E. Vaughn

Associate Dean, Administration

- Lori J. Cranston

Director, Undergraduate Programs

- Margaret L. Chorazy

Undergraduate major: public health (B.A., B.S.)

Undergraduate certificate: public health

Graduate degrees: M.H.A.; M.P.H.; M.S.; Ph.D.

Graduate certificates: agricultural safety and health; biostatistics; emerging infectious disease epidemiology; healthcare management; public health; translational and clinical investigation

Website: <https://www.public-health.uiowa.edu/>

The College of Public Health, established in 1999, is a partner with the Carver College of Medicine and the Colleges of Dentistry, Nursing, and Pharmacy in striving to improve human health and well-being. Consistent with the interdisciplinary traditions of public health, the college also collaborates with non-health science colleges across the University and with other Board of Regents, State of Iowa institutions, state and local agencies, and the private sector.

Public health is the science of protecting and improving the health of communities. Professionals in this field use specialized knowledge and skills to better understand the root causes of diseases and injuries and, whenever possible, develop strategies to prevent them.

A population-based approach to health is a distinguishing feature of public health and of the college. For public health practitioners—a wide range of professionals including physicians, nurses, dentists, pharmacists, social workers, nutritionists, environmental scientists, health educators, and health service administrators—the primary focus is on the health of entire communities rather than individual patients. Tools that public health professionals use to improve and enhance quality of life include analytical methods to identify, describe, and monitor the health of communities and populations at risk; education and prevention programs, methods of assuring access to appropriate and cost-effective care; and formulation of sound public policies.

The public health approach has led to many important health improvements over the past century. Vaccination campaigns, improved sanitation, fluoridation of drinking water, and efforts to reduce tobacco use are among the most recognizable public health initiatives. Public health programs also have led to safer workplaces, reduction of deaths from coronary heart disease and stroke, improved motor vehicle safety,

and creation of effective health systems to provide care to those who need it. Today, public health professionals play an important role worldwide in seeking better approaches to complex issues such as quality of life for the elderly, drug and alcohol abuse, teen pregnancy, new and reemerging infectious diseases, bioterrorism, health literacy, nutrition, and food safety.

The College of Public Health provides educational opportunities to students campuswide. In addition to training and educating public health students, the college welcomes students from the Tippie College of Business, the Carver College of Medicine, the Graduate College, and the Colleges of Dentistry, Education, Engineering, Law, Nursing, and Pharmacy who enroll in public health courses. Undergraduate students in the College of Liberal Arts and Sciences and graduate students from programs such as anthropology, microbiology, and statistics also register for public health courses. The college's faculty members, staff members, and graduate and postdoctoral students contribute to teaching and research activities throughout the health sciences campus and provide services to Iowa and the nation. Partnerships for teaching and research extend across the campus. This background provides a rich array of educational opportunities.

The college includes the Departments of Biostatistics [p. 1903], Community and Behavioral Health [p. 1913], Epidemiology [p. 1919], Health Management and Policy [p. 1930], and Occupational and Environmental Health [p. 1940]. It offers programs leading to two undergraduate degrees: Bachelor of Arts (B.A.) and Bachelor of Science (B.S.). It also offers programs leading to four graduate degrees: Master of Health Administration (M.H.A.), Master of Public Health (M.P.H.), Master of Science (M.S.), and Doctor of Philosophy (Ph.D.). In addition, it offers the Certificate in Agricultural Safety and Health [p. 1902], the Certificate in Biostatistics [p. 1912], the Certificate in Emerging Infectious Disease Epidemiology [p. 1918], the Certificate in Healthcare Management [p. 1939], the undergraduate Certificate in Public Health [p. 1888], the graduate Certificate in Public Health [p. 1900], and the Certificate in Translational and Clinical Investigation [p. 1951].

The undergraduate and graduate programs of the college are accredited by the Council on Education for Public Health (CEPH), the accrediting body for schools and programs of public health. Three programs in the college also are accredited: the industrial hygiene M.S. training program is accredited by the Accreditation Board for Engineering and Technology (ABET), the Master of Health Administration is accredited by the Commission on Accreditation of Healthcare Management Education (CAHME), and the Occupational Medicine Residency is accredited by the Accreditation Council for Graduate Medical Education (ACGME).

Faculty

The college's faculty includes members with single appointments in the College of Public Health as well as secondary and adjunct appointments. See the Faculty A-to-Z List on the college's website for more information.

Programs

Undergraduate Programs of Study

The College of Public Health offers the Bachelor of Arts (B.A.) and the Bachelor of Science (B.S.); see the B.A. in public health [p. 1878] and the B.S. in public health [p. 1883] in the Catalog for more information. The college also offers the undergraduate Certificate in Public Health [p. 1888].

Graduate Programs of Study

The College of Public Health offers the Master of Public Health [p. 1889] (M.P.H.); the Master of Health Administration [p. 1933] (M.H.A.), the Master of Science (M.S.), and the Doctor of Philosophy (Ph.D.); see the Biostatistics [p. 1903], Community and Behavioral Health [p. 1913], Epidemiology [p. 1919], Health Management and Policy [p. 1930], and Occupational and Environmental Health [p. 1940] departmental sections of the Catalog for more information.

The College of Public Health also offers graduate Certificates in Public Health [p. 1900], Agricultural Safety and Health [p. 1902], Biostatistics [p. 1912], Emerging Infectious Disease Epidemiology [p. 1918], Healthcare Management [p. 1939], and Translational and Clinical Investigation [p. 1951].

Undergraduate Rules and Procedures

Academic Advising

First-year students directly admitted to the College of Public Health major are advised by undergraduate program staff at the College of Public Health. First-year College of Liberal Arts and Sciences (CLAS) public health interest students are advised at the University's Academic Advising Center. CLAS public health interest students who apply and are admitted to the College of Public Health are advised at the College of Public Health by undergraduate program staff. All students are required to have a conference with their advisor before registering for classes each semester.

Application for Degree

Students who wish to be considered for graduation must submit an Application for Degree through MyUI the session before they are eligible to graduate or before the deadline date during the session in which they expect to graduate.

Students who do not graduate in the session they submitted their Application for Degree must submit another application through MyUI for the next applicable session. Students do not need to be registered to apply for a degree.

See Degree Application on the Office of the Registrar website.

Academic Recognition

Dean's List

Undergraduate students in the College of Public Health who achieve a g.p.a. of 3.50 or higher on 12 s.h. or more of University of Iowa graded coursework during a given semester or summer session and who have no semester hours of I (incomplete) or O (no grade reported) during the same semester are recognized by inclusion on the Dean's List for that semester.

President's List

Undergraduate students in the College of Public Health who achieve a g.p.a. of 4.00 on 12 s.h. or more of University of Iowa graded coursework and who have no semester hours of I (incomplete) or O (no grade reported) for two consecutive semesters (excluding summer sessions) are recognized by inclusion on the President's List.

Graduation with Distinction

Graduation with distinction recognizes high academic achievement based on grades. The college awards degrees "with highest distinction" to students in the highest two percent of their graduating class, "with high distinction" to students in the next-highest three percent, and "with distinction" to students in the next-highest five percent. Ranking is based on students' grade-point average for all college-level study taken up to their final registration.

To be eligible to be considered for graduation with distinction, students must complete their final 60 s.h. of study in residence at the college and must have completed at least 45 s.h. in the college before their final registration.

Graduation with Honors

Graduation with honors recognizes high academic achievement based on both grades and exceptional accomplishment.

Honors in the Major

Students majoring in public health have the opportunity to graduate with honors in the major. To graduate with honors in public health, students must successfully complete all college requirements with a g.p.a. of at least 3.33 in all courses for the major, in all college coursework, and in all UI coursework.

In addition, students must complete an honors thesis in CPH:4990 Mentored Independent Undergraduate Research in Public Health, where they must write a brief research proposal summarizing background and goals of honors research, defend their research proposal to a honors project faculty member and a honors advisor, conduct research, submit their honors thesis, and conclude with an oral and/or poster presentation.

Outstanding undergraduate students in the college have an opportunity to undertake independent study and to work closely with faculty members. Completion of requirements for honors in the major also will satisfy the experiential learning requirement.

Academic Standards

Maximum Schedule

Course schedules of more than 19 s.h. for a semester, 12 s.h. for a summer session, or 3 s.h. for a winter session require approval of the advising staff in the undergraduate program office.

Classification of Students

Students are classified by the number of semester hours of credit they have earned toward the bachelor's degree:

Code	Title	Hours
First year: 0-29 s.h.		
Second year: 30-59 s.h.		

Junior: 60-89 s.h.

Senior: 90 s.h. or more

Credit and Grading

Credit by Examination

Students may earn up to 30 s.h. of credit by examination by taking selected tests from the College Level Examination Program (CLEP) and the Advanced Placement Program (AP) of the College Board, the Cambridge International Examinations (CIE), or the International Baccalaureate Program (IB). For information about when and how to take the CLEP and AP examinations, contact the University's Office of Teaching, Learning & Technology.

The College of Public Health has information on scores, credit, and course duplicates for all CLEP, AP, and IB tests accepted by the college. Ordinarily, credit earned through examination is applied first to the General Education Requirements. Credit also may be applied to requirements of a major, minor, or certificate, or as elective credit.

Credit From Other Colleges

Students who have taken courses at another institution that are similar to those approved for the public health major or the General Education Requirements may request that these courses be evaluated for transfer credit. When students apply for admission to the College of Public Health, they must submit official transcripts from each college attended along with their application for admission. After the credit has been certified by the Office of Admissions as college-level work from an accredited institution and after admission has been granted, the credit is evaluated by the undergraduate program either before or during the student's first semester of enrollment in the college.

Grading System

The college uses a letter grading system. A denotes superior performance, B denotes above average, C denotes average, D denotes below average, and F denotes failure of the course. Plus and minus designate gradations of performance between letter grades. Letter grades and their numerical equivalents are as follows.

A+	4.33
A (superior)	4.00
A-	3.67
B+	3.33
B (above average)	3.00
B-	2.67
C+	2.33
C (average)	2.00
C-	1.67
D+	1.33
D (below average)	1.00
D-	0.67
F (failing)	0

Adding and Dropping Courses

Students may drop courses, except College of Law courses, any time before the deadline published in the University's academic deadline calendar. Deadlines are different for regular and off-cycle courses. See Academic Calendar on the Office of the Registrar website.

Students must obtain approval from the college that offers the course in order to request permission to add or drop a course after these deadlines.

Auditing Courses

College of Public Health students may choose to take courses without earning credit for them (audit) with the permission of the course instructor and their advisor. Students are still charged for auditing courses. The mark of AUS (audit successful) is assigned to students registered for zero credit if attendance and performance in the course are satisfactory; if unsatisfactory, the mark of AUU (audit unsuccessful) is assigned. Courses completed with a mark of AUS do not meet any requirements nor do they carry any credit toward graduation. Auditing may not be used as a second-grade-only option.

To register for a course on an audit basis, students must obtain the instructor's authorizing signature and their advisor's signature and must register for 0 s.h. To change registration from audit to credit or from credit to audit, a change in registration form is used. These changes must be made during the period when adding courses is allowed.

Pass/Nonpass Courses

Undergraduate students in the College of Public Health may not use courses taken P/N (pass/nonpass) to satisfy General Education Requirements, high school course requirements, prerequisite or major public health course requirements, or any course in the College of Public Health. Major public health requirements include any course that fulfills the major course requirements (including public health electives), regardless of the college offering the course. The College accepts a maximum of 15 s.h. of P (pass) credit from the University of Iowa toward the bachelor's degree and a maximum of 30 s.h. of P (pass) and S (satisfactory) grades from all sources (UI as well as transfer work) toward the bachelor's degree.

Pass/nonpass registration must be completed during the first 10 days of a fall or spring semester or the first one-and-one-half weeks of a summer session, and it requires the approval of the advisor and the instructor. For courses taken pass/nonpass, an earned grade of C-minus or higher is recorded as a P; an earned grade of D+ or lower is recorded as an N. Pass/nonpass credit is not included in grade-point average calculations.

Satisfactory/Fail Courses

The College of Public Health Direct Admit Seminar, Second Year Undergraduate Public Health Seminar, and Third Year Undergraduate Public Health Seminar are offered only satisfactory/fail (S/F). A grade of F (fail) earned for these seminars does not satisfy any portion of the professional development seminar requirement.

Certain other College of Public Health courses are offered satisfactory/fail (S/F). All students registered for these courses receive one of these marks.

Semester hours of S graded coursework are not used in computing grade-point averages, but hours of F graded coursework are used. Semester hours of S graded coursework are counted as semester hours earned toward graduation; semester hours of F graded coursework do not count as semester hours earned toward graduation.

College of Public Health undergraduates may not use S graded coursework to fulfill General Education Requirements.

The college accepts a maximum of 15 s.h. of S credit from the University of Iowa toward the bachelor's degree and a

maximum of 30 s.h. of S and P grades from all sources (UI as well as transfer work) toward the bachelor's degree.

Incomplete Grades

Instructors may report a mark of I (incomplete) only if the unfinished part of a student's work in a course other than research, thesis, or independent study is small; if the work is unfinished for reasons acceptable to the instructor; and if a student's standing in the course is satisfactory.

Students should not re-enroll in a course for which they have an incomplete. Incomplete grades must be removed by completing the unfinished part of the work. Faculty and students are encouraged to state clearly in a written agreement how the incomplete is to be completed and the due date for the remaining work. Both the faculty member and the student should keep a record of the written agreement.

Failure to remove the incomplete before the end of the next full semester, excluding summer and winter sessions, results in replacement of the I with a grade of F, regardless of whether a student is enrolled during that semester. A grade change may be submitted to convert a grade of F to another letter grade, with the instructor's approval.

Students cannot graduate with an I mark on their record. They must either complete the course for a passing grade, or allow the Incomplete to lapse to a grade of F.

Second-Grade-Only Option for CLAS Public Health Interest Students

Public health interest students must follow the rules established by the College of Liberal Arts and Sciences (CLAS). Contact the CLAS Academic Programs and Student Development office or consult the CLAS Academic Policies Handbook for more information.

Second-Grade-Only Option

College of Public Health students may repeat up to three courses taken at the University of Iowa regardless of the grade originally earned in the course and may only be used once per class. A course may not be repeated under the second-grade-only option once it has been used as a prerequisite for a more advanced course that the student has completed successfully. The second-grade-only option cannot be used to remove a grade of incomplete, which must be removed in the usual manner.

The second-grade-only option may be used only for University of Iowa courses. A course taken at another college or university may not be repeated at the University of Iowa under the second-grade-only option, nor may a UI course be repeated at another institution under the second-grade-only option.

Any second-grade-only options used before entry to the College of Public Health count toward the maximum of three second-grade-only options allowed.

If the course was taken for a grade the first time, it must be taken for a grade the second time.

If the course was taken satisfactory/fail the first time, a student may choose to take the course for a grade or as satisfactory/fail the second time.

Any University of Iowa course taken in any mode of delivery—during a regular semester, a summer session, an intensive session, through distance education, or through Distance and

Online Education [p. 1980]—may be repeated in the same mode of delivery or in any other mode of delivery.

Students who have been awarded a degree from the University of Iowa may not use the second-grade-only option on a course taken before the degree was awarded.

Students must register as usual for the course that is to be repeated. After the session in which the course is being repeated has begun, students must request the second-grade-only option by completing the Second-Grade-Only Option Request Form. Students must follow this procedure or both grades will be counted in their University of Iowa grade-point average.

The permanent record is adjusted by placing a pound symbol (#) next to the first grade to indicate that it is no longer being included in the grade-point-average calculation, and only the semester hours from the second registration have been counted as semester hours earned. Once placed on the record, the option may not be retracted. Graduate or professional colleges may recalculate grade-point averages using all grades visible on the permanent record.

Student Academic Misconduct

Policies regarding cases of cheating or plagiarism are outlined in the Undergraduate Student Handbook; see Examples of Academic Misconduct on the College of Public Health website.

Academic Probation and Dismissal

College of Public Health students are expected to meet academic standards set by the college and to demonstrate reasonable progress toward a degree. To be considered in good academic standing, students must earn a minimum cumulative public health major g.p.a., a minimum UI cumulative g.p.a., and a minimum cumulative g.p.a. for all college work of at least 2.00, and a required University of Iowa session g.p.a. of 1.50 or higher during any spring, summer, or fall enrollment. If a student does not meet all grade-point average conditions, then the student is placed on academic probation.

Students usually are allowed only one session to return to good academic standing. They are required to meet with an academic advisor. Students on academic probation who withdraw registration after the deadline for dropping courses may be dismissed.

The college reviews academic records for all students at the end of the fall and spring semesters. There is no review at the end of the summer session. Students are placed on probation, dismissed for unsatisfactory progress (with or without previous probationary status), or restored to good standing only at the end of the fall and spring semesters.

Students who do not make satisfactory progress may be dismissed from the college without an intervening probationary period. Students who are dismissed from the college for unsatisfactory academic progress due to circumstances beyond their control, such as a death in their immediate family or extended personal illness, may appeal for a revocation of the dismissal. A student dismissed in January must submit a written appeal by the second day of spring semester classes. A student dismissed in May must submit the written appeal by June 15.

Students dismissed from the college for poor scholarship may appeal to re-enroll after an interval of at least one calendar year following the end of the term in which they were dismissed. A written appeal for reinstatement must be submitted to the Undergraduate Program Office. Appeals

must be submitted before June 15 for reinstatement in a fall semester or before December 1 for reinstatement in a spring semester.

For details, see the Undergraduate Student Handbook on the college's website.

Reinstatement

Students dismissed for unsatisfactory scholarship for the first time are not permitted to register again for one year. Students dismissed for the second time may or may not be granted a second reinstatement. Requests for reinstatement must be made in writing and should be addressed to the Associate Dean for Academic Affairs, College of Public Health. Arrangements for a reinstatement interview must be made with the associate dean for academic affairs. The interview must take place between March 1 and July 1 for reinstatement for fall semester, or between October 1 and December 1 for reinstatement to spring semester. Late requests are deferred to the following semester.

Students who are permitted to register following dismissal are registered on academic probation and ordinarily are allowed two semesters to achieve good standing. Most reinstatements include a limit on the number of semester hours the student may take upon reinstatement. Very poor academic work in the first semester of a reinstatement, however, may result in dismissal at the close of that semester.

Facilities

The College of Public Health Building, a state-of-the-art facility that opened in early 2012 on the University's health sciences campus, houses the college's administrative, departmental, and faculty offices. The college's research centers, institutes, and specialized laboratories are located in Westlawn, on the health sciences campus; in University Capitol Centre, on the main campus east; and at the University of Iowa Research Park.

Four student computer laboratories are housed at the college. More than 55 software packages are available for student use, most without charge. Software includes Microsoft Office products, SAS, and S+. Some specialty labs are equipped with RedHat Linux and are loaded with R, Macanova, Xlipstat, Mathematica, and other software.

Students, faculty, and staff draw on extensive library resources available across campus. Hardin Library for the Health Sciences serves as a central resource for all of the health sciences colleges. Hardin Library's Information Commons, a state-of-the-art health sciences educational technology facility, provides central support and delivery for courseware development, classroom instruction, health-related research, and independent learning. It offers high-end multimedia development workstations, networked electronic classrooms, a case-based learning and conference room, and information research workstations for searching health-related databases and the internet.

Research Centers and Institutes

The College of Public Health is home to 23 centers and institutes that conduct research and provide public service. These multidisciplinary centers and institutes—most of which are supported by federal grants—focus their investigative efforts on important public health topics. They conduct an array of outreach, service, and policy activities through which the College of Public Health engages with agencies, communities, and organizations throughout Iowa, the

Midwest, the nation, and the world. Students are encouraged to explore opportunities for involvement with any of the college's centers and institutes.

For more information, see Research Centers and Programs on the college's website.

Courses

College of Public Health Courses

CPH:1000 First-Year Seminar 1 s.h.

Small discussion class taught by faculty member; topics chosen by instructor; may include outside activities (e.g., films, readings, visits to research facilities).

CPH:1050 College of Public Health Direct Admit Seminar 1 s.h.

Introduction for first-year students to student life and the public health profession; tips for student success, resources on campus, coping with adversity, advising responsibilities, curriculum choices and career objectives, and community building events.

CPH:1400 Fundamentals of Public Health 3 s.h.

Introduction to public health; emphasis on issues, challenges, achievements, careers; historical events that serve as a foundation for public health practice. GE: Social Sciences.

CPH:1600 Public Health Science: Inquiry and Investigation in Public Health 3 s.h.

Introduction to epidemiology, biostatistics, and the interdisciplinary nature of public health research and practice; how public policy and population-based interventions are subsequently shaped by public health evidence. GE: Quantitative or Formal Reasoning.

CPH:1800 Social and Psychological Determinants of Health: Changing Behavior, Improving Health 3 s.h.

Study of the social and psychological aspects of health, including understanding behavior change to improve health.

CPH:2050 Second Year Undergraduate Public Health Seminar 1 s.h.

Preparation for experiential learning opportunities, including development of interpersonal, teamwork, leadership, and communication skills; ethical decision making; understanding the cultural contexts in which professionals work; working with communities and the role of advocacy; professionalism.

CPH:2200 Climageddon: Understanding Climate Change and Associated Impacts on Health 2 s.h.

Discovery, underlying principles, and impacts of global climate change; scientific evidence, global climate models, international treaties, ethics, advocacy and denial of climate change; strategies for climate adaptation and mitigation of unsustainable practices.

CPH:2210 Introduction to Maternal and Infant Health Epidemiology 2 s.h.

Introductory overview of maternal and infant health concepts, methods, and issues, both domestic and abroad, including contraception and fertility, pregnancy complications, caesarean delivery, maternal and infant morbidity and mortality, and child survival.

CPH:2220 Building a Healthier Tomorrow: Public Health Methods to Minimize Disease and Pollutant Exposures 3 s.h.

Introduction to historical public health practices developed to prevent exposures to environmental contaminants; major sources of those contaminants that adversely affect natural waters and air are evaluated relative to methods used to provide safe drinking water and clean air; in-class exercises involve critical thinking and creativity to understand concepts and tools needed to utilize prior public health successes and application to current and future environmental health events.

CPH:2230 Finding Patient Zero: The Exploration of Infectious Disease Transmission and Pandemic Threats 3 s.h.

Exploration of lay and scientific literature, pandemic infection games, and popular culture television programming to evaluate past and fictional pandemics—are these pandemics rooted in fact or fiction?

CPH:2240 Health Disparities and Intersectionality with U.S. Latina/o/x Peoples 3 s.h.

Exploration of intersectionality—related to gender, immigration status, and more—and U.S. health disparities, particularly as they impact U.S. Latina/o/x peoples; Latina/o/x as a heterogeneous group originating from a variety of countries, with families that may have mixed immigration, education, class, and/or nationality status; public health approaches and concepts; intersectionality, social determinants of health, the Social Ecological Model, Ecosocial Theory, and Critical Race Theory; examination of various levels of racism, sexism, and other forms of intersectional discrimination. Same as GWSS:2400, LATS:2400.

CPH:2400 The U.S. Health System in a Global Context 3 s.h.

Fundamental organizational structures of the U.S. health system and the difference between systems globally; basic concepts of legal, ethical, economic, and regulatory dimensions of health care and policy and roles, influences, and responsibilities of government agencies.

CPH:2600 Introduction to Public Health Methods 3 s.h.

Introductory quantitative and qualitative methods used in public health practice and research. Prerequisites: CPH:1600 with a minimum grade of C-.

CPH:3050 Third Year Undergraduate Public Health Seminar 1 s.h.

Development and preparation for post-college plans, including how to conduct a job search, write a résumé and cover letter, interview, and apply to graduate programs in public health and related fields.

CPH:3100 Health Economics 3 s.h.

Introduction to microeconomic theory and applications to health and health care, including demand for health and health services, health insurance coverage, health care markets, behavior of health care providers, and role of government.

CPH:3200 Death at Work: Case Studies of Workplace Safety and Health 3 s.h.

Case-study approach to understanding the rights of workers to a safe and healthful workplace; relevant risk factors (physical, economic, social) among several working environments.

CPH:3210 Nutrition in Public Health 3 s.h.

Concepts and methods of obtaining and using food and nutrition information from federal databases and research publications; how food and nutrition knowledge, policy, and research are used for improvement of the health of populations.

CPH:3220 Public Health as a Public Good: Economics and Decision Making in Public Health Systems 3 s.h.

Role of government in the economy from a public health perspective; emphasis on the importance of public goods, behavioral economics in public health solutions, and key methods for evaluation of public programs.

CPH:3230 Human Genetics and Public Health 3 s.h.

Introduction to human genome and its impact on public health; students learn about public health initiatives and policies that include genetics (e.g., newborn screening, birth defects surveillance, cancer screening). Prerequisites: BIOL:1140 or BIOL:1141 or BIOL:1411.

CPH:3240 Global Health Today 1 s.h.

Attendance at diverse on-campus, local, and regional global health events. Same as GHS:3030.

CPH:3300 Undergraduate Independent Study in Public Health arr.

In-depth pursuit of an area of special interest in public health.

CPH:3400 Health, Work, and the Environment 3 s.h.

Survey of environmental and occupational health hazards and the associated health risks of exposure; how public health protects society from these hazards; how public health policy can be influenced by science. Same as GEOG:3210.

CPH:3500 Global Public Health 3 s.h.

Exploration of historical, current, and forecasted trends in global public health, the factors influencing health demographics in human populations, sources of health inequalities, and appropriate policy and intervention approaches for addressing global public health challenges. Same as GHS:3500.

CPH:3600 Applied Public Health Methods 3 s.h.

Application of quantitative and qualitative methods used in public health practice and research. Prerequisites: CPH:1600 with a minimum grade of C- and CPH:2600 with a minimum grade of C-.

CPH:3700 Methods for Program Implementation and Evaluation 3 s.h.

Introduction of theory and practice of program implementation and evaluation for health care and public health interventions focusing on programs implemented at the community level, including projects in government and nonprofit organizations. Prerequisites: CPH:1600 and CPH:2600.

CPH:3750 Undergraduate Service Learning in Public Health arr.

Community service learning experience directly related to goals and objectives of a specific public health course for undergraduate students; faculty-guided planning and reflection; satisfies the experiential learning public health degree requirement for undergraduate public health majors. Recommendations: CPH:2050 strongly recommended.

CPH:3800 Public Health Theories and Society 3 s.h.

Examination of public health and social science theories as they relate to socioeconomics, policy, institutions, communities, individual decision making, behavior, and health. Prerequisites: CPH:1400 and CPH:2600.

CPH:3900 Fundamentals in Public Health Emergency Preparedness and Response 3 s.h.

Basic concepts and principles used in emergency prevention, preparedness, response, and recovery at the local, state, and national levels with emphasis on roles and responsibilities of public health that align with policies, laws, and systems. Prerequisites: CPH:1400.

CPH:3999 Undergraduate Research Experience in Public Health arr.

Hands-on involvement in scholarly public health research activities under the supervision of faculty or research staff; satisfies the experiential learning degree requirement for undergraduate public health majors. Recommendations: CPH:2050 strongly recommended.

CPH:4200 Agriculture, Food Systems, and Sustainability 3 s.h.

Identification and development of tools to measure environmental and social sustainability of global agricultural practices, including interactions with the environment, social considerations, and the ability of agriculture to support farmers' livelihoods.

CPH:4210 Making a Difference: Public Health Policy and Advocacy 3 s.h.

Important role of policy in health, including policy structures, implementation, advocacy, and evaluation; students focus their work on a policy of their specific interest.

CPH:4220 Global Road Safety 3 s.h.

Road safety problem, data sources, research methods used in field, and how intervention and prevention programs are developed and evaluated; lecture, hands-on approaches. Same as GHS:4530, OEH:4530.

CPH:4230 Injury and Violence Prevention 3 s.h.

Theory, research, and practice of injury control; unintentional and intentional injuries; local, national, international injury issues. Same as EPID:4510, OEH:4510.

CPH:4240 Special Topics arr.

Didactic material in public health; may include tutorial, seminar, or faculty-directed work; may be a special topic or experience taught one time or on a first-time basis.

CPH:4250 Field Experiences in Public Health 1 s.h.

Direct involvement in actions being taken at local community level; topics include environmental health, infectious diseases, chronic diseases, and pediatric health; practical examples and hands-on experiences during site visits for topic-specific field investigations. Offered spring semesters. Prerequisites: BIOL:1140 or BIOL:1141 or BIOL:1411. Requirements: biology or microbiology coursework. Same as EPID:4314.

CPH:4750 Undergraduate Global Learning in Public Health arr.

Global public health experience; satisfies the experiential learning public health degree requirement for undergraduate public health majors. Recommendations: CPH:2050 strongly recommended.

CPH:4755 International Perspectives: Xicotepec 2 s.h.

Interdisciplinary service-learning course to enrich understanding of Mexican culture and history; students hone teamwork, leadership, cultural sensitivity, cultural humility, and project management skills while developing and carrying out public health projects that address community-identified needs; coordinated with the support of Rotary International.

CPH:4850 Undergraduate Public Health Internship arr.

Public health internship experience; satisfies the experiential learning public health degree requirement for undergraduate public health majors. Recommendations: CPH:2050 strongly recommended.

CPH:4990 Mentored Independent Undergraduate Research in Public Health arr.

Independent student research project under the supervision of a faculty mentor; satisfies the experiential learning degree requirement for undergraduate public health majors. Corequisites: CPH:3600. Recommendations: CPH:2050 strongly recommended.

CPH:4999 Public Health Capstone: Practice of Evidence-Based Public Health 3 s.h.

Students in their final year synthesize and apply knowledge through cumulative and integrative activities that serve as a capstone to their educational experience. Prerequisites: CPH:2400 and CPH:3050 and CPH:3400 and CPH:3500 and CPH:3600 and CPH:3700.

CPH:5100 Introduction to Public Health 3 s.h.

Concepts, structures, and activities in public health practice. Offered fall semesters and summer sessions.

CPH:5201 Interprofessional Education and Practice for M.P.H. Students I 0 s.h.

Students gain knowledge and skills in interprofessional practice between health professionals including medicine, pharmacy, dentistry, physical therapy, nursing, health administration, and public health; understanding roles/responsibilities, values, and ethics across health professions; development of teamwork skills.

CPH:5202 Interprofessional Education and Practice for M.P.H. Students II 0 s.h.

Students gain knowledge and skills in interprofessional practice between health professionals including medicine, pharmacy, dentistry, physical therapy, nursing, health administration, and public health; understanding roles/responsibilities, values, and ethics across health professions; development of teamwork skills.

CPH:5203 Interprofessional Education and Practice for M.P.H. Students III 0 s.h.

Students gain knowledge and skills in interprofessional practice between health professionals including medicine, pharmacy, dentistry, physical therapy, nursing, health administration, and public health; understanding roles/responsibilities, values, and ethics across health professions; development of teamwork skills.

CPH:6100 Essentials of Public Health 2 s.h.

Introduction and overview of the scope of public health; emphasis on history, definitions, issues, achievements, and future challenges; examples of public health research and practice.

CPH:6500 Independent Study in Public Health arr.

In-depth pursuit of an area of special interest in public health. Requirements: approval from the College of Public Health.

CPH:6600 Service-Learning in Public Health arr.

Community service learning experience directly related to goals and objectives of a specific public health course; faculty-guided planning and reflection.

CPH:6700 Public Health Emergency Preparedness for Veterinarians and Other Public Health**Disciplines** 2-3 s.h.

Introduction to public health emergency preparedness from a one health perspective; emergency preparedness from federal, state, and local perspectives; important elements for preparing responders; preparedness information systems and communication techniques.

CPH:7000 M.P.H. Practicum Experience 0-6 s.h.

Comprehensive and integrated application of knowledge acquired in the M.P.H. program in a practice setting; demonstration of professional competence in public health practice. Prerequisites: CBH:4105 and (HMP:5005 or HMP:4000) and EPID:4400 and BIOS:4120 and OEH:4240 and CPH:5100. Requirements: an approved practicum proposal.

CPH:7200 M.P.H. Capstone Experience 1 s.h.

Students gain knowledge and skills in public health practice by working on an interdisciplinary team to solve a real-world public health issue; each student has the opportunity to apply classroom and practical experience received throughout their M.P.H. coursework into an integrative experience; students particularly gain skills in advocacy, communication with diverse audiences on public health issues, and the role of different public health disciplines in solving health issues in the community.

CPH:7270 Principles of Scholarly Integrity: Public Health

0-1 s.h.

Training in the responsible conduct of research and scholarly activities; discussion of student/mentor responsibilities in pursuit of scholarly work and intellectual dialogues; responsibilities to the institution/scholarly community/society; public health core discipline examples are utilized.

CPH:7500 M.P.H. Applied Practice Experience 1-2 s.h.

Comprehensive and integrated application of knowledge acquired in the M.P.H. program in a practice setting; demonstration of professional competence in public health practice.

CPH:7604 Principles of Scholarly Integrity: Public Health - Postdoc/K Awardees

0 s.h.

Training in the responsible conduct of research and scholarly activities; discussion of student/mentor responsibilities in pursuit of scholarly work and intellectual dialogues; responsibilities to institution/scholarly community/society; utilization of public health core discipline examples; for public health postdoc/K awardees.

Public Health, B.A.

The Bachelor of Arts (B.A.) degree provides students with a basic understanding of the five core public health knowledge areas: biostatistics, social and behavioral sciences, epidemiology, health policy and management, and occupational and environmental health sciences. Students will be prepared to enter the workforce or continue their education.

A public health core provides the degree with breadth in the biological, social, economic, quantitative, geographic, and educational components of health and health disparities within and across populations. Students complete a cumulative capstone experience during which they will integrate, apply, and synthesize public health knowledge. As an integral part of their education, students also will be exposed to public health professionals and agencies.

Requirements

The Bachelor of Arts with a major in public health requires a minimum of 120 s.h., including at least 61 s.h. of work for the major. Students must have a cumulative g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major; in all college coursework and in all UI coursework; and in all college coursework in public health and in all UI public health coursework, including any courses administered by the College of Public Health in the Departments of Biostatistics, Community and Behavioral Health, Epidemiology, Health Management and Policy, and Occupational and Environmental Health. Students are required to earn a minimum of 30 s.h. in public health coursework at the University of Iowa.

The B.A. with a major in public health requires the following coursework.

College Success Requirement

All students are required to complete CSI:1600 Success at Iowa during the fall semester; students complete part one before participating in an orientation program. The course is designed to help students successfully transition to college life. The course covers information about online tools that are specific to the University, such as MyUI and Iowa Courses Online (ICON), and also discusses resources for navigating life on campus. Additional content includes financial aid literacy, strategies for making healthy behavior choices, sexual assault awareness and prevention, and the comprehensive transitional survey known as MAP-Works.

General Education Requirements

Code	Title	Hours
RHET:1030	Rhetoric	4
ENGL:1200	The Interpretation of Literature	3
World Languages		0-10
Natural Sciences		7
Quantitative or Formal Reasoning		3
Social Sciences		3
Historical Perspectives		3
Diversity and Inclusion		3
International and Global Issues		3
Literary, Visual, and Performing Arts		3
Values and Culture		3

Students may complete the world languages requirement using one of the following two options. One year of high school language study is generally equivalent to one semester of college language study.

Option One: attain fourth-level proficiency in a single world language, usually by completing four years of that language in high school or four semesters in college or an equivalent combination of high school and college coursework; or pass an achievement test or evaluation at fourth-level proficiency.

Option Two: attain second-level proficiency in each of two world languages, usually by completing two years of each language in high school or two semesters of each language in college or an equivalent combination of high school and college coursework; or pass achievement tests and/or evaluations at second-level proficiency in each language. Option two does not fulfill the World Languages requirement for the College of Liberal Arts and Sciences or qualify students to earn credit under the Furthering Language Incentive Program (FLIP).

Students may count courses taken to fulfill General Education Requirements toward other requirements for the B.A.

Prerequisites for Admission to the College

Students who wish to enter the major in public health after declaring the public health interest through the College of Liberal Arts and Sciences must complete the following by the end of the semester in which they apply before they may enter the major:

- completion of at least 12 s.h. at the University of Iowa;
- completion of CPH:1400 Fundamentals of Public Health with a grade of B-minus or higher;
- completion of CPH:1600 Public Health Science: Inquiry and Investigation in Public Health with a grade of B-minus or higher; and
- a cumulative g.p.a. of at least 2.75 in all courses taken at the University of Iowa and in all college-level coursework attempted.

Public Health Core Courses

Students must complete all of the following (30 s.h.).

Code	Title	Hours
CPH:1050	College of Public Health Direct Admit Seminar	1
CPH:1400	Fundamentals of Public Health	3
CPH:1600	Public Health Science: Inquiry and Investigation in Public Health	3
CPH:1800	Social and Psychological Determinants of Health: Changing Behavior, Improving Health	3
CPH:2050	Second Year Undergraduate Public Health Seminar	1
CPH:2400	The U.S. Health System in a Global Context	3
CPH:2600	Introduction to Public Health Methods	3

CPH:3050	Third Year Undergraduate Public Health Seminar	1	CPH:2230	Finding Patient Zero: The Exploration of Infectious Disease Transmission and Pandemic Threats	3
CPH:3400	Health, Work, and the Environment	3	CPH:3200	Death at Work: Case Studies of Workplace Safety and Health	3
CPH:3500	Global Public Health	3	CPH:3210	Nutrition in Public Health	3
CPH:3700	Methods for Program Implementation and Evaluation	3	CPH:3220	Public Health as a Public Good: Economics and Decision Making in Public Health Systems	3
CPH:4999	Public Health Capstone: Practice of Evidence-Based Public Health	3	CPH:3230	Human Genetics and Public Health	3

Requirements

Students complete 19 s.h. as indicated from the following.

Code	Title	Hours
One of these:		
BIOL:1140	Human Biology	4
BIOL:1141	Introductory Animal Biology	4
BIOL:1411	Foundations of Biology	4
All of these:		
CPH:3100	Health Economics	3
CPH:3600	Applied Public Health Methods (section 1)	3
CPH:3800	Public Health Theories and Society	3
CPH:3900	Fundamentals in Public Health Emergency Preparedness and Response	3
One of these:		
ANTH:2100	Anthropology and Contemporary World Problems	3
ANTH:2164	Culture and Healing for Future Health Professionals	3
COMM:1809	Social Marketing Campaigns	3
GEOG:3110	Geography of Health	3
GEOG:4770	Environmental Justice	3
IS:2000	Introduction to International Studies	3
JMC:3116	Media and Global Cultures	3
JMC:3150	Media and Health	3
PHIL:2402	Introduction to Ethics	3
POLI:3111	American Public Policy	3
SOC:1022	Social Justice and Social Welfare in the United States	3
SOC:2810	Social Inequality	3

Electives

Students complete a minimum of five College of Public Health courses from the following.

Code	Title	Hours
CPH:2200	Climageddon: Understanding Climate Change and Associated Impacts on Health	2
CPH:2220	Building a Healthier Tomorrow: Public Health Methods to Minimize Disease and Pollutant Exposures	3

CPH:2230	Finding Patient Zero: The Exploration of Infectious Disease Transmission and Pandemic Threats	3
CPH:3200	Death at Work: Case Studies of Workplace Safety and Health	3
CPH:3210	Nutrition in Public Health	3
CPH:3220	Public Health as a Public Good: Economics and Decision Making in Public Health Systems	3
CPH:3230	Human Genetics and Public Health	3
CPH:3240	Global Health Today	1
CPH:4200	Agriculture, Food Systems, and Sustainability	3
CPH:4210	Making a Difference: Public Health Policy and Advocacy	3
CPH:4220	Global Road Safety	3
CPH:4230	Injury and Violence Prevention	3
CPH:4250	Field Experiences in Public Health	1

Experiential Learning Requirement

Students must successfully complete at least one of these experiences from the following. Second Year Undergraduate Public Health Seminar (CPH:2050) is strongly recommended prior to enrollment in any of these courses. Contact the undergraduate program office for specific details.

Code	Title	Hours
Research		
CPH:3999	Undergraduate Research Experience in Public Health	0-3
CPH:4990	Mentored Independent Undergraduate Research in Public Health	3
Internship		
CPH:4850	Undergraduate Public Health Internship	0-3
Global Learning		
CPH:4750	Undergraduate Global Learning in Public Health	0-3
Service Learning		
CPH:3750	Undergraduate Service Learning in Public Health	0

B.A./CLAS Undergraduate Degree

Students admitted to or enrolled in the B.A. in public health program may pursue an additional degree in the College of Liberal Arts and Sciences (CLAS). Students pursuing an additional degree outside the College of Public Health are:

expected to meet all degree requirements, General Education Requirements, and GE CLAS Core requirements for both degree programs;

required to satisfy the collegiate residence requirements of both colleges;

assigned two advisors, one in each college; and

assessed tuition for the primary program of study in accordance with the rules of the Registrar's Office.

Additional considerations:

- Students may be awarded degrees in the two colleges simultaneously or separately without requiring additional coursework beyond the degree requirements.
- Current students enrolled in the College of Public Health who want to add a CLAS major should use the Change of College Application found in MyUI.
- Students who wish to discontinue the additional degree program will need to file a Discontinuation of Combined Degree Program form in the collegiate office of the program of study they are dropping.

Students may change majors with either college in the college academic programs office and still remain in the additional degree program.

Combined Programs

B.A./Graduate Degree

Combined undergraduate to graduate programs provide an opportunity for students to earn both their B.A. and a master's degree in five years by beginning to earn graduate credit during their fourth year of undergraduate study.

Students in the combined programs must complete all requirements for each degree. Students apply for admission to the combined program during their third year as undergraduates and enter the program at the beginning of their fourth year.

Applicants also must apply for admission to the master's degree program and must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website. For more information, see Undergrad to Grad (U2G) on the College of Public Health website.

Public health majors intending to pursue the Undergrad to Grad (U2G) combined degree program in public health must complete 120 s.h. Up to 15 s.h. may be earned in graduate credit by the end of a student's fourth year.

Public health majors must complete all of the following requirements in addition to the 15 s.h. of graduate coursework.

Public Health Major Degree Requirements

Coursework for the following requirements total approximately 60 s.h.

- public health core courses
- B.A. coursework
- public health elective coursework
- experiential learning requirement
- General Education Requirement courses

General Electives

- UI (nonmajor) coursework to total 120 s.h. by end of the fourth year; this could include up to 15 s.h. of graduate credit in public health coursework taken as an undergraduate student

Graduate courses taken during the fourth year do not count toward major requirements (including public health electives)

for the undergraduate public health major. However, these semester hours may count as general elective credits needed to complete the 120 s.h. required for a bachelor's degree.

Honors

Honors in the Major

Students majoring in public health have the opportunity to graduate with honors in the major. To graduate with honors in public health, students must successfully complete all college requirements with a g.p.a. of at least 3.33 in all courses for the major, in all college coursework, and in all UI coursework.

In addition, students must complete an honors thesis in CPH:4990 Mentored Independent Undergraduate Research in Public Health, where they must write a brief research proposal summarizing background and goals of honors research, defend their research proposal to a honors project faculty member and a honors advisor, conduct research, submit their honors thesis, and conclude with an oral and/or poster presentation.

Outstanding undergraduate students in the college have an opportunity to undertake independent study and to work closely with faculty members. Completion of requirements for honors in the major also will satisfy the experiential learning requirement. Consult the College of Public Health undergraduate program office for more information.

University of Iowa Honors Program

Public health interest students interested in honors study are encouraged to participate in the University of Iowa Honors Program until they are admitted to the College of Public Health. Visit Honors at Iowa to learn about the University's honors program.

Membership in the UI Honors Program is not a requirement for applying to or graduating with honors in the public health major.

Admission

Admission to the Bachelor of Arts program in public health is selective. Students who meet the minimum admission requirements are not guaranteed admission.

Students may be admitted to the College of Public Health either through direct admission or standard admission.

Direct Admission

Direct admission is designed for students applying to the university as first-year students for the fall semester. Applicants who meet the high school course requirements and present an American College Testing (ACT) composite score of 26 or higher or a combined Scholastic Aptitude Test (SAT) evidence-based reading and writing, and math SAT score of at least 1230 for tests taken after March 1, 2016 or a combined Scholastic Aptitude Test (SAT) critical reading and math SAT score of at least 1170 for tests taken prior to March 1, 2016; and a high school g.p.a. of at least 3.60 are directly admitted to the college. Applicants who meet course requirements and either the test score or grade-point average requirement also will be considered. Students who are denied direct admission may file an online petition for direct admission to the College of Public Health.

Students granted direct admission to the college are eligible to apply for first-year scholarships. The scholarship application process is competitive and is based on high school record and short essay responses.

First-year students not admitted directly to the College of Public Health may be admitted to the College of Liberal Arts and Sciences as a public health interest student.

Transfer student applications are not being accepted at this time for direct admission to the College of Public Health. Transfer students may apply to the College of Liberal Arts and Sciences public health interest designation.

Standard Admission

University of Iowa students are eligible to apply for standard admission to the College of Public Health, typically after their first year, once they complete prerequisite courses and earn the required grade-point average.

Application deadline for fall admission is May 1. Application deadline for spring admission is December 1. Students should meet the following requirements by the end of the semester in which they apply:

- completion of at least 12 s.h. at the University of Iowa;
- completion of CPH:1400 Fundamentals of Public Health with a grade of B-minus or higher;
- completion of CPH:1600 Public Health Science: Inquiry and Investigation in Public Health with a grade of B-minus or higher; and
- a minimum g.p.a. of 2.75 in all University of Iowa coursework and in all college coursework.

Students who are denied standard admission may file an online appeal for denial of admission to the College of Public Health if they can provide documentation of extenuating circumstances that affected their academic performance.

Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

The Four-Year Graduation Plan applies only to students who are directly admitted to the College of Public Health or students who meet the prerequisites and submit an application for standard admission before the third semester begins (including public health interest students).

Before the second semester begins: CPH:1050 College of Public Health Direct Admit Seminar (for direct admits only)

Before the third semester begins: CPH:1400 Fundamentals of Public Health, CPH:1600 Public Health Science: Inquiry and Investigation in Public Health, and at least one-quarter of the semester hours required for graduation

Before the fourth semester begins: CPH:2050 Second Year Undergraduate Public Health Seminar and CPH:2600 Introduction to Public Health Methods

Before the fifth semester begins: one-half of the semester hours required for graduation

Before the sixth semester begins: CPH:3050 Third Year Undergraduate Public Health Seminar and CPH:3600 Applied Public Health Methods

Before the seventh semester begins: CPH:3700 Methods for Program Implementation and Evaluation and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: all public health core courses, except CPH:4999 Public Health Capstone: Practice of Evidence-Based Public Health, and the experiential learning requirement

During the eighth semester: all remaining General Education Requirement courses, enrollment in all remaining coursework in the major, including CPH:4999 Public Health Capstone: Practice of Evidence-Based Public Health, and a sufficient number of semester hours to graduate

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Degree Application: apply on MyUI before deadline (typically in February for spring, September for fall)

Hours	15
Total Hours	114-123

- a Students complete the experiential learning requirement by choosing an approved option. CPH:2050 is strongly recommended prior to enrollment in experiential learning.
- b Prerequisite for admission to the College of Public Health.
- c Fulfills a major requirement and may fulfill a GE requirement.
- d GE courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
- e Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
- f Choose from: ANTH:2100, ANTH:2164, COMM:1809, GEOG:3110, GEOG:4770, IS:2000, JMC:3116, JMC:3150, PHIL:2402, POLI:3111, SOC:1022, SOC:2810.
- g Students are required to have completed the fourth-level proficiency in a single world language or the second-level proficiency in two different world languages.
- h Students must complete at least five electives by choosing from approved CPH courses.
- i Choose from: CPH:3999, CPH:4990, CPH:4850, CPH:4750, CPH:3750. A completed application and approval by the College of Public Health undergraduate program office are required.
- j All core courses must be complete prior to enrollment in CPH:4999.
- k Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>

Career Advancement

The B.A. program provides knowledge of the community and behavioral aspects of public health for students interested in working in health education, health communication, public health program development, or public health policy in local, federal, or international governmental or nongovernmental agencies. Students will be prepared for advanced education in the social sciences, communication studies, social and community health, health policy and management, and other fields.

Public Health, B.S.

The Bachelor of Science (B.S.) degree provides students with a basic understanding of the five core public health knowledge areas: biostatistics, social and behavioral sciences, epidemiology, health policy and management, and occupational and environmental health sciences. Students will be prepared to enter the workforce or continue their education.

A public health core provides the degree with breadth in the biological, social, economic, quantitative, geographic, and educational components of health and health disparities within and across populations. Students complete a cumulative capstone experience during which they will integrate, apply, and synthesize public health knowledge. As an integral part of their education, students also will be exposed to public health professionals and agencies.

Requirements

The Bachelor of Science with a major in public health requires a minimum of 120 s.h., including at least 62 s.h. of work for the major. Students must have a cumulative g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major; in all college coursework and in all UI coursework; and in all college coursework in public health and in all UI public health coursework, including any courses administered by the College of Public Health in the Departments of Biostatistics, Community and Behavioral Health, Epidemiology, Health Management and Policy, and Occupational and Environmental Health. Students are required to earn a minimum of 30 s.h. in public health coursework at the University of Iowa.

The B.S. with a major in public health requires the following coursework.

College Success Requirement

All students are required to complete CSI:1600 Success at Iowa during the fall semester; students complete part one before participating in an orientation program. The course is designed to help students successfully transition to college life. The course covers information about online tools that are specific to the University, such as MyUI and Iowa Courses Online (ICON), and also discusses resources for navigating life on campus. Additional content includes financial aid literacy, strategies for making healthy behavior choices, sexual assault awareness and prevention, and the comprehensive transitional survey known as MAP-Works.

General Education Requirements

Code	Title	Hours
RHET:1030	Rhetoric	4
ENGL:1200	The Interpretation of Literature	3
World Languages		0-10
Natural Sciences		7
Quantitative or Formal Reasoning		3
Social Sciences		3
Historical Perspectives		3
Diversity and Inclusion		3
International and Global Issues		3
Literary, Visual, and Performing Arts		3
Values and Culture		3

Students may complete the world languages requirement using one of the following two options. One year of high school language study is generally equivalent to one semester of college language study.

Option One: attain fourth-level proficiency in a single world language, usually by completing four years of that language in high school or four semesters in college or an equivalent combination of high school and college coursework; or pass an achievement test or evaluation at fourth-level proficiency.

Option Two: attain second-level proficiency in each of two world languages, usually by completing two years of each language in high school or two semesters of each language in college or an equivalent combination of high school and college coursework; or pass achievement tests and/or evaluations at second-level proficiency in each language. Option two does not fulfill the World Languages requirement for the College of Liberal Arts and Sciences or qualify students to earn credit under the Furthering Language Incentive Program (FLIP).

Students may count courses taken to fulfill General Education Requirements toward other requirements for the B.S.

Prerequisites for Admission to the College

Students who wish to enter the major in public health after declaring the public health interest through the College of Liberal Arts and Sciences must complete the following by the end of the semester in which they apply before they may enter the major:

- completion of at least 12 s.h. at the University of Iowa;
- completion of CPH:1400 Fundamentals of Public Health with a grade of B-minus or higher;
- completion of CPH:1600 Public Health Science: Inquiry and Investigation in Public Health with a grade of B-minus or higher; and
- a cumulative g.p.a. of at least 2.75 in all courses taken at the University of Iowa and in all college-level coursework attempted.

Public Health Core Courses

Students must complete all of the following (30 s.h.).

Code	Title	Hours
CPH:1050	College of Public Health Direct Admit Seminar	1
CPH:1400	Fundamentals of Public Health	3
CPH:1600	Public Health Science: Inquiry and Investigation in Public Health	3
CPH:1800	Social and Psychological Determinants of Health: Changing Behavior, Improving Health	3
CPH:2050	Second Year Undergraduate Public Health Seminar	1
CPH:2400	The U.S. Health System in a Global Context	3
CPH:2600	Introduction to Public Health Methods	3

CPH:3050	Third Year Undergraduate Public Health Seminar	1
CPH:3400	Health, Work, and the Environment	3
CPH:3500	Global Public Health	3
CPH:3700	Methods for Program Implementation and Evaluation	3
CPH:4999	Public Health Capstone: Practice of Evidence-Based Public Health	3

Requirements

Students complete 22-23 s.h. as indicated from the following.

Code	Title	Hours
All of these:		
BIOL:1411	Foundations of Biology	4
BIOL:1412	Diversity of Form and Function	4
CHEM:1110	Principles of Chemistry I	4
CPH:3600	Applied Public Health Methods	3
One of these:		
MATH:1460	Calculus for the Biological Sciences	4
MATH:1850	Calculus I	4
One of these:		
CS:1110	Introduction to Computer Science	3
CS:1210	Computer Science I: Fundamentals	4

Electives

Students complete a minimum of four College of Public Health courses from the following.

Code	Title	Hours
CPH:2200	Climageddon: Understanding Climate Change and Associated Impacts on Health	2
CPH:2220	Building a Healthier Tomorrow: Public Health Methods to Minimize Disease and Pollutant Exposures	3
CPH:2230	Finding Patient Zero: The Exploration of Infectious Disease Transmission and Pandemic Threats	3
CPH:3200	Death at Work: Case Studies of Workplace Safety and Health	3
CPH:3210	Nutrition in Public Health	3
CPH:3220	Public Health as a Public Good: Economics and Decision Making in Public Health Systems	3
CPH:3230	Human Genetics and Public Health	3
CPH:3240	Global Health Today	1

CPH:4200	Agriculture, Food Systems, and Sustainability	3
CPH:4210	Making a Difference: Public Health Policy and Advocacy	3
CPH:4220	Global Road Safety	3
CPH:4230	Injury and Violence Prevention	3
CPH:4250	Field Experiences in Public Health	1

Experiential Learning Requirement

Students must successfully complete at least one of these experiences from the following. Second Year Undergraduate Public Health Seminar (CPH:2050) is strongly recommended prior to enrollment in any of these courses. Contact the undergraduate program office for specific details.

Code	Title	Hours
Research		
CPH:3999	Undergraduate Research Experience in Public Health	0-3
CPH:4990	Mentored Independent Undergraduate Research in Public Health	3
Internship		
CPH:4850	Undergraduate Public Health Internship	0-3
Global Learning		
CPH:4750	Undergraduate Global Learning in Public Health	0-3
Service Learning		
CPH:3750	Undergraduate Service Learning in Public Health	0

B.S./CLAS Undergraduate Degree

Students admitted to or enrolled in the B.S. in public health program may pursue an additional degree in the College of Liberal Arts and Sciences (CLAS). Students pursuing an additional degree outside the College of Public Health are:

expected to meet all degree requirements, General Education Requirements, and GE CLAS Core requirements for both degree programs;

required to satisfy the collegiate residence requirements of both colleges;

assigned two advisors, one in each college; and

assessed tuition for the primary program of study in accordance with the rules of the Registrar's Office.

Additional considerations:

- Students may be awarded degrees in the two colleges simultaneously or separately without requiring additional coursework beyond the degree requirements.
- Current students enrolled in the College of Public Health who want to add a CLAS major should use the Change of College Application found in MyUI.
- Students who wish to discontinue the additional degree program will need to file a Discontinuation of Combined Degree Program form in the collegiate office of the program of study they are dropping.

Students may change majors with either college in the college academic programs office and still remain in the additional degree program.

Combined Programs

B.S./Graduate Degree

Combined undergraduate to graduate programs provide an opportunity for students to earn both their B.S. and a master's degree in five years by beginning to earn graduate credit during their fourth year of undergraduate study.

Students in the combined programs must complete all requirements for each degree. Students apply for admission to the combined program during their third year as undergraduates and enter the program at the beginning of their fourth year.

Applicants also must apply for admission to the master's degree program and must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website. For more information, visit Undergrad to Grad (U2G) on the College of Public Health website.

Public health majors intending to pursue the Undergrad to Grad (U2G) combined degree program in public health must complete 120 s.h. Up to 15 s.h. may be earned in graduate credit by the end of a student's fourth year.

Public health majors must complete all of the following requirements in addition to the 15 s.h. of graduate coursework.

Public Health Major Degree Requirements

- public health core courses
- B.S. coursework
- public health elective coursework
- experiential learning requirement
- General Education Requirement courses

General Electives

- UI (nonmajor) coursework to total 120 s.h. by end of the fourth year; this could include up to 15 s.h. of graduate credit in public health coursework taken as an undergraduate student

Graduate courses taken during the fourth year do not count toward major requirements (including public health electives) for the undergraduate public health major. However, these semester hours may count as general elective credits needed to complete the 120 s.h. required for a bachelor's degree.

Honors

Honors in the Major

Students majoring in public health have the opportunity to graduate with honors in the major. To graduate with honors in public health, students must successfully complete all college requirements with a g.p.a. of at least 3.33 in all courses for the major, in all college coursework, and in all UI coursework.

In addition, students must complete an honors thesis in CPH:4990 Mentored Independent Undergraduate Research in Public Health, where they must write a brief research proposal summarizing background and goals of honors research,

defend their research proposal to a honors project faculty member and a honors advisor, conduct research, submit their honors thesis, and conclude with an oral and/or poster presentation.

Outstanding undergraduate students in the college have an opportunity to undertake independent study and to work closely with faculty members. Completion of requirements for honors in the major also will satisfy the experiential learning requirement. Consult the College of Public Health undergraduate program office for more information.

University of Iowa Honors Program

Public health interest students interested in honors study are encouraged to participate in the University of Iowa Honors Program until they are admitted to the College of Public Health. Visit Honors at Iowa to learn about the University's honors program.

Membership in the UI Honors Program is not a requirement for applying to or graduating with honors in the public health major.

Admission

Admission to the Bachelor of Science program in public health is selective. Students who meet the minimum admission requirements are not guaranteed admission.

Students may be admitted to the College of Public Health either through direct admission or standard admission.

Direct Admission

Direct admission is designed for students applying to the university as first-year students for the fall semester. Applicants who meet the high school course requirements and present an American College Testing (ACT) composite score of 26 or higher or a combined Scholastic Aptitude Test (SAT) evidence-based reading and writing, and math SAT score of at least 1230 for tests taken after March 1, 2016 or a combined Scholastic Aptitude Test (SAT) critical reading and math SAT score of at least 1170 for tests taken prior to March 1, 2016; and a high school g.p.a. of at least 3.60 are directly admitted to the college. Applicants who meet course requirements and either the test score or grade-point average requirement also will be considered. Students who are denied direct admission may file an online petition for direct admission to the College of Public Health.

Students granted direct admission to the college are eligible to apply for first-year scholarships. The scholarship application process is competitive and is based on high school record and short essay responses.

First-year students not admitted directly to the College of Public Health may be admitted to the College of Liberal Arts and Sciences as a public health interest student.

Transfer student applications are not being accepted at this time for direct admission to the College of Public Health. Transfer students may apply to the College of Liberal Arts and Sciences public health interest designation.

Standard Admission

University of Iowa students are eligible to apply for standard admission to the College of Public Health, typically after their

first year, once they complete prerequisite courses and earn the required grade-point average.

Application deadline for fall admission is May 1. Application deadline for spring admission is December 1. Students should meet the following requirements by the end of the semester in which they apply:

- completion of at least 12 s.h. at the University of Iowa;
- completion of CPH:1400 Fundamentals of Public Health with a grade of B-minus or higher;
- completion of CPH:1600 Public Health Science: Inquiry and Investigation in Public Health with a grade of B-minus or higher; and
- a minimum g.p.a. of 2.75 in all University of Iowa coursework and in all college coursework.

Students who are denied standard admission may file an online appeal for denial of admission to the College of Public Health if they can provide documentation of extenuating circumstances that affected their academic performance.

Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

The Four-Year Graduation Plan applies only to students who are directly admitted to the College of Public Health or students who meet the prerequisites and submit an application for standard admission before the third semester begins (including public health interest students).

Before the second semester begins: CPH:1050 College of Public Health Direct Admit Seminar (for direct admits only)

Before the third semester begins: CPH:1400 Fundamentals of Public Health, CPH:1600 Public Health Science: Inquiry and Investigation in Public Health, and at least one-quarter of the semester hours required for graduation

Before the fourth semester begins: CPH:2050 Second Year Undergraduate Public Health Seminar and CPH:2600 Introduction to Public Health Methods

Before the fifth semester begins: one-half of the semester hours required for graduation

Before the sixth semester begins: CPH:3050 Third Year Undergraduate Public Health Seminar and CPH:3600 Applied Public Health Methods

Before the seventh semester begins: CPH:3700 Methods for Program Implementation and Evaluation and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: all public health core courses, except CPH:4999 Public Health Capstone: Practice of Evidence-Based Public Health, and the experiential learning requirement

During the eighth semester: all remaining General Education Requirement courses, enrollment in all remaining coursework in the major, including CPH:4999 Public Health Capstone: Practice of Evidence-Based Public Health, and a sufficient number of semester hours to graduate

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

- i Students must complete at least four electives by choosing from approved CPH courses.

j Choose from: CPH:3999, CPH:4990, CPH:4850, CPH:4750, CPH:3750. A completed application and approval by the College of Public Health undergraduate program office are required.

k All core courses must be complete prior to enrollment in CPH:4999.

l Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>

Career Advancement

The B.S. program provides knowledge of the natural sciences for students interested in working in a research setting or preparing for advanced study in programs such as biostatistics, dentistry, environmental health, epidemiology, medicine, nursing, occupational health, pharmacy, or veterinary medicine.

Public Health, Undergraduate Certificate

For more information about the program, visit the Undergraduate Certificate in Public Health web page.

Requirements

The undergraduate Certificate in Public Health requires 18 s.h. of credit. Students must maintain a g.p.a. of at least 2.00 in work for the certificate. They should contact the certificate coordinator to complete a plan of study before they begin certificate coursework.

The certificate is intended for non-public health majors and anyone interested in obtaining knowledge about public health concepts to enhance their ability to succeed in their chosen field. Students completing the certificate will have an understanding of emerging issues in public health, the social and behavioral aspects of preventing disease, environmental health concepts, and the changing health care system in the United States.

The certificate may be earned by any student admitted to the University of Iowa who is not concurrently enrolled in a graduate or professional degree program, except for those students who are earning a B.A. or B.S. with a major in public health or by those who have received one of those degrees.

The undergraduate Certificate in Public Health requires the following coursework. Fundamentals of Public Health (CPH:1400) must be taken prior to or concurrent with other certificate courses.

Core Courses

Code	Title	Hours
Both of these:		
CPH:1400	Fundamentals of Public Health	3
CPH:1600	Public Health Science: Inquiry and Investigation in Public Health	3

One of the courses not taken from the "Required Courses" list above		
Any College of Public Health course (prefix CPH) numbered 2200-2399 or 3200-3399 or 4200-4399		

Master of Public Health, M.P.H.

The Master of Public Health (M.P.H.) is recognized as the primary professional degree in public health. The objective of Iowa's M.P.H. program is to provide education and practical training in public health to students who will be leaders in their respective communities. The program is appropriate for individuals who already have professional experience and/or training in public health as well as for those whose expertise lies outside of public health.

Students may earn the Master of Public Health (M.P.H.) as a single degree, or they may pursue one of several combined degree programs. The College of Public Health offers combined M.P.H./professional degree programs with the Carver College of Medicine and the Colleges of Law and Pharmacy. It also offers two programs in collaboration with the College of Veterinary Medicine at Iowa State University. See "M.P.H./D.V.M. (Iowa State University)" and descriptions of the combined degree programs under Combined Programs [p. 1893] in this section of the Catalog.

Undergraduate students can pursue a M.P.H. degree in the following subprograms: biostatistics, community and behavioral health, epidemiology, occupational and environmental health, or policy. Undergraduate students work with their undergraduate advisor and the College of Public Health Undergrad to Grad (U2G) coordinator to determine eligibility. In addition, the College of Public Health collaborates with Grinnell College, Cornell College, and Coe College to offer bachelor's degrees and Master of Public Health programs for undergraduate students who would like to earn an M.P.H. degree.

The Master of Public Health program is offered by the College of Public Health; the degree is awarded by the Graduate College.

Requirements

The Master of Public Health requires 42 s.h. of graduate credit. Students must choose one of the following subprograms: biostatistics, community and behavioral health, epidemiology, occupational and environmental health, policy, or practicing veterinarians.

Degree requirements include a core course in public health practice and in each of the five core disciplines of public health (biostatistics, epidemiology, environmental health, health policy and management, and social and behavioral sciences), a set of content-specific required courses and electives, one interprofessional education course, an applied practice experience, and a capstone experience. Students in the epidemiology subprogram must complete a bioscience course.

All M.P.H. students complete the coursework listed under "Common Requirements." In addition, students complete the coursework listed for their chosen subprogram.

Common Requirements

The following coursework is required for all M.P.H. students. Students must earn a B-minus or higher in each core course. Students may repeat courses to achieve this standard.

Core Courses

Code	Title	Hours
All of these (18 s.h.):		
CPH:5100	Introduction to Public Health	3
BIOS:4120	Introduction to Biostatistics (students in the quantitative methods subprogram may substitute BIOS:5710)	3
CBH:4105	Introduction to Health Promotion and Disease Prevention	3
EPID:4400	Epidemiology I: Principles	3
HMP:4000	Introduction to the U.S. Health Care System	3
OEH:4240	Global Environmental Health	3

Interprofessional Education Course

The interprofessional education and practice course is required for all M.P.H. students. Those students in the combined degree programs, M.D./M.P.H. and Pharm.D./M.P.H., with the appropriate M.P.H. subprograms, will have this requirement waived since the content is covered in pharmacy or medicine courses prior to enrollment in the M.P.H. program.

Code	Title	Hours
This course:		
CPH:5203	Interprofessional Education and Practice for M.P.H. Students III	0

Applied Practice Experience

This requirement is a fieldwork experience in which students show proficiency in applying academic principles in community settings. There are many applied practice opportunities for M.P.H. students locally, nationally, and internationally.

Before they register for and begin the applied practice experience, students choose an approved topic. A final written report with an oral presentation or a poster presentation is required.

Code	Title	Hours
This course:		
CPH:7500	M.P.H. Applied Practice Experience	2

Capstone Experience

Students are required to complete the capstone experience in their final semester.

Code	Title	Hours
This course:		
CPH:7200	M.P.H. Capstone Experience	1

Biostatistics Subprogram

The Master of Public Health with the biostatistics subprogram requires 42 s.h. of graduate credit. The subprogram is offered by the Department of Biostatistics [p. 1903].

The subprogram is designed to train public health professionals who can provide leadership in the analysis of public health data and the design of studies for public health investigations. It is intended for individuals who are interested

in public health and who have quantitative ability but not advanced mathematics training.

Applicants to the subprogram must meet all M.P.H. admission requirements; see Admission [p. 1895] in this section of the Catalog. They also should have a cumulative g.p.a. of at least 3.00 and should have completed the following math and computer science coursework: single variable calculus and matrix algebra, satisfied by one semester of calculus equivalent to AP Calculus AB and a high school algebra course involving matrices; and elementary computer programming instruction in any commonly used modern programming language (e.g., Python, Java, C++). Individuals who are admitted to the subprogram without having met all of these requirements must satisfy unmet requirements during their first semester of enrollment in the program.

In addition to the M.P.H. coursework listed under "Common Requirements" above, the biostatistics subprogram requires the following courses.

Biostatistics Subprogram Core

Code	Title	Hours
All of these (10 s.h.):		
BIOS:5120	Regression Modeling and ANOVA in the Health Sciences	3
BIOS:5130	Applied Categorical Data Analysis	3
BIOS:5510	Biostatistical Computing (when topic is programming with R)	2
BIOS:5510	Biostatistical Computing (when topic is programming with SAS)	2

Students with sufficient mathematical background can substitute BIOS:5710 Biostatistical Methods I, BIOS:5720 Biostatistical Methods II, and BIOS:5730 Biostatistical Methods in Categorical Data in place of BIOS:4120 Introduction to Biostatistics, BIOS:5120 Regression Modeling and ANOVA in the Health Sciences, and BIOS:5130 Applied Categorical Data Analysis. The advanced sequence requires 2 s.h. of fewer elective credits.

Biostatistics Electives

Electives (12 s.h.) may be chosen from the following list, and may include any related course approved by the student's advisor.

Code	Title	Hours
BIOL:4213	Bioinformatics	4
BIOS:6210	Applied Survival Analysis	3
BIOS:6310	Introductory Longitudinal Data Analysis	3
BIOS:6610	Statistical Methods in Clinical Trials	3
BIOS:6810	Bayesian Methods and Design	3
BIOS:7600	Advanced Biostatistics Seminar	0-3
ISE:4172	Big Data Analytics	3
STAT:3100	Introduction to Mathematical Statistics I	3
STAT:3101	Introduction to Mathematical Statistics II	3

STAT:3210	Experimental Design and Analysis	3
STAT:4100	Mathematical Statistics I	3
STAT:4101	Mathematical Statistics II	3
STAT:4200	Statistical Methods and Computing	3
STAT:4520	Bayesian Statistics	3
STAT:5100	Statistical Inference I	3
STAT:5101	Statistical Inference II	3
STAT:6540	Applied Multivariate Analysis	3
STAT:6560	Applied Time Series Analysis	3

Community and Behavioral Health Subprogram

The Master of Public Health with the community and behavioral health subprogram requires 42 s.h. of graduate credit. The subprogram is offered by the Department of Community and Behavioral Health [p. 1913].

The subprogram prepares public health practitioners for a variety of positions related to community development, health program implementation, and health education. Students learn how to design, implement, and evaluate evidence-based interventions directed toward identified public health problems in populations.

A bachelor's degree in the social and behavioral sciences is good preparation for this program, but students come from a variety of educational backgrounds. Preference is given to applicants who have professional experience.

In addition to the M.P.H. coursework listed under "Common Requirements" above, the community and behavioral health subprogram requires the following courses.

Community and Behavioral Health Subprogram Core

Students earn 15 s.h. in the required subprogram core.

Code	Title	Hours
Theory		
This course:		
CBH:5220	Health Behavior and Health Education	3
Community and Society		
One of these:		
CBH:5235	Community-Based Participatory Research	3
CBH:6230	Health Equity, Disparities, and Social Justice	3
Intervention		
One of these:		
CBH:6205	Designing and Implementing Interventions	3
CBH:6220	Health Communication Campaigns	3
Methods		
Two of these:		
CBH:5305	Evaluation: Approaches and Applications	3
CBH:5310	Qualitative Research for Public Health	3

CBH:6335	Research Methods in Community and Behavioral Health	3
----------	---	---

Community and Behavioral Health Electives

Students must take an additional 6 s.h. of elective community and behavioral health coursework or, with the approval of their advisor, they can select coursework in another area. In addition, once the 15 s.h. of required community and behavioral health credit is met, students may take any of the other courses as electives.

The following is a list of suggested elective courses.

Code	Title	Hours
CBH:4140	Feminist Activism and Global Health	3
CBH:5350	Foundations of Maternal and Child Health	3
CBH:5435	Substance Abuse Prevention and Early Intervention	3
CBH:5440	Prevention and Early Intervention of Mental Health Disorders	3
CBH:6115	Ethnographic Field Methods	3
CBH:6405	Global Maternal, Newborn, and Child Health	3
CBH:6415	Independent Study in Community and Behavioral Health	arr.
HMP:6360	Nonprofit Organizational Effectiveness I	3
SOC:6420	Seminar: Selected Topics in Deviance and Control	3
URP:6253	Designing Sustainable and Healthy Cities	1-3
URP:6260	Transportation Policy and Planning	3

Epidemiology Subprogram

The Master of Public Health with the epidemiology subprogram requires 42 s.h. of graduate credit. The subprogram is offered by the Department of Epidemiology [p. 1919].

The subprogram focuses on fundamental epidemiological concepts and methods and provides training in the use of public health data and methods for disease assessment and in methods for evaluating the need and outcome of programs and interventions. Graduates of the program work in public health departments and other health care settings.

Epidemiology subprogram students are required to attend departmental seminars and journal club. They also must present one scientific poster at an international, national, regional, state, university, or departmental poster session.

In addition to the M.P.H. coursework listed under "Common Requirements" above, the epidemiology subprogram requires the following courses.

Epidemiology Subprogram Core

Students take EPID:5925 Epidemiology Journal Club: Evaluating the Literature three times.

Code	Title	Hours
All of these (15 s.h.):		
EPID:5241	Statistical Methods in Epidemiology	4
EPID:5925	Epidemiology Journal Club: Evaluating the Literature (taken three times)	0
EPID:5540	Public Health Surveillance Mechanisms, Applications, and Data	3
EPID:5580	Public Health Laboratory Techniques	1
EPID:5600	Introduction to Epidemiology Data Management and Analysis	3
EPID:6400	Epidemiology II: Advanced Methods	4
Bioscience—one of these (3-4 s.h.):		
PATH:5270	Pathogenesis of Major Human Diseases	3
PATH:8133	Introduction to Human Pathology for Graduate Students	4

Students who already have completed a course equivalent to one of the bioscience courses, PATH:5270 Pathogenesis of Major Human Diseases or PATH:8133 Introduction to Human Pathology for Graduate Students, may substitute an additional elective.

Epidemiology Electives

Additional approved elective coursework must be taken to complete the 42 s.h. total required for the M.P.H. At least 3 s.h. of elective credit must be earned in courses offered by the Department of Epidemiology (prefix EPID) or in one of the following biostatistics courses.

Code	Title	Hours
BIOS:6210	Applied Survival Analysis	3
BIOS:6310	Introductory Longitudinal Data Analysis	3

Occupational and Environmental Health Subprogram

The Master of Public Health with the occupational and environmental health subprogram requires 42 s.h. of graduate credit. The subprogram is offered by the Department of Occupational and Environmental Health [p. 1940].

The subprogram provides students with a broad perspective on public health and career preparation for a variety of professional positions in occupational and environmental health. Public health experience provides desirable background for this subprogram.

In addition to the M.P.H. coursework listed under "Common Requirements" above, the occupational and environmental health subprogram requires the following courses.

Occupational and Environmental Health Subprogram Core

Students earn 13 s.h. in the required subprogram core.

Students take OEH:5010 Occupational and Environmental Health Seminar three times: twice for 0 s.h. and once for 1

s.h. If completing the M.P.H. in a one-year course of study, OEH:5010 is taken two times: once for 0 s.h. and once for 1 s.h.

Code	Title	Hours
All of these (4 s.h.):		
OEH:5010	Occupational and Environmental Health Seminar	0-1
OEH:5620	Occupational Health	3
Three of these (9 s.h.):		
OEH:4260	Global Water and Health	3
OEH:4510	Injury and Violence Prevention	3
OEH:5410	Occupational Safety	3
OEH:6110	Rural Health and Agricultural Medicine	3
OEH:6510	Environmental and Occupational Epidemiology	3
OEH:6710	Human Toxicology and Risk Assessment	3

Occupational and Environmental Health Electives

Students can earn the remainder of credit for their degree in elective courses (8 s.h.) offered by a department in the College of Public Health.

The following is a list of suggested elective courses.

Code	Title	Hours
EPID:6400	Epidemiology II: Advanced Methods	4
OEH:4260	Global Water and Health	3
OEH:4310	Occupational Ergonomics: Principles	3
OEH:4510	Injury and Violence Prevention	3
OEH:4530	Global Road Safety	3
OEH:5410	Occupational Safety	3
OEH:5530	Interpreting Occupational and Environmental Health Research	2
OEH:6110	Rural Health and Agricultural Medicine	3
OEH:6120	Current Topics in Agriculture and Rural Health	0-1
OEH:6431	Assessing Noise Hazards	1
OEH:6432	Assessing Nonionizing Radiation Hazards	1
OEH:6433	Assessing Ionizing Radiation Hazards	1
OEH:6510	Environmental and Occupational Epidemiology	3
OEH:6520	Injury Epidemiology	3
OEH:6710	Human Toxicology and Risk Assessment	3

Policy Subprogram

The Master of Public Health with the policy subprogram requires 42 s.h. of graduate credit. The subprogram is

offered by the Department of Health Management and Policy [p. 1930].

The subprogram offers coursework and applied learning experiences that prepare students for careers in health policy analysis, system and organizational planning, and program evaluation. Graduates of the program find positions in federal, state, and local government; professional associations; and private agencies. Varied academic backgrounds are appropriate preparation for this program, including business, liberal arts and sciences, and the health professions.

In addition to the M.P.H. coursework listed under "Common Requirements" above, the policy and administration subprogram requires the following courses.

Policy Subprogram Core

Code	Title	Hours
All of these:		
HMP:5610	Health Policy	3
HMP:5650	Health Policy Analysis	3
HMP:6610	Legal Aspects of Healthcare	3
HMP:6750	Seminar in Health Policy	3

Policy Electives

Code	Title	Hours
At least 9 s.h. chosen from these:		
HMP:5310	Healthcare Quality Management	2-3
HMP:5410	Health Economics I	3
HMP:5450	Health Insurance and Managed Care	3
HMP:5750	Medicare and Medicaid Policy	3
HMP:6710	Federalism and Health Policy	3
LAW:8562	Health Law	3
HMP:6850	Independent Study and Research	arr.
POLI:3100	American State Politics	3

Practicing Veterinarians Subprogram

The Master of Public Health with the practicing veterinarians subprogram requires a minimum of 42 s.h. of graduate credit. The program is presented through a collaboration between the University of Iowa College of Public Health and the College of Veterinary Medicine at Iowa State University and is offered primarily by distance learning. It enables students to prepare for new career opportunities and equips them to respond to public health challenges such as zoonotic diseases, food security and foodborne illnesses, bioterrorism, and environmental health.

Students participate in two summer institutes, one on each campus during consecutive summers (two weeks in May and June); the rest of the program is internet-based, so students may complete requirements at times that fit their schedules. Specific courses are required each semester of the program.

In addition to the M.P.H. coursework listed under "Common Requirements" above, the practicing veterinarians subprogram requires the following courses.

Practicing Veterinarians Subprogram Core

Code	Title	Hours
All of these (21 s.h.):		
CPH:6700	Public Health Emergency Preparedness for Veterinarians and Other Public Health Disciplines	3
EPID:5200	Principles of Public Health Informatics	3
EPID:5300	Food Safety	3
EPID:5470	Applied Veterinary Epidemiology/Biostatistics	3
EPID:5550	Diagnostic Microbiology for Epidemiology	3
EPID:5570	Zoonotic Diseases	3
OEH:6110	Rural Health and Agricultural Medicine	3

Professional M.P.H. Option

Individuals who have already earned a professional degree can choose to complete the professional M.P.H. degree option allowing greater flexibility in elective course selection. Typically, students who pick this option are fellows, medical residents, practicing nurses, or physicians. Completion of the program can enhance physicians ability to receive primary certification from the American Board of Preventive Medicine. Physicians who are considering this certification should review the Become Certified requirements on the American Board of Preventive Medicine website. Students can take core courses on campus or asynchronously online, accommodating a variety of schedules. Students work closely with their advisor to develop a plan of study that is tailored to their specific background and goals.

A typical student completes the M.P.H. in two years. The following is a sample plan based on a full-time student starting in the fall. Students work with their advisor to choose a plan that works best for them.

In addition to the M.P.H. coursework listed under "Common Requirements" above, the professional program requires the following courses.

Professional Program Core

Students earn 9 s.h. in the required core.

Code	Title	Hours
Both of these:		
OEH:6110	Rural Health and Agricultural Medicine	3
CPH:6700	Public Health Emergency Preparedness for Veterinarians and Other Public Health Disciplines	3
One of these:		
EPID:5500	Introduction to Clinical Epidemiology	3
EPID:6910	Pharmacoepidemiology and Comparative Effectiveness Research	3

Professional Program Electives

Code	Title	Hours
At least 12 s.h. chosen from these:		
BIOS:5120	Regression Modeling and ANOVA in the Health Sciences	3
BIOS:5130	Applied Categorical Data Analysis	3
CBH:5220	Health Behavior and Health Education	3
CBH:5435	Substance Abuse Prevention and Early Intervention	3
CBH:5440	Prevention and Early Intervention of Mental Health Disorders	3
CBH:6220	Health Communication Campaigns	3
CBH:6230	Health Equity, Disparities, and Social Justice	3
EPID:5200	Principles of Public Health Informatics	3
EPID:5570	Zoonotic Diseases	3
HMP:5610	Health Policy	1-3
HMP:6360	Nonprofit Organizational Effectiveness I	3
HMP:6365	Nonprofit Organizational Effectiveness II	3
OEH:4260	Global Water and Health	3
OEH:4510	Injury and Violence Prevention	3
OEH:5410	Occupational Safety	3
OEH:6510	Environmental and Occupational Epidemiology	3

Combined Programs

M.P.H. (Policy Subprogram)/J.D.

The combined Master of Public Health with a policy subprogram/Juris Doctor requires a minimum of 30 s.h. of graduate credit in addition to the requirements for the J.D. degree. A total of 6 s.h. from the J.D. degree will count toward the 42 s.h. required to earn the M.P.H. degree. The program helps students develop special expertise in public health legal issues. It is designed to train qualified students for leadership roles in both the public and private sectors.

Separate application to each degree program is required; applicants must be admitted to both programs before they may be admitted to the combined degree program.

The combined M.P.H. (policy subprogram)/J.D. requires the following coursework.

Code	Title	Hours
HMP:5610	Health Policy	1-3
HMP:5650	Health Policy Analysis	3
HMP:6610	Legal Aspects of Healthcare	3
HMP:6750	Seminar in Health Policy	2-3

These courses count toward both degrees.

Code	Title	Hours
LAW:8467	Family Law	3
LAW:8562	Health Law	3

M.P.H. Common Requirements

Students must complete courses listed under "Common Requirements" (core courses and practicum) under Master of Public Health Requirements [p. 1889] in this section of the Catalog.

M.P.H. Electives

Students earn 9 s.h. in elective courses chosen from one of the following public health areas: biostatistics, community and behavioral health, epidemiology, health policy, or occupational and environmental health. Students choose electives in consultation with their advisors in the College of Law and the College of Public Health.

J.D. Requirements

Students in the combined M.P.H. (policy subprogram)/J.D. degree program must complete the curriculum of the J.D. program; see Juris Doctor, J.D. [p. 1650] (College of Law) in the Catalog. Students must be enrolled in the College of Law to take College of Law courses.

M.P.H./M.D.

The combined Master of Public Health/Doctor of Medicine requires a minimum of 30 s.h. of graduate credit in addition to the requirements for the M.D. degree. A total of 12 s.h. from the M.D. degree will count toward the 42 s.h. required to earn the M.P.H. degree. Students who complete the program enjoy expanded career opportunities and are well prepared to apply the principles of medicine and public health in their work.

Separate application to each degree program is required; applicants must be admitted to both programs before they may be admitted to the combined program.

The combined M.P.H./M.D. requires the following coursework.

Code	Title	Hours
Both of these:		
OEH:6110	Rural Health and Agricultural Medicine	3
CPH:6700	Public Health Emergency Preparedness for Veterinarians and Other Public Health Disciplines	2-3
One of these:		
EPID:5500	Introduction to Clinical Epidemiology	3
EPID:6910	Pharmacoepidemiology and Comparative Effectiveness Research	3

All of the following courses count toward the M.D. degree; 12 s.h. from these count toward the M.P.H. degree.

Code	Title	Hours
MED:8121	Clinical and Professional Skills I	3
MED:8122	Medicine and Society I	3
MED:8132	Medicine and Society II	4
MED:8222	Medicine and Society III	4

M.P.H. Common Requirements

Students must complete courses listed as "Common Requirements" (core courses and practicum) under Master of Public Health Requirements [p. 1889] in this section of the Catalog.

M.P.H. Electives

Students earn 9 s.h. in elective courses chosen from one of the following public health areas: biostatistics, community and behavioral health, epidemiology, health communication, health policy, occupational and environmental health.

Students choose electives in consultation with their advisors in the Carver College of Medicine and the College of Public Health.

M.D. Requirements

Students in the combined M.P.H./M.D. program must complete the curriculum of the M.D. program; see Doctor of Medicine, M.D. [p. 1693] (Carver College of Medicine) in the Catalog.

M.P.H./Pharm.D.

The combined Master of Public Health/Doctor of Pharmacy requires 42 s.h. of graduate credit in addition to the requirements of the Pharm.D. degree. The program helps students develop expertise in public health related to pharmacotherapy, health promotion, disease prevention, and medication safety.

Graduates of the program may work in areas of interest common to pharmacy and public health, such as spread and treatment of disease, community health, and immunology; bioterrorism, terrorism, and preparedness; genetics; insurance; managed care; family and juvenile health; and protection of special populations. Employment opportunities are available in hospitals and clinics and with health care providers; private practice; insurance and managed care organizations; local, county, state, and federal government; public health governmental agencies; and colleges and universities.

Separate application to each degree program is required; applicants must be admitted to both programs before they may be admitted to the combined degree program.

The combined M.P.H./Pharm.D. requires the following coursework.

Code	Title	Hours
Both of these:		
CPH:6700	Public Health Emergency Preparedness for Veterinarians and Other Public Health Disciplines	2-3
OEH:6110	Rural Health and Agricultural Medicine	3
One of these:		
EPID:5500	Introduction to Clinical Epidemiology	3
EPID:6910	Pharmacoepidemiology and Comparative Effectiveness Research	3

All of the following courses count toward the Pharm.D. degree; 12 s.h. from these count toward the M.P.H. degree.

Code	Title	Hours
PHAR:8250	Applications of Pharmacy Practice I	1
PHAR:8263	Integrated Pharmacotherapy: Infectious Diseases	4
PHAR:8265	Applications of Pharmacy Practice II	1
PHAR:8374	Applications of Pharmacy Practice III	1
PHAR:8375	Advanced Topics in Health Services	2
PHAR:8377	Integrated Pharmacotherapy: Capstone	4
PHAR:8378	Pharmacy Law and Ethics	2

M.P.H. Common Requirements

Students must complete courses listed as "Common Requirements" (core courses and practicum) under Master of Public Health Requirements [p. 1889] in this section of the Catalog.

M.P.H. Electives

Students select electives totaling 9 s.h. from one of the following public health areas: biostatistics, community and behavioral health, epidemiology, policy, or occupational and environmental health. Electives are chosen in consultation with the student's advisors in the Colleges of Pharmacy and Public Health.

Pharm.D. Requirements

Students in the combined M.P.H./Pharm.D. program must complete the curriculum of the Pharm.D. program; see Doctor of Pharmacy, Pharm.D. [p. 1862] (College of Pharmacy) in the Catalog. Students must be enrolled in the College of Pharmacy in order to take College of Pharmacy courses.

M.P.H./D.V.M. (Iowa State University)

The Master of Public Health/Doctor of Veterinary Medicine is offered by the University of Iowa College of Public Health and the College of Veterinary Medicine at Iowa State University. It requires a minimum of 30 s.h. in addition to the requirements for the D.V.M. degree (see College of Veterinary Medicine in the Iowa State University Catalog). A total of 12 s.h. from the D.V.M. degree will count toward the 42 s.h. required to earn the M.P.H. degree. The program prepares students for work as state veterinarians, as college and university faculty members, in local and state departments of public health, in the Public Health Service Commissioned Corps, in state agricultural departments, and for public health positions in the military.

Separate application to each degree program is required; applicants must be admitted to both programs before they may be admitted to the M.P.H./D.V.M. degree program. For M.P.H. admission requirements, see Admission [p. 1895] in this section of the Catalog.

The M.P.H./D.V.M. requires the following coursework.

Code	Title	Hours
All of these:		
EPID:5300	Food Safety	3

EPID:5470	Applied Veterinary Epidemiology/Biostatistics	3
EPID:5570	Zoonotic Diseases	3

M.P.H. Common Requirements

Students must complete courses listed as "Common Requirements" (core courses and practicum) under Master of Public Health Requirements [p. 1889] in this section of the Catalog.

M.P.H. Electives

Code	Title	Hours
At least 9 s.h. from these:		
CPH:6700	Public Health Emergency Preparedness for Veterinarians and Other Public Health Disciplines	2-3
EPID:5200	Principles of Public Health Informatics	3
EPID:5550	Diagnostic Microbiology for Epidemiology (distance education course)	3
OEH:6110	Rural Health and Agricultural Medicine	3

Admission

Applicants to the M.P.H. program must apply through the Schools of Public Health Application Service (SOPHAS) and then set up a University of Iowa account and pay the UI supplemental fee. Applicants must submit scores on the Graduate Record Exam (GRE) General Test, Law School Admission Test (LSAT), Dental Admission Test (DAT), Medical School Admission Test (MCAT), Veterinary College Admission Test (VCAT), Graduate Management Admission Test (GMAT), or another professional placement exam; scores must be at or above the median scores for test takers applying to similar programs. For detailed application information, visit Prospective Graduate Students on the Master of Public Health website.

Applicants to the M.P.H. program must have successfully completed one semester each of college algebra and biology.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Students may enter the M.P.H. program in fall and summer. Application deadline for fall or summer entrance to the M.P.H. program is April 15.

Application deadline for the M.P.H. for practicing veterinarians is March 1.

Application deadline for the Undergrad to Grad (U2G) program is February 1.

Students may enter the M.P.H. combined programs in fall, spring, and summer. Contact the individual combined programs for deadline information.

Academic Plans

Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Master of Public Health, M.P.H.

Financial Support

A limited number of tuition scholarship awards are available each year for M.P.H. students. For information on financing education through jobs, grants, and loans, contact the University's Office of Student Financial Aid.

Career Advancement

For more information about careers in public health, visit This is Public Health online.

Public Health, Graduate Certificate

Requirements

The graduate Certificate in Public Health requires 18 s.h. of credit. Students must complete the certificate's required coursework within five years of entering the program and must maintain a g.p.a. of at least 2.75 in work for the certificate. All certificate courses are offered online at least once a year, and all courses are offered on campus. Students who are only enrolled in the Certificate in Public Health program may not register for courses other than those required for the certificate.

The certificate program is designed to improve public health practice and public health workforce capacity in Iowa and the upper Midwest. It is intended primarily for individuals in public health practice, those in the workforce, and those interested in strengthening their knowledge and skills in basic public health competencies.

The graduate Certificate in Public Health requires the following coursework.

Code	Title	Hours
All of these:		
CPH:5100	Introduction to Public Health	3
BIOS:4120	Introduction to Biostatistics	3
CBH:4105	Introduction to Health Promotion and Disease Prevention	3
EPID:4400	Epidemiology I: Principles	3
HMP:4000	Introduction to the U.S. Health Care System	3
OEH:4240	Global Environmental Health	3

For more information about the program, visit the Graduate Certificate in Public Health web page.

Admission

Applicants to the certificate program must hold a bachelor's degree and must have a cumulative g.p.a. of at least 2.75. They must submit official transcript(s), a statement of purpose, two reference letters, a résumé, and an online application.

For more information about how to apply, visit the Graduate Certificate in Public Health web page.

Agricultural Safety and Health

Head, Department of Occupational and Environmental Health

- Peter S. Thorne

Director

- Diane Rohlman (Occupational and Environmental Health)

Graduate certificate: agricultural safety and health

Website: <https://www.public-health.uiowa.edu/certificate-ash/>

The certificate program in agricultural safety and health trains students to detect safety and illness hazards, and treat and prevent farm-related illnesses and injuries. The program is available for students in related health science, environmental science, or occupational health and safety programs who want to supplement other training with agricultural health information.

The certificate may enhance employment opportunities in health care delivery, government, and the private sector.

The Certificate in Agricultural Safety and Health is administered by the Department of Occupational and Environmental Health [p. 1940]. The Graduate College grants the certificate.

Programs

Graduate Program of Study Certificate

- Certificate in Agricultural Safety and Health [p. 1902]

Agricultural Safety and Health, Graduate Certificate

Requirements

The graduate Certificate in Agricultural Safety and Health requires 12 s.h. of credit.

The Certificate in Agricultural Safety and Health requires the following coursework.

Code	Title	Hours
OEH:5410	Occupational Safety	3
OEH:5620	Occupational Health	3
OEH:6110	Rural Health and Agricultural Medicine	3
OEH:6120	Current Topics in Agriculture and Rural Health (taken three times for 1 s.h. each)	3
Total Hours		12

For more information, visit the Graduate Certificate in Agricultural Safety and Health web page.

Admission

Applicants to the certificate program should hold a bachelor's degree from an accredited university with a g.p.a. of at least 2.50, or they should have equivalent experience and education. Application materials must include the program's application form, a résumé, and a letter of interest explaining the applicant's current position and education objectives.

For more information, and how to apply, visit the Graduate Certificate in Agricultural Safety and Health web page.

Biostatistics

Head

- Joseph E. Cavanaugh

Graduate degrees: M.S. in biostatistics; Ph.D. in biostatistics

Graduate certificate: biostatistics

Faculty: <https://www.public-health.uiowa.edu/biostatistics-faculty-list/>

Website: <https://www.public-health.uiowa.edu/biostat/>

The Department of Biostatistics prepares students for professional and academic careers in biostatistics. Graduates find positions in pharmaceutical, health care, and research companies and institutions; in universities and government agencies; and as consultants. The department also provides training for non-biostatistics students.

Biostatistics faculty members work closely with both clinical and basic science investigators on the University of Iowa health sciences campus in the design and analysis of research projects. The department has research expertise representing a broad array of methodological areas of statistics and biostatistics, including clinical trials, computational statistics, Bayesian modeling and inference, high-dimensional data analysis, statistical genetics and genomics, bioinformatics, informatics, statistical and machine learning, spatial and spatio-temporal modeling, time series analysis, survival data analysis, longitudinal data analysis, network analysis, causal inference, comparative effectiveness studies, model selection, epidemic modeling, and syndromic surveillance. Many of these areas represent current, cutting-edge areas of disciplinary focus in a rapidly evolving field.

In addition to the M.S. and the Ph.D. degrees in biostatistics, the department offers a subprogram for the Master of Public Health (M.P.H.) degree in biostatistics. See "M.P.H. Subprogram" below.

M.P.H. Subprogram

The Department of Biostatistics offers the biostatistics subprogram for the Master of Public Health degree. The subprogram is designed to train public health professionals for leadership in the analysis of public health data and the design of studies for public health investigations. See the Master of Public Health, M.P.H. [p. 1889] in the Catalog.

Programs

Graduate Programs of Study

Majors

- Biostatistics subprogram for the Master of Public Health [p. 1889] degree
- Master of Science in Biostatistics [p. 1906]
- Doctor of Philosophy in Biostatistics [p. 1909]

Certificate

- Certificate in Biostatistics [p. 1912]

Facilities

Department of Biostatistics resources and activities include three centers. The Biostatistics Consulting Center provides opportunities for students to gain valuable experience working with faculty and staff in the health sciences at the University

of Iowa. The Clinical Trials Statistical and Data Management Center serves the statistical design, data management, and analysis needs of a variety of multicenter clinical trials, and among those are Clinical Islet Transplantation (CIT) Consortium, Network of Excellence in Neuroscience Clinical Trials (NeuroNEXT), and the Parkinson's Progression Markers Initiative (PPMI). The Center for Public Health Statistics facilitates the collection, statistical analyses, and dissemination of health data in support of the University's research, teaching, and service missions and in partnership with the Iowa Department of Public Health.

Courses

Biostatistics Courses

BIOS:4110 General Biostatistics **3 s.h.**

Biostatistics and biostatistical computation; biostatistical aspects of health-related problems; clinical trials; statistical issues in big data problems; disease modeling; disease mapping; genetics and epidemiology; brief introduction to survival and longitudinal analyses.

BIOS:4120 Introduction to Biostatistics **3 s.h.**

Application of statistical techniques to biological data including descriptive statistics, probability and distributions, sampling distributions, nonparametric methods, hypothesis tests, confidence intervals, analysis of categorical data, and simple linear regression; designed for non-biostatistics majors and M.P.H. students. Requirements: college algebra or ALEKS score of 65% or higher.

BIOS:5120 Regression Modeling and ANOVA in the Health Sciences **3 s.h.**

Continuation of BIOS:4120; correlation, simple and multiple linear regression, confounding, interactions, model selection, single and multiple factor ANOVA (analysis of variance) models, contrasts, multiple comparisons, nested and block designs, and an introduction to mixed models; designed for non-biostatistics majors. Offered spring semesters and summer sessions. Prerequisites: BIOS:4120. Same as IGPI:5120, STAT:5610.

BIOS:5130 Applied Categorical Data Analysis **3 s.h.**

Analysis of proportions, risk measures, and measures of association; Mantel-Haenszel method; logistic regression for binary responses and for matched data; logistic regression for multi-category responses; analysis of count data (Poisson regression and negative binomial regression); analysis of clustered data (generalized estimating equations and generalized linear mixed effects model); special topics include the application of propensity score methods; designed for non-biostatistics majors. Offered fall semesters. Prerequisites: BIOS:5120. Same as IGPI:5130.

BIOS:5310 Research Data Management **3 s.h.**

Introduction to data management techniques and problems encountered in gathering and processing data from biomedical investigations; introduction to SAS, techniques taught in SAS; designed for non-biostatistics majors. Offered fall and spring semesters. Recommendations: prior programming experience with C, C++, Python, Java, or other. Same as IGPI:5310, STAT:5810.

- BIOS:5510 Biostatistical Computing** 2 s.h.
Introduction to computer programming using SAS and R statistical software packages; programming language syntax, constructs, procedures, and techniques for data management, data analysis, and statistical programming commonly encountered in biostatistics; designed for first-year biostatistics majors. Offered fall semesters. Corequisites: BIOS:5710. Same as IGPI:5510.
- BIOS:5710 Biostatistical Methods I** 4 s.h.
Probability distributions, moments, estimation, parametric and nonparametric inference for one-sample and two-sample problems, analysis of frequency data; emphasis on use of computers; designed for first-year biostatistics majors. Offered fall semesters. Requirements: two semesters of calculus. Same as IGPI:5710.
- BIOS:5720 Biostatistical Methods II** 4 s.h.
Continuation of BIOS:5710; multi-factor ANOVA (analysis of variance), multiple comparisons, orthogonal contrasts, linear regression and correlation, regression diagnostics and remedial measures, model selection, and mixed models; designed for first-year biostatistics majors. Offered spring semesters. Prerequisites: BIOS:5710. Requirements: one semester of linear algebra. Same as IGPI:5720.
- BIOS:5730 Biostatistical Methods in Categorical Data** 3 s.h.
Estimation of proportions, rates, risks, relative risks, and odds ratios; Mantel-Haenszel method; logistic regression (including ordinal logistic regression and multi-category nominal logistic regression); Poisson regression and negative binomial regression; methods for correlated or clustered data (conditional logistic regression, generalized estimating equations, and mixed effects models); special topics include an introduction to generalized linear models and likelihood-based inferential techniques in this framework; designed for first-year biostatistics majors. Offered spring semesters. Prerequisites: BIOS:5510 and BIOS:5710. Corequisites: BIOS:5720. Same as IGPI:5730.
- BIOS:6210 Applied Survival Analysis** 3 s.h.
Nonparametric, parametric, and semi-parametric methods for time-to-event data; types of censoring; Kaplan-Meier estimation; Cox proportional hazards models, including methods for assessing adequacy of the proportional hazards assumption; time varying covariates; sample size calculations for comparison of two or more groups; focus on analysis of real data sets and examples using statistical software. Offered spring semesters. Prerequisites: BIOS:5120 or BIOS:5720. Same as IGPI:6210.
- BIOS:6310 Introductory Longitudinal Data Analysis** 3 s.h.
Introduction to statistical models and estimation methods for outcome variables (normal and non-normal) clustered or measured repeatedly in time or space; focus on applications and computer software methods for ANOVA based methods, hierarchical linear models, linear mixed models, correlated regression models, generalized estimating equations, and generalized linear mixed models. Offered fall semesters. Prerequisites: BIOS:5120 or STAT:3200. Same as IGPI:6310, STAT:6550.
- BIOS:6420 Survey Design and Analysis** 3 s.h.
Methodological issues regarding design, sampling approach, implementation, analysis, and interpretation of surveys and questionnaires in public health research. Offered spring semesters of even years. Prerequisites: EPID:4400 and BIOS:5120. Same as EPID:6420.
- BIOS:6610 Statistical Methods in Clinical Trials** 3 s.h.
Survey of statistical methods commonly used in clinical trials; primary focus on methodologic perspective for the design, conduct, analysis, and interpretation of all phases of clinical trials; logistical and operational aspects of conducting multisite clinical trials; designed for biostatistics majors. Offered spring semesters. Prerequisites: BIOS:5720. Requirements: familiarity with SAS and R programming. Same as IGPI:6610.
- BIOS:6650 Causal Inference** 3 s.h.
Concepts of causal inference, counterfactuals, confounding, causal graphs, internal/external validity, heterogeneity of treatment effect; methods covered include propensity score matching (optimal pair, multiple control and full matching; near-exact, fine-balance, and risk set matching) and stratification; covariate balance checks; sensitivity analysis; inverse probability of treatment weighted estimation; doubly robust estimators; mediation analysis; marginal structural models. Offered fall semesters of odd years. Prerequisites: BIOS:5720 and BIOS:5730 and ((STAT:4100 and STAT:4101) or (STAT:5100 and STAT:5101)). Same as IGPI:6650.
- BIOS:6720 Statistical Machine Learning for Biomedical and Public Health Data** 3 s.h.
Statistical machine learning techniques for analysis of biomedical and public health data; methodology and application of unsupervised learning, supervised learning for regression and classification, ensemble learning, model assessment, feature selection, and high-dimensional inference. Prerequisites: BIOS:5510 and BIOS:5720 and (STAT:4100 and STAT:4101) or (STAT:5100 and STAT:5101). Requirements: BIOS:5510 with topic of programming with R.
- BIOS:6810 Bayesian Methods and Design** 3 s.h.
Theory and application of Bayesian methods in biomedical research; foundations of Bayesian statistics including decision theory, study design, model development, inference and implementation of computational algorithms; designed for biostatistics majors. Offered fall semesters of even years. Prerequisites: BIOS:5510 and BIOS:5720 and BIOS:5730 and STAT:4100 and STAT:4101.
- BIOS:7110 Likelihood Theory and Extensions** 4 s.h.
Theoretical foundations of inferential methods based on likelihood and its extensions (e.g., profile, conditional, partial, marginal, pseudo likelihood). Prerequisites: (BIOS:5720 and STAT:5100 and STAT:5101) or (STAT:4100 and STAT:4101).
- BIOS:7120 Advanced Topics in Biostatistics** 4 s.h.
Classical likelihood-based inference, numerical optimization, model and data deficiencies, expectation-maximization (EM) algorithm, M-estimation, nonparametrics and marginal likelihood, and the bootstrap. Prerequisites: BIOS:7110.
- BIOS:7210 Survival Data Analysis** 3 s.h.
Types of censoring and truncation; survival function estimation; parametric inference using exponential, Weibull, and accelerated failure time models; nonparametric tests; sample size calculation; Cox regression with stratification and time-dependent covariates; regression diagnostics; competing risks; topics may include analysis of correlated survival data and/or recurrent events; designed for biostatistics and statistics majors. Offered fall semesters. Prerequisites: BIOS:5720 and ((STAT:4100 and STAT:4101) or (STAT:5100 and STAT:5101)). Same as IGPI:7210, STAT:7570.

- BIOS:7230 Advanced Clinical Trials** 3 s.h.
Modules that address advanced topics and issues encountered when conducting a clinical trial; discussions of recent publications and FDA guidance documents dealing with current topics in clinical trials. Prerequisites: (STAT:4101 or STAT:5101) and BIOS:6610. Requirements: familiarity with SAS and R programming.
- BIOS:7240 High-Dimensional Data Analysis** 3 s.h.
Analysis of high-dimensional data with emphasis on use of penalized regression models such as lasso, elastic net, minimax concave penalty (MCP), smoothly clipped absolute deviation (SCAD), and group lasso; large-scale hypothesis testing and false discovery rate estimation; inference for penalized likelihoods. Prerequisites: (STAT:4100 and STAT:4101) or (STAT:5100 and STAT:5101) and BIOS:5510 and BIOS:5720. Requirements: BIOS:5510 with section subtitle of programming with R.
- BIOS:7250 Theory of Linear and Generalized Linear Models** 4 s.h.
Theoretical foundations of traditional linear models and generalized linear models; emphasis on modeling structures, estimability and identifiability, estimation and testing. Prerequisites: STAT:5100 and STAT:5101 and BIOS:5720.
- BIOS:7270 Scholarly Integrity in Biostatistics** 1 s.h.
Responsible conduct of research training; emphasis on issues of particular relevance to biostatisticians including authorship, communication, student/mentor relationships, plagiarism, fabrication and falsification of data, bias, Type I/II errors, reproducible research, data confidentiality and security, conflicts of interest, and human/animal subjects. Requirements: graduate standing in biostatistics.
- BIOS:7310 Longitudinal Data Analysis** 3 s.h.
Statistical models and estimation methods for outcome variables (normal and non-normal) clustered or measured repeatedly in time or space; includes ANOVA based methods, hierarchical linear models, linear mixed models, error structures, generalized estimating equations, and generalized linear mixed models; may include Bayesian approaches; designed for biostatistics and statistics majors. Offered spring semesters of odd years. Prerequisites: (BIOS:5720 and STAT:4100 and STAT:4101) or (STAT:5100 and STAT:5101). Same as IGPI:7310.
- BIOS:7330 Advanced Biostatistical Computing** 3 s.h.
Advanced topics in biostatistical computing and large or complicated data/models; matrix decomposition, optimization, Bayesian computing, parallel programming, working with campus high performance computing (HPC) resources; topics are explored in R, including package development and efficient R code. Prerequisites: MATH:2700 and BIOS:5510 and STAT:4101. Requirements: BIOS:5510 with section subtitle of programming with R.
- BIOS:7410 Analysis of Categorical Data** 3 s.h.
Models for discrete data, distribution theory, maximum likelihood and weighted least squares estimation for categorical data, tests of fit, models selection. Offered spring semesters. Prerequisites: (BIOS:5720 or STAT:5200) and (STAT:5101 or STAT:4101). Same as STAT:7510.
- BIOS:7500 Preceptorship in Biostatistics** arr.
Work experience using knowledge and skill acquired in classroom; arranged in conjunction with ongoing departmental or collegiate activities or with governmental agencies or private industry; preparation of prospectus and presentation of research results in a department seminar.
- BIOS:7600 Advanced Biostatistics Seminar** 0-3 s.h.
Current topics; supervised experience in reading and interpreting biostatistical literature. Same as IGPI:7600.
- BIOS:7604 Scholarly Integrity in Biostatistics for Postdocs** 0 s.h.
Responsible conduct of research training; emphasis on issues of particular relevance to biostatisticians and statisticians including authorship, communication, student/mentor relationships, plagiarism, fabrication and falsification of data, bias, Type I/II errors, reproducible research, data confidentiality and security, conflicts of interest, human/animal subjects. Requirements: postdoctoral research scholar/fellow standing in biostatistics or statistics.
- BIOS:7700 Problems/Special Topics in Biostatistics** arr.
Didactic material in biostatistics; may include tutorials, seminars, faculty-directed independent work (e.g. literature search, project, short research project).
- BIOS:7800 Independent Study in Biostatistics** arr.
In-depth pursuit of an area of special interest in biostatistics requiring substantial creativity and independence.
- BIOS:7850 Research in Biostatistics** arr.
Research that may lead to a dissertation.
- BIOS:7900 Thesis/Dissertation** arr.

Biostatistics, M.S.

Requirements

The Master of Science program in biostatistics requires a minimum of 38 s.h. of graduate credit. Students must maintain a g.p.a. of at least 3.00. Those who receive a grade of C on 7 s.h. of coursework may be dismissed from the program.

The program provides training in the design of experiments and in analysis of data related to biomedical or public health problems. It emphasizes mathematical, statistical, and computer methods for dealing with quantitative information and provides opportunities for students to gain statistical consulting experience with a variety of problems.

M.S. students are required to complete an in-depth preceptorship under the direction of a departmental faculty member and a final comprehensive-style examination.

The M.S. with a major in biostatistics requires the following coursework.

Core Courses

Code	Title	Hours
All of these:		
BIOS:5510	Biostatistical Computing (taken twice for 2 s.h. each; topics should be programming with R and programming with SAS)	4

This course:		
BIOS:7270	Scholarly Integrity in Biostatistics	1

Electives

Students complete a minimum of 5-6 s.h. of electives with at least 3 s.h. in quantitative coursework (statistics or biostatistics). It is recommended that students consider a biology/public health course as the other elective, particularly for those who have not had prior exposure to these areas. Electives must be approved by the advisor and the director of graduate studies.

Admission

Applicants to the M.S. program in biostatistics must apply through the Schools of Public Health Application Service (SOPHAS). After the SOPHAS application is verified, the applicant pays a supplemental Graduate College admission fee to the University of Iowa Office of Admissions. For detailed application information, visit Requirements and How to Apply to Biostatistics on the Department of Biostatistics website.

The biostatistics faculty considers several factors when evaluating applications for admission, including Graduate Record Examination (GRE) General Test scores, grade-point averages, letters of recommendation, intent and motivation for graduate study, and research interests.

All applicants must hold a bachelor's degree, have a cumulative g.p.a. of at least 3.00, and have taken the Graduate Record Examination (GRE) General Test. Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). They must score at least 100 (internet-based) on the TOEFL. Applicants with lower scores are not considered for admission. In place of TOEFL scores, the department accepts IELTS scores of 7.0 or higher, with no subscore below 6.0.

All biostatistics applicants are required to have strong written and oral communication skills.

All applicants must be competent in at least one computer programming language. They also must have mathematical sciences training in methods and techniques of single variable and multivariable differential and integral calculus, and in linear algebra. Previous coursework or experience in statistical methods or data analysis is preferred.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Students may enter in the fall; the priority application deadline is December 1.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

- Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
- STAT:5100 is required if pursuing a PhD.
- Complete two sections of BIOS:5510, Programming in R and Programming in SAS.
- STAT:5101 is required if pursuing a PhD.
- Required for Graduate Research Assistants (GRA) or potential GRAs.
- Work with faculty advisor to select appropriate graduate elective coursework. More information can be found in the General Catalog and department website.

Financial Support

A limited number of teaching and research assistantships are available. Assistantships offer financial support and tuition assessed at the resident tuition rate along with a tuition

scholarship. They also provide valuable on-the-job training experience.

For information on financing education through jobs, grants, and loans, contact the University's Office of Student Financial Aid.

Career Advancement

Graduates find career opportunities in many areas, including pharmaceuticals, health care, research companies and institutions, consulting firms, universities, and government agencies.

Biostatistics, Ph.D.

Requirements

The Doctor of Philosophy program in biostatistics requires a minimum of 79 s.h. of graduate credit, including credit from a master's degree. Students must maintain a g.p.a. of at least 3.00. Those who receive a grade of C on 7 s.h. of coursework may be dismissed from the program.

All students must successfully complete a comprehensive examination and a dissertation. The research topic and content, which vary depending on the program of study, must be approved by a student's dissertation committee. Other degree requirements include approved electives chosen from Department of Biostatistics and other University of Iowa courses.

The Ph.D. with a major in biostatistics requires the following work.

Master of Science Background

Ph.D. students must take the following courses required for the Master of Science in biostatistics. Students who have completed equivalent coursework at other institutions may request waivers and/or transfers of credit. Students who earned a Master of Science with a major in biostatistics at the University of Iowa automatically receive credit for these courses.

STAT:6560	Applied Time Series Analysis	3
STAT:7400	Computer Intensive Statistics	3

Dissertation

Students must enroll in the following dissertation course for at least two semesters in residence.

Code	Title	Hours
BIOS:7900	Thesis/Dissertation	6-13

Combined Programs

Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in biostatistics in a combined degree program offered by the Carver College of Medicine and the College of Public Health. Applicants must be admitted to both programs before they may be admitted to the combined degree program.

See the Medical Scientist Training Program [p. 1711] (Carver College of Medicine) in the Catalog.

Admission

Applicants to the Ph.D. program in biostatistics must apply through the Schools of Public Health Application Service (SOPHAS). After the SOPHAS application is verified, the applicant pays a supplemental Graduate College admission fee to the University of Iowa Office of Admissions. For detailed application information, visit Requirements and How to Apply to Biostatistics on the Department of Biostatistics website.

The biostatistics faculty considers several factors when evaluating applications for admission, including Graduate Record Examination (GRE) General Test scores, grade-point averages, letters of recommendation, intent and motivation for graduate study, and research interests.

All applicants must hold a bachelor's degree, have a cumulative g.p.a. of at least 3.00, and have taken the Graduate Record Examination (GRE) General Test. Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). They must score at least 100 (internet-based) on the TOEFL. Applicants with lower scores are not considered for admission. In place of TOEFL scores, the department accepts IELTS scores of 7.0 or higher, with no subscore below 6.0.

All biostatistics applicants are required to have strong written and oral communication skills.

Completion of an M.S. program in statistics or biostatistics generally is required for admission to the Ph.D. program.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Ph.D. application deadlines are posted on the Department of Biostatistics website. The priority application deadline is December 1. Visit Requirements and How to Apply to Biostatistics on the department's website.

Academic Plans

- a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
- b Complete two sections of BIOS:5510, Programming in R and Programming in SAS.
- c Course may also be completed in spring of second year.
- d Required BIOS PhD Core Course. Additional information can be found in the General Catalog and department website.
- e Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
- f 12-19 s.h. of biostatistics, statistics, genetics, computing, public health, etc. courses; no more than 5 s.h. of credit in non-quantitative courses; 6 s.h. of electives must be taken for a letter grade; work with faculty advisor to determine appropriate graduate level electives and sequence.
- g Must register for at least two semesters; minimum of 6 s.h. required overall.

Financial Support

A limited number of teaching and research assistantships are available. Assistantships offer financial support and tuition assessed at the resident tuition rate along with a tuition scholarship. They also provide valuable on-the-job training experience.

For information on financing education through jobs, grants, and loans, contact the University's Office of Student Financial Aid.

Career Advancement

The program prepares students for professional and academic careers in biostatistics, especially for positions that emphasize developing and applying statistical methodology to solve important biological and public health problems.

Biostatistics, Graduate Certificate

admission. Visit the Certificate in Biostatistics web page for an application form.

Requirements

The graduate Certificate in Biostatistics requires a minimum of 15 s.h. of graduate credit. Students must earn a grade of at least B-minus in each certificate course and must maintain a cumulative g.p.a. of at least 3.00 in order to earn the certificate. The certificate is designed for students who would like to add a formal biostatistics emphasis to their graduate programs.

The program is open to students enrolled in a University of Iowa graduate degree program outside the Department of Biostatistics. It is also open to individuals who hold graduate degrees in science disciplines or professional degrees in the health sciences and are admitted to the Graduate College as nondegree students.

The certificate requires two core courses (6 s.h.) and three electives (9 s.h.). Students should work with an advisor to plan their coursework carefully, since some certificate courses have prerequisites, require permission for enrollment, or are not offered every year. They must complete at least 6 s.h. of the required coursework after being admitted to the certificate program, and they may count a maximum of 6 s.h. of certificate credit toward a degree or another certificate earned at the University. At least 6 s.h. of the certificate plan of study must be exclusively applied to the certificate.

The Certificate in Biostatistics requires the following coursework.

Core Courses

Code	Title	Hours
Both of these:		
BIOS:4120	Introduction to Biostatistics	3
BIOS:5120/ STAT:5610	Regression Modeling and ANOVA in the Health Sciences	3

Electives

Code	Title	Hours
Three of these (total of 9 s.h.):		
BIOS:5130	Applied Categorical Data Analysis	3
BIOS:5310/ STAT:5810	Research Data Management	3
BIOS:6210	Applied Survival Analysis	3
BIOS:6310/ STAT:6550	Introductory Longitudinal Data Analysis	3
BIOS:6420	Survey Design and Analysis	3

Other courses may be approved as electives by the Department of Biostatistics director of graduate studies. Contact the Department of Biostatistics for more information.

Admission

Enrollment is limited; applicants who have completed at least one of the certificate's required courses and whose research will be advanced by biostatistics training are given priority for

Community and Behavioral Health

Head

- Mark W. Vander Weg

Graduate degree: Ph.D. in community and behavioral health
Faculty: <https://www.public-health.uiowa.edu/cbh-faculty-list/>
Website: <https://www.public-health.uiowa.edu/cbh/>

The Department of Community and Behavioral Health examines the relationship between human behavior and community health and focuses on creating effective strategies for change. Community and behavioral health students learn how to design, implement, and evaluate interventions directed toward identified public health problems in communities.

The Department of Community and Behavioral Health advances teaching, research, and practice in four strategic areas: rural health; community engagement and participatory approaches; theory-based culturally informed intervention development, implementation, and evaluation; and social justice, health equity, and health disparities.

Department faculty members come from a variety of disciplines within the social and health sciences, drawn together by an interest in health behavior and promoting healthy communities.

In addition to the Ph.D. degree in community and behavioral health, the department offers a subprogram for the Master of Public Health (M.P.H.) degree. see "M.P.H. Subprogram" below.

M.P.H. Subprogram

The Department of Community and Behavioral Health offers a subprogram for the Master of Public Health degree.

The M.P.H. subprogram in community and behavioral health prepares public health practitioners for a variety of positions related to intervention development, implementation, and evaluation using community participatory approaches with a focus on decreasing health disparities and inequities.

For detailed information about the M.P.H. degree, see the Master of Public Health, M.P.H. [p. 1889] in the Catalog.

Programs

Graduate Programs of Study

Majors

- Community and behavioral health subprogram for the Master of Public Health [p. 1889] degree
- Doctor of Philosophy in Community and Behavioral Health [p. 1915]

Facilities

The department houses two centers. The Prevention Research Center for Rural Health focuses on improving the health of rural Iowans. The National American Indian and Alaska Native Addiction Technology Transfer Center disseminates culturally legitimate evidence-based practice in substance abuse and behavioral health, and provides technical assistance, training,

and systems change assistance to urban as well as tribal providers across the country.

Graduate students may have opportunities to work with ongoing research projects in the centers.

Courses

Community and Behavioral Health Courses

CBH:3102 Medical Anthropology 3 s.h.

Major theoretical, methodological approaches; international health and development; biomedicine as a cultural system; ethnomedicine; anthropology and AIDS, human reproduction, epidemiology, ethnopsychiatry. Prerequisites: ANTH:1101 or ANTH:2100 or ANTH:2164 or GHS:2000. Same as ANTH:3102, GHS:3102.

CBH:3150 Media and Health 3 s.h.

Potential and limits of mass media's ability to educate the public about health; research and theory on the influence of information and entertainment media; theories, models, assumptions of mass communication in relation to public health issues. Same as GHS:3150, JMC:3150.

CBH:4105 Introduction to Health Promotion and Disease Prevention 3 s.h.

Basic concepts, strategies, and methods of health promotion and disease prevention; health promotion in the context of public health, theories and principles that underpin health promotion; overview of policy formation and health promotion planning, implementation, evaluation.

CBH:4140 Feminist Activism and Global Health 3 s.h.

How female gender intersects with culture, environment, and political economy to shape health and illness; reproductive health, violence, drug use, cancer; readings in anthropology, public health. Prerequisites: ANTH:1101. Same as ANTH:4140, GHS:4140, GWSS:4140.

CBH:4350 Maternal and Child Health Seminar 1 s.h.

Historical and applied perspective on maternal and child health problems and programs aimed at reducing morbidity, mortality, and health disparities across the life span. Same as EPID:4350.

CBH:5220 Health Behavior and Health Education 3 s.h.

Common theories of health behavior and health education and their application to varied public health problems and settings.

CBH:5230 Public Health Issues in Overweight Management 3 s.h.

Overview of overweight and obesity from a public health perspective, including epidemiology, measurement issues, and intervention approaches at individual, community, and policy levels. Prerequisites: CPH:5100 or CBH:4105.

CBH:5235 Community-Based Participatory Research 3 s.h.

How community-based participatory research (CBPR) has emerged as a critical approach to conduct research and produce scholarship; opportunities, challenges, needed skills, and methods by which researchers and community members partner to conduct research that leads to community well-being and health; students share their experiences, explore, and learn through case studies, guest lectures, and interactive activities; application of research methods through a CBPR approach.

- CBH:5305 Evaluation: Approaches and Applications** 3 s.h.
Focus on program evaluation methods for use in public health and related educational and social service programs; exploration of methods and approaches, as well as planning strategies for conducting program evaluations; exposure to all components of evaluation from planning to dissemination of findings. Prerequisites: CBH:5220 and BIOS:4120 and EPID:4400. Requirements: enrollment in College of Public Health.
- CBH:5310 Qualitative Research for Public Health** 3 s.h.
Introduction to methods and theories of qualitative research that facilitate description and explanation of social phenomena related to health behavior, illness, prevention, and treatment in the public health domain.
- CBH:5350 Foundations of Maternal and Child Health** 3 s.h.
Life course approach to understanding determinants, mechanisms, and systems that promote and maintain health, safety, and well-being of mothers and their children. Same as EPID:5350.
- CBH:5420 Communicating with the Community** 3 s.h.
Communication skills for research and practice settings, taught from a cultural perspective with reference to gender, age, ethnicity; individual and constructive interviewing, public speaking, conducting focus groups.
- CBH:5435 Substance Abuse Prevention and Early Intervention** 3 s.h.
Prevalence and characteristics of several substance use disorders and the impact of such disorders on the individual, the community, and public health workers; how prevalence of substance use disorders varies among different ethnic and cultural groups, between men and women, across the life span, and through different socio-economic levels; how outcomes of substance abuse disorders vary at both the individual and community level as a function of these factors.
- CBH:5440 Prevention and Early Intervention of Mental Health Disorders** 3 s.h.
Prevalence and characteristics of mental health disorders; differences between ethnicity and culture, gender, age, and socioeconomic background; primary and secondary prevention; assessment and tertiary treatment approaches to mental health disorders.
- CBH:6115 Ethnographic Field Methods** 3 s.h.
Basic data-gathering techniques for field research in sociocultural anthropology. Same as ANTH:6115.
- CBH:6205 Designing and Implementing Interventions** 3 s.h.
Theoretical foundations, phases, and skills necessary to plan, design, and implement a public health intervention program; techniques and strategies for designing and implementing public health interventions; emphasis on community engagement; evidence-based, culturally and contextually situated methods and skills to plan, design, and implement public health intervention program; analysis of case studies, individual and small group work on assignments and development of a data-driven program. Prerequisites: CBH:5220. Requirements: admission to College of Public Health.
- CBH:6210 Health Communication** 3 s.h.
Theories, concepts, research associated with health communication; interpersonal and mass communication approaches. Same as COMM:6210.
- CBH:6220 Health Communication Campaigns** 3 s.h.
Intervention design and analysis of health campaigns; theory, practice, methods; mass media, community, organization, and interpersonal approaches. Same as COMM:6220.
- CBH:6230 Health Equity, Disparities, and Social Justice** 3 s.h.
Introduction to the concept of health equity and an overview of U.S. health disparities; students gain a better understanding of research and interventions through readings, lectures, reflection papers, in-class exercises, and research assignments. Same as EPID:6075.
- CBH:6335 Research Methods in Community and Behavioral Health** 3 s.h.
Overview of quantitative research methods relevant to community and behavioral health; topics include major elements of behavioral and social science research, critical evaluation of research, and application of research methods in public health practice; opportunities for students to build skills for evaluation of research and application of quantitative research methods.
- CBH:6405 Global Maternal, Newborn, and Child Health** 3 s.h.
Overview of global demographic trends in maternal, newborn, and child health; focus on low- and middle-income countries as well as programs, interventions, and policies that have successfully improved the health of women and children around the globe.
- CBH:6410 Special Topics** arr.
Didactic material in community and behavioral health that may include tutorial, seminar, or faculty-directed independent work (e.g., literature search, project, short research project).
- CBH:6415 Independent Study in Community and Behavioral Health** arr.
Pursuit of an interest in community and behavioral health requiring substantial creativity and independence.
- CBH:7100 Community and Behavioral Health Doctoral Seminar** 1 s.h.
Introduction to the Department of Community and Behavioral Health; essential skills for success in academia, individual faculty member's work, and doctoral program requirements; for incoming Ph.D. students.
- CBH:7200 Advanced Intervention Research** 3 s.h.
Intervention research development and implementation including conceptualization, design, development of research team and intervention approaches, statistical power, and research ethics. Prerequisites: CBH:6205.
- CBH:7300 Advanced Behavioral Theories** 3 s.h.
Seminar on behavioral theory in public health; builds on student's previous training in theory with an emphasis on applications to guide research and thereby ensuring skills necessary to function as an independent scientist; examination of general principles of behavioral theory and several behavioral theories at different ecological levels; current state of theory development (i.e., gaps, future directions for research); emphasis on critical analysis and application of theory; students gain a better understanding of the role of behavioral theory in population health research. Prerequisites: CBH:5220. Requirements: doctoral standing.
- CBH:7505 CBH Thesis/Dissertation** arr.
Work on M.S. thesis or Ph.D. dissertation in community and behavioral health, with thesis/dissertation advisor.

Community and Behavioral Health, Ph.D.

Graduates of the Doctor of Philosophy program in community and behavioral health will be able to:

- apply social and behavioral science theories in public health research;
- produce effective scientific writing;
- demonstrate grant-writing skills;
- participate in interdisciplinary research;
- communicate research findings to various audiences, including policy makers and community members;
- design a research study that incorporates knowledge of pertinent cultural, social, behavioral, and biological factors;
- design a theory-informed, community-based intervention research project;
- design an implementation and evaluation plan for a theory-informed, community-based intervention;
- formulate focused research questions to address gaps in community and behavioral health knowledge;
- evaluate social and behavioral science research design, methodology, and analysis related to public health; and
- evaluate how structural bias, social inequities, and racism undermine health and create challenges to achieving health equity at organizational, community, and societal levels.

Requirements

The Ph.D. program in community and behavioral health requires at least 75 s.h. of graduate credit, including approved credit earned from a master's degree.

Students must successfully complete a qualifying exam, a comprehensive exam, and a dissertation. The research topic must be approved by a student's dissertation committee.

During the first semester, students work with their academic advisor to develop a plan of study that satisfies their interests and professional goals as well as the program's requirements.

College of Public Health Core

Students complete the following (13 s.h.).

Code	Title	Hours
CBH:4105	Introduction to Health Promotion and Disease Prevention	3
CBH:7100	Community and Behavioral Health Doctoral Seminar	1
BIOS:4120	Introduction to Biostatistics	3
CPH:6100	Essentials of Public Health	2
CPH:7270	Principles of Scholarly Integrity: Public Health	1
EPID:4400	Epidemiology I: Principles	3

Behavioral and Social Sciences Core

Students complete the following (21 s.h.).

Code	Title	Hours
All of these:		
CBH:5220	Health Behavior and Health Education	3
CBH:6205	Designing and Implementing Interventions	3
CBH:6230	Health Equity, Disparities, and Social Justice	3
CBH:7200	Advanced Intervention Research	3
CBH:7300	Advanced Behavioral Theories	3
6 s.h. from these:		
CBH:5235	Community-Based Participatory Research	3
CBH:5420	Communicating with the Community	3
CBH:6210	Health Communication	3
CBH:6220	Health Communication Campaigns	3

Research Methods Core

Students complete the following (15 s.h.).

Code	Title	Hours
Both of these:		
CBH:5305	Evaluation: Approaches and Applications	3
CBH:5310	Qualitative Research for Public Health	3
9 s.h. from these:		
CBH:6115	Ethnographic Field Methods	3
CBH:6335	Research Methods in Community and Behavioral Health	3
BIOS:5120	Regression Modeling and ANOVA in the Health Sciences	3
BIOS:5130	Applied Categorical Data Analysis	3
EPLS:6209	Survey Research and Design	3
EPLS:6370	Quantitative Methods for Policy Analysis	3
HMP:7940	Primary Data and Mixed Methods	3
PSQF:6243	Intermediate Statistical Methods	4
PSQF:6244	Correlation and Regression	4
PSQF:6249	Factor Analysis and Structural Equation Models	3
PSQF:6252	Introduction to Multivariate Statistical Methods	3
PSQF:7375	Topics in Educational Measurement and Statistics	1-3
SOC:5160	Research Design and Methods	3
SOC:6170	Introduction to Sociological Data Analysis	3
SOC:6180	Linear Models in Sociological Research	3

SOC:7170	Advanced Statistical Modeling of Data	3
SOC:7180	Structural Equation Modeling	3

Content Area Electives

Students complete 14 s.h. of elective coursework in consultation with their advisor. The following is a list of suggested coursework; however, other courses may be approved with consent of the advisor.

Code	Title	Hours
CBH:4140	Feminist Activism and Global Health	3
CBH:5230	Public Health Issues in Overweight Management	3
CBH:5350	Foundations of Maternal and Child Health	3
CBH:5435	Substance Abuse Prevention and Early Intervention	3
CBH:5440	Prevention and Early Intervention of Mental Health Disorders	3
CBH:6405	Global Maternal, Newborn, and Child Health	3
CBH:6410	Special Topics	arr.
CBH:6415	Independent Study in Community and Behavioral Health	arr.
GEOG:4150	Health and Environment: GIS Applications	3
HMP:5005	Introduction to Healthcare Organization and Policy	3
HMP:7940	Primary Data and Mixed Methods	3
HMP:7950	Design Issues in Health Service Research	3
HMP:7960	Analytic Issues in Health Services Research I	3
HMP:7965	Analytic Issues in Health Services Research II	3

Dissertation

Students complete 12 s.h. in the following.

Code	Title	Hours
CBH:7505	CBH Thesis/Dissertation	12

Admission

Ph.D. applicants must apply through the Schools of Public Health Application Service (SOPHAS). Applications must include academic transcripts, Graduate Record Exam (GRE) General Test scores, three letters of recommendation, statement of purpose, and a writing sample. International transcripts should be evaluated by the World Education Service (WES) and submitted to SOPHAS. For detailed application information, visit How to Apply to Community and Behavioral Health on the Department of Community and Behavioral Health website.

The community and behavioral health admission committee considers several factors when evaluating applications for admission, including scores on the GRE, grade-point averages, letters of recommendation, intent and motivation for graduate

study, and research interests. Students with deficiencies in one area may be admitted if all other components of their application are very strong.

Applicants must have a graduate g.p.a. of at least 3.40 and have earned a graduate degree from an accredited college or university in a related public health, social science, or clinical health field. Applicants who do not hold a graduate degree should apply to a master's program prior to application for the Ph.D. program. Preference is given to applicants with Graduate Record Exam (GRE) General Test verbal scores of at least 154, quantitative scores of at least 150, and analytical writing scores of at least 4.0 (GRE scores must be less than five years old). Ph.D. program applicants also must submit their master's thesis, or if no thesis is available, a sample of their scholarly writing.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). An acceptable TOEFL score is a minimum of 600 (250 computer-based test or 100 internet-based test) or a minimum IELTS score of 7.0 (with no subscore lower than 6.0). Automatic waivers of this requirement are granted for persons who have, or will have, completed a bachelor's degree or more advanced degree at an accredited university in the United States, United Kingdom, Canada (excluding French Quebec), Africa (English speaking), Australia, or New Zealand.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

The application deadline is January 15 for the fall semester. Applications are not accepted for spring or summer semesters.

Financial Support

The graduate program coordinator and advisor works with admitted students to explore funding opportunities. A limited number of teaching and research assistantships are available. Assistantships offer financial support and tuition assessed at the resident tuition rate along with a tuition scholarship. They also provide valuable on the job training experience.

For more information on financing education through jobs, grants, and loans, contact the University's Office of Student Financial Aid.

Career Advancement

The program prepares individuals for academic, research, and policymaking work in the social and behavioral health sciences. This academic specialty offers many career opportunities in academic and research institutions.

Emerging Infectious Disease Epidemiology

Head, Department of Epidemiology

- Elizabeth A. Chrischilles

Graduate certificate: emerging infectious disease epidemiology

Website: <https://www.public-health.uiowa.edu/certificate-in-emerging-infectious-disease-epidemiology/>

Emerging infectious diseases increasingly are recognized as global and regional issues. Some infectious diseases are controlled effectively with the help of modern technology. But new diseases—such as SARS, West Nile, and avian influenza virus infections—appear frequently, and older ones, including malaria, tuberculosis, and bacterial pneumonia, are now appearing in forms that are resistant to drug treatments. All of them have the potential to seriously affect human and animal health as well as economies locally and worldwide. They pose novel and unceasing challenges for professionals in health care, government, and private agencies.

The Certificate in Emerging Infectious Disease Epidemiology is administered by the Department of Epidemiology [p. 1919]. The Graduate College grants the certificate.

Programs

Graduate Program of Study Certificate

- Certificate in Emerging Infectious Disease Epidemiology

Emerging Infectious Disease Epidemiology, Graduate Certificate

Requirements

The graduate Certificate in Emerging Infectious Disease Epidemiology requires 12-13 s.h. of graduate credit. Students must complete the certificate's required coursework within five years of entering the program and must maintain a g.p.a. of at least 2.75 in work toward the certificate. Three of the required courses must be completed on campus: EPID:5570 Zoonotic Diseases, EPID:5580 Public Health Laboratory Techniques, and EPID:5590 Applied Infectious Disease Epidemiology or EPID:6550 Epidemiology of Infectious Diseases. The remaining courses may be completed on campus or by distance education.

The certificate program provides basic information and training related to infectious diseases. It is designed for a broad range of individuals, including graduate students, international public health professionals, laboratory professionals, physicians, nurses, veterinarians, and medical technologists.

The Certificate in Emerging Infectious Disease Epidemiology requires the following coursework.

Code	Title	Hours
Both of these:		
EPID:5570	Zoonotic Diseases	3
EPID:5580	Public Health Laboratory Techniques	1
One of these:		
EPID:5590	Applied Infectious Disease Epidemiology	2
EPID:6550	Epidemiology of Infectious Diseases	3
Two of these:		
BIOS:4120	Introduction to Biostatistics	3
EPID:4400	Epidemiology I: Principles	3
EPID:5550	Diagnostic Microbiology for Epidemiology	3
OEH:4240	Global Environmental Health	3

For more information about the program, visit the Certificate in Emerging Infectious Disease Epidemiology web page.

Admission

At this time, applications are only being accepted from current University of Iowa degree-seeking graduate students.

Applicants to the certificate program must hold a baccalaureate degree from an accredited college or university and must have a g.p.a. of at least 2.75 (or international equivalent). For more information about how to apply, visit the Certificate in Emerging Infectious Disease Epidemiology web page.

Epidemiology

Head

- Elizabeth A. Chrischilles

Graduate degrees: M.S. in clinical investigation; M.S. in epidemiology; Ph.D. in epidemiology

Faculty: <https://www.public-health.uiowa.edu/epi-faculty-list/>

Website: <https://www.public-health.uiowa.edu/epi/>

The Department of Epidemiology focuses on surveillance for disease, risk factors for disease in the general population, behavioral factors in disease, use and outcome of health interventions and care, and the establishment and evaluation of disease control measures in the community. Students are guided by faculty members whose research interests include epidemiology of communication disorders, pharmacoepidemiology, cancer epidemiology, infectious disease epidemiology, adverse reproductive outcome epidemiology, anatomic pathology, genetics, cardiovascular disease, nutrition, smoking cessation, epidemiology of reproduction, dental epidemiology, clinical epidemiology, neuroepidemiology, meta-analysis, intervention trials, international health, and effects of aging.

In addition to the M.S. in epidemiology, the M.S. in clinical investigation, and the Ph.D. in epidemiology, the department offers the epidemiology subprogram for the Master of Public Health degree; see Master of Public Health, M.P.H. [p. 1889] in the Catalog. The subprogram focuses on fundamental concepts and methods, and provides training in the use of data and methods for disease assessment and for evaluation of programs and interventions. It also participates in a combined degree program with the Department of Biology (College of Liberal Arts and Sciences); see "B.A./M.P.H. (Epidemiology Subprogram) or M.S. in Epidemiology" under Combined Programs [p. 183] in the B.A. in biology section of the Catalog.

Certificates

Emerging Infectious Disease Epidemiology

The Department of Epidemiology offers the graduate Certificate in Emerging Infectious Disease Epidemiology. The certificate program provides basic information and training related to infectious diseases. It is designed for a broad range of individuals, including graduate students, international public health professionals, laboratory professionals, physicians, nurses, veterinarians, and medical technologists. To learn more, see the Certificate in Emerging Infectious Disease Epidemiology [p. 1918] in the Catalog.

Translational and Clinical Investigation

The Department of Epidemiology and the Institute for Clinical and Translational Science offer the graduate certificate program in translational and clinical investigation; see the Certificate in Translational and Clinical Investigation [p. 1951] in the Catalog.

Programs

Graduate Programs of Study

Majors

- Epidemiology subprogram for the Master of Public Health [p. 1889] degree
- Master of Science in Clinical Investigation [p. 1923]
- Master of Science in Epidemiology [p. 1926]
- Doctor of Philosophy in Epidemiology [p. 1928]

Facilities and Resources

The State Health Registries of Iowa, which encompasses the Iowa Cancer Registry and the Iowa Registry for Congenital and Inherited Disorders, works in cooperation with the Iowa Department of Public Health to collect medical data on Iowans. The Iowa Cancer Registry is one of 18 registries nationwide that report data to the National Cancer Institute.

The Preventive Intervention Center conducts population-based intervention trials to prevent occurrence and recurrence of disease and to promote wellness, with a focus on the elderly. It also specializes in research promoting prevention of cardiovascular disease and provides an interdisciplinary approach to risk factor interventions. The Health Effectiveness Research Center is a collaborative research enterprise with the College of Pharmacy that studies whether particular health care treatments or services are over- or underutilized. The Center for Emerging Infectious Diseases employs epidemiological methods, laboratory technologies, and clinical evaluations to achieve a better understanding of emerging infectious diseases. The Nutrition Center provides expertise in nutrition and dietary assessment, dietary interventions, and nutrition lifestyle change strategies.

Courses

Epidemiology Courses

EPID:3099 Evidence-Based Public Health Methods 3 s.h.

How to choose, conduct, and evaluate evidence-based programs and policies in public health; finding and using scientific evidence, implementing and evaluating interventions that produce new evidence. Offered summer sessions. Requirements: Certificate in Public Health enrollment.

EPID:4314 Field Experiences in Public Health 1 s.h.

Direct involvement in actions being taken at local community level; topics include environmental health, infectious diseases, chronic diseases, and pediatric health; practical examples and hands-on experiences during site visits for topic-specific field investigations. Offered spring semesters. Prerequisites: BIOL:1140 or BIOL:1141 or BIOL:1411. Requirements: biology or microbiology coursework. Same as CPH:4250.

EPID:4350 Maternal and Child Health Seminar 1 s.h.

Historical and applied perspective on maternal and child health problems and programs aimed at reducing morbidity, mortality, and health disparities across the life span. Same as CBH:4350.

EPID:4400 Epidemiology I: Principles 3 s.h.

Epidemiological concepts and methods; design of descriptive and analytic studies, such as aggregate, case series, cross-sectional, case-control, cohort studies, clinical trials; application of epidemiology to public health practice; communication and dissemination of epidemiological findings.

EPID:4450 Public Health Data 2 s.h.

Concepts and methods of obtaining and using public health data in community settings; how public health data are used for epidemiologic investigations and prevention programs. Corequisites: EPID:4400.

EPID:4510 Injury and Violence Prevention 3 s.h.

Theory, research, and practice of injury control; unintentional and intentional injuries; local, national, international injury issues. Same as CPH:4230, OEH:4510.

EPID:4990 Practicing Evidence-Based Public Health 3 s.h.

How epidemiologic and other scientific studies underlie public health practice; relationship between evidence and action; controversies at interface of science and policy.

EPID:5200 Principles of Public Health Informatics 3 s.h.

Systematic applications of information science, computer science, and technology to public health practice, research, and learning; methods of disease surveillance, data collection, analysis, and reporting with health informatics. Offered fall semesters. Same as IGPI:5220.

EPID:5214 Meta-Analysis of Epidemiologic Studies 3 s.h.

Methods for quantitative pooling of analytic study associations (cohort and case-control) between exposure and a dichotomous outcome; literature searches, data abstraction, test of homogeneity, publication bias and consideration of adjusted risk ratios (effects of confounding). Offered spring semesters of odd years. Prerequisites: BIOS:5120 and EPID:4400.

EPID:5241 Statistical Methods in Epidemiology 4 s.h.

Overview of methods to analyze data from epidemiologic investigations; estimation of relative measures of risk, attributable risk, stratified analysis; model-fitting approaches using linear, logistic, and Poisson regression analysis; confounding and effect modification; analysis of epidemiologic data sets. Offered spring semesters.

EPID:5300 Food Safety 3 s.h.

Current issues and concepts of food safety in the United States, from plant to table; foodborne illness from microbial agents, food toxins, adulterants; disease investigation, risk analysis, risk mitigation, prevention. Offered summer sessions.

EPID:5320 Exotic and Emerging Diseases of Animals 1 s.h.

Major exotic and emerging animal diseases; veterinarian's role in recognizing and diagnosing such diseases; how outbreaks affect economies and veterinary medicine; public health concerns; responding agencies and their roles in control and eradication.

EPID:5350 Foundations of Maternal and Child Health 3 s.h.

Life course approach to understanding determinants, mechanisms, and systems that promote and maintain health, safety, and well-being of mothers and their children. Same as CBH:5350.

EPID:5470 Applied Veterinary Epidemiology/ Biostatistics 3 s.h.

Epidemiology and biostatistics applied to veterinary public health; outbreak investigations, surveillance, analyzing and evaluating diagnostic tests, translation methodology, risk assessment, data analysis software programs. Offered summer sessions. Prerequisites: EPID:4400.

EPID:5500 Introduction to Clinical Epidemiology 3 s.h.

Epidemiologic applications and methods used in clinical settings to evaluate clinical medicine and other health profession disciplines including health measurement, health outcome determination, diagnostic process, risk assessment and communication, prognosis, study design, patient surveys, clinical trials, decision analysis and meta-analysis, health services research. Offered fall semesters. Corequisites: EPID:4400, if not taken as a prerequisite.

EPID:5540 Public Health Surveillance Mechanisms, Applications, and Data 3 s.h.

Introduction to fundamentals of public health surveillance with emphasis on cancer registration; use of resulting surveillance-based databases and information systems available to public health practitioners and researchers. Offered fall semesters. Prerequisites: EPID:4400.

EPID:5550 Diagnostic Microbiology for Epidemiology 3 s.h.

Introduction to microbiological culture, antigen detection, immunological and molecular amplification laboratory techniques for bacteria, viruses, parasites, fungi. Offered spring semesters. Prerequisites: MICR:2157 or MICR:3164.

EPID:5560 Introduction to Molecular Epidemiology 3 s.h.

Introduction to basic techniques of molecular biology (DNA, RNA, protein techniques) and their use in epidemiological research (e.g., diagnosis of disease, biomarker discovery, validation). Offered spring semesters. Corequisites: EPID:4400, if not taken as a prerequisite.

EPID:5570 Zoonotic Diseases 3 s.h.

Introduction to epidemiology and control of zoonotic diseases; zoonoses endemic to the midwestern United States. Offered summer sessions. Prerequisites: EPID:5550 or EPID:6550 or MICR:2157 or MICR:3164.

EPID:5580 Public Health Laboratory Techniques 1 s.h.

Common laboratory techniques in emerging infectious respiratory disease research and epidemiologic surveillance laboratories; emphasis on techniques for culturing, characterization, and serological surveillance of exposure to influenza viruses. Offered spring semesters. Requirements: completion of online Basic Biological Safety and Blood-Borne Pathogens courses; completed certificates must be brought to class.

EPID:5590 Applied Infectious Disease Epidemiology 2 s.h.

Introduction to infectious disease surveillance, outbreak investigations, interventions, biodefense, emerging infectious diseases, subject recruitment, mathematical modeling, and analytic approaches pertaining to infectious disease prevention and control; emphasis on practical knowledge and how to apply basic infectious disease epidemiology to real-life scenarios and research projects.

- EPID:5600 Introduction to Epidemiology Data Management and Analysis** 3 s.h.
Organization, collection, management, and analysis of epidemiological data using computer programs. Offered fall semesters. Corequisites: EPID:4400, if not taken as a prerequisite.
- EPID:5610 Intermediate Epidemiology Data Analysis with SAS and R** 3 s.h.
Basic principles of data analysis and collaborative research; SAS fundamentals; data manipulation and interpretation techniques. Offered spring semesters.
- EPID:5900 Problems and Special Topics in Epidemiology** arr.
Didactic material in epidemiology; may include tutorial, seminar, faculty-directed independent work (e.g. literature search, project, short research project); topics may include comparative effectiveness and patient-centered outcomes, neuroepidemiology, and epidemiology of aging.
- EPID:5925 Epidemiology Journal Club: Evaluating the Literature** 0-1 s.h.
Critical evaluation of primary epidemiologic methods and research papers; informative, challenging, and current topics from scientific literature. Requirements: epidemiology M.S., M.P.H., or Ph.D. standing.
- EPID:5950 Preceptorship in Epidemiology** arr.
Quantitative research-oriented project performed with a preceptor; preparation of prospectus, presentation of research results in a publication-quality report and a scientific poster session.
- EPID:6000 Independent Study in Epidemiology** arr.
In-depth pursuit of an area of special interest in epidemiology requiring substantial creativity and independence.
- EPID:6050 Research in Epidemiology** arr.
Research that may lead to a dissertation.
- EPID:6070 Social Epidemiology** 3 s.h.
Introduction with global focus and emphasis on methodological issues, including definition/measurement of social constructs, appropriate research designs, analytic approaches. Prerequisites: EPID:4400.
- EPID:6075 Health Equity, Disparities, and Social Justice** 3 s.h.
Introduction to the concept of health equity and an overview of U.S. health disparities; students gain a better understanding of research and interventions through readings, lectures, reflection papers, in-class exercises, and research assignments. Same as CBH:6230.
- EPID:6100 Writing a Grant Proposal** 3 s.h.
Small group projects to develop grant proposals using epidemiological study designs; presentation and defense of proposals before faculty site visitors. Offered fall semesters.
- EPID:6150 Writing for Medical Journals** 1 s.h.
Skill development in writing medical journal articles for publication. Offered spring semesters.
