Seminar that supports graduate students in bringing written work to publishable form; analysis of target journals' audiences, interests, and citation politics; submission and the publication process; response to reader reports and criticism; best writing and research practices; discussion of knowledge cultures and discourses in disciplines and the contemporary academy. Same as AMST:6300, GRAD:6300, GWSS:6300.

RHET:6965 Topics in Second Language Acquisition: Writing 3 s.h.

Theory, pedagogy, research, and assessment in second language writing. Taught in English. Same as SLA:6965, SPAN:6965.

RHET:7500 Science Communication in the Digital Age 2-3 s.h.

Preparation for communicating scientific discoveries and importance of scientific endeavors in digital media; focus on adaptable and transferable skills; relevant preparation for digital communication in academic and nonacademic career paths; develop aptitude with speaking and performance skills relevant to video presentation; develop familiarity with video composition and editing processes.

RHET:7930 Writing in the Disciplines arr.

Writing instruction.

RHET:7940 Public Speaking for Academics 3 s.h.

Prepares graduate students for the public speaking occasions germane in their home disciplines and in their future professions; students gain experience moving between different rhetorical registers in public speaking through engaging in cross-disciplinary conversations about performance and speaking practices while refining discipline-specific speaking strategies; honing the ability to communicate the same information in different forms and styles (along with understanding the corresponding advantages and limitations of such) will contribute to students' teaching and scholarly skill sets.

Rhetoric and Persuasion, Minor

The minor in rhetoric and persuasion educates students in responsible, credible, and effective methods to take active leadership roles in engaging social issues in personal, professional, and communal settings. The program empowers students to look at the world as a place open to change and receptive to influence and to view themselves as agents capable of improving the world and their place in it. The minor aims to professionalize students—whether in their capacity as individual citizens, members of the community, or leaders in the workplace—by guiding them to understand audiences and situations, to use language responsibly and strategically, and to develop the integrity and authority of their own voice.

Requirements

The undergraduate minor in rhetoric and persuasion requires a minimum of 15 s.h., including 12 s.h. earned in courses taken at the University of Iowa and at least 12 s.h. earned in Department of Rhetoric courses. Students must maintain a g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.

The minor in rhetoric and persuasion requires the following coursework.

Code	Title	Hours
Five of these (15 s.h.):		
RHET:2055/ GWSS:2055	Persuasion and Advocacy	3
RHET:2065	Persuading Different Audiences: Launching a Successful Career	3
RHET:2070	Persuasive Stories	3
RHET:2085	Speaking Skills	3
RHET:2090	Conversation Practicum	3
RHET:2095	Fundamental Strategies of Persuasion	3
RHET:2135	Rhetorics of Diversity and Inclusion	3
RHET:2350	Forensic Rhetoric	3
RHET:2620	Body Language: Study of Movement and Gesture in Speaking	3
RHET:3009/ PBAF:3217/ URP:3217	Negotiation and Conflict Resolution	3
RHET:3085	Advanced Speaking Skills	3
RHET:3250	Persuasive Writing for Science and Health Care Professionals	3
RHET:3260	Persuasive Speaking for Science and Health Care Professionals	3
RHET:3290	Advanced Business Speaking	3
RHET:3350	Gaming (the) Systems	3
RHET:3560/ POLI:3560/ SJUS:3560	Public Policy and Persuasion	3

RHET:3585	Speak, to Change the World: The Art of Speechwriting and Speechmaking	3
RHET:3630	Apology and the Art of Verbal Self-Defense	3
RHET:3700	Advocacy and Sustainability: Crafting Stories of People, Place, and Resilience	3
RHET:4980	Special Projects for Undergraduates	arr.
May include one of these:		
RHET:2000/ ARTS:2000/ ASP:2000/ EDTL:2000	Big Ideas: Creativity for a Lifetime (when taught by a rhetoric instructor)	3
RHET:2031/ GWSS:2000	Desire, Consent, and Sex in U.S. Culture(s): Replacing Coercion and Violence with Respect (when taught by a rhetoric instructor)	3
RHET:2610/ THTR:2610	Acting for Success	3
RHET:3138/ GWSS:3138/ SJUS:3138	Writing to Change the World (when taught by a rhetoric instructor)	3
RHET:3150/ GWSS:3700	Narratives of Gender and Masculinity (when taught by a rhetoric instructor)	3
BUS:3000	Business Communication and Protocol	3
CLSA:3742/ WRIT:3742	Word Power: Building English Vocabulary	3
COMM:1816	Business and Professional Communication	3
GWSS:3138/ RHET:3138/ SJUS:3138	Writing to Change the World (qualifies for this group if not being taught by a rhetoric instructor)	3
LATH:3000	Latham Fellows: Science Communication Skill Building	1-2
LATH:3001	Latham Fellows: Science Outreach Project	2
THTR:1140	Basic Acting	3

Focus Areas

Students who would like to choose courses in certain focus areas can select from the following, taking into account the maximum course requirements above.

The Skills of Speaking, Presenting, and Communicating Effectively

Code	Title	Hours
RHET:2065	Persuading Different Audiences: Launching a Successful Career	3
RHET:2085	Speaking Skills	3
RHET:2090	Conversation Practicum	3
RHET:2095	Fundamental Strategies of Persuasion	3
RHET:2610/ THTR:2610	Acting for Success	3

RHET:3085	Advanced Speaking Skills	3
RHET:3260	Persuasive Speaking for Science and Health Care Professionals	3
RHET:3290	Advanced Business Speaking	3
RHET:3585	Speak, to Change the World: The Art of Speechwriting and Speechmaking	3

The Skill of Writing Professionally and Persuasively

Code	Title	Hours
RHET:2070	Persuasive Stories	3
RHET:2350	Forensic Rhetoric	3
RHET:3009/ PBAF:3217/ URP:3217	Negotiation and Conflict Resolution	3
RHET:3250	Persuasive Writing for Science and Health Care Professionals	3
RHET:3350	Gaming (the) Systems	3
RHET:3630	Apology and the Art of Verbal Self-Defense	3

Advocacy: Making the World a Better Place

Code	Title	Hours
RHET:2055/ GWSS:2055	Persuasion and Advocacy	3
RHET:2070	Persuasive Stories	3
RHET:2135	Rhetorics of Diversity and Inclusion	3
RHET:3250	Persuasive Writing for Science and Health Care Professionals	3
RHET:3560/ POLI:3560/ SJUS:3560	Public Policy and Persuasion	3
RHET:3700	Advocacy and Sustainability: Crafting Stories of People, Place, and Resilience	3

Performance Rhetoric

Code	Title	Hours
RHET:2065	Persuading Different Audiences: Launching a Successful Career	3
RHET:2070	Persuasive Stories	3
RHET:2610/ THTR:2610	Acting for Success	3
RHET:2620	Body Language: Study of Movement and Gesture in Speaking	3
RHET:3350	Gaming (the) Systems	3
RHET:4980	Special Projects for Undergraduates	arr.
THTR:1140	Basic Acting	3

Second Language Acquisition

Director, Division of World Languages, Literatures and Cultures

- Jill N. Beckman

Director, Second Language Acquisition

- Chuanren Ke

Graduate degree: Ph.D. in second language acquisition

Faculty: <https://flare.uiowa.edu/affiliated-faculty>

Website: <https://flare.uiowa.edu/second-language-acquisition-phd-program>

Second language acquisition (SLA) is a multidisciplinary field whose goal is to understand the processes that underlie non-native language learning. The doctoral program in second language acquisition draws from varied academic disciplines, among them linguistics, psychology, psycholinguistics, sociology, sociolinguistics, discourse analysis, conversation analysis, and education.

The interdisciplinary Ph.D. in second language acquisition is sponsored by Foreign Language Acquisition Research and Education (FLARE). More than 20 faculty members affiliated with SLA are drawn from various departments in the College of Liberal Arts and Sciences and the College of Education.

Second Language Acquisition is one of the units in the Division of World Languages, Literatures and Cultures [p. 367].

Programs

Graduate Program of Study

Major

- Doctor of Philosophy in Second Language Acquisition [p. 984]

Facilities

The Language Media Center (LMC) provides a wide variety of services and facilities to the Division of World Languages, Literatures and Cultures, including a 54-computer Instructional Technology Center (ITC) and six "All in One" studios/small group study rooms, each equipped with video production and editing software. The LMC also has a digital media and hardware collection available for checkout.

Directed Independent Language Study (DiLS), administered by the Language Media Center in the Division of World Languages, Literatures and Cultures, offers students guidance on engaging in self-instruction in languages that are not currently taught in the division. Any current University of Iowa student, staff, or faculty member who is interested in pursuing language study to enhance their professional research or academic profile can take advantage of this program. With the support of LMC staff, learners design their own study plans to learn basic language skills or improve upon existing skills in preparation for study or research abroad, and are paired with a language and culture consultant when possible.

Courses

Second Language Acquisition Courses

SLA:3302 Introduction to Chinese Linguistics 3 s.h.

Aspects of modern Chinese linguistics, such as Chinese phonology, syntax, pedagogical grammar, history of the language. Taught in English. Same as CHIN:3302, LING:3302.

SLA:3400 Articulatory and Acoustic Phonetics 3 s.h.

Production and transcription of sounds in human languages; physics of sound, computer analysis of speech sounds. Offered fall semesters. Same as LING:3005.

SLA:4300 Introduction to Spanish Syntax 3 s.h.

Basic principles of generative syntax as applied to analysis of Spanish syntactic structure; extensive syntactic analysis. Taught in Spanish. Prerequisites: SPAN:3100. Same as SPAN:4150.

SLA:4301 Introduction to Spanish Phonology 3 s.h.

Sound patterns of Spanish; how various theoretical approaches solve basic problems in Spanish phonology; identification of linguistic universals, how they are manifested in the sound structure of Spanish. Taught in Spanish. Same as SPAN:4100.

SLA:4401 Methods of Teaching English as a Second Language 3 s.h.

Observations of ESL and intensive English classes at the University; design and presentation of short lessons, text evaluation, demonstrations of innovative approaches of the last decade; materials. Offered spring semesters. Prerequisites: LING:3005 and LING:4040. Same as LING:4050.

SLA:5000 Teaching and Learning Languages 3 s.h.

Readings in pedagogical theory and practice, second language acquisition; experience designing activities for teaching and assessment with critiques based on current theories and approaches; development of reflective practices toward one's language teaching. Taught in English. Same as FREN:5000, GRMN:5001, SPAN:5000, WLLC:5000.

SLA:5010 Introduction to Syntax 3 s.h.

Methods and argumentation for formal analysis of sentence structure through induction from language data of central concepts and relations; hypothesis testing, empirical bases of theoretical concepts. Corequisites: LING:5000. Same as LING:5010.

SLA:5020 Introduction to Phonology 3 s.h.

Analysis of sound systems, focus on early generative phonological theory; extensive practice in analysis using data from a variety of languages; linguistic argumentation. Prerequisites: LING:3005. Same as LING:5020.

SLA:5401 First Language Acquisition 3 s.h.

Child language from a crosslinguistic perspective. Prerequisites: LING:3005 and (LING:4040 or LING:5010). Same as LING:5030.

SLA:6010 Syntactic Theory 3 s.h.

Current syntactic theory examined through analysis of data sets, readings in recent research; emphasis on argument construction, statement of formal principles. Offered spring semesters. Prerequisites: LING:5010. Same as LING:6010.

SLA:6011 Phonological Theory 3 s.h.

Post-SPE phonological theory, including autosegmental phonology, feature geometry, the syllable, optimality theory. Prerequisites: LING:5020. Same as LING:6020.

SLA:6301 Topics in Spanish Language Acquisition 3 s.h.

Theoretical linguistic approaches to monolingual, bilingual, and second language acquisition of Spanish and Portuguese; varied topics. Taught in Spanish. Requirements: at least one course in linguistics (e.g., general introduction to linguistics). Same as SPAN:6150.

SLA:6302 Topics in Comparative Romance Linguistics 3 s.h.

Comparative study of phonology, morphology, or syntax of the main Romance languages as informed by linguistic theory; diachronic or synchronic perspective. Taught in English. Recommendations: additional graduate coursework in linguistics. Same as LING:6190, SPAN:6190.

SLA:6303 Spanish Phonology 3 s.h.

Modern approaches to synchronic phonology as applied to Spanish; focus on traditional descriptive problems, recent generative analyses. Taught in Spanish. Requirements: phonology or linguistics course. Same as SPAN:6110.

SLA:6304 Spanish Syntax 3 s.h.

Spanish syntactic constructions examined in framework of selected syntactic theory; emphasis on development of syntactic argumentation. Taught in Spanish. Requirements: one course in syntax. Same as SPAN:6120.

SLA:6452 Topics in Second Language Acquisition 3 s.h.

Overview of current second-language acquisition research in the generative linguistic framework; focus on characterizing second language learners' linguistic competence and how it is constrained by principles of universal grammar. Offered fall semesters. Prerequisites: (LING:3010 or LING:5010) and (LING:3020 or LING:5020). Same as LING:6080.

SLA:6500 Issues in Foreign Language Education 3 s.h.

Theoretical perspectives of pivotal research issues at the forefront of foreign language education; systems available to foreign language professionals for disseminating research. Same as EDTL:6480.

SLA:6501 Reading in a Second Language 3 s.h.

Current theory, research, practice in second language reading field; role of textual features and the reader in reading comprehension. Same as EDTL:6484.

SLA:6502 Principles of Course Design for Second Language Instruction 3 s.h.

Contemporary views of second language curriculum design; guidelines necessary for the creation of prototypical curriculum units to be transposed into classroom-ready forms; for individuals interested in foreign language materials development. Same as EDTL:6497.

SLA:6503 Fundamentals of Second Language Assessment 3 s.h.

How to write language tests; discussion of fundamental issues in development of new tests or selection of existing tests. Same as EDTL:6400.

SLA:6504 Second Language Program Management 3 s.h.

Preparation for supervising, administering foreign language programs at all levels; for precollegiate language teachers and graduate students. Same as EDTL:6402.

SLA:6506 Multilingual Education and Applied Linguistics 3 s.h.

Introduction to research in language teaching and learning, drawing on theories and research in applied linguistics, sociolinguistics, anthropology, and psychology; students gain understanding of fundamentals in second language acquisition, educational linguistics, applied linguistics, and methods used in teaching and learning second/foreign languages; applications and implications of research considered when reviewing multilingual education policy and practice. Same as ASIA:6483, EDTL:6483.

SLA:6901 Second Language Acquisition Research and Theory 3 s.h.

Theories regarding success and failure in acquisition of second or subsequent languages; research, issues. Taught in English. Same as ASIA:6901, FREN:6901, JPNS:6901, SPAN:6901.

SLA:6920 Multimedia and Second Language Acquisition 3 s.h.

Combination of theory and practice regarding use of multimedia and technology to enhance foreign language teaching and second language acquisition research. Taught in English. Same as FREN:6920, GRMN:6920, SPAN:6920.

SLA:6950 Topics in Second Language Acquisition: Speaking 3 s.h.

Theory, pedagogy, research, and assessment in second language speaking. Taught in English. Same as FREN:6950, SPAN:6950.

SLA:6965 Topics in Second Language Acquisition: Writing 3 s.h.

Theory, pedagogy, research, and assessment in second language writing. Taught in English. Same as RHET:6965, SPAN:6965.

SLA:6970 Cultural Curriculum 3 s.h.

Culture's role in foreign/second language teaching; definition, pedagogy, assessment, and materials that allow culture to be taught and learned. Same as EDTL:6409.

SLA:7020 Readings in Second Language Acquisition arr.**SLA:7025 Special Projects in Second Language Acquisition arr.****SLA:7030 Ph.D. Thesis arr.****SLA:7401 Advanced Syntactic Theory 2-3 s.h.**

Recent developments in syntax; comparison of theories, argumentation, and uses of data. Prerequisites: LING:6010. Same as LING:7010.

SLA:7404 Seminar: Problems in Linguistics 2-3 s.h.

Intensive study of theoretical and practical problems. Same as LING:7090.

SLA:7405 Teaching Chinese as a Second Language V: Seminar in Research and Design 3 s.h.

Qualitative and quantitative research design theories and techniques. Taught in English. Prerequisites: CHIN:7401 and PSQF:4143. Same as CHIN:7405.

SLA:7406 Teaching Chinese as a Second Language I: Theories and Research 3 s.h.

Research, theory on acquisition of Chinese as a non-native language. Taught in English. Same as CHIN:7401.

SLA:7804 Teaching Chinese as a Second Language IV: Testing and Assessment 3 s.h.

Overview of goals, concepts, principles, research, and issues in assessment and testing of Chinese as a second language; knowledge of Chinese required. Taught in English. Same as CHIN:7404.

Second Language Acquisition, Ph.D.

FLARE stands for Foreign Language Acquisition Research and Education, and it is the name of the interdisciplinary unit that sponsors the second language Ph.D. program. Students are able to take a variety of courses taught by affiliated faculty members from a number of departments and programs across campus.

The second language acquisition (SLA) doctoral program emphasizes theory, research, and classroom-based teaching and learning. All students take courses in SLA theory, multimedia, research methods, language learning and linguistics. In addition, each student defines an area of specialization, in consultation with a SLA advisor. The two broad areas of specialization are language learning and postsecondary education, and linguistics and psycholinguistics.

Students in the language learning and postsecondary education specialization area demonstrate interest in issues where SLA and pedagogy converge. This includes classroom discourse, assessment, and the acquisition of grammatical knowledge in the classroom context. Students also may focus on aspects of technology and how it facilitates second language acquisition.

Students in the linguistics and psycholinguistics specialization area exhibit interest in areas of formal linguistics (e.g., syntax, phonology, morphology) and/or applied linguistics issues that relate to their particular second language focus. Student projects include the acquisition of the syntactic structures and/or phonological features of a second language, and generative and cognitive approaches to explaining acquisition. Students who work in psycholinguistics also may focus on the relationship between language processing and language acquisition.

Requirements

The Doctor of Philosophy in second language acquisition is a research-oriented degree. This interdisciplinary program, which focuses on languages other than English, requires 72 s.h., including a maximum of 33 s.h. earned in work toward a master's degree. Students must earn a minimum of 61 s.h. at the University of Iowa. Those interested in pursuing the Ph.D. must hold a master's degree in an appropriate field (e.g., linguistics, foreign language education) or have equivalent academic experience.

A course may be used to fulfill only one requirement. All courses taken to fulfill program requirements must be taken on a graded basis; no graduate credit is awarded for a grade lower than C-minus. To remain in good standing, Ph.D. students must maintain a cumulative g.p.a. of at least 3.00.

The required curriculum includes 14 courses, including two foundation courses, three courses in the area of research methods, two courses in the area of language learning, two courses in the area of linguistics, and five courses in a student's area of specialization. Students may specialize in language learning and postsecondary education, which includes a focus on technology in language acquisition and learning; or in linguistics and psycholinguistics, with focus on phonetics/phonology or on syntax in a particular second language. In addition, the Ph.D. requires successful

completion and defense of a dissertation representing original research in second language acquisition.

Students may extend their interdisciplinary interests by taking relevant elective coursework offered by the Departments of Communication Sciences and Disorders, French and Italian, German, Linguistics, Psychological and Brain Sciences, Rhetoric, Spanish and Portuguese, and Asian and Slavic Languages and Literatures in the College of Liberal Arts and Sciences; and the Departments of Psychological and Quantitative Foundations, and Teaching and Learning in the College of Education.

The Ph.D. in second language acquisition requires the following coursework.

Code	Title	Hours
Foundation Courses		6
Research Methods Courses		10
Language Learning Courses		6
Linguistics Courses		6
Specialization Courses		15
Elective Courses		
Thesis		2-15

Foundation Courses

Code	Title	Hours
Both of these:		
SLA:6901	Second Language Acquisition Research and Theory	3
SLA:6920	Multimedia and Second Language Acquisition	3

Research Methods

Code	Title	Hours
This course:		
PSQF:6243	Intermediate Statistical Methods	4
One of these:		
CHIN:7405	Teaching Chinese as a Second Language V: Seminar in Research and Design	3
EDTL:7405	Research Methods in Second Language Teaching and Learning	3
And:		
A course to complement dissertation research (consult advisor)		3

Language Learning

Code	Title	Hours
Two of these:		
SLA:6950	Topics in Second Language Acquisition: Speaking	3
SLA:6965	Topics in Second Language Acquisition: Writing	3
EDTL:6400	Fundamentals of Second Language Assessment	3
EDTL:6409	Cultural Curriculum	3

EDTL:6483	Multilingual Education and Applied Linguistics	3
EDTL:6484	Reading in a Second Language	3
EDTL:6497	Principles of Course Design for Second Language Instruction	3

Linguistics Courses

Code	Title	Hours
Both of these:		
Two courses (chosen in consultation with advisor)		6

Specialization Courses

Each student selects one of two specialization areas—linguistics and psycholinguistics or language learning and postsecondary education—and takes five courses (total of 15 s.h.) in one area, not including courses taken above to satisfy requirements. Courses that could be used in these areas are listed below. Each student's specific specialization area and set of courses will be determined in consultation with the advisor.

Linguistics and Psycholinguistics

Code	Title	Hours
LING:6020	Phonological Theory	3
LING:6080	Topics in Second Language Acquisition	3
LING:7010	Advanced Syntactic Theory	3
PSY:3670	Language Processes	3
SPAN:3190	Psycholinguistic Aspects of Bilingualism	3-4
SPAN:4170	Second Language Acquisition	3
SPAN:6150	Topics in Spanish Language Acquisition	3

Other courses (chosen in consultation with advisor)

Language Learning and Postsecondary Education

Code	Title	Hours
CHIN:5024	Teaching Chinese as a Second Language VII: Pedagogical Grammar	3
CHIN:7401	Teaching Chinese as a Second Language I: Theories and Research	3
CHIN:7403	Teaching Chinese as a Second Language III: Instruction and Practicum	3
CHIN:7404	Teaching Chinese as a Second Language IV: Testing and Assessment	3
EDTL:6402	Second Language Program Management	3
EDTL:6403	Language Policy and Planning	3
EDTL:6480	Issues in Foreign Language Education	3

EDTL:7015	Ph.D. Seminar in Language, Literacy, and Culture	arr.
PSQF:6205	Design of Instruction	3
PSQF:6208	Digital Media and Learning	3
PSQF:6215	Web-Based Learning	3
PSQF:6265	Program Evaluation	3
Other courses (chosen in consultation with advisor)		

Elective Courses

Students also may take elective coursework relevant to their research interests, including the following independent project courses.

Code	Title	Hours
SLA:7020	Readings in Second Language Acquisition	arr.
SLA:7025	Special Projects in Second Language Acquisition	arr.

Thesis

Students must complete a thesis (maximum of 15 s.h., with a minimum of 2 s.h.)

Code	Title	Hours
SLA:7030	Ph.D. Thesis	arr.

Admission

Admission is for fall semester; students are admitted only for full-time study. Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Strong applicants hold a master's degree in a related area, have a cumulative g.p.a. of at least 3.50 in master's degree work, and speak and write English and another language at a professional level. Applicants must submit a writing sample that demonstrates their ability to synthesize and analyze information using standard academic English.

Financial Support

Teaching assistantships are available to qualified students. Assistantships usually involve teaching elementary or intermediate language courses. Visit the FLARE website for details.

Social Science Analytics

Chair, Department of Political Science

- Brian H. Lai

Coordinator, Social Science Analytics

- Frederick J. Boehmke (Political Science)

Undergraduate certificate: social science analytics

Website: <https://clas.uiowa.edu/polisci/undergraduate/social-science-analytics-certificate>

The growth of big data and informatics calls for a new set of skills for social science students and an increased understanding of the logic of data collection and analysis. The certificate focuses on the application side of data analysis and allows focus to be on the specific research methods and quantitative skills using data-driven methods effective for more understanding in an increasingly complicated social-political world. The certificate offers an opportunity for interdisciplinary training on how data can be used to address important questions in the social sciences.

The Certificate in Social Science Analytics is interdisciplinary and a number of departments collaborate to leverage distinct strengths and offer courses applicable to the certificate, including the Departments of Geographical and Sustainability Sciences, Political Science, Sociology and Criminology, and Statistics and Actuarial Science. The certificate is administered by the Department of Political Science [p. 909].

Programs

Undergraduate Program of Study Certificate

- Certificate in Social Science Analytics [p. 987]

Social Science Analytics, Certificate

Requirements

The undergraduate Certificate in Social Science Analytics requires a minimum of 18 s.h. Students complete requirements in five different component areas for a total of at least six courses. Students must maintain a g.p.a. of at least 2.00 in work for the certificate.

The certificate may be earned by any student admitted to the University of Iowa who is not concurrently enrolled in a UI graduate or professional degree program.

Some of the certificate courses have prerequisites not included in the certificate requirements. Students should select courses for which they have met the prerequisites.

The Certificate in Social Science Analytics requires the following coursework.

Code	Title	Hours
	Introduction to Data and the Social Sciences Course	3
	Social Science Research Design and Data Analysis Course	3
	Core Statistics Courses	6-8
	Building Skills and Data Science Course	3-4
	Applied Research Experience	3
	Total Hours	18-21

Introduction to Data and the Social Sciences

Code	Title	Hours
	This course:	
POLI:1050/ RELS:1050	Big Ideas: Introduction to Information, Society, and Culture	3

Social Science Research Design and Data Analysis

Code	Title	Hours

Undergraduate minor: social work

Graduate degrees: M.S.W.; Ph.D. in social work

Faculty: <https://clas.uiowa.edu/socialwork/people/faculty>

Website: <https://clas.uiowa.edu/socialwork/>

The School of Social Work's mission is to develop, disseminate, and integrate excellent and compelling research-based knowledge, practice, and policy, particularly that related to children, families, and older adults. The school operates from strengths-based perspectives and systems perspectives. It educates its graduates to be culturally competent scholars and practitioners who are committed to social justice and social work values and ethics, and who are prepared to serve in and have a positive impact on a broad range of family-centered and community-based practice settings throughout the State of Iowa and beyond.

The school provides a program of professional training accredited by the Council on Social Work Education at the baccalaureate and master's degree levels, aimed at developing effective intervention in multiple systems and using professional social work values and ethics. It also offers a Ph.D. program, which prepares students to conduct research that contributes to the knowledge base of social work, to be leaders in setting policy and practice, and to teach in colleges and universities. In addition, the School of Social Work administers the programs listed below.

Minor and Certificates

Aging and Longevity Studies

The School of Social Work administers the graduate certificate and the undergraduate minor and certificate in the Aging and Longevity Studies Program; see Aging and Longevity Studies [p. 44] in the Catalog.

Critical Cultural Competence

The School of Social Work administers the undergraduate certificate program in critical cultural competence; see the Certificate in Critical Cultural Competence [p. 334] in the Catalog.

Resilience and Trauma-Informed Perspectives

The undergraduate certificate program in resilience and trauma-informed perspectives is administered by the School of Social Work; see the Certificate in Resilience and Trauma-Informed Perspectives [p. 975] in the Catalog.

Projects, Seminars

Students may become involved in special projects such as the National Resource Center for Family-Centered Practice and the School of Social Work's programs in gerontology and in end-of-life care.

The school also offers students the opportunity to participate in travel/study seminars.

Continuing Education

Nondegree students may enroll in selected courses. Students who complete continuing education work and later enroll in a degree program may be able to apply a limited amount of their continuing education work toward their degree requirements; applicable credit is determined by the School of Social Work.

Programs

Undergraduate Programs of Study

Major

- Major in Social Work (Bachelor of Arts) [p. 995]

Minor

- Minor in Social Work [p. 999]

Graduate Programs of Study

Majors

- Master of Social Work [p. 1000]
- Doctor of Philosophy in Social Work [p. 1008]

Courses

Social Work Courses

SSW:1000 First-Year Seminar **1-2 s.h.**
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

SSW:1022 Social Justice and Social Welfare in the United States **3 s.h.**
Historical development of social welfare and social justice in the United States; individual values and ethics; role and responsibilities of enhancing society; contemporary practice to address social injustices including poverty, discrimination, various forms of violence; small group discussions and debates of various issues to allow for an exchange of diverse views and perspectives; volunteer work. GE: Values and Culture. Same as SOC:1022.

SSW:1800 Aging Matters: Introduction to Gerontology**3 s.h.**

Overview of the field of gerontology from a bio-psycho-social framework; how the human body and brain age, effects of these biological changes on physical and cognitive functions, and interaction of these individual factors with societal contexts; broad perspective to give students a foundation in gerontology, paving the way for more advanced courses in biology of aging, psychology of aging, and global aging; for students from a wide range of disciplines and levels, no prior knowledge of aging required. GE: Social Sciences. Same as ASP:1800, CSD:1800, NURS:1800, TR:1800.

SSW:2042 Intercultural Communication**3 s.h.**

Culture defined as a system of taken-for-granted assumptions about the world that influence how people think and act; cultural differences that produce challenges and opportunities for understanding and communication; those differences from several theoretical perspectives; opportunities to examine culture and cultural differences in practical, experience-driven ways. Same as COMM:2042, IS:2042.

SSW:2222 Introduction to Social Work**4 s.h.**

Social welfare as a social institution; settings, methodologies of social work, practice; profession of social work; historical development of American social welfare, social work; a minimum of 45 hours volunteer work. Requirements: sophomore or higher standing.

SSW:3135 Global Aging**3 s.h.**

Demographic factors that contribute to the worldwide phenomena of population aging in context of WHO Active Aging and the United Nation's Principles for Older Persons frameworks. Same as ASP:3135, GHS:3050.

SSW:3187 Continuing Education: Individual Study**arr.**

Project related to student interest carried out under direction of faculty member. Requirements: individual study contract.

SSW:3191 Individual Study**arr.**

Project related to student interest carried out under direction of faculty member.

SSW:3500 Nonprofit Organizational Effectiveness I**3 s.h.**

Operational and financial aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as ENTR:3595, MGMT:3500, MUSM:3500, NURS:3595, RELS:3700.

SSW:3600 Nonprofit Organizational Effectiveness II**3 s.h.**

Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Same as MGMT:3600, NURS:3600, RELS:3701.

SSW:3700 Introduction to Understanding Trauma and Resilience**3 s.h.**

Introduction to understanding key concepts of trauma-informed systems of care in multiple settings; identification of various types of trauma along with behaviors and responses seen in survivors of trauma; students trace effects of historical trauma of marginalized communities and multiple trauma survivor groups to understand the consequences of trauma and its impact in the culture; resilience and strategies to offset consequences of trauma. Same as PSQF:3700.

SSW:3712 Human Sexuality, Diversity, and Society**1-3 s.h.**

Introduction to human sexuality from a biopsychosocial, sex-positive perspective; sexuality as a normal and essential component of human existence and expression throughout the life span; influence of gender, class, religion, race, ethnicity, sexual orientation, ability status, age, and culture on sexuality interwoven and highlighted; diversity of perspectives and experiences shared through active participation and respectful dialogue. Same as NURS:3712.

SSW:3729 Substance Use and Abuse**2-3 s.h.**

Chemical dependency for helping professions; etiological, physiological, psychological, legal, sociological aspects; treatment methods.

SSW:3786 Death/Dying: Issues Across the Life Span**3-4 s.h.**

Introduction to the field of end-of-life care; examination of student concerns about death, dying, and grieving process; historical, cultural, societal, and personal perspectives of death and dying in modern society. Same as ASP:3786.

SSW:3796 Family Violence**2-3 s.h.**

Thinking critically about one of the most damaging family problems prevalent in the United States today—family violence; students examine the phenomena of child abuse and neglect, domestic violence, and elder abuse, including definitions, causes, risk factors, consequences, reporting, assessment, intervention, prevention, and policy.

SSW:3797 Child Welfare Policy and Practice**3 s.h.**

Public and private child welfare practice and organizations in the United States; historical and legal aspects, co-occurring issues, foster care, adoption, family preservation.

SSW:3799 Selected Aspects of Social Work and Social Welfare**arr.**

Human behavior, practice, social welfare policy.

SSW:3840 Human Behavior in the Social Environment**3-4 s.h.**

Behavior and development in context of social, ecological systems and human diversity; overview of biopsychosocial dimensions, individual behavior, and development throughout lifespan; contexts of diverse family, group, community, organization, and cultural systems.

SSW:3841 Fundamentals of Social Work Practice**3 s.h.**

Professional practice: functions, roles, skills, conceptual frameworks, values, ethics; focus on integrated approach to practice, including assessment, intervention, evaluation of interventions, termination with individuals, families, groups; emphasis on empirically based practice. Corequisites: SSW:3840, if not taken as a prerequisite. Requirements: admission to social work B.A. program.

SSW:3842 Interpersonal Skills Laboratory**2 s.h.**

Practice of interpersonal skills required in the helping relationship. Corequisites: SSW:3841, if not taken as a prerequisite. Requirements: admission to social work B.A. program.

SSW:3844 Introduction to Social Work Research**4 s.h.**

Scientific approach to knowledge building, with emphasis on critical use of research; quantitative and qualitative methods, evaluation of practice, computerized data analysis, ethics and diversity in social work research. Requirements: admission to social work B.A. program.

- SSW:3845 Social Work Processes** 4 s.h.
Context of practice examined to understand structural factors that affect clients and communities; culturally competent practice using empowerment perspective. Corequisites: SSW:3840, if not taken as a prerequisite. Requirements: admission to social work B.A. program.
- SSW:3847 Discrimination, Oppression, and Diversity** 3 s.h.
Theoretical and historical perspectives on racism, sexism, other forms of discrimination; applications to social work, culturally competent practice, change strategies. Requirements: admission to social work B.A. or M.S.W. program.
- SSW:3904 Human Services Administration** 2 s.h.
Effects of organizational structures/processes on individual performance; models of management, communication patterns, leadership styles; skill in technical writing, decision making, personnel and financial management, applied professional ethics. Requirements: completion of foundation courses.
- SSW:4100 Social Work in the Criminal Justice System** 3 s.h.
How social work practice intersects with different aspects of the criminal justice system; focus on integrating social work values into criminal justice field; social work's responsibility to address social justice problems (e.g., mental illness, racial disparity, gender, human rights) within criminal justice system; critical examination of past and present practices in criminal justice and implications for social work practice and policy when working with individuals in criminal justice system.
- SSW:4130 Family Development Specialist Model** 3 s.h.
Use of family development specialist model of family-centered practice to facilitate improved family functioning, economic independence; relationship building, systems theory, family-centered case management, conflict management, empowerment strategies. Requirements: completion of family development specialist certification course.
- SSW:4155 Treatment of Substance Use and Co-Occurring Disorders** 3 s.h.
Treatment of individuals presenting substance related issues (abuse, dependency, co-occurring disorders); etiological, physiological, psychological, legal, and sociological aspects; evaluation of current research and direct application of contemporary treatment modalities to client situations encountered as helping professionals. Recommendations: introductory course in substance abuse.
- SSW:4188 Continuing Education: Honors** arr.
Supervised individual research. Requirements: honors standing.
- SSW:4189 Field Experience Seminar** 1 s.h.
Opportunity for students to recount their experiences from generalist practice in agencies; application of knowledge, skills, and values of culturally competent social work. Corequisites: SSW:4193. Requirements: completion of coursework in the major.
- SSW:4190 Aging Studies Internship and Seminar** 3 s.h.
Opportunities for students in various disciplines to relate their areas of study to older adults and aging; interdisciplinary relationships, approaches to meeting needs of older adults; an online seminar that meets regularly is included in this experience. Same as ASP:4190.
- SSW:4192 Honors in Social Work** arr.
Supervised individual research. Requirements: honors standing.
- SSW:4193 Field Experience** arr.
Supervised experience in selected social welfare organizations; application of knowledge and skill common to generalist practice in an agency setting. Corequisites: SSW:4189. Requirements: completion of coursework in the major and social work senior standing.
- SSW:4700 Motivational Interviewing in Diverse Application** 3 s.h.
Application of motivational interviewing (MI) skills, as a collaborative process and communication style, while working with individuals presenting with ambivalence to change; MI skills are used to guide across the change process ("Stages of Change") by evoking the intrinsic motivation for change; includes application to diverse populations (e.g., cultural groups, veterans, adolescents) and psychological issues individuals may exhibit.
- SSW:4843 Social Welfare Policy and Practice** 3 s.h.
Basic social welfare policies and programs; economic, social, ideological, and political conditions that have influenced formation and implementation of social policy, current structure of major social welfare policies.
- SSW:5194 Social Work Practice in Health Care Settings** 2 s.h.
Introduction to organization, provision of social work services in health care settings; practice issues such as models of intervention, ethical questions, impact of cultural diversity on health care.
- SSW:5200 Grief Work with Individuals and Families** 2-3 s.h.
Complexity of grief and its multifaceted impact on family systems; utilizing grief theories, including Worden's Tasks of Mourning, ambiguous loss theory, several family systems models; examination of multi-generational dynamics that affect how we learn to grieve, how we experience grief, and how we live after a loss; acknowledged and unacknowledged grief and loss; generational family dynamics; difficulties and strengths passed from one generation to the next; assessing grief at individual, family, group, and community levels; how loss can affect personal well-being and professional practice, particularly when working with an interdisciplinary team. Requirements: social work graduate standing.
- SSW:5240 Trauma Informed Family Practice** 3 s.h.
Theory, knowledge, and skills informing evidence-based assessment and intervention for traumatized children and adolescents in child welfare system, including those exposed to abuse, neglect, witnessing interpersonal crime (e.g., domestic violence, community violence); family events within their ecological context, various family forms, cultural patterns; controversial issues in child welfare, conclusions based on scholarly research, presentation of conclusions in professional oral and written form.
- SSW:5250 Resilience and Trauma-Informed Interventions with Individuals** 3 s.h.
Focusing primarily on trauma caused by violence, students explore definitions, symptoms, and physiology of trauma and post-traumatic stress disorder (PTSD), and the impact of violence on individuals, family system, and communities; individual-level assessment and interventions.

- SSW:6145 Organization and Community Practice 3 s.h.**
Models that underlie theories of organization, community practice; principles of macro social work and skill development in relationship building, needs assessment, decision making, planning, implementing, ethics, program and self-evaluation. Requirements: admission to M.S.W. program.
- SSW:6146 Computer Laboratory 1 s.h.**
Instruction and hands-on skills in the use of computer applications for research and statistical analysis. Requirements: admission to M.S.W. program.
- SSW:6148 Research Practice I 3 s.h.**
Knowledge and skills for evaluating practice and carrying out social work research; formulation of research questions; research design and methodology; sampling techniques; protection of human subjects; descriptive statistics; computerized data analysis. Requirements: admission to M.S.W. program.
- SSW:6150 Social Work Practice with Individuals, Families, and Groups 3 s.h.**
Models and underlying theories of empirically based direct social work practice; emphasis on an ecosystem strengths perspective; phases of helping relationship, strengths-based assessment, change process in interpersonal helping relationships. Prerequisites: SSW:3840. Requirements: admission to M.S.W. program; for students who have completed 60 s.h., concurrent enrollment in SSW:6151, SSW:6290, and SSW:6291.
- SSW:6151 Social Work Practice Skills Laboratory 2 s.h.**
Interpersonal skills practice in the helping relationship; small-group format. Corequisites: SSW:6150 and SSW:6290 and SSW:6291, if not taken as prerequisites. Requirements: admission to M.S.W. program.
- SSW:6220 Family Law 3 s.h.**
Legal systems, rights, and processes related to families including marriage, divorce, custody, protective services, reproductive rights, adoption, commitment, delinquency, education, poverty, and discrimination; roles of lawyers and social workers in legal system. Prerequisites: SSW:4843.
- SSW:6224 Spirituality and Ethics in Social Work 2-3 s.h.**
Knowledge, values, and skills that provide a framework for spiritually sensitive social work practice; preparation for responding competently and ethically to diverse spiritual perspectives, for recognizing and reflecting on one's own spiritual beliefs, and for identifying appropriate ways to apply personal beliefs to practice with varied populations while safeguarding client autonomy and self-determination.
- SSW:6228 Theories of Personality and Psychopathology 2 s.h.**
Theories and their relevance to social work practice with diverse populations. Prerequisites: SSW:3840. Requirements: social work graduate standing.
- SSW:6232 Therapy with Couples 2 s.h.**
Introduction to working with couples in interaction and as a social system; theories of functional and dysfunctional systems; theoretical bases for couple's therapy and techniques of intervention; special attention to couple assessment. Requirements: completion of foundation courses.
- SSW:6233 School Social Work Practice 2 s.h.**
Evidence-based school social work services from a multilevel approach with student, family, school, and community grounded in social work standards, values, ethics and cultural competence; social and political influences on education and practice; prevention, assessment and intervention; specific practices include response to intervention and positive behavior supports; evaluating and serving students with disabilities including use of functional behavior assessment and development of behavior intervention plans; consultation and collaboration with teachers and school staff, engaging in culturally sensitive practices.
- SSW:6234 Social Work Practice and Use of the Diagnostic and Statistical Manual of Mental Disorders 3 s.h.**
Major categories of psychopathology and the DSM-5 system of classification; the use of the DSM-5 approach to diagnosis allows one to consider all aspects of an individual's behavior and presentation of symptoms; included in the DSM is information about effects of culture, developmental stage, and gender on the presentation of mental disorders.
- SSW:6236 Interventions with Individuals 2 s.h.**
Specialized practice; emphasis on thinking about how one works with individuals and importance of emotional (affective) regulation in the professional relationship; focus on emerging findings from the neurosciences combined with attachment theory and object relations; class deliberations involve theory and practice; understanding the overall interpersonal and psychotherapeutic process. Requirements: completion of foundation courses.
- SSW:6237 Social Work Practice with Children, Youth, and Families 2 s.h.**
Preparation for practice in child welfare, family service agencies; family life cycle, child development, child maltreatment, problems of adolescence, social services for families and children, legal issues. Requirements: completion of foundation courses.
- SSW:6238 Introduction to Play Therapy 2 s.h.**
Major theories and techniques of play therapy, relevance to social work practice.
- SSW:6247 Nonprofit Organizational Effectiveness I 3 s.h.**
Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as HMP:6360, MGMT:9150, PBAF:6278, RELS:6070, SPST:6010, URP:6278.
- SSW:6248 Nonprofit Organizational Effectiveness II 3 s.h.**
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Requirements: for HMP:6365—HMP:6360 or MGMT:9150. Same as HMP:6365, MGMT:9160, PBAF:6279, RELS:6075, SPST:6020, URP:6279.
- SSW:6281 Social Work Practice: Selected Aspects arr.**
Topics not covered in another course; diversity, social justice and ethics issues related to a social work practice area.
- SSW:6282 Grant Writing 1-2 s.h.**
Same as PBAF:6282, URP:6282.

SSW:6290 Foundation Practicum in Social Work 3 s.h.

Generalist practice experience with individuals, families, small groups, organizations, communities; communication skills, change process, professional values and ethics applied at multiple system levels; students evaluate their own practice using a learning contract in an agency setting. Corequisites: SSW:3840, SSW:3847, SSW:4843, SSW:6145, SSW:6146, SSW:6150, SSW:6151, and SSW:6291; if not taken as prerequisites. Requirements: admission to M.S.W. program.

SSW:6291 Foundation Practicum Seminar 1 s.h.

Integration of academic, experiential learning; self-assessment, peer feedback to promote model of professional accountability. Corequisites: SSW:3840, SSW:3847, SSW:4843, SSW:6145, SSW:6146, SSW:6150, SSW:6151, and SSW:6290; if not taken as prerequisites. Requirements: admission to M.S.W. program.

SSW:7000 Seminar for Accelerated Advanced Standing Program 3 s.h.

Preparation for advanced micro and macro SSW coursework; builds on foundation knowledge students obtained about working with individuals, group, families, communities, and organizations at the undergraduate level by introducing them to advanced theory and practice models seen in graduate level courses and practice situations. Requirements: admission to accelerated advanced standing M.S.W. program.

SSW:7250 Family-Centered Theory and Practice I 3 s.h.

Examination and comparison of models and underlying theories of empirically based direct social work for family-centered practice; focus on skill development in problem analysis, case assessment, intervention and implementation of multiple change strategies at the family level. Requirements: completion of M.S.W. foundation courses.

SSW:7251 Family-Centered Theory and Practice II 3 s.h.

Examination and practice of specific in-depth techniques for assessment and intervention in family-centered practice and evaluation of student's own practice; intervention examined for specific family and couple presenting problems (domestic violence, substance abuse, etc.); students are encouraged to select one practice approach to learn in greater depth. Prerequisites: SSW:7250.

SSW:7252 Advanced Social Policy for Family Practice 3 s.h.

Systematic basis for examining social, economic, and political factors that influence formation of social policies; social policy implementation, impact of social policies on vulnerable individuals and families. Requirements: completion of M.S.W. foundation courses.

SSW:7260 Integrated Social Work Theory and Practice I 3 s.h.

Practice models, theories, skills, evaluation, and ethical issues relevant to creating change at organizational, community, state, and national levels; strategic plans to benefit marginalized, oppressed, and vulnerable people; utilization of technology, including social media, to generate understanding about social work issues and practice areas; developing and carrying out culturally competent, client-focused individual, organizational, and community interventions; leadership in social work; effective use of professional social work behavior, technology, community resources, and evidence-based practice to advance social, economic, and environmental justice at multiple levels. Requirements: completion of foundation courses.

SSW:7261 Integrated Social Work Theory and Practice II 3 s.h.

Builds on theories, skill development, evaluation, and ethical issues introduced in SSW:7260; focus on how to create and lead organizational change regardless of position in the organization; project management, advanced leadership skills, and capacity development; emphasis on organizational level as it relates to other system levels (individual, family, coalitions, community, policy); major skills include culturally competent organizational, interorganizational, and community intervention, supervision, and program evaluation.

SSW:7262 Advanced Social Policy for Integrated Practice 3 s.h.

Systematic basis for critical examination of social, economic, and political factors that influence formation of social policies; social policy implementation, impact of social policies on vulnerable populations, service providers, communities. Requirements: completion of M.S.W. foundation courses.

SSW:7268 Continuing Education: Individual Study arr.

Project related to student interest; directed by faculty member. Requirements: completion of course contract.

SSW:7269 Continuing Education: Thesis arr.

Thesis research project.

SSW:7270 Research Practice II 2-3 s.h.

Research project relevant to social work practice that builds on knowledge and skills developed in SSW:6148; data analysis, report of results; ethical principles applied to research. Prerequisites: SSW:6148. Requirements: admission to M.S.W. program.

SSW:7271 Individual Study arr.

Project related to student interest; directed by faculty member.

SSW:7272 Thesis arr.**SSW:7292 Advanced Practicum in Family-Centered Practice I and II arr.**

Family-centered practice theory and skills implemented in interventions with individuals, families; two semester field course. Corequisites: SSW:7250, SSW:7251, SSW:7252, and SSW:7270; if not taken as prerequisites. Requirements: completion of M.S.W. foundation courses, and concurrent enrollment in SSW:7293 or SSW:7294.

SSW:7293 Advanced Practicum Seminar in Family-Centered Practice I 1 s.h.

Two-semester field course; family-centered practice theory and skills implemented in interventions with individuals, families. Corequisites: SSW:7292. Requirements: completion of M.S.W. foundation courses.

SSW:7294 Advanced Practicum Seminar in Family-Centered Practice II 1 s.h.

Continuation of SSW:7293. Prerequisites: SSW:7293. Corequisites: SSW:7292.

SSW:7295 Advanced Practicum in Integrated Practice arr.

Integrated social work theories and interventions implemented in work with individuals, families, organizations, formal and informal networks; two semester field course. Corequisites: SSW:7260, SSW:7261, SSW:7262, and SSW:7270; if not taken as prerequisites. Requirements: completion of M.S.W. foundation courses; for fall semester—concurrent enrollment in SSW:7297 or SSW:7298.

SSW:7296 Advanced Practicum in School Social Work

Field course; social work theories and interventions implemented in schools. Corequisites: SSW:7250 or SSW:7260, SSW:7251 or SSW:7261, and SSW:7252 or SSW:7262; if not taken as prerequisites. Requirements: completion of M.S.W. foundation courses.

SSW:7297 Advanced Practicum Seminar in Integrated Practice I **1 s.h.**

Two-semester course; social work knowledge, skills, values, and professional identity integrated in context of advanced practice and direct multisystemic interventions. Corequisites: SSW:7295 or SSW:7296.

SSW:7298 Advanced Practicum Seminar in Integrated Practice II **1 s.h.**

Continuation of SSW:7297. Prerequisites: SSW:7297. Corequisites: SSW:7295 or SSW:7296.

SSW:7800 Social Work Proseminar **1 s.h.**

Orientation for new Ph.D. students to program and degree requirements; how to formulate research questions; introduction to faculty research and interests. Requirements: admission to social work doctoral program.

SSW:7803 Social Work Research Practicum **1-4 s.h.**

Student work with faculty on various phases of research process including research design, measurement, sampling, data collection, data analysis, human subjects review, and writing for publication. Requirements: admission to social work doctoral program.

SSW:7804 Thesis Writing Seminar **2-3 s.h.**

Writing a thesis and an argument; synthesizing literature and justifying methods; development of scientific communication skills; defending ideas at proposal hearing and thesis defense.

SSW:7806 Teaching Practicum **1-2 s.h.**

Development of knowledge, skills, and values needed to become effective, culturally competent social work educators through an applied teaching experience; faculty mentors provide ongoing instruction on how to teach and assess student learning. Requirements: admission to social work doctoral program, and concurrent enrollment in or completion of teaching seminar.

SSW:7807 Introduction to College Teaching for Social Workers **1 s.h.**

Development of knowledge and skills needed to become effective, culturally competent educators; topics may include theories of adult learning, course design, creating a learning culture that is inclusive, instructional strategies, accreditation processes, and writing a teaching philosophy.

SSW:7808 Seminar in Social Work Theory and Knowledge **3 s.h.**

Examination of fundamental relationship between theory and research and epistemology of micro-level theories used in social work research; emphasis on critical evaluation of theories and understanding the difference between frameworks, theories, conceptual models, and their functions; students present and defend their own analysis of theories applicable to their program of scholarship and engage other students in discussion. Requirements: admission to University of Iowa doctoral program.

arr.**SSW:7815 Seminar: Human Service Organizations** **3 s.h.**

Theories of organizations and applying theory to research within and about human services organizations; range of theories and their application to problems of conducting organizational research from Weber's "bureaucracy" to contemporary "learning organization" popularized by Senge; organizational culture and climate, interorganizational networks, supervision and turnover, gender and diversity in relation to organizational research; students lead sessions and facilitate discussion of critical concepts and readings.

SSW:7830 Ph.D. Dissertation **arr.**

Ongoing and substantial feedback to doctoral candidates on development and defense of dissertation. Prerequisites: SSW:7800 and SSW:7803 and SSW:7806 and SSW:7807. Requirements: submission of comprehensive exam.

Social Work, B.A.

The undergraduate program in social work has been accredited continuously by the Council on Social Work Education (CSWE) since 1974 and is designed to be consistent with the council's 2015 Educational Policy Statement competencies.

Consistent with CSWE standards, the program views dimensions of diversity as intersections of multiple factors, including age, class, color, culture, disability, ethnicity, gender, gender-identity and expression, immigration status, political ideology, race, religion, sex, and sexual orientation. Students learn that, as a consequence of difference, a person's life experiences may include oppression, poverty, marginalization, and alienation as well as privilege, power, and acclaim.

Learning Outcomes

The specific mission of the B.A. program in social work is to prepare culturally aware generalist social workers whose practice is consistent with social work values and ethics, including a commitment to social justice and social change. The program's goals are to:

- prepare students for culturally competent generalist social work practice with individuals, families, small groups, organizations, and communities;
- provide students with a base for continuing graduate education in social work and for lifelong learning; and
- prepare students for active engagement with issues of social justice, oppression, and social welfare in local, state, regional, national, and global goals.

The program draws on a liberal arts perspective; social and behavioral science theory; social research; social policy development, analysis, and implementation; culturally competent intervention and prevention approaches in working with individuals, families, small groups, organizations, and communities; social integration; multiple systems assessment and evaluation; and knowledge pertaining to diversity.

Knowledge and practice in social work values and ethics is also an integral part of students' education. Knowledge and skill related to the evaluation of practice are integrated throughout the curriculum, beginning in SSW:1022 Social Justice and Social Welfare in the United States, continuing through practice and research courses, and culminating in the field experience and field seminar.

Requirements

The Bachelor of Arts with a major in social work requires a minimum of 120 s.h., including at least 60-64 s.h. of work for the major (a minimum of 35-38 s.h. in social work courses, 13-14 s.h. in cognate areas, 6 s.h. in one other department or in social work courses, and 6 s.h. in social work electives). Students must maintain a g.p.a. of at least 2.00 in all UI courses and a g.p.a. of at least 3.00 in social work courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 20]. Courses used to fulfill GE CLAS Core requirements may not be used to satisfy the social work electives requirement.

Students must complete SSW:1022 Social Justice and Social Welfare in the United States (3 s.h.) to be admitted to the major and before enrolling in the remaining social work courses required for the major; this course also fulfills the

Values and Culture requirement of the GE CLAS Core. A transfer student may be given approval by the department to substitute this requirement if they have completed an introduction to social work or introduction to human services course at another institution, or if they complete SSW:2222 Introduction to Social Work (section EXW), in place of SSW:1022 to be admitted to the major; SSW:2222 would not fulfill the GE CLAS Core requirement. If transferring the course from another institution, a student may be able to reduce the social work credit required for the major by 3 s.h.

Many students use the major's required course BIOL:1140 Human Biology to partially fulfill the GE CLAS Core [p. 20] Natural Sciences requirement.

The B.A. with a major in social work requires the following coursework.

Code	Title	Hours
Social Work Courses		35-38
Required Electives		12
Cognate Areas		13-14
Total Hours		60-64

Social Work Courses

Code	Title	Hours
All of these:		
SSW:1022	Social Justice and Social Welfare in the United States	3
SSW:3840	Human Behavior in the Social Environment	4
SSW:3841	Fundamentals of Social Work Practice	3
SSW:3842	Interpersonal Skills Laboratory	2
SSW:3844	Introduction to Social Work Research	4
SSW:3845	Social Work Processes	4
SSW:3847	Discrimination, Oppression, and Diversity	3
SSW:4189	Field Experience Seminar	1
SSW:4193	Field Experience	8-11
SSW:4843	Social Welfare Policy and Practice	3

Required Electives

Students must complete a minimum of 6 s.h. of social work electives and 6 s.h. of courses in one other discipline or they can select additional coursework in social work. If they opt to complete 6 s.h. from another discipline, students typically select courses in areas closely related to social work, such as African American studies (prefix AFAM), aging and longevity studies (prefix ASP), American studies (prefix AMST), anthropology (prefix ANTH), communication studies (prefix COMM), economics (prefix ECON), entrepreneurial management (prefix ENTR), health and human physiology (prefix HHP), journalism and mass communication (prefix JMC), management and entrepreneurship (prefix MGMT), political science (prefix POLI), psychological and brain sciences (prefix PSY), religious studies (prefix RELS), sociology (prefix SOC), Spanish (prefix SPAN), sport studies (prefix SPST; see American studies), Tippie College of Business nondepartmental courses (prefix BUS), and gender, women's and sexuality studies (prefix GWSS).

Courses used to fulfill GE CLAS Core requirements may not be applied to the elective requirements.

Students who are working on a minor or a certificate may apply up to 6 s.h. toward this requirement.

Students must complete the following.

Code	Title	Hours
These:		
	Social work electives	6
	Electives in another discipline related to social work	6
Or this:		
	Social work electives	12

Cognate Areas

Students must complete the following.

Code	Title	Hours
Natural and Social Sciences		
All of these:		
BIOL:1140	Human Biology	4
POL:1100	Introduction to American Politics	3
PSY:1001	Elementary Psychology	3
SOC:1010	Introduction to Sociology	3-4

Honors

Honors in the Major

Students majoring in social work have the opportunity to graduate with honors in the major. Honors students complete in-depth study in areas that interest them. They must maintain a cumulative University of Iowa g.p.a. of at least 3.33. Consult the School of Social Work for more information about graduating with honors in the major.

University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the University's honors program.

Membership in the UI Honors Program is not required to earn honors in the social work major.

Admission

The School of Social Work endeavors to maintain a heterogeneous student body by enrolling students who represent diverse backgrounds and cultural perspectives.

A limited number of students are admitted to the major each year. The application deadline is February 15. Admission to the undergraduate program in social work requires:

- completion of SSW:1022 Social Justice and Social Welfare in the United States with a grade of C or higher during the sophomore year;
- a cumulative g.p.a. of at least 2.50 (exceptions may be made for persons who do not meet the grade-point

average requirement if they are strong candidates on the basis of other criteria); and

- completion of application forms and statement.

Students should complete SSW:1022 in their first year or in fall of their sophomore year and apply to the major during their sophomore year. Students who apply during their junior year and are admitted must expect to complete an additional summer session, or more, in order to fulfill the requirements of the major.

All of the items above are required for transfer students, except that substitution of SSW:1022 is permitted with a grade of C or higher in a course approved by the department, such as introduction to social work or introduction to human services. Students who have completed the equivalent of introduction to social work at another institution also must submit a completed recommendation form and transcripts. Recommendations and letters of reference will otherwise not be accepted.

The School of Social Work criteria for selective admission for a B.A. in social work is detailed in the "B.A. Social Work Admissions Policy Statement and Guidelines for Application" on the school's Admission web page.

Meeting the admission requirements above does not guarantee admission. Admission often is limited by available instructional resources and opportunities for field placement. The school does not grant academic credit for life experience or previous work experience.

For more information about admission policies, contact the program administrator at the School of Social Work.

Social Work Interest

Students who are interested in applying to the social work major may declare a social work interest at any time after they enroll at the University and before they earn more than 72 s.h. of credit, and preferably while they still will have time to enter and complete the major in a total of four years of study. Students may not declare a social work interest after they have earned 72 s.h., even if they already have declared another major.

Declaration of a social work interest qualifies students with at least sophomore standing to be advised by a senior academic advisor assigned to social work interest students. Declaration allows students to participate in the Social Work Student Association and other social work activities, but does not allow them to register for required courses in the major. They may take electives in the social work department prior to formal admission to the major.

Students may continue their social work interest standing until they are admitted to the major or until they have earned more than 72 s.h. of credit.

Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Admission to the major in social work is selective. The four-year graduation plan applies only to students who are admitted by the beginning of their fifth semester.

Before the fifth semester begins: four courses in the major and admission to the major

Before the seventh semester begins: five more courses in the major and at least 90 s.h. earned toward the degree

Before the eighth semester begins: five more courses in the major and finalized field placement

During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Total Hours	121-132

- a The Academic Advising Center and the College of Liberal Arts and Sciences advise Social Work Interest students on prerequisite course planning. Students are advised for success, based on academic strength, not necessarily for a four year plan. Prerequisites may take more than two years to complete.
- b Students must complete SSW:1022 to be admitted to the major and before enrolling in the remaining social work required major courses. Students may take this course in any semester, but must have completed the course before admission is finalized. It is recommended that it be taken in the first three semesters. Students may alternatively enroll in SSW:2222 Introduction to Social Work, but it does not fulfill a General Education requirement.
- c Fulfills a major requirement and may fulfill a GE requirement.
- d GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
- e Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
- f Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
- g Students are expected to apply to the major in their sophomore year. Juniors are permitted to apply and if they do so, it is with the expectation that at least one additional summer session of coursework will be necessary to complete all of the requirements of the major, due, in part, to the sequencing of social work courses.
- h Students must take two elective courses in social work (6 s.h.).
- i Students must take an additional two courses (6 s.h.) of electives. They may take the two courses as additional social work electives, or they may take two courses in a related discipline (i.e., psychology, sociology, political science, anthropology, or gender, women's, and sexuality studies).
- j Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>. If applicable search for "Early and Late Participation" to find this page (e.g. participate in graduation ceremony in May, degree conferral in August).

Career Advancement

The social work major prepares students for employment in social service areas such as public welfare, child welfare, human service organizations, mental health, health providers (such as hospitals, hospice, skilled care, substance abuse treatment), senior services, group services, residential treatment for youth and persons with disabilities, and corrections. Many graduates continue with advanced study in social work or related physical and mental health professions. Overall employment of social workers is projected to grow 16 percent from 2016-2026 (Bureau of Labor Statistics).

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Social Work, Minor

Requirements

The undergraduate minor in social work requires a minimum of 15 s.h. in social work courses, including 12 s.h. in courses numbered 3000 or above taken at the University of Iowa. Students complete one required course and 12 s.h. of elective coursework. They must maintain a g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework for the minor may not be taken pass/nonpass.

Social work courses required for the major are not available to students who are not admitted to the social work program.

The minor in social work requires the following coursework.

Required Course

Code	Title	Hours
One of these:		
SSW:1022	Social Justice and Social Welfare in the United States	3
SSW:2222	Introduction to Social Work	4
Equivalent course from another institution (must be approved by the School of Social Work)		

Electives

Students select 12 s.h. from the following; many courses have an online section.

Code	Title	Hours
SSW:3135	Global Aging	3
SSW:3500	Nonprofit Organizational Effectiveness I	3
SSW:3600	Nonprofit Organizational Effectiveness II	3
SSW:3700	Introduction to Understanding Trauma and Resilience	3
SSW:3712	Human Sexuality, Diversity, and Society	1-3
SSW:3729	Substance Use and Abuse	2-3
SSW:3786	Death/Dying: Issues Across the Life Span	3-4
SSW:3796	Family Violence	2-3
SSW:3797	Child Welfare Policy and Practice	3
SSW:3799	Selected Aspects of Social Work and Social Welfare	arr.
SSW:3904	Human Services Administration	2
SSW:4100	Social Work in the Criminal Justice System	3
SSW:4155	Treatment of Substance Use and Co-Occurring Disorders	3
SSW:4700	Motivational Interviewing in Diverse Application	3

Master of Social Work, M.S.W.

The Master of Social Work (M.S.W.) program prepares social workers for leadership in the profession and for advanced social work practice in a wide range of settings. The program's general focus is on family systems and social change, both domestic and international. Primary program goals are met through a set of professional foundation requirements and advanced courses which enable students to understand the dynamics of human development and change; to understand the links between society's structures and families; to acquire skills for working with individuals, families, small groups, and communities; and to learn how to enhance the responsiveness of human service organizations.

M.S.W. Goals

The goals of the M.S.W. program are to:

- prepare students to shape the profession's future by providing education in family-based, community-based, and culturally competent practice approaches using the person-in-environment framework; and
- prepare competent professionals for autonomous practice and leadership within the professional community, including advanced interventions at multiple system levels, supervision, program development, program administration, training, evaluation of practice, dissemination of new models of practice, and policy development.

The program has been continually accredited by the Council on Social Work Education (CSWE) since 1951. See the CSWE Assessment of Student Learning Outcomes for the M.S.W. program.

Explore how social workers help individuals, groups, and families across their lifespans at the National Association of Social Workers website.

Master in Social Work Program Options

Options are available to complete the M.S.W. in Iowa City and Des Moines, Iowa, depending upon an applicant's prior preparation. Applicants to the three-year programs in the Quad Cities (located in the Davenport/Bettendorf area on Iowa's eastern border), in Sioux City, Iowa, or the hybrid (online) option. Applicants to any of the options, at any of the centers, complete the same application.

60 s.h. option (regular standing): Designed for individuals who have completed a degree in a discipline other than a CSWE-accredited social work degree program. Applicants apply for fall admission; the deadline is February 1.

48 s.h. option (advanced standing): Designed for individuals who have completed the B.A. in social work or the B.S.W. from a CSWE-accredited social work degree program. Applicants apply for fall admission; the deadline is February 1.

41 s.h. option (accelerated advanced standing): Designed for individuals who have completed the B.A. in social work or the B.S.W. from a CSWE-accredited social work degree program and who meet additional entrance criteria. Additional forms and written requirements are part of the application.

Applicants apply for summer admission; the deadline is December 1.

M.S.W. Professional Association

Students and graduates of the social work program are eligible for membership in the National Association of Social Workers (NASW), the largest membership organization of professional social workers in the world with 132,000 members. NASW works to enhance the professional growth and development of its members, to create and maintain professional standards, and to advance sound social policies. The NASW Code of Ethics is intended to serve as a guide to the everyday professional conduct of social workers.

Graduates of accredited M.S.W. programs may be eligible for membership in many specialized areas of practice, for example, associate membership in the American Association for Marriage and Family Therapy (AAMFT) upon fulfilling certain curriculum requirements at the graduate level. Courses are not automatically accepted; graduates need to demonstrate that specific courses meet the AAMFT's requirements, usually by sending course outlines.

Requirements

The Master of Social Work requires 60 s.h. of graduate credit; the requirement is 48 s.h. for students who hold an undergraduate degree in social work from a program accredited by the Council on Social Work Education (CSWE). Students who have earned an undergraduate degree in social work from a program accredited by the CSWE and who meet other entrance criteria can satisfy M.S.W. requirements with a 41 s.h. option. Students must maintain a cumulative g.p.a. of at least 3.00 and they must be in compliance with the school's student advancement policy. The degree is offered with or without thesis.

Requirements for the 60 s.h. M.S.W. program include 27 s.h. in foundation-level courses and 33 s.h. in advanced courses. All students must earn a minimum of 36 s.h. after admission to the M.S.W. program. Credit toward the M.S.W. may be applied from previous graduate coursework if specific criteria are met.

All M.S.W. students follow a structured sequence of courses. They must obtain permission to revise their plan, and they must complete the degree within a maximum of four years.

The specific mission of the M.S.W. program is to prepare social workers for leadership in the profession and for advanced social work practice in one of two concentrations. Both concentrations allow students to develop advanced skills to work with families and communities and advocate for social change. The two concentrations of the program, family-centered practice and integrated practice, teach students knowledge and skills to work with children, elders, families, small groups, organizations, and communities. The program provides students the opportunity to develop the competencies necessary for leadership in addressing the unique challenges of the state of Iowa, including a large proportion of elders, recent immigrants to rural communities, and rural poverty.

The M.S.W. program helps students develop high levels of skill in applying the values and ethics of the social work profession to complex ethical issues. The program has a strong liberal arts focus, and the research mission of the University ensures students learn about faculty research, critical thinking, analytic and scientific ways of thinking, and practice and program evaluation. While students are not required to

declare a field of practice, opportunities to specialize are available in fields such as aging, end-of-life care, school social work, child welfare, trauma-informed practice, social work in health and mental health settings, and many others.

The school offers the M.S.W. program on the University's Iowa City campus and at three learning centers: Des Moines and Sioux City, Iowa, and the Quad Cities area of Iowa and Illinois (see "M.S.W. Off-Campus Learning Centers" below). In addition, the M.S.W. program is now available as a hybrid (online) program. Each learning center provides the required structured sequence of courses and includes opportunities for students to individualize their plans of study. All sites give students access to the resources of a very high research activity university (R1/VH Research University).

The full-time M.S.W. program is completed in five semesters, beginning in fall and including a summer session. Full-time students complete the degree in the spring semester of their second year. Students whose degree requirement is 48 s.h. may enroll full-time or part-time their first year, following the sequenced plan.

Full-time study and a four-year part-time program are available in Iowa City and Des Moines. A three-year sequence of courses is available at all sites, although the Sioux City and Quad Cities sites admit new entering classes only on a three-year cycle. The hybrid program admits students every other year and is a three-year program.

Following are course sequences for full-time and part-time 60 s.h. programs, full-time and part-time 48 s.h. programs, and the 41 s.h. full-time program. For more information on the family-centered practice or integrated practice concentration areas a student can choose as part of each degree program, see "Concentrations" below.

- Two-Year (60 Semester Hour) Full-Time Program [p. 1001]
- Three-Year (60 Semester Hour) Full-Time Program [p. 1001]
- Four-Year (60 Semester Hour) Part-Time Program [p. 1002]
- Two-Year (48 Semester Hour) Full-Time Program [p. 1002]

Total Hours		41

¹ Students must take one of these concentration courses twice for 5 s.h. each.

Concentrations

In the advanced year of the master's program, students choose one of two concentrations: family-centered practice or integrated practice. These advanced specialized curricula build on the school's liberal arts perspective and on the professional foundation. Both are based on a comprehensive eco-systemic theoretical perspective, and both apply the principles that are part of the school's mission statement, with a focus on culturally competent family-centered and community-based approaches.

Family-Centered Practice

The family-centered practice concentration teaches knowledge and skills necessary for advanced social work practice with individuals and families. These include clinical practice methods that mobilize and develop clients' coping skills, empowering them to manage difficult situations, and culturally sensitive methods for collaborating with clients, their families, and other professionals in planning interventions. Students also learn about advocating for clients, facilitating client self-advocacy, coordinating services to meet multiple needs, and influencing social policy on behalf of clients.

The concentration prepares students to work with individuals and families at appropriate levels of intensity, mobilize existing strengths, and enhance coping skills. Using principles of family-centered practice, students learn to take community and larger systems into account while working in partnership with individuals and families in all aspects of assessment and intervention planning. The concentration emphasizes sensitivity to a variety of family forms and to cultural diversity within family forms. Family is broadly defined to include step families, single-parent families, same-sex-couple families, grandparent-as-parent families, adult parent-adult child families, and traditional forms of families.

Integrated Practice

The integrated practice concentration teaches methods of advanced practice that empower organizational and community change at multiple system levels. Students learn skills for assessment, planning, and direct intervention in larger systems such as neighborhoods, social support networks, and service delivery systems, and for policy making. They develop skills for a broad range of interventions, including direct practice, case management, community education, community development and practice, management and administration, organizational and interorganizational planning and program development, team building, organization and program evaluation, and social policy advocacy. They also learn culturally sensitive methods to collaborate with families and communities; identify

strengths, assets, and challenges; and develop services and programs that will meet clients' needs.

Building on strengths and assets of organizations and communities, students learn how to mobilize community members in advocacy and change efforts—skills useful for case managers, service coordinators, supervisors, program planners and developers, and administrators. Students also learn how to apply advanced skills to advocacy, community assessment, planning and mobilizing resources, and influencing social policy.

The concentration prepares students for practice in varied settings, including hospitals and community health programs, schools, mental health centers, neighborhood and family resource centers, community- and family-based community service agencies, correctional facilities, and programs that serve the elderly, both in the community and in care facilities. In many of these settings, social workers work as interdisciplinary team members and team leaders within organizations. They also collaborate with community organizations, community residents, and service providers. Many social workers are involved in staff supervision, program development, and agency administration. Content areas include grant writing; intervention in multiple systems, including team and network building; policy practice; and design of evaluation methods for client assessment and program evaluation.

M.S.W. Off-Campus Learning Centers

The School of Social Work delivers the M.S.W. curriculum to four learning centers: in Des Moines and Sioux City, Iowa; the Quad Cities area of Iowa and Illinois; and as a hybrid (online) program. Each learning center is administered by the School of Social Work in cooperation with Distance and Online Education. Social work faculty members teach required courses at each center and are available for student advising. The off-campus programs have been evaluated by the Council on Social Work Education and the University of Iowa Graduate Council as providing a program comparable to that available on the Iowa City campus.

Courses at each off-campus site are taught in classrooms by tenure-track, clinical, visiting, and adjunct faculty members. Instructional connections between sites are maintained through varied technologies, including computer-based instruction.

For program entry and application dates, contact the School of Social Work.

Des Moines

The M.S.W. program in Des Moines, in central Iowa, offers courses sequenced to accommodate both part-time and full-time study. Students may complete the entire degree program at the Des Moines center, although they may choose to travel to Iowa City for selected elective courses offered during the summer. Classes are held at the John and Mary Pappajohn Education Center.

Quad Cities

Students in the Quad Cities part-time program can complete their degree entirely off campus and online with the exception of some electives, which they can take during summer sessions in Iowa City. The School of Social Work offers this part-time program to a cohort admitted once every three years. In addition to the part-time cohort students, there are

some full- or part-time students from Iowa City in practicum in the Quad Cities. The Quad Cities program is located in the Davenport/Bettendorf area on Iowa's eastern border, and courses are offered at Scott Community College.

Sioux City

The Sioux City part-time program is nearly identical to the Quad Cities part-time program. Most courses are offered in classroom space at Briar Cliff University in Sioux City, Iowa.

Hybrid (Online)

The M.S.W. hybrid program is designed for students who live in Iowa or bordering states and who, because of geography or life circumstances, cannot access the Sioux City, Des Moines, Quad Cities, or Iowa City learning centers. Students in this program attend evening classes in real time using video conferencing, and asynchronous classes in which coursework is done independently, adhering to deadlines. A mandatory two- or three-day summer institute is held in Iowa City each August. Courses are scheduled over a three-year period and new applications are accepted every other year. All hybrid students take the integrated practice concentration.

Combined Programs

M.S.W./Ph.D.

The school offers a Master of Social Work/Doctor of Philosophy program in social work for students who have completed coursework in research and statistics and have postbaccalaureate experience related to social work practice. The program permits students to apply a limited amount of credit toward both graduate degrees, reducing the time required to graduate. Individuals must apply to the M.S.W. program and the Ph.D. program; applications are reviewed by the admissions panels of both programs. For more information, contact the School of Social Work.

Programs with Other Colleges

The School of Social Work collaborates with other colleges to offer combined degree programs. Each program permits students to apply up to 12 s.h. of graduate credit toward both degrees, reducing the time required to graduate.

Applicants must apply to each program separately and be admitted to each one before they may be admitted to the combined degree program. Information about the combined programs is available from the School of Social Work's program administrator.

M.S.W./M.S. in Urban and Regional Planning

The School of Social Work along with the School of Planning and Public Affairs offer the combined Master of Social Work/Master of Science in urban and regional planning. For more information, see the M.S. in urban and regional planning [p. 1622] (Graduate College) in the Catalog.

M.S.W./M.B.A. (Professional Program)

The School of Social Work and the Tippie College of Business offer the combined Master of Social Work/Master of Business Administration programs. For more information, see the M.B.A. Professional Program [p. 1227] (Tippie College of Business) in the Catalog.

M.S.W./J.D.

The School of Social Work collaborates with the College of Law to offer the combined Master of Social Work/Juris Doctor programs. For information about the J.D., see Juris Doctor, J.D. [p. 1650] (College of Law) in the Catalog.

Admission

The School of Social Work seeks to maintain a heterogeneous student body by enrolling students who represent diverse backgrounds and cultural perspectives. Previous experience in human services and cross-cultural experiences is desirable. The school does not grant academic credit for life experience or previous work experience.

Admission to the M.S.W. 60 s.h. program requires a bachelor's degree from an accredited college or university, with a reasonable distribution of courses in the liberal arts and sciences (the humanities and the social, behavioral, and biological sciences). Admission to the M.S.W. 48 s.h. program requires a bachelor's degree in social work from a CSWE-accredited college or university. Applicants must have an undergraduate g.p.a. of 3.00 or higher, or a g.p.a. of 3.00 or higher on 12 s.h. of letter-graded graduate coursework; consult the University's Office of Admissions for assistance in calculating grade-point average. Competence on personal computers and spreadsheet applications is required.

Admission to the 41 s.h. program requires a bachelor's degree in social work from a CSWE-accredited program, earned within the previous five years, with a cumulative g.p.a. of at least 3.20 and a major g.p.a. of at least 3.50.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

Applicants must submit three letters of recommendation, including one regarding academic abilities and one from the applicant's most recent employer (if the employment was social work-related); and a personal statement addressing criteria specified by the School of Social Work. Applicants to the 41 s.h. program must provide additional materials.

Applications for the 48 s.h. and 60 s.h. programs are accepted beginning September 1 and must be completed by February 1 to be considered for the next academic year. Applications for the 41 s.h. program are due December 1.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

For a complete list of graduate admission policies, contact the School of Social Work.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Master of Social Work, M.S.W.

SSW:7298 or SSW:7294	Advanced Practicum Seminar in Integrated Practice II or Advanced Practicum Seminar in Family-Centered Practice II	1

Students may opt to apply and take the Iowa Licensure Exam

Degree Application: Students apply for graduation for May

Hours	6-7
Total Hours	55-63

^a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

^b Students take a total of 11 elective credits over the course of this 8 semester plan (these may include approved graduate transfer credits); work with the program administrator or faculty advisor

Financial Support

Students seeking financial assistance should apply for aid through the University of Iowa Office of Student Financial Aid. Students may apply for a limited number of research and teaching assistantships available from the School of Social Work. Application materials for research or teaching assistantships are available from the school each spring, or as positions become available. Aid received through the Office of Student Financial Aid does not preclude students from consideration for aid through the School of Social Work.

Career Advancement

Professional social workers are found in every facet of community life—in schools, health settings (such as hospitals, hospice, skilled care facilities, substance abuse treatment, mental health clinics), senior centers, elected office, private practices, prisons, military, corporations, and in numerous public and private agencies that serve individuals and families in need. Many also serve as social and community service directors.

According to the Substance Abuse and Mental Health Services Administration (SAMHSA), professional social workers are the nation's largest group of mental health services providers. There are more clinically trained social workers—over 200,000—than psychiatrists, psychologists, and psychiatric nurses combined. Federal law and the National Institutes of Health recognize social work as one of five core mental health professions.

The U.S. Department of Veterans Affairs employs more than 10,000 professional social workers. It is one of the largest employers of M.S.W. individuals in the United States. More than 40 percent of all disaster mental health volunteers trained by the American Red Cross are professional social workers. There are hundreds of social workers in national, state and local elected office.

Projected growth in social work jobs is estimated to be greater than average for all occupations (Bureau of Labor Statistics).

Today, almost 50 special interest organizations contribute to the vitality and influence of the social work profession. There are social work groups for educators and researchers, as well as organizations for practitioners in health care leadership, nephrology, oncology, child welfare, schools, prisons, courts, and many other settings.

Social Work, Ph.D.

Requirements

The Doctor of Philosophy program in social work prepares students to conduct research that contributes to the knowledge base of social work, to become leaders in the profession, and to teach social work in postsecondary educational institutions.

Students are required to earn 82 s.h. to earn the degree. Those who enter the program with a M.S.W. are granted 30 s.h. credit; they must complete an additional 52 s.h. for the degree. Individuals with master's degrees in related disciplines (for example, psychology or sociology) may choose to earn a Ph.D. in social work without first earning the M.S.W. Credit from a related master's degree may be applied to the Ph.D. degree program, as determined by the School of Social Work.

Students complete required coursework, research, and teaching practicums; pass a comprehensive exam; write a dissertation; and defend it in an oral exam. Their work includes courses in one of four outside disciplines—sociology, psychology, public health, or education—to assist them in preparation for the comprehensive examination and dissertation defense.

Individualized and Interdisciplinary Curriculum

The program allows students to develop a coherent program of study with opportunities to pursue their own scholarly interests. These interests are pursued through a core social work curriculum, a concentration (sociology, psychology, education, or public health) and a social work focal area (e.g., family violence). Students may take focal area courses in any college or department at the University of Iowa. The median time to complete the degree is four years.

The School of Social Work provides a supportive environment with substantial opportunities for mentoring and interaction with faculty members. Throughout Ph.D. studies at the University of Iowa, the school assists students in developing a program of study based on their unique educational and career goals. There are many opportunities to work closely with faculty members in a mentoring environment. In the first year, students complete a mentored research practicum with a faculty member and a mentored in-class teaching experience. During the second year, students choose a faculty member to guide them through the comprehensive examination and dissertation process.

Admission

To ensure that all doctoral students receive mentoring, the School of Social Work typically admits three or four students annually; approximately 35 percent of applicants are admitted.

Admission Requirements

Students are required to have a bachelor's degree from an accredited college or university, and a minimum undergraduate g.p.a. of 3.00 (on a 4.00 scale).

Students should have completed an introductory statistics course (including graphing techniques for presenting data,

descriptive statistics, correlation, introduction to regression, prediction, logic of statistical inference, elementary probability models, estimation and tests of significance) with a grade of B or higher. Research methods courses taken in a M.S.W. program typically do not meet the criteria for an introductory statistics course. Applicants who have not taken an introductory statistics course must complete one before beginning the M.S.W./Ph.D. or the Ph.D. program. Under unusual circumstances, a highly qualified applicant may be conditionally admitted into the program without a statistics course, if they have a high score on the quantitative section of the GRE or if they have taken other mathematics courses. Regardless, applicants still must successfully complete an introductory statistics course the spring or summer semester prior to beginning the M.S.W./Ph.D. or the Ph.D. program.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

Applicants applying only to the Ph.D. program are required to have a M.S.W. or a master's degree in a related field, such as public policy, public health, sociology, psychology, political science, economics, education, nursing, or anthropology.

Admission and Selection Process

Applications are accepted beginning September 1 for the following academic year; applications are due February 1. Admission decisions are made in February. Typically, all applications are evaluated on the same day. Applicants are notified, in writing, of the decision by April 1. In some years, there may be a waiting list. If applicants are placed on the waiting list, they are notified of this decision by April 1.

The school evaluates applicants based on their potential to independently conduct and disseminate scholarship that contributes to policy or practice and on their potential to prepare students to educate future social workers. Occasionally, an applicant who has been declined is encouraged to reapply in a subsequent year.

Financial Support

The School of Social Work provides full-time students with a competitive, multiyear financial package (full tuition, an assistantship, a health and dental insurance allowance). It also provides fellowships, travel awards and dissertation awards.

In addition to funding provided by the School of Social Work, applicants may be eligible for financial assistance through the Graduate College, other departments at the University of Iowa, and organizations outside the University. The director of the Ph.D. program works with students to identify sources of funding, and the Division of Sponsored Programs as well as a student's mentor helps the student apply for external funding.

The Graduate College awards fellowships to incoming students, dissertation-year fellowships, summer fellowships, and travel awards. The School of Social Work applies to the Graduate College to secure these awards at the time applicants are selected into the program. The Graduate College website contains a complete list of awards.

Career Advancement

According to the National Association of Social Workers, there is no better time to consider furthering one's education and

obtaining a doctorate. Increasingly, there are more openings for social work faculty than there are graduates of Ph.D. programs. To learn more about the academic job market, see the Council on Social Work Education (CSWE) career center. The CSWE posts jobs year round, although most new ads for teaching and research positions are posted between August and November.

Graduates become leaders in education, research, and government. All of the Ph.D. graduates from the University of Iowa's School of Social Work program have obtained employment within one year of graduation. Of these, about 75 percent of graduates obtain teaching or research positions, and about 25 percent obtain policy, administrative, or practice positions.

To learn more about some of the recent graduates' careers, visit the School of Social Work website.

Sociology and Criminology

Chair

- Jennifer Glanville

Director, Graduate Studies

- Steven Hitlin

Director, Undergraduate Studies

- Mary C. Noonan

Undergraduate majors: criminology, law and justice (B.A., B.S.); sociology (B.A., B.S.)

Undergraduate minors: criminology, law and justice; sociology

Graduate degrees: M.A. in sociology; Ph.D. in sociology

Faculty: <https://clas.uiowa.edu/sociology/people>

Website: <https://clas.uiowa.edu/sociology/>

The Department of Sociology and Criminology offers undergraduate majors and minors as well as graduate degree programs. The department partners with the Departments of Economics, Philosophy, and Political Science to offer the undergraduate major in ethics and public policy, an interdisciplinary program administered by the Department of Philosophy; see Ethics and Public Policy [p. 472] in the Catalog. In addition, it offers courses that undergraduate students in all majors may use to fulfill GE CLAS Core [p. 20] requirements, and a sociology and a criminology, law and justice First-Year Seminar designed for entering undergraduate students.

Certificate

Social Science Analytics

The growth of big data and informatics calls for a new set of skills for social science students and an increased understanding of the logic of data collection and analysis. The certificate focuses on the application side of data analysis and allows focus to be on the specific research methods and quantitative skills using data-driven methods effective for more understanding in an increasingly complicated social-political world. The certificate offers an opportunity for interdisciplinary training on how data can be used to address important questions in the social sciences. The Department of Sociology and Criminology collaborates with the Departments of Geographical and Sustainability Sciences, Political Science, and Statistics and Actuarial Science to offer the undergraduate program in social science analytics; see the Certificate in Social Science Analytics [p. 987] in the Catalog.

Programs

Undergraduate Programs of Study

Majors

- Major in Sociology (Bachelor of Arts) [p. 1018]
- Major in Criminology, Law and Justice (Bachelor of Arts) [p. 1023]
- Major in Sociology (Bachelor of Science) [p. 1027]

- Major in Criminology, Law and Justice (Bachelor of Science) [p. 1032]

Minors

- Minor in Sociology [p. 1036]
- Minor in Criminology, Law and Justice [p. 1037]

Graduate Programs of Study

Majors

- Master of Arts in Sociology [p. 1038]
- Doctor of Philosophy in Sociology [p. 1039]

Facilities

Crime and Justice Policy Research Program

The Crime and Justice Policy Research Program conducts research on the causes and consequences of crime, interpersonal violence, and antisocial behavior. The program also considers the implementation and implications of public policies designed to prevent and control criminal offending.

Center for the Study of Group Processes

The Center for the Study of Group Processes (CSGP) has an 18-room small-group laboratory with eight computer-controlled subject rooms that provide audiovisual and psychophysiological recording capabilities, two large-group rooms with an adjoining observation room, an audiovisual control room, and other flexible research office spaces.

Courses

- Sociology Courses [p. 1010]
- Criminology, Law and Justice Courses [p. 1015]

Prerequisites for courses are listed in the course descriptions.

Sociology Courses

SOC:1000 First-Year Seminar **1-2 s.h.**

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

SOC:1010 Introduction to Sociology **3-4 s.h.**

How individuals are organized into social groups, ranging from intimate groups to bureaucracies, and how these influence individual behavior; nature and interrelationships of basic social institutions (family, education, religion, economy). GE: Social Sciences.

SOC:1022 Social Justice and Social Welfare in the United States **3 s.h.**

Historical development of social welfare and social justice in the United States; individual values and ethics; role and responsibilities of enhancing society; contemporary practice to address social injustices including poverty, discrimination, various forms of violence; small group discussions and debates of various issues to allow for an exchange of diverse views and perspectives; volunteer work. GE: Values and Culture. Same as SSW:1022.

SOC:1030 Contemporary Social Problems 3-4 s.h.

Emergence and distribution of selected social problems; alternative solutions; may include population, inequality, female-male relationships, racism, crime. GE: Diversity and Inclusion.

SOC:1219 Big Ideas: Equality, Opportunity, and Public Policy in America 3 s.h.

Examination of major social issues and challenges faced by nation, state, and communities; what government's role is in a democratic society; how we decide when, where, and how government acts in ways consistent with social goals and values; focus on pressing social issues (i.e., education, inequality, labor standards, health care); historical development of the problem or policy; ways we address social issues; effectiveness of current policies and alternative policies; ways in which social science contributes to policy design and assessment. GE: Social Sciences. Same as HIST:1219.

SOC:1220 Principles of Social Psychology 3-4 s.h.

Introduction to a range of theories that seek to explain behavior of people within their groups, and dynamics between groups, at various levels of society. GE: Social Sciences.

SOC:1310 Gender and Society 3 s.h.

Role and status of women in society; sex differences, sex role socialization, theories about origin and maintenance of sexual inequalities, changes in social life cycle of women, implications for social institutions and processes; focus on contemporary United States. GE: Values and Culture. Same as GWSS:1310.

SOC:1420 Law and Society 3 s.h.

Exploration of how society shapes the law and how law shapes the society; definitions and conceptualizations of law; social origins of law; roots of compliance with or deviance from law; legal consciousness and uses of law in everyday life; effect of law on social inequality and distribution of power; law as a venue and a tool for social change.

SOC:1630 The Racial Wealth Gap: Black Debt, White Debt 3 s.h.

Exploration of extent, historical origins, and contemporary factors of the racial wealth gap with special attention to role of debt in U.S. race relations; potential topics include education debt, monetary sanctions in criminal justice, redlining, recession, bankruptcy, and reparations. Same as AFAM:1630.

SOC:1670 Popular Culture and Society 3 s.h.

Explore trends in popular culture through a sociological lens; use examples from popular culture to discuss broader social issues, including interaction between members of different social groups and patterns of social inequality; topics include definitions of popular culture, advertising and branding, rise of reality television, fashion, museums and the consumption of "high culture" clubs and nightlife, social significance of hip hop music, and the impact of social media on everyday life; guest speakers, visits to local cultural venues, and screenings of television shows and films.

SOC:2064 Racial Inequity and the Experiences of African American Families in the U.S. 3 s.h.

Racial inequality and experiences of African American families in the U.S. during 20th and 21st centuries; historical context for contemporary research on African American family; relative impact of structural and cultural factors on various aspects of African American family life, declining marriage rates, family formation patterns; intersections of race and class in family life; research methods used to examine dynamics of African American family life, including quantitative analysis, structured qualitative interviews, and ethnography. GE: Diversity and Inclusion. Same as AFAM:2064.

SOC:2130 Sociological Theory 3 s.h.

Theoretical perspectives in sociology; construction, evaluation of sociological explanations. Prerequisites: SOC:1010 or SOC:1030 or SOC:1310 or CRIM:1410 or SOC:1420.

SOC:2160 Applied Statistics for Social Scientists 3 s.h.

Applied statistics for sociology majors: frequency distributions, graphic presentation, measures of central tendency, measures of variability, elementary probability, populations and samples, sampling distributions, estimation and confidence intervals, hypothesis testing, chi-square test, regression and correlation, analysis of variance; computer software used in data analysis; emphasis on appropriate use and interpretation of statistics in the study of sociological topics. Recommendations: sociology major.

SOC:2170 Research Methods 3 s.h.

Basic scientific concepts; emphasis on theoretical thinking, statement of researchable propositions, logic and meaning of proof operant in the research process; general issues in designing social research, including problems of sampling and measurement, analysis, presenting research data, interpreting research findings. Prerequisites: SOC:1010 and (PSQF:4143 or STAT:1020 or STAT:2010 or SOC:2160 or STAT:3510 or STAT:1030). Requirements: sociology major.

SOC:2710 The American Family 3 s.h.

Structure and process; change over the life cycle; interrelations with other institutions; historical changes; variations by social class and ethnic group. GE: Values and Culture.

SOC:2770 Environmental Racism: Black and White Community Politics 3 s.h.

Students study the movement for environmental justice within the broader context of U.S. land use and development to understand environmental racism's prevalence and how it can be addressed; topics include pollution, health, food access, transportation and agricultural practice to land loss, public space, and infrastructure; exploration of perspectives on the environment and environmentalism. Same as AFAM:2770.

SOC:2810 Social Inequality 3 s.h.

Major theoretical perspectives for understanding inequality in economics, power, prestige; the magnitude of social inequality in the United States; sex and race inequality; trends in and causes of social mobility; selected consequences of social inequality. GE: Values and Culture.

SOC:2830 Race and Ethnicity 3 s.h.

Multidisciplinary study of intergroup relations, with emphasis on historical, sociological, and social psychological issues in the study of American minority groups. GE: Diversity and Inclusion.

- SOC:3100 Critical Race Theory: Culture, Power, and Society** 3 s.h.
Examination of the historical context of race and racism in U.S. history; focus on how social structures perpetuate longstanding patterns of racial inequality. Same as AFAM:3100, AMST:3100.
- SOC:3110 Race, Organizations, and Workplace** 3 s.h.
Examination of racial discrimination in the American workplace and organizations; historical context for development of complex organizations; various forms of racial discrimination; longstanding patterns of racial inequality central to American organizations. Same as AFAM:3110.
- SOC:3170 Applied Research** 3 s.h.
Ongoing research project investigating the Flint water crisis; organization and analysis of emails for sociological research purposes and ultimately to create a searchable website for public access to the data; how to construct and analyze a "big data" data set in an interdisciplinary collaborative research setting; how to apply and build sociological theory with empirical data; how to write an academic journal article. Prerequisites: SOC:2170 or CRIM:2470.
- SOC:3171 Drugs and Society** 3 s.h.
How people use drugs for recreation, performance enhancement, and medical treatment; implications for drug control, treatment, and public policy.
- SOC:3200 International Perspectives: Xicotepec 1-3** 3 s.h.
Interdisciplinary service-learning course; Mexican culture and history through community-based service project, assigned readings, and discussion; includes a required spring break trip to Mexico. Same as CLAS:3200.
- SOC:3220 Sociology of Mental Illness** 3 s.h.
The socially constructed nature of mental illness; theoretical perspectives and research on social antecedents and social consequences of mental health. Prerequisites: SOC:1010 or SOC:1220 or SOC:1030.
- SOC:3510 Medical Sociology** 3 s.h.
Theoretical perspectives and research on social precursors and consequences of physical and mental health ailments; focus on contemporary United States with cross-cultural comparisons; stereotypes and diagnosis, gender and racial/ethnic differences, health inequalities related to socioeconomic status.
- SOC:3525 Public Opinion** 3 s.h.
Role in making public policy; formation, change of political attitudes and opinions; political ideology; measurement of public opinion; how opinion polls are conducted; experience with interviewing and conducting public opinion research. Same as POLI:3204.
- SOC:3610 Organizations and Modern Society** 3 s.h.
Approaches to the sociological study of economic and noneconomic organizations; the role of power and authority within the organization, and between the organization and its environment. Prerequisites: SOC:1220 or SOC:1010.
- SOC:3630 The Racial Wealth Gap: Black Debt, White Debt** 3 s.h.
Exploration of extent, historical origins, and contemporary factors of the racial wealth gap with special attention to role of debt in U.S. race relations; potential topics include education debt, monetary sanctions in criminal justice, redlining, recession, bankruptcy, and reparations. Same as AFAM:3630.
- SOC:3650 Education, Schools, and Society** 3 s.h.
Overview of sociology of education; historical and current sociological perspectives on education; race, class, and gender inequality in schooling; higher education; contemporary debates in education (e.g., affirmative action, school choice). Prerequisites: SOC:1030 or SOC:1010.
- SOC:3750 Born in the USA: Fertility and Reproduction** 3 s.h.
Exploration of when, why, how, and with whom Americans bear children; comparison to other developed and developing countries in the world; infertility and its treatments; ethics of surrogacy; voluntary childlessness; rapid rise of nonmarital childbearing in the U.S. and other countries; politics of childbirth; declining populations; rapid aging of rich where women have basically stopped having children. Same as GWSS:3750.
- SOC:3880 The Sociology of Networks** 3 s.h.
Introduction to the basic properties of network structure (e.g., density, mutuality, cliques); substantive insights regarding the role and consequences of networks in social life; the role of networks in job searching/hiring processes; how innovations diffuse through networks; and relationships as social resources. Prerequisites: SOC:1010 or SOC:1030.
- SOC:4000 Data Science for Social Good** 3 s.h.
The availability of big data transforms the way we solve difficult social problems; programming and analytical skills to analyze data from social media and open-access administrative data sources; basic principles and skills in data science including how to collect, clean, curate, and manipulate data, simple statistics, and computational methods; emphasis on linking big data to real world social problems and social science insights; students learn problem-solving skills and a data-driven approach to contemporary social problems. Prerequisites: SOC:2160 or POLI:3000 or STAT:3120 or IGPI:3120 or CS:1210.
- SOC:4200 Sociology of Religion** 3 s.h.
Introduction to the study of religion from a sociological perspective; religions exist in social contexts, are shaped by contexts in which they are embedded, and then often change those social contexts; to understand the relation between religions and other social systems, we must examine the sociological as well as the historical, anthropological, social psychological, and political impacts; students will study religious organizations critically and objectively, exploring and debating classical sociological theories pertaining to religions, as well as contemporary theories that predict religious behavior; social scientific perspective will be presented.
- SOC:4210 Social Psychology of Small Groups** 3 s.h.
Internal processes governing small groups (e.g., friendship cliques, families, the president's cabinet, committees); how small groups relate to the larger social environment; groups' impact on their members. Prerequisites: SOC:1030 or SOC:1010.
- SOC:4225 The Social Psychology of Leadership** 3 s.h.
Techniques, proven by research, that enhance students' ability to know, work with, and lead people; recent research in social psychology, how it applies to practical leadership problems.
- SOC:4230 Sociology of Self-Improvement** 3 s.h.
How self-improvement as a cultural goal shaped development of political, business, educational, and religious institutions in the United States; history of self-improvement movement and industry; selected readings that show how much self-improvement is possible and which techniques are more useful than others.

- SOC:4540 Political Sociology and Social Movements** 3 s.h.
Social unrest; crowd behavior; social movements treated as a form of social change. Prerequisites: SOC:1030 or SOC:1010.
- SOC:4680 Corruption: The Social Scientific Perspectives** 3 s.h.
Social scientists and policy makers alike recognize corruption as an obstacle to economic development, democratic governance, and human rights around the world; students survey recent research from sociology, criminology, political science, and anthropology that addresses causes and consequences of corruption; why individuals engage in corrupt behavior, how organizations affect patterns of corrupt transactions, and how rates of corruption impact and are impacted by political regimes; consequences that corruption has for social inequality, civic mobilization, lives of women and immigrants, and stability of autocratic governments. Same as CRIM:4680.
- SOC:4800 Research Practicum in Sociology** 1-3 s.h.
Students engage in a sociological research activity that is not related to an honors project, conducted under the supervision of (or in collaboration with) a faculty member.
- SOC:4820 Sociology of Sexuality** 3 s.h.
Sociological perspectives on sexuality, including theoretical and conceptual developments, empirical regularities, and social implications; sexual expression in the United States. Prerequisites: SOC:1010 or SOC:1030. Same as GWSS:4820.
- SOC:4900 Selected Topics in Sociology** 3 s.h.
Topics vary.
- SOC:4902 Selected Topics in Family, Health, and Well-Being** 3 s.h.
Varied topics in family structures and practices; social institutions and forces that shape or are shaped by families.
- SOC:4903 Selected Topics in Organizations, Networks, and Careers** 3 s.h.
Varied topics in macro- and micro-level processes affecting ability to understand and manage organizations, including the groups and individuals that compose them.
- SOC:4909 Graduation Portfolio** 0 s.h.
Submission of final graduation portfolio first assembled in capstone course required for sociology major. Corequisites: SOC:4910.
- SOC:4910 Capstone Course in Sociology and Criminology** 3 s.h.
Senior project illustrating student's accomplishments during the undergraduate career; prepared in collaboration with sociology faculty member or other experts in the student's area of sociological interest; record for student's own reflection, information for potential employers and graduate programs. Prerequisites: SOC:2130 and (SOC:2170 or CRIM:2470). Requirements: major g.p.a. of 2.00.
- SOC:4920 Social Services Organization Internship** 3 s.h.
Student volunteer work with social services organizations. Prerequisites: SOC:1010 with a minimum grade of C or SOC:1030 with a minimum grade of C or SOC:1310 with a minimum grade of C or SOC:2810 with a minimum grade of C. Requirements: sociology major or minor, and junior standing.
- SOC:4930 Teaching Internship** 3 s.h.
Experience providing supervised support for instructors teaching basic courses in sociology. Requirements: appointment as sociology undergraduate teaching aide.
- SOC:4990 Directed Individual Study** arr.
- SOC:4997 Honors Seminar** 1 s.h.
Topic development for senior honors projects. Offered spring semesters. Requirements: sociology honors standing.
- SOC:4998 Honors Research** arr.
Research projects under faculty supervision.
- SOC:5110 History of Sociological Theory** 3 s.h.
Ideas of major 19th- and 20th-century social thinkers (e.g., Marx, Weber, Durkheim, Simmel, Mead).
- SOC:5130 Sociology of Education** 3 s.h.
Effects of school and school organization on educational outcomes; course-taking patterns and tracking, desegregation, differences in school sector; focus on entire span of student's academic career; examination of school and organizational effects at the primary, secondary, and postsecondary levels of education. Same as EPLS:5130.
- SOC:5160 Research Design and Methods** 3 s.h.
Research designs; sampling designs and techniques; questionnaire construction, interviewing techniques; participant and nonparticipant observation; coding and preparation of data for analysis; measurement techniques, reliability, and validity. Requirements: SOC:6170 or graduate standing.
- SOC:5165 Race, Class, and Gender Inequalities in Education** 3 s.h.
Role of ascribed characteristics (e.g., race, class, gender) on educational opportunities and outcomes; achievement gaps, school desegregation, social and cultural capital, peer influence, family attributes, neighborhood influence, influence of significant others, course-taking patterns, and educational destinations. Same as EPLS:5131.
- SOC:5310 Gender Theory** 3 s.h.
Introduction to sociological analysis of gender; multiple ways that gender patterns the social world in which we live; predominant theoretical stances related to study of gender; how gender structures everyday social interaction; how social institutions (e.g., work, family) give rise to and recreate gendered meanings, expectations, structures; possibilities for interventions and change to gender system.
- SOC:5510 Sociology of Health** 3 s.h.
Overview of relevant theories and related research in sociology of health field; topics related to social construction of health and its historical variation; focus on social determinants of health including social stressors, labeling processes, cross-cultural differences, and epigenetics or social genomics.
- SOC:5680 Sociology of Higher Education** 3 s.h.
Sociological approach to study of higher education; issues of inequality and stratification in higher education; focus on relationship between higher education and larger economic and demographic processes; college access, college destinations, attainment, and returns to a college degree. Same as EPLS:5142.
- SOC:5810 Education and Social Change** 2-3 s.h.
Role of educational institutions, in connection with political and economic structures, in the process of social change; illumination of theories of social change through case studies of educational systems in both less-developed and industrialized nations. Same as EPLS:5210.
- SOC:6080 Master's Thesis** arr.
- SOC:6110 Theory Construction and Analysis** 3 s.h.
Contemporary theoretical issues and nature of theory, theory's place in research, strategies of theory construction. Requirements: sociology graduate standing.

- SOC:6140 Seminar: Selected Topics in Sociological Theory** 3 s.h.
- SOC:6170 Introduction to Sociological Data Analysis** 3 s.h.
Statistical measures for descriptive methods and association; logic of statistical inference, hypothesis testing; background essential to understanding linear models, models for categorical data analysis. Requirements: introductory statistics.
- SOC:6175 Qualitative Methods** 3 s.h.
Logic of qualitative research; basic skills necessary for a qualitative research project. Requirements: sociology graduate standing.
- SOC:6180 Linear Models in Sociological Research** 3 s.h.
Statistical techniques associated with general linear model; emphasis on multiple regression, its generalizations; corresponding computer programs. Requirements: SOC:6170 or graduate standing.
- SOC:6210 Contemporary Approaches to Social Psychology** 3 s.h.
Review and critical analysis of current theoretical approaches and systems of social psychological analysis. Recommendations: sociology graduate standing.
- SOC:6220 Seminar: Selected Topics in Social Psychology** 3 s.h.
Selected theoretical and methodological issues.
- SOC:6264 Post-Industrial Cities** 3 s.h.
Aspects of urban inequality in post-industrial cities; racial inequality, urban poverty, neighborhood inequality, and municipal bankruptcy.
- SOC:6310 Gender Stratification Seminar** 3 s.h.
Occupational gender segregation; gender gap in pay; role of family caregiving in women's lower pay; evaluation of caregiving work; comparable work.
- SOC:6320 Sociology of Religion** 3 s.h.
Introduction to the sociological perspective for studying religion; examination of sociological, historical, anthropological, social psychological, and political impacts of religion on social behavior to understand the complex relation between religious institutions and other social systems; exploration of works by classical sociological theorists, as well as contemporary theories and empirical research that describe, explain, and perhaps predict religious behavior; materials focus on religion in the United States; students who wish to use a cross-cultural perspective in discussions and papers are encouraged to do so.
- SOC:6410 Seminar: Criminological Theories** 3 s.h.
Theories of crime causation and their relationships to the cultures in which they have functioned.
- SOC:6420 Seminar: Selected Topics in Deviance and Control** 3 s.h.
Critical analysis of current research; emphasis on theoretical contributions and methodological foundations.
- SOC:6550 Environment and Society** 3 s.h.
Examination of research at the intersection of society and environment; theories of environmental sociology, politics, and corporate social responsibility; opportunity to develop an understanding of complex relationships between human prosperity and natural environment; development of a micro-, meso-, or macro-level research project (e.g., determinants of environmental attitudes and behaviors, adoption of clean technologies by organizations, outcomes of environmental activism, diffusion of national environmental policies).
- SOC:6610 Complex Organizations** 3 s.h.
- SOC:6810 Social Stratification** 3 s.h.
Classical and contemporary theories; current research on the causes and magnitude of inequality in economics, power, and prestige; social mobility; critical issues in stratification.
- SOC:7010 Teaching Sociology** 2-3 s.h.
Supervised preparation for teaching sociology courses; literature on teaching; course objectives, alternative teaching techniques; preparation of course syllabus, lectures, discussions, exams.
- SOC:7030 Readings and Research Tutorial** arr.
- SOC:7090 Ph.D. Dissertation** arr.
- SOC:7170 Advanced Statistical Modeling of Data** 3 s.h.
Models for analysis of categorical data, including loglinear, logit, related discrete data models. Requirements: advanced graduate standing.
- SOC:7175 Social Science Research: Big Data** 3 s.h.
New opportunities and challenges faced by social science research with the advent of technologies that collect, store, and analyze massive human digital traces; data collection, manipulation, and curation skills; survey of computational methods commonly used in computational social science; different from other big data courses in connecting new data sources to theory-focused social science; emphasis on how to ask research questions informed by data and how to design analytical strategies to answer those questions. Prerequisites: SOC:6170 and SOC:6180.
- SOC:7180 Structural Equation Modeling** 3 s.h.
Overview of structural equation models (SEMs), also known as LISREL models, covariance structure models; specific types of SEMs, such as simultaneous equations and confirmatory factor analysis; intermediate topics.
- SOC:7270 Scholarly Professionalism and Integrity I** 2 s.h.
General introduction to department and discipline for entering graduate students; departmental and graduate college requirements, program and career planning, interaction with faculty members, consideration of student interests and concerns; two semesters beginning in fall. Requirements: sociology graduate standing.
- SOC:7271 Scholarly Professionalism and Integrity II** 2 s.h.
General introduction to department and discipline for entering graduate students; departmental and graduate college requirements, program and career planning, interaction with faculty members, consideration of student interests and concerns. Requirements: sociology graduate standing.
- SOC:7410 Communities and Crime** 3 s.h.
Distribution of crime as rooted in community-level conditions such as concentrated affluence or poverty, racial residential segregation, unemployment, family disruption, and immigration. Requirements: sociology graduate standing.
- SOC:7460 Sociology of Law Seminar** 3 s.h.
Relationship between law and society explored through writings and research of classical and contemporary sociologists and legal scholars. Requirements: sociology graduate standing.
- SOC:7500 Seminar: Topics in Political Sociology** 3 s.h.
Overview of current research in political sociology; topics related to inequality, citizenship, social change, institutions, social movements, political regimes, and globalization; survey of multiple methodological and theoretical approaches.

SOC:7620 Social Network Analysis 3 s.h.

Relational, data-oriented approach to representing linkages or relationships among social units, and to examine the relevance of these social structures in social processes. Requirements: basic multiple regression.

SOC:7820 Seminar: Selected Topics in Social Stratification 3 s.h.

Requirements: social science graduate standing.

Criminology, Law and Justice Courses

CRIM:1000 First-Year Seminar 1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

CRIM:1410 Introduction to Criminology 3 s.h.

Nature and causes of crime; the criminal justice process, correctional treatment, crime prevention. GE: Social Sciences.

CRIM:1447 Introduction to the Criminal Justice System 3 s.h.

Organization and function of criminal justice system in the United States; history, organization, and current practices of policing, criminal courts, and correctional system; sociological and criminological research on major subsystems comprising criminal justice systems.

CRIM:2200 Gender and Violence 3 s.h.

Focus on gendered violence, including violence against women and members of LGBTQ+ communities; relationship between masculinities and violence; ways in which gender, race, ethnicity, age, and social class combine to explain gendered violence; theories and empirical research.

CRIM:2430 Comparative Criminal Justice Systems 3 s.h.

Criminal justice systems around the world; similarities and differences in how justice is defined and operationalized in contemporary legal traditions in terms of police, courts, and corrections examined in light of cultural norms and values; emphasis on link between societal characteristics and legal traditions; differences in defendant rights guaranteed under various legal traditions.

CRIM:2440 Student Practicum in Policing 3 s.h.

Practical application of criminal justice knowledge with physical demonstrations and hands-on exercises; physical participation includes defensive tactics, firearms instruction, and violent intruder training; students journal about student police academy topics and present to faculty. Prerequisites: CRIM:1410 or CRIM:1447. Requirements: background check.

CRIM:2460 Policing in Modern Society 3 s.h.

History, theory, and practice of policing; exploring the link between officer decision making and department expectations; policing subculture; ethical considerations officers face; policing administration; policing/community interaction; legal issues affecting policing practice; contemporary developments in policing emergent crime types.

CRIM:2470 Research Methods in Criminology and Criminal Justice 3 s.h.

Introduction to social science research methods in the fields of criminology and criminal justice; techniques necessary for systematic analysis of research questions and program effectiveness; critical evaluation of existing empirical research and sources of criminal justice data; assessment of data quality. Prerequisites: (STAT:1020 or STAT:1030 or SOC:2160 or STAT:2010 or STAT:3510 or PSQF:4143) and (CRIM:1410 or CRIM:1447).

CRIM:2901 Special Topics in Criminology, Law, and Justice 3 s.h.

Varied topics in criminology, criminal legal system, gender and violence, global criminology.

CRIM:3250 Drugs, Deviance, and Social Control 3 s.h.

Introduction to social reality of drug use, drug users, and attempts to control drug behavior; exploration of relationship to crime and deviance, medicalization, and movements aimed at drugs.

CRIM:3260 Immigration and Crime 3 s.h.

Students are provided with a solid foundation to understanding key issues in immigration-crime debates; central to this is a critical examination of historical trends in immigration and its relationship to crime, media portrayal of immigration and its impact on public sentiment, relationship between immigration and crime at individual and aggregate levels, emergence of crimmigration—or blurring of immigration and criminal justice policies since the 1980s, and social impact of immigration policies including those that relate to deportation and militarization of U.S. borders.

CRIM:3350 Life Course Criminology 3 s.h.

How crime and antisocial behavior develop across the life span from birth onward, and how criminologists utilize methods and concepts of the life course perspective to examine systematic patterns of crime; focus on genetic predispositions, family environments, and biological mechanisms; patterns common to adolescence with considerations of peer settings, community processes, romantic involvement, and school context; examination of the transition to adulthood with emphasis on importance of social institutions, human agency, social change, and relevance of incarceration and criminal justice intervention for offending patterns.

CRIM:3415 Global Criminology 3 s.h.

Crime and the control of crime at the transnational and sub-national levels of analysis; focus on non-U.S. societies; consequences of economic, political, and cultural globalization.

CRIM:3416 Race, Crime, and Justice 3 s.h.

Extent and nature of racial disparities in offending and victimization; interpretation of patterns using various theoretical approaches; examination of race inequalities across many stages of criminal justice process.

CRIM:3417 Community Corrections 3 s.h.

Community corrections; probation, parole, intermediate sanctions (boot camps, intensive supervision, electronic monitoring); contemporary issues in community supervision of offenders.

CRIM:3420 Juvenile Delinquency 3 s.h.

Theories of juvenile delinquency; individual, neighborhood, and societal explanations of delinquency; research on families, schools, peers, neighborhoods, gangs, and delinquency.

- CRIM:3425 Women, Crime, and Justice** 3 s.h.
Overview of women's experiences with crime and criminal justice system, with reference to experiences of men for purposes of comparison; role of race, ethnicity, and poverty in women's experiences; causes of crime, inequalities in police-citizen interactions, imprisonment, and other aspects of criminal justice system experience. Same as GWSS:3425.
- CRIM:3437 American Crime** 3 s.h.
Prevailing issues in criminology; extent and nature of disparities in offending and victimization, interpretation of patterns using various theoretical approaches; evaluation of crime-control policies.
- CRIM:3450 Criminal Legal System** 3 s.h.
Discretionary decision making in U.S. criminal courts from arrest through sentencing; legal and sociolegal issues relevant to each stage of felony adjudication; sociological and social-psychological theories of decision making in adjudication, empirical research testing these theories.
- CRIM:3600 Crime and Public Policy** 3 s.h.
Policies having to do with crime, delinquency, or deviance are often heavily debated; examination of certain crime-related policies including the theories that motivate them, research methods and design used to evaluate them, and prior studies that investigate whether they do, in fact, accomplish stated goals; students engage with a diversity of topics and policies including those dealing with individuals, groups, criminal justice institutions, geographic areas, and more. Prerequisites: CRIM:1410.
- CRIM:4400 Internship in Criminal Justice and Corrections** 3 s.h.
Supervised fieldwork in a criminal justice or correctional agency. Prerequisites: (CRIM:1410 or SOC:1420 or CRIM:1447) and (CRIM:2430 or CRIM:2460 or CRIM:2901 or CRIM:3415 or CRIM:3416 or CRIM:3417 or CRIM:3420 or CRIM:3437 or CRIM:3450 or CRIM:4420 or CRIM:4430 or CRIM:4450 or CRIM:4460 or CRIM:4901). Requirements: criminology, law and justice major or minor, and junior standing.
- CRIM:4410 Treatment Interventions in Corrections** 3 s.h.
Introduction to treatment interventions utilized in the criminal justice system that target some of the special populations seen within the system as a whole; specific populations may include mental health, substance abuse, sex offenders, and domestic violence; emphasis on evidence-based practices and successful program outcomes with focus on identification and discussion of ethical issues and concerns that arise when providing specialized services to this population, as well as the sometimes difficult mixture of treatment and safety/security. Prerequisites: CRIM:1410 or CRIM:1447. Requirements: junior, senior, or graduate standing.
- CRIM:4420 Criminal Punishment** 3 s.h.
Sociological theories and research on criminal punishment; classical and contemporary theories; research on imprisonment and capital punishment.
- CRIM:4430 Interpersonal Violence in Society** 3 s.h.
Extent and nature of interpersonal violence in societies, in general and for specific population subgroups; theoretical explanations for the phenomenon; alternative ways of defining and responding to violence across various social contexts; application of scientific method; relevant literatures from multiple disciplines including sociology, anthropology, criminology, psychology, and behavioral economics; types of violence defined as illegal and those which are deviant but not illegal.
- CRIM:4440 Sociology of White-Collar Crime** 3 s.h.
Critical perspectives on causes and consequences of white-collar crime; definitions and types; criminological, social-psychological, and rational-choice theories; political and economic causes of white-collar crime under capitalism and socialism; rates and patterns of white-collar criminality across different social groups (defined by racial, ethnic, class, and gender attributes); control, prevention, and criminal justice response.
- CRIM:4450 Juvenile Justice: A Sociolegal Perspective** 3 s.h.
Examination of social, historical, and legal foundations of juvenile justice system in the United States; adjudication processes in juvenile justice, transfer of juveniles to criminal court, contemporary juvenile court, community-based corrections programs, legalities of juvenile system; current and future directions in juvenile justice.
- CRIM:4460 Sociology of Law** 3 s.h.
Conceptual, historical, and theoretical issues of law and operation of the criminal justice system; theory and research on law and the criminal justice system.
- CRIM:4470 Communities and Crime** 3 s.h.
Why do some neighborhoods have more crime than others? Why do some neighborhoods see increasing rates of crime over time, while others seemingly do not? Although many crime events occur among individuals, scholars have long noted that crime events tend to cluster in neighborhoods and places where people live; students consider explanations for why this spatial patterning occurs; research methods that have been used to learn about crime in spatial context, classic and contemporary studies of this issue, and approaches to crime prevention that involve focusing on neighborhood or place, rather than simply on individuals. Prerequisites: CRIM:1410 or CRIM:1447.
- CRIM:4680 Corruption: The Social Scientific Perspectives** 3 s.h.
Social scientists and policy makers alike recognize corruption as an obstacle to economic development, democratic governance, and human rights around the world; students survey recent research from sociology, criminology, political science, and anthropology that addresses causes and consequences of corruption; why individuals engage in corrupt behavior, how organizations affect patterns of corrupt transactions, and how rates of corruption impact and are impacted by political regimes; consequences that corruption has for social inequality, civic mobilization, lives of women and immigrants, and stability of autocratic governments. Same as SOC:4680.
- CRIM:4800 Research Practicum in Criminology** 3 s.h.
Students engage in a criminology research activity that is not related to an honors project, conducted under the supervision of (or in collaboration with) a faculty member.
- CRIM:4901 Advanced Topics in Criminology, Law, and Justice** 3 s.h.
Varied advanced topics in criminology, criminal legal system, gender and violence, global criminology.
- CRIM:4930 Teaching Internship** 1-3 s.h.
Students gain teaching experience by providing supervised support for instructors in introductory-level courses in criminology. Requirements: criminology undergraduate teaching aide appointment.
- CRIM:4990 Directed Individual Study** 1-3 s.h.
Students pursue interests not covered in other courses.

CRIM:4998 Honors Research

Honors research projects under faculty supervision.

arr.

Sociology, B.A.

A bachelor's degree with a major in sociology provides a liberal arts and sciences education. Sociology provides a broad foundation for a number of careers that require a deep understanding of human interactions and behaviors. Though broad in scope, sociology can be broken down into many marketable specializations including these at the University of Iowa: family and health services, human relations and business, social psychology, and social and political organization.

The department has an active undergraduate organization, the Sociology and Criminology Club, which is open to all interested students. The student-run group sponsors speakers, films, and career days; conducts study groups; and facilitates group volunteerism.

Learning Outcomes

Students will:

- be able to identify how sociological concepts and theories relate to everyday life,
- possess a critical lens for understanding human behavior and societies,
- articulate the importance of evidence and scientific methods for explanations of social phenomena,
- be able to identify the characteristics of high quality data and methods in sociological research,
- identify disciplinary standards for both the qualitative and quantitative analysis of data, and
- use their sociological knowledge and skills to engage with and impact the world around them.

Requirements

The Bachelor of Arts with a major in sociology requires a minimum of 120 s.h., including at least 36 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 20]. Transfer students must earn at least 18 s.h. in sociology coursework at the University of Iowa; transfer courses must be approved by a sociology advisor.

The major offers two optional tracks for students with an interest in one of the following concentrations: family and health services, or human relations and business.

Requirements for the major are similar for the Bachelor of Arts and the Bachelor of Science, except B.A. students take 3-4 s.h. of statistics, a theory course, and a methods course, while B.S. students take 9 s.h. of advanced statistics and three theory and methods courses.

Choice of a degree program should be dictated by a student's personal career goals. Though not required, students interested in pursuing a graduate program may find the additional math and methods courses helpful.

Students who earn the major in sociology can earn the major in criminology, law and justice. No more than 9 s.h. of major coursework can double count for each of the majors. Students who earn both majors may not complete a minor in either area.

Students who earn the major in sociology may earn a minor in criminology, law and justice. No more than 3 s.h. can double count for the major and minor.

Students who earn the major in sociology may not earn the sociology minor.

In planning to complete the major, students must take courses in the proper sequence. Introduction to Sociology (SOC:1010) is a prerequisite for all required core theory and methods courses. Statistics is prerequisite for the more advanced methods course. These introductory courses lay the foundation for all other work in the major. The recommended sequence for the major's core requirements is SOC:1010, SOC:2130 Sociological Theory, an approved statistics course, and SOC:2170 Research Methods. See the Four-Year Graduation Plan under Academic Plans [p. 1021] in this section of the Catalog.

The B.A. with a major in sociology requires the following work.

Code	Title	Hours
	Introductory Sociology Course	3-4
	Theory, Statistics, and Methods Courses	9-10
	Electives	21
	Capstone Course	3
	Graduation Portfolio	0
	Total Hours	36-38

Introductory Sociology

Code	Title	Hours
This course:		
SOC:1010	Introduction to Sociology	3-4

Theory, Statistics, and Methods

Code	Title	Hours
Both of these (completed as soon as possible):		
SOC:2130	Sociological Theory	3
SOC:2170	Research Methods	3
One of these:		
SOC:2160	Applied Statistics for Social Scientists	3
STAT:1020/ PSQF:1020	Elementary Statistics and Inference	3
STAT:1030	Statistics for Business	4
STAT:2010	Statistical Methods and Computing	3
STAT:3510/ IGPI:3510	Biostatistics	3
STAT:4143/ PSQF:4143	Introduction to Statistical Methods	3

Electives

Students complete 21 s.h. of elective coursework in sociology (prefix SOC). Four of the required electives must be advanced, chosen from sociology courses numbered 3000-4903, SOC:4920 Social Services Organization Internship, or SOC:4998 Honors Research. Two of the four advanced required electives must be taken after (and not concurrent with) the completion of SOC:2130 Sociological Theory, SOC:2170 Research Methods, and an additional approved course from the Theory, Statistics, and Methods list above. Students can use two criminology, law and justice courses (prefix CRIM) toward the electives requirement. With

permission, students may use graduate courses in sociology numbered 5000 or above to satisfy the electives requirement.

The following courses may not be used as electives.

Code	Title	Hours
SOC:1000	First-Year Seminar	1-2
SOC:4800	Research Practicum in Sociology	1-3
SOC:4910	Capstone Course in Sociology and Criminology	3
SOC:4930	Teaching Internship	3
SOC:4990	Directed Individual Study	arr.
SOC:4997	Honors Seminar	1

Capstone Course

All students complete a capstone course, which illustrates their accomplishments and includes assembling a portfolio. Students may take it as early as spring of their junior year, as long as they have completed SOC:2130 Sociological Theory, SOC:2170 Research Methods, and an additional approved course from the Theory, Statistics, and Methods list.

Code	Title	Hours
One of these:		
SOC:4800	Research Practicum in Sociology	3
SOC:4910	Capstone Course in Sociology and Criminology	3
SOC:4920	Social Services Organization Internship	3

Graduation Portfolio

During their last semester, all students enroll in the following course, in which they submit the portfolio they assembled in the capstone course.

Code	Title	Hours
SOC:4909	Graduation Portfolio	0

Tracks

Family and Health Services Track

The family and health services track requires a minimum of 15 s.h. of credit, including 12 s.h. of coursework taken at the University of Iowa. It is open to sociology majors who are interested in understanding family structures and practices, differences between and within families, and those social institutions and forces that shape families or are shaped by them. Additionally, the track cultivates students' understanding of the social context of health, illness, and health care. It is especially well suited for students who are interested in pursuing careers in the fields of social service and health.

Students must satisfy all requirements for the sociology major. They may count courses taken for the track as sociology electives for the major.

The family and health services track requires the following coursework.

Code	Title	Hours
Required Courses		
6 s.h. from these:		
SOC:1310	Gender and Society	3

SOC:2710	The American Family	3
SOC:3510	Medical Sociology	3

Electives

9 s.h. from these:

SOC:2064	Racial Inequity and the Experiences of African American Families in the U.S.	3
SOC:2810	Social Inequality	3
SOC:3220	Sociology of Mental Illness	3
SOC:3171	Drugs and Society	3
SOC:3750	Born in the USA: Fertility and Reproduction	3
SOC:4230	Sociology of Self-Improvement	3
SOC:4820	Sociology of Sexuality	3
SOC:4902	Selected Topics in Family, Health, and Well-Being	3
CRIM:3420	Juvenile Delinquency	3
CRIM:4430	Interpersonal Violence in Society	3

Or select electives from these graduate courses, with approval of instructor:

SOC:6220	Seminar: Selected Topics in Social Psychology (when topic is life course)	3
SOC:6310	Gender Stratification Seminar	3

Students also may choose the remaining required course as an elective

Human Relations and Business Track

The human relations and business track requires a minimum of 15 s.h. of credit, including 12 s.h. of coursework taken at the University of Iowa. It is open to sociology majors who are interested in understanding the macro- and micro-level processes that affect the ability to understand and manage organizations, as well as the groups and individuals that compose them. The track provides intensive training in both theoretical and empirical approaches to organizations, and combines micro-level insights into work groups with macro-level perspectives on the influence of organizations' environments. It is especially well suited for students who are interested in pursuing careers in various services-providing sectors such as business services, educational services, social assistance, or government.

Students must satisfy all requirements for the sociology major. They may count courses taken for the track as sociology electives for the major.

The human relations and business track requires the following coursework.

Code	Title	Hours
Required Courses		
6 s.h. from these:		
SOC:3610	Organizations and Modern Society	3
SOC:3880	The Sociology of Networks	3
SOC:4225	The Social Psychology of Leadership	3

Electives

9 s.h. from these:

SOC:1420	Law and Society	3
SOC:2810	Social Inequality	3
SOC:3110	Race, Organizations, and Workplace	3
SOC:3200	International Perspectives: Xicotepec	1-3
SOC:3650	Education, Schools, and Society	3
SOC:4210	Social Psychology of Small Groups	3
SOC:4230	Sociology of Self-Improvement	3
SOC:4540	Political Sociology and Social Movements	3
SOC:4903	Selected Topics in Organizations, Networks, and Careers	3
CRIM:4440	Sociology of White-Collar Crime	3

Or select electives from these graduate courses, with approval of instructor:

SOC:6610	Complex Organizations	3
SOC:7620	Social Network Analysis	3
SOC:7820	Seminar: Selected Topics in Social Stratification (when topic is social capital)	3

Emphasis Areas

The following elective courses are grouped by emphasis for students who may want to cluster their electives according to one of the following areas of interest. The emphasis area courses are not tracks. See Courses [p. 1010] in this section of the Catalog for a complete listing of sociology courses.

Social Psychology

Code	Title	Hours
SOC:1220	Principles of Social Psychology	3
SOC:3220	Sociology of Mental Illness	3
SOC:4210	Social Psychology of Small Groups	3
SOC:4225	The Social Psychology of Leadership	3
SOC:4230	Sociology of Self-Improvement	3

Social and Political Organization

Code	Title	Hours
SOC:2810	Social Inequality	3
SOC:2830	Race and Ethnicity	3
SOC:3610	Organizations and Modern Society	3
SOC:3650	Education, Schools, and Society	3
SOC:3880	The Sociology of Networks	3
SOC:4820	Sociology of Sexuality	3

Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.

To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Teacher Education Program Application and Admission on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

Combined Programs

B.A./M.S. in Business Analytics (Career Subprogram)

Students majoring in sociology who are interested in earning a master's degree in business analytics with a career subprogram may apply to the combined B.A./M.S. program offered by the College of Liberal Arts and Sciences and the Tippie College of Business. The program enables students to begin the study of business analytics before they complete their bachelor's degree. Students are able to complete both degrees in five years rather than six.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For information about the business analytics program, see the M.S. in business analytics (career) [p. 1148] in the Tippie College of Business section of the Catalog.

B.A./M.S. in Finance

Students majoring in sociology who are interested in earning a master's degree in finance may apply to the combined B.A./M.S. program offered by the College of Liberal Arts and Sciences and the Tippie College of Business. The program enables students to begin the study of finance before they complete their bachelor's degree. Students are able to complete both degrees in five years rather than six.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For information about the finance program, see the M.S. in finance [p. 1190] (Tippie College of Business) section of the Catalog.

Honors

Honors in the Major

Students have the opportunity to graduate with honors in the major. Departmental honors students must maintain a g.p.a. of at least 3.33 in all University of Iowa courses and in all sociology courses. In order to graduate with honors in sociology, the following coursework must be completed.

Code	Title	Hours
SOC:4997	Honors Seminar	1
SOC:4998	Honors Research (honors thesis)	2-3

The honors thesis is prepared under faculty supervision. It gives students the opportunity to conduct sociological

research in close consultation with a faculty member of the student's choice.

Honors students also must take at least one sociology course numbered 3000 or above with honors designation, including graduate courses (honors designation requires instructor approval). Learn more about honors in the major and honors courses on the University of Iowa Honors Program website.

National Honor Society

The department sponsors a chapter of Alpha Kappa Delta International Sociology Honor Society. Students who have a cumulative g.p.a. of 3.30, a sociology g.p.a. of at least 3.00 (with four sociology courses), and have attained junior or higher standing are considered for membership. Consult the Alpha Kappa Delta faculty advisor for details.

University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the University's honors program.

Membership in the UI Honors Program is not required to earn honors in the sociology major.

Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Sequencing of coursework is important in meeting the four-year plan.

Before the fifth semester begins: SOC:1010 Introduction to Sociology or equivalent, and one sociology elective

Before the seventh semester begins: SOC:2130 Sociological Theory, a required statistics course, one more sociology elective, and at least 90 s.h. earned toward the degree

Before the eighth semester begins: SOC:2170 Research Methods and one more sociology elective

During the eighth semester: enrollment in all remaining coursework in the major, including a capstone course, SOC:4909 Graduation Portfolio, and the last two sociology electives; all remaining GE CLAS Core courses; and a sufficient number of semester hours to graduate

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

- a Fulfills a major requirement and may fulfill a GE requirement.
- b Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
- c Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
- d Students have the option to choose one of two tracks in the major: human relations and business; or family and health services.
- e GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
- f Upper-level sociology courses (prefix SOC) are numbered 3000 or above. Two of the upper-level electives must be taken after (and not concurrent with) the completion of SOC:2130, an approved introductory statistics course, and SOC:2170.
- g Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>. If applicable search for "Early and Late Participation" to find this page (e.g. participate in graduation ceremony in May, degree conferral in August).

Career Advancement

The major provides background for employment in fields such as human services, criminal justice, corrections, sales, public relations, advertising, personnel, applied social research, community organization, and teaching social science in secondary schools. It also offers an integrated package of courses, research training, writing enhancement, international perspective, and internships to provide graduates with impressive credentials.

The sociology degree provides a foundation for graduate or professional study in social work, urban planning, law, criminal justice, social policy, and similar areas. Finally, the major prepares students to work toward advanced degrees in sociology, which qualify them for college or university teaching and work in academic, private, and governmental research or organizations.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Criminology, Law and Justice, B.A.

The criminology, law and justice major examines issues related to race and ethnic diversity, and gender and poverty, heightening awareness of these important topics. Students learn about sociological explanations for crime and criminal justice; the operation of law and the criminal justice system, including their complex interplay with other institutions, such as the economy and politics; and important data sources on crime in the United States and internationally.

The criminology, law and justice coursework required for the major is the same for B.A. and B.S. students, but the major for the B.S. includes additional semester hours in theory, statistics, and methods courses.

The department has an active undergraduate organization, the Sociology and Criminology Club, which is open to all interested students. The student-run group sponsors speakers, films, and career days; conducts study groups; and facilitates group volunteerism.

Learning Outcomes

Students will be able to:

- recognize the causes and consequences of crime at the micro and macro levels and match these with prominent criminological perspectives;
- describe the interrelated institutions and processes of the criminal justice system and legal systems;
- apply theories of crime, legal systems, and criminal justice systems to explain actual and hypothetical scenarios, behaviors, and trends;
- understand the role of formal law in advanced democracies;
- explain the various social science methods of inquiry and use these to test specific criminological research questions;
- recognize and explain social inequities in crime and criminal justice processes by race, social class, gender, region, and age; and
- evaluate the effectiveness of policy interventions for altering social behavior, including those deemed illegal or harmful.

Requirements

The Bachelor of Arts with a major in criminology, law and justice requires a minimum of 120 s.h., including at least 39 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 20]. Transfer students must earn at least 24 s.h. in criminology, law and justice coursework at the University of Iowa; transfer courses must be approved by a sociology advisor.

Requirements for the major are similar for the Bachelor of Arts and the Bachelor of Science. B.A. students take a minimum of 39 s.h. of coursework for the major, while B.S. students take a minimum of 48 s.h. which includes additional theory, statistics, and methods courses.

Students who earn the major in criminology, law and justice can earn the major in sociology. No more than 9 s.h. of major

coursework can double count for each of the majors. Students who earn both majors may not complete a minor in either area.

Students who earn the major in criminology, law and justice may earn a minor in sociology. No more than 3 s.h. can double count for the major and minor.

Students who earn the major in criminology, law and justice may not earn the criminology, law and justice minor.

The B.A. with a major in criminology, law and justice requires the following coursework.

Code	Title	Hours
Introductory Courses		6-7
Theory, Statistics, and Methods Courses		9-10
Upper-Level Sociology Requirement		3
Electives		18
Capstone Course		3
Graduation Portfolio Course		0
Total Hours		39-41

Introductory Courses

Code	Title	Hours
Two of these:		
CRIM:1410	Introduction to Criminology	3
CRIM:1447	Introduction to the Criminal Justice System	3
SOC:1010	Introduction to Sociology	3-4
or SOC:1030	Contemporary Social Problems	
SOC:1420	Law and Society	3

Theory, Statistics, and Methods

Students should complete SOC:2130, and either CRIM:2470 or SOC:2170 as soon as possible.

Code	Title	Hours
This course:		
SOC:2130	Sociological Theory	3
One of these:		
CRIM:2470	Research Methods in Criminology and Criminal Justice	3
SOC:2170	Research Methods	3
One of these:		
SOC:2160	Applied Statistics for Social Scientists	3
STAT:1020/ PSQF:1020	Elementary Statistics and Inference	3
STAT:1030	Statistics for Business	4
STAT:2010	Statistical Methods and Computing	3
STAT:3510/ IGPI:3510	Biostatistics	3
STAT:4143/ PSQF:4143	Introduction to Statistical Methods	3

Upper-Level Sociology Requirement

Code	Title	Hours
3 s.h. from these:		
SOC:2064	Racial Inequity and the Experiences of African American Families in the U.S.	3
SOC:2710	The American Family	3
SOC:2810	Social Inequality	3
SOC:2830	Race and Ethnicity	3
SOC:3171	Drugs and Society	3
SOC:3220	Sociology of Mental Illness	3
SOC:3510	Medical Sociology	3
SOC:3610	Organizations and Modern Society	3
SOC:3650	Education, Schools, and Society	3
SOC:3750	Born in the USA: Fertility and Reproduction	3
SOC:3880	The Sociology of Networks	3
SOC:4200	Sociology of Religion	3
SOC:4210	Social Psychology of Small Groups	3
SOC:4225	The Social Psychology of Leadership	3
SOC:4230	Sociology of Self-Improvement	3
SOC:4540	Political Sociology and Social Movements	3
SOC:4820	Sociology of Sexuality	3

Electives

Students complete 18 s.h. of elective coursework in criminology, law and justice (prefix CRIM). Four of the required electives must be advanced, chosen from criminology, law and justice courses numbered 3000-4901 or CRIM:4998 Honors Research. Two of the four advanced electives must be taken after (and not concurrent with) the completion of SOC:2130 Sociological Theory, CRIM:2470 Research Methods in Criminology and Criminal Justice or SOC:2170 Research Methods, and an additional approved course from the Theory, Statistics, and Methods list above. With permission, students may use graduate courses in sociology (prefix SOC) numbered 5000 or above to satisfy the electives requirement.

Code	Title	Hours
18 s.h. from these:		
CRIM:2200	Gender and Violence	3
CRIM:2430	Comparative Criminal Justice Systems	3
CRIM:2460	Policing in Modern Society	3
CRIM:2901	Special Topics in Criminology, Law, and Justice	3
CRIM:3250	Drugs, Deviance, and Social Control	3
CRIM:3260	Immigration and Crime	3
CRIM:3350	Life Course Criminology	3
CRIM:3415	Global Criminology	3

CRIM:3416	Race, Crime, and Justice	3
CRIM:3417	Community Corrections	3
CRIM:3420	Juvenile Delinquency	3
CRIM:3425	Women, Crime, and Justice	3
CRIM:3437	American Crime	3
CRIM:3450	Criminal Legal System	3
CRIM:3600	Crime and Public Policy	3
CRIM:4420	Criminal Punishment	3
CRIM:4430	Interpersonal Violence in Society	3
CRIM:4440	Sociology of White-Collar Crime	3
CRIM:4450	Juvenile Justice: A Sociolegal Perspective	3
CRIM:4460	Sociology of Law	3
CRIM:4470	Communities and Crime	3
CRIM:4901	Advanced Topics in Criminology, Law, and Justice	3
CRIM:4998	Honors Research	1-3
Students may apply one of the following 3 s.h. courses toward the elective requirement:		
CRIM:4400	Internship in Criminal Justice and Corrections	3
CRIM:4410	Treatment Interventions in Corrections	3

Capstone Course

All students complete a capstone course, which illustrates their accomplishments and includes assembling a portfolio. Students generally take the course during their last two semesters of coursework for the major, as long as they have completed an approved statistics course; CRIM:2470 Research Methods in Criminology and Criminal Justice or SOC:2170 Research Methods; one of the introductory courses in criminology, law and justice; SOC:2130 Sociological Theory; and at least 6 s.h. of electives.

Code	Title	Hours
One of these:		
CRIM:4400	Internship in Criminal Justice and Corrections	3
CRIM:4800	Research Practicum in Criminology	3
SOC:4910	Capstone Course in Sociology and Criminology	3

Graduation Portfolio

During their last semester, all students enroll in the following course, in which they submit the portfolio they assembled in the capstone course.

Code	Title	Hours
SOC:4909	Graduation Portfolio	0

Combined Programs

B.A./M.S. in Business Analytics (Career Subprogram)

Students majoring in criminology, law and justice who are interested in earning a master's degree in business analytics

with a career subprogram may apply to the combined B.A./M.S. program offered by the College of Liberal Arts and Sciences and the Tippie College of Business. The program enables students to begin the study of business analytics before they complete their bachelor's degree. Students are able to complete both degrees in five years rather than six.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For information about the business analytics program, see the M.S. in business analytics (career) [p. 1148] in the Tippie College of Business section of the Catalog.

B.A./M.S. in Finance

Students majoring in criminology, law and justice who are interested in earning a master's degree in finance may apply to the combined B.A./M.S. program offered by the College of Liberal Arts and Sciences and the Tippie College of Business. The program enables students to begin the study of finance before they complete their bachelor's degree. Students are able to complete both degrees in five years rather than six.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For information about the finance program, see the M.S. in finance [p. 1190] (Tippie College of Business) section of the Catalog.

Honors

Honors in the Major

Students have the opportunity to graduate with honors in the major. Departmental honors students must maintain a g.p.a. of at least 3.33 in all University of Iowa courses and in all criminology, law and justice courses. In order to graduate with honors, the following coursework must be completed.

Code	Title	Hours
CRIM:4998	Honors Research	1-3
SOC:4997	Honors Seminar (taken spring of junior year)	1

The honors thesis is prepared under faculty supervision. It gives students the opportunity to conduct research in close consultation with a faculty member of the student's choice.

Honors students also must take at least one criminology, law and justice course numbered 3000 or above with honors designation, including graduate courses (honors designation requires instructor approval). Learn more about honors in the major and honors courses on the University of Iowa Honors Program website.

National Honor Program Society

The department sponsors a chapter of Alpha Phi Sigma Criminal Justice Honor Society. Students who have a cumulative g.p.a. of 3.30, a criminology, law and justice g.p.a. of at least 3.00 (with four criminology courses), and have attained junior or higher standing are considered for membership. Consult the Alpha Phi Sigma faculty advisor for details.

University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the University's honors program.

Membership in the UI Honors Program is not required to earn honors in the criminology, law and justice major.

Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Sequencing of coursework is important in meeting the four-year plan.

Before the fifth semester begins: two introductory courses and a statistics course

Before the seventh semester begins: both theory and methods courses, three additional introductory courses, two electives, and at least 90 s.h. earned toward the degree

Before the eighth semester begins: a capstone course and two additional electives

During the eighth semester: enrollment in all remaining coursework in the major, including SOC:4909 Graduation Portfolio; all remaining GE CLAS Core courses; and a sufficient number of semester hours to graduate

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Hours	15
Total Hours	114-128

- a Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
- b Fulfills a major requirement and may fulfill a GE requirement.
- c Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
- d GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
- e Advanced courses are numbered 3000 or above. Two of the four advanced electives must be taken after (and not concurrent with) the completion of SOC:2130, an approved introductory statistics course, and CRIM:2470.
- f Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>. If applicable search for "Early and Late Participation" to find this page (e.g. participate in graduation ceremony in May, degree conferral in August).

Career Advancement

The major in criminology, law and justice provides a foundation for graduate or professional study in criminology, criminal justice, sociology, psychology, law, social work, urban planning, social policy, and similar areas. The major pairs well with majors in other disciplines, such as psychology and social work, and affords students a competitive edge when applying to graduate school in forensic psychology or social work with a corrections emphasis.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Sociology, B.S.

A bachelor's degree with a major in sociology provides a liberal arts and sciences education. Sociology provides a broad foundation for a number of careers that require a deep understanding of human interactions and behaviors. Though broad in scope, sociology can be broken down into many marketable specializations including these at the University of Iowa: family and health services, human relations and business, social psychology, and social and political organization.

The department has an active undergraduate organization, the Sociology and Criminology Club, which is open to all interested students. The student-run group sponsors speakers, films, and career days; conducts study groups; and facilitates group volunteerism.

Learning Outcomes

Students will:

- be able to identify how sociological concepts and theories relate to everyday life,
- possess a critical lens for understanding human behavior and societies,
- articulate the importance of evidence and scientific methods for explanations of social phenomena,
- be able to identify the characteristics of high quality data and methods in sociological research,
- identify disciplinary standards for both the qualitative and quantitative analysis of data, and
- use their sociological knowledge and skills to engage with and impact the world around them.

Requirements

The Bachelor of Science with a major in sociology requires a minimum of 120 s.h., including at least 45 s.h. of work for the major, with a minimum of 42 s.h. in sociology coursework. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 20]. Transfer students must earn at least 18 s.h. in sociology coursework at the University of Iowa; transfer courses must be approved by a sociology advisor.

The major offers two optional tracks for students with an interest in one of the following concentrations: family and health services, or human relations and business.

Requirements for the major are similar for the Bachelor of Arts and the Bachelor of Science, except B.S. students take 9 s.h. of advanced statistics and three theory and methods courses, while B.A. students take 3-4 s.h. of statistics, a theory course, and a methods course.

Choice of a degree program should be dictated by a student's personal career goals. Though not required, students interested in pursuing a graduate program may find the additional math and methods courses helpful.

Students who earn the major in sociology can earn the major in criminology, law and justice. No more than 9 s.h. of major coursework can double count for each of the majors. Students who earn both majors may not complete a minor in either area.

Students who earn the major in sociology may earn a minor in criminology, law and justice. No more than 3 s.h. can double count for the major and minor.

Students who earn the major in sociology may not earn the sociology minor.

In planning to complete the major, students must take courses in the proper sequence. Introduction to Sociology (SOC:1010) is a prerequisite for all required core theory and methods courses. These introductory courses lay the foundation for all other work in the major. The recommended sequence for the major's core requirements is SOC:1010, SOC:2130 Sociological Theory, and SOC:2170 Research Methods. See the Four-Year Graduation Plan under Academic Plans [p. 1010] in this section of the Catalog.

The B.S. with a major in sociology requires the following work.

Code	Title	Hours
	Introductory Sociology Course	3-4
	Theory, Statistics, and Methods Courses	18
	Electives	21
	Capstone Course	3
	Graduation Portfolio	0
	Total Hours	45-46

Introductory Sociology

Code	Title	Hours
This course:		
SOC:1010	Introduction to Sociology	3-4

Theory, Statistics, and Methods

Code	Title	Hours
Both of these:		
SOC:2130	Sociological Theory	3
SOC:2170	Research Methods	3
One of these:		
SOC:4800	Research Practicum in Sociology (may count toward the theory and methods requirement or the capstone requirement, but not both)	3
PHIL:2603	Introduction to Symbolic Logic	3
PHIL:3604	Introduction to Philosophy of Science	3
All of these:		
SOC:2160	Applied Statistics for Social Scientists	3
SOC:6170	Introduction to Sociological Data Analysis	3
SOC:6180	Linear Models in Sociological Research	3

Electives

Students complete 21 s.h. of elective coursework in sociology (prefix SOC). Four of the required electives must be advanced, chosen from sociology courses numbered 3000-4903, SOC:4920 Social Services Organization Internship, or SOC:4998 Honors Research. Two of the four advanced required electives must be taken after (and not concurrent with) the completion of SOC:2130 Sociological Theory

and SOC:2170 Research Methods. Students can use two criminology, law and justice courses (prefix CRIM) toward the electives requirement. With permission, students may use graduate courses in sociology numbered 5000 or above to satisfy the electives requirement.

The following courses may not be used as electives.

Code	Title	Hours
SOC:1000	First-Year Seminar	1-2
SOC:4800	Research Practicum in Sociology	1-3
SOC:4910	Capstone Course in Sociology and Criminology	3
SOC:4930	Teaching Internship	3
SOC:4990	Directed Individual Study	arr.
SOC:4997	Honors Seminar	1

Capstone Course

All students complete a capstone course, which illustrates their accomplishments and includes assembling a portfolio. Students may take it as early as spring of their junior year, as long as they have completed SOC:2130 Sociological Theory, SOC:2170 Research Methods, and one of the approved statistics courses.

Code	Title	Hours
One of these:		
SOC:4800	Research Practicum in Sociology (may count toward the capstone requirement or the theory and methods requirement, but not both)	3
SOC:4910	Capstone Course in Sociology and Criminology	3
SOC:4920	Social Services Organization Internship	3

Graduation Portfolio

During their last semester, all students enroll in the following course, in which they submit the portfolio they assembled in the capstone course.

Code	Title	Hours
SOC:4909	Graduation Portfolio	0

Tracks

Family and Health Services Track

The family and health services track requires a minimum of 15 s.h. of credit, including 12 s.h. of coursework taken at the University of Iowa. It is open to sociology majors who are interested in understanding family structures and practices, differences between and within families, and those social institutions and forces that shape families or are shaped by them. Additionally, the track cultivates students' understanding of the social context of health, illness, and health care. It is especially well suited for students who are interested in pursuing careers in the fields of social service and health.

Students must satisfy all requirements for the sociology major. They may count courses taken for the track as sociology electives for the major.

The family and health services track requires the following coursework.

Code	Title	Hours
Required Courses		
6 s.h. from these:		
SOC:1310	Gender and Society	3
SOC:2710	The American Family	3
SOC:3510	Medical Sociology	3
Electives		
9 s.h. from these:		
SOC:2064	Racial Inequity and the Experiences of African American Families in the U.S.	3
SOC:2810	Social Inequality	3
SOC:3171	Drugs and Society	3
SOC:3220	Sociology of Mental Illness	3
SOC:3750	Born in the USA: Fertility and Reproduction	3
SOC:4230	Sociology of Self-Improvement	3
SOC:4820	Sociology of Sexuality	3
SOC:4902	Selected Topics in Family, Health, and Well-Being	3
CRIM:3420	Juvenile Delinquency	3
CRIM:4430	Interpersonal Violence in Society	3

Or select electives from the following graduate courses, with approval of instructor:

SOC:6220	Seminar: Selected Topics in Social Psychology (when topic is life course)	3
SOC:6310	Gender Stratification Seminar	3

Students also may choose the remaining required course as an elective

Human Relations and Business Track

The human relations and business track requires a minimum of 15 s.h. of credit, including 12 s.h. of coursework taken at the University of Iowa. It is open to sociology majors who are interested in understanding the macro- and micro-level processes that affect the ability to understand and manage organizations, as well as the groups and individuals that compose them. The track provides intensive training in both theoretical and empirical approaches to organizations, and combines micro-level insights into work groups with macro-level perspectives on the influence of organizations' environments. It is especially well suited for students who are interested in pursuing careers in various services-providing sectors such as business services, educational services, social assistance, or government.

Students must satisfy all requirements for the sociology major. They may count courses taken for the track as sociology electives for the major.

The human relations and business track requires the following coursework.

Code	Title	Hours
Required Courses		
6 s.h. from these:		

SOC:3610	Organizations and Modern Society	3
SOC:3880	The Sociology of Networks	3
SOC:4225	The Social Psychology of Leadership	3

Electives

9 s.h. from these:

SOC:1420	Law and Society	3
SOC:2810	Social Inequality	3
SOC:3110	Race, Organizations, and Workplace	3
SOC:3200	International Perspectives: Xicotepec	1-3
SOC:3650	Education, Schools, and Society	3
SOC:4210	Social Psychology of Small Groups	3
SOC:4230	Sociology of Self-Improvement	3
SOC:4540	Political Sociology and Social Movements	3
SOC:4903	Selected Topics in Organizations, Networks, and Careers	3
CRIM:4440	Sociology of White-Collar Crime	3

Or select electives from these graduate courses, with approval of instructor:

SOC:6610	Complex Organizations	3
SOC:7620	Social Network Analysis	3
SOC:7820	Seminar: Selected Topics in Social Stratification (when topic is social capital)	3

Emphasis Areas

The following elective courses are grouped by emphasis for students who may want to cluster their electives according to one of the following areas of interest. The emphasis area courses are not tracks. See Courses [p. 1010] in this section of the Catalog for a complete listing of sociology courses.

Social Psychology

Code	Title	Hours
SOC:1220	Principles of Social Psychology	3-4
SOC:3220	Sociology of Mental Illness	3
SOC:4210	Social Psychology of Small Groups	3
SOC:4225	The Social Psychology of Leadership	3
SOC:4230	Sociology of Self-Improvement	3

Social and Political Organization

Code	Title	Hours
SOC:2810	Social Inequality	3
SOC:2830	Race and Ethnicity	3
SOC:3610	Organizations and Modern Society	3
SOC:3650	Education, Schools, and Society	3

SOC:3880	The Sociology of Networks	3
SOC:4820	Sociology of Sexuality	3

Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.

To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Teacher Education Program Application and Admission on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

Combined Programs**B.S./M.S. in Business Analytics (Career Subprogram)**

Students majoring in sociology who are interested in earning a master's degree in business analytics with a career subprogram may apply to the combined B.S./M.S. program offered by the College of Liberal Arts and Sciences and the Tippie College of Business. The program enables students to begin the study of business analytics before they complete their bachelor's degree. Students are able to complete both degrees in five years rather than six.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For information about the business analytics program, see the M.S. in business analytics (career) [p. 1148] in the Tippie College of Business section of the Catalog.

B.S./M.S. in Finance

Students majoring in sociology who are interested in earning a master's degree in finance may apply to the combined B.S./M.S. program offered by the College of Liberal Arts and Sciences and the Tippie College of Business. The program enables students to begin the study of finance before they complete their bachelor's degree. Students are able to complete both degrees in five years rather than six.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For information about the finance program, see the M.S. in finance [p. 1190] (Tippie College of Business) section of the Catalog.

Honors**Honors in the Major**

Students have the opportunity to graduate with honors in the major. Departmental honors students must maintain a g.p.a. of at least 3.33 in all University of Iowa courses and in all sociology courses. In order to graduate with honors in sociology, the following coursework must be completed.

Code	Title	Hours
SOC:4997	Honors Seminar	1
SOC:4998	Honors Research (honors thesis)	2-3

The honors thesis is prepared under faculty supervision. It gives students the opportunity to conduct sociological research in close consultation with a faculty member of the student's choice.

Honors students also must take at least one sociology course numbered 3000 or above with honors designation, including graduate courses (honors designation requires instructor approval). Learn more about honors in the major and honors courses on the University of Iowa Honors Program website.

National Honor Society

The department sponsors a chapter of Alpha Kappa Delta International Sociology Honor Society. Students who have a cumulative g.p.a. of 3.30, a sociology g.p.a. of at least 3.00 (with four sociology courses), and have attained junior or higher standing are considered for membership. Consult the Alpha Kappa Delta faculty advisor for details.

University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the University's honors program.

Membership in the UI Honors Program is not required to earn honors in the sociology major.

Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Sequencing of coursework is important in meeting the four-year plan.

Before the fifth semester begins: SOC:1010 Introduction to Sociology or equivalent, SOC:2130 Sociological Theory, and one sociology elective

Before the seventh semester begins: two required statistics courses, SOC:2170 Research Methods, one more sociology elective, and at least 90 s.h. earned toward the degree

Before the eighth semester begins: the remaining statistics course and one more sociology elective

During the eighth semester: enrollment in all remaining coursework in the major, including a capstone course, SOC:4909 Graduation Portfolio, and the last two sociology electives; all remaining GE CLAS Core courses; and a sufficient number of semester hours to graduate

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

- a Fulfills a major requirement and may fulfill a GE requirement.
- b GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
- c Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
- d Students have the option to choose one of two tracks in the major: human relations and business; or family and health services.
- e Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
- f Upper-level sociology courses (prefix SOC) are numbered 3000 or above. Two of the upper-level electives must be taken after (and not concurrent with) the completion of SOC:2130 and SOC:2170.
- g Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>. If applicable search for "Early and Late Participation" to find this page (e.g. participate in graduation ceremony in May, degree conferral in August).

Career Advancement

In addition to preparing students for careers in social service, criminal justice, and other areas, this major offers an integrated package of courses, research training, writing enhancement, international perspective, and internships to provide graduates with impressive credentials. The major provides background for employment in fields such as human services, criminal justice, corrections, sales, public relations, advertising, personnel, applied social research, community organization, and teaching social science in secondary schools.

The major also provides a foundation for graduate or professional study in social work, urban planning, law, criminal justice, social policy, and similar areas. Finally, it prepares

students to work toward advanced degrees in sociology, which qualify them for college or university teaching and work in academic, private, and governmental research.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Criminology, Law and Justice, B.S.

The criminology, law and justice major examines issues related to race and ethnic diversity, and gender and poverty, heightening awareness of these important topics. Students learn about sociological explanations for crime and criminal justice; the operation of law and the criminal justice system, including their complex interplay with other institutions, such as the economy and politics; and important data sources on crime in the United States and internationally.

The criminology, law and justice coursework required for the major is the same for B.S. and B.A. students, but the major for the B.S. includes additional semester hours in theory, statistics, and methods courses.

The department has an active undergraduate organization, the Sociology and Criminology Club, which is open to all interested students. The student-run group sponsors speakers, films, and career days; conducts study groups; and facilitates group volunteerism.

Learning Outcomes

Students will be able to:

- recognize the causes and consequences of crime at the micro and macro levels and match these with prominent criminological perspectives;
- describe the interrelated institutions and processes of the criminal justice system and legal systems;
- apply theories of crime, legal systems, and criminal justice systems to explain actual and hypothetical scenarios, behaviors, and trends;
- understand the role of formal law in advanced democracies;
- explain the various social science methods of inquiry and use these to test specific criminological research questions;
- recognize and explain social inequities in crime and criminal justice processes by race, social class, gender, region, and age; and
- evaluate the effectiveness of policy interventions for altering social behavior, including those deemed illegal or harmful.

Requirements

The Bachelor of Science with a major in criminology, law and justice requires a minimum of 120 s.h., including at least 48 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 20]. Transfer students must earn at least 24 s.h. in criminology, law and justice coursework at the University of Iowa; transfer courses must be approved by a sociology advisor.

Requirements for the major are similar for the Bachelor of Science and the Bachelor of Arts. B.A. students take a minimum of 39 s.h. of coursework for the major, while B.S. students take a minimum of 48 s.h. which includes additional theory, statistics, and methods courses.

Students who earn the major in criminology, law and justice can earn the major in sociology. No more than 9 s.h. of major

coursework can double count for each of the majors. Students who earn both majors may not complete a minor in either area.

Students who earn the major in criminology, law and justice may earn a minor in sociology. No more than 3 s.h. can double count for the major and minor.

Students who earn the major in criminology, law and justice may not earn the criminology, law and justice minor.

The B.S. with a major in criminology, law and justice requires the following coursework.

Code	Title	Hours
Introductory Courses		6-7
Theory, Statistics, and Methods Courses		18
Upper-Level Sociology Requirement		3
Electives		18
Capstone Course		3
Graduation Portfolio Course		0
Total Hours		48-49

Introductory Courses

Code	Title	Hours
Two of these:		
CRIM:1410	Introduction to Criminology	3
CRIM:1447	Introduction to the Criminal Justice System	3
SOC:1010	Introduction to Sociology	3-4
or SOC:1030	Contemporary Social Problems	
SOC:1420	Law and Society	3

Theory, Statistics, and Methods

Code	Title	Hours
This course:		
SOC:2130	Sociological Theory	3
One of these:		
CRIM:2470	Research Methods in Criminology and Criminal Justice	3
SOC:2170	Research Methods	3
All of these:		
SOC:2160	Applied Statistics for Social Scientists	3
SOC:6170	Introduction to Sociological Data Analysis	3
SOC:6180	Linear Models in Sociological Research	3
One of these:		
CRIM:4800	Research Practicum in Criminology	3
PHIL:2603	Introduction to Symbolic Logic	3
PHIL:3604	Introduction to Philosophy of Science	3

Upper-Level Sociology Requirement

Code	Title	Hours
3 s.h. from these:		
SOC:2064	Racial Inequity and the Experiences of African American Families in the U.S.	3
SOC:2710	The American Family	3
SOC:2810	Social Inequality	3
SOC:2830	Race and Ethnicity	3
SOC:3171	Drugs and Society	3
SOC:3220	Sociology of Mental Illness	3
SOC:3510	Medical Sociology	3
SOC:3610	Organizations and Modern Society	3
SOC:3650	Education, Schools, and Society	3
SOC:3750	Born in the USA: Fertility and Reproduction	3
SOC:3880	The Sociology of Networks	3
SOC:4200	Sociology of Religion	3
SOC:4210	Social Psychology of Small Groups	3
SOC:4225	The Social Psychology of Leadership	3
SOC:4230	Sociology of Self-Improvement	3
SOC:4540	Political Sociology and Social Movements	3
SOC:4820	Sociology of Sexuality	3

Electives

Students complete 18 s.h. of elective coursework in criminology, law and justice (prefix CRIM). Four of the required electives must be advanced, chosen from criminology, law and justice courses numbered 3000-4901 or CRIM:4998 Honors Research. Two of the four advanced required electives must be taken after (and not concurrent with) the completion of SOC:2130 Sociological Theory, and CRIM:2470 Research Methods in Criminology and Criminal Justice or SOC:2170 Research Methods. With permission, students may use graduate courses in sociology (prefix SOC) numbered 5000 or above to satisfy the electives requirement.

Code	Title	Hours
18 s.h. from these:		
CRIM:2200	Gender and Violence	3
CRIM:2430	Comparative Criminal Justice Systems	3
CRIM:2460	Policing in Modern Society	3
CRIM:2901	Special Topics in Criminology, Law, and Justice	3
CRIM:3250	Drugs, Deviance, and Social Control	3
CRIM:3260	Immigration and Crime	3
CRIM:3350	Life Course Criminology	3
CRIM:3415	Global Criminology	3
CRIM:3416	Race, Crime, and Justice	3

CRIM:3417	Community Corrections	3
CRIM:3420	Juvenile Delinquency	3
CRIM:3425	Women, Crime, and Justice	3
CRIM:3437	American Crime	3
CRIM:3450	Criminal Legal System	3
CRIM:3600	Crime and Public Policy	3
CRIM:4420	Criminal Punishment	3
CRIM:4430	Interpersonal Violence in Society	3
CRIM:4440	Sociology of White-Collar Crime	3
CRIM:4450	Juvenile Justice: A Sociolegal Perspective	3
CRIM:4460	Sociology of Law	3
CRIM:4470	Communities and Crime	3
CRIM:4901	Advanced Topics in Criminology, Law, and Justice	3
CRIM:4998	Honors Research	1-3
Students may apply one of the following 3 s.h. courses toward the elective requirement:		
CRIM:4400	Internship in Criminal Justice and Corrections	3
CRIM:4410	Treatment Interventions in Corrections	3

Capstone Course

All students complete a capstone course, which illustrates their accomplishments and includes assembling a portfolio. Students generally take the course during their last two semesters of coursework for the major, as long as they have completed the three statistics courses; CRIM:2470 Research Methods in Criminology and Criminal Justice or SOC:2170 Research Methods; one of the introductory courses in criminology, law and justice; SOC:2130 Sociological Theory; and at least 6 s.h. of electives.

Code	Title	Hours
One of these:		
CRIM:4400	Internship in Criminal Justice and Corrections	3
CRIM:4800	Research Practicum in Criminology (if taken as a Theory, Statistics, and Methods course, registration a second time is required)	3
SOC:4910	Capstone Course in Sociology and Criminology	3

Graduation Portfolio

During their last semester, all students enroll in the following course, in which they submit the portfolio they assembled in the capstone course.

Code	Title	Hours
SOC:4909	Graduation Portfolio	0

Combined Programs

B.S./M.S. in Business Analytics (Career Subprogram)

Students majoring in criminology, law and justice who are interested in earning a master's degree in business analytics with a career subprogram may apply to the combined B.S./M.S. program offered by the College of Liberal Arts and Sciences and the Tippie College of Business. The program enables students to begin the study of business analytics before they complete their bachelor's degree. Students are able to complete both degrees in five years rather than six.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For information about the business analytics program, see the M.S. in business analytics (career) [p. 1148] in the Tippie College of Business section of the Catalog.

B.S./M.S. in Finance

Students majoring in criminology, law and justice who are interested in earning a master's degree in finance may apply to the combined B.S./M.S. program offered by the College of Liberal Arts and Sciences and the Tippie College of Business. The program enables students to begin the study of finance before they complete their bachelor's degree. Students are able to complete both degrees in five years rather than six.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For information about the finance program, see the M.S. in finance [p. 1190] (Tippie College of Business) section of the Catalog.

Honors

Honors in the Major

Students have the opportunity to graduate with honors in the major. Departmental honors students must maintain a g.p.a. of at least 3.33 in all University of Iowa courses and in all criminology, law and justice courses. In order to graduate with honors, the following coursework must be completed.

Code	Title	Hours
CRIM:4998	Honors Research	1-3
SOC:4997	Honors Seminar	1

The honors thesis is prepared under faculty supervision. It gives students the opportunity to conduct research in close consultation with a faculty member of the student's choice.

Honors students must also take one criminology, law and justice course numbered 3000 or above with honors designation, including graduate courses (honors designation requires instructor approval). Learn more about honors in the major and honors courses on the University of Iowa Honors Program website.

National Honor Society

The department sponsors a chapter of Alpha Phi Sigma Criminal Justice Honor Society. Students who have a cumulative g.p.a. of 3.30, a criminology, law and justice g.p.a. of at least 3.00 (with four criminology courses), and have attained junior or higher standing are considered for

membership. Consult the Alpha Phi Sigma faculty advisor for details.

University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the University's honors program.

Membership in the UI Honors Program is not required to earn honors in the criminology, law and justice major.

Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Sequencing of coursework is important in meeting the four-year plan.

Before the fifth semester begins: two introductory courses and a statistics course

Before the seventh semester begins: theory and methods courses, three additional introductory courses, two electives, statistics, and at least 90 s.h. earned toward the degree

Before the eighth semester begins: a capstone course and two more electives

During the eighth semester: enrollment in all remaining coursework in the major, including SOC:4909 Graduation Portfolio; all remaining GE CLAS Core courses; and a sufficient number of semester hours to graduate

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Criminology, Law and Justice, B.S.

Course	Title	Hours
First Year		
Fall		
Major: introductory criminology course ^a		3
RHET:1030 or ENGL:1200	Rhetoric or The Interpretation of Literature	3 - 4

SOC:6180	Linear Models in Sociological Research	3
Elective course ^c		3
Elective course ^c		3
Degree Application: apply on MyUI before deadline (typically in February for spring, September for fall) ^f		
Hours		15
Total Hours		114-130

- a Fulfills a major requirement and may fulfill a GE requirement.
- b Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
- c Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
- d GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
- e Advanced courses are numbered 3000 or above. Two of the four advanced electives must be taken after (and not concurrent with) the completion of SOC:2130 and SOC:2170.
- f Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>. If applicable search for "Early and Late Participation" to find this page (e.g. participate in graduation ceremony in May, degree conferral in August).

Career Advancement

The major in criminology, law and justice provides a foundation for graduate or professional study in criminology, criminal justice, sociology, psychology, law, social work, urban planning, social policy, and similar areas. The major pairs well with majors in other disciplines, such as psychology and social work, and affords students a competitive edge when applying to graduate school in forensic psychology or social work with a corrections emphasis.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Sociology, Minor

Requirements

The undergraduate minor in sociology requires a minimum of 15 s.h. in sociology courses, including 12 s.h. in courses taken at the University of Iowa. The minor must include SOC:2130 Sociological Theory and a minimum of 9 s.h. in courses numbered 3000-4903. Students must maintain a cumulative g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.

Students who earn the major in criminology, law and justice may earn a minor in sociology. No more than 3 s.h. can double count for the major and minor.

Students who earn the major in sociology may not earn the sociology minor.

A minor in sociology is a good complement to a number of majors, particularly other social sciences, business, elementary education, or health professions.

Criminology, Law and Justice, Minor

Requirements

The undergraduate minor in criminology, law and justice requires a minimum of 15 s.h., including 12 s.h. in courses taken at the University of Iowa. Students must maintain a g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.

Students who earn the major in sociology may earn a minor in criminology, law and justice. No more than 3 s.h. can double count for the major and minor.

Students who earn the major in criminology, law and justice may not earn the criminology, law and justice minor.

The minor in criminology, law and justice requires the following coursework.

Code	Title	Hours
One of these:		
CRIM:1410	Introduction to Criminology	3
CRIM:1447	Introduction to the Criminal Justice System	3
SOC:1420	Law and Society	3
12 s.h. from these:		
CRIM:2200	Gender and Violence	3
CRIM:2430	Comparative Criminal Justice Systems	3
CRIM:2460	Policing in Modern Society	3
CRIM:2901	Special Topics in Criminology, Law, and Justice	3
CRIM:3250	Drugs, Deviance, and Social Control	3
CRIM:3260	Immigration and Crime	3
CRIM:3350	Life Course Criminology	3
CRIM:3415	Global Criminology	3
CRIM:3416	Race, Crime, and Justice	3
CRIM:3417	Community Corrections	3
CRIM:3420	Juvenile Delinquency	3
CRIM:3425	Women, Crime, and Justice	3
CRIM:3437	American Crime	3
CRIM:3450	Criminal Legal System	3
CRIM:3600	Crime and Public Policy	3
CRIM:4420	Criminal Punishment	3
CRIM:4430	Interpersonal Violence in Society	3
CRIM:4440	Sociology of White-Collar Crime	3
CRIM:4450	Juvenile Justice: A Sociolegal Perspective	3
CRIM:4460	Sociology of Law	3
CRIM:4470	Communities and Crime	3
CRIM:4901	Advanced Topics in Criminology, Law, and Justice	3

Students may apply one of the following 3 s.h. courses toward the minor:

CRIM:4400	Internship in Criminal Justice and Corrections	3
CRIM:4410	Treatment Interventions in Corrections	3

Sociology, M.A.

Graduate study in sociology focuses on the Doctor of Philosophy. Students are awarded the M.A. as they fulfill requirements for the Ph.D.

Requirements

The Master of Arts program in sociology requires 30 s.h. of graduate credit with thesis or research paper and 38 s.h. of graduate credit without. The program without thesis is intended for students seeking a terminal degree and for whom a wider range of course content in sociology is appropriate.

All M.A. students must complete the following courses with grades of B-minus or higher.

Code	Title	Hours
SOC:5110	History of Sociological Theory	3
SOC:5160	Research Design and Methods	3
SOC:6170	Introduction to Sociological Data Analysis	3
SOC:6180	Linear Models in Sociological Research	3

Teaching Assistantship Training

All new graduate teaching assistants (TAs) are expected to attend a three-day orientation before classes begin. In addition, SOC:7010 Teaching Sociology is required for students who wish to teach their own courses.

Admission

Admission to graduate study in sociology usually requires an undergraduate g.p.a. of at least 3.25, and a score of 300 or higher (total for quantitative and verbal) and a writing score of at least 4 on the Graduate Record Examination (GRE) General Test.

All applicants must complete the Graduate College application form, the supplemental sociology and criminology department application, and use the department's personal reference forms to obtain three letters of recommendation.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

All application materials for fall admission must be received by January 1. Evaluation of applications begins in early January.

Admission decisions are based on consideration of prior academic performance, personal reference letters, scores on the GRE General Test, and the applicant's statement of reasons for pursuing advanced work in sociology at the University of Iowa. The department has no specific undergraduate course requirements for admission, but a background in the social sciences with some mathematical training is useful. A foreign language is not required for admission, and there is no foreign language requirement for a graduate degree in sociology. To inquire about admission, consult the director of graduate studies, Department of Sociology and Criminology.

Financial Support

The Department of Sociology and Criminology offers teaching assistantships and research assistantships for graduate students. Students who receive one-half-time teaching or research assistantships work 20 hours each week for faculty members on either teaching or research assignments. Out-of-state students who hold assistantships are assessed tuition at the resident rate. Graduate students also may be eligible for fellowships offered by the Graduate College.

The deadline for applying for departmental financial support is January 1.

Career Advancement

In addition to preparing students for careers in social service, criminal justice, and other areas, the sociology major offers an integrated package of courses, research training, writing enhancement, international perspective, and internships to provide graduates with impressive credentials. The degree also prepares students for further graduate or professional study in areas such as social work, urban and regional planning, law, criminal justice, and social policy. Teaching positions in colleges or universities and research positions in academic, private, and governmental organizations often require advanced degrees in sociology.

The Pomerantz Career Center and the Graduate College's Career Exploration and Planning website offer multiple resources to help students find internships and jobs.

Sociology, Ph.D.

Graduate study in sociology focuses on the Doctor of Philosophy. Students are awarded the M.A. as they fulfill requirements for the Ph.D.

The Doctor of Philosophy emphasizes research. Opportunities for research using survey, experimental, and qualitative methods are readily available in the department.

Requirements

The Doctor of Philosophy program in sociology requires a minimum of 72 s.h. of graduate credit. Most courses for the Ph.D. are taken in a student's two areas of interest, but all doctoral students must complete the following courses.

Code	Title	Hours
SOC:6170	Introduction to Sociological Data Analysis (required for the M.A.)	3
SOC:6180	Linear Models in Sociological Research (required for the M.A.)	3

Two elective courses in methods/statistics numbered 5000 or above

One advanced theory course such as SOC:6110

Students also must pass two area examinations, write and defend a dissertation prospectus, and write and successfully defend a dissertation.

Doctoral students take two area exams—one from list A, the other from list B. List A has seven standing committees: social psychology, crime, law, stratification, organizations, gender, and political sociology. For the list B exam, a student may propose any area that is not covered under list A and for which there is adequate faculty support.

For a detailed statement of graduate study rules, view the Department of Sociology and Criminology website. Prospective doctoral students should examine the document carefully.

Teaching Assistantship Training

All new graduate teaching assistants (TAs) are expected to attend a three-day orientation before classes begin. In addition, SOC:7010 Teaching Sociology is required for students who wish to teach their own courses.

Combined Programs

Ph.D./J.D.

The Department of Sociology and Criminology and the College of Law offer the combined Juris Doctor/Doctor of Philosophy. The program is highly individualized, allowing students to explore varied aspects of the relationship between law and society. Combined degree program Ph.D./J.D. students may count up to 12 s.h. of graduate credit toward both degrees, with approval from the Department of Sociology and the College of Law.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For information about the J.D., see Juris Doctor, J.D. [p. 1650] (College of Law) in the Catalog.

Admission

Admission to graduate study in sociology usually requires an undergraduate g.p.a. of at least 3.25, and a score of 300 or higher (total for quantitative and verbal) and a writing score of at least 4 on the Graduate Record Examination (GRE) General Test.

All applicants must complete the Graduate College application form, the supplemental sociology and criminology department application, and use the department's personal reference forms to obtain three letters of recommendation.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

All application materials for fall admission must be received by January 1. Evaluation of applications begins in early January.

Admission decisions are based on consideration of prior academic performance, personal reference letters, scores on the GRE General Test, and the applicant's statement of reasons for pursuing advanced work in sociology at the University of Iowa. The department has no specific undergraduate course requirements for admission, but a background in the social sciences with some mathematical training is useful. A foreign language is not required for admission, and there is no foreign language requirement for a graduate degree in sociology. To inquire about admission, consult the director of graduate studies, Department of Sociology and Criminology.

Financial Support

The Department of Sociology and Criminology offers teaching assistantships and research assistantships for graduate students. Students who receive one-half-time teaching or research assistantships work 20 hours each week for faculty members on either teaching or research assignments. Out-of-state students who hold assistantships are assessed tuition at the resident rate. Graduate students also may be eligible for fellowships offered by the Graduate College.

The deadline for applying for departmental financial support is January 1.

Career Advancement

The program of study for the Ph.D. primarily aims to prepare sociologists for academic positions in colleges and universities or for research positions in academic, private, and government institutions.

In addition to preparing students for careers in social service, criminal justice, and other areas, this major offers an integrated package of courses, research training, writing enhancement, international perspective, and internships to provide graduates with impressive credentials.

The Pomerantz Career Center and the Graduate College Career Exploration and Planning website offer multiple resources to help students find jobs.

Spanish and Portuguese

Director, Division of World Languages, Literatures and Cultures

- Jill N. Beckman

Chair, Department of Spanish and Portuguese

- Denise K. Filios

Undergraduate majors: Spanish (B.A.); Portuguese (B.A.)

Undergraduate minors: Spanish; Portuguese

Graduate degrees: M.A. in Spanish; M.F.A. in Spanish creative writing; Ph.D. in Spanish

Faculty: <https://spanish-portuguese.uiowa.edu/people>

Website: <https://spanish-portuguese.uiowa.edu/>

The Department of Spanish and Portuguese offers undergraduate majors and minors, graduate degree programs, and coursework for students in other disciplines. The department provides a wide selection of courses taught in Spanish and Portuguese, languages that are spoken in many cultures around the world and are important in the study of linguistics, health care, culture, literature, art, film, and many other areas. Spanish and Portuguese language courses are open to any student who has satisfied the course prerequisites.

In addition to language courses, the department offers general interest courses on literature, film, and culture that are taught in English. It also participates in several study abroad programs.

Undergraduate students in all majors may satisfy the World Languages requirement of the GE CLAS Core [p. 20] with courses in Spanish or Portuguese; see "Language for GE CLAS Core" below. The department also offers other courses that are approved for GE CLAS Core and are taught in English and a First-Year Seminar designed for entering undergraduates.

Elementary and intermediate courses in Spanish language interrelate five performance goals—listening, reading, speaking, writing, and cultural knowledge—in a staged progression whose overall goal is to develop proficiency. The curriculum emphasizes acquisition of Spanish language skills in communicative contexts, enrichment of vocabulary through an introduction to Hispanic culture, and development of grammatical accuracy in speaking and writing.

The beginning course in Portuguese is for students without previous study or experience with the language. There also is a special Portuguese course for students who already know Spanish. Portuguese classes provide a great deal of individual attention in an informal language-learning environment. Courses emphasize speaking, comprehending, reading, and writing Brazilian Portuguese. They incorporate cultural material in the form of videos and music.

The department teaches many courses that count toward the Latina/o/x studies minor, which offers an interdisciplinary perspective on the history, culture, politics, and experiences of the Latina/o/x population in the United States. See the minor in Latina/o/x studies [p. 755] in the Catalog for more information.

The Department of Spanish and Portuguese is one of the academic units in the Division of World Languages, Literatures and Cultures [p. 367].

Language for GE CLAS Core

The Department of Spanish and Portuguese offers course sequences that students in all majors may use to satisfy the World Languages requirement of the College of Liberal Arts and Sciences GE CLAS Core [p. 20].

Students who have previous coursework or other experience with Spanish should take the online Placement Test, which helps determine the level at which a student should begin Spanish language study at the University of Iowa. Students should take the test before they register for their first University of Iowa Spanish course. Students with experience in Portuguese should contact the general education coordinator to determine the level at which they should begin language study at the University of Iowa.

Spanish

The following course sequences in Spanish satisfy the GE CLAS Core World Languages requirement. For students without previous knowledge of Spanish, the department recommends the following sequence.

Code	Title	Hours
SPAN:1001	Elementary Spanish I	5
SPAN:1002	Elementary Spanish II	5
SPAN:1501	Intermediate Spanish I	5
SPAN:1502	Intermediate Spanish II	5

The summer course, SPAN:1004 Accelerated Elementary Spanish, which combines SPAN:1001 and SPAN:1002, may be appropriate for some students.

The accelerated course, SPAN:1503 Accelerated Intermediate Spanish, which combines SPAN:1501 and SPAN:1502, may be appropriate for some students.

Those with previous knowledge of Spanish may be able to fulfill the World Languages requirement with the following sequence.

Code	Title	Hours
SPAN:1003	Elementary Spanish Review	5
SPAN:1501	Intermediate Spanish I	5
SPAN:1502	Intermediate Spanish II	5

The accelerated course, SPAN:1505 Accelerated Intermediate Spanish for Heritage Speakers, may be appropriate for some students.

Students should consult a departmental advisor to determine which sequence is best for them.

Portuguese

The following course sequences in Portuguese fulfill the GE CLAS Core World Languages requirement. The first option consists of two intensive courses that combine two semesters into one, so that the sequence is completed in a total of two semesters rather than four. Both courses are open to entering first-year students.

Code	Title	Hours
PORT:2000	Accelerated Elementary Portuguese	5
PORT:2500	Accelerated Intermediate Portuguese	5

The second option requires three courses taken in the following sequence to complete the World Languages requirement.

Code	Title	Hours
PORT:2010	Elementary Portuguese I	3
PORT:2015	Elementary Portuguese II	3
PORT:2500	Accelerated Intermediate Portuguese	5

Students should consult the general education coordinator to determine which sequence is best for them.

Related Certificates and Minors

Minor and Certificate: Latin American Studies

The department plays an important role in the Latin American Studies Program, which focuses on the history, politics, social organization, economy, art, music, religion, and literature of Latin America. See Latin American Studies [p. 746] in the Catalog for information about the program's undergraduate certificate and minor.

Minor: Translation for Global Literacy

The minor in translation for global literacy encourages undergraduate students to explore translation as a crucial dimension of global literacy and communication. The Department of Spanish and Portuguese offers several courses that count toward the minor. See the minor in translation for global literacy [p. 1107] in the Catalog for more information.

Certificate: International Business

The College of Liberal Arts and Sciences and the Tippie College of Business offer the Certificate in International Business. The program entails study of international business and economics; international relations and institutions; a language; and the art, literature, culture, and/or politics of a geographic area. For more information, see the Certificate in International Business [p. 1195] in the Catalog.

Programs

Undergraduate Programs of Study

Majors

- Major in Spanish (Bachelor of Arts) [p. 1051]
- Major in Portuguese (Bachelor of Arts) [p. 1056]

Facilities

Language Media Center

The Language Media Center (LMC) provides a wide variety of services and facilities to the Division of World Languages, Literatures and Cultures, including a 54-computer Instructional Technology Center (ITC) and six "All in One" studios/small group study rooms, each equipped with video production and editing software. The LMC also has a digital media and hardware collection available for checkout.

Directed Independent Language Study (DiLS), administered by the Language Media Center in the Division of World Languages, Literatures and Cultures, offers students guidance on engaging in self-instruction in languages that are not currently taught in the division. Any current University of Iowa student, staff, or faculty member who is interested in pursuing language study to enhance their professional research or academic profile can take advantage of this program. With the support of LMC staff, learners design their own study plans to learn basic language skills or improve upon existing skills in preparation for study or research abroad, and are paired with a language and culture consultant when possible.

Spanish Writing, Speaking, and Conversation Center

The Spanish Writing, Speaking, and Conversation Center assists students in understanding their assignments and helps them recognize what constitutes good Spanish speaking and writing. Tutors and students brainstorm ideas for an oral presentation or a paper, generate outlines, organize information, and explore dictionaries and other resources to avoid direct translations from English to Spanish. Tutors also provide students with tools for future writing and oral assignments.

The center helps students develop confidence to participate in class discussions, practice conversational skills, and assists students with reading comprehension. Any student enrolled in SPAN:1502 Intermediate Spanish II or above can use the services of the center free of charge by making an appointment online.

Courses

- Spanish Courses [p. 1042]
- Portuguese Courses [p. 1049]

Spanish and Portuguese language courses are open to all students who have satisfied the specified course prerequisites.

Basic Spanish courses are included in the number range SPAN:1000-SPAN:1900. Students must have permission from the chair of the Department of Spanish and Portuguese to take an elementary course for credit after having completed a higher-level course for which the elementary course or its equivalent is a prerequisite.

Spanish Level 1 courses are included in the number range SPAN:2000-SPAN:2999. Students should take these courses at the start of the Spanish major.

Spanish Level 2 courses are included in the number range SPAN:3000-SPAN:3999. Students should have at least one Spanish Level 1 course before starting these courses. Some courses have additional prerequisites.

Language skills courses are numbered SPAN:3000-SPAN:3099.

Hispanic linguistics courses are numbered SPAN:3100-SPAN:3199.

Spanish American literature and culture courses are numbered SPAN:3200-SPAN:3599.

Spanish literature and culture courses are numbered SPAN:3600-SPAN:3899.

Spanish Level 3 courses are included in the number range SPAN:4000-SPAN:4999. Undergraduates should take these courses during their last semesters of enrollment. These courses also are open to M.A. students. All of these courses require a research paper. Prerequisites vary.

Spanish Graduate courses are included in the number range SPAN:5000-SPAN:7600.

Spanish Courses

SPAN:1000 First-Year Seminar 1-2 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first- or second-semester standing.

SPAN:1001 Elementary Spanish I 5 s.h.

Emphasis on oral and written skills. Taught in Spanish. Recommendations: no previous study of Spanish. GE: World Languages First Level Proficiency.

SPAN:1002 Elementary Spanish II 5 s.h.

Continuation of SPAN:1001; emphasis on oral and written skills. Taught in Spanish. Requirements: SPAN:1001. GE: World Languages Second Level Proficiency.

SPAN:1003 Elementary Spanish Review 5 s.h.

Intensive treatment of material presented in SPAN:1001 and SPAN:1002. Taught in Spanish. Requirements: two years of secondary school Spanish. GE: World Languages Second Level Proficiency.

SPAN:1004 Accelerated Elementary Spanish 6 s.h.

Course sequence SPAN:1001 and SPAN:1002 in one semester. Taught in Spanish. GE: World Languages Second Level Proficiency.

SPAN:1501 Intermediate Spanish I 5 s.h.

Communication in speaking and writing; cultural topics. Taught in Spanish. Requirements: SPAN:1002 or SPAN:1003. GE: World Languages Second Level Proficiency.

SPAN:1502 Intermediate Spanish II 5 s.h.

Continuation of SPAN:1501. Requirements: SPAN:1501. GE: World Languages Fourth Level Proficiency.

SPAN:1503 Accelerated Intermediate Spanish 6 s.h.

Course sequence SPAN:1501 and SPAN:1502 in one semester. Requirements: SPAN:1002 or SPAN:1003. GE: World Languages Fourth Level Proficiency.

SPAN:1505 Accelerated Intermediate Spanish for Heritage Speakers 5 s.h.

Focus on communication and consolidation of skills acquired as a heritage speaker; opportunity for Spanish heritage speakers to study Spanish formally in an academic setting in the same way native-English-speaking students study English language arts; students develop or improve formal registers of Spanish mainly through reading and writing; emphasis on all four language skills—listening, speaking, reading, and writing—via cultural and community activities. Taught in Spanish. Requirements: experience growing up listening to or speaking in Spanish, and Spanish placement test score of 401 or higher. GE: World Languages Fourth Level Proficiency.

SPAN:1700 Latina/o/x Literature in the United States 3 s.h.

Introduction to growing cultural production of varied Latina/o/x communities (e.g., Chicano, Puerto Rican American/Nuyorican, Cuban American) that have a strong presence in the United States; recent cultural production from borderland transcultural spaces with physical, cultural, economic, political, and mythical elements; visions of the United States from contemporary Latin American writers who recently have become U.S. residents. Taught in English. GE: Literary, Visual, and Performing Arts; Values and Culture. Same as LATS:1700.

SPAN:1800 Contemporary Spanish American Narrative 3 s.h.

Themes and narrative techniques in major texts, 1960-present; overview of cultural, sociopolitical aspects. Taught in English, readings in English. GE: Literary, Visual, and Performing Arts.

SPAN:2000 Spanish Language Skills: Writing 4 s.h.

Bridge from second-year Spanish to more advanced courses in Spanish language, linguistics, and literature; emphasis on skill development in writing, critical reading in Spanish, and oral communication. Taught in Spanish. Requirements: SPAN:1502 or SPAN:1503.

SPAN:2001 Global Science Fiction 3 s.h.

Science fiction from around the world; spanning poetry, fiction, drama, film, television, comics, mobile phone games, and music; produced on six continents. Taught in English. Same as ASIA:2001, FREN:2010, RUSS:2001, TRNS:2001, WLLC:2001.

SPAN:2005 Writing Global Spanish 3 s.h.

Spanish in the digital age; linguistic varieties of Spanish spoken globally; emphasis on skill development in writing, critical reading in Spanish, and oral communication. Taught in Spanish. Requirements: SPAN:1502 or SPAN:1503.

SPAN:2010 Spanish Language Skills: Speaking 3 s.h.

Development of conversational proficiency and cultural competence through action learning; strategic role playing and creative language use based on everyday situations in Hispanic cultures; composition skills and grammar review. Requirements: SPAN:1502 or SPAN:1503.

SPAN:2020 Hispanic Institute: Language 3 s.h.

Grammar essentials, written exercises, short compositions, conversational activities. Requirements: SPAN:1502 or SPAN:1503.

SPAN:2030 Study of Language: Myths and Concepts 3 s.h.

How linguists look at language; basic concepts of linguistics and grammar. Requirements: SPAN:1502 or SPAN:1503.

- SPAN:2040 Spanish for Heritage Speakers** 3 s.h.
Development of reading and writing skills for bilingual students who have acquired listening and speaking skills in Spanish; review of grammar and registers of use.
- SPAN:2050 Spanish in the United States** 3 s.h.
Issues related to Spanish in the United States; aspects of linguistics and sociolinguistics inherent to the existence and proliferation of Spanish in the United States. Taught in English. GE: Diversity and Inclusion. Same as LATS:2050.
- SPAN:2060 Spanish Pronunciation** 4 s.h.
Pronunciation as a key element of communication in a second language; self-evaluation of pronunciation in Spanish; how sounds differ between English and Spanish; analysis of pronunciation; production exercises. Requirements: SPAN:1502 or SPAN:1503.
- SPAN:2080 Business Spanish** 4 s.h.
Clear, concise business writing; emphasis on linguistic and cultural proficiency. Taught in Spanish. Requirements: SPAN:1502 or SPAN:1503.
- SPAN:2090 Medical Spanish in Contemporary Society** 4 s.h.
Vocabulary related to medical field; grammatical concepts; health-related cultural competence; discussion of health issues concerning Hispanic communities in the U.S. and abroad. Taught in Spanish. Requirements: SPAN:1502 or SPAN:1503. Same as GHS:2090.
- SPAN:2095 Activities Attendance for Spanish Majors** 1 s.h.
Attendance at Spanish literary readings, scholarly presentations, and Hispanic cultural events on the University of Iowa campus and in Iowa City, featuring visiting, local, and University of Iowa writers, filmmakers, artists, scholars, and community members. Taught in Spanish. Requirements: SPAN:2000 or SPAN:2005 or SPAN:3000 or SPAN:3020 or SPAN:3060.
- SPAN:2200 Introduction to Spanish American Cultures** 3 s.h.
Introduction to study of cultural history of Spanish America; topics range from precolombian times to present; for students who are just starting work on the Spanish major or minor. Requirements: SPAN:1502 or SPAN:1503.
- SPAN:2280 Introduction to Latina/o/x Studies** 3 s.h.
Introduction to field of Latina/o/x studies through interdisciplinary readings from literature, history, sociology, political science, urban studies, and anthropology; commonalities and differences among long-standing Latina/o/x populations (i.e., Mexican Americans, Puerto Ricans, Cuban Americans); challenges faced by newer arrivals (i.e., Dominican Americans, Salvadoran Americans, Guatemalan Americans, Central and South American immigrants). Taught in English. GE: Diversity and Inclusion. Same as HIST:2280, LATS:2280.
- SPAN:2300 Introduction to Reading Literature** 4 s.h.
Close readings of literary texts from Spain and Spanish America; basic concepts of genre (narrative, poetry, theater, essay); writing about literature. Requirements: SPAN:1502 or SPAN:1503.
- SPAN:2400 Readings in Spanish Literature** 3 s.h.
Tools for improving reading skills; basic concepts for textual understanding; historical overview of literary works, with focus on literature of Spain. Requirements: SPAN:1502 or SPAN:1503.
- SPAN:2500 Readings in Spanish American Literature** 3 s.h.
Tools for improving reading skills; basic concepts for textual understanding; historical overview of literary works, with focus on Spanish American literature. Requirements: SPAN:1502 or SPAN:1503.
- SPAN:2700 Introduction to Latin American Studies** 3 s.h.
Cultures of Latin American countries with emphasis on cultural history and cultural production; interdisciplinary survey. Taught in English. Same as COMM:2800, IS:2700, LAS:2700, PORT:2700.
- SPAN:2800 Screening Latin America** 3 s.h.
Latin American film; histories of the four major national film industries; aesthetic and political debates surrounding the New Latin American Cinema movement of the 1960s and 1970s. Taught in Spanish. Requirements: SPAN:1502 or SPAN:1503. Same as LAS:2800.
- SPAN:2810 Screening Spain** 3 s.h.
Introduction to contemporary Spanish society and culture through fiction feature films (comedies and dramas) and documentaries by major filmmakers; previous knowledge of Spanish film or audiovisual analysis not required. Taught in Spanish. Requirements: SPAN:1502 or SPAN:1503.
- SPAN:2850 Brazilian Narrative in Translation** 3 s.h.
Representative readings of modern and contemporary novels, short stories, and other narrative forms; cultural background; focus on major writers. Taught in English. Prerequisites: ENGL:1200. GE: Literary, Visual, and Performing Arts. Same as LAS:2850, PORT:2850.
- SPAN:2900 Music of the Hispanic World** 3 s.h.
Introduction to music of Spain and Latin America, including the United States; listening skills, music appreciation, continuing development of Spanish language skills. Taught in Spanish. Requirements: SPAN:1502 or SPAN:1503. Same as LAS:2900.
- SPAN:2901 Diversity and Cultures in Spain** 3 s.h.
Introduction to diversity of cultures within Spain; political, social, and economic background, cultural movements. Taught in English. GE: Values and Culture.
- SPAN:2910 Hispanic Institute: Study/Life in Spain** 1 s.h.
- SPAN:3000 Writing Skills for Heritage Speakers** 3 s.h.
Development of writing skills in Spanish, focus on expository writing for academic purposes. Taught in Spanish. Requirements: at least two courses taught in Spanish at the 2000 level or above.
- SPAN:3005 Study Abroad in the Hispanic World: Return and Reflect** 3 s.h.
Students integrate culture and language learning achieved in a foreign country into their Spanish studies at the University of Iowa through extensive writing exercises and oral presentations; for students returning from study abroad. Requirements: completion of study abroad program.
- SPAN:3010 Advanced Spanish Speaking and Writing** 3 s.h.
Development of oral proficiency; secondary emphasis on continuing development of writing skills; cultural knowledge of several Spanish-speaking countries. Requirements: two courses taught in Spanish at the 2000 level or above.

- SPAN:3015 Fast Fixes: Improved Spanish in Six Weeks** 1 s.h.
Varied topics focused on improving common problems with Spanish grammar; emphasis on written and oral expression. Requirements: SPAN:2000 or SPAN:2005 or SPAN:3000 or SPAN:3020 or SPAN:3060 or SPAN:3070.
- SPAN:3020 Journalistic Writing in Spanish** 3 s.h.
Spanish writing skills; introduction to style and practice of journalistic reporting and writing. Taught in Spanish. Requirements: at least one course taught in Spanish at the 2000 level or above. Same as JMC:3445.
- SPAN:3030 Translation Workshop: English to Spanish** 3 s.h.
Introduction to translation theory and effective translation processes; examination of potential translation problems in specific areas of English to Spanish translation; primary focus on nonfiction. Requirements: at least one course taught in Spanish at the 2000 level or above.
- SPAN:3035 Translation Practicum: English to Spanish** 1 s.h.
Students develop a plan of work in consultation with instructor and submit a community outreach translation project (English to Spanish) for a local nonprofit organization of their choice, periodical translation reports, and a final portfolio of their work. Taught in Spanish. Prerequisites: SPAN:3030 with a minimum grade of B.
- SPAN:3045 Spanish Health Narratives** 3 s.h.
Narratives are the central communicative act through which humans make sense of wellness and illness, life and death, always within contexts of language and culture; students focus on reading and analyzing narratives about health and health care, and opportunities to create their own narratives; particular emphasis on health care disparities and issues they present for Spanish-language communities in the United States and abroad as context for individual narratives. Taught in Spanish. Requirements: one course numbered SPAN:2000 or above.
- SPAN:3050 Translation Workshop: Spanish to English** 3 s.h.
Spanish to English literary translation; meaning, form and equivalence, authenticity; questions of untranslatability. Requirements: at least one course taught in Spanish at the 2000 level or above.
- SPAN:3060 Introductory Workshop on Creative Writing in Spanish** 3 s.h.
Development of writing skills in Spanish through creative writing. Taught in Spanish. Requirements: one course numbered SPAN:2000 or above.
- SPAN:3070 Introductory Workshop Writing Scripts** 3 s.h.
Development of writing skills in Spanish through writing scripts. Taught in Spanish. Requirements: at least one course numbered SPAN:2000 or above.
- SPAN:3080 Spanish for International Business** 3 s.h.
Tools for effective business communication; linguistic, sociolinguistic, and practical skills for effective oral and written communication developed through discussion of business case studies, presentations, and meetings; selected Spanish and Latin American companies examined through varied media including news and internet; role of transaction intermediaries in international trade. Requirements: at least one course numbered SPAN:3000 or above.
- SPAN:3090 Spanish at Work** 1 s.h.
Uses for a Spanish degree; knowledge and skills gained as a Spanish major that are in high demand among a wide variety of employers; important steps taken as a student that translate unique career dreams into reality; includes work with Pomerantz Career Center staff. Requirements: at least two courses numbered SPAN:2000 or above.
- SPAN:3091 Spanish Creative Literacy Outreach** 1 s.h.
Hands-on outreach experience for Spanish majors and minors who develop and participate in activities for the Spanish Creative Literacy Project. Requirements: SPAN:2000 or SPAN:2005 or SPAN:3000 or SPAN:3020 or SPAN:3060.
- SPAN:3092 Spanish in the Community** 3 s.h.
Students work directly with Spanish speakers through community-based service learning; focus on issues of interest to the local Latina/o/x community, develop oral proficiency, and enhance their civil engagement. Requirements: two courses numbered SPAN:2000 or above.
- SPAN:3095 Spanish Composition and Grammar** 3 s.h.
Development of three types of compositions; selected readings and comprehension activities; vocabulary expansion; grammar review with exercises. Requirements: proficiency in written and oral Spanish, based on several university Spanish classes (about half the coursework towards a Spanish major), plus study abroad experience in a Hispanic country.
- SPAN:3096 Advanced Spanish Grammar** 3 s.h.
Comprehensive grammar review of standard written Spanish; explanations and examples, exercises, videos. Requirements: SPAN:2000 or SPAN:2005 or SPAN:3000 or SPAN:3020 or SPAN:3060 or SPAN:3070.
- SPAN:3100 Structures of Spanish: Words and Sentences** 3 s.h.
Basic concepts and methods for analysis of linguistics as applied to Spanish word formation (morphology), sentence patterns (syntax), and semantic interpretation. Requirements: at least one course taught in Spanish at the 2000 level or above.
- SPAN:3110 Spanish Sound Structure** 3 s.h.
Articulation of Spanish sounds—description and practice; how Spanish sounds are organized into classes, relations among the different classes, how they are implemented in context, patterns they exhibit. Requirements: at least one course taught in Spanish at the 2000 level or above.
- SPAN:3120 Foundations in Sociolinguistics** 3 s.h.
Dialects, speech communities, variation, choosing a code, solidarity and politeness, language and gender, language planning. Requirements: at least one course taught in Spanish at the 2000 level or above.
- SPAN:3130 Introduction to Bilingualism** 3 s.h.
Psycholinguistic and sociolinguistic aspects of bilingualism; language usage, maintenance, attitudes, shift, transfer, loss; code-switching. Requirements: at least one course taught in Spanish at the 2000 level or above.
- SPAN:3150 Spanish Applied Linguistics** 3 s.h.
Concepts of linguistic analysis applied to Spanish; focus on problematic areas of Spanish grammar, lexicon, semantics; introduction to cross-cultural pragmatics; connections between language learning and technology and assessment; ideal for future teachers of Spanish. Requirements: at least one course taught in Spanish at the 2000 level or above.

- SPAN:3170 Introduction to Spanish Language Acquisition** 3 s.h.
Basic principles of language acquisition theory applied to learning Spanish as a first or second language. Requirements: at least one course taught in Spanish at the 2000 level or above. Recommendations: completion of SPAN:3100.
- SPAN:3190 Psycholinguistic Aspects of Bilingualism** 3-4 s.h.
Interaction of two languages in a bilingual in terms of sound system, words, and grammar; different meanings of bilingualism, how bilingualism and multilingualism can change across lifespan. Taught in English. Requirements: linguistics or language acquisition course. Same as FREN:3190, LING:3190.
- SPAN:3191 Introduction to Spanish-English Interpretation (Medical Emphasis)** 1 s.h.
Introduction to Spanish-English language interpretation; focus on history, techniques, types, and practice with emphasis on the medical field. Prerequisites: SPAN:2090 with a minimum grade of B+ or SPAN:2040 with a minimum grade of B+. Requirements: advanced level of oral proficiency and familiarity with basic medical terminology.
- SPAN:3192 Heritage Language Teaching** 3 s.h.
Focus on cutting-edge research and methods to develop adequate curriculum, language courses, and programs for heritage speakers (HS); readings include bilingual development, sociolinguistics, language teaching, and heritage speakers' affective needs; use of these theories to help understand, develop, and apply best practices in teaching HS; topics also help create best practices in teaching mixed language courses for second language (L2) and HS students. Taught in English. Requirements: at least one course taught in Spanish at the 2000 level or above.
- SPAN:3195 Spanish Linguistics Lab I** 1 s.h.
Hands-on research experience collecting and analyzing linguistic data.
- SPAN:3200 Latin American Cultural Studies** 3 s.h.
Interdisciplinary, multiregional approach to Latin American history, society, politics, economics, and culture. Requirements: at least one course taught in Spanish at the 2000 level or above.
- SPAN:3210 Cultural Storytelling** 3 s.h.
Examination of memoir, short story, and journalism from Latin America to distinguish truth from accuracy and individual choices within cultural norms; course will enrich students' Spanish language fluency and writing as well as their knowledge of Latin American cultures. Requirements: at least one course taught in Spanish at the 2000 level or above.
- SPAN:3211 Comparative Arts** 3 s.h.
Cultural and aesthetic issues arising from side-by-side investigation of several art forms, including literature, cinema, painting, music, opera, architecture; periods, schools, styles, and their theories. Taught in English. Same as ASIA:3210, FREN:3210, IWP:3210, RUSS:3210, WLLC:3210.
- SPAN:3215 Medellin** 3 s.h.
Medellin, Colombia has been transformed from one of the most violent places on Earth to an award-winning city of innovation in only 20 years; introduction to the city and its people through literature, music, and a digital map project. Taught in Spanish. Requirements: at least one course numbered SPAN:2000 or above. Same as LAS:3215.
- SPAN:3225 Latin American Women Writers** 3 s.h.
Focus on long tradition of strong female writers in Latin America; materials may include poetry, theater, fiction, and essay from the Spanish-speaking countries of Mexico, Central America, South America, and Brazil. Taught in Spanish. Requirements: at least one course taught in Spanish at the 2000 level or above.
- SPAN:3230 Modern Mexico** 3 s.h.
Twentieth-century Mexican cultural history, including nationalism, gender relations, Indigenous cultures, border issues, and popular culture; materials range from journalistic and literary writing to film, music, images, and television. Requirements: at least one course taught in Spanish at the 2000 level or above.
- SPAN:3240 Mexico City** 3 s.h.
Broad historical survey of Mexico City as center of cultural life in Mexico and Latin America and city of global importance; conquest and contemporary narratives, visual culture, music, and film. Requirements: at least one course taught in Spanish at the 2000 level or above.
- SPAN:3290 Topics in Cinema and Society** 3 s.h.
Concept of national cultures examined through film history in one Latin American nation. Requirements: at least one course taught in Spanish at the 2000 level or above.
- SPAN:3295 Topics in Film and Culture** 3 s.h.
Role of film in cultural transformations; art and politics of film; audiovisual media and culture. Taught in English. Requirements: at least one course in literature and/or culture taught in English or Spanish at the 2000 level.
- SPAN:3310 Spanish American Short Story** 3 s.h.
Works by 19th- and 20th-century Spanish American writers; emphasis on reading strategies and historical, cultural, literary backgrounds. Requirements: at least one course taught in Spanish at the 2000 level or above.
- SPAN:3320 Spanish American Poetry** 3 s.h.
Poetry as a literary genre, short history of its development, early forms in Spanish America, poets from Modernism to present; readings from writers including Rubén Darío, Pablo Neruda, César Vallejo, Octavio Paz, J.L. Borges. Requirements: at least one course taught in Spanish at the 2000 level or above.
- SPAN:3350 Contemporary Spanish American Literature** 3 s.h.
Comprehensive view of 20th-century literature from Spanish-speaking countries in the Americas, including narrative and poetry; examination of issues related to texts and contexts through written and oral analysis. Requirements: at least one course taught in Spanish at the 2000 level or above.
- SPAN:3370 Topics in Literatures and Cultures** 3 s.h.
Literature and culture of specific regions, countries, or cities of Latin America. Requirements: at least one course taught in Spanish at the 2000 level or above.
- SPAN:3400 Chicano Literature and Culture** 3 s.h.
Recent fiction and poetry by Chicano and Chicana writers; readings in Spanish and English. Taught in English. Requirements: satisfaction of GE CLAS Core Interpretation of Literature, or LATS:2280 or SPAN:2280 or HIST:2280. Same as LATS:3400.

- SPAN:3440 Topics in Latina/o/x Literature and Culture** 3 s.h.
Examination of special topics in interdisciplinary field of Latina/o/x studies. Taught in Spanish or English. Requirements: one course taught in Spanish at the 2000 level or above, or LATS:2280 or SPAN:2280 or HIST:2280. Same as LATS:3440.
- SPAN:3500 Topics in Culture of the Hispanic World** 3 s.h.
Specific topics; culture of different parts of Spanish-speaking world, or cross-regional or cross-national cultural phenomenon. Requirements: at least one course taught in Spanish at the 2000 level or above.
- SPAN:3520 Introduction to Film Studies** 3 s.h.
Introduction to film analysis and theory; focus on Latin American and Spanish cinemas in context of international film history. Requirements: at least one course taught in Spanish at the 2000 level or above.
- SPAN:3550 Doing Business in Latin America** 3 s.h.
Introduction to cultural, social, economic, political, and historical contexts of Latin American countries and Spain and their interdependence with the United States; fundamental economic and political concepts necessary to understand the current socioeconomic and political reality of Spanish-speaking countries; students develop the ability to conduct business in Spanish, gaining a working knowledge of business vocabulary, and applying this knowledge in interactive ways. Requirements: at least one course numbered SPAN:2000 or above. Same as LAS:3550.
- SPAN:3600 Cultures of Spain** 3 s.h.
Political, religious, social, economic background; important cultural, literary movements. Requirements: at least one course taught in Spanish at the 2000 level or above.
- SPAN:3610 Hispanic Institute: Culture** 3 s.h.
Overview of geography, history (political, economic, social), architecture, painting, music of Spain; readings, slides, video and audio cassettes, visits to local sites of cultural significance. Requirements: SPAN:1502 or SPAN:1503.
- SPAN:3620 Madrid** 3 s.h.
Contemporary Madrid as one of the premier capital cities of the European Union; history and present day reality of the city; examination of paintings, descriptions, movies, fashion, and customs from several historical periods. Requirements: at least one course taught in Spanish at the 2000 level or above.
- SPAN:3630 Spanish Youth Culture** 3 s.h.
Literary texts, films, and music produced by young people in Spain from 1939 to present; gender issues and relationships between market, popular culture, and high culture. Requirements: one course taught in Spanish at the 2000 level or above.
- SPAN:3690 Iowa Global Internship in Madrid** 3 s.h.
Intensive language and eight-week internship in Madrid through the Tippie College of Business Madrid Internship Program; writing an extensive report in Spanish. Requirements: at least two courses taught in Spanish at the 2000 level or above.
- SPAN:3750 Literature in the Time of Cervantes** 3 s.h.
Introduction to literary questions of 15th to 17th centuries in Spain; understanding of literary Spanish and cultural issues of the period—end of the feudal mind, beginning of individualism, poetry, emergence of theater, crisis of empire. Requirements: at least one course taught in Spanish at the 2000 level or above.
- SPAN:3790 Hispanic Institute: Literature** 3 s.h.
Introduction to poetry, narrative, and theater in Spanish literature; textural commentary and critical interpretations of major representative works of selected historical periods. Requirements: SPAN:1502 or SPAN:1503.
- SPAN:3820 Modern and Contemporary Spanish Literature** 3 s.h.
Works of the last 30 years of the 19th century, up to the outbreak of the Spanish Civil War; Realism, Naturalism, generation of 1898, generation of 1913, generation of 1927. Requirements: at least one course taught in Spanish at the 2000 level or above.
- SPAN:3840 Contemporary Spanish Short Story** 3 s.h.
Contemporary short stories from 20th- and 21st-century Spain; emphasis on reading strategies and interpretation skills; focus on historical and social contexts. Requirements: at least one course taught in Spanish at the 2000 level or above.
- SPAN:3850 Topics in Cultural Studies** 3 s.h.
Specific topics; interdisciplinary approaches; cultural relations of different parts of Portuguese-speaking world, cross-regional or cross-national discourses. Taught in English. Same as PORT:3850.
- SPAN:3999 Spanish Major Ambassadors** 1 s.h.
Students serve as representatives for the Spanish major during class visits and recruiting events; course format includes instruction for presentations and answering questions.
- SPAN:4100 Introduction to Spanish Phonology** 3 s.h.
Sound patterns of Spanish; how various theoretical approaches solve basic problems in Spanish phonology; identification of linguistic universals, how they are manifested in the sound structure of Spanish. Taught in Spanish. Same as SLA:4301.
- SPAN:4140 History of the Spanish Language** 3 s.h.
Development of phonetic, morphological, syntactical properties of the Spanish language from its Latin roots; emphasis on internal history and process of expansion from a minor dialect (Castilian) to a significant world language. Prerequisites: SPAN:3110 or SPAN:3100.
- SPAN:4150 Introduction to Spanish Syntax** 3 s.h.
Basic principles of generative syntax as applied to analysis of Spanish syntactic structure; extensive syntactic analysis. Taught in Spanish. Prerequisites: SPAN:3100. Same as SLA:4300.
- SPAN:4160 Language, Justice, and the Law** 3 s.h.
Focus on language policy, immigrants' linguistic rights, and cultural communication in the context of U.S. law; development of Spanish language skills in legal and cultural contexts. Requirements: two courses in Spanish numbered 3000 or above. Same as LATS:4160.
- SPAN:4170 Second Language Acquisition** 3 s.h.
Linguistic approaches to acquisition of Spanish as a second language. Taught in Spanish. Prerequisites: LING:3001 or LING:3117 or LING:3118 or PSY:2601 or EDTL:4410 or EDTL:4417 or SPAN:3130 or SPAN:3100 or SPAN:3110 or SPAN:3120 or SPAN:3190.
- SPAN:4190 Topics in Hispanic Linguistics** 3 s.h.
Prerequisites: SPAN:3100 or SPAN:3110 or SPAN:3120 or SPAN:3130. Requirements: completion of at least one Hispanic linguistics course.
- SPAN:4195 Spanish Linguistics Lab II** 3 s.h.
Hands-on research experience collecting and analyzing linguistic data. Requirements: at least one linguistics course.

- SPAN:4200 Discourse and Dialogue** 3 s.h.
Discourse analysts and creative writers examine how language is used, analysts on the microlevel of interaction and on the macrolevel of circulation of systems of meaning; writers construct and recreate conversations in fiction and nonfiction prose to develop plot, characters, relationships, and point-of-view; these two approaches to Spanish are brought and used together, conceptually and practically; students read and discuss how analysts and creative writers can learn from each other, then examine topics such as history, ideology, identity, and choice versus structure through analytic and creative writing. Taught in Spanish. Requirements: one course taught in Spanish numbered SPAN:2000 or above.
- SPAN:4205 Culture, Language, and Health** 3 s.h.
Exploration of health, wellness, and illness from a perspective of language and culture; languages we use to describe our mental and physical health that are situated within culture-specific ideas of human bodies, minds, disease, and wellness; understanding where beliefs about health and wellness come from and exploring other systems of belief on their own terms prepares students to be better informed health care practitioners, more aware patients within health care systems, and more sensitive caregivers in health related settings; emphasis on observation, asking questions, and analyzing health care worlds. Taught in Spanish. Requirements: two courses in Spanish numbered 3000 or above. Same as GHS:4205.
- SPAN:4330 Colonial Spanish American Literature** 3 s.h.
Readings from the formative period of Spanish American culture; may include discovery and conquest, ethnicity and gender, dissent and popular resistance. Requirements: two literature courses in Spanish, at least one of which must be numbered SPAN:3300 or above.
- SPAN:4350 Twentieth-Century Spanish American Theater and Performance** 3 s.h.
Introduction to 20th-century Spanish American theater; study of five major playwrights; readings of plays with analysis of performances. Requirements: two literature courses in Spanish, at least one of which must be numbered SPAN:3300 or above.
- SPAN:4360 The Orient in Contemporary Latin American Literature and Culture** 3 s.h.
Orientalism, cultural hybridity, racial and gender construction in contemporary Latin American literature and culture; Latin American identity in era of globalization. Requirements: two literature courses in Spanish, at least one of which must be numbered SPAN:3300 or above.
- SPAN:4390 Topics in Spanish American Literature** 3 s.h.
Taught in Spanish. Requirements: two literature courses in Spanish, at least one of which must be numbered SPAN:3300 or above. Same as LAS:4390.
- SPAN:4620 Spanish Golden Age Fiction** 3 s.h.
Literature and society in first centuries of Spanish Modernity, Renaissance and Baroque periods, love and the self, alienation, utopias, the body and morals, cultural dimensions of genres. Requirements: two literature courses in Spanish, at least one of which must be numbered SPAN:3300 or above.
- SPAN:4630 Society and Poetry: Spanish Lyric** 3 s.h.
Twentieth-century Spanish lyric poetry in its sociocultural context. Requirements: two literature courses in Spanish, at least one of which must be numbered SPAN:3300 or above.
- SPAN:4650 Don Quijote** 3 s.h.
Exploration of Cervantes' *Don Quijote*; sociohistorical context, questions of human existence, literary tradition, metafiction, influence of *Don Quijote* on novelists and filmmakers, critical reception of the text. Requirements: two literature courses in Spanish, at least one of which must be numbered SPAN:3300 or above.
- SPAN:4690 Topics in Spanish Literature** 3 s.h.
Requirements: two literature courses in Spanish, at least one of which must be numbered SPAN:3300 or above.
- SPAN:4805 Chicano Cinema** 3 s.h.
History of Chicano independent and industry film and television production since the Chicano political and cultural movement began in the 1960s. Taught in English. Requirements: one Spanish literature or culture course numbered SPAN:3200 or above, or one film studies course numbered above CINE:2100. Same as CINE:4705, LATS:4805.
- SPAN:4815 Lost Childhoods: Marginal Children of Latin America** 3 s.h.
Focus on lost childhoods from a cultural studies perspective; analysis of marginal perspectives that emerge from a globalized urban landscape; evolution of literary, artistic (art, photography, comics), and film productions about dispossessed children, the construction of childhood by nongovernmental and nonprofit organizations, and how these cultural productions denounce social violence. Taught in Spanish. Requirements: two courses numbered SPAN:3000 or above. Same as LAS:4815.
- SPAN:4820 Latina/o/x Popular Culture** 3 s.h.
Role of Latina/o/x popular culture as a site of contemporary social practice and cultural politics in both local and global contexts; specific attention to notions of citizenship, identity, and culture. Taught in English. Requirements: either one literature or culture course taught in Spanish numbered SPAN:3200 or above, or LATS:2280 or SPAN:2280 or HIST:2280. Same as LATS:4800.
- SPAN:4830 The Hispanic World in the Digital Era** 3 s.h.
Global digital space and construction of culture in Hispanic world; how digital data creates knowledge and ways it represents and impacts societies; power of computer technology to disseminate critical thinking, social outreach, and creative expressions; how digital realities and tools of constant communication promote change. Requirements: two literature or culture courses in Spanish, at least one of which must be numbered SPAN:3300 or above.
- SPAN:4840 Visual Culture in Modern and Contemporary Spain** 3 s.h.
How to analyze different types of images in connection to the social and political developments of modern and postmodern Spain; special attention given to the role that images played in the periods of political turmoil that defined modern Spanish history. Requirements: two courses taught in Spanish and at least one numbered SPAN:3000 or above.
- SPAN:4850 Topics in Cultural Studies** 3 s.h.
Requirements: one literature or culture course taught in Spanish numbered SPAN:3200 or above.
- SPAN:4870 Islamic Cultural Presence in Spain** 3 s.h.
Islamic history and culture in the Iberian Peninsula from Middle Ages to present. Taught in Spanish. Requirements: one literature or culture course taught in Spanish numbered SPAN:3200 or above. Same as RELS:4870.

- SPAN:4880 Comic Books and Graphic Novels in the Hispanic World** 3 s.h.
Analysis of comics and graphic novels from Hispanic world; diverse Hispanic representational perspectives on creativity, humor, storytelling, culture, politics, nationality, and ethnicity; opportunity for students to express their own creativity with comics. Recommendations: two literature or culture courses taught in Spanish, at least one of which must be numbered SPAN:3200 or above.
- SPAN:4900 Latin American Studies Seminar** 3 s.h.
Examination of past, present, and future of Latin America; interdisciplinary. Taught in English. Same as ANTH:4700, HIST:4504, LAS:4700, PORT:4700.
- SPAN:4910 Topics in Literary Studies** 3 s.h.
Requirements: two literature courses in Spanish, at least one of which must be numbered SPAN:3300 or above.
- SPAN:4920 Topics in Film Studies** 3 s.h.
Requirements: one literature or culture course taught in Spanish numbered SPAN:3200 or above.
- SPAN:4925 Topics in Film Narrative** 3 s.h.
Exploration of relationship between film narratives and social systems. Taught in English. Requirements: at least one course in literature and/or culture taught in English or Spanish at the 3000 level.
- SPAN:4950 Advanced Workshop on Creative Writing in Spanish** 3 s.h.
In-depth consideration of characters, dialog, conflict, setting, point of view, other fundamentals of fiction; experience writing short stories and other pieces, with class discussion; fictional texts by renowned writers, authors' essays on their own creative process; narrative strategies of short stories, songs, painting, films. Requirements: one creative writing course in Spanish and one literature course in Spanish numbered SPAN:3300 or above, or two literature courses in Spanish numbered SPAN:3300 or above.
- SPAN:4980 Advanced Translation: Spanish to English** 3 s.h.
Examination of translation through practical exercises and readings related to the problem of working with literature between languages; questions related to style and form as well as historical and cultural distance will be examined. Requirements: SPAN:3030 or SPAN:3050 and one literature course taught in Spanish.
- SPAN:4998 Honors: Research and Thesis** 2-3 s.h.
Requirements: honors standing.
- SPAN:4999 Special Work** 1-3 s.h.
- SPAN:5000 Teaching and Learning Languages** 3 s.h.
Readings in pedagogical theory and practice, second language acquisition; experience designing activities for teaching and assessment with critiques based on current theories and approaches; development of reflective practices toward one's language teaching. Taught in English. Same as FREN:5000, GRMN:5001, SLA:5000, WLLC:5000.
- SPAN:5001 Introduction to Graduate Study** 2 s.h.
Expectations, resources, and opportunities of graduate study; introduction to coursework, development of preprofessional competencies. Taught in English. Same as FREN:5001.
- SPAN:5002 Pedagogical Practicum** 2 s.h.
Practice in lesson design, classroom management techniques, evaluation skills during work with faculty. Requirements: Ph.D. standing.
- SPAN:5003 Professional Training and Development** 1 s.h.
Professional training and preparation for a variety of professional opportunities within and outside of academia. Requirements: Spanish Ph.D. standing.
- SPAN:6110 Spanish Phonology** 3 s.h.
Modern approaches to synchronic phonology as applied to Spanish; focus on traditional descriptive problems, recent generative analyses. Taught in Spanish. Requirements: phonology or linguistics course. Same as SLA:6303.
- SPAN:6120 Spanish Syntax** 3 s.h.
Spanish syntactic constructions examined in framework of selected syntactic theory; emphasis on development of syntactic argumentation. Taught in Spanish. Requirements: one course in syntax. Same as SLA:6304.
- SPAN:6150 Topics in Spanish Language Acquisition** 3 s.h.
Theoretical linguistic approaches to monolingual, bilingual, and second language acquisition of Spanish and Portuguese; varied topics. Taught in Spanish. Requirements: at least one course in linguistics (e.g., general introduction to linguistics). Same as SLA:6301.
- SPAN:6180 Topics in Hispanic Linguistics** 3 s.h.
Taught in Spanish or English.
- SPAN:6190 Topics in Comparative Romance Linguistics** 3 s.h.
Comparative study of phonology, morphology, or syntax of the main Romance languages as informed by linguistic theory; diachronic or synchronic perspective. Taught in English. Recommendations: additional graduate coursework in linguistics. Same as LING:6190, SLA:6302.
- SPAN:6195 Undergraduate Lab Research Supervision** 1 s.h.
Hands-on experience supervising undergraduate students in a research context. Requirements: enrollment in Ph.D. or M.A. program in Spanish linguistics or Ph.D. program in linguistics.
- SPAN:6210 Fiction Workshop** 3 s.h.
Craft of writing short stories; underlying principles examined through lectures, readings, craft analysis, discussions, exercises, and workshops; activities linked with International Writing Program. Requirements: admission to M.F.A. Spanish Creative Writing program.
- SPAN:6220 Poetry Workshop** 3 s.h.
Construction and recognition of poetic voice through readings, analysis, and exercises from different poets and by students; poetic voice in three spaces (diary of poetic prose, collection of poems, object poem). Requirements: admission to M.F.A. Spanish Creative Writing program.
- SPAN:6231 Graphic Novel/Comic Script Workshop** 1,3 s.h.
Basic steps to develop a comic book or a graphic novel; different styles and ways to develop scripts and characters; main authors and their graphic works; students work on possible script or group of characters. Requirements: admission to M.F.A. Spanish Creative Writing program.
- SPAN:6235 Film Script/Theater Workshop** 3 s.h.
Basic steps to developing plays; different styles and ways to develop plays and characters; reading main authors and their plays; student work on a possible play. Requirements: admission to M.F.A. in Spanish Creative Writing program.
- SPAN:6241 Creative Project Development** 3 s.h.
Development of creative project. Requirements: admission to M.F.A. Spanish Creative Writing program.

SPAN:6251 Workshop on Editing a Literary e-Journal 3 s.h.

Plan, produce, write, and edit a literary digital magazine; manage and write for *Iowa Literaria*. Requirements: admission to M.F.A. in Spanish Creative Writing program.

SPAN:6271 Children, Youth Literature 1,3 s.h.

Practice of writing literature for children and youth; reading literary texts in different cultural traditions; how narratives and poems for children or youth are created; using readings as springboards for thinking about ways to write for children and youth; texts for this group of readers. Requirements: admission to M.F.A. Spanish Creative Writing program.

SPAN:6280 Nonfiction Workshop 3 s.h.

Practice of self narrative and construction of the self in literature; readings of self-narrated texts in different literary forms and cultural traditions (from autobiography to testimonial narratives); various ways in which the narrating self is formed and deformed by literary conventions that define him/her; readings as springboards for thinking on ways to write the self; series of autobiographical sketches. Requirements: admission to M.F.A. Spanish Creative Writing program.

SPAN:6295 Practicum Editing a Literary e-Journal arr.

Practice in planning, producing, and editing *Iowa Literaria*. Recommendations: SPAN:6251.

SPAN:6299 Thesis: Creative Writing 3 s.h.

Continuation of work on student manuscript. Requirements: admission to M.F.A. Spanish Creative Writing program.

SPAN:6300 Colonial Spanish American Literature 3 s.h.

Chronicles of the conquest: close reading with focus on role of writing and operations of "othering"; balance between critical secondary sources and primary sources.

SPAN:6320 Contemporary Spanish American Narrative 3 s.h.

Narrative from mid-20th century to present; emphasis on the Boom, post-Boom.

SPAN:6330 Spanish American Narrative: Modern and Regional 3 s.h.**SPAN:6390 Topics in Spanish American Literature** 3 s.h.**SPAN:6600 Medieval Spanish Literature** 3 s.h.

Critical reading of canonical medieval texts in their cultural context; application of modern theory to medieval texts; works such as *El Poema del Cid*, *El Romancero Viejo*, *Milagros de Nuestra Señora*, *El Conde Lucanor*, *El Libro de Buen Amor*.

SPAN:6620 Spanish Renaissance and Baroque Literature 3 s.h.

Critical analysis of social, moral, political function of literature in early modern Spain; Renaissance and Baroque poetry; *La Celestina*; pastoral literature; *Don Quijote*; narratives of the court; modern subjectivity; the question of genre.

SPAN:6660 Contemporary Spanish Fiction 3 s.h.

The post-Franco novel in Spain; literary "postmodernism" and relationships between Spanish literature, politics, and society since 1975; representative significant works.

SPAN:6670 Contemporary Spanish Poetry 3 s.h.

Poetry on the Spanish literary scene circa 1968; authors' reactions to predecessors, their connections with foreign traditions, metapoetry, the aesthetics of culturalism.

SPAN:6680 Contemporary Non-Castilian Narrative Spain 3 s.h.

Readings in Spanish of novels and short stories written in another language of the Spanish state or by a member of one of Spain's non-Castilian historic nationalities.

SPAN:6690 Topics in Spanish Literature 3 s.h.**SPAN:6850 Topics in Literary Studies** 3 s.h.**SPAN:6860 Topics in Cultural Studies** 3 s.h.**SPAN:6901 Second Language Acquisition Research and Theory** 3 s.h.

Theories regarding success and failure in acquisition of second or subsequent languages; research, issues. Taught in English. Same as ASIA:6901, FREN:6901, JPN5:6901, SLA:6901.

SPAN:6904 Crossing Borders Seminar 2-3 s.h.

Taught in English. Same as AFAM:6635, ANTH:6635, CINE:6635, COMM:6635, ENGL:6635, FREN:6142, GEOG:6635, GRMN:6635, HIST:6135, IWP:6635, POLI:6635.

SPAN:6920 Multimedia and Second Language Acquisition 3 s.h.

Combination of theory and practice regarding use of multimedia and technology to enhance foreign language teaching and second language acquisition research. Taught in English. Same as FREN:6920, GRMN:6920, SLA:6920.

SPAN:6950 Topics in Second Language Acquisition: Speaking 3 s.h.

Theory, pedagogy, research, and assessment in second language speaking. Taught in English. Same as FREN:6950, SLA:6950.

SPAN:6965 Topics in Second Language Acquisition: Writing 3 s.h.

Theory, pedagogy, research, and assessment in second language writing. Taught in English. Same as RHET:6965, SLA:6965.

SPAN:6998 Special Work arr.**SPAN:6999 Thesis** arr.**SPAN:7000 Seminar: Spanish Linguistics** 3 s.h.

Taught in Spanish. Same as LING:7000.

SPAN:7200 Seminar: Literary Studies 3 s.h.

Specific topics on aspects of Spanish and/or Spanish American literature.

SPAN:7300 Seminar: Cultural Studies 3 s.h.

Specific topics in Spanish and/or Spanish American cultural studies.

SPAN:7505 Readings: Latin American History arr.

Introduction to historiography in the field of Latin American history; students deepen their understanding of the region's history and become acquainted with trends in topical concerns, sources, and methods that are shaping historical research on Latin America's past. Taught in English. Same as HIST:7505.

Portuguese Courses

PORT:1000 First-Year Seminar 1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first-semester standing.

- PORT:2000 Accelerated Elementary Portuguese 5 s.h.**
First-year course in one semester; comprehending, speaking, reading, writing modern Portuguese; emphasis on speaking; previous knowledge of Portuguese not required. GE: World Languages Second Level Proficiency.
- PORT:2010 Elementary Portuguese I 3 s.h.**
Emphasis on oral and written skills; first in a series; no previous knowledge of Portuguese necessary. Recommendations: no previous study of Portuguese. GE: World Languages First Level Proficiency.
- PORT:2015 Elementary Portuguese II 3 s.h.**
Emphasis on oral and written skills; second in a series. Requirements: PORT:2010. GE: World Languages Second Level Proficiency.
- PORT:2500 Accelerated Intermediate Portuguese 5 s.h.**
Second-year course in one semester; reading comprehension, oral and writing skills; grammar review. Requirements: PORT:2000. GE: World Languages Fourth Level Proficiency.
- PORT:2700 Introduction to Latin American Studies 3 s.h.**
Cultures of Latin American countries with emphasis on cultural history and cultural production; interdisciplinary survey. Taught in English. Same as COMM:2800, IS:2700, LAS:2700, SPAN:2700.
- PORT:2850 Brazilian Narrative in Translation 3 s.h.**
Representative readings of modern and contemporary novels, short stories, and other narrative forms; cultural background; focus on major writers. Taught in English. Prerequisites: ENGL:1200. GE: Literary, Visual, and Performing Arts. Same as LAS:2850, SPAN:2850.
- PORT:3050 Intensive Portuguese for Spanish Speakers 4 s.h.**
Systematic differences and similarities between Spanish and Portuguese; emphasis on reading, writing. Requirements: graduate standing or undergraduate Spanish heritage speaker.
- PORT:3100 Writing and Speaking 3 s.h.**
Speaking and writing skills through discussion, oral presentations, grammar and vocabulary review, composition. Requirements: PORT:2500.
- PORT:3150 Topics in Portuguese Language 3 s.h.**
Various aspects of Portuguese language use. Requirements: one course numbered PORT:2500 or above.
- PORT:3400 Brazilian Literature After 1900 3 s.h.**
Modern and contemporary representative readings from all periods and genres; focus on works of major Brazilian authors. Taught in Portuguese. Requirements: one course numbered PORT:2500 or above.
- PORT:3850 Topics in Cultural Studies 3 s.h.**
Specific topics; interdisciplinary approaches; cultural relations of different parts of Portuguese-speaking world, cross-regional or cross-national discourses. Taught in English. Same as SPAN:3850.
- PORT:3999 Major Ambassadors 1 s.h.**
Students serve as representatives for Spanish and Portuguese majors during class visits and recruiting events; course format includes instruction for presentations and answering questions. Same as SPAN:3999.
- PORT:4000 Topics in Luso-Brazilian Literature 3 s.h.**
Study of genres, themes, and movements. Taught in Portuguese. Requirements: one course numbered PORT:2500 or above.
- PORT:4100 Topics in Luso-Brazilian Culture 3 s.h.**
Study of past, present, and future of Portuguese-speaking countries; interdisciplinary. Taught in Portuguese. Requirements: PORT:2500.
- PORT:4700 Latin American Studies Seminar 3 s.h.**
Examination of past, present, and future of Latin America; interdisciplinary. Taught in English. Same as ANTH:4700, HIST:4504, LAS:4700, SPAN:4900.
- PORT:4995 Portuguese Senior Project 3 s.h.**
Voluntary student-initiated projects outside the classroom; designed or executed during senior year; similar to independent study, but based on research and completed in close consultation with a faculty mentor. Requirements: at least one course taught in Portuguese numbered PORT:4000 or above.
- PORT:4998 Special Work 1-3 s.h.**
Independent study arranged between student and a faculty member to complete requirements for the major in Portuguese.
- PORT:4999 Honors Research and Thesis 2-3 s.h.**
Requirements: honors standing.

Spanish, B.A.

The Spanish major is built on coursework in Spanish Peninsular and Spanish American literature, Hispanic cultures, Hispanic linguistics, and advanced language skills. The goal of the major is twofold: to study content areas related to the Spanish language, such as literature, culture, and linguistics; and to develop proficiency in the Spanish language in all four skills—speaking, listening, reading, and writing.

Learning Outcomes

By graduation, Spanish majors will have:

- Proficiency—increased Spanish language proficiency in speaking, writing, listening, and reading.
- Analytical skills—acquired the skills to engage critically with one or more of the following areas.
 - Spanish, Spanish American, and U.S. Latino literatures and cultures
 - Hispanic linguistics
 - Creative and/or journalistic writing
 - Second language acquisition and/or pedagogy
 - Literatures and cultures of the Portuguese-speaking world
- Knowledge—gained knowledge of the diversity of the Hispanic world (Spain/Portugal, Latin America, and the United States) and its cultural, artistic, and linguistic history.

Advising

First-year students are initially advised by the Academic Advising Center. Second-year students are advised by the Division of World Languages, Literatures and Cultures academic advisor. Third- and fourth-year students are advised by a faculty advisor who guides a student regarding academic or career-focus experiences and opportunities.

Requirements

The Bachelor of Arts with a major in Spanish requires a minimum of 120 s.h., including at least 36 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. A maximum of 15 s.h. of approved transfer credit may be counted toward the major. Students also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 20].

Coursework for the major includes a core, which consists of one course from each of the five principal academic areas of the department (see "Required Core" below), and seven electives, which may focus on one or more of the five principal areas or may include a broad range of courses (see "Electives" below).

All courses taken for the Spanish major must be numbered SPAN:2000 or above. Advanced Placement Program (AP) credit is considered to be equivalent to a Spanish course at the 2000 level. Students may count 3 s.h. in AP Spanish Language and Culture or Literature and Culture exams with a score of a 4 or higher as elective credit toward the major. See "Electives" below.

A minimum of one and a maximum of four courses for the major must be numbered 2000-2999, including AP credit. At least three courses for the major must be numbered

4000-4999, and students can either count these as core courses or as elective courses.

Advanced undergraduate students preparing to earn honors may enroll in graduate courses with the permission of their advisor and the department chair. Ordinarily, permission is granted only to students who have completed a minimum of 30 s.h. of work for the major and whose g.p.a. in the major is 3.75 or higher.

Students may apply up to 6 s.h. of approved coursework taught in English or Portuguese toward the major. This includes coursework taught in the Department of Spanish and Portuguese or in another department, as approved by their advisor. All other courses for the major must be taught in Spanish. Courses taught in English are listed below.

Spanish Courses Taught in English

Code	Title	Hours
SPAN:2001	Global Science Fiction	3
SPAN:2050	Spanish in the United States	3

Electives

Code	Title	Hours
Seven elective courses in Spanish numbered SPAN:2000 or above		21

Students choose elective coursework according to the following guidelines.

Electives may include coursework in Spanish language skills as well as more advanced language courses that focus on specialized language functions and purposes. They also may include a maximum of 6 s.h. earned in Portuguese courses numbered PORT:2500 or above or in related courses at the appropriate level offered by other University of Iowa departments and programs, such as history, anthropology, international studies, or linguistics. Related courses must be approved by the director of undergraduate studies; for a list of approved related courses, contact the Department of Spanish and Portuguese.

The following courses are only applicable toward the Spanish major as electives.

Code	Title	Hours
SPAN:2010	Spanish Language Skills: Speaking	3
SPAN:2020	Hispanic Institute: Language	3
SPAN:2030	Study of Language: Myths and Concepts	3
SPAN:2040	Spanish for Heritage Speakers	3
SPAN:2050	Spanish in the United States	3
SPAN:2060	Spanish Pronunciation	4
SPAN:2080	Business Spanish	4
SPAN:2090	Medical Spanish in Contemporary Society	4
SPAN:2095	Activities Attendance for Spanish Majors	1

SPAN:3211	Comparative Arts	3
SPAN:3295	Topics in Film and Culture	3
SPAN:3690	Iowa Global Internship in Madrid	3
SPAN:3850	Topics in Cultural Studies	3
SPAN:3999	Spanish Major Ambassadors	1
SPAN:4910	Topics in Literary Studies	3
SPAN:4925	Topics in Film Narrative	3
SPAN:4980	Advanced Translation: Spanish to English	3

A maximum of 3 s.h. earned in PORT:2500 Accelerated Intermediate Portuguese may be counted toward the major. The following Spanish and Portuguese courses do not count toward the major and may not be used as elective credit.

Code	Title	Hours
PORT:2000	Accelerated Elementary Portuguese	5
PORT:2010	Elementary Portuguese I	3
PORT:2015	Elementary Portuguese II	3

Study Abroad

The department participates in study abroad programs in Spain and Latin America; most of these programs offer both summer and semester or yearlong programs. The programs in Spain include the Board of Regents Hispanic Institute program in Valladolid (summer only); Cultures of Spain (Madrid, summer only), USAC (University Studies Abroad Consortium) programs in Alicante, Bilbao, Madrid, and San Sebastián; and CIEE programs in Alcalá de Henares, Alicante, Barcelona, Madrid, Palma de Mallorca, and Seville.

The programs in Latin America include USAC programs in Chile (Santiago) and Costa Rica (Heredia, Puntarenas, and

San Ramón); CIEE programs in Argentina (Buenos Aires), Chile (Santiago and Valparaíso), Dominican Republic (Santiago), and Peru (Lima). They also include the CIC Latin America Health, Nutrition, and Environmental Issues Program in Santiago, Dominican Republic. For information about other international study programs in Spanish, contact International Programs Study Abroad.

Participation in a number of different programs allows the department to offer study abroad opportunities that take into account a variety of student interests and needs. Credit earned in these or other study abroad programs may be applied toward the requirements for the Spanish major. The amount of credit that may be accepted varies according to the program.

Interested students should contact the department's study abroad advisor. Credit earned in study abroad programs other than those listed above counts as transfer credit and is subject to the 15 s.h. maximum allowed for the major.

Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.

To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Teacher Education Program Application and Admission on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

Honors

Honors in the Major

Students have the opportunity to graduate with honors in the major. They must have a cumulative University of Iowa g.p.a. of at least 3.33 and a g.p.a. of at least 3.50 in the major in order to enter the honors program, and are required to maintain the same grade-point average requirements to earn honors in the major.

Students must request honors designation for one course they take for the major (3 s.h.), in consultation with the department honors advisor. They also must register for 3 s.h. in SPAN:4998 Honors: Research and Thesis. To complete SPAN:4998 successfully, students must submit an honors thesis they have written in Spanish and must present it orally to a faculty committee in a meeting conducted in Spanish.

University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the University's honors program.

Membership in the UI Honors Program is not required to earn honors in the Spanish major.

Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Before the third semester begins: Intermediate Spanish I (or equivalent second-year, first-semester competence in Spanish)

Before the fifth semester begins: two courses in Spanish beyond Intermediate Spanish II (or equivalent second-year, second-semester competence)

Before the seventh semester begins: four more courses in the major and at least 90 s.h. earned toward the degree

Before the eighth semester begins: nine courses in the major

During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

-------------	---------

- a SPAN:1001, SPAN:1002, SPAN:1501, and SPAN:1502 do not count for credit toward the major. Language level placement will be determined by placement exam score and/or oral interview. Students who place into the 5th semester level of the language will begin major level coursework and not be required to take semesters 1-4 of the language.
- b Fulfills a major requirement and may fulfill a GE requirement.
- c Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
- d GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
- e Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.

f A minimum of one and a maximum of four courses for the major must be numbered 2000-2999. At least three courses for the major must be numbered 4000-4999. Students may apply up to 6 s.h. of approved coursework taught in English or Portuguese toward the major. All other courses for the major must be taught in Spanish, including study abroad courses.

g Students must complete 21 s.h. in Spanish major electives. Electives may include a maximum of 6 s.h. earned in Portuguese courses numbered PORT:2500 or above or in related courses at the appropriate level offered by other UI departments and programs, such as history, anthropology, comparative literature, international studies, or linguistics. Related courses must be approved.

h Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>. If applicable search for "Early and Late Participation" to find this page (e.g. participate in graduation ceremony in May, degree conferral in August).

Career Advancement

Spanish majors combine their Spanish studies with other areas to prepare for career opportunities in international business, government, travel, health, journalism, law, or communication, where knowledge of another language and other cultures is essential. They also may go on to graduate study in areas such as Spanish and Spanish American literature, Hispanic linguistics, or comparative literature.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Portuguese, B.A.

Portuguese is widely spoken in four continents and is the official language of eight countries: Angola, Brazil, Cape Verde, East Timor, Guine-Bissau, Mozambique, Portugal, and São Tome and Principe. Portuguese is the third most spoken European language (after English and Spanish) and the sixth most spoken language in the world. Brazil is the largest country in South America, comparable in size with the United States. Knowledge of Portuguese and of Luso-Brazilian culture is a marketable skill.

Learning Outcomes

By graduation, Portuguese majors will have:

- enhanced language proficiency and cultural awareness of the Portuguese-speaking world; and
- attained skills to engage critically with histories, cultures, literatures, and other arts, and gained knowledge of the diversified Lusophone world (Angola, Brazil, Cape Verde, East Timor, Guinea Bissau, Mozambique, Portugal, São Tome and Principe).

Requirements

The Bachelor of Arts with a major in Portuguese requires a minimum of 120 s.h., including at least 33 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 20]. Furthering Language Incentive Program (FLIP) credit may not be counted toward the major.

Students must take at least one course in Portuguese (prefix PORT) numbered 4000 or above. No more than 9 s.h., with approval of advisor, may be taken in courses that are not Portuguese courses (prefix PORT). Students must complete PORT:2500 Accelerated Intermediate Portuguese or the equivalent before they complete any other requirements for the major. They may only apply 3 s.h. earned in PORT:2500 toward the major. Two courses (6 s.h.) taught in English and two courses (6 s.h.) taught in Spanish numbered SPAN:2000 or above may count toward the major. Students can identify courses taught in English by viewing the course description for each course.

These courses do not count toward the 33 s.h. of work for the major.

Code	Title	Hours
PORT:1000	First-Year Seminar	1
PORT:2010	Elementary Portuguese I	3
PORT:2015	Elementary Portuguese II	3
PORT:3050	Intensive Portuguese for Spanish Speakers	4

The B.A. with a major in Portuguese requires the following courses or their equivalents.

Code	Title	Hours
	Language Skills Course	3
	Literature Courses	6
	Culture Courses	6
	Electives	18
	Total Hours	33

Language Skills Course

Code	Title	Hours
One of these:		
PORT:3100	Writing and Speaking	3
PORT:3150	Topics in Portuguese Language (repeatable)	3

Literature Courses

Code	Title	Hours
Two of these:		
PORT:2850	Brazilian Narrative in Translation	3
PORT:3400	Brazilian Literature After 1900	3
PORT:4000	Topics in Luso-Brazilian Literature (repeatable)	3

Culture Courses

Code	Title	Hours
Two of these; however, PORT:4100 must be taken at least once:		
PORT:3850	Topics in Cultural Studies	3
PORT:4100	Topics in Luso-Brazilian Culture (repeatable; taught in Portuguese)	3
PORT:4700	Latin American Studies Seminar	3

Electives

Students may not use a course as an elective that has been applied toward another requirement.

Code	Title	Hours
At least 18 s.h. from these:		
PORT:2500	Accelerated Intermediate Portuguese (students may only apply 3 s.h. toward the major)	5
PORT:2700	Introduction to Latin American Studies	3
PORT:2850	Brazilian Narrative in Translation	3
PORT:3100	Writing and Speaking	3
PORT:3150	Topics in Portuguese Language (repeatable)	3
PORT:3400	Brazilian Literature After 1900	3
PORT:3850	Topics in Cultural Studies	3
PORT:4000	Topics in Luso-Brazilian Literature (repeatable)	3
PORT:4100	Topics in Luso-Brazilian Culture (repeatable)	3
PORT:4700	Latin American Studies Seminar	3
PORT:4995	Portuguese Senior Project	3
PORT:4998	Special Work	1-3
PORT:4999	Honors Research and Thesis	2-3

Study Abroad

Credit earned in study abroad programs other than those listed above counts as transfer credit and is subject to the 15 s.h. maximum allowed for the major. Contact International Programs Study Abroad for details.

Honors

Honors in the Major

Students have the opportunity to graduate with honors in the major. They must have a cumulative University of Iowa g.p.a. of at least 3.33 and a g.p.a. of at least 3.50 in the major in order to enter the honors program, and are required to maintain the same grade-point average requirements to earn honors in the major.

Students must earn 3 s.h. in PORT:4999 Honors Research and Thesis plus 3 s.h. in a course chosen in consultation with the department honors advisor. Both courses (6 s.h.) count toward the total 33 s.h. required for the major in Portuguese. Students also must write an honors thesis and present it orally to a committee of three faculty members.

University of Iowa Honors Program

In addition to honors in the major, students have a variety of opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the University's honors program.

Membership in the UI Honors Program is not required to earn honors in the Portuguese major.

Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Before the third semester begins: competence in first-year Portuguese

Before the fifth semester begins: competence in intermediate Portuguese

Before the seventh semester begins: three or four additional courses for the major and at least 90 s.h. earned toward the degree

Before the eighth semester begins: seven courses in the major

During the eighth semester: enrollment in remaining major coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

If applicable search for "Early and Late Participation" to find this page (e.g. participate in graduation ceremony in May, degree conferral in August).

Career Advancement

Graduates have reported securing positions in multinational companies, international agencies, import/export companies, government tourism, research institutes, health institutions, the arts, graduate schools, and with the airlines, to name just a few. Portuguese can help students prepare to work in diverse fields such as banking, diplomacy, journalism, publishing, advertising, social services, media, law, and academia.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Spanish, Minor

Requirements

The undergraduate minor in Spanish requires a minimum of 18 s.h. in Spanish courses, including at least 15 s.h. in Department of Spanish and Portuguese courses at the University of Iowa numbered SPAN:2000-SPAN:4998. At least 6 s.h. must be numbered SPAN:3000-SPAN:4998. Students must maintain a g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.

Students can count coursework toward the minor in study abroad programs that earn University of Iowa resident credit. At least one course for the minor must be a literature, culture, or Hispanic linguistics course. For a list of courses, see Requirements [p. 1051] in the B.A. in Spanish section of the Catalog and view the appropriate areas.

Students can apply one University of Iowa course taught in English toward the minor (see "Spanish Courses Taught in English" below), but all other courses for the minor must be taught in Spanish.

In consultation with their advisor, students also may choose to count 3 s.h. toward their Spanish minor from:

coursework in Spanish at the University of Iowa below the major level (such as SPAN:1502 Intermediate Spanish II); or

transfer credit approved by the department, including credit from study abroad programs sponsored by other universities; or

Advanced Placement Program (AP) Spanish Language and Culture or Literature and Culture exams with a score of 4 or higher; or

incentive credit earned from the Furthering Language Incentive Program (FLIP).

Study Abroad

The department participates in study abroad programs in Spain and Latin America; most of these programs offer both summer and semester or yearlong programs. The programs in Spain include the Board of Regents Hispanic Institute program in Valladolid (summer only); Cultures of Spain (Madrid, summer only), USAC (University Studies Abroad Consortium) programs in Alicante, Bilbao, Madrid, and San Sebastián; and CIEE programs in Alcalá de Henares, Alicante, Barcelona, Madrid, Palma de Mallorca, and Seville.

The programs in Latin America include USAC programs in Chile (Santiago) and Costa Rica (Heredia, Puntarenas, and San Ramón); CIEE programs in Argentina (Buenos Aires), Chile (Santiago and Valparaíso), Dominican Republic (Santiago), and Peru (Lima). They also include the CIC Latin America Health, Nutrition, and Environmental Issues Program in Santiago, Dominican Republic. For information about other international study programs in Spanish, contact International Programs Study Abroad.

Participation in a number of different programs allows the department to offer study abroad opportunities that take into account a variety of student interests and needs. Credit earned in these or other study abroad programs may be applied toward the requirements for the Spanish minor. The amount of credit that may be accepted varies according to the program.

Interested students should contact the department's study abroad advisor. Credit earned in study abroad programs other than those listed above counts as transfer credit and is subject to the 3 s.h. maximum allowed for the minor.

Teacher Licensure

Students who plan to use their work toward a minor in Spanish as academic background for earning teacher licensure should contact the Office of Student Services in the College of Education about requirements.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Spanish, Minor

Course	Title	Hours

- a Language level placement will be determined by placement exam score and/or oral interview. Students who place into the 5th semester level of the language will begin coursework at that level and will not be required to take semesters 1-4 of the language.
- b This course is a prerequisite for the required minor courses.
- c Students may also choose to take a Spanish elective (prefix SPAN) or AP/FLIP credit.
- d Students may choose to count 3 s.h. toward their Spanish minor from one of the following four choices: coursework below the major level (such as SPAN:1502); transfer credit approved by the department, including from study abroad programs sponsored by other universities; Advanced Placement Program (AP) Spanish Language and Culture or Literature and Culture exams with a score of 4 or higher; incentive credit earned from the Furthering Language Incentive Program (FLIP).

- e Students can apply one University of Iowa course or one study abroad course (3 s.h.) taught in English toward the minor, but all other courses for the minor must be taught in Spanish. Spanish courses taught in English include: SPAN:2001, SPAN:2050, SPAN:2280, SPAN:2700, SPAN:2850, SPAN:2901, SPAN:3190, SPAN:3192, SPAN:3211, SPAN:3295, SPAN:3400, SPAN:3440, SPAN:3850, SPAN:3999, SPAN:4805, SPAN:4820, SPAN:4900, and SPAN:4925.
- f At least one course for the minor must be a literature, culture, or Hispanic linguistics course.

Portuguese, Minor

Requirements

The undergraduate minor in Portuguese requires a minimum of 15 s.h. in Portuguese courses, including 12 s.h. in University of Iowa courses numbered PORT:2500 or above; credit earned in a University of Iowa study abroad program also may be counted toward the minor. Students must maintain a g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass. Furthering Language Incentive Program (FLIP) credit may not be applied toward the minor. A maximum of 3 s.h. of transfer credit may be applied toward the minor.

Students may apply up to 3 s.h. from PORT:2500 Accelerated Intermediate Portuguese toward the minor. One 3 s.h. course taught in English in the Department of Spanish and Portuguese or one course taught in Spanish numbered SPAN:2000 or above can be applied toward the minor, but not both. All other courses must be numbered PORT:2500 or above. Students can identify courses taught in English by viewing the course description for each course.

All students planning to complete a minor in Portuguese are strongly encouraged to consult with Portuguese faculty advisors.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

- This course is a prerequisite for the required minor courses.
- Alternately, students may substitute PORT:2010 and PORT:2015 for PORT:2000.
- Language level placement will be determined by placement exam score and/or oral interview. Students who place into the 5th semester level of the language will begin coursework at that level and will not be required to take semesters 1-4 of the language.
- Students may apply up to 3 s.h. from PORT:2500 toward the minor.
- One 3 s.h. course taught in English in the Department of Spanish and Portuguese or one course taught in Spanish numbered SPAN:2000 or above can be applied toward the minor, but not both. All other courses must be numbered above PORT:2500. Students can identify courses taught in English by viewing the course description for each course.

Spanish, M.A.

Requirements

The Master of Arts program in Spanish requires 30 s.h. of graduate credit. A maximum of 9 s.h. of graduate credit in approved courses may be transferred from other institutions toward the 30 s.h. required for the M.A. degree. Students must maintain a cumulative g.p.a. of at least 2.75 to earn the degree.

Students choose one of two emphases: literature, which provides training in literary analysis and broad knowledge of representative works in principal areas of Hispanic literature; or linguistics, which provides training in linguistic analysis and argumentation and broad knowledge of the principal subfields of Hispanic linguistics.

The M.A. with a major in Spanish requires the following 10 courses.

Literature Emphasis Courses

Code	Title	Hours
All of these:		
WLLC:5000	Teaching and Learning Languages	3
One course in Spanish linguistics numbered SPAN:4000 or above		3
Two courses in Spanish (peninsular) literature numbered SPAN:4000 or above		6
Two courses in Spanish American literature numbered SPAN:4000 or above		6
One course in literary theory		3
Three electives		9

At least eight of the ten literature emphasis courses must be taken in Department of Spanish and Portuguese courses numbered 5000 or above. The remaining two may be taken in Department of Spanish and Portuguese courses numbered 4000 or above or in courses offered by related departments, subject to approval by the director of graduate studies.

Linguistics Emphasis Courses

Code	Title	Hours
All of these:		
WLLC:5000	Teaching and Learning Languages	3
One course in Spanish or Spanish American literature numbered SPAN:4000 or above		3
Two courses in syntax		6
Two courses in phonetics/phonology		6
One course in history of the Spanish language or sociolinguistics/language variation		3
One course in applied linguistics or language acquisition		3
Two electives		6

At least six of the ten linguistics emphasis courses must be taken in Department of Spanish and Portuguese courses numbered 5000 or above. The remaining four may be taken in Department of Spanish and Portuguese courses numbered 4000 or above or in Department of Linguistics courses (prefix LING).

Language Tool Requirement

Students must complete the equivalent of one year of college-level study of any approved second foreign language; Portuguese is highly recommended. They may satisfy this requirement either by examination or through courses taken at the University of Iowa or another accredited university; such coursework does not count toward the 30 s.h. required for the degree.

Examinations

The comprehensive examination includes written and oral components. The written portion consists of a two-hour examination in each of three areas; an oral examination follows, usually lasting 90 minutes. The examining committee is composed of four departmental faculty members.

Students in the literature emphasis may choose to be examined in three literature areas or in two literature areas and one linguistics area. At least one literature area must be in Spanish literature and at least one must be in Spanish American literature. If three literature areas are chosen, at least one must represent literature written before 1700 (peninsular or Spanish American).

Students in the linguistics emphasis may choose to be examined in three linguistics areas or in two linguistics areas and one literature area. At least one of the linguistics areas must be in syntax or phonology. For students in both emphases, the third examination area may be a film area.

For reading lists, contact the Department of Spanish and Portuguese.

Graduate Study Loads

Maximum course registration for all graduate students is 15 s.h. of graduate-level coursework in fall or spring semesters and 12 s.h. of graduate-level work in summer sessions. Students with one-quarter-time and one-third-time teaching assistantships are permitted to register for the maximum study loads. Students who hold one-half-time assistantships are permitted to register for a maximum of 12 s.h. in fall and spring semesters and 6 s.h. in summer sessions. Students must have approval from the Graduate College to register for additional semester hours.

The minimum course registration is 1 s.h. for all graduate students. Students who fail to register for 36 months must apply for readmission to the Graduate College.

Admission

Applicants to the M.A. program should have completed the equivalent of the undergraduate Spanish major with a g.p.a. of at least 3.00 in coursework for the major.

Financial Support

Teaching and research assistantships are available to qualified graduate students. Usually, two years of support are available for completion of the M.A. degree. Applications for financial support should be made directly to the Department of Spanish and Portuguese.

Career Advancement

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Spanish Creative Writing, M.F.A.

Requirements

The Master of Fine Arts program in Spanish creative writing requires 48 s.h. of graduate credit earned over four semesters in residence at the University of Iowa. Students complete courses in writing, including several workshops and other relevant coursework. They also are required to do a final public reading in the spring semester of their second year. Work toward the degree culminates in a creative thesis.

Students must enroll in SPAN:6210 Fiction Workshop and SPAN:6220 Poetry Workshop during each year of residence in the program. Groups of 8-12 students read and critique each other's work in these courses.

For more information, visit the Master of Fine Arts in Spanish Creative Writing web page.

The M.F.A. with a major in Spanish creative writing requires the following coursework.

Required Courses

Code	Title	Hours
All of these:		
SPAN:6210	Fiction Workshop (taken twice for 3 s.h. each)	6
SPAN:6220	Poetry Workshop (taken twice for 3 s.h. each)	6
Four graduate-level courses offered by the Department of Spanish and Portuguese		12
Four additional courses offered by the M.F.A. program in Spanish creative writing, the Department of Spanish and Portuguese, or related units in consultation with faculty advisor		12
9 s.h. from these:		
SPAN:6241	Creative Project Development (course may be taken more than once)	3
SPAN:6280	Nonfiction Workshop	3

Thesis

Students submit their graduate thesis, a manuscript of substantial length, during their last semester, and must enroll in SPAN:6299 Thesis: Creative Writing. The thesis committee is composed of at least three members: two faculty members in the Spanish creative writing program and a third Department of Spanish and Portuguese faculty member who could be part of the creative writing program, or a faculty member from one of the related units—Center for the Book, the Creative Writing Program (Iowa Writers' Workshop), or the International Writing Program.

Code	Title	Hours
SPAN:6299	Thesis: Creative Writing	3

Graduate Study Loads

Maximum course registration for all graduate students is 15 s.h. of graduate-level coursework in fall or spring semesters and 12 s.h. of graduate-level work in summer sessions. Students with one-quarter-time and one-third-time teaching

assistantships are permitted to register for the maximum study loads. Students who hold one-half-time assistantships are permitted to register for a maximum of 12 s.h. in fall and spring semesters and 6 s.h. in summer sessions. Students must have approval from the Graduate College to register for additional semester hours.

The minimum course registration is 2 s.h. for all graduate students. Students who fail to register for 36 months must apply for readmission to the Graduate College.

Admission

In order to receive full consideration for financial aid, applications to the program should be received from October 1 to January 15.

Financial Support

Teaching and research assistantships are available to qualified graduate students. Applications for financial support should be made directly to the Department of Spanish and Portuguese.

Career Advancement

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Spanish, Ph.D.

Requirements

The Doctor of Philosophy program in Spanish requires a total of at least 72 s.h. of graduate credit. In this research-oriented degree, Ph.D. students choose from two different tracks: literatures/cultures and Hispanic linguistics. The literatures/cultures track trains students in textual analysis and literary history, criticism, and theory. The linguistics track provides training in linguistic analysis and theory. All courses taken to fulfill the semester hour requirement for the degree must be taken on a graded basis; no graduate credit is awarded for a grade lower than C-minus. To remain in good standing in the Graduate College, students must maintain a cumulative g.p.a. of at least 3.00.

Both tracks require a specified number of semester hours of coursework, of which up to, but not more than, 30 s.h. (10 courses) may be counted from the M.A. in Spanish or the M.F.A. in Spanish creative writing at the University of Iowa or elsewhere, as approved by the director of graduate studies. The Ph.D. also requires 3-15 s.h. for the thesis in SPAN:6999 Thesis. The degree also requires successful completion and defense of a dissertation representing original research or creative work.

No credit is awarded for coursework completed after the M.A. is granted and prior to entrance into the Ph.D. program. If, in the course of doctoral study, the advisory committee recommends a student take coursework at another institution, the student may petition the director of graduate studies well in advance of undertaking the coursework, for approval of up to 9 s.h. of transfer credit. At least 39 s.h. of the 72 s.h. required for the degree must be in coursework taken at the University of Iowa.

Students who hold a teaching assistantship in the department are required to take WLLC:5000 Teaching and Learning Languages, a course in foreign language teaching methods. A student who has not earned the M.A. in Spanish or the M.F.A. in Spanish creative writing at the University of Iowa may request that this requirement be waived because of previous coursework in foreign language teaching methods. The decision to waive the requirement is made by the Spanish CLAS Core director; no transfer credit is awarded toward the 72 s.h. required for the degree.

Course requirements for each track are as follows.

Literatures/Cultures Track

Courses

Students must complete at least 36 s.h. (12 courses) beyond the master's degree (or 22 courses beyond the bachelor's degree). The following courses are required; courses taken for the M.A. may be used to meet part of this requirement.

Code	Title	Hours
All of these:		
SPAN:5002	Pedagogical Practicum	2
	Proseminar course focused on professional training and development	1
	Three courses in Spanish American literature or culture; at least one course must be in pre-1700 literature	9

Three courses in Spanish literature or culture; at least one course must be in pre-1700 literature	9
--	---

Six courses chosen in conjunction with advisor (students approved for a creative writing dissertation must take at least three graduate courses in Spanish creative writing, and students approved for a literary or cultural studies dissertation must take at least three graduate courses in Spanish or Spanish American literature or culture)	18
SPAN:6999 Thesis	3

The specific plan of study for students, tailored to their area of emphasis, must be approved by their advisory committee by the end of the first semester in the Ph.D. program. Coursework must be numbered at the 5000 to 7000 level.

Students are encouraged to complete a graduate certificate. University of Iowa graduate certificates that complement the literatures/cultures track include the Certificates in Book Studies/Book Arts and Technologies [p. 1570]; College Teaching [p. 1575]; Gender, Women's, and Sexuality Studies [p. 530]; Literary Translation [p. 772]; Online Teaching [p. 1316]; and Public Digital Humanities. [p. 1626]

Language Tool Requirement

Students in this track must complete the equivalent of three years of college-level study in one language.

Students who plan to write dissertations on topics in Spanish or Spanish American literature before 1700 are strongly encouraged to select Latin, Arabic, or an Amerindian language to satisfy this requirement; they should consult specialists in their field to determine which language is most appropriate. Students may take more than two languages if their coursework permits.

Language tool coursework below the third-year college level does not count toward the 72 s.h. required for the degree. Courses taken to fulfill the language tool requirements may be taken on a nongraded basis. If the language tool requirements are satisfied by examination, the exam results must be documented in a student's file.

Hispanic Linguistics Track Courses

Students must earn at least 27 s.h. (9 courses) beyond the master's degree (or 19 courses beyond the bachelor's degree). The following courses are required; courses taken for the M.A. may be used to meet part of this requirement.

Code	Title	Hours
SPAN:6110	Spanish Phonology	3
SPAN:6120	Spanish Syntax	3
SPAN:6150	Topics in Spanish Language Acquisition	3
SPAN:6190	Topics in Comparative Romance Linguistics	3
SPAN:6999	Thesis	6
LING:3005	Articulatory and Acoustic Phonetics	3
LING:5010	Introduction to Syntax	3
LING:5020	Introduction to Phonology	3
LING:6010	Syntactic Theory	3
	One additional course in the dissertation research area	3

One course in historical linguistics, sociolinguistics/language variation, or language acquisition/psycholinguistics	3
One Hispanic linguistics seminar numbered 7000 or above	3

The additional course in the dissertation research area (phonology, syntax, language acquisition, language variation) must be taken in the Department of Spanish and Portuguese or the Department of Linguistics.

The specific plan of study for students, tailored to their chosen area of emphasis, must be approved by their advisory committee by the end of the first semester in the Ph.D. program. Coursework in Spanish (taken after the M.A.) must be numbered 6000 or above, except for some courses offered by the Department of Linguistics and the required third-year-level course in Portuguese (see "Language Tool and Additional Requirements" below).

Language Tool and Additional Requirements

Students in this track must complete the equivalent of three years of college-level study of Portuguese, and the equivalent of one year of college-level study in each of two other languages. For students specializing in historical linguistics, one of those two languages must be Latin.

Students may satisfy the language tool requirement by examination or by coursework at the University of Iowa or at another accredited university. Courses taken to fulfill the language tool requirements may be taken on a nongraded basis. If the language tool requirements are satisfied by examination, the exam results must be documented in the student's file. The language tool coursework does not count toward the 57 s.h. of pre-thesis coursework required for the degree, except for the third-year-level coursework in Portuguese, which may be counted with the faculty advisor's approval if a student completed the course with a grade.

Students also must write two extended research papers and give two colloquium presentations based on these papers. The first paper must be in an area distinct from the intended dissertation research; it must be approved by a student's advisory committee by the end of fall semester of the second year of Ph.D. coursework in order for the student to continue in the track. The second paper must be in the dissertation research area, must be of publishable quality, and must be approved by the student's advisory committee no later than the beginning of the semester in which the student takes the comprehensive exam.

Timeline: Post-M.A./M.F.A.

By the end of the fourth semester of enrollment, students should have completed all their required coursework. They typically present their Ph.D. comprehensive examination at the beginning of their fifth semester of enrollment. Students should develop the various parts of the comprehensive portfolio in conjunction with their Ph.D. coursework. The two broad area reading lists can be developed while taking graduate-level courses in the department, and their article should be based on a research paper written in a graduate course in the department. Students are encouraged to complete their comprehensive examinations before October 15 (in the fall semester) or March 15 (in the spring semester) and present and defend their dissertation prospectus before the end of the same semester. Some grants require students to have completed their doctoral examination and prospectus

defense before they apply, so it is recommended that students finish the examinations early in the semester.

Comprehensive Examinations

The purpose of the comprehensive examination is to determine whether students have gained sufficient breadth and depth of research knowledge in Hispanic literatures or linguistics to enter the profession as a teacher-scholar. The examining committee is composed of five departmental faculty members, or four departmental faculty members and a fifth faculty member from a related department.

Graduate students who plan to take the examination must file the departmental Notification of Intent to Take M.A. or Ph.D. Exams form with the graduate student academic coordinator by the third week of the relevant semester; see the Graduate Program Manual on the Department of Spanish and Portuguese website. Students presenting the comprehensive exams cannot have more than one coursework requirement left to be completed, including courses for the fulfillment of the language tool requirements, after the semester in which the exams are presented. Generally, students either have finished their coursework requirements prior to presenting the comprehensive exams or they are completing them in the semester of their exams.

As with advisory committees, the student's advisor contacts the relevant faculty members to request their participation in the examining committee, and then submits the proposed committee for approval by the director of graduate studies and the chair of the Department of Spanish and Portuguese. These individuals consult with the advisor as part of the approval process. This should be done as early as possible during the semester preceding the examinations, but not later than fifteen weeks prior to the start of examinations.

The Graduate College requires that written and oral exams be completed within a 15-week period. The research essay and position paper should be given to the Comprehensive Examination Committee at least one month before the oral exam, after approval by the faculty supervisors. The two written examinations are typically scheduled over a two-week period and must be finished at least one week before the oral exam. Between the time of the written exams and the oral exam, examining faculty individually evaluate and discuss the exams with the student. The information provided in the evaluation guides the student in final preparation for the oral component of the examination; although, it does not include specific questions to be asked in the oral exam nor does it limit the questions that may be asked.

The oral examination provides the opportunity for further development of the written examinations as well as review of the position paper and research essay. At the end of the oral exam, the student is asked to leave the exam room in order for the committee to determine its evaluation. The student is then invited to return to the room to learn of the committee's evaluation, including an appraisal of specific areas of strength and/or weakness and recommendations for future academic work. The official evaluation of the exam is reported to the Graduate College as satisfactory, reservation, or unsatisfactory. If reservations are imposed, the examination committee must send a letter to the student specifying the reservations to be met and the deadline for their removal; copies are sent to the student's file, the director of graduate studies, and the Graduate College.

Students must be registered during the semester in which they take their comprehensive examinations. If all coursework has been completed prior to that semester, then students

should register for 2 s.h. in SPAN:6998 Special Work with their advisor, on a satisfactory/unsatisfactory basis. Students may not register in SPAN:6999 Thesis during the semester of their comprehensive examination.

Literatures/Cultures Track Comprehensive Exams

The comprehensive examination has written and oral components. The written component includes four elements: two broad areas, one specialized area, and one article, each under the supervision of a committee member.

The elements of the written component are as follows:

Two 2-hour written examinations, one for each of two broad areas of literary history, one Spanish and one Spanish American. The broad area lists should consist of approximately 35 readings. Selection of the two broad areas should be tied to a student's Ph.D. coursework, particularly the courses taken after admission to the Ph.D. program. The lists must be developed in consultation with the advisory committee and approved by the broad area supervisors before they are submitted to the rest of the committee for final approval. The written examination may include questions of textual analysis and aesthetics as well as historical periodization and literary criticism.

One position paper in a specialized area related to the thesis. The specialized area list should include approximately 10-15 works that define the area. The narrow area is examined via a 10-15 page position paper that is a critical synthesis, particularly of the secondary readings. The list and position paper should be written in consultation with a faculty supervisor and must be approved by that supervisor at least one month before the date of the exam. The position paper is expected to form part of the introduction to the dissertation.

One research essay. This part of the examination is a 20-25 page research essay. Typically, this essay is a substantially revised version of a paper written in one of the required graduate courses. The essay should be revised in consultation with the professor who taught the course for which the paper was originally written and with a second member of the exam committee. The research essay must be approved by both faculty members at least one month before the date of the exam.

One oral examination. The oral examination lasts for approximately two hours. Approximately one half the oral exam is devoted to an examination of the two broad areas and the other half examines the research essay and position paper.

Hispanic Linguistics Track Comprehensive Exams

The comprehensive exam includes written and oral components. The written component includes two weekend take-home exams consisting of linguistic analysis in two subdisciplines distinct from the subdiscipline of the intended dissertation research. The two-hour oral exam consists of one hour devoted to discussion of the second research paper and the other hour devoted to follow-up questions on the written exams.

Dissertation

After the comprehensive examination is completed, a student submits a dissertation prospectus for the dissertation committee's approval. The dissertation committee is composed of five faculty members; at least four committee members must be from the Department of Spanish and Portuguese.

The dissertation, complete and in final form, must be submitted in the required electronic format to the Graduate College office by the first-deposit deadline date of the session in which the degree is to be conferred. The final deposit of the approved dissertation in electronic format must be deposited at the office by the appropriate deadline in a student's graduation semester.

Students must adhere to the Graduate College regulations regarding preparation of the dissertation copy; consult the Graduate College. For information on the dissertation and final examinations, see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Literatures/Cultures Track Dissertation

Dissertations can present a research project within literary/cultural history and/or theory in the form of a monographic study; present a research project within literary/cultural history and/or theory in the form of a set of journal article-style research essays, accompanied by an in-depth theoretical and critical reflection of 20-30 pages in length; offer a major creative project, accompanied by an in-depth theoretical and critical reflection; a critical edition of a literary work, accompanied by an in-depth theoretical and critical reflection; a translation of a literary work, accompanied by an in-depth theoretical and critical reflection. Theoretical and critical reflections for the major creative project, a critical edition of literary work, or the translation of a literary work options may be no less than 50 pages in length.

Dissertation Prospectus

The first step in the dissertation process is the submission and defense of the dissertation prospectus. The prospectus consists of these sections: a narrative which describes in detail the dissertation, the work done in the field previously, the research methodology and/or theoretical or creative approach, and a preliminary description of chapter divisions; a preliminary bibliography; and a timetable for completion of the research and writing of the dissertation. Typically, the entire prospectus is from 35-40 pages long.

Ideally, the prospectus should be approved the dissertation committee by the end of the semester in which the comprehensive examination was successfully completed. In order to be considered to be making adequate progress toward the degree, a student should turn in the prospectus no later than the fourth week of the semester following the comprehensive exam.

Prospectus Defense

After the dissertation director has given preliminary approval of the prospectus, that faculty member schedules the prospectus defense. The defense is a meeting of the dissertation committee at which the student gives a brief oral presentation of the prospectus and answers questions that the committee members may have; the committee members should receive the written prospectus at least two weeks prior to the defense meeting. At this time, two members of the dissertation committee, in addition to the director, agrees to read the dissertation on a chapter-by-chapter basis. Once approved, a copy of the prospectus and the departmental

prospectus approval form are handed in to the graduate student academic coordinator by the dissertation director, and is placed in the student's file.

Additional Requirements

Independent Study

Only 3 s.h. earned for post-M.A. independent study may be applied toward the 72 s.h. required for the degree; the department discourages students from including independent study as a part of their coursework. Exceptions are made under extraordinary circumstances, but must be preapproved by the director of graduate studies. For consideration of a request for independent study credit, students must complete the Department of Spanish and Portuguese Independent Study Contract for Graduate Students form obtained from the director of graduate studies, then secure the approval of the director of graduate studies and the chair of the department, and submit a copy of the form to the graduate student academic coordinator before the first day of the semester. Only students in good academic standing may enroll in an independent study course.

Graduate Study Loads

Maximum course registration for all graduate students is 15 s.h. of graduate-level coursework in fall or spring semesters and 12 s.h. of graduate-level work in summer sessions. Students with one-quarter-time and one-third-time teaching assistantships are permitted to register for the maximum study loads. Students who hold one-half-time assistantships are permitted to register for a maximum of 12 s.h. in fall and spring semesters and 6 s.h. in summer sessions. Students must have approval from the Graduate College to register for additional semester hours.

The minimum course registration is 1 s.h. for all graduate students. Doctoral students who have passed the comprehensive examinations typically register for 1 s.h. of thesis work to satisfy the minimum registration requirement. Students who fail to register for 36 months must apply for readmission to the Graduate College.

Financial Support

Teaching and research assistantships are available to qualified graduate students. Usually, four years of support are available beyond the receipt of the M.A. for the Ph.D. Applications for financial support should be made directly to the Department of Spanish and Portuguese.

Career Advancement

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Statistics and Actuarial Science

Chair

- Kung-Sik Chan

Director of Graduate Studies

- Joyee Ghosh

Director of Undergraduate Studies, Actuarial Science

- Elias S. Shiu

Director of Undergraduate Studies, Data Science

- Rhonda R. DeCook

Director of Undergraduate Studies, Statistics

- Rhonda R. DeCook

Undergraduate majors: actuarial science (B.S.); statistics (B.S.)

Undergraduate minor: statistics

Graduate degrees: M.S. in actuarial science; M.S. in statistics; Ph.D. in statistics

Faculty: <https://stat.uiowa.edu/people>

Website: <https://stat.uiowa.edu/>

The Department of Statistics and Actuarial Science offers undergraduate majors, an undergraduate minor, and graduate degree programs. They partner with other departments to offer the B.S. in data science and the undergraduate Certificate in Social Science Analytics (see below). The department offers courses that any undergraduate student may use to satisfy the GE CLAS Core [p. 20] Quantitative or Formal Reasoning requirement.

Probability and statistics are important scientific disciplines essential to all fields of study that rely on information obtained from data. In a world bombarded with numerical information, informed decisions rely on the ability to separate fact from fiction by applying valid statistical analyses and visualizations. Statisticians can provide crucial guidance in determining what information is reliable and which predictions may be trusted. They often help search for clues to the solution of a scientific mystery and sometimes keep investigators from being misled by false impressions.

The work of a statistician may range from the theoretical (developing new methodologies and statistical theory) to the applied (working with scientists and decision makers to collect, analyze, and interpret data). Regardless of the areas in which they work, statisticians need strong mathematical, computational, and communication skills. Because uncertainty and data arise in many settings, statisticians have the opportunity to work on a variety of projects in industry, education, government, and research. Thousands of statisticians work in medicine, law, agriculture, public policy, marketing, manufacturing, engineering, and other fields in the social and natural sciences. The diversity of applications is an exciting aspect of the field and is one reason why the demand for well-trained statisticians continues to be strong.

An actuary is a business executive, professionally trained in the mathematical sciences. Actuaries specialize in the

evaluation of financial risk—most often in the context of life, health, and casualty insurance, where they design, analyze, and refine varied programs to meet the insurance needs of society. Many actuaries are employed by insurance companies, where they have responsibilities for all phases of the development and maintenance of their company's products. They have considerable influence on the financial soundness of their company through work in pricing insurance policies and in compiling data for financial statements.

Many actuaries are employed as consultants. Their actuarial services are used by smaller insurance companies and by individual employers who need actuarial guidance in establishing insurance and retirement programs for their employees. A growing number of actuaries work in the areas of asset/liability management and risk management. Some of these actuaries are employed by investment and consulting firms; others are employed by insurance companies.

Actuaries have been called financial architects and social mathematicians, because their combined analytical and business skills help solve a growing variety of financial and social problems. The actuarial profession is a demanding yet rewarding career choice.

Related Major and Certificate

Major: Data Science

The B.S. in data science produces graduates with the sophisticated analytical and computational skills required to thrive in a quantitative world where new problems are encountered at an ever-increasing rate. The major emphasizes the statistical/probabilistic and algorithmic methods that underlie the preparation, analysis, and communication of complex data. With focus on technical foundations, the data science program promotes skills useful for creating and implementing new or special-purpose analysis and visualization tools. It also promotes a fundamental understanding of how to best handle uncertainty when making data-driven decisions.

Statistics majors may not earn a major in data science. The Department of Statistics and Actuarial Science and the Department of Computer Science [p. 298] collaborate to offer the major in data science. The B.S. in data science is administered by the Department of Statistics and Actuarial Science; see the B.S. in data science [p. 357] in the Catalog.

Certificate: Social Science Analytics

The growth of big data and informatics calls for a new set of skills for social science students and an increased understanding of the logic of data collection and analysis. The certificate focuses on the application side of data analysis and allows focus to be on the specific research methods and quantitative skills using data-driven methods effective for more understanding in an increasingly complicated social-political world. The certificate offers an opportunity for interdisciplinary training on how data can be used to address important questions in the social sciences. The Department of Statistics and Actuarial Science collaborates with the Departments of Geographical and Sustainability Sciences, Political Science, and Sociology and Criminology to offer the undergraduate program in social science analytics; see the Certificate in Social Science Analytics [p. 987] in the Catalog.

Programs

Undergraduate Programs of Study

Majors

- Major in Statistics (Bachelor of Science) [p. 1074]
- Major in Actuarial Science (Bachelor of Science) [p. 1080]

Minor

- Minor in Statistics [p. 1084]

Graduate Programs of Study

Majors

- Master of Science in Statistics [p. 1085]
- Master of Science in Actuarial Science [p. 1087]
- Doctor of Philosophy in Statistics [p. 1088]

Facilities

The Department of Statistics and Actuarial Science is housed in Schaeffer Hall, adjacent to Old Capitol, a National Historic Landmark and the center of campus. The department operates two computer labs in Schaeffer Hall. One, which also is used as an electronic classroom, contains 28 Windows PCs. The second houses 18 high-end UNIX workstations. Students use these labs for class work and research.

Courses

- Statistics Courses [p. 1069]
- Actuarial Science Courses [p. 1072]

Undergraduate Duplication and Regression Policy

Statistics majors may not earn a major in data science; likewise, data science majors may not earn a major in statistics.

Undergraduate students should be aware of the duplication and regression policies concerning the following courses.

Students may earn credit for only two of these:

STAT:1010 Statistics and Society,
 STAT:1020/PSQF:1020 Elementary Statistics and Inference,
 STAT:1030 Statistics for Business, and
 STAT:2010 Statistical Methods and Computing.

Credit for STAT:1010 Statistics and Society may be earned only if the course is taken before any of these:

STAT:1020/PSQF:1020 Elementary Statistics and Inference,
 STAT:1030 Statistics for Business, and
 STAT:2010 Statistical Methods and Computing.

Students may receive credit for only one course from each of these pairs:

STAT:2010 Statistical Methods and Computing and STAT:4200/IGPI:4200 Statistical Methods and Computing,

STAT:3100/IGPI:3100 Introduction to Mathematical Statistics I and STAT:3120/IGPI:3120 Probability and Statistics, and
 STAT:3510/IGPI:3510 Biostatistics and
 STAT:4143/PSQF:4143 Introduction to Statistical Methods.

Students may not take STAT:3101/IGPI:3101 Introduction to Mathematical Statistics II and STAT:4101/IGPI:4101 Mathematical Statistics II at the same time and get credit for both (nor go back to STAT:3101/IGPI:3101 after taking STAT:4101/IGPI:4101).

Statistics Courses

STAT:1000 First-Year Seminar **1 s.h.**
 Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

STAT:1010 Statistics and Society **3 s.h.**
 Statistical ideas and their relevance to public policy, business, humanities, and the social, health, and physical sciences; focus on critical approach to statistical evidence. Requirements: one year of high school algebra or MATH:0100. GE: Quantitative or Formal Reasoning.

STAT:1020 Elementary Statistics and Inference **3 s.h.**
 Graphing techniques for presenting data, descriptive statistics, correlation, regression, prediction, logic of statistical inference, elementary probability models, estimation and tests of significance. Requirements: one year of high school algebra or MATH:0100. GE: Quantitative or Formal Reasoning. Same as PSQF:1020.

STAT:1030 Statistics for Business **4 s.h.**
 Descriptive statistics, graphical presentation, elementary probability, estimation and testing, regression, correlation; statistical computer packages. Prerequisites: MATH:1005 or MATH:1020 or MATH:1340 or MATH:1350 or MATH:1380 or MATH:1440 or MATH:1460 or MATH:1550 or MATH:1850. GE: Quantitative or Formal Reasoning.

STAT:2010 Statistical Methods and Computing **3 s.h.**
 Methods of data description and analysis using SAS; descriptive statistics, graphical presentation, estimation, hypothesis testing, sample size, power; emphasis on learning statistical methods and concepts through hands-on experience with real data. Recommendations: undergraduate standing. GE: Quantitative or Formal Reasoning.

STAT:2020 Probability and Statistics for the Engineering and Physical Sciences **3 s.h.**
 Probability, random variables, important discrete and continuous distributions, joint distributions, transformations of random variables, descriptive statistics, point and interval estimation, tests of hypotheses, regression. Prerequisites: MATH:1560 or MATH:1860.

STAT:3100 Introduction to Mathematical Statistics I **3 s.h.**
 Descriptive statistics, probability, conditional probability, discrete and continuous univariate and multivariate distributions, sampling distributions. Prerequisites: MATH:1860 or MATH:1560. Same as IGPI:3100.

STAT:3101 Introduction to Mathematical Statistics II **3 s.h.**
 Point and interval estimation, testing statistical hypotheses, simple regression, nonparametric methods. Prerequisites: STAT:3100. Same as IGPI:3101.

- STAT:3120 Probability and Statistics** 4 s.h.
Models, discrete and continuous random variables and their distributions, estimation of parameters, testing statistical hypotheses. Prerequisites: MATH:1560 or MATH:1860. Same as IGPI:3120.
- STAT:3200 Applied Linear Regression** 3 s.h.
Regression analysis with focus on applications; model formulation, checking, selection; interpretation and presentation of analysis results; simple and multiple linear regression; logistic regression; ANOVA; hands-on data analysis with computer software. Prerequisites: STAT:2020 or STAT:2010 or STAT:3120. Same as IGPI:3200, ISE:3760.
- STAT:3210 Experimental Design and Analysis** 3 s.h.
Single- and multifactor experiments; analysis of variance; multiple comparisons; contrasts; diagnostics; fixed, random, and mixed effects models; designs with blocking and/or nesting; two-level factorials and fractions thereof; use of statistical computing packages. Prerequisites: STAT:3200.
- STAT:3510 Biostatistics** 3 s.h.
Statistical concepts and methods for the biological sciences; descriptive statistics, elementary probability, sampling distributions, confidence intervals, parametric and nonparametric methods, one-way ANOVA, correlation and regression, categorical data. Requirements: MATH:0100 or MATH:1005 or ALEKS score of 30 or higher. Same as IGPI:3510.
- STAT:3620 Quality Control** 3 s.h.
Basic techniques of statistical quality control; application of control charts for process control variables; design of inspection plans and industrial experimentation; modern management aspects of quality assurance systems. Offered fall semesters. Prerequisites: STAT:2020 or MSCI:9100 or BAIS:9100 or (STAT:3100 and STAT:3101 and STAT:3200). Same as CEE:3142, ISE:3600.
- STAT:4100 Mathematical Statistics I** 3 s.h.
Probability, conditional probability, random variables, distribution and density functions, joint and conditional distributions, various families of discrete and continuous distributions, mgf technique for sums, convergence in distribution, convergence in probability, central limit theorem. Prerequisites: MATH:2850 and MATH:2700. Same as IGPI:4100.
- STAT:4101 Mathematical Statistics II** 3 s.h.
Transformations, order statistics, point estimation, sufficient statistics, Rao-Blackwell Theorem, delta method, confidence intervals, likelihood ratio tests, applications. Prerequisites: STAT:4100. Same as IGPI:4101.
- STAT:4143 Introduction to Statistical Methods** 3 s.h.
Analysis, interpretation of research data; descriptive statistics; introduction to probability, sampling theory, statistical inference (binomial, normal distribution, t-distribution models); linear correlation, regression. Same as PSQF:4143.
- STAT:4200 Statistical Methods and Computing** 3 s.h.
Methods of data description and analysis using SAS; descriptive statistics, graphical presentation, estimation, hypothesis testing, sample size, power; emphasis on learning statistical methods and concepts through hands-on experience with real data. Recommendations: graduate standing in non-statistics or less quantitative major. Same as IGPI:4200.
- STAT:4510 Regression, Time Series, and Forecasting** 3 s.h.
Regression analysis, forecasting, time series methods; use of statistical computing packages. Prerequisites: STAT:3101 with a minimum grade of C+.
- STAT:4520 Bayesian Statistics** 3 s.h.
Bayesian statistical analysis, with focus on applications; Bayesian and frequentist methods compared; Bayesian model specification, choice of priors, computational methods; hands-on Bayesian data analysis using appropriate software; interpretation and presentation of analysis results. Prerequisites: STAT:3200 and (STAT:3101 or STAT:4101 or STAT:3120). Same as IGPI:4522, PSQF:4520.
- STAT:4540 Statistical Learning** 3 s.h.
Introduction to supervised and unsupervised statistical learning, with a focus on regression, classification, and clustering; methods will be applied to real data using appropriate software; supervised learning topics include linear and nonlinear (e.g., logistic) regression, linear discriminant analysis, cross-validation, bootstrapping, model selection, and regularization methods (e.g., ridge and lasso); generalized additive and spline models, tree-based methods, random forests and boosting, and support-vector machines; unsupervised learning topics include principal components and clustering. Requirements: an introductory statistics course and a regression course. Recommendations: prior exposure to programming and/or software, such as R, SAS, and Matlab. Same as IGPI:4540.
- STAT:4560 Statistics for Risk Modeling** 3 s.h.
Theory and applications of general linear models, generalized linear models, and regression-based time series models; emphasis on parameter estimation, variable selection, and diagnostic checking for these models, and their use for statistical inference and prediction; practical implementations of these models to analyze actuarial and financial data. Prerequisites: STAT:4101 with a minimum grade of C+ or STAT:5101 with a minimum grade of C+.
- STAT:4580 Data Visualization and Data Technologies** 3 s.h.
Introduction to common techniques for visualizing univariate and multivariate data, data summaries, and modeling results; how to create and interpret these visualizations and assess effectiveness of different visualizations based on an understanding of human perception and statistical thinking; data technologies for obtaining and preparing data for visualization and further analysis; students learn how to present results in written reports and use version control to manage their work. Requirements: an introductory statistics course and a regression course. Recommendations: prior exposure to basic use of statistical programming software (e.g., R or SAS) as obtained from a regression course strongly recommended. Same as IGPI:4580.
- STAT:4740 Large Data Analysis** 3 s.h.
Current areas that deal with problem of big data; techniques from computer science, mathematics, statistics; high performance and parallel computing, matrix techniques, cluster analysis, visualization; variety of applications including Google PageRank, seismology, Netflix-type problems, weather forecasting; fusion of data with simulation; projects. Prerequisites: (CS:1210 with a minimum grade of C- or ENGR:2730 with a minimum grade of C-) and (MATH:3800 or CS:3700) and (STAT:3200 or ISE:3760 or IGPI:3200). Same as CS:4740, IGPI:4740, MATH:4740.

- STAT:4880 Data Science Creative Component** 1 s.h.
Independent project under a faculty advisor's supervision; emphasis on communication of ideas learned in student's data science coursework or internship.
- STAT:4890 Data Science Practicum** 2 s.h.
On- or off-campus internship or group-based consulting project that provides experience in a real-world setting and introduces ethical and confidentiality issues related to data collection, storage, and sharing.
- STAT:5090 ALPHA Seminar** 1 s.h.
Resources available to students, program requirements, tips for academic success, professional statistical organizations, library and career center resources, statistical computing, scientific document preparation, history of statistics. Requirements: graduate standing in statistics.
- STAT:5100 Statistical Inference I** 3 s.h.
Review of probability, distribution theory (multiple random variables, moment-generating functions, transformations, conditional distributions), sampling distributions, order statistics, convergence concepts, generating random samples. Prerequisites: MATH:2850 and STAT:3101.
- STAT:5101 Statistical Inference II** 3 s.h.
Continuation of STAT:5100; principles of data reduction, point estimation theory (MLE, Bayes, UMVU), hypothesis testing, interval estimation, decision theory, asymptotic evaluations. Prerequisites: STAT:5100.
- STAT:5120 Mathematical Methods for Statistics** 3 s.h.
Real numbers, point set theory, limit points, limits, metric spaces, continuity, sequences and series, Taylor series (multivariate), uniform convergence, Riemann-Stieltjes integrals. Requirements: statistics graduate standing.
- STAT:5200 Applied Statistics I** 4 s.h.
Descriptive statistics, basic inferential methods (confidence intervals, chi-square tests); linear models (regression and ANOVA models—specification and assumptions, fitting, diagnostics, selection, testing, interpretation); nonlinear models, logistic regression. Prerequisites: STAT:3101. Corequisites: STAT:4100 or STAT:5100. Requirements: facility with matrix algebra. Same as IGPI:5199.
- STAT:5201 Applied Statistics II** 3 s.h.
Design of experiments and analysis of designed experiments; models for fixed and random effects; mixed models; design and analysis of complex plans; sample-size methods. Prerequisites: STAT:5200. Recommendations: prior exposure to SAS software.
- STAT:5400 Computing in Statistics** 3 s.h.
R; database management; graphical techniques; importing graphics into word-processing documents (e.g., LaTeX); creating reports in LaTeX; SAS; simulation methods (Monte Carlo studies, bootstrap, etc.). Prerequisites: CS:1210 and STAT:3200 and (STAT:3120 or STAT:3101 or STAT:4101). Corequisites: STAT:5100 and STAT:5200 if not already completed. Same as IGPI:5400.
- STAT:5610 Regression Modeling and ANOVA in the Health Sciences** 3 s.h.
Continuation of BIOS:4120; correlation, simple and multiple linear regression, confounding, interactions, model selection, single and multiple factor ANOVA (analysis of variance) models, contrasts, multiple comparisons, nested and block designs, and an introduction to mixed models; designed for non-biostatistics majors. Offered spring semesters and summer sessions. Prerequisites: BIOS:4120. Same as BIOS:5120, IGPI:5120.
- STAT:5810 Research Data Management** 3 s.h.
Introduction to data management techniques and problems encountered in gathering and processing data from biomedical investigations; introduction to SAS, techniques taught in SAS; designed for non-biostatistics majors. Offered fall and spring semesters. Recommendations: prior programming experience with C, C++, Python, Java, or other. Same as BIOS:5310, IGPI:5310.
- STAT:6220 Statistical Consulting** 3 s.h.
Realistic supervised data analysis experiences, including statistical packages, statistical graphics, writing statistical reports, dealing with complex or messy data. Offered spring semesters. Prerequisites: (STAT:3200 and STAT:3210) or (STAT:5201 and STAT:5200). Requirements: for undergraduate majors—major g.p.a. of 3.00 or above, and grades of B or higher in STAT:3200 and STAT:3210.
- STAT:6300 Probability and Stochastic Processes I** 3 s.h.
Conditional expectations; Markov chains, including random walks and gambler's ruin; classification of states; stationary distributions; branching processes; Poisson processes; Brownian motion. Prerequisites: STAT:4100.
- STAT:6301 Probability and Stochastic Processes II** 3 s.h.
Markov chains with continuous state space, Martingales, random walks, Brownian motion and other continuous-time Markov chains, simulation methods. Prerequisites: STAT:6300.
- STAT:6510 Applied Generalized Regression** 3 s.h.
Applications of semiparametric models, generalized linear models, nonlinear normal errors models, correlated response models; use of statistical packages, especially R and SAS. Requirements: introductory statistics and applied linear models. Same as IGPI:6511.
- STAT:6513 Intermediate Statistical Methods** 4 s.h.
Foundation for more advanced applied courses; logic of statistical inference, chi-square, and other tests of statistical hypotheses; small sample error theory, interval estimates, introduction to analysis of variance, selected nonparametric methods. Requirements: for PSQF:6243—PSQF:4143; for STAT:6513—STAT:4143. Same as PSQF:6243.
- STAT:6514 Correlation and Regression** 4 s.h.
Correlation techniques; selected bivariate procedures, multiple, partial, curvilinear correlation; multiple linear regression; sampling theory applied to regression analysis and correlation coefficients; simple causal models. Requirements: for PSQF:6244—PSQF:6243; for STAT:6514—STAT:6513. Same as PSQF:6244.
- STAT:6516 Design of Experiments** 4 s.h.
Theory and methods in the planning and statistical analysis of experimental studies; testing of hypotheses about linear contrasts among means in single-factor and multifactor, completely randomized, and repeated measurement designs. Requirements: for PSQF:6246—PSQF:6243; for STAT:6516—STAT:6513. Same as PSQF:6246.
- STAT:6530 Environmental and Spatial Statistics** 3 s.h.
Geostatistics kriging, variogram estimation, trend estimation, sampling design, extensions to river networks and the globe, lattice data analysis, analysis of spatial point patterns. Prerequisites: STAT:4101 and STAT:3200. Same as IGPI:6530.
- STAT:6540 Applied Multivariate Analysis** 3 s.h.
Multivariate descriptive statistics, multivariate normal distribution, Hotelling's T-squared, MANOVA, multivariate regression, principal components, discrimination and classification, cluster analysis. Prerequisites: STAT:3200 and STAT:3210. Requirements: facility with matrix algebra. Same as PSQF:6245.

- STAT:6547 Nonparametric Statistical Methods** 3 s.h.
Selected nonparametric methods; one- and two-sample location tests and estimation methods, measures of association, analyses of variance; emphasis on relationships to classical parametric procedures. Same as PSQF:6247.
- STAT:6550 Introductory Longitudinal Data Analysis** 3 s.h.
Introduction to statistical models and estimation methods for outcome variables (normal and non-normal) clustered or measured repeatedly in time or space; focus on applications and computer software methods for ANOVA based methods, hierarchical linear models, linear mixed models, correlated regression models, generalized estimating equations, and generalized linear mixed models. Offered fall semesters. Prerequisites: BIOS:5120 or STAT:3200. Same as BIOS:6310, IGPI:6310.
- STAT:6560 Applied Time Series Analysis** 3 s.h.
General stationary, nonstationary models, autocovariance autocorrelation functions; stationary, nonstationary autoregressive integrated moving average models; identification, estimation, forecasting in linear models; use of statistical computer packages. Offered spring semesters. Prerequisites: (STAT:5200 or STAT:3200) and STAT:3101.
- STAT:6970 Topics in Statistics** 3 s.h.
Selected advanced topics in statistics.
- STAT:6990 Readings in Statistics** arr.
Supervised reading and research in statistics.
- STAT:7100 Advanced Inference I** 3 s.h.
Concepts of convergence, asymptotic methods including the delta method, sufficiency, asymptotic efficiency, Fisher information and information bounds for estimation, maximum likelihood estimation, the EM-algorithm, Bayes estimation, decision theory. Prerequisites: STAT:5101 and STAT:5120.
- STAT:7101 Advanced Inference II** 3 s.h.
Hypothesis testing, asymptotics of the likelihood ratio test, asymptotic efficiency, statistical functionals, robustness, bootstrap and jackknife, estimation with dependent data. Prerequisites: STAT:7100.
- STAT:7190 Seminar: Mathematical Statistics** arr.
Selected advanced topics in mathematical statistics.
- STAT:7200 Linear Models** 4 s.h.
Linear spaces and selected topics in matrix algebra, full rank and non-full rank linear models, estimability, least squares and best linear unbiased estimation, multivariate normal distribution and distributions of quadratic forms, interval estimation, hypothesis testing, random and mixed models, best linear unbiased prediction, variance component estimation. Prerequisites: STAT:5101 and STAT:5200 and STAT:5201.
- STAT:7290 Seminar: Applied Statistics** arr.
Selected advanced topics in applied statistics.
- STAT:7300 Foundations of Probability I** 3 s.h.
Probability theory, with emphasis on constructing rigorous proofs; measure spaces, measurable functions, random variables and induced measures, distribution functions, Lebesgue integral, product measure and independence, Borel Cantelli lemma, modes of convergence. Prerequisites: STAT:5120.
- STAT:7301 Foundations of Probability II** 3 s.h.
Laws of large numbers, characteristic functions and properties, central limit theorem, Radon-Nikodym derivatives, conditional expected value and martingales. Prerequisites: STAT:7300.
- STAT:7390 Seminar: Probability** arr.
Selected advanced topics in probability.
- STAT:7400 Computer Intensive Statistics** 3 s.h.
Computer arithmetic; random variate generation; numerical optimization; numerical linear algebra; smoothing techniques; bootstrap methods; cross-validation; MCMC; EM and related algorithms; other topics per student/instructor interests. Prerequisites: (BIOS:5710 or STAT:5200) and STAT:3101. Requirements: proficiency in Fortran or C or C++ or Java. Same as IGPI:7400.
- STAT:7510 Analysis of Categorical Data** 3 s.h.
Models for discrete data, distribution theory, maximum likelihood and weighted least squares estimation for categorical data, tests of fit, models selection. Offered spring semesters. Prerequisites: (BIOS:5720 or STAT:5200) and (STAT:5101 or STAT:4101). Same as BIOS:7410.
- STAT:7520 Bayesian Analysis** 3 s.h.
Decision theory, conjugate families, structure of Bayesian inference, hierarchical models, asymptotic approximations for posterior distributions, Markov chain Monte Carlo methods and convergence assessment, model adequacy and model choice. Prerequisites: STAT:5101 and STAT:5400 and STAT:5200.
- STAT:7560 Time Series Analysis** 3 s.h.
Stationary time series, ARIMA models, spectral representation, linear prediction inference for the spectrum, multivariate time series, state space models and processes, nonlinear time series. Prerequisites: STAT:4101 and (STAT:3200 or STAT:6560).
- STAT:7570 Survival Data Analysis** 3 s.h.
Types of censoring and truncation; survival function estimation; parametric inference using exponential, Weibull, and accelerated failure time models; nonparametric tests; sample size calculation; Cox regression with stratification and time-dependent covariates; regression diagnostics; competing risks; topics may include analysis of correlated survival data and/or recurrent events; designed for biostatistics and statistics majors. Offered fall semesters. Prerequisites: BIOS:5720 and ((STAT:4100 and STAT:4101) or (STAT:5100 and STAT:5101)). Same as BIOS:7210, IGPI:7210.
- STAT:7990 Reading Research** arr.
Supervised reading and research in statistics.

Actuarial Science Courses

- ACTS:1000 First-Year Seminar** 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.
- ACTS:1001 Introductory Seminar on Actuarial Science** 1 s.h.
Introduction to actuarial science; U.S. actuarial organizations and actuarial qualification process; program requirements and tips for academic success; career center, actuarial club, and internships; actuarial career; ethics; communication; introduction to actuarial computing. Requirements: actuarial science interest major and first-year standing.
- ACTS:3080 Mathematics of Finance I** 3 s.h.
Mathematics of compound interest, annuities certain, amortization schedules, yield rates, sinking funds, and bonds. Prerequisites: STAT:3100 with a minimum grade of B-. Requirements: meet the prerequisite or have graduate standing.

ACTS:3110 Actuarial Exam P Preparation 1 s.h.
Preparation for the Society of Actuaries exam P.

ACTS:3210 Actuarial Exam FM Preparation 1 s.h.
Preparation for the Society of Actuaries exam FM.
Corequisites: ACTS:3080, if not taken as a prerequisite.

ACTS:4010 Actuarial Exam IFM Preparation 1 s.h.
Preparation for the Society of Actuaries exam IFM.
Requirements: multivariate calculus, linear algebra, and statistics. Recommendations: prior or concurrent enrollment in FIN:3300 or ACTS:4380.

ACTS:4110 Actuarial Exam LTAM Preparation 1 s.h.
Preparation for the Society of Actuaries exam LTAM.
Corequisites: ACTS:4280, if not taken as a prerequisite.

ACTS:4130 Quantitative Methods for Actuaries 3 s.h.
Survival distributions, life tables, life insurance, life annuities.
Prerequisites: STAT:3100 with a minimum grade of B- and ACTS:3080 with a minimum grade of C+. Corequisites: STAT:4100 or STAT:5100. Requirements: multivariate calculus and linear algebra.

ACTS:4160 Topics in Actuarial Science arr.
Selected topics in actuarial science, financial mathematics, and quantitative risk management.

ACTS:4180 Life Contingencies I 3 s.h.
Life annuities, net and gross premiums, net and gross premium reserves, modified reserve methods, and Markov chains. Offered spring semesters. Prerequisites: ACTS:3080 with a minimum grade of C+ and ACTS:4130 with a minimum grade of C+ and (STAT:4100 with a minimum grade of C+ or STAT:5100 with a minimum grade of C+).

ACTS:4280 Life Contingencies II 3 s.h.
Multilife models, multiple-decrement models, continuous-time Markov chain models, profit testing, and profit measures. Offered fall semesters. Prerequisites: ACTS:4180 with a minimum grade of C+.

ACTS:4380 Mathematics of Finance II 3 s.h.
Derivatives markets, forwards, options, pricing models, and actuarial applications. Prerequisites: ACTS:3080 with a minimum grade of C+. Corequisites: STAT:4100 or STAT:5100. Requirements: multivariate calculus and linear algebra.

ACTS:4990 Readings in Actuarial Science arr.

ACTS:6160 Topics in Actuarial Science arr.
Selected topics in actuarial science, financial mathematics, and quantitative risk management; required for all final-year M.S. students in actuarial science. Prerequisites: ACTS:4180 with a minimum grade of C+ and ACTS:4380 with a minimum grade of C+.

ACTS:6480 Loss Distributions 3 s.h.
Severity, frequency, and aggregate models and their modifications; risk measures; construction of empirical models. Offered spring semesters. Prerequisites: STAT:4101 or STAT:5101. Corequisites: ACTS:6580.

ACTS:6580 Credibility and Survival Analysis 3 s.h.
Construction and selection of parametric models, credibility, and simulation. Offered spring semesters. Prerequisites: STAT:4101 or STAT:5101. Corequisites: ACTS:6480.

ACTS:6990 Readings in Actuarial Science arr.
Supervised reading and research in actuarial science, financial mathematics, or quantitative risk management.

**ACTS:7730 Advanced Topics in Actuarial Science/
Financial Mathematics** arr.
Selected advanced topics in actuarial science, financial mathematics and quantitative risk management.

Statistics, B.S.

Learning Outcomes

Students will:

- be able to distinguish between observational studies and designed experiments and understand the issues related to the data collection method, including sampling bias, sampling error, sample size determination, statistical power, association versus causation, and the design and analysis of randomized experiments;
- use critical thinking skills to translate substantive questions into well-defined statistical problems and choose appropriate statistical methods and graphical summaries for a given problem;
- use computer software to manage data, carry out exploratory data analyses and computer simulations, produce numerical and graphical summaries of data, and apply basic statistical methodology;
- be able to clearly communicate study results to non-statisticians, and write accurate and meaningful reports that describe the statistical analyses and summarize important findings; and
- understand the mathematical tools underlying statistical methods, including distribution theory, uncertainty quantification via probability, estimation theory, and the probabilistic basis of formal statistical inference.

Requirements

The Bachelor of Science with a major in statistics requires a minimum of 120 s.h., including at least 47 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 20].

Students complete 10 core courses that provide essential instruction in statistical methods, applications, and theory. In addition, they concentrate on an area of interest by completing four or five courses in one of the major's three emphasis tracks: statistics in business, industry, government, and research; statistical computing and data science; or mathematical statistics.

The B.S. with a major in statistics requires the following coursework.

Code	Title	Hours
Core Courses		35
Emphasis Track Courses		12-16
Total Hours		47-51

Core Courses

All students complete the following 10 core courses. The department recommends that well-prepared students who elect the mathematical statistics track take STAT:4100/IGPI:4100 Mathematical Statistics I and STAT:4101/IGPI:4101 Mathematical Statistics II in place of STAT:3100/IGPI:3100 Introduction to Mathematical Statistics I and STAT:3101/IGPI:3101 Introduction to Mathematical Statistics II to satisfy the core requirement in statistics.

Code	Title	Hours
Computer Science		
This course:		
CS:1210	Computer Science I: Fundamentals	4
Mathematics		
All of these:		
MATH:1850	Calculus I	4
MATH:1860	Calculus II	4
MATH:2700	Introduction to Linear Algebra	4
MATH:2850	Calculus III	4
Statistics		
All of these:		
STAT:2010	Statistical Methods and Computing	3
STAT:3100/ IGPI:3100	Introduction to Mathematical Statistics I	3
STAT:3101/ IGPI:3101	Introduction to Mathematical Statistics II	3
STAT:3200/ IGPI:3200/ISE:3760	Applied Linear Regression	3
STAT:3210	Experimental Design and Analysis	3

Emphasis Tracks

Students choose one of the following tracks and must complete four or five courses in that track.

Statistics in Business, Industry, Government and Research Track

The statistics in business, industry, government, and research track emphasizes statistical applications and data analysis. It is appropriate for students interested in careers as applied statisticians.

Code	Title	Hours
This course:		
STAT:5810/ BIOS:5310/ IGPI:5310	Research Data Management	3
Three of these:		
STAT:3620/ CEE:3142/ISE:3600	Quality Control	3
STAT:4520/ IGPI:4522/ PSQF:4520	Bayesian Statistics	3
STAT:4540/ IGPI:4540	Statistical Learning	3
STAT:4580/ IGPI:4580	Data Visualization and Data Technologies	3
STAT:5400/ IGPI:5400	Computing in Statistics	3
STAT:6220	Statistical Consulting	3
STAT:6510/ IGPI:6511	Applied Generalized Regression	3
STAT:6530/ IGPI:6530	Environmental and Spatial Statistics	3
STAT:6540/ PSQF:6245	Applied Multivariate Analysis	3

STAT:6550/ BIOS:6310/ IGPI:6310	Introductory Longitudinal Data Analysis	3
STAT:6560	Applied Time Series Analysis	3
BIOS:5130/ IGPI:5130	Applied Categorical Data Analysis	3

Statistical Computing and Data Science Track

The statistical computing and data science track emphasizes statistical applications and requires additional coursework in computing. It prepares students for statistical work that requires computing expertise for data management, analysis, and reporting.

Code	Title	Hours
All of these:		
STAT:5810/ BIOS:5310/ IGPI:5310	Research Data Management	3
CS:2210	Discrete Structures	3
CS:2230	Computer Science II: Data Structures	4
Two of these:		
STAT:4520/ IGPI:4522/ PSQF:4520	Bayesian Statistics	3
STAT:4540/ IGPI:4540	Statistical Learning	3
STAT:4580/ IGPI:4580	Data Visualization and Data Technologies	3
STAT:4740/ CS:4740/IGPI:4740/ MATH:4740	Large Data Analysis	3
STAT:5400/ IGPI:5400	Computing in Statistics	3
STAT:6220	Statistical Consulting	3
STAT:6510/ IGPI:6511	Applied Generalized Regression	3
STAT:6530/ IGPI:6530	Environmental and Spatial Statistics	3
STAT:6540/ PSQF:6245	Applied Multivariate Analysis	3
STAT:6550/ BIOS:6310/ IGPI:6310	Introductory Longitudinal Data Analysis	3
STAT:6560	Applied Time Series Analysis	3
CS:3700/ MATH:3800	Elementary Numerical Analysis	3

Mathematical Statistics Track

The mathematical statistics track provides a solid foundation in statistical theory and applications. It requires additional coursework in mathematics and is good preparation for graduate study in statistics.

Students who use STAT:4100/IGPI:4100 Mathematical Statistics I and STAT:4101/IGPI:4101 Mathematical Statistics II to satisfy the core requirements may not use those courses to satisfy the track requirement.

STAT:6560	Applied Time Series Analysis	3

Combined Programs

B.S./M.S.

The combined Bachelor of Science/Master of Science in statistics is for eligible students who seek to complete both the B.S. and the M.S. at the University of Iowa in five years. Students in the combined program must complete all requirements for each degree. A traditional M.S. in statistics requires completion of 32 s.h. of graduate-level coursework. The B.S./M.S. program permits students to count 12 s.h. of credit (four courses) toward the requirements for both degrees. To complete the M.S., an additional 20 s.h. of coursework is required. The four courses that count toward both degrees must be taken during the fourth year of undergraduate study, after admission to the combined program, and must satisfy degree requirements of both the B.S. and the M.S. in statistics.

B.S./M.P.H. (Biostatistics Subprogram)

Students majoring in statistics who are interested in earning a Master of Public Health degree with a biostatistics subprogram may apply to the combined B.S./M.P.H. program offered by the College of Liberal Arts and Sciences and the College of Public Health. The program permits students to count 12 s.h. of credit toward the requirements for both degrees, enabling them to begin the study of public health before they complete the bachelor's degree. For information about the public health program, see "Biostatistics Subprogram" in the Master of Public Health, M.P.H. [p. 1889] section of the Catalog.

B.S./M.S. in Business Analytics (Career Subprogram)

Students majoring in statistics who are interested in earning a master's degree in business analytics with a career subprogram may apply to the combined B.S./M.S. program offered by the College of Liberal Arts and Sciences and the

Tippie College of Business. The program enables students to begin the study of business analytics before they complete their bachelor's degree. Students are able to complete both degrees in five years rather than six.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For information about the business analytics program, see the M.S. in business analytics (career) [p. 1148] in the Tippie College of Business section of the Catalog.

B.S./M.S. in Finance

Students majoring in statistics who are interested in earning a master's degree in finance may apply to the combined B.S./M.S. program offered by the College of Liberal Arts and Sciences and the Tippie College of Business. The program enables students to begin the study of finance before they complete their bachelor's degree. Students are able to complete both degrees in five years rather than six.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For information about the finance program, see the M.S. in finance [p. 1190] in the Tippie College of Business section of the Catalog.

Honors

Honors in the Major

Students majoring in statistics have the opportunity to graduate with honors in the major. Departmental honors students must maintain a g.p.a. of at least 3.67 in their major and a cumulative University of Iowa g.p.a. of at least 3.33.

To graduate with honors in the statistics major, students must complete an honors project or a suitable alternative. Statistics honors students should consult with the statistics undergraduate advisor.

University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the University's honors program.

Membership in the UI Honors Program is not required to earn honors in the statistics major.

Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Much of the coursework in statistics is sequential, so students must begin requirements for the major as soon as possible. Individual study plans must be made carefully. Students who first enroll for a spring semester must consult their advisor to confirm a four-year plan.

Courses must be taken in sequence, so students must begin work early.

Before the fifth semester begins: at least four courses in the major, including MATH:1850 Calculus I, MATH:1860 Calculus II, and STAT:2010 Statistical Methods and Computing

Before the seventh semester begins: seven or eight courses in the major and at least 90 s.h. earned toward the degree

Before the eighth semester begins: nine or ten courses in the major

During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate

Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Degree Application: apply on MyUI before deadline (typically in February for spring, September for fall)ⁱ

Hours		15
Total Hours		123-129

- a Enrollment in math courses requires completion of a placement exam.
- b Fulfills a major requirement and may fulfill a GE requirement.
- c Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
- d Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
- e Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
- f GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
- g Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
- h Students must complete STAT:5810 and 9 s.h. from approved courses for the Statistics in Business, Industry, Government and Research emphasis track.

- i Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>. If applicable search for "Early and Late Participation" to find this page (e.g. participate in graduation ceremony in May, degree conferral in August).

Career Advancement

Statistics and probability are vital to many fields, so the demand for well-trained statisticians is strong. Statisticians work in medicine, engineering, law, public policy making, marketing, manufacturing, engineering, agriculture, varied social and natural sciences, and numerous other areas.

When students graduate, they will be prepared to fill entry-level positions as statisticians or go on to graduate school. An advisor assists students in locating internship opportunities as well as the best-fitting graduate programs.

To learn more about job opportunities, see ASA JobWeb on the American Statistical Association website.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Actuarial Science, B.S.

Due to the demanding nature of the actuarial science major and the difficulty of the professional examinations, the department maintains a selective admission program for actuarial science. Students must apply and be admitted to the major.

Students interested in becoming actuaries should declare an interest in actuarial science as their major when they enter the University of Iowa. Ordinarily, students apply for admission to the actuarial science major in the fall semester of their sophomore year, after they have taken MATH:3770 Fundamental Properties of Spaces and Functions I or MATH:2850 Calculus III, and STAT:3100 Introduction to Mathematical Statistics I. Students should apply no later than the end of the spring semester of their junior year.

Students admitted to the actuarial science major usually have completed at least 40 s.h. at the University or at another postsecondary institution, including a three- or four-course calculus sequence, a course in linear algebra, and a calculus-based course in probability and statistics. The admission decision is based on a student's performance in these courses and other courses relevant to success in the major. ACT or SAT scores are considered in evaluating transfer students. Factors such as work ethic, enthusiasm, and commitment also may be considered. Students who do well in the prerequisite math courses tend to be the most successful in actuarial science.

For application forms and more information about selective admission, contact the Department of Statistics and Actuarial Science.

Learning Outcomes

Students will:

- be able to bring to bear actuarial, financial, mathematical, and statistical techniques to model and analyze risks, particularly in the context of insurance and pension;
- have the knowledge and analytical ability to pass the initial professional actuarial examinations given by the Society of Actuaries and Casualty Actuarial Society, and develop the skills needed for successful self-study of the advanced professional examinations;
- be skillful in using and developing computer software to solve actuarial problems;
- be able to clearly communicate results from an actuarial analysis to all stakeholders, and write effective reports that describe the analysis and summarize important findings; and
- possess a basic understanding of insurance and business operations.

Requirements

The Bachelor of Science with a major in actuarial science requires a minimum of 120 s.h., including 51 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 20].

The program prepares students for careers as actuaries. It also helps them learn material that is included in professional

examinations administered by professional organizations such as the Society of Actuaries and the Casualty Actuarial Society.

Students take a variety of actuarial science courses. They prepare for business aspects of the actuarial profession by studying accounting, law, finance, insurance, and economics. They also complete courses that enhance important communication skills, such as writing and speaking, as part of their GE CLAS Core requirements.

Courses Required for the Major

The B.S. with a major in actuarial science requires the following coursework. Permission to substitute coursework taken at another institution for required courses at the University of Iowa is decided case by case; students should contact the department.

Code	Title	Hours
Computer Science		
This course:		
CS:1210	Computer Science I: Fundamentals	4
Mathematics		
All of these:		
MATH:1850	Calculus I	4
MATH:1860	Calculus II	4
MATH:2700	Introduction to Linear Algebra	4
MATH:2850	Calculus III	4
MATH:3770	Fundamental Properties of Spaces and Functions I	4
Statistics and Actuarial Science		
All of these:		
ACTS:3080	Mathematics of Finance I	3
ACTS:4130	Quantitative Methods for Actuaries	3
ACTS:4180	Life Contingencies I	3
ACTS:4280	Life Contingencies II	3
ACTS:4380	Mathematics of Finance II	3
STAT:3100/ IGPI:3100	Introduction to Mathematical Statistics I	3
STAT:3101/ IGPI:3101	Introduction to Mathematical Statistics II	3
STAT:4100/ IGPI:4100	Mathematical Statistics I	3
STAT:4101/ IGPI:4101	Mathematical Statistics II	3

In exceptional cases, the advisor may grant permission to waive STAT:3100/IGPI:3100 Introduction to Mathematical Statistics I and/or STAT:3101/IGPI:3101 Introduction to Mathematical Statistics II.

Students may choose to complete ACTS:6480 Loss Distributions and ACTS:6580 Credibility and Survival Analysis (both courses) instead of ACTS:4280 Life Contingencies II, except honors students, who must complete all three courses.

Combined Programs

B.S./M.S. in Business Analytics (Career Subprogram)

Students majoring in actuarial science who are interested in earning a master's degree in business analytics with a career subprogram may apply to the combined B.S./M.S. program offered by the College of Liberal Arts and Sciences and the Tippie College of Business. The program enables students to begin the study of business analytics before they complete their bachelor's degree. Students are able to complete both degrees in five years rather than six.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For information about the business analytics program, see the M.S. in business analytics (career) [p. 1148] in the Tippie College of Business section of the Catalog.

B.S./M.S. in Finance

Students majoring in actuarial science who are interested in earning a master's degree in finance may apply to the combined B.S./M.S. program offered by the College of Liberal Arts and Sciences and the Tippie College of Business. The program enables students to begin the study of finance before they complete their bachelor's degree. Students are able to complete both degrees in five years rather than six.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For information about the finance program, see the M.S. in finance [p. 1190] (Tippie College of Business) in the Catalog.

Honors

Honors in the Major

Students majoring in actuarial science have the opportunity to graduate with honors in the major. They must maintain a UI cumulative g.p.a. of at least 3.33, a g.p.a. of at least 3.40 in all departmental courses, and complete the following five courses in addition to all courses required for the major.

Code	Title	Hours
ACTS:6480	Loss Distributions	3
ACTS:6580	Credibility and Survival Analysis	3
STAT:4560	Statistics for Risk Modeling	3
FIN:3300	Corporate Finance	3
MATH:3600	Introduction to Ordinary Differential Equations	3

University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the University's honors program.

Membership in the UI Honors Program is not required to earn honors in the actuarial science major.

Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. Courses in the major are those required to complete the major; they may be offered by departments other than the major department.

Much of the coursework is sequential, so students must begin requirements for the major as soon as possible. Individual study plans must be made carefully. Students who first enroll for a spring semester must consult their advisor to confirm a four-year plan.

Before the third semester begins: MATH:1860 Calculus II and MATH:2700 Introduction to Linear Algebra

Before the fifth semester begins: MATH:2850 Calculus III, MATH:3770 Fundamental Properties of Spaces and Functions I, STAT:3100/IGPI:3100 Introduction to Mathematical Statistics I, STAT:3101/IGPI:3101 Introduction to Mathematical Statistics II, and ACTS:3080 Mathematics of Finance I

Before the seventh semester

begins: STAT:4101/IGPI:4101 Mathematical Statistics II, ACTS:4130 Quantitative Methods for Actuaries, ACTS:4180 Life Contingencies I, ACTS:4380 Mathematics of Finance II, and at least 90 s.h. earned toward the degree

Before the eighth semester begins: ACTS:4280 Life Contingencies II

During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

- The Academic Advising Center advises Actuarial Science Interest students on prerequisite course planning. Students are advised for success, based on academic strength, not necessarily for a four year plan. Prerequisites may take more than one and a half years to complete.
- Enrollment in math courses requires completion of a placement exam.
- Fulfills a major requirement and may fulfill a GE requirement.
- Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
- GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
- Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
- Ordinarily, students apply for admission to the actuarial science major in the fall semester of their sophomore year, after they have taken MATH:3770 or MATH:2850, and STAT:3100. Students should apply no later than the end of the spring semester of their junior year. For further details and application instructions, see your advisor and the Department of Statistics and Actuarial Science website.
- Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
- Restricted to Actuarial Science Majors. For further details and application instructions, see your advisor and the Department of Statistics and Actuarial Science website.
- This course may count for VEE credit.
- This course is a recommended elective, not a requirement. Students may choose another elective. Prerequisites may apply.
- Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
- Students may choose to complete ACTS:6480 and ACTS:6580 (both courses) instead of ACTS:4280, except honors students, who must complete all three courses.

n Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>. If applicable search for "Early and Late Participation" to find this page (e.g. participate in graduation ceremony in May, degree conferral in August).

Career Advancement

Most actuaries are employed by insurance companies or employee benefits consulting firms. They have responsibilities related to all phases of product development and maintenance for their companies. Individual employers who need guidance in establishing employee insurance and retirement programs also hire actuarial science graduates. A growing number of actuaries work in asset/liability management, some in investment firms, and others in insurance companies.

Actuaries have always been in high demand and earn good salaries. Most Iowa graduates find work as actuaries, but some become financial managers and teachers. They take positions in locations all across the country, often in large metropolitan areas.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Statistics, Minor

Requirements

The undergraduate minor in statistics requires a minimum of 15 s.h. in statistics courses taken at the University of Iowa. At least 12 s.h. must be taken in courses numbered 3000 or above (selected from the lists below). Students must maintain a cumulative g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.

The minor in statistics requires a minimum of 15 s.h. of coursework, as follows.

Code	Title	Hours

Statistics, M.S.

Requirements

The Master of Science program in statistics requires 32 s.h. of graduate credit. It includes a solid foundation in statistical computing, statistical modeling, experimental design, and mathematical statistics plus electives in statistical methods and/or theory. Students have the opportunity to concentrate on theory or applications or a combination of the two.

In addition to required coursework, students must pass a two-part graduate final examination and complete the M.S. creative component.

Students must maintain a g.p.a. of at least 3.00 in all work toward the degree and in additional relevant coursework. Students must take a computer programming proficiency test during the first semester of study; those who display inadequate programming skills are assigned activities to build their proficiency.

The M.S. with a major in statistics requires the following work.

Statistics Courses

Code	Title	Hours
All of these:		
STAT:5090	ALPHA Seminar	1
STAT:5100	Statistical Inference I	3
STAT:5101	Statistical Inference II	3
STAT:5200/ IGPI:5199	Applied Statistics I	4
STAT:5201	Applied Statistics II	3
STAT:5400/ IGPI:5400	Computing in Statistics	3
STAT:6220	Statistical Consulting	3
STAT:6300	Probability and Stochastic Processes I	3
STAT:6990	Readings in Statistics (two consecutive enrollments)	2
At least 7 s.h. from these:		
STAT:4520/ IGPI:4522/ PSQF:4520	Bayesian Statistics	3
STAT:4540/ IGPI:4540	Statistical Learning	3
STAT:4580/ IGPI:4580	Data Visualization and Data Technologies	3
STAT:5120	Mathematical Methods for Statistics	3
STAT:6301	Probability and Stochastic Processes II	3
STAT:6510/ IGPI:6511	Applied Generalized Regression	3
STAT:6530/ IGPI:6530	Environmental and Spatial Statistics	3
STAT:6547/ PSQF:6247	Nonparametric Statistical Methods	3
STAT:6560	Applied Time Series Analysis	3
STAT:6970	Topics in Statistics	3
A Ph.D.-level course numbered 7000 or above, including seminar courses		1-3

Students planning to enter the doctoral program may wish to include STAT:5120 Mathematical Methods for Statistics in their course selections, since it is part of the required Ph.D. core.

Final Examination

The final examination consists of two parts: one covers the topics presented in STAT:5100 Statistical Inference I and STAT:5101 Statistical Inference II; the other part covers the topics presented in STAT:5200/IGPI:5199 Applied Statistics I, STAT:5201 Applied Statistics II, and STAT:5400/IGPI:5400 Computing in Statistics. Each part includes a few problems that test readiness for the Ph.D. program.

Final examinations are offered the week before classes begin in August. Study guides are available in the department office. Students who do not succeed the first time they take the exam may repeat it once, with the possibility to retake it the week before classes begin in January.

Students must complete all requirements and be granted the Master of Science degree within one calendar year of passing the M.S. final examination; those who do not meet this deadline are required to take the exam again.

Students entering the Ph.D. program, who will choose either biostatistics, probability/mathematical statistics, or statistical computing as their concentration area, and who already have taken the equivalent of the first-year courses, may take the M.S. final examination in statistics before beginning further studies.

Creative Component

Students also must complete a creative component that is related to their application and career interests. Students wishing to qualify for the Ph.D. program are encouraged to write a research-oriented creative component. The creative component entails writing an 8-15 page report on a suitable topic, under an advisor's supervision (with two consecutive 1 s.h. enrollments in STAT:6990 Readings in Statistics, normally during the fall and spring semesters of the second year). A draft of the paper should be completed by the end of the first enrollment in STAT:6990, and polished by early- to mid-semester in the second enrollment. The paper is then presented orally in a public seminar. A faculty committee, in consultation with the creative component advisor, evaluates the work and the presentation, and assigns a grade of satisfactory or unsatisfactory.

For students wishing to qualify for the Ph.D. program, the creative component represents one piece of the body of work used to determine Ph.D. qualification. The creative component must be satisfactorily completed within one calendar year of passing the M.S. final examination; failure to meet this deadline requires reexamination of the student.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Career Advancement

Statistics and probability are vital to many fields, so the demand for well-trained statisticians is strong. Statisticians work in medicine, engineering, law, public policy making, marketing, manufacturing, engineering, agriculture, varied social and natural sciences, and numerous other areas.

The M.S. program prepares students for careers as professional statisticians or for entry into a Ph.D. program. To learn more about job opportunities, see ASA JobWeb on the American Statistical Association website.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Actuarial Science, M.S.

Requirements

The Master of Science program in actuarial science requires 36 s.h. of graduate credit. The program prepares students for actuarial careers by emphasizing the theory that underlies risk processes and the application of this theory to practical problems of insurance pricing and management. It also helps them learn the material that is tested on professional examinations administered by professional organizations such as the Society of Actuaries and the Casualty Actuarial Society.

Students complete required courses and a final examination.

The M.S. with a major in actuarial science requires the following coursework.

Code	Title	Hours
One of these sequences:		
STAT:4100- STAT:4101	Mathematical Statistics I-II (same as IGPI:4100-IGPI:4101)	6
STAT:5100- STAT:5101	Statistical Inference I-II (for well prepared students)	6
All of these:		
ACTS:3080	Mathematics of Finance I	3
ACTS:4130	Quantitative Methods for Actuaries	3
ACTS:4180	Life Contingencies I	3
ACTS:4280	Life Contingencies II	3
ACTS:4380	Mathematics of Finance II	3
ACTS:6160	Topics in Actuarial Science	3
ACTS:6480	Loss Distributions	3
ACTS:6580	Credibility and Survival Analysis	3
STAT:4560	Statistics for Risk Modeling	3
A course approved by the advisor		3

Final Examination

The final examination is offered the weekend before classes begin in January. The exam covers the material presented in ACTS:4130 Quantitative Methods for Actuaries, ACTS:4180 Life Contingencies I, ACTS:4280 Life Contingencies II, and ACTS:4380 Mathematics of Finance II. Students who do not succeed on their first attempt may retake the exam once.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Career Advancement

Most actuaries are employed by insurance companies or employee benefits consulting firms. They have responsibilities related to all phases of product development and maintenance for their companies. Individual employers who need guidance in establishing employee insurance and retirement programs also hire actuarial science graduates. A growing number of actuaries work in asset/liability

management, some in investment firms, and others in insurance companies.

Actuaries have always been in high demand and earn good salaries. Most Iowa graduates find work as actuaries, but some become financial managers and teachers. They take positions in locations all across the country, often in large metropolitan areas.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Statistics, Ph.D.

Requirements

The Doctor of Philosophy program in statistics requires a minimum of 76 s.h. of graduate credit, including work completed for the M.S. degree.

The Graduate College requires a minimum g.p.a. of 3.00 to graduate with a Ph.D. degree; however, the Department of Statistics and Actuarial Science requires a higher g.p.a. of at least 3.40 to earn the Ph.D. in statistics. This includes all courses used to meet degree requirements plus additional courses that are relevant to a student's program.

Ph.D. students complete required coursework, including four courses in one of four concentration areas: biostatistics, probability/mathematical statistics, statistical computing, or actuarial science/financial mathematics (see "Concentration Areas" below for area descriptions and course lists). They may take coursework or seminars in other departments to relate an area of specialization to other fields of knowledge, to acquire the ability to use electronic digital computing equipment, or to learn non-English language skills necessary for reading scientific journals and communicating with scholars in other languages.

Ph.D. Qualifying Procedure

Students enter the Ph.D. program in one of two tracks.

Statistics: After successfully passing both the M.S. final examination in statistics and the creative component (in exceptional cases, a student may petition to go through the Ph.D. qualifying procedure early), a student who will choose either biostatistics, probability/mathematical statistics, or statistical computing as the selected concentration area, can request, by notifying the director of graduate studies, to go through the Ph.D. qualifying procedure. Upon this request, the faculty evaluate the student's body of work and assess the student's potential for research. The body of work will include the M.S. final examination in statistics, the creative component, and coursework. This evaluation and assessment results in one of three decisions—the student is officially admitted into the Ph.D. program; the student must reapply to go through the Ph.D. qualifying procedure after accumulating a larger body of work for evaluation; or the student is not admitted into the Ph.D. program.

Actuarial Science: After successfully passing the M.S. final examination in actuarial science (in exceptional cases, a student may petition to go through the Ph.D. qualifying procedure early), a student who will choose actuarial science/financial mathematics as the selected concentration area, can request, by notifying the director of graduate studies, to go through the Ph.D. qualifying procedure. Upon this request, the faculty evaluate the student's body of work and assess the student's potential for research. The body of work will include the M.S. final examination in actuarial science, professional examinations passed, and course work. This evaluation and assessment results in one of two decisions—the student is officially admitted into the Ph.D. program in the actuarial science/financial mathematics concentration area, or the student is not admitted into the Ph.D. program.

Students complete the program by passing the Ph.D. final (comprehensive) examination and writing and defending a dissertation. Students usually complete the program three years after earning the M.S. degree.

A plan of study that does not conform to the requirements described below but is of high quality may be approved by the director of graduate studies.

The Ph.D. with a major in statistics requires the following work.

Statistics Courses

Biostatistics, Probability/Mathematical Statistics, or Statistical Computing Concentration Area

Students in the biostatistics, probability/mathematical statistics, or statistical computing concentration area must complete the following core courses from the M.S. in statistics program.

Code	Title	Hours
All of these:		
STAT:5090	ALPHA Seminar	1
STAT:5100	Statistical Inference I	3
STAT:5101	Statistical Inference II	3
STAT:5200/ IGPI:5199	Applied Statistics I	4
STAT:5201	Applied Statistics II	3
STAT:5400/ IGPI:5400	Computing in Statistics	3
STAT:6220	Statistical Consulting	3
STAT:6300	Probability and Stochastic Processes I	3
STAT:6990	Readings in Statistics (two consecutive enrollments)	2

Actuarial Science/Financial Mathematics Concentration Area

Students in the actuarial science/financial mathematics concentration area must complete the following core courses from the M.S. in actuarial science program.

Code	Title	Hours
One of these sequences:		
STAT:4100- STAT:4101	Mathematical Statistics I-II (same as IGPI:4100-IGPI:4101)	6
STAT:5100- STAT:5101	Statistical Inference I-II (for well-prepared students)	6
All of these:		
ACTS:3080	Mathematics of Finance I	3
ACTS:4130	Quantitative Methods for Actuaries	3
ACTS:4180	Life Contingencies I	3
ACTS:4280	Life Contingencies II	3
ACTS:4380	Mathematics of Finance II	3
ACTS:6160	Topics in Actuarial Science	3
ACTS:6480	Loss Distributions	3
ACTS:6580	Credibility and Survival Analysis	3

STAT:4560	Statistics for Risk Modeling	3
A course approved by the advisor		3

All Concentration Area Courses

Additional Ph.D. core coursework, regardless of concentration area, requires the following coursework.

Code	Title	Hours
All of these:		
STAT:5120	Mathematical Methods for Statistics	3
STAT:7100	Advanced Inference I	3
STAT:7101	Advanced Inference II	3
STAT:7200	Linear Models	4
STAT:7300	Foundations of Probability I	3
STAT:7400/ IGPI:7400	Computer Intensive Statistics	3
STAT:7990	Reading Research	18
Seminars, chosen from STAT:7190 or STAT:7290 or STAT:7390		2

Concentration Areas

Students take at least four courses in one of the following concentration areas; at least one of the four courses must be at the Ph.D. level (numbered 7000 or above).

Statistical Computing

Statistical computing emphasizes the theory and application of a broad array of statistical models, such as linear, generalized linear, nonlinear, categorical, spatial, correlated response, and nonparametric regression models. This concentration area prepares students to specify and choose appropriate models; fit the models using available statistical software; and make sound statistical conclusions and interpretive statements. It is excellent preparation for students interested in academic, industrial, or government positions that involve data modeling and analysis.

Code	Title	Hours
STAT:6510/ IGPI:6511	Applied Generalized Regression	3
STAT:6530/ IGPI:6530	Environmental and Spatial Statistics	3
STAT:6540/ PSQF:6245	Applied Multivariate Analysis	3
STAT:6560	Applied Time Series Analysis	3
STAT:6970	Topics in Statistics	3
STAT:7510/ BIOS:7410	Analysis of Categorical Data	3
STAT:7520	Bayesian Analysis	3
STAT:7560	Time Series Analysis	3

Probability/Mathematical Statistics

Probability/mathematical statistics emphasizes a broad, solid foundation in techniques and underpinnings of mathematical statistics. Its focus on breadth and depth is intended to produce well-rounded, knowledgeable scholars. It is excellent preparation for academic positions in mathematical statistics and industrial or government positions that require broadly trained statisticians with a strong understanding of statistical theory.

Code	Title	Hours
STAT:6301	Probability and Stochastic Processes II	3
STAT:7301	Foundations of Probability II	3
STAT:7520	Bayesian Analysis	3
STAT:7560	Time Series Analysis	3

Biostatistics

Biostatistics emphasizes exposure to various biostatistical methods, such as survival analysis, categorical data analysis, and longitudinal data analysis. It prepares students for consulting and other positions in industry.

Code	Title	Hours
STAT:6530/ IGPI:6530	Environmental and Spatial Statistics	3
STAT:6540/ PSQF:6245	Applied Multivariate Analysis	3
STAT:7510/ BIOS:7410	Analysis of Categorical Data	3
STAT:7570/ BIOS:7210/ IGPI:7210	Survival Data Analysis	3
BIOS:7310/ IGPI:7310	Longitudinal Data Analysis	3

Actuarial Science/Financial Mathematics

Actuarial science/financial mathematics emphasizes the theory of actuarial science, finance, and risk management. It is excellent preparation for academic positions in universities that offer actuarial science programs and for positions in the insurance, pension, and financial industries.

Code	Title	Hours
ACTS:7730	Advanced Topics in Actuarial Science/Financial Mathematics	arr.
STAT:6301	Probability and Stochastic Processes II	3
STAT:7301	Foundations of Probability II	3
STAT:7560	Time Series Analysis	3
FIN:7110	Finance Theory I	3
FIN:7130	Finance Theory II	3

Final Examination

Students typically take the Ph.D. final (comprehensive) examination at the beginning of the third year of graduate study, during the week before fall classes begin. Students who do not succeed the first time they take the exam may repeat it once. Ordinarily, this second opportunity to pass the exam will occur one year later, during the week before fall classes begin. However, a student who performs well on one area of the exam but not the other may, in consultation with their advisor and the director of graduate studies, petition the department to move up their second opportunity to the week before the next spring semester's classes begin. The department's decision on whether to grant this petition will take into account any extenuating circumstances.

The comprehensive examination consists of a written core examination and an oral examination in two of the following four areas:

statistical inference (topics in STAT:5100 Statistical Inference I, STAT:5101 Statistical Inference II, and STAT:7100 Advanced Inference I);

linear models (topics in STAT:7200 Linear Models);

probability (topics in STAT:6300 Probability and Stochastic Processes I and STAT:7300 Foundations of Probability I); and

statistical computing (topics in STAT:5400/IGPI:5400 Computing in Statistics and STAT:7400/IGPI:7400 Computer Intensive Statistics).

Students in the actuarial science/financial mathematics concentration area have the option of taking only one of the four examinations listed above and an actuarial science/financial mathematics examination designed by their advisor and approved by the director of graduate studies.

Committee

Upon passing the Ph.D. final examination, the candidate chooses a committee of at least five members, which is approved by the advisor. At least four of the faculty members must be University of Iowa tenure-track faculty members. At least two of the faculty members must be from the major department (defined as faculty members who hold any appointment in the major department), and University of Iowa tenure-track faculty members.

The department may request the Graduate College dean's permission to replace one of the five committee members with a recognized scholar of professorial rank from another academic institution.

Prospectus

Within 18 months of passing the Ph.D. final exam, the candidate should present a written and oral prospectus to the committee. The prospectus describes the problems the student is considering for the thesis, relevant background material, ideas for solving the problems, and any preliminary results. Failure to successfully complete the prospectus within 24 months of passing the Ph.D. final exam will jeopardize the continuation of a student's financial support.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Financial Support

Funds are available to help support outstanding Ph.D. applicants. Fellowships, teaching assistantships, and research assistantships provide an attractive stipend plus tuition at the resident rate and tuition scholarships for students who are appointed at least one-quarter time. In most cases, full tuition waivers are granted.

Students who wish to be considered for financial assistance for their third year in the program should request to go through the Ph.D. qualifying process no later than the spring semester of their second year.

Career Advancement

Statistics and probability are vital to many fields, so the demand for well-trained statisticians is strong. Statisticians

work in medicine, engineering, law, public policy making, marketing, manufacturing, engineering, agriculture, varied social and natural sciences, and numerous other areas.

The program prepares students for careers in research, applications, and teaching. To learn more about job opportunities, see ASA JobWeb on the American Statistical Association website.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Theatre Arts

Director, Division of Performing Arts

- Alan M. MacVey

Chair, Department of Theatre Arts

- Mary Beth Easley

Undergraduate major: theatre arts (B.A.)

Undergraduate minor: theatre arts

Graduate degree: M.F.A. in theatre arts

Faculty: <https://theatre.uiowa.edu/people>

Website: <https://theatre.uiowa.edu/>

The Department of Theatre Arts offers academic programs for undergraduate and graduate students. It also stages live performances throughout the academic year and during the summer. The department also administers the Certificate in Public Digital Arts [p. 952].

The department is one of the academic units in the Division of Performing Arts [p. 365]. Students have the opportunity to earn a major in theatre arts and a second major in one of the other units within the division—dance or music. It also participates in offering the division's Certificate in Arts Entrepreneurship [p. 142].

The department also educates students who plan to enter other fields in which understanding of the arts and experience with theatre skills are useful. Some earn a major in theatre arts, sometimes with a second major in another discipline. Others earn a minor or take theatre classes as nonmajors. For information, view the minor in theatre arts [p. 1104] in the Catalog or see "Courses for Nonmajors" below.

Several of the department's courses are approved for GE CLAS Core; look for courses with the prefix THTR in the GE CLAS Core [p. 20] section of the Catalog.

Courses for Nonmajors

Most theatre arts courses are open to all students, regardless of their majors, and are appropriate for nonmajors interested in theatre. The following courses are designed specifically for nonmajors.

Code	Title	Hours
THTR:1120	Basic Acting for Language Learners	3
THTR:1140	Basic Acting	3
THTR:1141	Basic Acting II	3
THTR:1400	Theatre and Society: Ancients and Moderns	3
THTR:1401	Theatre and Society: Romantics and Rebels	3
THTR:1410	Musical Theatre History	3
THTR:1411	Comedy and Society	3
THTR:1412	The Arts in Performance	3
THTR:2120	Movement: Special Topics	2-3
THTR:2301	Playwriting I	3
THTR:2320	Playwriting in a Global World	3
THTR:2405	Staging Americans: U.S. Cultures Through Theatre and Performance	3
THTR:2601	Theatre for Community Engagement	3

THTR:2605	Monsters, Victims, and Villains: Changing Perceptions	3
THTR:2610	Acting for Success	3
THTR:2620	Improvisation for Engineers, Scientists, and the Curious	3
THTR:3210	Makeup Design for the Stage	3
THTR:3301	Playwriting II	3
THTR:3510	Introduction to Arts Management	3
THTR:3520	Starting Up the Arts Start-up	3

Productions and Auditions

The Department of Theatre Arts presents around 25-30 public productions each year. These include a subscription series of five plays, a festival of new works by students, and other productions, many of them new plays.

Special attention is given to the process of developing new works and to the collaborative process that involves writers, directors, designers, dramaturgs, stage managers, and actors. Graduate and undergraduate students, faculty, and visiting guest artists work together on large and small projects throughout the year.

Auditions for Theatre Arts Productions

Auditions for theatre arts productions are open to everyone, including all University of Iowa students and members of the local community. Theatre arts students are given first priority for roles, but many roles are available throughout the year, so many students in other majors and nonstudent actors are cast each season. Occasionally, professional actors are employed.

General auditions are held at the beginning of the fall semester, and callback lists are posted during the semester. Additional general auditions usually are scheduled in early November and in March. Information about auditions is available from the Department of Theatre Arts office in August. Notices of auditions are posted on the department's online call board.

Programs

Undergraduate Programs of Study

Major

- Major in Theatre Arts (Bachelor of Arts) [p. 1099]

Minor

- Minor in Theatre Arts [p. 1104]

Graduate Program of Study

Major

- Master of Fine Arts in Theatre Arts [p. 1105]

Facilities

The University of Iowa has one of the finest educational theatre complexes in the country. The Theatre Building offers four theatres and up-to-date facilities for classroom, laboratory, shop, and performance work.

The E.C. Mabie Theatre, a continental-style, 457-seat proscenium playhouse, is one of the finest theatres of its type in the United States. The David Thayer Theatre is a "black box" production space; its flexible seating units accommodate from 140 to 225 people and allow modification of space and audience relationships. The Alan MacVey Theatre, which seats 137, is an open-stage theatre dedicated primarily to the production of new and experimental works. The flexible studio theatre seats 50.

In addition to classrooms for acting and directing, several spaces are designed for teaching particular aspects of dramatic studies. The Cosmo Catalano Acting Studio is for study of movement and motion by acting students. The Arnie Gillette Design Studio serves as classroom and studio workshop for design students.

To support its production schedule and to provide students with an appropriate range of experience, the department maintains shops for building, painting, maintaining, and storing scenery, costumes, and properties. Using these shops, students learn to work in metal, plastics, canvas, and wood.

Courses

Theatre Arts Courses

THTR:1000 First-Year Seminar 1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

THTR:1120 Basic Acting for Language Learners 3 s.h.

Development of theatrical creativity to enhance English language skills through acting games, monologues, and scene work; exercises in concentration, relaxation, communication, imagination, observation, sensory awareness.

THTR:1140 Basic Acting 3 s.h.

Concentration, relaxation, imagination, observation, communication, sensory awareness; development of theatrical creativity through objectives, obstacles, action, conflict, spontaneity; development of a scene from scripts. Requirements: non-theatre arts major. GE: Engineering Be Creative; Literary, Visual, and Performing Arts.

THTR:1141 Basic Acting II 3 s.h.

Continuation of THTR:1140; emphasis on development of scenes. Prerequisites: THTR:1140. Requirements: non-theatre arts major.

THTR:1400 Theatre and Society: Ancients and Moderns 3 s.h.

Representative plays as performed in social contexts of ancient Egypt; classical Greece, Rome, India, and Japan; and medieval and early modern Europe. Duplicates THTR:2410. GE: Historical Perspectives; Literary, Visual, and Performing Arts.

THTR:1401 Theatre and Society: Romantics and Rebels 3 s.h.

Representative plays as performed in social contexts of revolutionary and modern Europe and postwar United States. Duplicates THTR:2411. GE: Historical Perspectives; Literary, Visual, and Performing Arts.

THTR:1410 Musical Theatre History 3 s.h.

American musical theatre's form, function, evolution; major composers (Berlin, Gershwin, Rodgers and Hammerstein, Sondheim), lesser-known and contemporary writers; roots of the rock musical, future of musical theatre, how musicals reflect their own eras and cultural attitudes of their times; readings, recordings, videos. Ability to read music not required.

THTR:1411 Comedy and Society 3 s.h.

How comedy reflects, comments upon, and intersects with western culture, society, and identity; roots of western comedy, satire, censorship; stand-up comedians, improv and sketch troupes, satirists; race, gender and sexuality, class perception; how portrayals of African Americans in popular culture evolved from 19th century to present; videos, readings, live performances. GE: Values and Culture.

THTR:1412 The Arts in Performance 3 s.h.

GE: Literary, Visual, and Performing Arts; Values and Culture. Same as DANC:1412, DPA:1412.

THTR:1834 Modes of Film and Video Production 4 s.h.

Introduction to filmmaking; how to shoot and edit short works of cinematic art; exposure to various working methods including nonfiction, fiction, and experimental modes of video production. Corequisites: for CINE:1834—CINE:1601, if not taken as a prerequisite. GE: Engineering Be Creative. Same as CINE:1834.

THTR:2120 Movement: Special Topics 2-3 s.h.

Specialized study in movement techniques and movement styles for body conditioning; development of yoga techniques; varied topics.

THTR:2140 Acting I 3 s.h.

Development of creativity, imagination, and openness through exercises to engage mind, body, and voice in theatrical play and scene work. Requirements: theatre arts major, or theatre arts minor and THTR:1140.

THTR:2170 Acting for Musical Theatre 3 s.h.

Students focus on acting technique for musical theatre; within the framework of song, students learn to work truthfully with a partner, find the action of the piece, mine a piece of music for acting clues from the composer, and connect authentically while being larger than life. Prerequisites: THTR:1140 or THTR:2140. Requirements: any one of the courses listed as prerequisites, or one semester of applied lessons in vocal performance.

THTR:2175 Musical Theatre Performance: Special Topics 3 s.h.

Specialized, practical study in a specific area related to development of musical theatre knowledge and performance skills; topics vary. Corequisites: THTR:2140. Requirements: audition.

THTR:2200 Elements of Design 3 s.h.

Development of visual literacy; manipulation of line, shape, color, value, texture, form; development of designs for theatre through techniques explored in class. GE: Engineering Be Creative.

THTR:2215 Theatre Technology 3 s.h.

Theatrical production; technology and backstage operations including sound, projections, lighting, scenery, costumes, stage management. GE: Engineering Be Creative.

- THTR:2220 Production Lab** 1-3 s.h.
Practical experience in physical construction and operation of live theatre; theatre department productions provide lab experiences for applied learning in technical theatre and run crew opportunities in scenery, costumes, lighting, sound, and stage management. GE: Engineering Be Creative.
- THTR:2301 Playwriting I** 3 s.h.
Elements of playwriting; emphasis on analysis and discussion of original student writing. GE: Engineering Be Creative; Literary, Visual, and Performing Arts.
- THTR:2320 Playwriting in a Global World** 3 s.h.
Students read and analyze the works of a diverse range of American and international playwrights and documentarians; fundamental skills of reading, hearing, imagining, and writing for local and global stages; emphasis on a broad range of voices, styles, and stories. GE: Diversity and Inclusion.
- THTR:2402 Script Analysis** 3 s.h.
Basic skills in critical reading and close analysis of dramatic texts, with focus on dramatic structure, challenges of putting texts into production.
- THTR:2405 Staging Americans: U.S. Cultures Through Theatre and Performance** 3 s.h.
Role of American theatre as a complex tapestry of race, gender, sexuality, and disability; examination of plays and performance outside primarily white-male canon; contemporary social practice and cultural politics in local and national contexts. GE: Diversity and Inclusion.
- THTR:2410 History of Theatre and Drama I** 3 s.h.
Major developments in Anglo-European, Indian, Asian, and African theatre and drama, 3000 B.C.E. to C.E. 1700; sociopolitical, economic, and cultural circumstances of original productions. Offered spring semesters. GE: Historical Perspectives; Literary, Visual, and Performing Arts.
- THTR:2411 History of Theatre and Drama II** 3 s.h.
Continuation of THTR:2410; 1700 to 1960; revolutionary and modern European theatre and culturally diverse postwar U.S. theatre. Offered fall semesters. GE: Historical Perspectives; Literary, Visual, and Performing Arts.
- THTR:2450 Animals and Performance in American Culture** 3 s.h.
Role of animals in various forms of cultural expression in the U.S. from the 19th to the 21st centuries; along with visual and literary arts, special emphasis will be placed on live performance (e.g., circus and theatre) because of how it highlights embodied and affective modes of communication that inform our connections to animals; relationship of cultural forms involving animals (real and imagined) to the lived experience of animals in the wider historical and social context; how animals shape human ideas about race, ethnicity, class, gender, sexuality, and construct notions of "Americanness." Same as AMST:2950.
- THTR:2601 Theatre for Community Engagement** 3 s.h.
Creation of a theatre performance piece with the local community; introduction to applied theatre; preparation to facilitate workshops with community partners; students explore the historical context for applied theatre, play various warm-up and content-generating games, and learn how to facilitate these games and exercises themselves; culminates in a collective performance piece that students work to create as a team. GE: Diversity and Inclusion.
- THTR:2605 Monsters, Victims, and Villains: Changing Perceptions** 3 s.h.
Introduction to implementation of performance opportunities for special populations (defined as those with cognitive or physical disability) and underrepresented populations; students gain skills necessary to create radical opportunities for and implementation of performances including individuals with disabilities in theatre, dance, and music; students from different backgrounds experience collaborative artistic excellence while redefining audience expectations; historic background for perceptions of disability. GE: Diversity and Inclusion. Same as EDTL:2963.
- THTR:2610 Acting for Success** 3 s.h.
How skills learned by actors in the theatre world can be applied to presentations and interactions in business, education, and beyond; how to connect with others on a personal level; ability to stand out as a team player and a leader; acting techniques traditionally used in theatre to open up communication dynamics; how to display an authentic self in everyday situations. Corequisites: RHET:1030 or RHET:1040 or RHET:1060. GE: Engineering Be Creative. Same as RHET:2610.
- THTR:2620 Improvisation for Engineers, Scientists, and the Curious** 3 s.h.
Use of theatrical exercises and improvisation techniques to help students develop their imaginations, stimulate creativity, and approach practical projects from a fresh point of view; emphasis on working in teams and using improvisational techniques to solve problems. GE: Engineering Be Creative.
- THTR:2720 Concepts in Contemporary Art Practice** 3 s.h.
Interdisciplinary investigation of materials and concepts in relation to time-based media, performance, video, installation; individual and collaborative projects. Prerequisites: INTM:2710. Same as INTM:2720.
- THTR:2800 Digital Arts: An Introduction** 3 s.h.
Introduction to potential of integrating art with technology to provide a foundation of skills and concepts through hands-on experimentation; lectures and demonstrations introduce key concepts and ideas as well as the history of digital arts; students develop skills that form a foundation for future investigation through labs; work may include using an Arduino, programming, and developing an interface to control a software project; final project is shared with the public in some way; critical discourse in the form of writing assignments allows for reflection and evaluation. GE: Engineering Be Creative. Same as ARTS:2800, CINE:2800, CS:2800, DANC:2800, DIGA:2800, MUS:2800.
- THTR:3110 Voice for the Actor** 3 s.h.
Progressive development of voice for theatre; physical awareness, breath, freeing and amplifying sound, range and resonance, articulation; application of voice work through classical and contemporary theatre texts.
- THTR:3120 Theatre Movement** 3 s.h.
The body as a tool for dramatic expression; basic principles and practices of stage movement; approaches to physical technique.
- THTR:3140 Acting II** 3 s.h.
Extension of work begun in THTR:2140; scene study, with focus on contemporary realism and development of collaborative dynamic. Prerequisites: THTR:1141 or THTR:2140.

- THTR:3151 Voice for the Actor II** 3 s.h.
Further development of voice for theatre with emphasis on acquisition of accents and dialects. Prerequisites: THTR:3110.
- THTR:3160 Movement Styles** 3 s.h.
Intensive study of a selected movement style (e.g., mask, clown, commedia dell'arte). Prerequisites: THTR:3120.
- THTR:3165 Stage Combat** 3 s.h.
Fundamental principles of stage combat in a specialized area of study—unarmed combat, rapier and dagger techniques, and hand-to-hand and knife techniques.
- THTR:3180 Media Studies** 3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th/21st-Century Literature. Same as ENGL:3180.
- THTR:3202 Graphic Design for the Entertainment Industry** 3 s.h.
Series of projects focusing on developing graphic design skill sets and using the Adobe Creative Suite and other programs. GE: Engineering Be Creative.
- THTR:3205 Concepts in Drawing** 3-4 s.h.
Intermediate-level topics; observation, theory, media, form, content; emphasis on personal direction. Prerequisites: DRAW:2310. Same as DRAW:3310.
- THTR:3208 Mask and Puppet Crafts** 3 s.h.
Mask and puppet design; paper mache, plaster gauze, thermal plastics, and soft sculpture techniques. GE: Engineering Be Creative.
- THTR:3210 Makeup Design for the Stage** 3 s.h.
GE: Engineering Be Creative. Same as DPA:3210.
- THTR:3211 Period Styles** 3 s.h.
Survey of design and motifs spanning history of western civilization through development of interior and exterior architecture, furniture, decorative themes, fashion, and fine art.
- THTR:3215 Sewing Techniques for Theatre Costuming** 3 s.h.
Students learn and improve sewing skills for theatre costuming; lab oriented with focus primarily based on a variety of sample sewing techniques; collaboration and individual work; final project consists of a costume sample from a chosen show and reflects student's skill and experience.
- THTR:3221 Technology for the Entertainment Industry** 3 s.h.
Introduction to technology skills that are at the center of the entertainment industry; programming and operating digital lighting and sound consoles, intelligent lighting systems, projection hardware and software; outdoor event rigging, metal construction, and fabrication. Same as DPA:3221.
- THTR:3223 Introduction to Lighting Technology** 3 s.h.
Training for a career as a touring or resident stage electrician in the entertainment industry; plot organization/shop orders, digital fixtures, power distribution, personal management, console configuration/control, and electrical troubleshooting/maintenance.
- THTR:3225 Makeup Design: Special Topics** 3 s.h.
Advanced techniques in stage makeup design and application through analysis of forms, research, and hands-on projects.
- THTR:3230 Scene Design I** 3 s.h.
Development of theatre scenery; how to research, conceptualize, and express ideas in 3-D models, simple sketches, and drafting. GE: Engineering Be Creative. Same as ARTS:3230.
- THTR:3240 Costume Design I** 3 s.h.
Introduction to theatre costumes; how to conceptualize and express ideas through rendering and 3-D mannequin projects. May be taken after THTR:4240. GE: Engineering Be Creative.
- THTR:3250 Lighting Design I** 3 s.h.
How to research, conceptualize, and express ideas through light plots, other design paperwork, and theatre lighting design projects. GE: Engineering Be Creative.
- THTR:3260 Sound Design for the Theatre** 3 s.h.
Introduction to digital sound recording and live sound reinforcement techniques for a variety of entertainment venues (theatre, dance, concerts, industrial projects); creation of soundscapes using Pro Tools software; implementation of designs through the use of QLab playback systems and digital mixing consoles; documentation of sound design for theoretical and realized productions. GE: Engineering Be Creative.
- THTR:3270 Entertainment Design** 3 s.h.
Introduction to entertainment design and technology; primary focus on contemporary approaches to design and delivery of content in entertainment industry; assignment of practical projects using media servers, projection, LED arrays, video editing software, and moving light technologies. GE: Engineering Be Creative.
- THTR:3276 Medieval Drama** 3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Medieval and Early Modern Literature and Culture. PERIOD: Early Literatures Through 17th Century. Same as ENGL:3276.
- THTR:3277 English Renaissance Drama** 3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Medieval and Early Modern Literature and Culture. PERIOD: Early Literatures Through 17th Century. Same as ENGL:3277.
- THTR:3301 Playwriting II** 3 s.h.
Application of fundamental skills learned in THTR:2301 to more advanced study of dramatic structure and style; reading of plays, weekly writing assignments; focus on writing one-act play. Prerequisites: THTR:2301.
- THTR:3310 Undergraduate Playwriting Workshop** 1-3 s.h.
Workshop discussion of original full-length plays, collaborative creation of new plays, work with guest artists. Prerequisites: THTR:2301 and THTR:3301.
- THTR:3315 Standup Comedy Practicum** 3 s.h.
Writing and performing standup comedy; emphasis less on creating a comic persona and more on pulling from and articulating personal truth; analysis of contemporary comedians and joke structure; performing original work for multiple audiences in classroom and out in community.
- THTR:3320 Writing for Film** 3 s.h.
Rigorous writing for film; focus on feature-length screenplay; for students with experience in dramatic writing, fiction, or screenwriting. Requirements: completion of at least 60 s.h. or graduate standing.

- THTR:3401 Topics in Dramatic Literature** 3 s.h.
Topics in dramatic literature, including specific authors, periods, and movements; sample topics include Ibsen and Strindberg, Chekov, Brecht and the Brechtian, and avant-garde theatre.
- THTR:3402 Shakespeare the Dramatist** 3 s.h.
Exploration of a number of Shakespeare's greatest works; close textual analysis supplemented with historical, theoretical, theatrical, and philosophical considerations; special attention given to Shakespeare's dramatic method and relation of his dramaturgy to profession of theater-making.
- THTR:3421 Performing Autobiography** 3 s.h.
Advanced seminar and workshop; immersive readings in genre of contemporary autobiographical work, scholarship and criticism, and performance texts and videos as established artists have developed them; students write and perform their own original pieces stemming from personal experiences and interests. Recommendations: RHET:1030. Same as GWSS:3421.
- THTR:3430 Women on Stage** 3 s.h.
Examination of how and why women in the United States have expressed themselves through theatre and performance from 1776 to present; students study plays as performed events in specific times and places for specific audiences through works by African American, Asian American, European American, Latina, Native American, and lesbian/queer writers; what the theater—as a public, embodied art form—offers female writers; how stakes differ for women of diverse backgrounds in using this often suspect and uniquely powerful medium in particular historical moments; how changing definitions of gender and sexuality come into play; prior background in theater not required. Same as AMST:3430, GWSS:3430.
- THTR:3440 American Drama Since 1900** 3 s.h.
American playwrights and plays after 1900. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th/21st-Century Literature. Same as ENGL:3440.
- THTR:3462 African American Drama** 3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: Varies by semester. English and Creative Writing majors may apply this course to the Multiethnic American Literature and Culture requirement. Same as AFAM:3462, ENGL:3462.
- THTR:3501 Stage Management I** 3 s.h.
Duties and procedures of stage management; focus on development of production from preparatory work through performance; role of stage manager in collaboration.
- THTR:3510 Introduction to Arts Management** 3 s.h.
Nonprofit performing arts management and administrative principles; practical applications, trends in the field; focus on arts organizations and their key administrative positions. Same as DPA:3510, INTD:3510.
- THTR:3520 Starting Up the Arts Start-up** 3 s.h.
Arts administration principles and trends as applied to creation of an arts-related enterprise; case studies; students create business plan for a new arts organization. Duplicates ENTR:2000 and MGMT:3100. Corequisites: ENTR:1350 or (ACCT:2100 and MKTG:3000). Same as DPA:3520, ENTR:3520, INTD:3520.
- THTR:3525 The Business of the Performing Arts** 3 s.h.
Use of live performing arts—theatre, dance, performance art—to explore methods for starting and maintaining students' professional lives; topics and issues include understanding arts structures, producing and presenting, networking, and transitioning to various aspects of the arts and job market; how students as artists or producers fit into the arts ecosystem in the United States, how that ecosystem might be changing, and what students might do to change it. Prerequisites: DPA:3510 and ENTR:2000. Same as DANC:3525, DPA:3525, ENTR:3525.
- THTR:3530 Musical Theatre Workshop** 2 s.h.
Development of musical theatre performance skills through participation; students learn how to project intentions, attitudes, and personality traits of characters they portray; fundamentals of stagecraft, acting, movement, relaxation, and concentration; accurate musical coaching, including clear diction and solidly built dramatic musical interpretation. Same as MUS:3530.
- THTR:3610 Drama in the Classroom** 3 s.h.
Theories of community, culture, identity in relation to language arts teaching and learning; emphasis on incorporating multiple literacies, both oral and print, into language arts curricula; action research involving oral literacy. Same as EDTL:3180.
- THTR:3615 Action! Engage! Becoming Skilled Partners/Leaders for the Public Good** 3 s.h.
Best practices for community projects; students in any discipline partner with artists to make change in the world; topics and activities include how to collaborate with creative partners and be a strong partner, develop ethical community partnerships, cultural competency, how to work for sustainable goals, team leadership skills, prepare social justice skills portfolios, investigate established projects, and develop individual or team projects for future semesters and beyond.
- THTR:3850 Introduction to Laban Movement Studies** 2-3 s.h.
Introduction to Bartenieff Fundamentals (BF) and Laban Movement Analysis (LMA) as methods of organizing and integrating movement to support artistic goals and expanding expressive range; BF teaches body awareness, breath support, developmental patterns, ergonomically efficient alignment, balancing of muscular strength and stretch, and coordination; LMA teaches vocabulary of expressive movement and nonverbal communication, including effort (use of energy/dynamics for expression, stamina, stress relief) and shape (how posture and gesture communicate); quality of movement that supports individual goals in artistic expression, sound production, and wellness. Same as DANC:3850, DPA:3850, MUS:3850.
- THTR:3875 Topics in Digital Performing Arts** 3 s.h.
Advanced techniques in performing with established and new technologies including live cameras in performance, controlling digital avatars, motion capture, virtual and augmented reality, and more. Same as DANC:3875.

- THTR:3876 Video for Performance** 3 s.h.
Introduction to aesthetics and practical applications of digital media and video design for live performance including content creation, system design, and content optimization for media servers; students create digital video and animations and integrate them into live performance and entertainment events via projections, media servers, and digital displays using QLab Media Server and Adobe Creative Cloud (e.g., Illustrator, Photoshop, Premiere Pro, Audition, After Effects); for those with an interest in designing, creating, and displaying digital media for theatre, dance, concerts, corporate events, gallery installations, VJ sets, and architectural projections. Prerequisites: THTR:3890 or CINE:1834. GE: Engineering Be Creative. Same as CINE:3876, DANC:3876, DIGA:3876, INTM:3876.
- THTR:3880 Installations and Interactive Performance** 3 s.h.
Introduction to aesthetics, techniques, and practical possibilities of fusing together theatre, dance, music/sound, art, design, cinema, gaming, human computer interaction, and engineering; foundations of creating interactive experiences that use digital photos, video, text, real-world objects, sensor data, live bodies moving in space, Kinect 2 sensors, cameras, and multiple video outputs (e.g., projectors, LED displays); use of Isadora, an interactive, node-based programming software, to create immersive mediated performances, interactive installations, embodied user-based experiences, and user-manipulated virtual environments. GE: Engineering Be Creative. Same as DANC:3880, DIGA:3880, INTM:3880.
- THTR:3890 Producing and Directing Digital Video** 3 s.h.
Introduction to the basic concepts, theories, and practical applications of digital video production for multiple distribution streams, with a focus on aesthetic and technical principles; focus on developing proficiency in contemporary approaches to digital media production by understanding the production pipeline, from ideation to preproduction, production, postproduction, and through to distribution. GE: Engineering Be Creative. Same as DANC:3890, DIGA:3890, INTM:3890.
- THTR:3895 Performance, Art, and New Technologies in Society** 3 s.h.
Survey of major technological innovations that have deeply impacted society and live performance in the late 20th and early 21st century, and the future of the rapidly evolving technological world; students examine theoretical texts and performances that address the impact of technology on the human condition, as well as create original applied live performances and installations; a variety of technologies are explored and adapted for live performance as they relate to the following five categories of original human experience—telepresence, liveness, artificial intelligence, augmented and virtual reality, and transhumanism. Prerequisites: MUS:2800 or THTR:3880 or CS:1110 or CS:1210 or SCLP:4835. Same as DANC:3895, DIGA:3895, INTM:3895.
- THTR:4144 Acting: Special Topics** 3 s.h.
Specialized study in a specific aspect or theory of acting.
- THTR:4180 Directing I** 3 s.h.
Basic elements of stage direction; exercises in composition, emphasis, movement, rhythm, directorial analysis; director's role in production process; short scenes, projects, papers. Prerequisites: THTR:2140 and (THTR:2402 or CINE:1601).
- THTR:4230 Scene Design II** 3 s.h.
Design and execution of increasingly complex projects in a variety of formats, including perspective sketching, detailed drafting, and color models. Prerequisites: THTR:3230.
- THTR:4240 Costume Design II** 3 s.h.
Conceptual and analysis skills in costuming; fashion history and dress related to individual, cultural, and artistic expression. May be taken before THTR:3240.
- THTR:4250 Lighting Design II** 3 s.h.
Development of advanced lighting artistry; preparation for mainstage lighting assignments through a series of hands-on projects and practicals; emphasis on the process of design, communicating the design concept, acclimating to University of Iowa venues, advanced moving light programming, 3-D modeling, pre-visualization techniques, and organizing the plot and paperwork in accordance with professional lighting practices. Prerequisites: THTR:3250.
- THTR:4270 Scenic Art** 3 s.h.
Basic techniques in scenic art for the theatre; classical scene painting, color theory, drawing, using nontraditional tools and materials, foam carving, and finishes. Offered every other year. GE: Engineering Be Creative. Same as ARTS:4270.
- THTR:4290 Design: Special Topics** 1-3 s.h.
Specialized study in a specific aspect or theory of theatrical design.
- THTR:4420 Dramatic Theory** 3 s.h.
Theoretical questions of interest to dramatists and philosophers in western and nonwestern traditions; metaphysics of play; theories of character, psyche, self; narrative and nonnarrative dramatic forms. Prerequisites: THTR:2402 and THTR:2410 and THTR:2411.
- THTR:4422 Dramaturgy** 3 s.h.
Overview of history, theory, and practice of dramaturgy and dramaturg in Europe and the United States including relationship to dramatic criticism, dramaturgical research, analysis and conceptualization of texts for production, audience outreach, and new play development; may focus intensively on one of these topics and workshop creative work related to the topic. Prerequisites: THTR:2402.
- THTR:4510 Arts Leadership Seminar** 3 s.h.
Performing arts management and administrative principles, practical applications, trends in arts leadership and advocacy. Prerequisites: THTR:3510 or ENTR:2000 or THTR:3520. Same as DPA:4510, ENTR:4510, INTD:4510.
- THTR:4605 Undergrad Career Preparation** 1-3 s.h.
Business aspects of the actor's career; entrepreneurial tools for the professional world; topics include agents, managers, taxes, fees, résumés, head shots, unions, similarities and differences between the three major markets (New York, Chicago, Los Angeles), and particular needs for television, film, and theatre.
- THTR:4630 London Performance Study** 3 s.h.
English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th/21st-Century Literature. Same as ENGL:4172.
- THTR:4691 Projects in Theatre** arr.
- THTR:4692 Honors Theatre Arts** arr.
Development and production of a new work for film or television by writers, directors, actors.
- THTR:4693 Independent Study** arr.

- THTR:4695 Performance Practicum** 1-2 s.h.
Perform as an actor or serve as an assistant stage manager in a production of at least an hour's length, rehearsed for at least four weeks, directed by a faculty member or guest artist or graduate student, and produced by the Department of Theatre Arts.
- THTR:5110 Acting for Graduate Non-Actors** 3 s.h.
Examination of the practice and language of acting as developed by Constantin Stanislavski and Sanford Meisner. Requirements: admission to M.F.A. in theatre arts.
- THTR:5200 Graduate Design Seminar** arr.
Graduate design in set, lighting, and costume design; teamwork; meetings with design faculty in specific disciplines; short-term projects in the theatre department; long-term projects, including summer design work, internships, and other professional opportunities during the three-year program and beyond. Prerequisites: THTR:4230 or THTR:4240 or THTR:4250.
- THTR:5230 Scene Design III** 3 s.h.
Complex assignments; documentation skills, scenic design preparation. Prerequisites: THTR:3230 and THTR:4230.
- THTR:5240 Costume Design III** 3 s.h.
Advanced projects in costume design and portfolio development. Prerequisites: THTR:4240.
- THTR:5250 Lighting Design III** 3 s.h.
Advanced projects in venues such as dance, opera, industrials; preparation of lighting designs for production. Prerequisites: THTR:4250.
- THTR:5300 The Collaborative Process** 3 s.h.
Development of new plays, collaboratively created works.
- THTR:5420 Dramaturgy Practicum** arr.
Exploration of theoretical, creative, and practical issues that arise in working dramaturgically on both established and new plays, and in a variety of collaborative processes; practical dramaturgical exercises in script reporting, dramaturgical research, educational programming, season planning, production documentation, and writing of critical and dramaturgical essays for a general audience. Requirements: admission to M.F.A. dramaturgy program.
- THTR:5500 Stage Management: Special Topics** 3 s.h.
Topics in stage management, arts production, and their professional practice. Requirements: admission to M.F.A. stage management program.
- THTR:5510 Production Management** 3 s.h.
Organization and supervision of theatre productions; resources, procedures for successfully mounting a theatre production or season; personnel, equipment, facility and budget management, scheduling, communication. Requirements: stage management M.F.A. enrollment.
- THTR:5600 Orientation to Graduate Studies** 1-2 s.h.
Introduction to the department's six graduate programs, production program, facilities, and UI library system; raises issues that will be considered throughout students' graduate careers; exploration of creative process and application of critical thinking to that process; for first-year theatre arts M.F.A. students. Requirements: admission to M.F.A. in theatre arts.
- THTR:5610 Collaborative Performance** 3-4 s.h.
Collaborative process with advanced dance artists and creative, design, and technical practitioners from varied disciplines that culminates in a devised performance for the general public; emphasis on sharing and investigating ideas, artistic intent, personal vision, and practical application. Same as DANC:5550, DPA:5550.
- THTR:6140 Advanced Acting** 3 s.h.
Preprofessional training; may include psychophysical training in impulse, openness and the "mask," individual and group dynamics, improvisation, repetition, characterization and scene work, Shakespeare and style, on-camera, development of professional work habits and skills, audition and interview. Requirements: admission to M.F.A. acting program.
- THTR:6150 Vocal Technique** 3 s.h.
Skills training; voice and speech for the actor, phonetics, dialects, sound exploration, contemporary and classical text analysis. Requirements: admission to M.F.A. acting program.
- THTR:6160 Movement Technique** 3 s.h.
Fundamental principles and practices required for physical acting technique; basic stage movement, stage combat, mime technique, Lecoq-based improvisation; a new works project. Requirements: admission to M.F.A. acting program.
- THTR:6170 Graduate Acting: Special Topics** 3 s.h.
Specialized study in one aspect or theory of acting. Requirements: admission to M.F.A. acting program.
- THTR:6180 Director's Seminar** 1-3 s.h.
Preprofessional training in stage direction; the art and craft of directing; research, practical experience; development of new pieces; approaches to a variety of theatrical materials through concept, type, style. Requirements: admission to M.F.A. program.
- THTR:6300 Guest Seminar** arr.
Playwriting workshops and script conferences led by visiting professional playwrights, directors, and dramaturgs. Requirements: admission to M.F.A. playwriting program.
- THTR:6310 Special Topics in Playwriting** 3 s.h.
Special topics of interest to M.F.A. playwrights and dramaturgs including fundamentals for experts, designing audience experiences, structural approaches to playwriting, and writing for film; also may focus on dramatic genres (e.g., docudrama, history play).
- THTR:6400 Classical to Romantic Theatre** 3 s.h.
Representative plays from the Classical to the Romantic periods—in historical context of their original productions, contemporary production potential. Requirements: admission to M.F.A. theatre arts program.
- THTR:6401 Modern Drama** 3 s.h.
Questions of dramatic form and content examined in-depth through close readings of modern plays.
- THTR:6402 Postmodern Theatre** 3 s.h.
Diverse traditions of theatre and drama since the 1960s considered in relation to the modernist avant-garde and the cultural phenomenon of postmodernism.
- THTR:6500 Stage Management Seminar** 1-2 s.h.
Practice and techniques of stage management. Requirements: admission to M.F.A. stage management program.

THTR:6605 Graduate Career Preparation 1-3 s.h.

Preparation for professional showcase produced in student's final year; business aspects of the actor's career; entrepreneurial tools for the professional world; topics include agents, managers, taxes, fees, résumés, head shots, unions, similarities and differences between three major markets (New York, Chicago, and Los Angeles), and particular needs for television, film, and theatre. Requirements: admission to M.F.A. acting program.

THTR:6691 Projects in Theatre Advanced arr.

Create a special project under the mentorship of a faculty member; projects may include performing in a main stage production, writing, directing, or designing a play performed in the department, developing a research project that intersects production.

THTR:7300 Playwrights Workshop 1,3 s.h.

Development of works by Iowa Playwrights Workshop members. Requirements: admission to M.F.A. playwriting or dramaturgy program.

THTR:7601 M.F.A. Thesis 0-3 s.h.

Work related to M.F.A. thesis projects in theatre arts.

Theatre Arts, B.A.

The undergraduate program in theatre arts is based on the philosophy that the best way to develop future artists is to expose them to rigorous professional practice within the framework of a liberal arts and sciences education.

Department of Theatre Arts students take workshop courses in acting, directing, design, technical theatre, stage management, and playwriting and complement them with classes in dramatic literature, history, and criticism. Students also are encouraged to explore a range of courses throughout the University. Around 25 public productions are staged each year, providing additional opportunities to learn the theatre craft and to develop a personal artistic vision.

Student Auditions for Theatre Arts Productions

Theatre arts majors are encouraged to audition for the department's productions in general auditions at the beginning of the fall semester. Students normally present a three-minute audition consisting of two contrasting pieces. From this audition, callback lists are posted for major productions offered during the first semester. Additional general auditions normally are scheduled in early November and in March.

Students in other majors are welcome to audition for the department's productions, as are community members (see "Productions and Auditions" in the Department of Theatre Arts [p. 1091] section of the Catalog). For academic considerations, theatre arts majors are given first consideration for roles.

Materials and information about the general auditions are available from the Department of Theatre Arts office in August. Notices of auditions for all subsequent productions are posted on the department's online call board.

Learning Outcomes

All theatre students have special interests they want to pursue—acting, writing, design, and more. To make this possible, the department offers beginning and advanced courses in every theatrical area.

No matter which theatre arts area chosen, the overall experience as a theatre student will give each major the ability to:

- apply knowledge of theatre's role in society throughout history to creative and/or scholarly work,
- explore and apply understanding of a dramatic script to creative and/or scholarly work,
- collaborate with others to produce a play,
- talk about and assess a student's work and the work of others,
- articulate an emerging artistic vision that starts to inform a student's work and thinking about the arts, and
- write well about theatre.

Requirements

The Bachelor of Arts with a major in theatre arts requires a minimum of 120 s.h., including 36 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE

CLAS Core [p. 20]. Students can add a focus area to their theatre arts degree—music theatre. See "Music Theatre Track" below.

The curriculum for the theatre arts major constitutes the basic experience for all undergraduate theatre arts students. Registration in some courses for the major requires special permission. Contact the Department of Theatre Arts for details.

Students who transfer to the University from other accredited two- or four-year institutions must demonstrate that they have successfully completed coursework equivalent to the basic requirements of the Department of Theatre Arts and the University of Iowa before they may take advanced-level electives. If a student completes the courses listed for the approved 2 Plus 2 Plan theatre arts program at Kirkwood Community College, Iowa Central Community College, or Indian Hills Community College in Iowa, those courses are automatically counted toward requirements for the theatre arts major at the University of Iowa. Consult the department's director of undergraduate studies for more information.

In planning coursework, especially electives, students should be guided by the College of Liberal Arts and Sciences maximum hours rule: students earning a B.A. may apply a maximum of 56 s.h. earned in one department to the minimum 120 s.h. required for graduation, whether or not the coursework is accepted toward requirements for the major; students who earn more than 56 s.h. from one department may use the additional semester hours to satisfy requirements for the major (if the department accepts them), and the grades they earn become part of their grade-point average; but they cannot apply the additional semester hours to the minimum 120 s.h. required for graduation.

Students majoring in theatre arts may count a maximum of 20 s.h. earned in Department of Theatre Arts elective courses (prefix THTR) toward their Bachelor of Arts degree. Theatre arts elective credit beyond 20 s.h. is listed on their transcript but does not count toward the 120 s.h. required for graduation.

Students must complete a course's prerequisites before registering for the course. They normally complete the following required courses within their first four semesters in the major.

Code	Title	Hours
THTR:2140	Acting I	3
THTR:2402	Script Analysis	3
THTR:2410	History of Theatre and Drama I	3
THTR:2411	History of Theatre and Drama II	3

Students who complete THTR:1400 Theatre and Society: Ancients and Moderns or THTR:1401 Theatre and Society: Romantics and Rebels before declaring a major in theatre arts must consult the undergraduate director before they may register for THTR:2410 History of Theatre and Drama I or THTR:2411 History of Theatre and Drama II.

The B.A. with a major in theatre arts requires the following coursework.

Code	Title	Hours
	Theatre Foundation Courses	15
	Design Course	3
	Dramatic Literature Course	3

Production Lab	3
Theatre Arts Electives	12
Total Hours	36

Theatre Foundation

Code	Title	Hours
All of these:

Production Lab

Students must earn a total of 3 s.h. in THTR:2220 Production Lab. The course requires students to work backstage on a department production. All students must serve as a crew member on at least one production (normally earning 1 s.h. per production). They have options to earn 2 s.h. for serving as a crew chief or taking on other advanced responsibilities.

With the instructor's approval, students who enroll in one of these two elective production courses (THTR:3501 Stage Management I or THTR:3221 Technology for the Entertainment Industry) also may enroll in the required production course THTR:2220 during the same semester or session and may complete an additional project, earning 1 s.h. for THTR:2220 in addition to the credit they earn for the elective course. Students may earn a maximum of 1 s.h. of required production course credit for THTR:2220 this way.

Theatre Arts Electives

Students must earn a total of 12 s.h. in theatre arts elective coursework. Students may not use a course to fulfill more than one requirement for the major, so in selecting the additional 12 s.h. of coursework, they may not choose a course they have already used to fulfill a requirement. Three of the four elective courses must be numbered 3000 or above; the other course may be from any level. A minimum of two courses must be selected from one of the following areas—Acting, Directing, and Music Theatre; Design; Playwriting, Dramatic Literature, and Dramaturgy; or Stage Management, Arts Management, and Technical Theatre.

Acting, Directing, and Music Theatre

Code	Title	Hours

THTR:5510	Production Management	3

Music Theatre Track

Students have the option of adding a focus to their study plan by completing a specialized track in music theatre. This optional track provides a gateway for students to develop and enhance the basic performance skills necessary for a music theatre performer to be successful. Students are not required to audition to enter the track, but auditions are required to enroll in music theatre performance courses. The track requires a minimum of 51 s.h. of coursework, including 36 s.h. for the theatre arts major, 8 s.h. in dance, and 7 s.h. in

music. Each student's program of study will culminate in a final presentation, to be determined in consultation with the track advisor. To enroll in the music theatre track, contact the music theatre track advisor in the Department of Theatre Arts.

The music theatre track requires the following coursework, in addition to the 36 s.h. (listed above) required to earn the B.A. in theatre arts.

Theatre Courses

Students may opt to use some of their coursework to satisfy requirements for the theatre arts major. For the Dramatic Literature requirement, students can take THTR:1410 Musical Theatre History. For the Theatre Arts Electives requirement, students can take THTR:3110 Voice for the Actor, THTR:3120 Theatre Movement, and THTR:3140 Acting II in the Acting, Directing, and Music Theatre area, plus one elective of their choice.

Code	Title	Hours

Honors

Honors in the Major

Students majoring in theatre arts have the opportunity to graduate with honors in the major. Students who wish to graduate with honors should declare their intention to the department's honors advisor. To graduate with honors in the major, students must maintain a g.p.a. of at least 3.33 in the major and a University of Iowa cumulative g.p.a. of at least 3.33; complete at least 12 s.h. of work in Department of Theatre Arts honors courses, which must include THTR:4692 Honors Theatre Arts; and give a creative presentation or performance or write an honors thesis.

Students who elect to give a creative presentation or performance must have senior standing and must complete at least one honors course before their proposed project may be approved. They must apply to the director of theatre for approval of their project by April 1 of the year before the project is to be scheduled (projects are not guaranteed a production slot). They also must enroll in THTR:4692 Honors Theatre Arts during the semester in which they complete their presentation or performance.

For more information about theatre arts honors requirements, contact the Department of Theatre Arts office.

University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the University's honors program.

Membership in the UI Honors Program is not required to earn honors in the theatre arts major.

Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

Before the fifth semester begins: three courses in the major chosen from THTR:2140 Acting I, THTR:2215 Theatre Technology, THTR:2402 Script Analysis, THTR:2410 History of Theatre and Drama I, and THTR:2411 History of Theatre and Drama II

Before the seventh semester begins: three more courses in the major, two semesters of production credit, and at least 90 s.h. earned toward the degree

Before the eighth semester begins: two more courses in the major and one more semester of production credit

During the eighth semester: enrollment in all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate

Iowa Degree in Three

University of Iowa majors who are strongly motivated can graduate with a degree in three years under the Iowa Degree

in Three. The program is available to students who can complete more semester hours each term than they would on the Four-Year Graduation Plan.

Students sign an agreement during their first semester of enrollment; meet with an advisor at least once a semester to review their plans and progress; take courses during summer sessions, if necessary; meet specific course checkpoints; and maintain the grade-point average required for the major.

Students are allowed to bring Advanced Placement (AP), College Level Examination Program (CLEP), or transfer credit upon admission to reduce the number of semester hours required for their degree. They should consult their advisor about the program.

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Hours	15
Total Hours	123-131

- a GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
- b Students who complete THTR:1400 or THTR:1401 before declaring a major in theatre arts must consult the undergraduate director before they may register for THTR:2410 or THTR:2411.
- c Fulfills a major requirement and may fulfill a GE requirement.
- d Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
- e Students must earn a total of 3 s.h. in THTR:2220.
- f Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
- g Students must earn a total of 12 s.h. in theatre arts elective coursework. Students may not use a course to fulfill more than one requirement for the major. Three of the four elective courses must be numbered 3000 or above; the other course may be from any level. A minimum of two courses must be selected from one of the following areas: Acting, Directing, and Music Theatre; Design; Playwriting, Dramatic Literature, and Dramaturgy; or Stage Management, Arts Management, and Technical Theatre.
- h Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should

apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>. If applicable search for "Early and Late Participation" to find this page (e.g. participate in graduation ceremony in May, degree conferral in August).

Career Advancement

The National Association of Colleges and Employers recently listed the top skills employers look for in college graduates. They include communication skills, strong work ethic, teamwork skills, initiative, interpersonal skills, problem-solving skills, analytical skills, and flexibility/adaptability. Theatre is an excellent way to learn these skills. As a theatre major, students learn to think critically, read carefully, write well, and present themselves in front of others—skills vital for many careers.

Theatre graduates find work as actors, directors, designers, critics, stage managers, writers, producers, and agents. Some work in film and television, some decide to teach, and some combine scholarship with production or performance with teaching. Others go into business or law.

After graduating, many students move to a metropolitan area to find work. In theatre, there are no guarantees. Success takes talent, patience, hard work, and a bit of luck, yet most graduates who want to work in this exciting profession find a way to do so.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

Theatre Arts, Minor

Requirements

The undergraduate minor in theatre arts requires 15 s.h. in theatre arts coursework, including 12 s.h. in courses numbered 2000 or above taken at the University of Iowa. Students may count THTR:1141 Basic Acting II as one of the courses included in the 12 s.h. total mentioned above. Students must maintain a cumulative g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass. Students must complete all prerequisites for the courses they choose for the minor.

All theatre arts courses are available to students who minor in theatre. Students who wish to take THTR:2140 Acting I must request permission from the Department of Theatre Arts office. Minors who are interested in acting also may take THTR:1140 Basic Acting and THTR:1141 Basic Acting II, and then may ask for permission to enroll in THTR:3140 Acting II.

Contact the Department of Theatre Arts for more information about how to meet the requirements for the minor.

Theatre Arts, M.F.A.

Requirements

The Master of Fine Arts program in theatre arts requires a minimum of 61 s.h. of graduate credit, plus additional courses and production requirements depending on the student's specialty area of concentration. Students normally must complete six semesters in residence (internships may be substituted).

The graduate program is dedicated to creative development of theatre artists. Graduates have a solid background in major performance theories, dramatic literature, and practices of the past and present as well as in the craft of their chosen specialties.

Special attention is given to understanding the role and importance of live theatre in society. Interactions among the various theatre disciplines are emphasized, both in classes and through the department's extensive production program. Particular emphasis is placed on the development of new works for the theatre.

Students must make normal progress toward completion of the degree requirements to remain in the program: they must maintain a g.p.a. of at least 2.75 overall and 3.00 in all coursework within the primary area of concentration, they must receive no letter grade in the primary area below B-minus and no grade of U (unsatisfactory) in the primary area, and they must build a record of substantial creative work of high quality. Students who fail to make normal progress are placed on academic probation and given one additional semester to demonstrate their qualifications for earning the degree.

Contact the Department of Theatre Arts for specific information on any of the M.F.A. specialty areas.

Admission

Students who demonstrate exceptional ability in acting, directing, dramaturgy, playwriting, design, or stage management may apply for admission to the program of study and production leading to the M.F.A. degree. Admission is based on an interview, audition, and/or a portfolio of relevant work, the undergraduate record or other proof of artistic accomplishment, and letters of recommendation.

Submission of playscripts is the most important element in gaining admission to the Playwrights Workshop.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Career Advancement

The graduate program in theatre develops not only talent but discipline, self-confidence, and personal vision. Through their work in courses and productions, through teaching and production assistantships, and through the intensive, individual mentoring they receive from faculty, graduate students prepare themselves to contribute to the nation's culture. They can then enter the profession, joining hundreds of other University of Iowa graduates who have made their mark in theatre, film, television, and the entertainment industry.

Translation for Global Literacy

Director, Division of World Languages, Literatures and Cultures

- Jill N. Beckman

Coordinator, Translation for Global Literacy

- Aron Aji

Undergraduate minor: translation for global literacy

Faculty: <https://translation.uiowa.edu/people/faculty>

Website: <https://translation.uiowa.edu/translation-global-literacy>

Literally every form of global exchange—from material goods and natural resources to knowledge, values, ideologies, and cultures—depends on translation across languages. Aided by the range of human migration, globalization has led to rich syntheses between and among cultures, languages, and sensibilities. Borders between countries have become tenuous in relation to transnational, multicultural, and multilingual realities.

The minor in translation for global literacy introduces undergraduate students to translation as a field and provides some basic coursework and practice in translation from a world language to English. It encourages students to explore the topic and practice of translation as a crucial dimension of global literacy.

The minor in translation for global literacy is administered by the Division of World Languages, Literatures and Cultures [p. 367].

Programs

Undergraduate Program of Study

Minor

- Minor in Translation for Global Literacy [p. 1107]

Facilities

Language Media Center

The Language Media Center (LMC) provides a wide variety of services and facilities to the Division of World Languages, Literatures and Cultures, including a 54-computer Instructional Technology Center (ITC) and six "All in One" studios/small group study rooms, each equipped with video production and editing software. The LMC also has a digital media and hardware collection available for checkout.

Directed Independent Language Study (DiLS), administered by the Language Media Center in the Division of World Languages, Literatures and Cultures, offers students guidance on engaging in self-instruction in languages that are not currently taught in the division. Any current University of Iowa student, staff, or faculty member who is interested in pursuing language study to enhance their professional research or academic profile can take advantage of this program. With the support of LMC staff, learners design their own study plans to learn basic language skills or improve upon existing skills in

preparation for study or research abroad, and are paired with a language and culture consultant when possible.

Translation for Global Literacy, Minor

Requirements

The undergraduate minor in translation for global literacy requires a minimum of 18 s.h., including a minimum of 12 s.h. in courses taken at the University of Iowa. At least 12 s.h. of coursework must be taken in courses numbered 2000 or above. Students must maintain a cumulative g.p.a. of at least 2.00 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass.

Students are encouraged to declare the minor after satisfying the GE CLAS Core [p. 20] World Languages requirement or during more advanced language study. Most students who successfully complete the minor will need at least 6 s.h. of additional coursework beyond the GE CLAS Core requirement in language study. Students may count a maximum of 6 s.h. of coursework taken for each major, minor, or certificate program toward the requirements for the minor.

All students should tailor their plan of study to their experience and objectives. Students interested in the minor should meet with a faculty member associated with the minor program as soon as possible to develop an individualized plan of study.

Courses listed in two or more categories may only be used toward one requirement.

The minor in translation for global literacy requires the following coursework.

- Nick Street

Undergraduate major: B.B.A.

Undergraduate minors: business administration; economics

Undergraduate certificates: entrepreneurial management; international business; risk management and insurance

Professional certificates: business fundamentals; finance; leadership; marketing

Graduate degrees: M.A.; M.Ac.; M.B.A.; M.S.; Ph.D.

Graduate certificate: business analytics

Website: <https://tippie.uiowa.edu/>

The Tippie College of Business is composed of six academic departments: accounting, business analytics, economics, finance, management and entrepreneurship, and marketing.

The college's undergraduate and graduate programs are accredited by AACSB International—the Association to Advance Collegiate Schools of Business.

Research, executive development, and education activities are supported by these centers and institutes: America's Small Business Development Center, Emmett J. Vaughan Institute of Risk Management and Insurance, Frank Business Communication Center, Hawkinson Institute of Business Finance, Institute for International Business, Iowa Electronic Markets Institute, John Pappajohn Entrepreneurial Center, Marketing Institute, Pomerantz Career Center, RSM Institute of Accounting Education and Research, and the Tippie Analytics Cooperative.

Integrity and honesty are essential to success in all facets of life. The purpose of the undergraduate Tippie Honor Code and the MBA Honor Code is to promote honorable and ethical behavior. Students admitted to the college or enrolled in courses offered by the college are required to uphold the honor code.

Facilities and Resources

The Tippie College of Business is located in the John Pappajohn Business Building, at the heart of the campus. The Pappajohn Business Building contains seminar and conference rooms, a computer laboratory, two auditoriums, two computer classrooms, a behavioral laboratory, a restaurant (Pat's Diner), a cafe and study space called Biz Hub, the Marvin A. Pomerantz Business Library, and a variety of classroom facilities.

The computer laboratory in the John Pappajohn Business Building serves the instructional programs of the college, and the staff maintains a current library of computational programs to accommodate users' needs. Business students also have access to the full range of services offered by the University's Information Technology Services and the extensive research materials and other resources of the University of Iowa Libraries.

Alumni Relations

The Tippie College of Business alumni network numbers more than 50,000 graduates worldwide. Alumni have access to the college's wide array of resources, including the in-house Office of Alumni Relations. The college's director of alumni relations, the staff in the Undergraduate Program Office, the specialized master's degree programs, and the Master of Business Administration Program maintain relationships with alumni. Tippie Magazine is mailed to alumni who support the college through a donation to the Tippie College of Business.

The alumni office hosts individual visits, receptions, speakers, and other events on campus and in cities nationwide and around the world. Members of the Business Student Ambassadors Organization often serve as hosts and guides for alumni who visit the college, and the Young Alumni Board works to strengthen ties between the college and more recent graduates.

To learn more about staying in touch, see About Tippie Alumni on the college's website.

Programs

Undergraduate Programs of Study

The Tippie College of Business offers the Bachelor of Business Administration (B.B.A.) with majors in accounting, business analytics and information systems, economics, finance, management, and marketing, and it collaborates with the College of Liberal Arts and Sciences to offer an undergraduate major in economics for Bachelor of Arts and Bachelor of Science students. See Bachelor of Business Administration [p. 1125] for information about requirements common to all B.B.A. majors as well as the admission and academic rules and procedures. View the Tippie College of Business departments in the Catalog for information about the college's majors.

The college also offers combined undergraduate degrees with the College of Engineering and the College of Liberal Arts and Sciences, as well as the 3+3 program with the College of Law; see Combined Programs [p. 1132] in the Bachelor of Business Administration, B.B.A. section of the Catalog. The John Pappajohn Entrepreneurial Center also collaborates with the College of Liberal Arts and Sciences to offer the Bachelor of Arts in enterprise leadership [p. 434], which is offered both on campus and online.

The college offers the undergraduate Certificate in Entrepreneurial Management [p. 1182] and the Certificate in Risk Management and Insurance [p. 1237]. It collaborates with the College of Engineering to offer the Certificate in Technological Entrepreneurship [p. 1535] and with the College of Liberal Arts and Sciences to offer the Certificate in International Business [p. 1195]. The John Pappajohn Entrepreneurial Center collaborates with the College of

Liberal Arts and Sciences to offer the Certificate in Arts Entrepreneurship [p. 142].

The college also offers a minor in economics [p. 1175] for all students and a minor in business administration [p. 1137] for non-business students.

Graduate Programs of Study

The Tippie College of Business offers several graduate degree programs: the Master of Accountancy (M.Ac.), the Master of Business Administration (M.B.A.), the Master of Science in business analytics and the Master of Science in finance, the Doctor of Philosophy in business administration, and the Doctor of Philosophy in economics. The M.A. in business administration is a terminal degree; students are admitted into the Ph.D. in business administration degree program. For information about the M.Ac. and the Ph.D. in economics, see Master of Accountancy [p. 1121] and Ph.D. in economics [p. 1177] in the Catalog.

For information about the graduate Certificate in Business Analytics and M.S. in business analytics, administered by the Department of Business Analytics and conferred by the Graduate College, see Certificate in Business Analytics [p. 1154], M.S. in business analytics (career) [p. 1148], and M.S. in business analytics (professional) [p. 1151] in the Catalog.

For information about the Master of Science in finance, administered by the Department of Finance and conferred by the Graduate College, see M.S. in finance [p. 1190] in the Catalog.

For information on M.B.A. programs, see Master of Business Administration [p. 1225] Program in the Catalog.

For a description of the Ph.D. in business administration, see Ph.D. in business administration [p. 1156] in the Catalog. The Ph.D. is an interdepartmental degree; programs leading to the degree are offered by the Departments of Accounting [p. 1115], Business Analytics [p. 1139], Finance [p. 1184], Management and Entrepreneurship [p. 1204], and Marketing [p. 1214].

CIMBA Italy

CIMBA Italy offers semester and summer study abroad programs for undergraduate and graduate students in Paderno del Grappa, an hour northwest of Venice. Students who attend the programs come from a variety of public and private universities worldwide.

At CIMBA, students immerse themselves in a wide range of rigorous courses, including innovative leadership and development programming, while living amidst the Venetian countryside in one of the most popular travel and study destinations in the world. Business and cultural immersions begin for students the minute they arrive on campus. All courses are taught in English by professors from top universities throughout the United States and Europe. CIMBA programs offer unparalleled amounts of travel time for students to explore Italy and beyond, as well as cultural exploration opportunities. For more information, see the CIMBA Italy website.

Centers and Institutes

America's Small Business Development Center

Since 1981, America's Small Business Development Center at the University of Iowa has played an important role in helping enterprising Iowans manage or start their own successful businesses. The center provides support for small business owners and entrepreneurs. Its personnel are trained to meet the varied needs of small business management, including marketing, financing, human resource planning, cash flow analysis, product commercialization, market research and analysis, strategic planning, international trade, and advertising. Services are free and confidential.

Emmett J. Vaughan Institute of Risk Management and Insurance

The Emmett J. Vaughan Institute of Risk Management and Insurance prepares students for risk management careers. The institute's certificate program is open to undergraduate students pursuing any major. In addition to the coursework, the Institute provides professional development, including networking events with industry speakers, scholarships, a mentorship program with young alumni, and a job fair.

There are great career opportunities in risk management and insurance. The industry needs to fill 400,000 jobs by 2020 in the United States. There are 228 insurance companies in Iowa; 29 major carriers have headquarters in the state. Within the United States, there are only 60 risk management insurance programs. The institute's Certificate in Risk Management and Insurance [p. 1237] assists students in the competition for those jobs.

Graduates in the program begin their careers as corporate risk managers, risk management consultants, employee benefits managers, insurance brokers, underwriters, personal banking wealth managers, asset managers, financial analysts, claims adjusters, producers (sales), actuaries, and auditors.

The Tippie College of Business, in partnership with the Iowa insurance industry, developed the Vaughan Institute in 2005. The institute provides innovative education and research on contemporary risk management practice, while laying a business foundation for a productive future. In 2016, the Vaughan Institute was labeled a Global Center of Insurance Excellence; only 12 universities and colleges in the United States have been awarded this honor.

Frank Business Communication Center

The Frank Business Communication Center provides one-on-one and team tutoring to all Tippie College of Business undergraduate and graduate students for written, oral, and visual communication assignments. The center also provides summer writing support and job-talk/interview instruction to Tippie Ph.D. students and oversees the Department of Accounting writing program. The center's staff includes undergraduate peer tutors who have completed a semester-long peer tutor training course and post-graduate professionals and graduate students with specialized expertise in multiple writing formats and genres. Tutors also can help students with elevator pitches, team presentations,

or other oral communication assignments at the specialized One Button Studio video space.

The center's course-aligned tutoring programs help faculty and students plan and prepare for required communication projects. Center staff work closely with faculty members to study assignment requirements, develop assessment rubrics, and deliver class or workshop presentations to students on how to meet the expectations of the assignment.

The Frank Business Communication Center oversees the B.B.A. core course BUS:3000 Business Communication and Protocol; the peer tutor training courses BUS:3900 Business Communication Internship I and BUS:3910 Business Communication Internship II; and the electives BUS:3200 Advanced Business Presentation Workshop: Strategy and Implementation and BUS:3800 Business Writing. In addition, the center's staff facilitates the annual Mary Thomas Prappas Business Ethics Essay Competition and helps prepare Tippie College of Business undergraduates for national case competitions.

Hawkinson Institute of Business Finance

The Hawkinson Institute of Business Finance facilitates career opportunities in investment banking and related fields for students in the Tippie College of Business. The institute prepares high-achieving undergraduates for interviews, internships, and full-time jobs in the industry. Criteria for admission to the institute include a strong academic record, involvement in campus and community activities, high motivation, strong interpersonal skills, and demonstrated interest in business and financial markets.

Hawkinson Scholars participate in a course taught by former investment bankers that features guest speakers from leading banks, private equity firms, and hedge funds. Hawkinson Scholars also receive intensive education in equity valuation, financial market dynamics, soft skills, and more. An extensive network of dedicated Hawkinson alumni serve as mentors.

The institute has worked to broaden entry-level employment opportunities for Iowa graduates, who land jobs at prestigious firms such as Goldman Sachs, Barclays, Bank of America, Merrill Lynch, and JP Morgan. Graduating Hawkinson Scholars enjoy a 100 percent placement rate.

Institute for International Business

The Institute for International Business (IIB) works to promote entrepreneurship as a tool to empower people in developing countries and frontier markets while at the same time providing Iowa students with cross-cultural and international business skills. In so doing, IIB is strengthening links between the University of Iowa's Tippie College of Business, Iowa communities, and the world.

The IIB's international entrepreneurship and global engagement programs have the following goals:

Provide an avenue for students to obtain cross-cultural skills through global experiential learning projects.

Offer a vehicle for citizen diplomacy where students can collaborate and exchange ideas with their peers in developing countries.

Offer a platform to faculty members to foster social entrepreneurship projects in developing countries.

Empower people in developing countries through entrepreneurship.

Iowa Electronic Markets Institute

The Iowa Electronic Markets Institute supports scholarship in prediction markets and experimental economics. It operates the Iowa Electronic Markets (IEM), a small-scale, real-money online futures markets where contract payoffs are based on real-world events such as political outcomes, the U.S. federal funds rate, companies earnings per share, and stock price returns. Known internationally as the genesis of modern prediction markets, the Iowa Electronic Markets are used as tools for research and teaching.

John Pappajohn Entrepreneurial Center

The John Pappajohn Entrepreneurial Center (Iowa JPEC) serves as the hub for entrepreneurship education and outreach at the University of Iowa. Iowa JPEC prepares entrepreneurial-minded leaders and innovators through interdisciplinary academic programs that integrate applied classroom learning, community and international engagement, and extensive cocurricular experiences. It also supports students, faculty, and community members seeking to launch a business by providing training, mentoring, technical assistance, capital, and physical space to help them move from idea to enterprise.

Students earning the Bachelor of Business Administration degree who are majoring in management [p. 1204] may complete the major's entrepreneurial management track. This track is specifically designed to prepare students to apply entrepreneurship and innovation approaches and strategies to successfully lead teams and accelerate career success. Within the program, students have multiple opportunities to work on real-world challenges facing Iowa-based companies, learn from business leaders and entrepreneurial faculty who have built successful companies, and be introduced to alumni and executives to help develop a strong professional network.

Students working toward any bachelor's degree may earn the Certificate in Entrepreneurial Management [p. 1182]. Both programs are offered on campus at the Tippie College of Business. The certificate also is offered online through Distance and Online Education [p. 1980]. Students may earn the Certificate in Entrepreneurial Management in addition to their undergraduate degree unless they are currently pursuing the B.B.A. in management with the entrepreneurial management track or the B.A. in enterprise leadership.

Graduate and professional students may enroll in advanced entrepreneurship courses; see Master of Business Administration [p. 1225] Program in the Catalog.

Students in the College of Liberal Arts and Sciences may earn a Bachelor of Arts degree with a major in enterprise leadership. [p. 434] Students develop a solid foundation in entrepreneurial management as well as leadership and communication skills that prepare them for a variety of professional career opportunities or position them to start their own business. Students are able to apply their innovative problem-solving and critical thinking skills to contemporary issues, develop strategies to seize upon opportunities, and build and lead successful teams. The major presents a unique blend of skills, theory, and content, encouraging students to apply their knowledge and skills to entrepreneurial concepts and ventures. Offering a combination of business and liberal arts approaches, the major allows students to enhance their

skills in communication, leadership, innovation, and critical thinking. The major in enterprise leadership is offered jointly by the John Pappajohn Entrepreneurial Center and the College of Liberal Arts and Sciences; the degree is awarded by the College of Liberal Arts and Sciences. The degree is offered on campus and online.

College of Engineering students may earn the Certificate in Technological Entrepreneurship [p. 1535] in addition to their undergraduate degree. The certificate allows students to develop a competitive advantage in the professional workplace by developing their business strategy, entrepreneurship, innovation, and leadership skills. Students also learn how to commercialize their innovations—critical for working in industry as well as for pursuing entrepreneurial ventures. Students learn from a select group of faculty who have built and lead successful ventures. The program combines engineering technology, entrepreneurship, and business education to position students for success in today's competitive work environment.

Performing arts students may earn the Certificate in Arts Entrepreneurship [p. 142] in addition to their undergraduate degree. This certificate helps students develop the skills required for creating market-based opportunities in the arts, such as starting a performing arts business, promoting their work as artists, leading arts-based ventures, and sustaining an arts-based career.

The undergraduate Certificate in Media Entrepreneurialism [p. 808] prepares students to succeed in the fast-changing world of mass communication. Students invent new revenue streams or business models for media companies, create new media products, work as part of an innovation team for an established media company, and build new businesses. Students can earn the certificate in addition to their undergraduate degree. The certificate is offered through the School of Journalism and Mass Communication.

Iowa JPEC also offers students additional opportunities to develop their professional skills and network with entrepreneurial leaders and industry experts through business consulting projects and internships, sponsorship of applied workshops and seminars, coordination of company visits, support of student participation at regional and national conferences, and fostering global awareness through international trips and consulting. It also sponsors several entrepreneurial student organizations designed to support students' professional and career development.

For students who may want to pursue the creation of a new business and/or develop a new product or software application while at the University of Iowa, Iowa JPEC is dedicated to training and support of student entrepreneurs. Welcoming both individual students and teams, the Founders Club program is located in the Bedell Entrepreneurship Learning Laboratory (BELL), providing a physical home for student businesses on campus. Participants have access to a variety of resources including collaborative work space and equipment, one-on-one mentoring from experienced professionals, workshops, trainings, networking, and funding opportunities.

The Hawkeye Startup Accelerator program and the Iowa Startup Games are two additional programs designed to help student teams identify new business opportunities, while they provide training on how to launch new ventures. Several campus, statewide, and national funding competitions also are available to support student startups.

Iowa JPEC offers programs and services to community members to enhance the region and state's entrepreneurial ecosystem. Venture School is an innovative training program focused on real-world experimentation, customer discovery, and Lean LaunchPad methodologies. Iowa JPEC also offers student consulting services led by faculty members through business consulting courses and the Institute for International Business, as well as business advising and mentoring through the Small Business Development Center, numerous workshops, and networking events. Iowa JPEC partners with entrepreneurial service organizations, economic development organizations, and private sector businesses to advance entrepreneurship and economic development across Iowa. The Jacobson Institute is committed to infusing the entrepreneurial mindset with 21st-century skills in K-12 students through teacher professional development and innovative curricula.

Marketing Institute

The **Marketing Institute** prepares students for today's diverse and competitive job market in many areas of marketing, including marketing strategy, market research, marketing analytics, advertising, and sales.

The Marketing Institute is a three-semester marketing elective program in which students earn 6 s.h. of elective credit. Students also earn credit for Tippie RISE each semester they are in the program.

Undergraduate students apply in the fall and 16-20 students are admitted. Admittance criteria includes academic performance, leadership, interpersonal skills, and executive potential. Field immersion projects are a major component of the program. Field projects include student work as consultants for a variety of clients, including multimillion or billion dollar businesses or nonprofits. Students gain hands-on experience in identifying and solving marketing-related issues and providing recommendations to their assigned client. In addition, students are mentored by an advisory board of top executives from companies that include Abbott Healthcare, Hormel, John Deere, the Chicago Blackhawks, Twitter, McGraw Hill, Meredith Corporation, Neiman Marcus, Reckitt Benckiser, Principal Financial Group, and Unilever.

The Marketing Institute and its advisory board work together to foster networking opportunities and provide career guidance that help students use their skills and talents to develop rewarding careers.

Pomerantz Career Center

Career development and on-campus recruiting services are provided by the Marvin A. and Rose Lee Pomerantz Career Center. Professional career advisors and online resources provide University undergraduate students with assistance on résumés, cover letters, internship and job searches, employer research, interviewing skills, negotiation of job offers, graduate school personal statements, as well as drop-in sessions with trained student career peer advisors. The center helps students choose a major and identify careers related to industry interests through online assessment tools and customized advising. Career advisors specialize in specific career interest communities to assist students. The center also presents multiple fall and spring semester career fairs and networking events. Campus recruitment is facilitated through Handshake, where students can search and apply for full-time employment, internships, and student employment positions. Students may participate in mock interviews and on-campus interviews for full-time positions and internships

during the academic year. Additionally, the center offers career-related and professional development courses such as LS:2002 Career Leadership Academy Part 1: Leadership in Practice, LS:3002 Career Leadership Academy Part 2: Leadership in Action, CCP:1300 Major and Career Explorations, and CCP:1303 Successful Teamwork for the Workplace. For more information, contact the Pomerantz Career Center.

RSM Institute of Accounting Education and Research

The RSM Institute of Accounting Education and Research fosters educational excellence in accounting at the University of Iowa, encourages high-quality research by Iowa accounting faculty members, and facilitates the development of doctoral students in accounting. The institute sponsors varied educational initiatives and activities, including an annual national speaker series, the biennial Sidney Winter Lecture Series, and the PricewaterhouseCoopers Accounting Research Workshop.

Courses

Most Tippie College of Business courses are offered by the college's departments and programs. They are listed and described in the corresponding Catalog sections.

The college also offers the following nondepartmental courses for undergraduate students.

Tippie College of Business Courses

BUS:1200 Tippie College Direct Admit Seminar 1 s.h.
Facilitates an introduction to the undergraduate student experience in the Tippie College of Business; discussions of transition issues, academic skill acquisition, and professional goal setting. Requirements: admitted to the direct admission program.

BUS:1300 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities and local businesses).

BUS:1400 Pre-Business First-Year Seminar 1 s.h.
Connection to Tippie College of Business resources; support for student's pathway to admission to the Tippie College of Business; transition to college life, academic skill acquisition, and professional goal setting; for pre-business students. Requirements: pre-business standing.

BUS:1999 Introduction to Research in Business 1 s.h.
Introduction to research in business including scope and methods of business research, questions for which business research seeks answers, and impact of business research on society; weekly seminars include discussion and exploration and serve as preparation for engaging in mentored research.

BUS:2013 Introduction to Sustainability arr.
Introduction to sustainability knowledge, skills, and habits as a means to shape one's vision of a sustainable citizen; emphasis on basic skills of literacy, applied math, and finding information; traditional sustainability knowledge areas related to society, economy, and environment; intersecting themes (e.g., informed consumerism, eco-economics, and livable environments). Same as GEOG:2013, SUST:2013, URP:2013.

BUS:2200 Foundations for Success in Business 1 s.h.
Designed to facilitate business students' career exploration and professional development; students participate in a variety of career-related activities including informational interviews, networking events, guest speakers, and workshops; topics include exploring majors, researching career fields and associated qualifications, identifying experiential learning opportunities, networking with integrity, searching for internships, and developing professionalism.

BUS:2300 Searching for Business Information 1 s.h.
Search concepts and sources specific to business information; subscription and government online research sites.

BUS:2450 Business and Culture in China 3 s.h.
Business and cultural environment of China; lectures, readings, case studies, company visits, and immersion in cultural experiences; Chinese history, politics, business, economics, and culture; topics may include Chinese business culture and relationships, local companies going global, business strategies of multinational companies in Chinese market; United States-China trade relations, entrepreneurship, Chinese consumer, sustainability and social responsibility; two-week study program in China. Prerequisites: a minimum g.p.a. of 2.75 and ECON:1100 and ECON:1200. Requirements: UI and cumulative g.p.a. of 2.75.

BUS:2550 International Business in Asia Pacific 3 s.h.
International business in the Asia Pacific region and related management issues confronting small-medium enterprises and multinational enterprises in that region; topics include rise of the Association of Southeast Asian Nations (ASEAN), challenges and opportunities for trade growth and collaboration, and practical guidance on how to develop and sustain a competitive advantage in a fast growing and dynamic environment; offered by the international business in Sydney, Australia study abroad program through Tippie College of Business. Prerequisites: MGMT:2100. Requirements: admission to international business in Sydney, Australia study abroad program.

BUS:3000 Business Communication and Protocol 3 s.h.
Foundation in business communication and protocol; composing business messages, organizing and reporting workplace data, developing business presentation and team-building skills, exploring issues pertaining to professional behavior. Prerequisites: RHET:1030 or (RHET:1040 and RHET:1060). Requirements: admission to Tippie College of Business and 30 s.h. earned.

BUS:3025 Global Internship Preparation 1 s.h.
Classroom preparation for the Tippie Global Internship Program; includes interview preparation, host country research, internship goal setting, international business practices, cultural awareness and adjustment, and other preparation topics.

BUS:3050 Business, Culture, and Society 3 s.h.
International business environment and interpersonal traits and skills expected of successful international businessperson; interdisciplinary overview of issues related to business in Western Europe; important cultural differences, the code of business and professional etiquette, business protocol, Italian business history, cultural appreciation, and executive legal/ethical concerns in the workplace; series of lectures, workshops, speakers, plant tours, and cultural events.

BUS:3100 Academic Internship or Cooperative Education 0 s.h.
Participation in an internship or cooperative education; fulfills Tippie College of Business experiential learning requirement.

BUS:3200 Advanced Business Presentation Workshop: Strategy and Implementation **2 s.h.**

Advanced oral business presentation skills for solo, paired, and team presentations; suitable for students considering participating in case competitions; emphasis on articulating a particular strategy for an oral presentation and three areas of implementation—content structuring, visual design of PowerPoint slides, and vocal and physical delivery; how to integrate presentation technologies effectively, evaluate other speakers, speak clearly, use gestures appropriately, and engage the audience during the presentation and in question-and-answer sessions. Prerequisites: BUS:3000 with a minimum grade of B.

BUS:3300 Global Engagement Student Advisory Board **0-1 s.h.**

The Global Engagement Student Advisory Board (GESAB) is comprised of undergraduate students in the Tippie College of Business and promotes a culture of inclusivity and global awareness; GESAB advises the college's Undergraduate Program Office on issues pertaining to the internationalization of undergraduate experience at Tippie College of Business and raises global awareness of peers through cross-cultural programming, campaigns, partnerships, and advocacy. Recommendations: member of Global Engagement Student Advisory Board.

BUS:3500 Tippie Senate **1 s.h.**

For elected student representatives on the Tippie Senate.

BUS:3600 Mentored Research **arr.**

Business research conducted by undergraduate students under faculty supervision.

BUS:3800 Business Writing **3 s.h.**

Series of practical projects; development of effective and persuasive business communication and analytical skills in public relations context.

BUS:3900 Business Communication Internship I **3 s.h.**

Opportunity for students to earn academic credit for serving as a peer tutor, an orientation and training assistant, or an administrative intern in the Judith R. Frank Business Communications Center.

BUS:3910 Business Communication Internship II **1-3 s.h.**

Continuation of BUS:3900; opportunity for students to earn academic credit for serving as a peer tutor, an orientation and training assistant, or an administrative intern in the Judith R. Frank Business Communications Center. Prerequisites: BUS:3900.

BUS:4025 Certified Global Business Professional Exam Prep **1 s.h.**

Preparation for the Certified Global Business Profession (CGBP) exam; topics include global business management, global marketing, supply chain management, and trade finance; students build knowledge and skills in areas of documentation, legal and regulatory compliance, intercultural awareness, technology, and resources; students will be eligible to sit for the CGBP exam upon completion; attainment of CGBP credential complements student's postsecondary education as it represents the achievement of advanced specialization in international business. Prerequisites: MGMT:2100 or ECON:1200. Corequisites: MGMT:3450. Requirements: 60 s.h. completed.

BUS:4900 Academic Internship **arr.**

Professional internship experience with associated academic content (e.g., paper, coursework).

BUS:4999 Honors Thesis in Business **arr.**

Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University of Iowa Honors Program guidelines; may include empirical research, library research, applied projects.

Accounting

Chair

- Cristi A. Gleason

Director, Undergraduate Program

- Kevin J. Den Adel

Director, Master of Accountancy

- Thomas J. Carroll

Director, Ph.D. Program

- Steven Paul Hribar

Director, RSM Institute of Accounting Education and Research

- Jaron Harp Wilde

Undergraduate major: accounting (B.B.A.)

Graduate degrees: M.Ac.; accounting subprogram for the Ph.D. in business administration

Faculty: <https://tippie.uiowa.edu/people?departments=166>

Website: <https://tippie.uiowa.edu/accounting>

The Department of Accounting offers a broad education that prepares undergraduate and graduate students for careers in public accounting, private industry, government, nonprofit organizations, and academia.

The department also collaborates with the College of Law to offer the combined M.Ac./J.D. program; see Combined Programs [p. 1122] under Master of Accountancy in this section of the Catalog. It also participates in the M.B.A. program; see the Master of Business Administration [p. 1225] Program in the Catalog.

Accounting Program

The accounting program draws on curricula that provide a strong base of traditional technical subject matter and the skills needed for solving complex business problems. This framework of study enables students to continue professional growth over the entire span of their careers. The program emphasizes communication skills and provides the academic background required for leadership positions in business, government, and public accounting. It also qualifies students to take the Certified Public Accountant (CPA) examination.

The accounting program leads to a Bachelor of Business Administration with a major in accounting, which requires 120 s.h. of credit and the Master of Accountancy, which requires 30 s.h. of graduate credit. Students are granted the B.B.A. upon successful completion of the third and fourth years; they are granted the M.Ac. after successful completion of 30 s.h. beyond the B.B.A.

Courses

Accounting Courses

ACCT:1300 First-Year Seminar 1 s.h.

Small discussion class taught by faculty member; topics chosen by instructor; may include outside activities (e.g., films, readings, visits to research facilities).

ACCT:2100 Introduction to Financial Accounting 3 s.h.

Accounting and financial reporting procedures used by business and not-for-profit entities; emphasis on accounting concepts and use of accounting information in making economic decisions. Requirements: sophomore or higher standing.

ACCT:2200 Managerial Accounting 3 s.h.

Basic topics in cost behavior, measurement, accumulation; use of cost data for relevant analysis, budgeting, performance evaluation. Prerequisites: ECON:1100 and ACCT:2100 and (MATH:1850 or MATH:1550 or MATH:1460 or MATH:1860 or MATH:1380).

ACCT:3020 Financial Accounting and Reporting 3 s.h.

External financial reporting practices in context of decisions by management, current and potential stockholders, financial analysts; emphasis on interpretation, use of financial statements. Prerequisites: ACCT:2200. Requirements: non-accounting major.

ACCT:3100 Professional Accounting Seminar 1 s.h.

Seminar topics, including accounting careers, curriculum, M.Ac. program, internships, CPA examination and other professional certificates, Beta Alpha Psi, ethics, and global standards. Offered fall semesters. Corequisites: ACCT:2200 or ACCT:3200.

ACCT:3200 Income Measurement and Asset Valuation 3 s.h.

Accounting rules that determine how economic events and transactions are described in published financial reports; emphasis on revenue and expense recognition, asset valuation, accrual accounting model. Prerequisites: (Accounting Writing Assessment score of 10 or higher or BUS:3000 with a minimum grade of B-) and ACCT:2100 with a minimum grade of B- and ACCT:2200 with a minimum grade of B-. Corequisites: ACCT:3400. Requirements: admission to Professional Program in Accounting.

ACCT:3300 Valuation of Financial Claims 3 s.h.

Current and long-term liabilities and stockholders' equity, off-balance sheet financing, cash flow statement, earnings-per-share, financial instruments. Prerequisites: ACCT:3200 and ACCT:3400. Corequisites: ACCT:3100.

- ACCT:3400 Introduction to Taxation** **3 s.h.**
Federal income taxation of individuals and businesses, including corporations, partnerships, and sole proprietorships; emphasis on developing a broad perspective on structure, administration, and rationale of federal income tax system. Prerequisites: (Accounting Writing Assessment score of 10 or higher or BUS:3000 with a minimum grade of B-) and ACCT:2100 with a minimum grade of B- and ACCT:2200 with a minimum grade of B-. Corequisites: ACCT:3200. Requirements: admission to Professional Program in Accounting.
- ACCT:3450 Tax Practicum (VITA) I** **1-2 s.h.**
Transformative opportunity to work on real world tax problems with real clients; application of skills learned in classroom to real world problems; development of crucial accounting career soft skills including communication (explaining complicated ideas in simple language), moving out of one's comfort zone, working as a team, and having an appreciation for the importance of community service. Corequisites: ACCT:3400. Requirements: acceptance to undergraduate accounting program.
- ACCT:3451 Tax Practicum (VITA) II** **2 s.h.**
Transformative opportunity to work on real world tax problems with real clients; application of skills learned in classroom to real world problems; development of crucial accounting career soft skills including communication (explaining complicated ideas in simple language), moving out of one's comfort zone, working as a team, and having an appreciation for importance of community service. Requirements: successful completion of ACCT:3450 and certification on the most recent Internal Revenue Service certification tests.
- ACCT:3500 Advanced Tax Topics** **3 s.h.**
Taxation of corporations and partnerships from organization through liquidation; relative merits of conducting business as C corporation, partnership, S corporation; the alternative minimum tax; introduction to tax research. Prerequisites: ACCT:3400. Requirements: senior standing.
- ACCT:3550 Financial Statement Analysis** **3 s.h.**
How to analyze published financial statements; practical experience using financial statement information to assess accounting quality, historical performance, forecasted performance, credit risk, firm value. Prerequisites: ACCT:3020.
- ACCT:3600 Accounting Information Systems** **3 s.h.**
Application of computer technology to accounting and transaction processing systems; information systems infrastructure and trends; problem solving with microcomputer spreadsheets, databases; accounting cycle operations. Prerequisites: ACCT:2200 and ACCT:2100 and (MSCI:3005 or BAIS:3005 or CS:2110). Same as BAIS:3100.
- ACCT:4000 Special Topics in Accounting** **1-3 s.h.**
- ACCT:4001 Continuing Education: Special Topics in Accounting** **arr.**
Independent study topics determined by faculty member.
- ACCT:4050 Directed Readings in Accounting** **arr.**
Individual guided readings in accounting topics. Requirements: admission to Professional Program in Accounting.
- ACCT:4100 Auditing** **3 s.h.**
General framework underlying auditing, role of audit standards in planning and conduct of audits, effect of regulation, ethics, liability on audit practices. Prerequisites: ACCT:3100 and ACCT:3300 and (MSCI:3100 or BAIS:3100) and (MSCI:2800 or BAIS:2800 or ECON:4800 or STAT:2020 with a minimum grade of B or STAT:4101). Requirements: senior standing.
- ACCT:4200 Accounting for Management Analysis and Control** **3 s.h.**
Advanced topics in cost estimation, measurement, accumulation; use of cost data for decision making, performance evaluation in multi-unit organizations. Prerequisites: (STAT:2020 with a minimum grade of B or ECON:4800 or STAT:4101 or MSCI:2800 or BAIS:2800) and (CS:2110 or MSCI:3005 or BAIS:3005) and (Accounting Writing Assessment score of 10 or higher or BUS:3000 with a minimum grade of B-) and ((ACCT:2100 with a minimum grade of B- and ACCT:2200 with a minimum grade of B-) or ACCT:3200). Requirements: admission to Professional Program in Accounting.
- ACCT:4300 Business Law** **3 s.h.**
Legal issues involving contracts, sale of goods, agency and partnership law, business structures including corporations and limited liability companies, employment law, and an overview of accountant's legal liability and securities regulation. Prerequisites: (Accounting Writing Assessment score of 10 or higher or BUS:3000 with a minimum grade of B-) and MGMT:2000 and ((ACCT:2100 with a minimum grade of B- and ACCT:2200 with a minimum grade of B-) or ACCT:3200). Requirements: senior standing.
- ACCT:4400 Advanced Financial Accounting** **3 s.h.**
Accounting and reporting standards for business combinations, including mergers, consolidations, and multinational enterprises; accounting for partnerships, business segments, transactions denominated in foreign currency, including hedges using foreign currency derivative instruments; reporting standards for interim financial statements and fund accounting applied to government and nonprofit entities. Prerequisites: ACCT:3300. Requirements: senior standing.
- ACCT:4500 Accounting Measurement: Research and Analysis** **3 s.h.**
How uncertainty and risk influence accounting judgments, estimates, and forecasts that underlie reported financial statement amounts; applications drawn from familiar accounting measurement challenges and those unique to industries (e.g., airline transportation, healthcare, insurance, gaming, oil and gas exploration). Prerequisites: ACCT:3300. Corequisites: ACCT:4100.
- ACCT:4600 Tax Research** **2 s.h.**
Understanding the validity and use of various tax law sources; performing tax research using printed and electronic tax materials; evaluation of tax law provisions and application to specific facts and circumstances; preparing tax memorandums. Prerequisites: ACCT:3500. Requirements: accounting major.
- ACCT:4999 Honors Thesis in Accounting** **arr.**
Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University of Iowa Honors Program guidelines; may include empirical research, library research, applied projects.

- ACCT:7850 Seminar in Accounting Research** arr. **ACCT:9150 Tax Research** 3 s.h.
 Forum on current research in accounting, related disciplines; faculty, student, guest papers, Ph.D. dissertation proposals. Requirements: Ph.D. enrollment. Understanding the validity and use of various tax law sources; performing tax research using printed and electronic tax materials; evaluation of tax law provisions and application to specific facts and circumstances; preparing tax memorandums. Prerequisites: ACCT:3500. Requirements: admission to M.Ac. program.
- ACCT:7900 Seminar in Selected Accounting Topics** arr.
 Individual study, research paper preparation. Requirements: Ph.D. enrollment.
- ACCT:7950 Directed Readings in Accounting** arr.
 Individual guided readings in accounting topics.
- ACCT:7975 Thesis: Accounting** arr.
 Requirements: Ph.D. enrollment.
- ACCT:9020 Strategic Cost Analysis** 2-3 s.h.
 Introduction to cost accumulation, reporting, cost management systems; managerial and divisional performance evaluation; appropriate use of cost data for short- and long-run decisions; product costing in manufacturing and service industries. Prerequisites: MBA:8140.
- ACCT:9030 Financial Accounting Standards and Analysis** 2-3 s.h.
 Accounting model, underlying measurement concepts, valuation rules for assets, liabilities, related issues of income determination; emphasis on economic substance of transactions, evaluation and interpretation of financial data. Prerequisites: MBA:8140.
- ACCT:9040 Financial Statement Analysis** 3 s.h.
 Use of corporate financial statements for investment and lending decisions; emphasis on financial analysis techniques, valuation, business analysis, cash flow projections, credit scoring, related research evidence. Prerequisites: MBA:8180 and ((ACCT:3200 and ACCT:3300) or ACCT:9030).
- ACCT:9050 Taxes and Business Strategy** 2-3 s.h.
 Effect of taxes on business decisions, including investment strategies, capital structure decisions, compensation policies, international business, mergers and acquisitions, and financial reporting. Prerequisites: ACCT:3020 or ACCT:3500 or MBA:8140 or LAW:8194. Requirements: graduate standing in business.
- ACCT:9110 International Taxation** 3 s.h.
 Working knowledge of U.S. rules for taxation of international transactions including fundamentals of international tax planning, transfer pricing, and international reorganizations. Prerequisites: ACCT:3500 or LAW:8194.
- ACCT:9120 Design and Use of Cost Management Systems** 3 s.h.
 Development of cost accumulation and reporting systems that complement a firm's strategy and structure; how activity-based cost management systems increase competitiveness by helping a firm manage its costs, processes, people. Prerequisites: ACCT:4200 or ACCT:9020.
- ACCT:9130 Financial Reporting: Theory and Practice** 3 s.h.
 Corporate accounting choices in framework of traditional accounting theory, economic consequences, firm valuation. Prerequisites: ACCT:3300. Requirements: graduate standing in business.
- ACCT:9140 Advanced Auditing** 3 s.h.
 Advanced issues such as ethics, internal control audits, forensic auditing, and fair value auditing. Prerequisites: ACCT:4100. Requirements: graduate standing in business.

Accounting, B.B.A.

Students who wish to earn the Bachelor of Business Administration with a major in accounting must be admitted to the accounting program. Undergraduate accounting majors are subject to the probation and dismissal rules described in the Bachelor of Business Administration [p. 1125] section of the Catalog and are governed by the Tippie Honor Code.

The B.B.A. is not sufficient preparation for Certified Public Accountant (CPA) licensure in states that have passed a 150-hour law, including Iowa.

Requirements

The Bachelor of Business Administration with a major in accounting requires a minimum of 120 s.h., including at least 25 s.h. of work for the major. All required major coursework must be taken at the University of Iowa. Students must have a cumulative g.p.a. of at least 2.00 in all college coursework attempted, all college coursework attempted in business, all college coursework attempted in the major, all coursework attempted at the University of Iowa, all business coursework attempted at the University of Iowa, and all coursework in the major attempted at the University of Iowa.

Students must complete certain prerequisite courses for admission to the college as well as courses required to declare a major in accounting. Students usually spend the first and second year completing prerequisites and other coursework required for all B.B.A. students. To view the common B.B.A. requirements, see the Bachelor of Business Administration [p. 1130] in the Catalog. In addition, students must have a University of Iowa g.p.a. and a cumulative g.p.a. of at least 3.00, and a grade of at least B-minus in ACCT:2100 Introduction to Financial Accounting.

Students must be admitted to the accounting program before they begin work in courses required for the major. They must have a combined g.p.a. of at least 2.67 in ACCT:2100 Introduction to Financial Accounting and ACCT:2200 Managerial Accounting, and have earned either a passing score on the Department of Accounting writing assessment or a grade of at least B-minus in BUS:3000 Business Communication and Protocol. Coursework provides concentrated coverage of professional accounting subjects and closely related topics in commercial law, business, and information systems.

Students who wish to declare accounting as a major but do not satisfy the automatic admission requirements may submit a petition for admission.

Accounting Major

These business core classes are prerequisites to major-level courses:

- ACCT:2200 Managerial Accounting
- MGMT:2000 Introduction to Law
- BAIS:2800 Foundations of Business Analytics
- BAIS:3005 Information Systems

Students may not count ACCT:3020 Financial Accounting and Reporting toward the B.B.A. in accounting due to overlap in course content.

Students who major in accounting are required to take the following major coursework at the University of Iowa.

Code	Title	Hours
All of these:		
ACCT:3100	Professional Accounting Seminar (must be taken by the second semester in the program)	1
ACCT:3200	Income Measurement and Asset Valuation	3
ACCT:3300	Valuation of Financial Claims	3
ACCT:3400	Introduction to Taxation	3
ACCT:3600	Accounting Information Systems	3
ACCT:4100	Auditing	3
ACCT:4200	Accounting for Management Analysis and Control	3
ACCT:4300	Business Law	3
And one accounting elective during the fourth year:		
ACCT:3500	Advanced Tax Topics (offered fall only)	3
ACCT:4400	Advanced Financial Accounting (offered spring only)	3

Optional Accounting Electives

Code	Title	Hours
ACCT:3450	Tax Practicum (VITA) I	1
ACCT:3451	Tax Practicum (VITA) II	2
ACCT:4600	Tax Research	2

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Accounting, B.B.A.

Course	Title	Hours
Academic Career		
Any Semester		
Students must be admitted to the Tippie College of Business to declare the major. Students generally apply for admission during their second year after the completion of prerequisite courses.		
Students are required to complete 52 s.h. of non-business coursework. Courses with a prefix of ACCT, BAIS, BUS, ECON, ENTR, FIN, MGMT, MSCI, and MKTG will not count towards non-business hours. Check degree audit for non-business hours or confer with academic advisor.		
To fulfill the Tippie RISE experiential learning requirement, complete an approved course in at least one of the following categories: research with faculty, internship course, study abroad, experiential course.		0 - 3

Students who need to complete the World Language requirement should consult with their academic advisor about when to add courses to plan of study. World Language counts as non-business coursework.

Students must satisfy the Tippie College of Business residence requirement: 45 s.h. of UI coursework after admission to Tippie.

Hours		14

Total Hours

119-122

- a Prerequisite courses include RHET:1030, MATH:1350, STAT:1030, ECON:1100 and BAIS:1500. Refer to the Tippie website for admission requirements and deadlines.
- b See degree audit for course options.
- c Enrollment in math courses requires completion of a placement exam.
- d GE courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
- e Business Core Part I component; required to declare major.
- f Students must have a UI and cumulative GPA of at least 3.00, and earn a grade of B- or better in ACCT:2100 in order to declare the accounting major.
- g Students must have a combined GPA of at least 2.67 in ACCT:2100 and ACCT:2200 in order to meet the accounting major course prerequisites.
- h BUS:3000 should be taken the first semester after admission to the Tippie College of Business; may be deferred one semester. Direct admits take BUS:3000 in their second year.
- i Accounting major course prerequisites include earning a grade of B- or better in BUS:3000 or a passing score on the Department of Accounting writing assessment. Consult academic advisor about the writing assessment dates.
- j Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
- k One accounting major elective required, but both are highly recommended for students taking the CPA exam.
- l ACCT:3500 recommended; typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
- m ACCT:4400 recommended; typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
- n Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>

Career Advancement

Over 95 percent of students reported that they found permanent employment, were accepted to graduate school, or were not seeking employment within six months of graduation.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs; for more information about careers, visit the Pomerantz Career Center website.

Master of Accountancy, M.Ac.

The Master of Accountancy (M.Ac.) is a nonthesis program. Coursework focuses on the conceptual and economic foundations of accounting with applications to current and emerging problems of professional practice. M.Ac. students also have the opportunity to acquire expertise in one of four specialization areas: financial accounting/auditing, business analytics, taxation, and managerial accounting.

Graduate students in accounting are subject to the probation and dismissal rules of the Graduate College and are governed by the full-time M.B.A. honor code.

Requirements

The Master of Accountancy requires 30 s.h. beyond the B.B.A. The program permits students to specialize in accounting areas according to their interests and objectives. It builds on the technical skills acquired in the undergraduate program, broadens students' perspectives on the role of accounting in organizations and decision making, and further develops written and oral communication skills.

Students from a variety of academic backgrounds enter the M.Ac. program. Those who enter with an undergraduate degree in accounting can expect to complete the degree in 12 months. Those who enter with a non-accounting undergraduate degree typically require four semesters to complete the M.Ac. Study plans are adjusted to reflect each student's particular academic background; see "Students Without Undergraduate Accounting Degrees" below.

The 30 s.h. required for the M.Ac. must include at least 12 s.h. in graduate-level accounting courses and at least 21 s.h. in courses numbered 5000 or above. Some work for the specialization areas is cross-disciplinary, with courses from other departments as well as accounting.

The Master of Accountancy requires the following coursework. Students complete the requirements for their chosen specialization or for the core program.

Specialization in Financial Accounting/Auditing

Code	Title	Hours
Accounting Courses		
Total of 12 s.h.		
All of these:		
ACCT:9040	Financial Statement Analysis	3

Core Program

Students who do not wish to pursue a specialization area must complete 30 s.h. beyond the B.B.A. At least 15 s.h. must be earned in graduate-level accounting courses and at least 21 s.h. must be earned in courses numbered 5000 or above. The following courses are required.

Code	Title	Hours
Accounting Courses		
Total of 15 s.h.		
ACCT:9040	Financial Statement Analysis	3
ACCT:9050	Taxes and Business Strategy	3
ACCT:9120	Design and Use of Cost Management Systems	3
ACCT:9130	Financial Reporting: Theory and Practice	3
ACCT:9140	Advanced Auditing	3
Business Analytics Courses		
Two business analytics courses (prefix BAIS or CS) numbered above 5000		6
General Electives		
Total of 9 s.h.		9

Students Without Undergraduate Accounting Degrees

Coursework for students who enter the program with a non-accounting bachelor's degree is determined by each student's background and interest area. In addition to meeting the core program requirements for the M.Ac., students typically take a combination of undergraduate and M.B.A. courses to remove academic deficiencies in quantitative methods, business, and accounting. Students with a bachelor's degree in another area of business typically are required to take 45-51 s.h. in order to complete the M.Ac. program. Those with degrees outside of business and with no accounting courses typically are required to take 57-60 s.h.

CPA Examination and the Iowa Accountancy Act

The Iowa Accountancy Act requires individuals who wish to take the Certified Public Accountant (CPA) examination to have a bachelor's degree, 24 s.h. of business coursework, and 24 s.h. of accounting coursework beyond ACCT:2100 Introduction to Financial Accounting.

Combined Programs

M.Ac./J.D.

The Department of Accounting and the College of Law offer the combined Master of Accountancy/Juris Doctor program. The combined M.Ac./J.D. requires a minimum of 18 s.h. of graduate coursework in accounting. Students in the program may count up to 12 s.h. of College of Law courses as electives for the M.Ac. and up to 12 s.h. of graduate accounting courses as electives for the J.D.

Separate application to each degree program is required. Applicants must be admitted to each program before they may be admitted to the combined program.

For information about the J.D. degree, see Juris Doctor, J.D. [p. 1650] (College of Law) in the Catalog.

Admission

Admission to the M.Ac. program is competitive. The admissions committee reviews applications individually, considering quantitative aspects (grade-point average and GMAT scores) and qualitative aspects of each applicant's background and professional experience (if applicable) to assess an applicant's potential for academic success and professional growth.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Application materials must include the following:

- an application for graduate admission;
- official transcripts of all undergraduate and graduate coursework submitted by each institution an applicant has attended;
- official scores on the Graduate Management Admission Test (GMAT), unless the student is a B.B.A. major in accounting at the University of Iowa;
- a supplemental application form with essay responses;
- a résumé and cover letter; and
- at least three letters of reference from former instructors or employers unless the student is a B.B.A. major in accounting at the University of Iowa.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

For complete information about application procedures, contact the Department of Accounting.

Application Deadlines

The Department of Accounting admissions committee reviews completed M.Ac. application files (which must include official GMAT scores) on five dates: March 1, April 15, July 15, October 1, and December 1. Applications are reviewed on these dates regardless of whether the applicant plans to begin the M.Ac. program in the fall semester (August), spring semester (January), or summer session (June). Final Graduate College application deadlines are as follows.

Fall semester entry: July 15 (April 15 for international students)

Spring semester entry: December 1 (October 1 for international students)

Summer session entry: April 15 (March 1 for international students)

Students who wish to apply for a teaching assistantship must apply to the M.Ac. program no later than March 1.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students may design their program around particular career goals in chosen specialization by working with their advisor to determine coursework and sequence.

b Complete at least 12 s.h. in graduate level accounting courses and at least 21 s.h. in courses numbered 5000 or above.

c Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

d ACCT:9120 offered fall only; choose an elective if taking ACCT:9050 in spring.

e Course numbered 5000 or above; work with faculty advisor to determine appropriate course.

f Requires consent of the MBA program.

g ACCT:9050 offered spring only; choose an elective if taking ACCT:9120 in fall.

h Work with faculty advisor to determine appropriate graduate elective coursework and sequence.

Career Advancement

Over 95 percent of students reported that they found permanent employment, were accepted to graduate school, or were not seeking employment within six months of graduation.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs; for more information about careers, visit the Pomerantz Career Center website.

Doctor of Philosophy

Graduate students in accounting may earn a Doctor of Philosophy in business administration. For a description of the Ph.D. program and requirements, see the Ph.D. in business administration [p. 1156] in the Catalog and visit the Department of Accounting website.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website. Application materials must include the applicant's score on the Graduate Management Admission Test (GMAT).

Bachelor of Business Administration

Undergraduate major: B.B.A.
Website: <https://tippie.uiowa.edu/>

The Bachelor of Business Administration is offered with majors in accounting, business analytics and information systems, economics, finance, management, and marketing.

This Catalog section provides information about requirements that all B.B.A. students must fulfill, regardless of their major, as well as admission information and academic rules and procedures for the B.B.A. For information about the individual majors, see Accounting [p. 1115], Business Analytics [p. 1139], Economics [p. 1157], Finance [p. 1184], Management and Entrepreneurship [p. 1204], and Marketing [p. 1214] in the Catalog.

Students may earn multiple majors in the B.B.A.; they also may earn combined degrees in the College of Engineering or the College of Liberal Arts and Sciences. See "Multiple Majors in Business" under Requirements [p. 1130] and see Combined Programs [p. 1132] in the Business Administration, B.B.A. section. Many business students earn one or more certificates and minors offered in disciplines across the University; see "Minors" and "Certificates" below.

The Tippie College of Business's undergraduate and graduate programs are accredited by AACSB International, the Association to Advance Collegiate Schools of Business.

Undergraduate Advising

All business students are advised at the business college's Undergraduate Program Office. Pre-business students are advised at the University's Academic Advising Center or the business college's Undergraduate Program Office. Drop-in hours and scheduled appointments are available at both offices. For more information on advising, contact the college's Undergraduate Program Office or the University's Academic Advising Center.

Honor Code

Integrity and honesty are essential to success in all facets of life. The purpose of the Tippie Honor Code is to promote honorable and ethical behavior. Students admitted to the college or enrolled in courses offered by the college are required to uphold the honor code.

Minors

The Tippie College of Business offers a minor in economics [p. 1175] for all students and a minor in business administration [p. 1137] for non-business students.

Bachelor of Business Administration students may earn minors in a number of disciplines outside of the Tippie College of Business. For example, students interested in international business might choose to earn a minor in a second language. For a list of minors and links to the departments and programs that offer them, see Find Your Program on the General Catalog website and select undergraduate minors.

Students may declare a minor on MyUI. To have the minor recorded on their transcripts, students must complete the minor section on the Application for Degree which they submit through MyUI in the session they intend to graduate.

Certificates

Bachelor of Business Administration students may earn certificates offered by the Tippie College of Business as well as by other colleges at the University of Iowa. The Tippie College of Business offers the Certificate in Entrepreneurial Management [p. 1182] and the Certificate in Risk Management and Insurance [p. 1237]. In addition, it partners with the College of Engineering to offer the Certificate in Technological Entrepreneurship [p. 1535] and with the College of Liberal Arts and Sciences to offer the Certificates in International Business [p. 1194] and in Arts Entrepreneurship [p. 141].

The College of Liberal Arts and Sciences, the College of Public Health, and University College offer a wide range of certificates open to all undergraduates. Many pair exceptionally well with a business major. See Find Your Program on the General Catalog website and select undergraduate certificates for a complete list of certificates and links to their Catalog sections.

Tippie RISE

RISE is an acronym for hands-on experiential learning in the form of Research with Faculty, Internship Course, Study Abroad, and Experiential Course.

All Tippie College of Business students must successfully complete at least one of the following Tippie RISE experiences to graduate. Each experience is tied to an academic course for which students must register. See "Experiential Learning Requirement: Tippie RISE" in the Business Administration, B.B.A. Requirements [p. 1130] section for the full list of qualifying courses.

Research with Faculty

Working closely with a faculty mentor, students explore a research question of interest for a semester or more. By conducting academic research, students enhance their critical thinking skills, learn techniques to collect and analyze data, and apply their findings to business practices. These skills are highly useful for a variety of businesses and graduate programs.

Internship Course

As students gain valuable hands-on work experience in a professional internship, they complete one of the approved internship courses to assist them in having a meaningful learning experience. The internship courses encourage students to take on relevant job responsibilities, outline strategies to meet internship goals, regularly communicate with their supervisors, explore the career field, and reflect on their growth throughout the experience.

Study Abroad

By taking advantage of short-term, summer, semester, or academic year programs, students can expand their worldview and learn alternative business and cultural practices outside of the United States. Students can participate in Tippie international programs such as London Winter, International Business in Sydney, China May, CIMBA Italy, Global Internships, spring break programs through the John Pappajohn Entrepreneurial Center, or any of the many UI study abroad programs in over 40 countries.

Experiential Course

In approved experiential courses, students improve their understanding of academic concepts by applying them to a class project with a company or nonprofit organization. Using real circumstances and issues, students engage with the organization to make a lasting impact. Students have support from classmates and guidance from their instructor throughout the duration of the project. Experiential courses are offered in many Tippie majors and as business and non-business electives.

Programs

Undergraduate Program of Study

- Bachelor of Business Administration [p. 1130]

Academic Rules and Procedures

Academic Recognition

Dean's List

Undergraduate students in the Tippie College of Business who achieve a g.p.a. of 3.50 or higher on 12 s.h. or more of University of Iowa graded coursework during a given semester or summer session and who have no semester hours of I (incomplete) or O (no grade reported) during the same semester are recognized by inclusion on the Dean's List for that semester.

President's List

Undergraduate students in the Tippie College of Business who achieve a g.p.a. of 4.00 on 12 s.h. or more of University of Iowa graded coursework and who have no semester hours of I (incomplete) or O (no grade reported) for two consecutive semesters (excluding summer sessions) are recognized by inclusion on the President's List.

Graduation with Honors in the Major

Graduation with honors in the major recognizes high scholastic achievement based on grades and on completion of a research project that enables students to gain expertise in a topic related to their field of study. The requirements to graduate with honors in the major at the Tippie College of Business are the following:

- g.p.a. of at least 3.50 in cumulative, University of Iowa, business, and University of Iowa business coursework at the time of graduation;
- completion of BUS:1999 Introduction to Research in Business;
- two-semester research project with a Tippie College of Business faculty member that results in a written thesis; and
- a poster presentation of research at the Undergraduate Research Festival.

To learn more, see Tippie Honors on the Tippie College of Business website.

Graduation with Distinction

Graduation with distinction recognizes high scholastic achievement based on grades. The Office of the Registrar certifies to the Tippie College of Business associate dean the names of students eligible to graduate with distinction. The

college awards degrees "with highest distinction" to students in the highest two percent of the graduating class, "with high distinction" to students in the next highest three percent, and "with distinction" to the next highest five percent. Ranking is based on students' grade-point averages for all college-level study undertaken before their final registration.

To be eligible to be considered for graduation with distinction, a student must complete 60 s.h. in residence as an undergraduate at the University of Iowa; 45 s.h. of that must be completed before the final registration.

Credit and Grading

Credit by Examination

Students may earn up to 30 s.h. of credit by examination by taking selected tests from the College-Level Examination Program (CLEP) and the Advanced Placement (AP) program of the College Board or the International Baccalaureate Program (IB). For information about when and how to take the CLEP and AP examinations, contact the University's Evaluation and Exam Service. The Tippie College of Business Undergraduate Program Office has information on scores, credit, and course duplicates for all CLEP, Advanced Placement, and IB tests accepted by the college.

Maximum Schedule

Students may register for a maximum of 18 s.h. in the fall and spring semesters and a maximum of 12 s.h. in the summer session. Course schedules of more than 18 s.h. for a fall or spring semester, or more than 12 s.h. for the summer session, require approval from the Undergraduate Program Office. Approval is based on a review of past academic performance.

Adding and Dropping Courses

Students may add or drop courses, except College of Law courses, any time before the deadline published in the University's academic deadline calendar. Deadlines are different for regular and off-cycle courses. See the Academic Calendar and Course Deadlines for course-specific deadlines at the University of Iowa on the Office of the Registrar website. Students must obtain approval from the college that offers the course in order to add or drop a course after these deadlines.

To request a late add of a Tippie College of Business course, students must obtain the authorization of the instructor followed by authorization of the Undergraduate Program Office.

To request a late drop of a Tippie College of Business course, students should meet with an advisor in the Undergraduate Program Office to discuss their request to drop the course. To request permission, students must submit a written petition. The petition is granted only with documentation of extenuating circumstances beyond the student's control.

Prerequisites

Undergraduate students must complete a course's prerequisites. When a student registers, the MyUI course registration system reads a student's record, and if there is no evidence that a prerequisite has been completed or is in progress, enrollment for the course is blocked. See the Tippie College of Business Undergraduate Students Prerequisites web page for more information about prerequisite policies and procedures.

Administrative Drops for Nonattendance

Instructors have the option to drop a student who has missed the first two class periods of a course, unless the student has offered an acceptable reason for beginning the course late. Administrative drops must be processed by the first eight calendar days of the semester or the first two calendar days of the winter session, each summer session, or the start of an off-cycle course. Administrative drops are made without assignment of a W (withdrawn). Students who are dropped from a course are notified. Students should not assume that they have been dropped from a course because they have not attended.

Pass/Nonpass

Up to 15 s.h. of coursework required for the B.B.A. may be taken pass/nonpass with the consent of an advisor and the instructor. Students must be in good academic standing to be eligible for the pass/nonpass option. A maximum of two pass/nonpass courses may be taken in one semester or session.

Courses taken pass/nonpass may not be used to satisfy general education, prerequisite, core, or major business requirements; major business requirements include any course that fulfills a business major course requirement or is offered by a business major department, regardless of the business major of the student seeking to take the course pass/nonpass.

Pass/nonpass registration must be completed during the first 10 days of a fall or spring semester or the first one-and-one-half weeks of a summer session, and it requires the approval of the advisor and the instructor.

For courses taken pass/nonpass, an earned grade of D-minus or higher is recorded as a P; an earned grade of F is recorded as an N. Pass/nonpass credit is not included in grade-point-average calculations.

Satisfactory/Fail, Satisfactory/Unsatisfactory

Certain courses are offered satisfactory/fail (S/F) or satisfactory/unsatisfactory (S/U). All students registered for these courses receive one of these marks.

Special forms are not necessary to register for S/F or S/U courses, since all students enrolled in such courses automatically receive an S, an F, or a U.

Semester hours of S or U graded coursework are not used in computing grade-point averages, but hours of F graded coursework are used.

Semester hours of S graded coursework are counted as semester hours earned toward graduation; semester hours of F or U graded coursework do not count as semester hours earned toward graduation.

A maximum of 15 s.h. of S credit from the University of Iowa is accepted toward a bachelor's degree.

Second-Grade-Only Option for Students Admitted to Business

Students admitted to the Tippie College of Business may use the second-grade-only option on any course except courses numbered above 3005 with the prefix ACCT, BAIS, BUS, ECON, FIN, MSCI, MGMT, MKTG, ENTR, or any course offered by a

department outside the Tippie College of Business that is being used to fulfill a major course requirement.

Policies

- Students may apply the second-grade-only option to a maximum of three different courses while they are enrolled at the University of Iowa; any second-grade-only options used before entry to the Tippie College of Business counts toward the maximum of three second-grade-only options allowed.
- Students in combined degree programs are allowed a combined maximum of three second-grade-only options.
- The second-grade-only option may be used only once per course. Once placed on the record, the option may not be retracted.
- A course taken at another college or university may not be repeated at the University of Iowa under the second-grade-only option.
- A University of Iowa course may not be repeated at another institution under the UI second-grade-only option.
- If the course was taken for a grade the first time, it must be taken for a grade the second time.
- If the course was taken pass/nonpass the first time, a student may choose to take the course for a grade or as pass/nonpass the second time.
- Any University of Iowa course taken in any mode of delivery—during a regular semester, a summer session, an intensive session, or through distance learning and Distance and Online Education [p. 1980]—may be repeated in the same mode of delivery or in any other mode of delivery.
- Students who have been awarded a degree from the University of Iowa may not use the second-grade-only option on a course taken before the degree was awarded.
- Graduate or professional colleges may recalculate grade-point averages using all grades visible on the permanent record.

Procedures

- Students must register as usual for the course that is to be repeated.
- After the session in which the course is being repeated has begun, students must request the second-grade-only option by completing the Request a Second-Grade-Only Option form.
- The permanent record is adjusted by placing a pound symbol (#) next to the first grade to indicate that it is no longer being included in the grade-point-average calculation, and only the semester hours from the second registration have been counted as semester hours earned.

Second-Grade-Only Option for Pre-Business Students

Pre-business students must follow the rules established by the College of Liberal Arts and Sciences (CLAS). Contact the CLAS Academic Programs and Student Development office or consult the CLAS Academic Policies Handbook for more information.

Incomplete Grades

Instructors may report a mark of I (incomplete) only if the unfinished part of a student's work in a course other than research, thesis, or independent study is small; if the work is

unfinished for reasons acceptable to the instructor; and if a student's standing in the course is satisfactory.

Students should not re-enroll in a course for which they have an incomplete. Incomplete grades must be removed by completing the unfinished part of the work. Faculty and students are encouraged to state clearly in a written agreement how the incomplete is to be completed. Both the faculty member and the student should keep a record of the written agreement.

Failure to remove the incomplete before the end of the next full semester, excluding summer and winter sessions, results in replacement of the I with a grade of F, regardless of whether a student is enrolled during that semester. A grade change may be submitted to convert a grade of F to another letter grade, with the instructor's approval.

Probation and Dismissal

Students are placed on academic probation when their grade-point average in any of the following categories falls below 2.00:

- all coursework taken,
- all coursework taken at the University of Iowa,
- all business coursework taken,
- all business coursework taken at the University of Iowa,
- all coursework taken to satisfy requirements for the major(s), or
- all coursework taken at the University of Iowa to satisfy requirements for the major(s).

In probation decisions, a 3 s.h. minimum is used to calculate the grade-point average for all coursework taken to satisfy requirements for the major(s), and all coursework taken at the University of Iowa to satisfy requirements for the major(s).

Students on probation are required to meet with an academic advisor and cannot register for the next session's classes before doing so. Students on academic probation who withdraw registration after the deadline for dropping courses may be dismissed.

Students on probation with more than one declared business major may be required to drop one or more majors in order to pursue one business major only.

Students may be dismissed from the college at any time for unsatisfactory scholarship. While some probationary period usually precedes a dismissal, students in good academic standing who complete a session with extremely unsatisfactory grades may be placed on academic probation or dismissed immediately. Students dropped from the college for poor scholarship may petition for permission to be reinstated, but usually only after one year following the end of the session in which they were dismissed; see "Reinstatement" below.

When all of the grade-point averages outlined above equal or surpass 2.00, students are removed from probation. Students usually are allowed only one session to return to good academic standing.

Reinstatement

Students dismissed for unsatisfactory scholarship for the first time are not permitted to register again for one year. Students dismissed for the second time may or may not be granted a second reinstatement. Requests for reinstatement must be made in writing and should be addressed to the Associate Dean, Undergraduate Program Office. Arrangements

for a reinstatement interview must be made with the Undergraduate Program Office in the Tippie College of Business. The interview must take place between March 1 and June 15 for reinstatement for fall semester, or between October 1 and November 15 for reinstatement to spring semester. Late requests are deferred to the following semester. Students who are permitted to register following dismissal are registered on academic probation and ordinarily are allowed two semesters to achieve good standing. Most reinstatements include a limit on the number of semester hours the student may take upon reinstatement. Very poor academic work in the first semester of a reinstatement, however, may result in dismissal at the close of that semester.

ReStart

The undergraduate colleges at the University of Iowa offer an academic forgiveness policy, referred to as ReStart.

If students were previously enrolled in the Tippie College of Business and are returning, or have returned, to the University of Iowa after an extended absence (four consecutive years or more), they may use the ReStart option to request removal of one or more of previously completed academic sessions at the Tippie College of Business (i.e., semesters or winter/summer enrollments) from future grade-point averages and satisfaction of degree requirements.

If students have already graduated from the University of Iowa, they are not eligible to use the ReStart option whether for a second degree or any other purpose.

Students are strongly advised to contact the assistant dean or director to discuss the ReStart option before submitting a ReStart application. Contact the Undergraduate Program Office to schedule an in-person or telephone appointment.

Returning for Baccalaureate Degrees

Returning for a Second Business Major

Individuals who already hold a B.B.A. degree from the University of Iowa may complete the requirements for another business major, except accounting. Those interested in earning a degree in accounting must apply for admission to the Graduate College in order to earn the Master of Accountancy degree. Students who return to the University of Iowa to complete another business major must meet the requirements for that major; they do not have to meet the Tippie College of Business residence requirement. It is their responsibility to notify the Office of the Registrar once they complete the requirements for the second major so that a notation can be placed on their permanent record. Returning students are held to the requirements that are published in the University of Iowa General Catalog for the session in which they reenter.

Returning for an Additional Bachelor's Degree

Individuals who hold a bachelor's degree from another college at the University of Iowa may return to earn the B.B.A. degree from the Tippie College of Business. They must satisfy all requirements for undergraduate admission to the business college. Once admitted, they must satisfy all requirements for the B.B.A. in their chosen major. Returning students are held to the requirements that are published in the University of Iowa General Catalog for the session in which they reenter.

Returning for an Additional Bachelor's Degree in Accounting

Individuals who hold a bachelor's degree in a non-business discipline from the University of Iowa or from another college or university may be considered for admission to the Tippie College of Business to earn the B.B.A. with a major in accounting. Individuals interested in this option should consult with the Department of Accounting about the B.B.A. program in accounting (undergraduate) and the Master of Accountancy graduate program. Those who already hold a B.B.A. from the University of Iowa or any business degree from another institution may not earn a major in accounting at Iowa.

Business Administration, B.B.A.

Requirements

The Bachelor of Business Administration requires a minimum of 120 s.h. of credit, including at least 48 s.h. earned in business courses and at least 52 s.h. earned in non-business courses.

B.B.A. students must earn 45 s.h. in residence following admission to the Tippie College of Business. At least 24 s.h. in courses offered by the business college and at least two-thirds of the semester hours in a student's major must be earned in the student's major department at the Tippie College of Business. Nonresident instruction includes coursework at colleges and universities other than the University of Iowa.

To graduate, B.B.A. students must have a cumulative g.p.a. of at least 2.00 in all college coursework attempted, all college coursework attempted in business, all college coursework attempted in the major, all coursework attempted at the University of Iowa, all business coursework attempted at the University of Iowa, and all coursework in the major attempted at the University of Iowa.

Common B.B.A. Requirements

B.B.A. students must satisfy the following minimum common requirements or approved equivalents. For approved equivalents, consult the college's Undergraduate Program Office.

General Education

Code	Title	Hours
	Rhetoric	4-5
	Interpretation of Literature	3
	World Languages	0-10
	Natural Sciences	3
	Social Sciences (excluding ECON:1100 and ECON:1200)	3
	Historical Perspectives	3
	Diversity and Inclusion, or Values and Culture	3
	International and Global Issues	3

Tippie College of Business students may complete the World Languages requirement using one of two options. One year of high school language study is generally equivalent to one semester of college language study.

Option one: attain fourth-level proficiency in a single world language, usually by completing four years of that language in high school or four semesters in college or an equivalent combination of high school and college coursework; or pass an achievement test or evaluation at fourth-level proficiency.

Option two: attain second-level proficiency in each of two world languages, usually by completing two years of each language in high school or two semesters of each language in college or an equivalent combination of high school and college coursework; or pass achievement tests and/or evaluations at second-level proficiency in each language. Option two does not fulfill the World Languages requirement for the College of Liberal Arts and Sciences or qualify students

to earn credit under the Furthering Language Incentive Program (FLIP).

Students may not count courses taken to fulfill General Education Program requirements toward other requirements for the B.B.A.

Prerequisites for Admission to the College

Code	Title	Hours
RHET:1030	Rhetoric	4-5
MATH:1350	Quantitative Reasoning for Business	4
STAT:1030	Statistics for Business	4
ECON:1100	Principles of Microeconomics	4
BAIS:1500	Business Computing Essentials	2

Prerequisites for Declaring a Business Major

Code	Title	Hours
ECON:1200	Principles of Macroeconomics	4
ACCT:2100	Introduction to Financial Accounting	3

The accounting major has additional major declaration requirements. See "Requirements [p. 1118]" in the B.B.A. in accounting section of the Catalog for further information.

Business Core

Code	Title	Hours
ACCT:2200	Managerial Accounting	3
BAIS:2800	Foundations of Business Analytics	3

MKTG:3700	Marketing Institute Seminar I	2
MKTG:3701	Marketing Institute Field Studies	2
MKTG:4250	Marketing and Sustainability	3
MKTG:4800	Marketing Consulting Project	3

Major Area of Study

All B.B.A. students must complete a major area of study. The college offers majors in accounting [p. 1115], business analytics and information systems [p. 1139], economics [p. 1157], finance [p. 1184], management [p. 1204], and marketing [p. 1214]. The requirements for each major are established by the department that offers the major.

Students with Associate of Arts Degrees

Students who have been granted an Associate of Arts (A.A.) from a community college participating in the Iowa and Illinois Community College/Regents Articulation Agreements are considered to have met all high school unit requirements for admission to the B.B.A. and all of the General Education Program requirements listed under "General Education Requirements" above, except the World Languages requirement. The program of study for which a student was awarded the A.A. must have included:

- a minimum of 60 s.h. (or 90 quarter hours) of credit acceptable toward graduation from the University of Iowa;
- mathematics courses comparable to MATH:0100 Basic Algebra I are not accepted toward graduation;
- completion of the agreed-upon group of courses at the community college; and
- a g.p.a. of at least 2.00.

Completion of an Associate of Arts does not guarantee admission to the Tippie College of Business. See Admission [p. 1133] in this section of the Catalog for a complete list of requirements for admission to the B.B.A.

Students who use the provisions of the articulation agreement are granted a maximum of 60 s.h. of transferable credit from two-year colleges toward the 120 s.h. required for a B.B.A. Credit earned for the A.A. beyond the 60 s.h. transferable maximum is used in computing a student's grade-point average, and it may be used to satisfy course requirements, but it does not count toward the B.B.A. Transfer credit for business courses taken during the first and second years is counted toward the B.B.A. only if such courses are usually offered as lower-division courses at the University of Iowa.

Transfer Courses

Students who have taken courses at another institution that are similar to those approved for the common business

requirements at Iowa may request that these courses be evaluated for transfer credit. Students who transfer fewer hours than needed to meet a common business requirement may use only approved courses to complete the remainder of the requirement. Only third- and fourth-year-level courses taken at accredited four-year institutions may be used to satisfy common business course requirements numbered 3000 or above. Students must complete a minimum of 24 s.h. of business coursework and at least two-thirds of the coursework in the major at the University of Iowa. They also must meet the 45 s.h. residence requirement of the Tippie College of Business. Credit earned through online courses may be counted toward all requirements for graduation, subject to approval by a student's major department.

Honors in the Major

Outstanding students in the college have an opportunity to undertake independent research under the supervision of a faculty member. To graduate with honors in the major, students must complete an honors thesis under the supervision of a Tippie College of Business faculty member. Students begin by completing BUS:1999 Introduction to Research in Business prior to the commencement of their thesis work. This course introduces students to research in the college and provides an opportunity to develop thesis questions and meet faculty members engaged in research.

Students then identify a faculty thesis advisor and complete their research and thesis writing over the course of two semesters, registering for the appropriate honors thesis course for both semesters from the following list. With faculty permission, students may elect to complete the thesis with another Tippie College of Business student.

Code	Title	Hours
ACCT:4999	Honors Thesis in Accounting	arr.
BAIS:4999	Honors Thesis in Business Analytics	arr.
BUS:4999	Honors Thesis in Business	arr.
ECON:4999	Honors Thesis in Economics	arr.
FIN:4999	Honors Thesis in Finance	arr.
MGMT:4999	Honors Thesis in Management	arr.
MKTG:4999	Honors Thesis in Marketing	arr.

To earn the B.B.A. with honors in the major, students must successfully complete all college requirements with a g.p.a. of at least 3.50 in all courses taken at Iowa, all business courses taken at Iowa, all courses taken (including transfer courses), and all business courses taken (including transfer courses). Students also must present their research in a poster format at the spring or fall Undergraduate Research Festival.

See Tippie Honors on the Tippie College of Business website to learn more.

Completing the honors in the major requirements also satisfies the experiential learning requirement for the University of Iowa Honors Program. To learn more about graduating with University honors through the University of Iowa Honors Program, visit the Honors at Iowa website.

Pre-business students interested in honors study are encouraged to participate in the University of Iowa Honors Program until they are admitted to the business college. Visit Honors at Iowa to learn about the University's honors program.

Multiple Majors in Business

Students may earn the B.B.A. degree with more than one major. The Four-Year Graduation Plan is not available to students earning more than one major. Students have access to degree audits for all of the programs of study they have officially declared. They also have access to all program courses, with some limitations, during early registration. A student must be in good academic standing in order to declare more than one major. See Double Majors and Joint Degree Policies on the Tippie College of Business website.

Combined Programs

Undergraduate students may earn combined undergraduate degrees from the Tippie College of Business and the College of Liberal Arts and Sciences or the College of Engineering. The following rules apply to all students in combined degree programs.

- To enter a combined degree program, students must have approval from the Tippie College of Business and must be admitted to both colleges. Interested students should see an advisor in the college's Undergraduate Program Office.
- Students in combined degree programs are allowed a combined maximum of three second-grade-only options.
- All students in combined programs must meet all requirements for both degrees, including all General Education Program requirements.
- Students are assigned two advisors (one for each major).
- Students in combined degree programs are assessed tuition only for the primary (first) major.
- First-year students in combined degree programs who are direct admission students in the Tippie College of Business must enroll in BUS:1200 Tippie College Direct Admit Seminar during their first semester at the University.

B.B.A./Liberal Arts and Sciences Degree

The Tippie College of Business and the College of Liberal Arts and Sciences offer a combined degree program in which students earn two University of Iowa bachelor's degrees: a Bachelor of Business Administration (B.B.A.) from the Tippie College of Business and a Bachelor of Arts (B.A.), Bachelor of Science (B.S.), Bachelor of Fine Arts (B.F.A.), or Bachelor of Music (B.M.) from the College of Liberal Arts and Sciences.

Students in the combined business/liberal arts and sciences degree program must declare the Tippie College of Business program of study as their primary (first) major.

To learn about liberal arts and sciences majors, see the College of Liberal Arts and Sciences [p. 17] section of the Catalog.

B.B.A./B.S.E.

The Tippie College of Business and the College of Engineering offer a combined degree program in which students earn two University of Iowa bachelor's degrees: a Bachelor of Business Administration (B.B.A.) from the Tippie College of Business and a Bachelor of Science in Engineering (B.S.E.) from the College of Engineering. Students in the combined business/engineering degree program must declare the College of Engineering program of study as their primary (first) major.

Students in the combined business/engineering degree program must enroll in appropriate mathematics and

engineering courses early during their course of study in order to complete the program in a timely way. Because courses in natural sciences, mathematics, humanities, and social sciences count toward the B.B.A. and the B.S.E., students may be able to count certain courses toward both degrees.

B.B.A./B.S.E. students usually meet the degree requirements of both colleges in about five years; time required depends on a student's choice of major study areas.

For information about engineering majors, see Bachelor of Science in Engineering [p. 1426] (College of Engineering) in the Catalog. To learn more about requirements for the combined business/engineering degree, consult the Undergraduate Program Office in the Tippie College of Business and the Student Development Center in the College of Engineering.

B.B.A./M.S. in Business Analytics or M.S. in Finance

The combined Bachelor of Business Administration/Master of Science in business analytics or Master of Science in finance allows undergraduate students majoring in any of the six B.B.A. majors the opportunity to begin work toward the M.S. degree while completing the B.B.A. degree. The program allows students to count a limited amount of credit toward both degrees, enabling students to finish the M.S. degree one semester early.

Students apply to the Master of Science program in the third year of undergraduate study and begin masters-level work in the fourth year of undergraduate study. For information on these graduate programs, see M.S. in business analytics and M.S. in finance [p. 1190] in the Catalog.

B.B.A./J.D.

The Tippie College of Business 3+3 agreement with the College of Law allows well-prepared students the opportunity to apply for admission to the College of Law during their junior year, and if accepted, to begin work on the Juris Doctor degree during their fourth year of study in the B.B.A. degree program. Students participating in the 3+3 program apply to the College of Law and are required to submit a Law School Admission Test (LSAT) score. If a student is admitted into the J.D. program, the Tippie College of Business accepts all credit earned during the first year of law school to satisfy the remaining elective hours required to earn the B.B.A. degree.

The 3+3 option is open to students in all six of the B.B.A. majors. Students who wish to pursue this opportunity are required to plan early in their undergraduate career, as all degree requirements except elective hours must be completed in the first three years of B.B.A. study.

For more information, see the 3+3 Program on the College of Law website.

Admission

Students enter the Tippie College of Business in one of two ways: direct admission or standard admission. All students admitted to the Tippie College of Business must follow the Tippie Honor Code. Students who meet the admission requirements may be denied admission upon evidence of postsecondary academic misconduct or other violations of the honor code. Students are required to meet with the associate dean, undergraduate programs, to discuss incidents of academic misconduct.

Admission standards are set by the Undergraduate Program Committee. All admission appeals are reviewed by the Undergraduate Program Office. Prospective students must submit acceptance of admission offers and all transcripts showing coursework that satisfies the Tippie College of Business admission requirements to the University's Office of Admissions by the appropriate deadline. Letters of recommendation are not accepted. For more information about application and admission, contact the Undergraduate Program Office.

Direct Admission

Direct admission is designed to enable highly qualified high school students to enter the college directly after high school. Applicants must have a composite ACT score of 26 or higher (or SAT equivalent) and a high school g.p.a. of 3.60 or higher (on a 4.00 scale) to qualify. Applicants who do not meet these criteria but who present a strong academic record are carefully considered through a petition process.

Incoming high school students who are admitted to the College of Liberal Arts and Sciences as pre-business students may inquire about their admission decision by contacting the associate director of admission in the Tippie College of Business Undergraduate Program Office. For more information about admission requirements, see Admissions on the Tippie College of Business website.

Students granted direct admission to the college are eligible to apply for first-year scholarships. The application process is competitive and is based on high school record and an application essay.

Students who are directly admitted take BUS:1200 Tippie College Direct Admit Seminar in their first semester. The course, taught by a Tippie advisor in the Undergraduate Program Office and by undergraduate peer mentors, spans nine weeks and orients students to the University of Iowa and the Tippie College of Business.

Standard Admission

University of Iowa students are eligible to apply to the Tippie College of Business through standard admission if they have completed or are completing the five prerequisite courses for admission to the college listed under "Common B.B.A. Requirements" (see Requirements [p. 1130] in this section of the Catalog) and have a g.p.a. of at least 2.75 on the prerequisite courses, on all college coursework completed, and on all University of Iowa coursework. Transfer students who have completed the prerequisite courses and meet the grade-point average requirements also may apply through standard admission.

Applications for standard admission must be submitted online. Application deadlines for current University of Iowa students are February 1 for fall admission and September 1 for spring admission. Application deadlines for transfer students are May 1 for fall admission and December 1 for spring admission.

Applicants should meet all admission requirements by the end of the semester in which they apply. Admission is not granted for the summer session or the three-week winter session. Grades from the three-week winter session do not count toward admission for the following spring semester, and grades from a summer session do not count toward admission for the following fall semester.

Students who are denied admission may file an appeal for denial of admission to business if they can provide

documentation of extenuating circumstances that affected their academic performance.

Nondegree Admission

Students visiting from another institution who wish to enroll in undergraduate courses in order to earn credit that they can transfer to their home institution may be granted admission as undergraduate nondegree students. Nondegree students are not guaranteed access to specific courses; they must have the approval of the Undergraduate Program Office and may earn no more than 9 s.h. in nondegree status.

Reentry Policy

All students who have been enrolled in another college or university since leaving the University of Iowa are required to submit official transcripts along with an application for reentry. Completed application materials must be received at least two weeks before the opening of classes. Reentry students are held to the requirements that are published in the University of Iowa General Catalog for the session in which they reenter.

Absent for 12 months or more—in good standing:

Students absent from the University of Iowa for 12 months or more who left in good standing must apply to the UI Office of Admissions as returning students and must contact the Tippie College of Business Undergraduate Program Office for advising before registration. Good standing is defined as not on probation and not dismissed for any reason.

Absent for 12 months or more—not in good standing:

Students absent from the University of Iowa for 12 months or more who were not in good standing when they left the University must file a petition with the Tippie College of Business Undergraduate Program Office to be reinstated. If the petition is approved, the student must apply to the UI Office of Admissions as a returning student; the Undergraduate Program Office notifies the Office of Admissions that a student's petition for reinstatement has been approved. The student also must schedule an appointment to see an advisor in the Tippie College of Business for advising before registration. Not in good standing is defined as being on probation or having been dismissed from the Tippie College of Business due to unsatisfactory scholarship, academic misconduct at the University of Iowa or at another institution, or a violation of the Tippie College Undergraduate Honor Code. Students who have been officially dismissed follow the procedures for reinstatement.

Absent for less than 12 months—in good standing:

Students absent for less than 12 months are not required to file an application for reentry. Students who were in good standing when they left the University should contact the Tippie College of Business Undergraduate Program Office for advising before registration. Reentry is approved regardless of any admission requirement changes.

Absent for less than 12 months—not in good standing:

Students absent for less than 12 months are not required to file an application for reentry. Students who were not in good standing when they left the University must consult with an advisor in the Tippie College of Business; the student may be readmitted on probation. Readmitted students should contact the Tippie College of Business Undergraduate Program Office for advising before registration. Reentry is approved regardless of any admission requirement changes. Not in good standing is defined as being on probation or having been dismissed from the Tippie College of Business due to unsatisfactory scholarship, academic misconduct at

the University of Iowa or at another institution, or a violation of the Tippie College Undergraduate Honor Code. Students who have been officially dismissed follow the procedures for reinstatement.

Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

The following checkpoints are designed for students who enter the University as direct admission or pre-business students.

In order to stay on the plan, pre-business students must maintain the grade-point averages required for admission to the Tippie College of Business and must apply for admission to the college the semester that the five prerequisite courses will be completed, but no later than before the fifth semester begins. The Four-Year Graduation Plan is not available to students who choose to pursue a double major in the college or to those enrolled in a combined degree program.

Before the third semester begins: RHET:1030 Rhetoric, ECON:1100 Principles of Microeconomics, MATH:1350 Quantitative Reasoning for Business, STAT:1030 Statistics for Business, and BAIS:1500 Business Computing Essentials, or equivalents; and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: ACCT:2100 Introduction to Financial Accounting and ECON:1200 Principles of Macroeconomics, or equivalents; business core courses that satisfy prerequisites in a student's intended major; three-quarters of General Education requirements; and at least half of the semester hours required for graduation

Before the seventh semester begins: three-quarters of business core requirements, approximately half of the coursework in the major (varies by major), and three-quarters of the semester hours required for graduation

Before the eighth semester begins: approximately three-quarters of coursework in the major (varies by major)

During the eighth semester: all remaining coursework in the B.B.A. degree and a sufficient number of semester hours to graduate

Iowa Degree in Three

Iowa Degree in Three is designed for students who are academically prepared to complete more semester hours per term than average or who come to the university with completed college credits. It is a flexible, affordable option developed to meet the needs of highly motivated students. Students sign an agreement during their first semester of enrollment; meet with an advisor at least once a semester to review their plans and progress; take courses during summer sessions, if necessary; meet specific course checkpoints; and maintain the grade-point average required for the major.

The Tippie College makes several assumptions about candidates for the Iowa Degree in Three:

- students are prepared to enroll in MATH:1350 Quantitative Reasoning for Business during their first enrollment at the University of Iowa;
- students have fulfilled the General Education World Language requirement before matriculation;

- students are direct admits to the Tippie College of Business;
- students have earned at least 15 s.h. of college credit before matriculation; and
- students are not held for more than two English as a Second Language classes.

The Iowa Degree in Three is available for any of the majors offered by the Tippie College of Business.

Career Advancement

Tippie College of Business graduates enjoy a high placement rate. Over 90 percent of students reported that they found permanent employment, were pursuing graduate degrees, or were not seeking employment six months after graduation.

Visit the Pomerantz Career Center website for more information.

Business Administration

Undergraduate minor: business administration

Website: <https://tippie.uiowa.edu/>

The Tippie College of Business offers a minor in business administration for non-business students. The minor is open to all University of Iowa undergraduates except those majoring in business (Tippie College of Business) and interdepartmental studies majors in the business studies track (College of Liberal Arts and Sciences).

Programs

Undergraduate Program of Study Minor

- Minor in Business Administration [p. 1137]

Business Administration, Minor

Requirements

The undergraduate minor in business administration requires 36 s.h., including at least 12 s.h. taken in the Tippie College of Business. Students must maintain a g.p.a. of at least 2.00 in the minor overall and in all courses in the minor taken at the University of Iowa. Coursework in the minor may not be taken pass/nonpass.

The minor can be earned by any University of Iowa undergraduate student except those majoring in business (Tippie College of Business) and interdepartmental studies majors in the business studies track (College of Liberal Arts and Sciences).

The minor in business administration requires the following courses, or the equivalents. Some of these courses have prerequisites and other requirements for registration; students must complete a course's prerequisites and meet its registration requirements before they may register for the course. For more information, visit the Minor in Business Administration on the Tippie College of Business website.

Code	Title	Hours
ACCT:2100	Introduction to Financial Accounting	3
ACCT:2200	Managerial Accounting	3
BAIS:1500	Business Computing Essentials	2
ECON:1100	Principles of Microeconomics	4
ECON:1200	Principles of Macroeconomics	4
FIN:3000	Introductory Financial Management	3
MATH:1350	Quantitative Reasoning for Business	4
MGMT:2000	Introduction to Law	3
MGMT:2100	Introduction to Management	3
MKTG:3000	Introduction to Marketing Strategy	3
STAT:1030	Statistics for Business	4
Total Hours		36

Students who will have completed all requirements for the minor when they graduate should indicate a business administration minor on their Application for Degree. Contact the Undergraduate Program Office for more information about the minor in business administration.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Business Administration, Minor

Course	Title	Hours
Academic Career		
Any Semester		

Thoughtful planning is required to complete the courses necessary for a minor.

At least 12 semester hours of coursework must be completed in the Tippie College of Business. See MyUI course listing for administrative home of courses required for the minor.

An overall grade-point average of at least 2.00 is required on all courses taken and on courses taken at The University of Iowa. (2.00 GPA on all courses, not each course).

Coursework in the minor may not be taken pass/nonpass.

Exceptions made for the minor may not satisfy requirements for the Bachelor of Business Administration degree. See an advisor in C140 PBB for more information.

a Students must meet the stated prerequisites or ALEKS score to enroll in MATH:1350 or MATH:1380. Discuss math placement with your academic advisor.

- b MATH:1350 is a new course effective fall 2020; students should take MATH:1350, MATH:1380, or a calculus course to complete this requirement.
- c This course has prerequisites. See MyUI course listing for details.
- d Enrollment in math courses requires completion of a placement exam.
- e This course is designed to be taken early in your studies as the content is important to subsequent classes. See MyUI for prerequisites.
- f Check MyUI for course requirements.

Business Analytics

Interim Chair

- Ann M. Campbell

Undergraduate major: business analytics and information systems (B.B.A.)

Graduate degrees: M.S. in business analytics (career, professional); business analytics subprogram for the Ph.D. in business administration

Graduate certificate: business analytics

Faculty: <https://tippie.uiowa.edu/people?departments=175>

Website: <https://tippie.uiowa.edu/business-analytics>

The Department of Business Analytics specializes in using advanced computation and mathematical techniques to solve critical business problems. Its strengths in research and instruction include operations management, optimization, machine learning, natural language processing, network science, and data mining.

The department offers the undergraduate major in business analytics and information systems, with tracks in business analytics or information systems. Off-campus offerings include the part-time Master of Science program in business analytics and a graduate Certificate in Business Analytics located in Des Moines, Cedar Rapids, and the Quad Cities. On-campus graduate programs include the full-time Master of Science program in business analytics and the Doctor of Philosophy in business administration with a business analytics subprogram.

The off-campus business analytics (professional) program collaborates with the Professional M.B.A. Program to offer a combined M.S./M.B.A. degree. Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program.

Programs

Undergraduate Program of Study

Major

- Major in Business Analytics and Information Systems (Bachelor of Business Administration) [p. 1144]

Graduate Programs of Study

Majors

- Master of Science in Business Analytics (career) [p. 1148]
- Master of Science in Business Analytics (professional) [p. 1151]
- Business analytics subprogram for the Doctor of Philosophy [p. 1153] in Business Administration

Certificate

- Certificate in Business Analytics [p. 1154]

Courses

Business Analytics Courses

BAIS:1300 First-Year Seminar 1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

BAIS:1500 Business Computing Essentials 2 s.h.

Basic proficiency with common business application software (word processing, spreadsheet, presentation software, database); simulation training to achieve requisite skills; additional support available via optional textbook or ebook; online, modular, self-taught course.

BAIS:2800 Foundations of Business Analytics 3 s.h.

Introduction to business decision making using data; students transform data into insight using visualization and statistics; introduction to Excel as a tool for business analytics. Prerequisites: (STAT:1030 or STAT:2010 or STAT:3100 or STAT:3101 or STAT:3120 or STAT:3510 with a minimum grade of B or STAT:4100 or BIOS:4120 or PSQF:4143 with a minimum grade of B) and (MATH:1380 or MATH:1460 or MATH:1550 or MATH:1850 or MATH:1860) and (MSCI:1500 or BAIS:1500 or CS:1020 or CS:1110 or CS:1210 or CS:2110 or ENGR:1300 or ENGR:2730).

BAIS:3000 Operations Management 2 s.h.

Strategic, tactical, operational issues that arise in management of production and service operations; product and process design, facilities planning, quality management, materials management, operations planning and scheduling, emerging technologies in production and service management. Prerequisites: STAT:2010 or STAT:3120 or STAT:3101 or STAT:2020 with a minimum grade of B or STAT:3510 with a minimum grade of B or BIOS:4120 or STAT:3100 or PSQF:4143 with a minimum grade of B or STAT:1030 or STAT:4100.

BAIS:3005 Information Systems 2 s.h.

Application of computing principles to solving business problems; information technology in modern organizations; focus on sound data analysis to support decision making; tools used for problem solving (spreadsheets, databases, web applications); role of information systems in organizations; components of information technology; internet and network economy; basic data analysis and visualization; decision-making logic represented as algorithms; perform what-if analysis with data; emerging technologies. Prerequisites: MSCI:1500 or BAIS:1500 or CS:1020.

BAIS:3020 Computational Thinking 3 s.h.

Introduction to algorithmic problem-solving logic with Python; use of data structures and programming constructs to manipulate data and solve business problems. Prerequisites: MSCI:3005 or BAIS:3005 or CS:2110.

BAIS:3025 VBA Spreadsheet Programming 3 s.h.

Introduction to programming Visual Basic for Applications in Excel to develop spreadsheet-based, decision-support systems. Prerequisites: MSCI:3005 or BAIS:3005 or CS:2110.

BAIS:3030 Business Process Analysis 3 s.h.

Data-driven approach to improve business processes; value-stream map analysis of industrial and service-oriented business processes to identify improvement opportunities; discrete-event simulation tools utilized to model business processes and demonstrate effect of variability on process performance metrics; role of information systems to increase an organization's efficiency and sustainability; application of lean principles to support environmental integrity and economic viability; meets a requirement for the sustainability certificate. Prerequisites: MSCI:3000 or BAIS:3000.

BAIS:3050 Business Analytics and Information Systems Professional Preparation 1 s.h.

Information on career opportunities in the fields of business analytics and information systems (BAIS); introduction to the many career avenues available to a BAIS major and how to position oneself for success in those careers.

BAIS:3070 Business Analytics and Information Systems Topics arr.

Special topics in business analytics and information systems.

BAIS:3100 Accounting Information Systems 3 s.h.

Application of computer technology to accounting and transaction processing systems; information systems infrastructure and trends; problem solving with microcomputer spreadsheets, databases; accounting cycle operations. Prerequisites: ACCT:2200 and ACCT:2100 and (MSCI:3005 or BAIS:3005 or CS:2110). Same as ACCT:3600.

BAIS:3120 Application Development 3 s.h.

Implementation of a complete application utilizing practical programming skills and a modern application framework. Prerequisites: (MSCI:3200 or BAIS:3200) and (MSCI:3020 or BAIS:3020). Corequisites: MSCI:3300 or BAIS:3300.

BAIS:3140 Information Visualization 3 s.h.

Instruments for reasoning about quantitative information; analyzing and communicating statistical information; main typologies of data graphics (data-maps, time-series, space-time narrative, relational diagrams, graphs and methods for dimensionality reduction); language for discussing data visualizations combined with knowledge of human perception of visual objects; how to visualize information effectively by using statistical methods, knowledge of human perception, and basics of data graphics. Prerequisites: (MSCI:2800 or BAIS:2800) and (MSCI:3005 or BAIS:3005).

BAIS:3200 Database Management 3 s.h.

Design and implementation of a database using relational DBMS; emphasis on issues of logical and physical design, database administration, concurrency control, maintenance. Prerequisites: MSCI:3005 or BAIS:3005 or CS:1210 or CS:2110 or CS:2230 or CS:3330 or ENGR:2730.

BAIS:3250 Data Wrangling 3 s.h.

Use of R programming environment to apply methods of processing, manipulating, analyzing, and visualizing data for insights that can aid business decision making. Prerequisites: (MSCI:2800 or BAIS:2800) and (MSCI:3020 or BAIS:3020) and (MSCI:3200 or BAIS:3200).

BAIS:3300 Software Design 3 s.h.

Planning, analysis, design, and implementation of an information system with emphasis on using software development methodologies to manage the software development life cycle. Prerequisites: (MSCI:3020 or BAIS:3020) and (MSCI:3200 or BAIS:3200).

BAIS:3400 Data Communications 3 s.h.

Exploration of computer networking fundamentals with emphasis on using modern data communication protocols, technologies, and applications to securely support and enhance business functions. Prerequisites: MSCI:3005 or BAIS:3005 or CS:2110 or CS:1210.

BAIS:3500 Data Mining 3 s.h.

Introduction to predictive analytics methods motivated by problems in operations, marketing, finance and accounting; data and text mining techniques, including classification, clustering, and association analysis. Prerequisites: (MSCI:2800 or BAIS:2800 or STAT:2020 with a minimum grade of B or STAT:4101 or ECON:4800) and (MSCI:3020 or BAIS:3020) and (MSCI:3200 or BAIS:3200). Corequisites: MSCI:3250 or BAIS:3250.

BAIS:3800 Optimization and Simulation Modeling 3 s.h.

How to leverage data and apply spreadsheet optimization software and Monte Carlo simulation to form optimal decision policies. Prerequisites: MSCI:2800 or BAIS:2800 or STAT:4101 or ECON:4800 or STAT:2020 with a minimum grade of B.

BAIS:3920 Supply Chain Management 3 s.h.

Key issues in design and management of global supply chains; issues in integration of business processes across organizations that are concerned with movement of goods, delivery of services, and information flow along the supply chain in order to create value for the customer; issues in coordinating production and logistics within a firm and with outside suppliers and customers in the supply chain. Prerequisites: MSCI:3000 or BAIS:3000.

BAIS:4050 Directed Readings arr.**BAIS:4150 Business Analytics Capstone 3 s.h.**

Individual or team senior project incorporating track-specific knowledge and skills from business analytics curriculum; projects from real-world customer involving descriptive, predictive, and prescriptive; outcomes include client presentation and project report. Prerequisites: (MSCI:3250 or BAIS:3250) and (MSCI:3500 or BAIS:3500) and ACCT:2200 and BUS:3000.

BAIS:4220 Advanced Database Management and Big Data 3 s.h.

Advanced database management topics; basics of semi-structured data and web services; how to retrieve real-world big data sets from web services; use of SQL and PL/SQL to analyze data in relational databases; big data related topics such as Hadoop and Hive. Prerequisites: MSCI:3200 or BAIS:3200. Same as IGPI:4220.

BAIS:4280 Data Security 3 s.h.

Data and network security topics to ensure confidentiality, integrity, and availability of information and assets including cryptography, access control, physical security, network and application security, and management issues surrounding information security. Prerequisites: MSCI:3005 or BAIS:3005 or CS:1210 or CS:2110 or CS:2230 or CS:3330 or ENGR:2730.

BAIS:4350 Information Systems Capstone 3 s.h.

Individual or team senior project incorporating track-specific knowledge and skills from information systems curriculum; projects from real-world customer involving development of software applications and information system infrastructure; outcomes include written documentation, presentation, and project report. Prerequisites: (MSCI:3120 or BAIS:3120) and (MSCI:3300 or BAIS:3300) and ACCT:2200 and BUS:3000.

- BAIS:4480 Knowledge Discovery** 3 s.h.
Knowledge discovery process, including data reduction, cleansing, transformation; advanced modeling techniques from classification, prediction, clustering, association; evaluation and integration. Same as CS:4480, ECE:4480.
- BAIS:4999 Honors Thesis in Business Analytics** arr.
Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University of Iowa Honors Program guidelines; may include empirical research, library research, applied projects.
- BAIS:6040 Data Programming in Python** 3 s.h.
Introduction to principles and practices of handling, cleaning, processing, and visualizing data using the Python programming language; basic data programming skills that can be applied to software development in any high-level programming language; data types, control structures, functions and modules, and other useful libraries for data manipulation and machine learning applications in Python.
- BAIS:6050 Data Management and Visual Analytics** 3 s.h.
Understanding how data is stored in databases and learning the tools used to access the data is key to creating data sets used to answer many business questions; how to manage and access data in relational databases using Structured Query Language (SQL); basic principles of visual analytics using Tableau; techniques for presenting data retrieved from databases. Requirements: enrollment in graduate business analytics program.
- BAIS:6060 Data Programming in R** 3 s.h.
Introduction to principles and practices of handling, cleaning, processing, and visualizing data using R programming language; basic programming skills that can be applied to software development in any programming language; variables and data types, control structures, functions and subroutines, arrays and other simple data structures.
- BAIS:6070 Data Science** 3 s.h.
Underlying concepts and practical computational skills of data-mining tools including penalty-based variable selection (LASSO), logistic regression, regression and classification trees, clustering methods, principal components and partial least squares; analysis of text and network data; theory behind most useful data mining tools and how to use these tools in real-world situations; software for analysis, exploration, and simplification of large high-dimensional data sets. Prerequisites: MBA:8150 or MSCI:9100 or BAIS:9100.
- BAIS:6100 Text Analytics** 3 s.h.
Concepts and techniques of text mining; practice of using statistical tools to automatically extract meaning and patterns from collections of text documents; topics include document representation, text classification and clustering, sentiment analysis and topic modeling. Prerequisites: (MSCI:6060 or MSCI:9060 or MSCI:6040 or BAIS:6060 or BAIS:9060 or BAIS:6040) and (MSCI:6070 or MSCI:9110 or BAIS:6070 or BAIS:9110).
- BAIS:6105 Social Analytics** 3 s.h.
Exploration of collection, management, and analysis of social data (interactions among actors); actors as individuals, organizations, or other collectives; sources for social data including social media, websites, annual reports, press releases, articles, and other traditional media. Prerequisites: MSCI:6060 or BAIS:6060 or MSCI:9060 or BAIS:9060.
- BAIS:6110 Big Data Management and Analytics** 3 s.h.
Introduction to advanced techniques for managing and analyzing big data; non-relational data models, such as semi-structured (XML) and unstructured (key-value) data; state-of-the-art big data tools for non-relational data management, such as NoSQL databases and distributed databases (Hadoop); query languages such as Hive; design and implementation of data analysis methods on these platforms; students use introduced tools to implement analysis tasks on big data sets through exercises and course projects. Prerequisites: (MSCI:6050 or MSCI:9050 or BAIS:6050 or BAIS:9050) and (MSCI:6060 or MSCI:9060 or MSCI:6040 or BAIS:6060 or BAIS:9060 or BAIS:6040).
- BAIS:6120 Analytics Experience** 3 s.h.
Students work in groups to complete semester-long projects pertaining to business analytics; all project stages are addressed including problem definition, data cleaning, analysis, and final presentation; appropriate tools from required courses used throughout. Prerequisites: (MSCI:9100 or BAIS:9100) and (MSCI:6050 or BAIS:6050) and (MSCI:9110 or BAIS:9110) and (MSCI:6060 or MSCI:6040 or BAIS:6060 or BAIS:6040) and (MSCI:6070 or BAIS:6070). Requirements: all CER courses and at least one master's course.
- BAIS:6130 Applied Optimization** 3 s.h.
Use of optimization (also called prescriptive analytics or mathematical programming) to make tactical and strategic decisions; advanced optimization skills including data collection and preparation, logical modeling, and solution interpretation and implementation within a software environment; applications in the various functional areas of business are discussed throughout. Prerequisites: (MSCI:9100 or BAIS:9100 or MBA:8150) and (MSCI:9060 or MSCI:6060 or MSCI:6040 or BAIS:9060 or BAIS:6060 or BAIS:6040).
- BAIS:6140 Information Visualization** 3 s.h.
Exposure to problems and challenges of effectively interpreting and communicating the pervasive data that surround us; students cover the area of information visualization, grounded in theoretical foundations of visual perception, cognition, information design, human-computer interaction, and analysis of quantitative, unstructured, and relational data; lecture/seminar format with discussion of assigned readings, critiquing visualization examples, hands-on experience with a commercial information visualization application, and exploration of select open-source information visualization tools and toolkits.
- BAIS:6150 Financial Analytics** 3 s.h.
Businesses as well as investors are affected by fluctuating treasury bond rates, equity prices, and foreign exchange rates, and the risk must be measured; students focus on gaining knowledge of the classic financial models and statistical and risk metrics and scaling them up with analytics techniques (sorting with thresholds, portfolio optimization, decision trees, and database programming) to find the best investments based on historical data sets; beginning with descriptive analytics and pushing into predictive and prescriptive analytics, students build a software simulation laboratory using R. Prerequisites: (MSCI:9100 or BAIS:9100 or MBA:8150) and (MSCI:6060 or MSCI:6060 or MSCI:6040 or BAIS:6060 or BAIS:9060 or BAIS:6040).

- BAIS:6160 Big Data Analytics** **3 s.h.**
Principles of data mining and machine learning in the context of big data; basic data mining principles and methods (pattern discovery, clustering and ordering); analysis of different types of data (sets and sequences); machine learning topics including supervised and unsupervised learning, tuning model complexity, dimensionality reduction, nonparametric methods, comparing and combining algorithms, and applications of these methods; development of analytical techniques to cope with challenging and real big data problems; introduction to graphics processing unit (GPU) computing tools. Prerequisites: (MSCI:9100 or BAIS:9100 or MBA:8150) and (MSCI:6060 or MSCI:9060 or BAIS:6060 or BAIS:9060).
- BAIS:6170 Directed Readings - Graduate Business Analytics** **arr.**
Project and/or research with a faculty member as part of the graduate business analytics program. Requirements: enrollment in graduate business analytics program.
- BAIS:6180 Healthcare Analytics** **3 s.h.**
Clinical data management is essential for evaluating evidence-based practice/performance-improvement projects; a high quality data management plan provides key stakeholders with information necessary to make decisions; plan components include identified processes and outcomes linked to variables and data sources, adequate statistical power, data cleaning and manipulation techniques, statistical methods, and meaningful presentation of variables that address stakeholder concerns and questions; students gain knowledge and skills necessary to develop and execute a data management plan within a final project. Prerequisites: (MSCI:9100 or BAIS:9100 or MBA:8150) and (MSCI:6050 or BAIS:6050).
- BAIS:6190 Forecasting** **3 s.h.**
Forecasting plays a central role in business decision making, and accurate forecasts are needed when making decisions about investments, resource allocations, schedules, and inventory levels; quantitative forecasting tools; extrapolation of time series data (e.g., daily, weekly, monthly sales); exponential smoothing methods; time series extrapolations from autoregressive and autoregressive integrated moving average (ARIMA) Box-Jenkins models; regression models that predict a variable of interest from its own history as well as any other available information (e.g., sales promotions, price reductions); methods for assessing performance of forecasting methods. Prerequisites: MBA:8150 or MSCI:9100 or BAIS:9100.
- BAIS:6210 Data Leadership and Management** **3 s.h.**
Core chief information officer (CIO) basics; focus on how to keep technology, systems, and procedures supporting business goal outcomes including management of information technology (IT) teams, systems selection, vendor negotiation, change, information risk, data integrity, ethics, information system (IS) policies, strategies, cloud computing, and budget.
- BAIS:6220 Business Analytics Certification Workshop** **0-3 s.h.**
Preparation for one or more industry certifications in the field of business analytics; certification varies based on timing of course and current trends in business analytics; several options include certifications related to programming languages (e.g., Python, R, SQL), analytics tools (e.g., Tableau, PowerBI), or general professional skills certifications (e.g., Associate Certified Analytics Professional, Certified Associate in Project Management).
- BAIS:6300 Dynamic Programming** **3 s.h.**
Fundamentals of discrete sequential dynamic programming with special focus on situations in which outcomes are uncertain; formulation and analysis of deterministic and stochastic dynamic programs under several objective criteria; emphasis on rapidly expanding field of approximate dynamic programming; applications including inventory control, vehicle routing, and resource allocation.
- BAIS:6480 Knowledge Discovery** **3 s.h.**
Knowledge discovery process including data reduction, cleansing, and transformation; advanced modeling techniques from classification, prediction, clustering, and association; evaluation and integration. Same as IGPI:6480.
- BAIS:6500 Social Network Analytics: Models and Algorithms** **3 s.h.**
Preparation for future research in computational network analysis; introduction to methodology for analyzing various types of complex networks including social networks, information networks, and business networks; basic concepts of networks, models for network structures and dynamics, computational algorithms for analyzing networks; hands-on experience with analyzing real-world networks using third-party software or programming APIs.
- BAIS:6600 Linear Programming** **3 s.h.**
Mathematical programming models; linear and integer programming, transportation models, large-scale linear programming, network flow models, convex separable programming. Requirements: calculus and linear algebra. Same as IGPI:6600, ISE:6600.
- BAIS:6700 Discrete Optimization** **3 s.h.**
Introduction to modeling and solving discrete optimization problems; integer programming, network flows, dynamic programming. Prerequisites: MSCI:6600 or BAIS:6600. Same as IGPI:6700.
- BAIS:6900 Heuristic Search** **3 s.h.**
Design of heuristic search algorithms to find good (near-optimal) solutions to difficult (NP-hard) optimization problems that occur in many disciplines; basic heuristic concepts (local search, greedy search, problem decomposition) which serve as fundamental constructs for metaheuristics, including simulated annealing, genetic algorithms, tabu search, variable neighborhood search; introduction to various optimization problems and survey of various heuristic approaches; underlying theoretical structure of several heuristic methods; how to implement a heuristic algorithm.
- BAIS:6999 Graduation Registration Requirement** **1 s.h.**
Requirements: professional business analytics M.S. degree candidate in final semester and all mandatory courses completed.
- BAIS:7000 Business Analytics Topics** **3 s.h.**
Same as IGPI:7000.
- BAIS:7900 Special Topics in Business Analytics** **arr.**
- BAIS:7950 Directed Readings** **arr.**
- BAIS:7975 Thesis in Business Analytics** **arr.**
Requirements: Ph.D. enrollment.
- BAIS:9010 Contemporary Topics in Analytics** **1-3 s.h.**
Content from cutting edge topics in business analytics, operations, and project management; topics vary.

BAIS:9050 Data Management and Visual Analytics 3 s.h.

Understanding how data is stored in databases and learning the tools used to access the data is key to creating data sets to answer many business questions; how to manage and access data in relational databases using Structured Query Language (SQL); basic principles of visual analytics and techniques for presenting data retrieved from databases.

BAIS:9060 Data Programming in R 2-3 s.h.

Introduction to principles and practices of handling, cleaning, processing, and visualizing data using R programming language; basic programming skills that can be applied to software development in any programming language; includes topics such as variables and data types, control structures, functions and subroutines, arrays and other simple data structures. Prerequisites: MBA:8150 or MSCI:9100 or BAIS:9100.

BAIS:9070 Data Science 2 s.h.

Underlying concepts and practical computational skills of data-mining tools including penalty-based variable selection (LASSO), logistic regression, regression and classification trees, clustering methods, principal components and partial least squares; analysis of text and network data; theory behind most useful data mining tools and how to use these tools in real-world situations; software for analysis, exploration, and simplification of large high-dimensional data sets. Prerequisites: MBA:8150 or MSCI:9100 or BAIS:9100.

BAIS:9080 Business Analytics in Practice 3 s.h.

Application of theory from classroom to real world context through an experiential learning project; company-sponsored project applying analytics to solve problems in a variety of contexts; including supply chain and operations, marketing, finance, or health care. Prerequisites: (MSCI:6050 or BAIS:6050) and (MSCI:6060 or BAIS:6060) and (MSCI:6070 or BAIS:6070).

BAIS:9100 Data and Decisions 3 s.h.

Introduction to analytical techniques for making business decisions; utilizing Excel for application of descriptive and predictive analytical tools to solve practical business problems using real world data; dealing with uncertainty in decision making; formal probability concepts and statistical methods for describing variability (decision trees, random variables, hypothesis testing); application of techniques (linear regression, Monte Carlo simulation, linear optimization) to model, explain, and predict for operational, tactical, and strategic decisions.

BAIS:9110 Advanced Analytics 2-3 s.h.

Development of data-driven, problem-solving skills for prediction of uncertain outcomes and prescription of business solutions; linear and nonlinear regression, Monte Carlo simulation, forecasting, data mining, and optimization utilizing spreadsheets and dedicated software packages. Prerequisites: MBA:8150 or MSCI:9100 or BAIS:9100.

BAIS:9120 Managing the Supply Chain 2-3 s.h.

Design, operation, and management of a supply chain; supplier and customer partnerships, supply base management, transportation and logistics, supply chain innovation, supply chain sustainability; supply chain risk management and performance metrics. Prerequisites: MBA:8190 or MBA:8240.

BAIS:9130 Lean Process Improvement 3 s.h.

Design, management, and improvement of business processes which form the basis of every organization, ranging from manufacturing facilities to service providers and from for-profits to nonprofits; students learn the principles of lean thinking and continuous improvement through a series of hands-on exercises; team-based, data-driven approach on how to map a value stream, identify waste, analyze root causes, and brainstorm countermeasures for a variety of different processes. Prerequisites: MBA:8240.

BAIS:9140 Agile Project Management 3 s.h.

Students prepare to create or participate in a successful agile work environment; learn various agile methods (e.g., scrum, lean, Kanban, XP); understand and apply tools, techniques, and approaches in an agile setting; and how to apply advanced agile topics (e.g., story mapping, advanced planning and estimating, scaling methods).

BAIS:9160 Supply Chain Analytics 2-3 s.h.

Supply chain analytics applications for decision making, including demand forecasting, inventory management, capacity planning, and supply chain coordination. Prerequisites: MBA:8150 or MSCI:9100 or BAIS:9100.

BAIS:9200 Computational Thinking 3 s.h.

Introduction to algorithms, data structures, and object-oriented programming constructs to solve business problems. Corequisites: MSCI:3005 or BAIS:3005.

BAIS:9210 Introduction to Modeling with VBA 2-3 s.h.

Introduction to programming Visual Basic for Applications in Excel; case studies in finance, marketing, operations, accounting.

BAIS:9220 Introduction to Information Systems 3 s.h.

Effective ways for business firms to harness the power of information technology for strategic purposes; conventional and emerging architectures of information systems; integrated perspective on structural relationships among IT components; emphasis on case studies.

BAIS:9400 Professional Development and Business Acumen 0-3 s.h.

Professional development and business acumen in preparation for a postgraduate career; students explore how to grow a professional network, examine how to build depth of knowledge and breadth of business acumen, gain knowledge from industry professionals on current trends and activities in business analytics, and receive guidance and best practices on career management fundamentals as well as specific recommendations for business analytics students; exposure to relevant information important to student's major that does not clearly fit into academic coursework. Requirements: admission to M.S. in business analytics (career) program.

Business Analytics and Information Systems, B.B.A.

Requirements

The Bachelor of Business Administration with a major in business analytics and information systems requires a minimum of 120 s.h., including 22 s.h. of work for the major. Students must have a cumulative g.p.a. of at least 2.00 in all college coursework attempted, all college coursework attempted in business, all college coursework attempted in the major, all coursework attempted at the University of Iowa, all business coursework attempted at the University of Iowa, and all coursework in the major attempted at the University of Iowa.

The program provides a variety of educational experiences that develop students' knowledge of managerial decision-making systems. Students acquire skill in applying this knowledge by constructing quantitative models, using computer technology, and creating database systems.

Students choose one of two tracks: business analytics or information systems.

The B.B.A. with a major in business analytics and information systems requires the following coursework. For common B.B.A. requirements, see the Bachelor of Business Administration [p. 1130] in the Catalog.

Code	Title	Hours
	Major Common Required Courses	7
	Required Track Courses	12
	Required Electives	3
	Total Hours	22

Major Common Required Courses

Students in both tracks must complete these three courses.

Code	Title	Hours
BAIS:3020	Computational Thinking	3
BAIS:3050	Business Analytics and Information Systems Professional Preparation	1
BAIS:3200	Database Management	3

Required Track Courses

Students complete the requirements from one of the two tracks below.

Business Analytics Track

Students in the business analytics track complete all of the following.

Code	Title	Hours
BAIS:3250	Data Wrangling	3
BAIS:3500	Data Mining	3
BAIS:3800	Optimization and Simulation Modeling	3
BAIS:4150	Business Analytics Capstone	3

Information Systems Track

Students in the information systems track complete all of the following.

Code	Title	Hours
BAIS:3120	Application Development	3
BAIS:3300	Software Design	3
BAIS:3400	Data Communications	3
BAIS:4350	Information Systems Capstone	3

Required Electives (Both Tracks)

All students complete at least 3 s.h. from the following.

Code	Title	Hours
BAIS:3025	VBA Spreadsheet Programming	3
BAIS:3030	Business Process Analysis	3
BAIS:3100	Accounting Information Systems	3
BAIS:3140	Information Visualization	3
BAIS:3920	Supply Chain Management	3
BAIS:4220	Advanced Database Management and Big Data	3
BAIS:4280	Data Security	3
CS:1210	Computer Science I: Fundamentals	4
ECON:3355	Economic and Business Forecasting	3
MKTG:3102	Marketing Analytics	3
	Any computer science course for which CS:1210 is a prerequisite	3-4
	Any course required for the nonselected track	3

Academic Plans

Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Business Analytics and Information Systems, B.B.A.

- Business Analytics Track [p. 1144]
- Information Systems Track [p. 1146]

Business Analytics Track

Course	Title	Hours
Academic Career		
Any Semester		

Students are required to complete 52 s.h. of non-business coursework. Courses with a prefix of ACCT, BAIS, BUS, ECON, ENTR, FIN, MGMT, MSCI, and MKTG will not count towards non-business hours. Check degree audit for non-business hours or confer with academic advisor.

To fulfill the Tippie RISE experiential learning requirement, complete an approved course in at least one of the following categories: research with faculty, internship course, study abroad, experiential course.^a

Students who need to complete the World Language requirement should consult with their academic advisor about when to add courses to plan of study. World Language counts as non-business coursework.

Students must satisfy the Tippie College of Business residence requirement: 45 s.h. of UI coursework after admission to Tippie.

Completion of BAIS:2800 Foundations of Business Analytics, BAIS:3000 Operations Management, and BAIS:3005 Information Systems by the end of the second year or no later than the first semester of the third year is essential for major course sequencing.

Hours 0-3

First Year

Fall

MATH:1350	Quantitative Reasoning for Business ^b	4
RHET:1030	Rhetoric	4
GE: Historical Perspectives ^c		3
GE: Social Sciences ^c		3
CSI:1600	Success at Iowa	2
Hours		16

Spring

STAT:1030	Statistics for Business	4
ECON:1100	Principles of Microeconomics	4
BAIS:1500	Business Computing Essentials	2
ENGL:1200	The Interpretation of Literature	3
GE: Diversity and Inclusion or GE: Values and Culture ^c		3
Hours		16

Second Year

Fall

ACCT:2100	Introduction to Financial Accounting	3
ECON:1200	Principles of Macroeconomics	4
BAIS:3000	Operations Management	2
BAIS:3005	Information Systems	2
BUS:2200	Foundations for Success in Business ^d	1
GE: Natural Sciences without Lab ^c		3
Hours		15

Spring

BAIS:3050	Business Analytics and Information Systems Professional Preparation	1
BUS:3000	Business Communication and Protocol ^e	3
BAIS:2800	Foundations of Business Analytics	3
MGMT:2100	Introduction to Management	3
GE: International and Global Issues ^c		3
Minor, certificate, or non-business elective		3
Hours		16

0 - 3

Third Year

Fall

ACCT:2200	Managerial Accounting	3
MGMT:2000	Introduction to Law	3
BAIS:3200	Database Management	3
Minor, certificate, or non-business elective		3
Minor, certificate, or non-business elective		3
Hours		15

Spring

BAIS:3020	Computational Thinking	3
Major: BAIS elective course ^f		3
FIN:3000	Introductory Financial Management	3
Minor, certificate, or non-business elective		3
Minor, certificate, or non-business elective		3
Minor, certificate, or non-business elective		1
Hours		16

Fourth Year

Fall

BAIS:3250	Data Wrangling	3
BAIS:3500	Data Mining	3
MKTG:3000	Introduction to Marketing Strategy	3
Minor, certificate, or non-business elective		3
Minor, certificate, or non-business elective		1
Hours		13

Spring

BAIS:4150	Business Analytics Capstone ^g	3
BAIS:3800	Optimization and Simulation Modeling	3
Minor, certificate, or non-business elective		3
Minor, certificate, or non-business elective		3
Minor, certificate, or non-business elective		1
Degree Application: apply on MyUI before deadline (typically in February for spring, September for fall) ^h		
Hours		13

Total Hours 120-123

a See degree audit for course options.

b Enrollment in math courses requires completion of a placement exam.

c GE courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.

d Complete BUS:2200 by the end of the second year, before enrolling in BAIS:3050.

e BUS:3000 should be taken the first semester after admission to the Tippie College of Business; may be deferred one semester. Direct admits take BUS:3000 in their second year.

f Select from list of approved courses in the General Catalog or on degree audit.

g Students should consider in their planning that ACCT:2200, BAIS:3250, BAIS:3500, and BUS:3000 are prerequisites for the capstone course.

h Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>

Career Advancement

The business analytics and information systems major prepares students for careers in data mining, supply chain management, and the design and management of information technology. The major prepares students for career opportunities in both manufacturing and service organizations. Graduates find entry-level work as computer programmers, systems analysts, sales representatives with computer companies, and management trainees. Entry-level work in operations management is found in materials management, line supervision, purchasing, and manufacturing systems.

Over 90 percent of students reported that they found permanent employment, were accepted to graduate school, or were not seeking employment within six months of graduation.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs. For more information about careers, visit the Pomerantz Career Center website.

Business Analytics (career), M.S.

Businesses of all sizes are creating and storing more data than ever before according to IBM—2.5 quintillion bytes per day. Businesses are swimming in data, but often lack the talent and expertise to use it effectively for making decisions, revealing insights, and making predictions. Business analytics experts are changing that. The full-time Master of Science program in business analytics puts students on the leading edge of a burgeoning industry hungry for top notch talent.

Students learn the skills and techniques necessary to turn raw data into actionable insights. Descriptive and diagnostic analytics are just starting points in the program. The skills learned develop students into decision-makers and data scientists adept at using predictive and prescriptive analytics to solve business problems.

The full-time program is located in Iowa City. The plan of study spans 16 months, and includes core courses, internships, and electives.

Requirements

The full-time Master of Science program in business analytics requires a minimum of 40 s.h. of graduate credit. Transfer credit may be accepted with approval from the program. A major g.p.a. and a cumulative g.p.a. of at least 2.75 is required in all coursework.

The M.S. with a major in business analytics requires the following coursework.

Code	Title	Hours
Core Courses		19
Experience Course/Project		3
Electives		18
Total Hours		40

Core Courses

Code	Title	Hours
All of these:		
BAIS:6050	Data Management and Visual Analytics	3
BAIS:6070	Data Science	3
BAIS:9100	Data and Decisions	3
BAIS:9110	Advanced Analytics	3
BAIS:9400	Professional Development and Business Acumen (taken fall and spring semester for 1 s.h. each)	2
MBA:8130	Business Communication (taken fall and spring semester for 1 s.h. each)	2
One of these:		
BAIS:6040	Data Programming in Python	3
BAIS:6060	Data Programming in R	3

Experience Course/Project

The experience course consists of a group project that solves a semester-long business problem.

Code	Title	Hours
This course:		
BAIS:6120	Analytics Experience	3

Electives

Elective coursework allows students to deepen or broaden their skills. Additional electives may be available for credit but must be preapproved.

Code	Title	Hours
18 s.h. from these:		
BAIS:4280	Data Security	3
BAIS:6040	Data Programming in Python (if not taken as core course)	3
BAIS:6060	Data Programming in R (if not taken as core course)	3
BAIS:6100	Text Analytics	3
BAIS:6105	Social Analytics	3
BAIS:6110	Big Data Management and Analytics	3
BAIS:6130	Applied Optimization	3

Combined Programs

M.S./M.S. in Finance

The combined Master of Science in business analytics (career subprogram)/Master of Science in finance allows students to pursue two degrees simultaneously, earning both more quickly than they would if the degrees were pursued separately. The Department of Business Analytics collaborates with the Department of Finance to offer the combined program.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined program. For more information, see the M.S. in finance [p. 1190] in the Catalog.

Admission

Applicants must meet the admission requirements of the Graduate College and of the program; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website and program requirements on the Full-Time Master of Business Analytics Admissions web page.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Business Analytics (career), M.S.

Course	Title	Hours
Academic Career		
Any Semester		
40 s.h. of graduate level coursework must be completed; up to 6 s.h. of graduate transfer credits allowed upon approval. More information is included in the General Catalog and on department website.		
Maintain at least a 2.75 cumulative and program GPA.		
		0

First Year

Any Semester

Meet with your Career Management coach and Professional Director.

Attend Career Management Center sessions offered.
Apply to and secure a summer internship or arrange a summer research project.

Hours 0

Fall

BAIS:6050 Data Management and Visual Analytics 3

BAIS:6040 Data Programming in Python 3
or BAIS:6060 or Data Programming in R

BAIS:9100 Data and Decisions 3

BAIS:9400 Professional Development and Business Acumen^b 1

Elective course^c 3

Arrange for the Career Management Center to review updated resume, then upload to Handshake.

Hours 13

Spring

BAIS:6070 Data Science 3

BAIS:9110 Advanced Analytics 3

BAIS:9400 Professional Development and Business Acumen^b 1

MBA:8130 Business Communication^d 1

Elective course^c 3

Elective course^c 3

Complete end of semester employment placement survey as requested by Career Management.

Hours 14

Summer

Internship: complete a summer internship^e

Research: complete a summer research project^e

Hours 0

Second Year

Any Semester

Meet with your Career Management coach and Professional Director.

Attend Career Management Center sessions offered.

Hours 0

Fall

BAIS:6120 Analytics Experience 3

MBA:8130 Business Communication^d 1

Elective course^c 3

Elective course^c 3

Elective course^c 3

Complete end of semester employment placement survey as requested by Career Management.

Verify completion of all degree requirements with program administrator.

Apply to and secure post-graduation employment.

Hours 13

Total Hours 40

d MBA:8130 is taken during both first year spring and second year fall for a total of 2 s.h.

e Choose between a summer internship or summer research project.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

b BAIS:9400 is taken during both fall and spring of the first year for a total of 2 s.h.

c Choose from a pre-approved elective list or contact academic advisor for consideration and approval of another course.

Business Analytics (professional), M.S.

The digital revolution empowered by the internet and computer technology in business and individual life during the last several decades has generated unimaginable amounts of data in the form of digital records stored in databases and file servers. The volume, velocity, and variety of these data have produced a new set of problems and challenges for businesses and organizations in their pursuit of competitiveness, effectiveness, and efficiency. These problems and challenges also have created unprecedented opportunities for businesses and organizations to discover, model, understand, and serve their customers and partners in ways never imagined and to supply details never possible before. Businesses and organizations that are able to master this volume of data will have a tremendous competitive advantage over their competition in the marketplace.

As the need for implementing data analytic solutions grows, demand for professionals who understand and are capable of working with and exploring this data has exploded in recent years. This program addresses the growing need to manage and analyze the rapidly increasing amount of data that is available to support business decision making.

The part-time program is located in Des Moines, Cedar Rapids, and the Quad Cities.

Requirements

The part-time Master of Science program in business analytics requires a minimum of 30 s.h. of graduate credit. Transfer credit may be accepted with approval from the program. Students who wish to include the 15 s.h. earned from the Certificate in Business Analytics toward the M.S. degree should seek approval from the program. A major and cumulative g.p.a. of at least 2.75 is required in all coursework.

The M.S. with a major in business analytics requires the following coursework.

Code	Title	Hours
	Core Courses	15
	Experience Course/Project	3
	Electives	12
	Total Hours	30

Some of these courses have prerequisites; students must complete all of a course's prerequisites before they may register for that course.

Core Courses

Code	Title	Hours
One of these:		
BAIS:6040	Data Programming in Python	3
BAIS:6060	Data Programming in R	3
All of these:		
BAIS:6050	Data Management and Visual Analytics	3
BAIS:6070	Data Science	3
BAIS:9100	Data and Decisions	3
BAIS:9110	Advanced Analytics	3

Experience Course/Project

The experience course consists of a group project that solves a semester-long business problem. Students should take this course after they have completed the core courses and one elective course.

Code	Title	Hours
This course:		
BAIS:6120	Analytics Experience	3

Electives

Elective coursework allows students to deepen or broaden their skills.

Code	Title	Hours
12 s.h. from these:		
BAIS:6040	Data Programming in Python (if not taken as a core course)	3
BAIS:6060	Data Programming in R (if not taken as a core course)	3
BAIS:6100	Text Analytics	3
BAIS:6105	Social Analytics	3
BAIS:6110	Big Data Management and Analytics	3
BAIS:6130	Applied Optimization	3
BAIS:6140	Information Visualization	3
BAIS:6150	Financial Analytics	3
BAIS:6180	Healthcare Analytics	3
BAIS:6190	Forecasting	3
BAIS:6210	Data Leadership and Management	3
BAIS:9010	Contemporary Topics in Analytics	1-3
BAIS:9130	Lean Process Improvement	3
BAIS:9140	Agile Project Management	3
BAIS:9160	Supply Chain Analytics	3
MKTG:9165	Digital Marketing Analytics	3
6 s.h. of the total 12 s.h. in electives may be taken from these:		
ENTR:9000	Developing Professional Service Business	3
ENTR:9100	Entrepreneurship and Innovation	3
ENTR:9400	Evaluating Innovation Opportunities	3
ENTR:9450	Strategic Management of Technology and Innovation	3
ENTR:9500	Managing the Growth Business	3
ENTR:9700	Entrepreneurship: Business Consulting	3
FIN:9140	Enterprise Risk Management	3
FIN:9150	Financial Modeling and Firm Valuation	3
FIN:9240	International Finance	3
FIN:9300	Corporate Investment and Financing Decisions	3
FIN:9310	Corporate Financial Strategy	3
MBA:8110	Marketing Management	3

MBA:8140	Corporate Financial Reporting	3
MBA:8180	Managerial Finance	3
MBA:8240	Operations and Supply Chain	3
MGMT:9185	Project Management	3
MKTG:9120	Customer Relationship Management	3
MKTG:9170	Business to Business Marketing	3
MKTG:9190	International Marketing	3
MKTG:9300	Applied Marketing Research	3
MKTG:9340	Customer Analysis	3

Combined Programs

M.S./M.B.A. (Professional Program)

The combined Master of Science in business analytics (professional subprogram)/Professional Master of Business Administration Program allows students to pursue two degrees simultaneously, earning both more quickly than they would if the degrees were pursued separately. The Department of Business Analytics collaborates with the Master of Business Administration Program to offer a combined M.S./M.B.A. degree.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For information about the M.B.A., see the M.B.A. Professional Program in the Master of Business Administration [p. 1227] section of the Catalog.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Doctor of Philosophy

Graduate students in business analytics may earn a Doctor of Philosophy in business administration. For a description of the Ph.D. program and requirements, see the Ph.D. in business administration [p. 1156] in the Catalog and visit the Department of Business Analytics website.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Business Analytics, Graduate Certificate

Analytics—broadly defined as the scientific process of transforming data into insight for making better decisions—plays an increasingly critical role in business. Companies must be able to access and analyze this data intelligently. As the recognition of analytics has grown, so has the demand for analytics education.

The focus on business analytics entails a specific approach targeting the core business disciplines of business, including operations, information technology, finance, marketing, accounting, and human resources, among others.

Requirements

The graduate Certificate in Business Analytics requires 15 s.h. of credit. Students may be allowed to apply up to 6 s.h. of coursework from another institution toward the certificate with approval by petition to the director of the certificate program. A major g.p.a. and cumulative g.p.a. of at least 2.75 is required in order to complete the certificate. All courses are offered off campus.

The certificate program is open to students who have earned an undergraduate degree. A minimum undergraduate or graduate g.p.a. of 2.50 is required for admission.

The Certificate in Business Analytics requires the following coursework.

Code	Title	Hours
One of these:		
BAIS:6040	Data Programming in Python	3
BAIS:6060	Data Programming in R	3
All of these:		
BAIS:6050	Data Management and Visual Analytics	3
BAIS:6070	Data Science	3
BAIS:9100	Data and Decisions	3
BAIS:9110	Advanced Analytics	3

Doctor of Philosophy

Graduate degrees: M.A. in business administration; Ph.D. in business administration

Website: <https://tippie.uiowa.edu/future-graduate-students/phd-programs>

The Doctor of Philosophy program in business administration is an interdepartmental degree open to students in several Tippie College of Business departments. Basic requirements for the degree are detailed under "Requirements" in the Ph.D. in business administration [p. 1156] section of the Catalog. For additional information, see graduate programs in the accounting [p. 1115], business analytics [p. 1139], finance [p. 1184], management and entrepreneurship [p. 1204], and marketing [p. 1214] sections of the Catalog.

The Tippie College of Business also offers a Doctor of Philosophy in economics; see Economics [p. 1157] in the Catalog.

Programs

Graduate Programs of Study

Majors

- Master of Arts in Business Administration

The M.A. in business administration is a terminal degree; students are admitted into the Ph.D. in business administration degree program.

- Doctor of Philosophy in Business Administration [p. 1156]

Business Administration, Ph.D.

Requirements

The Doctor of Philosophy program in business administration requires a minimum of 72 s.h., including approved transfer credit. The program is flexible, permitting students to choose a specialization area according to their interests. Coursework and related experience enable students to achieve competence in economic theory, statistical methods, and behavioral science as well as expertise in a major and minor study area. Students also have opportunities to develop research and teaching skills.

Ph.D. coursework consists of prerequisites (as necessary), the Ph.D. core, major and minor study areas, and dissertation research, described in brief below. For more detailed information about Ph.D. requirements, contact the individual Tippie College of Business departments or visit their websites.

Core Courses

Core courses develop research competence and provide background for specialized study. Doctoral students consult with their advisors to develop a study plan that reflects the individual student's background and interests and satisfies core requirements.

Major Study Area

At least 12 s.h. of approved doctoral-level courses must be completed in one of the following areas: accounting, finance, human resource management, management information systems, marketing, operations management, organizational behavior, or quantitative methods.

Minor Study Area

Students must complete a minimum of 9 s.h. of doctoral-level courses beyond the Ph.D. core course requirements in one of the major study areas listed above or in a concentration outside the Tippie College of Business.

Comprehensive Examinations

Students must satisfactorily complete a comprehensive examination, consisting of written or oral parts or both, at the discretion of their major department.

Dissertation

Students must present a dissertation proposal at a forum attended by dissertation committee members and open to interested faculty members and graduate students, as established by the student's major department. Researching and writing the dissertation typically require two years of full-time effort.

Final Examination

Ph.D. candidates defend the dissertation in an oral examination attended by dissertation committee members and open to interested faculty members and graduate students.

Admission

Applicants to the Ph.D. program in business administration must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Applicants must take the Graduate Record Examination (GRE) General Test or the Graduate Management Admission Test (GMAT) and have their scores sent to the University in order to be considered for admission. The Departments of Business Analytics, Finance, Management and Entrepreneurship, and Marketing accept test scores for either the GRE or GMAT. The Department of Accounting accepts only GMAT scores. Required scores on these tests and their weight in admission decisions vary by department.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) test and have their scores sent to the University of Iowa. An IELTS total score of at least 7.0 with no subscore below 6.0 satisfies the English language requirement. Applicants who use the IELTS test are required to take the on-campus English Proficiency Evaluation.

Admission is for fall entry. Completed applications should be submitted as early as possible and no later than the following deadlines.

Accounting: January 15

Business Analytics: January 15

Finance: January 15

Management and Entrepreneurship: January 15

Marketing: January 15

Visit Ph.D. Programs on the Tippie College of Business website to learn more.

Career Advancement

The Doctor of Philosophy program prepares students for research positions in business and government or for research and teaching positions at academic institutions.

Economics

Interim Chair

- Barrett W. Thomas

Undergraduate major: economics (B.A., B.S., B.B.A.)

Undergraduate minor: economics

Graduate degrees: M.A. in economics; Ph.D. in economics

Faculty: <https://tippie.uiowa.edu/people?department=Economics>

Website: <https://tippie.uiowa.edu/economics>

Economics is the study of how societies allocate limited resources to achieve competing ends. Using both empirical and deductive methods, economists analyze incentives, constraints, organizational forms, and market forces to understand patterns of production, exchange, and consumption of goods and services. Economics treats diverse issues such as wealth and poverty, government expenditures and taxation, prosperity and depression, inflation and unemployment, relations between management and labor, economic growth, environmental protection, health care delivery, the war on drug abuse, free trade versus protectionism, U.S. competitiveness in international markets, and the quality of American education.

The Department of Economics offers degree programs for undergraduates and for graduate students. It also partners with the Departments of Philosophy, Political Science, and Sociology and Criminology to offer the undergraduate major in ethics and public policy, an interdisciplinary program administered by the Department of Philosophy (College of Liberal Arts and Sciences); see Ethics and Public Policy [p. 472] in the Catalog.

Special Seminar

Each year, the Department of Economics offers a seminar program that brings eminent economists from other universities and from government agencies to the University of Iowa campus. Presentations by department faculty members and students also are featured.

Courses for Nonmajors

Students in the College of Liberal Arts and Sciences may wish to use economics courses as part of other majors or the GE CLAS Core [p. 20]. The introductory courses ECON:1100 Principles of Microeconomics and ECON:1200 Principles of Macroeconomics are approved for the Social Sciences area of the GE CLAS Core; they introduce the field of economics and the specialized topics of upper-division courses. The intermediate theory courses ECON:3100 Intermediate Microeconomics and ECON:3150 Intermediate Macroeconomics provide a deeper foundation in the core theories and methods of the discipline. They serve as preparation for upper-division field courses or as terminal courses in an economics plan of study.

Coursework in economics relates to majors in many other fields. For example, political science majors could select ECON:3650 Policy Analysis; international studies majors, ECON:3345 Global Economics and Business; environmental policy and planning majors, ECON:3625 Environmental and Natural Resource Economics; pre-law students, ECON:3800 Law and Economics; and statistics majors, ECON:4800 Econometric Analysis.

Related Certificate

Transportation Studies

The Transportation Studies Program offers the Certificate in Transportation Studies. The program focuses on the varied and complex problems of transportation and on interdisciplinary approaches to addressing them. The Departments of Civil and Environmental Engineering, Industrial and Systems Engineering, Mechanical Engineering (College of Engineering), Economics (Tippie College of Business), and the School of Planning and Public Affairs (Graduate College) participate in the program.

The certificate is coordinated by the School of Planning and Public Affairs. See the Certificate in Transportation Studies [p. 1632] (Graduate College) in the Catalog.

Programs

Undergraduate Programs of Study

Majors

- Major in Economics (Bachelor of Arts) [p. 1161]
- Major in Economics (Bachelor of Science) [p. 1165]
- Major in Economics (Bachelor of Business Administration) [p. 1170]

Minor

- Minor in Economics [p. 1175]

Graduate Programs of Study

Majors

- Master of Arts in Economics [p. 1176]
- Doctor of Philosophy in Economics [p. 1177]

Courses

Students may take ECON:1100 Principles of Microeconomics and ECON:1200 Principles of Macroeconomics in either order or simultaneously. They are approved for the Social Sciences area of the College of Liberal Arts and Sciences GE CLAS Core [p. 20].

Qualified undergraduates may enroll in graduate-level courses with consent of the department chair.

Economics Courses

ECON:1100 Principles of Microeconomics **4 s.h.**
Organization, workings of modern economic systems; role of markets, prices, competition in efficient allocation of resources and promotion of economic welfare; international trade. Requirements: B.B.A. students cannot use this course for GE CLAS Core Social Sciences. GE: Social Sciences.

ECON:1200 Principles of Macroeconomics **4 s.h.**
National income and output, unemployment, and inflation; economic growth and development; money and credit; monetary and fiscal policy; government finance; international finance. Requirements: B.B.A. students cannot use this course for GE CLAS Core Social Sciences. GE: Social Sciences.

- ECON:1300 First-Year Seminar** 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).
- ECON:3100 Intermediate Microeconomics** 3 s.h.
Economic theory of the behavior of consumers, producers, and other economic agents; role of markets in coordinating economic activity; effects of government policies on market outcomes; conditions that markets require for efficient allocation of resources; market imperfections; strategic behavior of economic actors. Prerequisites: ECON:1100 and (MATH:1380 or MATH:1460 or MATH:1550 or MATH:1850 or MATH:1860).
- ECON:3150 Intermediate Macroeconomics** 3 s.h.
Measurement of macroeconomic indicators; economic growth and business cycles; use of macroeconomic models to study the role of government fiscal and monetary policies. Prerequisites: ECON:1200 and (MATH:1380 or MATH:1460 or MATH:1550 or MATH:1850 or MATH:1860).
- ECON:3300 Introduction to Econometrics** 3 s.h.
Statistical tools used in economic analysis; regression models; estimation and hypothesis testing; causal effects; application to economic data and questions; use of statistical software. Prerequisites: STAT:1030 and (MATH:1380 or MATH:1460 or MATH:1550 or MATH:1850 or MATH:1860).
- ECON:3325 Personnel Economics** 3 s.h.
Microeconomic analysis of labor markets with special emphasis on strategic personnel choices of the firm; labor supply decisions made by workers; labor demand decisions made by firms; labor market equilibrium; returns to education; hiring, job design, evaluation, and compensation. Prerequisites: ECON:1100.
- ECON:3335 Money, Banking, and Financial Markets** 3 s.h.
Role of money and financial institutions in determining domestic and international income, employment, and prices. Prerequisites: ECON:1100 and ECON:1200.
- ECON:3345 Global Economics and Business** 3 s.h.
Modern theories of international trade and investment; impact of tariffs and other restrictions on international trade; effects of export and production subsidies; free trade agreements; exchange rates and foreign exchange markets; international monetary arrangements; balance of payments; international economic policy. Prerequisites: ECON:1100 and ECON:1200.
- ECON:3350 Industry Analysis** 3 s.h.
Structural evolution; imperfect competition; resource allocation; development of public policy on monopoly; selected industries. Prerequisites: ECON:1100.
- ECON:3355 Economic and Business Forecasting** 3 s.h.
Development and utilization of forecasts of business and economic variables; application of modern statistical methods and software to quantitative forecasting problems. Prerequisites: ECON:1100 and ECON:1200 and (ECON:3300 or ECON:4800 or STAT:3200).
- ECON:3380 Business and Government** 3 s.h.
Examination of relationship between government, private sector, and citizenry; legal, regulatory, market, and civic context in which private sector functions; how business owners and entrepreneurs have shaped political and economic outcomes in the United States; central theme of exploring and understanding the nature of government policy, how policy affects businesses, and how policy affects societal welfare. Prerequisites: ECON:1100.
- ECON:3620 Economic Growth and Development** 3 s.h.
Determinants of rising living standards; accumulation of physical and human capital; predictions of economic growth models compared to observed changes in living standards. Prerequisites: ECON:1100 and ECON:1200.
- ECON:3625 Environmental and Natural Resource Economics** 3 s.h.
Environmental and resource use problems; efficient mechanisms and other policies for environmental protection, management of common property resources. Prerequisites: ECON:1100. Same as URP:3135.
- ECON:3640 Regional and Urban Economics** 3 s.h.
Theory of location and regional development; central place theory; why cities exist and trade with one another; models of land use patterns, rents; empirical tests of models; policy applications. Prerequisites: ECON:1100. Same as URP:3134.
- ECON:3650 Policy Analysis** 3 s.h.
Economic functions of government in modern economies; effects of government expenditures and taxation on allocation of resources. Prerequisites: ECON:1100.
- ECON:3690 Sports Economics** 3 s.h.
Theory and literature of economic issues in professional sports; issues such as relative advantages of large- and small-market teams, city subsidies for baseball and football stadiums, star players' true value to their teams; ideas from introductory economics (such as demand and cost curves) combined with additional economic theory, statistical evidence, and information about particular sports. Prerequisites: ECON:1100.
- ECON:3750 Transportation Economics** 3 s.h.
Overview of transportation markets—intercity, rural, urban; transportation modes—rail, highway, air, water, pipeline, transit; issues in finance, policy, planning, management, physical distribution, and environmental, economic, and safety regulation. Recommendations: ECON:1100 and ECON:1200. Same as GEOG:3940, URP:3350.
- ECON:3760 Health Economics** 3 s.h.
Externalities and health behaviors; government influence on health behaviors; overview of health insurance and health insurance markets; health care costs; public health insurance; health insurance reforms. Prerequisites: ECON:1100.
- ECON:3770 Urban Transportation** arr.
Transportation in the urban market; urban transport modes, technologies, costs, pricing, and ways to develop and analyze urban policy in order to promote city livability and sustainability; development of urban transportation and transport operations in the U.S. and worldwide; urban transport policies, plans, and policy development processes; major urban transportation issues, investigation of possible means of attacking urban transportation issues. Prerequisites: ECON:1100. Same as URP:3360.
- ECON:3800 Law and Economics** 3 s.h.
Law examined through analytic tools of microeconomics; impact of legal rules on resource allocation, risk bearing, distribution of economic well-being. Prerequisites: ECON:1100.
- ECON:3850 Behavioral Economics** 3 s.h.
Behavioral economics is a relatively new field that applies insights gleaned from psychology to economics; standard economic theory assumes people are all *homo economicus*: we know exactly how to maximize our own utility, and we do it well; behavioral economists seek to improve microeconomic theory with more realistic assumptions about human behavior. Prerequisites: ECON:1100.

- ECON:3870 Federal Reserve Challenge** 1 s.h.
Experience what Federal Reserve economists do every day; study the real U.S. economy, make forecasts and policy recommendations, defend their views to academic and professional economists; development of analytical skills, teamwork, how to build presentations. Prerequisites: ECON:3100 and ECON:3150.
- ECON:3875 Topics in Policy Economics** 3 s.h.
Topics vary. Prerequisites: ECON:1100 and ECON:1200.
- ECON:4050 Readings and Independent Study in Economics** arr.
- ECON:4090 Natural Resource Economics** 3 s.h.
Economics of natural resources; interaction between economic theory, empirical evidence, and public policy; land, water, fish, trees, minerals; externalities. Prerequisites: ECON:3100.
- ECON:4110 International Economics** 3 s.h.
Neoclassical model of international trade; imperfect competition and international trade and investment; role of trade barriers; regional trade agreements and the World Trade Organization. Prerequisites: ECON:3100 and ECON:3150.
- ECON:4140 Labor Economics** 3 s.h.
Labor supply and demand; investments in human capital; compensating wage differentials; discrimination; long-term contracts; occupational choice; family decisions; unions; immigration. Prerequisites: ECON:3100.
- ECON:4160 Public Sector Economics** 3 s.h.
Economic functions of government; social welfare programs; income distribution; policies that address market failures; budgetary processes; effects of government expenditures; taxation. Prerequisites: ECON:3100 and ECON:3150.
- ECON:4170 Monetary Economics** 3 s.h.
Demand for and supply of money; money's role in economy; empirical studies of money's impact; problems with monetary control. Prerequisites: ECON:3100 and ECON:3150.
- ECON:4180 Industrial Organization** 3 s.h.
Market structure; effects of business practices, informational problems on market structure; appraisal of antitrust policies, government regulation of business. Prerequisites: ECON:3100.
- ECON:4190 Mathematical Economics** 3 s.h.
Mathematical structure of economic principles, problems, systems; may include constrained optimization, choice under uncertainty, general equilibrium and welfare economics, dynamical systems and control theory, game theory. Prerequisites: ECON:3100 and ECON:3150.
- ECON:4200 Game Theory** 3 s.h.
Basic concepts of game theory including dominance, backward induction, Nash equilibrium, evolutionary stability, commitment, credibility, asymmetric information, adverse selection, signaling; provides students with a working understanding of game theory; examples drawn from economics and politics. Prerequisites: ECON:3100 and ECON:3150.
- ECON:4700 Topics in Analytical Economics** 3 s.h.
Topics vary. Prerequisites: ECON:3150 and ECON:3100.
- ECON:4800 Econometric Analysis** 3 s.h.
Linear regression models; causal effects; estimation and hypothesis testing; errors in variables; simultaneous equations; panel data; instrumental variables; limited dependent variables; emphasis on interpretation, methods, application of econometric modelling, and use of statistical software. Prerequisites: STAT:3101 or STAT:3120.
- ECON:4999 Honors Thesis in Economics** arr.
Independent research project supervised by economics faculty member; culminates in thesis required for honors in the major. Prerequisites: ECON:3100 and ECON:3150 and (ECON:3300 or ECON:4800).
- ECON:5000 Economic Analysis I** 3 s.h.
Basic metric topology, convex analysis, function spaces, measure theory and integration.
- ECON:5005 Real Analysis for Economics** 2 s.h.
Basic metric topology, convex analysis, function spaces, measure theory, and integration.
- ECON:5010 Economic Analysis II** 3 s.h.
Behavior under uncertainty, macroeconomic models; dynamic programming, asset pricing, saving, consumption.
- ECON:5015 Dynamic Programming** 2 s.h.
Finite- and infinite-horizon, discrete-time dynamic programming; discrete-time stochastic dynamic programming, including computational methods and some economic applications; continuous-time control theory.
- ECON:5100 Microeconomics I** 3 s.h.
Consumer choice theory, producer theory, choice under uncertainty, basic game theory. Offered fall semesters.
- ECON:5110 Microeconomics II** 3 s.h.
General equilibrium and welfare analysis, adverse selection, the principal-agent problem, social choice, mechanism design. Offered spring semesters. Prerequisites: ECON:5100.
- ECON:5115 Fundamentals of Microeconomics** 3 s.h.
Consumer theory, producer theory, partial equilibrium models, expected and nonexpected utility theory.
- ECON:5125 Game Theory** 2 s.h.
Noncooperative and cooperative games, games of perfect and imperfect information, matching games.
- ECON:5135 General Equilibrium** 2 s.h.
Walrasian equilibrium and its properties, welfare economics, general equilibrium and perfect competition, general equilibrium with externalities, general equilibrium under asymmetric information.
- ECON:5145 Information Economics** 2 s.h.
Markets with asymmetric information, allocation mechanisms, mechanism design.
- ECON:5200 Macroeconomics I** 3 s.h.
Economic growth, business cycles, money and inflation. Offered fall semesters.
- ECON:5210 Macroeconomics II** 3 s.h.
Dynamic macroeconomic models; stochastic macroeconomics; time consistency equilibrium business cycle theory. Offered spring semesters. Prerequisites: ECON:5200.
- ECON:5215 Fundamentals of Macroeconomics I** 2 s.h.
Infinite horizon endowment economies; neoclassical growth models and dynamic general equilibrium.
- ECON:5225 Fundamentals of Macroeconomics II** 2 s.h.
Real business cycle models; overlapping generations models.
- ECON:5235 Fiscal Policy and Insurance in Macroeconomics** 2 s.h.
Fiscal policies, optimal taxation, and endogenous growth; uncertainty and incomplete markets, limited commitment, private information.
- ECON:5245 Monetary Economics and Search Theory** 2 s.h.
Introduction to monetary and financial economics; search theory and applications to labor and money markets.

ECON:5800 Econometrics	3 s.h.	ECON:7000 Seminar in Economic Theory	arr.
Statistical inference in single and multiple equation stochastic models, models with nonindependent or nonidentically distributed error structure, dynamic models; OLS, GLS, IV, ML estimation; asymptotic distribution theory; exact, asymptotic hypothesis tests. Prerequisites: STAT:4101.		ECON:7010 Seminar in Economic Theory II	arr.
ECON:5805 Statistics for Economics	3 s.h.	ECON:7020 Seminar in Economics I	2 s.h.
Probability theory, transformations and expectations, common families of distributions, multiple random variables, properties of a random sample, point estimation, hypothesis testing.		ECON:7030 Seminar in Economics II	2 s.h.
ECON:5810 Applied Econometrics	3 s.h.	ECON:7040 Seminar in Economics III	2 s.h.
Empirical problems; multiple linear regression, nonlinear regression, maximum likelihood, hazard functions, univariate and multivariate time series, flexible functional forms. Prerequisites: ECON:5800.		ECON:7050 Seminar in Economics IV	2 s.h.
ECON:5815 Theoretical Econometrics I	2 s.h.	ECON:7870 Workshop in Microeconomics	1 s.h.
Statistical inference in single and multiple equation stochastic models, models with nonindependent or nonidentically distributed error structure, dynamic models; OLS, GLS, IV, ML estimation; asymptotic distribution theory; exact, asymptotic hypothesis tests.		ECON:7880 Workshop in Macro and Monetary Economics	1 s.h.
ECON:5825 Theoretical Econometrics II	2 s.h.	ECON:7950 Readings in Economics	arr.
Continuation of ECON:5815.		ECON:7975 Thesis in Economics	arr.
ECON:5855 Applied Econometrics I	2 s.h.		
Empirical problems; multiple linear regression, nonlinear regression, maximum likelihood, hazard functions, univariate and multivariate time series, flexible functional forms.			
ECON:5865 Applied Econometrics II	2 s.h.		
Continuation of ECON:5855.			
ECON:6310 Industrial Organization	3 s.h.		
The firm, monopolistic competition, oligopoly and workable competition; industrial organization, nature of equilibrium under uncertainty. Prerequisites: ECON:5110.			
ECON:6320 Labor Economics	3 s.h.		
Problems and models, including intertemporal models of labor markets; uncertainty and labor market activity; retirement decisions, economic theories of fertility; economics of discrimination; job search models; economic models of unions; bargaining and strikes, public sector labor markets; determinants of income distribution; emphasis on empirical verification of theory. Prerequisites: ECON:5110 and (ECON:4800 or ECON:5800).			
ECON:6350 Structural Methods in Econometrics	2 s.h.		
Introduction to structural econometric approaches which can be applied in labor economics, industrial organization, and elsewhere; theoretical frameworks used in this literature; identifying assumptions needed for model estimation and validation techniques; methods used for the estimation of structural models, including Maximum Likelihood, Method of Moments and simulation-based methods.			
ECON:6420 Macroeconomics III	3 s.h.		
Current research in macroeconomics; development of research topics with emphasis on theoretical and empirical analysis. Prerequisites: ECON:5110 and ECON:5800.			
ECON:6500 International Trade Theory	3 s.h.		
The theory of international trade, including basic models of international trade; capital and labor mobility and trade; protection of international trade; the political economy of international trade; empirical applications of international trade.			
ECON:6900 Contemporary Topics in Economics	3 s.h.		
Topics not offered in other courses.			

Economics, B.A.

The B.A. in economics incorporates a balance of economic theory, mathematical tools, and field applications.

Students majoring in economics choose one of two tracks: business or policy. They complete three sets of requirements for the major: mathematics and statistics courses that provide the skills needed for understanding economic theory and data; economic theory courses that provide the tools needed for analyzing economic issues; and field courses that apply economic tools to business, social, or specialized analytical issues. The applied field course requirement varies, depending on a student's choice of track.

The Bachelor of Arts degree is awarded by the College of Liberal Arts and Sciences [p. 17].

Requirements

The Bachelor of Arts with a major in economics requires a minimum of 120 s.h. of coursework, including 32 s.h. of coursework for the major. To graduate, students must have a cumulative g.p.a. of at least 2.00 in all college coursework attempted, all coursework attempted at the University of Iowa, all college economics coursework attempted, and all economics coursework attempted at the University of Iowa. Coursework in the major may not be taken pass/nonpass. Students also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 20].

The major requires a set of courses in mathematics and statistics (11 s.h.) and a set of courses in economic theory (6 s.h.). It also requires applied field courses (15 s.h.) in one of two tracks: business or policy.

Students may be able to count a limited amount of transfer credit toward the economics major, but they are required to complete the following courses at the University of Iowa: ECON:3100 Intermediate Microeconomics, ECON:3150 Intermediate Macroeconomics, and three of the applied field courses required for their track.

The business track is designed for students who seek employment in the private sector or who plan to earn the M.B.A. degree after gaining necessary experience. The policy track is designed for students interested in a decision-making or advocacy position in the public or private sector or who plan to earn a law degree or a graduate degree in a discipline that is not highly quantitative. Students are required to select one of the two tracks when they declare the economics major.

Students should pay close attention to the order in which they take courses, since some courses are prerequisites for others.

The B.A. with a major in economics requires the following coursework.

Code	Title	Hours
	Mathematics and Statistics Courses	11
	Economic Theory Courses	6
	Applied Field Courses (Business or Policy Track)	15
	Total Hours	32

Mathematics and Statistics Courses

Code	Title	Hours
All of these:		
ECON:3300	Introduction to Econometrics	3
MATH:1350	Quantitative Reasoning for Business	4
STAT:1030	Statistics for Business	4

Economic Theory Courses

Code	Title	Hours
Both of these (must be taken at the University of Iowa):		
ECON:3100	Intermediate Microeconomics	3
ECON:3150	Intermediate Macroeconomics	3

Applied Field Courses

Students complete a total of five applied field courses (15 s.h.); three of the applied field courses must be taken at the University of Iowa.

Business Track

Code	Title	Hours
Five of these:		
ECON:3325	Personnel Economics	3
ECON:3335	Money, Banking, and Financial Markets	3
ECON:3345	Global Economics and Business	3
ECON:3350	Industry Analysis	3
ECON:3355	Economic and Business Forecasting	3
ECON:3380	Business and Government	3
ACCT:2200	Managerial Accounting	3
MGMT:2100	Introduction to Management	3

Policy Track

Code	Title	Hours
Four of these:		
ECON:3345	Global Economics and Business	3
ECON:3620	Economic Growth and Development	3
ECON:3625	Environmental and Natural Resource Economics	3
ECON:3640	Regional and Urban Economics	3
ECON:3650	Policy Analysis	3
ECON:3690	Sports Economics	3
ECON:3750	Transportation Economics	3
ECON:3760	Health Economics	3
ECON:3770	Urban Transportation	3
ECON:3800	Law and Economics	3
ECON:3850	Behavioral Economics	3
ECON:3875	Topics in Policy Economics	3

And:

One additional economics course numbered ECON:3325 through ECON:4700, excluding these two courses: ECON:3870 and ECON:4050

Analytical Track

The Department of Economics is not admitting students to the analytical track at this time.

Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.

To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Teacher Education Program Application and Admission on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

Combined Programs

B.A./M.S. in Business Analytics (Career Subprogram)

Students majoring in economics who are interested in earning a master's degree in business analytics with a career subprogram may apply to the combined B.A./M.S. program offered by the Department of Economics and the Department of Business Analytics. The program enables students to begin the study of business analytics before they complete their bachelor's degree. Students are able to complete both degrees in five years rather than six.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For information about the business analytics program, see the M.S. in business analytics (career) [p. 1148] in the Tippie College of Business section of the Catalog.

B.A./M.S. in Finance

The Department of Economics and the Department of Finance offer a combined Bachelor of Arts in economics/Master of Science in finance program. The combined program permits students to count some credit toward both degrees, allowing them to begin graduate study before they complete their bachelor's degree.

Separate application to each program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more information about the M.S. degree, see the M.S. in finance [p. 1190] (Tippie College of Business) section of the Catalog.

Honors

Honors in the Major

Graduation with honors in economics recognizes high scholastic achievement based on grades and on completion of academic work beyond the requirements of the economics major. Students must have a cumulative g.p.a. of at least 3.50 in all college coursework attempted, all coursework attempted at the University of Iowa, all college economics coursework attempted, and all economics coursework attempted at the

University of Iowa. They also must successfully complete an honors thesis under the supervision of a faculty member.

Students begin by completing BUS:1999 Introduction to Research in Business at least three semesters prior to graduation. This course introduces students to research in the college and provides an opportunity to develop thesis questions and meet Tippie College of Business faculty members engaged in research. They also must complete ECON:3100 Intermediate Microeconomics, ECON:3150 Intermediate Macroeconomics, and ECON:3300 Introduction to Econometrics before commencing thesis work.

After identifying a faculty member to advise them on their thesis and completing the coursework listed above, students register for ECON:4999 Honors Thesis in Economics for two semesters while they complete their research and write their thesis. In the second semester of their thesis, students present their research in a poster format at the Undergraduate Research Festival.

Students interested in graduating with honors in economics should visit the department's honors advisor at least three semesters prior to graduation.

University of Iowa Honors Program

Completing the economics honors requirements also satisfies the experiential learning requirement for the University of Iowa Honors Program. To learn more about graduating with honors through the UI Honors Program, visit the Honors at Iowa website.

Membership in the UI Honors Program is not required to earn honors in the economics major.

Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: at least half of the semester hours required for graduation

Before the seventh semester begins: ECON:1100 Principles of Microeconomics, ECON:1200 Principles of Macroeconomics, ECON:3100 Intermediate Microeconomics, ECON:3150 Intermediate Macroeconomics, MATH:1350 Quantitative Reasoning for Business, STAT:1030 Statistics for Business, ECON:3300 Introduction to Econometrics, and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least two major track courses

During the eighth semester: all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate

Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and

should be discussed with an academic advisor. For additional sample plans, see MyUI.

Hours	15
Total Hours	124-130

- Fulfills a major requirement and may fulfill a GE requirement.
- Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
- Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
- Enrollment in math courses requires completion of a placement exam.
- Both ECON:3100 and ECON:3150 must be completed at the University of Iowa.
- GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
- At least three of the five required track courses must be completed at the University of Iowa.
- Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>. If applicable search for "Early and Late Participation" to find this page (e.g. participate in graduation ceremony in May, degree conferral in August).

Career Advancement

The Bachelor of Arts degree provides an excellent educational background for a variety of positions in business and government. Graduates find employment in banking, financial institutions, industrial firms, and trade organizations and in federal, state, and local government agencies dealing with economic policy, regulation, and analysis. An undergraduate degree in economics also prepares students for the study of law and for graduate study in fields such as economics, business management, public administration, hospital and health administration, planning and public affairs, transportation, journalism, political science, and statistics.

Over 90 percent of students reported that they found permanent employment, were accepted to graduate school, or were not seeking employment within six months of graduation.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs. For more information about careers, visit the Pomerantz Career Center website.

Economics, B.S.

The B.S. in economics incorporates a balance of economic theory, mathematical tools, and field applications while emphasizing the development of analytical skills.

Students majoring in economics choose one of two tracks: business or policy. They complete three sets of requirements for the major: mathematics and statistics courses that provide the skills needed for understanding economic theory and data; economic theory courses that provide the tools needed for analyzing economic issues; and field courses that apply economic tools to business, social, or specialized analytical issues. The applied field course requirement varies, depending on a student's choice of track.

The Bachelor of Science degree is awarded by the College of Liberal Arts and Sciences [p. 17].

Requirements

The Bachelor of Science with a major in economics requires a minimum of 120 s.h. of coursework, including 33-35 s.h. of coursework for the major. To graduate, students must have a cumulative g.p.a. of at least 2.00 in all college coursework attempted, all coursework attempted at the University of Iowa, all college economics coursework attempted, and all economics coursework attempted at the University of Iowa. Coursework in the major may not be taken pass/nonpass. Students also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 20].

The major requires a set of courses in mathematics and statistics (15-17 s.h.) and a set of courses in economic theory (6 s.h.). It also requires applied field courses (12 s.h.) in one of two tracks: business or policy.

Students may be able to count a limited amount of transfer credit toward the economics major, but they are required to complete the following courses at the University of Iowa: ECON:3100 Intermediate Microeconomics, ECON:3150 Intermediate Macroeconomics, and three of the applied field courses required for their track.

The business track is designed for students who seek employment in the private sector or who plan to earn the M.B.A. degree after gaining necessary experience. The policy track is designed for students interested in a decision making or advocacy position in the public or private sector or who plan to earn a law degree or a graduate degree in a discipline that is not highly quantitative. Students are required to select one of the two tracks when they declare the economics major. The B.S. program is ideal for students who plan to pursue a graduate degree in economics.

Students should pay close attention to the order in which they take courses, since some courses are prerequisites for others.

The B.S. with a major in economics requires the following coursework.

Code	Title	Hours
	Mathematics and Statistics Courses	15-17
	Economic Theory Courses	6
	Applied Field Courses (Business or Policy Track)	12
	Total Hours	33-35

Mathematics and Statistics Courses

The department recommends that students planning to pursue a graduate degree in economics take STAT:3100 Introduction to Mathematical Statistics I and STAT:3101 Introduction to Mathematical Statistics II rather than STAT:3120 Probability and Statistics. It also recommends that they complete additional coursework in mathematics, including MATH:2700 Introduction to Linear Algebra, MATH:2850 Calculus III, and MATH:3770 Fundamental Properties of Spaces and Functions I.

Code	Title	Hours
All of these:		
MATH:1850 & MATH:1860	Calculus I-II	8
ECON:4800	Econometric Analysis	3
One of these:		
STAT:3100-STAT:3101	Introduction to Mathematical Statistics I-II	6
STAT:3120	Probability and Statistics	4

Economic Theory Courses

Code	Title	Hours
Both of these (must be taken at the University of Iowa):		
ECON:3100	Intermediate Microeconomics	3
ECON:3150	Intermediate Macroeconomics	3

Applied Field Courses

Students complete a total of four applied field courses (12 s.h.); three of the applied field courses must be taken at the University of Iowa.

Business Track

Code	Title	Hours
Four of these:		
ECON:3325	Personnel Economics	3
ECON:3335	Money, Banking, and Financial Markets	3
ECON:3345	Global Economics and Business	3
ECON:3350	Industry Analysis	3
ECON:3355	Economic and Business Forecasting	3
ECON:3380	Business and Government	3
ACCT:2200	Managerial Accounting	3
MGMT:2100	Introduction to Management	3

Policy Track

Code	Title	Hours
Three of these:		
ECON:3345	Global Economics and Business	3
ECON:3620	Economic Growth and Development	3
ECON:3625	Environmental and Natural Resource Economics	3

ECON:3640	Regional and Urban Economics	3
ECON:3650	Policy Analysis	3
ECON:3690	Sports Economics	3
ECON:3750	Transportation Economics	3
ECON:3760	Health Economics	3
ECON:3770	Urban Transportation	3
ECON:3800	Law and Economics	3
ECON:3850	Behavioral Economics	3
ECON:3875	Topics in Policy Economics	3

And:

One additional economics course numbered ECON:3325 through ECON:4700, excluding these two courses: ECON:3870 and ECON:4050

Analytical Track

The Department of Economics is not admitting students to the analytical track at this time.

Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.

To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Teacher Education Program Application and Admission on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

Combined Programs

B.S./M.S. in Business Analytics (Career Subprogram)

Students majoring in economics who are interested in earning a master's degree in business analytics with a career subprogram may apply to the combined B.S./M.S. program offered by the Department of Economics and the Department of Business Analytics. The program enables students to begin the study of business analytics before they complete their bachelor's degree. Students are able to complete both degrees in five years rather than six.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For information about the business analytics program, see the M.S. in business analytics (career) [p. 1148] in the Tippie College of Business section of the Catalog.

B.S./M.S. in Finance

The Department of Economics and the Department of Finance offer a combined Bachelor of Science in economics/Master of Science in finance program. The combined program permits students to count some credit toward both degrees, allowing them to begin graduate study before they complete their bachelor's degree.

Separate application to each program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For more

information about the M.S. degree, see the M.S. in finance [p. 1190] (Tippie College of Business) section of the Catalog.

Honors

Honors in the Major

Graduation with honors in economics recognizes high scholastic achievement based on grades and on completion of academic work beyond the requirements of the economics major. Students must have a cumulative g.p.a. of at least 3.50 in all college coursework attempted, all coursework attempted at the University of Iowa, all college economics coursework attempted, and all economics coursework attempted at the University of Iowa. They also must successfully complete an honors thesis under the supervision of a faculty member.

Students begin by completing BUS:1999 Introduction to Research in Business at least three semesters prior to graduation. This course introduces students to research in the college and provides an opportunity to develop thesis questions and meet Tippie College of Business faculty members engaged in research. They also must complete ECON:3100 Intermediate Microeconomics, ECON:3150 Intermediate Macroeconomics, and ECON:4800 Econometric Analysis before commencing thesis work.

After identifying a faculty member to advise them on their thesis and completing the coursework listed above, students register for ECON:4999 Honors Thesis in Economics for two semesters while they complete their research and write their thesis. In the second semester of their thesis, students present their research in a poster format at the Undergraduate Research Festival.

Students interested in graduating with honors in economics should visit the department's honors advisor at least three semesters prior to graduation.

University of Iowa Honors Program

Completing the economics honors requirements also satisfies the experiential learning requirement for the University of Iowa Honors Program. To learn more about graduating with honors through the UI Honors Program, visit the Honors at Iowa website.

Membership in the UI Honors Program is not required to earn honors in the economics major.

Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

Before the third semester begins: at least one-quarter of the semester hours required for graduation

Before the fourth semester begins: MATH:1850 Calculus I

Before the fifth semester begins: MATH:1860 Calculus II and at least half of the semester hours required for graduation

Before the sixth semester begins: STAT:3100 Introduction to Mathematical Statistics I (if chosen statistics course)

Before the seventh semester begins: ECON:1100

Principles of Microeconomics, ECON:1200 Principles of Macroeconomics, ECON:3100 Intermediate Microeconomics, ECON:3150 Intermediate Macroeconomics, STAT:3101 Introduction to Mathematical Statistics II (if chosen statistics course), and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: STAT:3120 Probability and Statistics (if chosen statistics course) and at least two major track courses

During the eighth semester: ECON:4800 Econometric Analysis, all remaining coursework in the major, all remaining GE CLAS Core courses, and a sufficient number of semester hours to graduate

Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Degree Application: apply on MyUI before deadline (typically in February for spring, September for fall)^k

Hours		15
Total Hours		124-130

- Fulfills a major requirement and may fulfill a GE requirement.
- Enrollment in math courses requires completion of a placement exam.
- Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
- Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
- Both ECON:3100 and ECON:3150 must be completed at the University of Iowa.
- Students may choose to complete either STAT:3100-3101 or STAT:3120.
- Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.

- h Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
- i GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
- j At least three of the four required track courses must be completed at the University of Iowa.
- k Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>. If applicable search for "Early and Late Participation" to find this page (e.g. participate in graduation ceremony in May, degree conferral in August).

Career Advancement

The Bachelor of Science degree provides an excellent educational background for a variety of positions in business and government. Graduates find employment in banking, financial institutions, industrial firms, and trade organizations and in federal, state, and local government agencies dealing with economic policy, regulation, and analysis. An undergraduate degree in economics also prepares students for the study of law and for graduate study in fields such as economics, business management, public administration, hospital and health administration, urban and regional planning, transportation, journalism, political science, and statistics.

Over 90 percent of students reported that they found permanent employment, were accepted to graduate school, or were not seeking employment within six months of graduation.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs. For more information about careers, visit the Pomerantz Career Center website.

Economics, B.B.A.

The B.B.A. in economics emphasizes the economic foundations of business fields—accounting, finance, marketing, business law, and management. Students majoring in economics choose one of two tracks: business or policy. In addition to the common B.B.A. requirements [p. 1130], students complete two sets of requirements for the major: economic theory courses that provide the tools needed for analyzing economic issues; and field courses that apply economic tools to business, social, or specialized analytical issues. The applied field course requirement varies, depending on a student's choice of track.

The Bachelor of Business Administration degree is awarded by the Tippie College of Business.

Requirements

The Bachelor of Business Administration with a major in economics requires a minimum of 120 s.h. of coursework, including at least 19 s.h. of coursework for the major. To graduate, students must have a cumulative g.p.a. of at least 2.00 in all college coursework attempted, all coursework attempted at the University of Iowa, all college business coursework attempted, all business coursework attempted at the University of Iowa, all college economics coursework attempted, and all economics coursework attempted at the University of Iowa. Coursework in the major may not be taken pass/nonpass. They also must complete all Tippie College of Business requirements for the Bachelor of Business Administration [p. 1130].

The major requires one course in professional preparation (1 s.h.) and a set of courses in economic theory (6 s.h.). It also requires applied field courses (12 s.h.) in one of two tracks: business or policy.

Students may be able to count a limited amount of transfer credit toward the economics major, but they are required to complete the following courses at the University of Iowa: ECON:3100 Intermediate Microeconomics, ECON:3150 Intermediate Macroeconomics, and three of the applied field courses required for their track.

The B.B.A. program emphasizes the economic foundations of business fields—accounting, finance, marketing, business law, and management. The business track is designed for students who seek employment in the private sector or who plan to earn the M.B.A. degree after gaining necessary experience. The policy track is designed for students interested in a decision-making or advocacy position in the public or private sector or who plan to earn a law degree or a graduate degree in a discipline that is not highly quantitative. Students are required to select one of the two tracks when they declare the economics major.

Students should pay close attention to the order in which they take courses, since some courses are prerequisites for others.

The B.B.A. with a major in economics requires the following coursework.

Code	Title	Hours
	Professional Preparation Course	1-2
	Economic Theory Courses	6
	Applied Field Courses (Business or Policy Track)	12
	Total Hours	19-20

Professional Preparation Course

Code	Title	Hours
One of these:		
ACCT:3100	Professional Accounting Seminar	1
BAIS:3050	Business Analytics and Information Systems Professional Preparation	1
CCP:2001	Graduate Admissions 101	1
CCP:3102	Job Search Essentials	1
CCP:3104	Defining Your Career Path	2
CCP:3107	Social Media for Your Job Search	1
FIN:3020	Professional Finance Seminar	1
MGMT:3050	Professional Preparation for Management	1
MKTG:3050	Professional Preparation in Marketing	2

Economic Theory Courses

Code	Title	Hours
Both of these (must be taken at the University of Iowa):		
ECON:3100	Intermediate Microeconomics	3
ECON:3150	Intermediate Macroeconomics	3

Applied Field Courses

Students complete a total of four applied field courses (12 s.h.); three of the applied field courses must be taken at the University of Iowa.

Business Track

Code	Title	Hours
Four of these:		
ECON:3300	Introduction to Econometrics	3
ECON:3325	Personnel Economics	3
ECON:3335	Money, Banking, and Financial Markets	3
ECON:3345	Global Economics and Business	3
ECON:3350	Industry Analysis	3
ECON:3355	Economic and Business Forecasting	3
ECON:3380	Business and Government	3

Policy Track

Code	Title	Hours
Three of these:		
ECON:3345	Global Economics and Business	3
ECON:3620	Economic Growth and Development	3
ECON:3625	Environmental and Natural Resource Economics	3
ECON:3640	Regional and Urban Economics	3

ECON:3650	Policy Analysis	3
ECON:3690	Sports Economics	3
ECON:3750	Transportation Economics	3
ECON:3760	Health Economics	3
ECON:3770	Urban Transportation	3
ECON:3800	Law and Economics	3
ECON:3850	Behavioral Economics	3
ECON:3875	Topics in Policy Economics	3

And:

One additional economics course numbered ECON:3300 through ECON:4700, excluding these two courses: ECON:3870 and ECON:4050

Analytical Track

The Department of Economics is not admitting students to the analytical track at this time.

Honors

Honors in the Major

Graduation with honors in economics recognizes high scholastic achievement based on grades and on completion of academic work beyond the requirements of the economics major. Students must have a cumulative g.p.a. of at least 3.50 in all college coursework attempted, all coursework attempted at the University of Iowa, all college business coursework attempted, and all business coursework attempted at the University of Iowa. They also must successfully complete an honors thesis under the supervision of a faculty member.

Students begin by completing BUS:1999 Introduction to Research in Business at least three semesters prior to graduation. This course introduces students to research in the college and provides an opportunity to develop thesis questions and meet Tippie College of Business faculty members engaged in research. They also must complete ECON:3100 Intermediate Microeconomics, ECON:3150 Intermediate Macroeconomics, and ECON:3300 Introduction to Econometrics before commencing thesis work.

After identifying a faculty member to advise them on their thesis and completing the coursework listed above, students register for ECON:4999 Honors Thesis in Economics for two semesters while they complete their research and write their thesis. In the second semester of their thesis, students present their research in a poster format at the Undergraduate Research Festival.

Students interested in graduating with honors in economics should see Tippie Honors on the Tippie College of Business website.

University of Iowa Honors Program

Completing the honors in economics requirements also satisfies the experiential learning requirement for the University of Iowa Honors Program. To learn more about graduating with honors through the UI Honors Program, visit the Honors at Iowa website.

Membership in the UI Honors Program is not required to earn honors in the economics major.

Academic Plans

Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

The following checkpoints are designed for students who enter the University as direct admission or pre-business students. In order to stay on the plan, pre-business students must maintain the grade-point averages required for admission to the Tippie College of Business and must apply for admission to the college the semester the four prerequisite courses will be completed, but no later than before the fifth semester begins. The Four-Year Graduation Plan is not available to students who choose to pursue a double major in the college or to those enrolled in a combined degree program.

Students must take BUS:3000 Business Communication and Protocol during their first year after admission to the Tippie College of Business, except direct admission students, who take the course during their second year.

Before the third semester begins: ECON:1100 Principles of Microeconomics, MATH:1350 Quantitative Reasoning for Business, STAT:1030 Statistics for Business, and at least one-quarter of the semester hours required for graduation

Before the fifth semester begins: ACCT:2100 Introduction to Financial Accounting, ACCT:2200 Managerial Accounting, ECON:1200 Principles of Macroeconomics, all General Education requirements, and at least half of the semester hours required for graduation

Before the seventh semester begins: ECON:3100 Intermediate Microeconomics, ECON:3150 Intermediate Macroeconomics, at least one major track course, all business core requirements, and at least three-quarters of the semester hours required for graduation

Before the eighth semester begins: at least two major track courses

During the eighth semester: all remaining coursework in the major and a sufficient number of semester hours to graduate

Iowa Degree in Three

Iowa Degree in Three is designed for students who are academically prepared to complete more semester hours per term than average or who come to the university with completed college credits. It is a flexible, affordable option developed to meet the needs of highly motivated students.

Students sign an agreement during their first semester of enrollment; meet with an advisor at least once a semester to review their plans and progress; take courses during summer sessions, if necessary; meet specific course checkpoints; and maintain the grade-point average required for the major.

The Tippie College of Business makes several assumptions about candidates for the Iowa Degree in Three:

- students are prepared to enroll in MATH:1350 Quantitative Reasoning for Business during their first enrollment at the University of Iowa,
- students have fulfilled the General Education World Language requirement before matriculation,
- students are direct admits to the Tippie College of Business,

- students have earned at least 15 s.h. of college credit before matriculation, and
- students are not held for more than two English as a Second Language classes.

Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

e BUS:3000 should be taken the first semester after admission to the Tippie College of Business; may be deferred one semester. Direct admits take BUS:3000 in their second year.

f Must be completed at the University of Iowa.

- g Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>

Career Advancement

The Bachelor of Business Administration degree provides an excellent educational background for a variety of positions in business and government. Graduates find employment in banking, financial institutions, industrial firms, and trade organizations and in federal, state, and local government agencies dealing with economic policy, regulation, and analysis. An undergraduate degree in economics also prepares students for the study of law and for graduate study in fields such as economics, business management, public administration, hospital and health administration, urban and regional planning, transportation, journalism, political science, and statistics.

Over 90 percent of students reported that they found permanent employment, were accepted to graduate school, or were not seeking employment within six months of graduation.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs; for more information about careers, visit the Pomerantz Career Center website.

Economics, Minor

Requirements

The undergraduate minor in economics requires a minimum of 15 s.h. of economics coursework, including 12 s.h. of coursework completed at the University of Iowa in economics courses (prefix ECON) numbered 3000 or above. Students must have a cumulative g.p.a. of at least 2.00 in all college economics coursework attempted and all economics coursework attempted at the University of Iowa. Coursework in the minor may not be taken pass/nonpass. A maximum of 6 s.h. of coursework used to satisfy another major, minor, or certificate may be applied toward the economics minor.

Economics, M.A.

Requirements

The Master of Arts is offered only to students working toward a Ph.D. in economics.

The department participates in the M.B.A. program; see the Master of Business Administration Program [p. 1225] in the Catalog.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

All applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

Applicants must submit a completed Application for Graduate Admission, official transcripts from all institutions they have attended, and all official test scores to the University of Iowa Office of Admissions.

Application deadline for admission and financial support is January 15 for fall entry.

Career Advancement

Over 90 percent of students reported that they found permanent employment, were accepted to graduate school, or were not seeking employment within six months of graduation.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs; for more information about careers, visit the Pomerantz Career Center website.

Economics, Ph.D.

Requirements

The Doctor of Philosophy program in economics requires a minimum of 72 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the degree. The program provides rigorous training in economic theory, econometrics, and applied economics. It has six components: a coordinated sequence of core courses, a qualifying examination, a research paper, a set of major field courses, a dissertation proposal and comprehensive examination, and a dissertation.

The department partners with the College of Law to offer a combined J.D./Ph.D. degree program; see Combined Programs [p. 1177] in this section of the Catalog. It also participates in the M.B.A. program; see the Master of Business Administration Program [p. 1225] in the Catalog.

The Ph.D. with a major in economics requires the following.

Core Sequence

Code	Title	Hours
First Semester		
ECON:5115	Fundamentals of Microeconomics	3
ECON:5200	Macroeconomics I	3
ECON:5805	Statistics for Economics	3
Second Semester		
ECON:5110	Microeconomics II	3
ECON:5210	Macroeconomics II	3
ECON:5800	Econometrics	3
Third Semester		
ECON:5810	Applied Econometrics	3
ECON:6320	Labor Economics	3
ECON:6420	Macroeconomics III	3
ECON:6900	Contemporary Topics in Economics	3

Qualifying Examination

The qualifying examination is normally taken the summer after the first year.

Research Paper

The research paper is normally completed the summer after the second year.

Major Field Courses

Each student chooses a major study area in addition to the core courses. The requirement for the major area is a minimum of 24 s.h. of intensive study in a field and in courses that enable students to understand the relationship between their specialty and related fields.

Dissertation Proposal and Comprehensive Examination

Students must defend a dissertation proposal in a comprehensive examination within one year of completing the research paper requirement.

Dissertation

Submission of the completed dissertation and an oral defense of the dissertation research completes the Ph.D. program.

Combined Programs

J.D./Ph.D.

The Department of Economics and the College of Law offer a combined Juris Doctor/Doctor of Philosophy program. Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program. For information about the J.D., see Juris Doctor, J.D. [p. 1650] (College of Law) in the Catalog.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Applicants must take the Graduate Record Examination (GRE) General Test and have their scores sent to the University. Those whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

Applicants must submit a completed Application for Graduate Admission, official transcripts from all institutions they have attended, and all official test scores to the University of Iowa Office of Admissions.

Application deadline for admission and financial support is January 15 for fall entry.

Career Advancement

Over 90 percent of students reported that they found permanent employment, were accepted to graduate school, or were not seeking employment within six months of graduation.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs; for more information about careers, visit the Pomerantz Career Center website.

Entrepreneurial Management

Executive Director

- David K. Hensley (Management and Entrepreneurship)

Director, Undergraduate Studies

- Robert B. Walker (Management and Entrepreneurship)

Undergraduate certificate: entrepreneurial management
Faculty: <https://www.iowajpec.org/people-directory>
Website: <https://www.iowajpec.org/>

The Tippie College of Business and the John Pappajohn Entrepreneurial Center (Iowa JPEC) offer the Certificate in Entrepreneurial Management. They also work with other units on campus to offer entrepreneurship programs. The college collaborates with the College of Engineering to offer the Certificate in Technological Entrepreneurship [p. 1535]. The center partners with the Department of Management and Entrepreneurship [p. 1204] to offer the entrepreneurial management track for Bachelor of Business Administration students majoring in management. It collaborates with the College of Liberal Arts and Sciences to offer the B.A. in enterprise leadership, [p. 435] the Certificate in Arts Entrepreneurship [p. 142], and the Certificate in Media Entrepreneurialism [p. 808].

Undergraduate entrepreneurship programs at the University of Iowa combine academic coursework and experiential learning with a focus on teaching entrepreneurial leadership, innovation and creativity, opportunity recognition and assessment, and strategic business planning. Students develop their critical thinking, professional communication, and leadership skills through accommodation of academic projects and cocurricular activities. Several of the programs are open to all University of Iowa undergraduates. To learn more, visit the John Pappajohn Entrepreneurial Center website.

The John Pappajohn Entrepreneurial Center also offers a wide variety of applied learning experiences designed to develop entrepreneurial-minded problem solvers. These programs range from professional internships with high-growth new ventures to business and strategic consulting services to existing businesses. For students who want to launch a business while in school, the Pappajohn Center directs a comprehensive accelerator program that includes space, training, mentoring, and access to capital.

Programs

Undergraduate Program of Study Certificate

- Certificate in Entrepreneurial Management [p. 1182]

Facilities

John Pappajohn Entrepreneurial Center

The main office is located in the John Pappajohn Business Building. Students who would like information about undergraduate entrepreneurship-related academic

programs or are interested in learning more about resources and programs to support student entrepreneurship are encouraged to stop by and visit with a staff member.

Bedell Entrepreneurship Learning Laboratory

The Bedell Entrepreneurship Learning Laboratory is an applied learning environment for University of Iowa students creating a new business. The laboratory provides dedicated office space for individual students and teams, enabling them to concentrate on developing their business concepts. Student entrepreneurs participate in the Founders Club, a student business acceleration program open to any student at the University of Iowa. This business incubator connects students with the resources to launch startups, and to grow them into sustainable businesses. Participants have access to a variety of resources including collaborative work space and equipment, workshops, training, networking, funding opportunities, and one-on-one mentoring from experienced professionals. Students also compete for capital in several campus and national pitch and business model competitions. They gain access to technical support, accounting, legal, engineering, and prototyping services, and are connected with potential investors and business partners.

Contact the John Pappajohn Entrepreneurial Center for information about Founders Club or visit the Founders Club web page to apply.

Courses

Entrepreneurial Management Courses

ENTR:1010 Exploring Entrepreneurship 3 s.h.

Introduction to entrepreneurship, including identifying characteristics of the entrepreneur, evaluating opportunities, engaging in customer discovery, design thinking, feasibility, financing, and planning for success.

ENTR:1020 Business Innovation 3 s.h.

Overview of entrepreneurship, innovation, and project management concepts; work in teams with science, technology, engineering, and mathematics (STEM) industry mentors to develop innovative solutions to real-world problems.

ENTR:1030 STEM Innovator 3 s.h.

Work with science, technology, engineering, and mathematics (STEM) industry mentors to engage in innovation and entrepreneurship by employing conceptual understandings and practices of STEM within an entrepreneurship framework; students solve real-world STEM problems that are of interest to them and their community, acquire and demonstrate 21st-century skills working on authentic, meaningful, and cross-curricular projects; exposure to potential STEM careers and entrepreneurial pathways; preparation for success in postsecondary STEM majors, careers, and entrepreneurial ventures of the future. Requirements: enrollment in STEM Innovator program and consent of UI STEM innovator program administrators.

ENTR:1300 First-Year Seminar 1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

- ENTR:1350 Foundations in Entrepreneurship** 3 s.h.
Basic core business concepts faced by entrepreneurial managers in small business accounting, marketing, and business planning. Recommendations: non-business major interested in studying entrepreneurship.
- ENTR:1800 Innovation in Action: Sustainability** 0-1 s.h.
For businesses to successfully compete and thrive in a global marketplace, they must embrace innovation throughout their organizations, and one of the critical issues businesses face today is that of sustainability—how to most effectively acquire and utilize scarce resources while limiting their overall environmental impact; introduction to sustainability; focus on economic, social, and environmental issues facing organizations and society; project management fundamentals; students work in teams to identify a specific sustainability challenge, and prepare and present a strategic approach for addressing a sustainability problem.
- ENTR:2000 Entrepreneurship and Innovation** 3 s.h.
Integrated, cross-functional perspective on how organizations identify and evaluate opportunities and develop strategies to compete in a global marketplace; innovation and creativity, opportunity recognition, venture screening, characteristics of successful entrepreneurial leaders, feasibility analysis, strategic business planning; application of entrepreneurship practices for new business creation, corporate venturing, nonprofits. Duplicates ENTR:3520 and MGMT:3100. Corequisites: ENTR:1350.
- ENTR:2800 Entrepreneurial Experience** 1-3 s.h.
Applied learning course designed to enhance innovation and opportunity recognition skills, develop customer discovery expertise, and foster team-building and leadership abilities.
- ENTR:3000 Practicum in Entrepreneurship** 1-3 s.h.
Applied, experiential learning opportunities designed to foster development of entrepreneurial leadership skills; opportunity recognition and assessment, strategic business planning, innovation and creativity, team leadership, professional communication skills, strategy development and execution.
- ENTR:3050 Professional Preparation for Enterprise Leadership and Entrepreneurship** 1 s.h.
Survey of career paths for students studying enterprise leadership and entrepreneurship; opportunities to build a professional network through regular interaction with business professionals and industry leaders; creating strategies for securing internships and full-time employment; developing professional soft skills to succeed in today's workplace.
- ENTR:3100 Entrepreneurial Finance** 3 s.h.
Understanding financial aspects of new and growing ventures; focus on preparing financial projections, analyzing financial performance, managing cash flow, and determining financial feasibility; detailed overview of various sources of capital available for start-up and growing ventures. Prerequisites: THTR:3520 or ENTR:2000 or MGMT:3100.
- ENTR:3200 Entrepreneurial Marketing** 3 s.h.
Practical marketing concepts for evaluating the market potential for new products, services, or business opportunities; how to obtain and evaluate market data, determine customer demand, analyze the competition, design effective promotions, develop and implement effective sales strategies, and write a successful marketing plan. Prerequisites: MGMT:3100 or ENTR:2000 or THTR:3520.
- ENTR:3350 Entrepreneurial Strategy** 3 s.h.
The synergistic effect of entrepreneurial attributes (e.g., innovation, creativity, opportunity recognition) and managerial attributes (e.g., strategic management, planning, budgeting) on profit and nonprofit organizations.
- ENTR:3400 Strategic Management of Technology and Innovation** 3 s.h.
New technology innovation and commercialization; technology innovation process, identification of commercialization strategies, feasibility analysis, intellectual property issues. Prerequisites: ENTR:2000 or THTR:3520 or MGMT:3100.
- ENTR:3500 Social Entrepreneurship** 3 s.h.
Introduction to the growing field of social entrepreneurship; creation of ventures with dual missions of social benefit and return on investment; issues related to evaluating market opportunities; acquiring and managing scarce resources; sustainability; maximizing social and economic value. Prerequisites: ENTR:2000 or THTR:3520 or MGMT:3100.
- ENTR:3520 Starting Up the Arts Start-up** 3 s.h.
Arts administration principles and trends as applied to creation of an arts-related enterprise; case studies; students create business plan for a new arts organization. Duplicates ENTR:2000 and MGMT:3100. Corequisites: ENTR:1350 or (ACCT:2100 and MKTG:3000). Same as DPA:3520, INTD:3520, THTR:3520.
- ENTR:3525 The Business of the Performing Arts** 3 s.h.
Use of live performing arts—theatre, dance, performance art—to explore methods for starting and maintaining students' professional lives; topics and issues include understanding arts structures, producing and presenting, networking, and transitioning to various aspects of the arts and job market; how students as artists or producers fit into the arts ecosystem in the United States, how that ecosystem might be changing, and what students might do to change it. Prerequisites: DPA:3510 and ENTR:2000. Same as DANC:3525, DPA:3525, THTR:3525.
- ENTR:3550 Commercializing New Technology** 3 s.h.
Applied learning with focus on process of technology commercialization; real-world opportunity in the form of a technology developed in the academic environment or private sector and creation of a plan to transfer that technology to the marketplace; identifying a specific application of that technology (product), identifying and sizing relevant market segments, determining appropriate business and financial model, designing a business plan, and presentation of business plans/opportunities to simulated venture capitalists. Prerequisites: ENTR:2000 or ENTR:3350. Corequisites: (ENTR:3200 or MKTG:3000) and (ENTR:3100 or ACCT:2100). Requirements: 60 s.h. completed.
- ENTR:3595 Nonprofit Organizational Effectiveness I** 3 s.h.
Operational and financial aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as MGMT:3500, MUSM:3500, NURS:3595, RELS:3700, SSW:3500.
- ENTR:3600 E-Commerce Strategies for Entrepreneurs** 3 s.h.
E-commerce opportunities and internet business strategies for entrepreneurial ventures; how to develop effective web business strategies, latest technologies and trends in e-commerce, methods for maximizing traffic, impact of a company's website. Prerequisites: ENTR:2000 or MGMT:3100 or THTR:3520.

ENTR:3700 Sustainable Product Innovation and Management 3 s.h.

Sustainability requirements in management of new product and process development from the perspective of the senior-level executive responsible for a firm's business and operational strategies; student teams will develop a new sustainable product or undertake applied field study projects to gain firsthand experience with sustainability practices and strategies within a company. Prerequisites: ENTR:2000 or THTR:3520 or MGMT:3100 or MKTG:3000. Requirements: 60 s.h. earned.

ENTR:3800 Entrepreneurial Leadership Academy I 3 s.h.

Students hone leadership and project management skills through weekly workshops, guest speakers, and course discussion; preparation to actively manage and lead all phases of a business project; topics include client management, advanced project management skills, how to have tough conversations at work, and how to structure and lead a meeting for optimal results; first in a two-course sequence. Prerequisites: MGMT:2100. Requirements: declared management and entrepreneurship major and 60 s.h. completed. Same as MGMT:3800.

ENTR:3850 Entrepreneurial Leadership Academy II 3 s.h.

Work in small groups to provide strategic management consulting services to lowa-based companies; experienced entrepreneurs and C-level executives provide mentoring to teams; students independently communicate with their client, learn to employ the latest techniques for assessing competitive markets and identifying growth opportunities, and ultimately develop recommendations and prepare a final report for their client; second in a two-course sequence. Prerequisites: MGMT:3800 or ENTR:3800. Same as MGMT:3850.

ENTR:4000 Topics in Entrepreneurship 1-3 s.h.

Current topics in entrepreneurship. Prerequisites: ENTR:2000 or MGMT:3100 or THTR:3520.

ENTR:4050 Directed Readings in Entrepreneurship arr.

Independent study; topics and assignments approved by instructor.

ENTR:4100 International Entrepreneurship and Culture 1-3 s.h.

International entrepreneurship and business strategy, foreign exchange, tariffs and trade, micro-finance, economic conditions and culture of destination countries; students will travel abroad and have hands-on experience working with in-country entrepreneurs and will analyze international businesses; focus will be on evaluating entrepreneurial opportunities, identifying sustainable growth strategies, and understanding international business culture. Prerequisites: ENTR:2000 or THTR:3520 or MGMT:3100. Requirements: junior standing.

ENTR:4200 Entrepreneurship: Business Consulting 3 s.h.

Students provide strategic business consulting services to start-up and early-stage companies; exploration of consulting process (proposal development, data collection and analysis, team dynamics, communications with clients, developing recommendations, final report preparation and presentation); projects involving market research and analysis, financial analysis and projections, and strategic business and operations planning. Requirements: 60 s.h. completed.

ENTR:4300 Entrepreneurship: Advanced Business Planning arr.

Creation and launch of a new venture; completion of a detailed business plan, creating an elevator pitch, and formal presentation of plan.

ENTR:4400 Managing the Growth Business 3 s.h.

Preparation to effectively manage employees, customers, and suppliers; leadership for a growing entrepreneurial venture; opportunities to evaluate, practice, and refine critical professional management skills. Prerequisites: ENTR:2000 or THTR:3520 or MGMT:3100. Requirements: 75 s.h. earned.

ENTR:4450 Professional Sports Management 3 s.h.

Detailed study of professional sports management and marketing; building and managing a front office, marketing sports properties, revenue generation models, developing media relationships, and capitalizing on new opportunities in the sports industry. Prerequisites: ENTR:2000 or THTR:3520 or MGMT:3100.

ENTR:4460 Entrepreneurship and Global Trade 3 s.h.

Complex issues of business operations in a global economy; trade transactions related to importing and exporting, logistics, and ethical issues in international trade; global business management, global marketing, global supply chain management, and trade finance; preparation for work in global marketplace and for the Certified Global Business Professional certification exam offered by the North American Small Business International Trade Educators. Prerequisites: MGMT:3100 or ENTR:2000 or THTR:3520 or GEOG:2910.

ENTR:4510 Arts Leadership Seminar 3 s.h.

Performing arts management and administrative principles, practical applications, trends in arts leadership and advocacy. Prerequisites: THTR:3510 or ENTR:2000 or THTR:3520. Same as DPA:4510, INTD:4510, THTR:4510.

ENTR:4900 Academic Internship arr.

Professional internship experience with academic credit (e.g., paper, coursework).

ENTR:4999 Honors Thesis in Entrepreneurial Studies arr.

Independent study project directed by a faculty member or staff advisor, and culminating in a thesis that conforms to University of Iowa Honors Program guidelines; project includes empirical research, library research, applied projects. Requirements: honors standing, UI g.p.a. of at least 3.50, and enterprise leadership g.p.a. of 3.50.

ENTR:9000 Developing Professional Service Business 2-3 s.h.

Use of professional skills and functional knowledge in creating a specialized service business. Same as CEE:5210.

ENTR:9100 Entrepreneurship and Innovation 3 s.h.

The entrepreneurial process from conception to birth of a new venture; attributes of successful entrepreneurs, innovation and creativity, opportunity recognition, venture screening, identification of resources, feasibility analysis.

ENTR:9150 Venture School International arr.

Innovative training focused on real-world experimentation, customer discovery, and lean methodologies; curriculum developed by the National Science Foundation I-Corps to help entrepreneurs and startups turn their ideas into reality; individual and team ideation, problem identification, and validation using real customer discovery interviews; students test their hypothesis by talking with customers, partners, and suppliers; encountering chaos and uncertainty of commercializing innovations and creating new ventures in a safe environment; creation of a business model that creates value.

ENTR:9400 Evaluating Innovation Opportunities 2-3 s.h.

Integrated, cross-functional perspective of how organizations identify and evaluate opportunities and develop strategies to compete in a global marketplace; innovation and creativity, opportunity recognition, venture screening, identification of resources, and strategic business planning.

ENTR:9450 Strategic Management of Technology and Innovation 3 s.h.

Role of technology in creation, growth, and survival of industries; processes, risks, and rewards of technological innovation and commercialization; successful approaches to developing technological strategy and products.

ENTR:9500 Managing the Growth Business 3 s.h.

Issues faced by new, rapidly growing businesses; adapting organizational structure as business expands, building a management team, hiring new employees, managing strategic growth of a business; case studies, particularly in technology sector.

ENTR:9550 Commercializing New Technology 3 s.h.

Hands-on experience with the process of technology commercialization; real-world opportunity in the form of a technology developed in an academic environment or in the private sector and creation of a plan to transfer that technology to the marketplace; identifying a specific application of that technology (the product); identifying and sizing relevant market segments; determining the appropriate business and financial model; designing a business plan; presentation of business plans/opportunities to simulated venture capitalists.

ENTR:9600 Seminar in Entrepreneurship 1-3 s.h.

Topics vary; franchising, business acquisition, real estate development, e-commerce, technology transfer.

ENTR:9700 Entrepreneurship: Business Consulting 3 s.h.

Experience on teams providing consulting services to start-up and early-stage companies; the consulting process—proposal development, data collection and analysis, final report preparation and presentation; projects—marketing studies, financial projections, strategic planning.

ENTR:9800 Entrepreneurship: Advanced Business Planning 0-3 s.h.

Mentoring for individuals in final stages of preparing to launch their own business or working with an entrepreneurial venture to grow their business.

Entrepreneurial Management, Certificate

Students who pursue the Certificate in Entrepreneurial Management develop a solid foundation in entrepreneurial management, professional leadership, and communication skills that prepare them for a variety of career opportunities or to start their own business. They are able to apply their innovative problem-solving and critical thinking skills to contemporary issues, to develop strategies to seize upon opportunities, and to build and lead successful teams.

Students learn from a select team of faculty members, business executives, and entrepreneurs who have distinguished themselves in the business world and have a unique ability to successfully teach theory and practice. Students will have the opportunity to meet successful alumni and entrepreneurial leaders to help them build their professional network. Several cocurricular programs also are available to help students develop additional marketable skills and strengthen their résumés for career success.

Students develop the following skills in the program: innovation and creativity, opportunity recognition, developing and executing business strategies, building and leading interdisciplinary teams, market assessments, financial forecasting and evaluation, professional communications, critical thinking, and problem solving.

Requirements

The undergraduate Certificate in Entrepreneurial Management requires a minimum of 18 s.h. of credit. Students must maintain a g.p.a. of at least 2.00 in work for the certificate.

The certificate program is open to current University of Iowa undergraduate students and to individuals who have earned a bachelor's degree and are not enrolled in a UI graduate or professional degree program, except to students earning the B.B.A. in management (entrepreneurship management track) or the B.A. in enterprise leadership.

Undergraduate students must declare their intention to pursue the certificate. Business students should contact the Tippie College of Business Undergraduate Program Office. Liberal arts and sciences students should contact the Office of Academic Programs and Student Development.

Students earning the certificate in conjunction with the Bachelor of Applied Studies [p. 1958] (University College) or the Bachelor of Liberal Studies [p. 1961] (University College) may complete the certificate's coursework by distance education.

Students may begin working toward the Certificate in Entrepreneurial Management during their sophomore year. They may count a maximum of 6 s.h. of transfer credit toward the certificate, with approval from the entrepreneurship program director. Credit earned in entrepreneurship courses (prefix ENTR) is counted as semester hours earned in business.

The Certificate in Entrepreneurial Management requires the following coursework. Many certificate courses have prerequisites and other requirements for registration; students must complete a course's prerequisites and must meet its registration requirements before they may register for the course.

Entrepreneurship Core

To begin work on the certificate, students should first enroll in ENTR:2000 Entrepreneurship and Innovation; students pursuing the Certificate in Arts Entrepreneurship should enroll in ENTR:3520 Starting Up the Arts Start-up. For non-business students, ENTR:1350 Foundations in Entrepreneurship must be taken prior to or concurrently with ENTR:2000 or ENTR:3520.

Code	Title	Hours
One of these:		
ENTR:2000	Entrepreneurship and Innovation	3
ENTR:3520	Starting Up the Arts Start-up (for students with focus on arts entrepreneurship)	3
All of these:		
ENTR:3100	Entrepreneurial Finance	3
ENTR:3200	Entrepreneurial Marketing	3
ENTR:4400	Managing the Growth Business	3

Electives

Students earn an additional 6 s.h. in elective courses chosen from the following list. Students who wish to use a course not on the list must consult with the John Pappajohn Entrepreneurial Center director.

Code	Title	Hours
ENTR:1800	Innovation in Action: Sustainability	0-1
ENTR:2800	Entrepreneurial Experience	1-3
ENTR:3000	Practicum in Entrepreneurship	1-3
ENTR:3400	Strategic Management of Technology and Innovation	3
ENTR:3500	Social Entrepreneurship	3
ENTR:3595	Nonprofit Organizational Effectiveness I	3
ENTR:3600	E-Commerce Strategies for Entrepreneurs	3
ENTR:3700	Sustainable Product Innovation and Management	3
ENTR:4000	Topics in Entrepreneurship	1-3
ENTR:4050	Directed Readings in Entrepreneurship	arr.
ENTR:4100	International Entrepreneurship and Culture	1-3
ENTR:4200	Entrepreneurship: Business Consulting	3
ENTR:4300	Entrepreneurship: Advanced Business Planning	3
ENTR:4450	Professional Sports Management	3
ENTR:4460	Entrepreneurship and Global Trade	3
ENTR:4510	Arts Leadership Seminar	3
ENTR:4900	Academic Internship	3

ENTR:4999	Honors Thesis in Entrepreneurial Studies	arr.
MGMT:4100	Dynamics of Negotiations	3

Finance

Chair

- Thomas A. Rietz

Undergraduate major: finance (B.B.A.)

Graduate degrees: M.S. in finance; finance subprogram for the Ph.D. in business administration

Faculty: <https://tippie.uiowa.edu/people?departments=170>

Website: <https://tippie.uiowa.edu/finance>

The Department of Finance is committed to delivering programs of study that integrate the technology and analytics of today's global financial community. The goal is to provide students with the technical skills they need to enhance their managerial effectiveness, whether they work in large corporations, small organizations, or private consulting.

The department offers the undergraduate major in finance, the Master of Science program in finance, and the subprogram in finance that leads to the Ph.D. in business administration. Additionally, they participate in the M.B.A. program; see the Master of Business Administration Program [p. 1225] in the Catalog. The department also partners with the Emmett J. Vaughan Institute of Risk Management and Insurance to offer the undergraduate Certificate in Risk Management and Insurance [p. 1237].

Programs

Undergraduate Program of Study

Major

- Major in Finance (Bachelor of Business Administration) [p. 1188]

Graduate Programs of Study

Majors

- Master of Science in Finance [p. 1190]
- Finance subprogram for the Doctor of Philosophy [p. 1193] in Business Administration

Courses

Finance Courses

FIN:1300 First-Year Seminar **1 s.h.**
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

FIN:3000 Introductory Financial Management **3 s.h.**
Financial management goals and decision making; time value of money; valuation of bonds and stocks, risk and return analysis, cost of capital, capital budgeting, cash flow estimation; financial statement analysis and financial planning. Prerequisites: ECON:1200 and ACCT:2100 and ECON:1100. Corequisites: for finance majors—FIN:3100. Requirements: 60 s.h. completed.

FIN:3020 Professional Finance Seminar **1 s.h.**
Seminar topics include finance careers, curriculum, understanding of current events, internships, professional designations, ethics, and general finance acumen.

FIN:3100 Financial Information Technology **2 s.h.**
Applications of commonly used financial software and data systems reviewed by student teams. Corequisites: FIN:3000.

FIN:3200 Investment Management **3 s.h.**
Investment in marketable securities in domestic and international markets; financial markets, securities trading, evaluation of risk/return trade-off, formulation and implementation of investment strategies, efficient portfolio formation. Prerequisites: FIN:3000. Corequisites: FIN:3100.

FIN:3300 Corporate Finance **3 s.h.**
Advanced managerial decision making; corporate financial policy, dividend policy, agency theory, corporate restructuring, capital structure strategies, mergers and acquisitions, option pricing fundamentals, convertible debt, callable debt, warrants. Prerequisites: FIN:3000. Corequisites: FIN:3100.

FIN:3400 Principles of Risk Management and Insurance **3 s.h.**
Introduction to risk and insurance; risk identification and evaluation, demand for insurance, effects of limited liability, theory of moral hazard and adverse selection; business and personal risk; insurance as a risk management tool. Prerequisites: ECON:1100 and ECON:1200.

FIN:3500 Hawkinson Scholar Seminar **1 s.h.**
Advanced skill and understanding required for pursuit of investment banking, management consulting careers; specialized résumé and interview training, industry presentations, relevant case assignments.

FIN:3510 Hawkinson Scholar Seminar: Topics in Finance **0 s.h.**
Subsectors in the financial services industry, including hedge funds, investment banking, commercial banking; valuation techniques used in real-world mergers, acquisitions, equity offerings, debt financing, and so forth.

FIN:4020 Topics in Finance **3 s.h.**
Contemporary issues in finance. Prerequisites: FIN:3000 and FIN:3100.

FIN:4030 Securities Industry Essentials Exam Prep **1 s.h.**
Preparatory program for passage of the Securities Industry Essentials (SIE) exam and includes a voucher to take the exam upon completion; much of the material is provided online with additional meetings and review sessions; the SIE exam is for any professional who needs a Series 6, Series 7, or any other exam required by the Financial Industry Regulatory Authority (FINRA). Prerequisites: FIN:3000 or MBA:8180.

FIN:4050 Directed Readings in Finance **arr.**
Individually guided readings in selected topics.

FIN:4210 Futures and Options **3 s.h.**
Use of options, futures, and other derivative securities in financial management; understanding types of derivative securities, markets, trading technology; applications of risk management and speculation; pricing relations with underlying securities. Prerequisites: FIN:3100 and FIN:3200.

FIN:4220 Fixed Income Securities **3 s.h.**
Theories of fixed income securities, term structure of interest rates; asset pricing models, valuation of fixed income securities and contingent claims, fixed income portfolio management, immunization strategies, yield curve analysis. Prerequisites: FIN:3000 and FIN:3100. Corequisites: FIN:3200.

- FIN:4230 Real Estate Process** 3 s.h.
Fundamentals of real estate finance and investments; economic base analysis, asset analysis, market analysis, mortgage markets, underwriting, alternative mortgages, mortgage-backed securities, real estate securitization, land development, valuation principles, investment analysis, tax consideration, portfolio management. Prerequisites: FIN:3000 and FIN:3100.
- FIN:4240 International Finance** 3 s.h.
International monetary systems, exchange rate determination, use of currency derivative in hedging and risk management, currency swaps, foreign direct investment, international corporate finance, international capital budgeting, international portfolio investment, Third World debt, privatization, joint ventures. Prerequisites: FIN:3000 and FIN:3100 and FIN:3200.
- FIN:4250 Applied Equity Valuation** 3 s.h.
Equity valuation and portfolio management techniques by investment professionals; economic forecasting, industry analysis, financial statement analysis, spreadsheet modeling, cost of capital estimation, equity valuation and portfolio construction; students manage the University of Iowa's Krause Fund (an endowed equity portfolio that blends academic rigor with real-world portfolio management experience). Prerequisites: FIN:3100 and FIN:3000. Requirements: UI cumulative g.p.a. of at least 2.80.
- FIN:4310 Advanced Corporate Finance** 3 s.h.
Understanding and evaluating major corporate actions such as mergers and acquisitions, initial public offerings, spin offs, and debt and equity issuance; introduction to venture capital and leveraged buyouts; includes a substantial experiential learning component and attempts to nudge students away from textbook-based learning towards acquiring practical skills needed to succeed in the corporate finance industry; students will be required to collect and evaluate financial information and be challenged to think beyond the lecture material presented in the classroom. Prerequisites: FIN:3100 and FIN:3300.
- FIN:4320 Commercial Banking** 3 s.h.
Management of commercial banks and financial service firms; asset and liability management, credit policy, capital risk, liquidity planning, use of swaps and derivatives to hedge interest rate risk, global banking, investment strategies. Prerequisites: FIN:3100 and FIN:3000.
- FIN:4330 Investment Banking** 3 s.h.
How investment banks fill critical roles in maintaining well-functioning financial markets and provide access to capital and strategic advice to companies and governments; recent global financial crisis; how banker's role as intermediary between companies and markets adds value and creates conflicts and risk. Prerequisites: FIN:3100 and FIN:3300 and FIN:3000.
- FIN:4340 Wealth Management** 3 s.h.
Financial services for client wealth management; how to make personal investment decisions and build diversified, comprehensive investment portfolios; investment theory; common behavioral biases that lead to investment pitfalls, mistakes; wealth management objectives, portfolio risk and reward, asset allocation, portfolio diversification, tax shield structures, retirement plans, wealth protection, risk management, behavioral finance, psychology of investing. Prerequisites: FIN:3000 and FIN:3100.
- FIN:4350 Applied Wealth Management** 3 s.h.
How wealth management relates to managing the financial well-being of individuals; process of determining goals and objectives for someone and assessing their risk tolerances; development of a strong financial plan involving a variety of steps and process including insurance needs, savings requirements, estate planning, budgeting, asset allocation, and portfolio development; experiential component where students make recommendations for real clients or a pool of funds. Prerequisites: FIN:3000 and FIN:3100.
- FIN:4410 Enterprise Risk Management** 3 s.h.
Analysis and treatment of pure and financial risks faced by business organizations; development and implementation of the risk management process, application of varied risk management techniques to identified exposures; how businesses manage risk and how insurance is used to manage the cost of risk; case studies. Prerequisites: FIN:3400.
- FIN:4420 Property and Liability Insurance** 3 s.h.
Fundamentals of commercial property and liability insurance; commercial property and liability contracts, functions of property and liability insurers; regulation and financial analysis of property and liability insurers; marketing, underwriting, rate making, claim settlements. Prerequisites: FIN:3400.
- FIN:4430 Life and Health Insurance** 3 s.h.
Types of life insurance and annuity contracts and their uses; regulation of life and health insurers; development of financial plans using life insurance products; Social Security, group, and individual health insurance products, including major medical, disability income, long-term care policies; marketplace analysis; contractual provisions, determination of human life values, mathematics of life contingencies and pricing. Prerequisites: FIN:3400.
- FIN:4440 Employee Benefit Plans** 3 s.h.
Management of employee benefit plans (e.g., group life and health insurance, retirement programs); design, administration, and financing of employee benefits; federal administration of employee benefit plans; funding requirements, financial alternatives; funding and vesting of retirement annuities; design and management of health care plans, including "cafeteria" approach and nonqualified deferred compensation arrangements; economic effects and financing employee benefits and retirement plans in private and public sectors. Prerequisites: FIN:3400.
- FIN:4450 Risk Modeling** 3 s.h.
Theory used to solve real-life problems taken from a diverse set of risk management applications; varied areas where risk analysis has become important (i.e., finance, insurance, corporate risk management, personal financial planning); principles of probability theory, mathematical finance, and actuarial science developed for use in quantitative analysis of important risk management problems; spreadsheet-based course. Prerequisites: FIN:3000.
- FIN:4460 Insurer Operations and Captive Management** 3 s.h.
Fundamentals of insurer and captive operations; regulation, accounting, finance, marketing, underwriting, reinsurance, ratemaking, and claims management; students set up and manage a captive insurance company covering risk exposures of the University. Prerequisites: FIN:3400.
- FIN:4999 Honors Thesis in Finance** arr.
Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University of Iowa Honors Program guidelines; may include empirical research, library research, applied projects.

- FIN:7110 Finance Theory I** **3 s.h.**
Consumption-based models of asset pricing; arbitrage, contingent claims; market efficiency and information economics, behavioral models; emphasis on theory. Requirements: Ph.D. enrollment.
- FIN:7120 Seminar in Corporate Finance** **3 s.h.**
Valuation (DCF and CAPM); valuation under certainty, uncertainty; financial structure, cost of capital; dividend policy; firm investment in perfect, imperfect capital markets. Requirements: Ph.D. enrollment.
- FIN:7130 Finance Theory II** **3 s.h.**
Continuous time theories of financial markets, including connection between an arbitrage-free pricing system and martingales; pricing of contingent claims, general equilibrium and term structure theory. Requirements: Ph.D. enrollment.
- FIN:7140 Advanced Empirical Finance** **3 s.h.**
Market efficiency and term structure theory tests; tests of asset pricing models, dividend policy and financial structure issues. Requirements: Ph.D. enrollment.
- FIN:7850 Seminar in Finance** **1 s.h.**
Requirements: Ph.D. enrollment.
- FIN:7950 Directed Reading in Finance - Ph.D.** **arr.**
Requirements: Ph.D. enrollment.
- FIN:7975 Thesis in Business** **arr.**
- FIN:9000 Directed Readings in Finance - M.B.A.** **arr.**
- FIN:9001 Directed Readings in Finance - Master of Science in Finance** **arr.**
Coursework and topics negotiated between student and instructor on a case-by-case basis. Prerequisites: MBA:8180.
- FIN:9010 Contemporary Topics in Finance** **arr.**
- FIN:9140 Enterprise Risk Management** **2-3 s.h.**
Analysis and treatment of risks faced by businesses; how risk management creates value in corporations, includes development and implementation of the risk management process, and explores the application of various risk management techniques to identified exposures; use of case studies to study how businesses manage risk, and how insurance and other risk management tools help reduce the cost of risk. Prerequisites: MBA:8180.
- FIN:9150 Financial Modeling and Firm Valuation** **2-3 s.h.**
How to model firm value from a discounted cash flow perspective; identify a company's key value drivers, create spreadsheet valuation models; projected financial valuation integrates projected pro forma accounting statements; forecasting, free cash flow estimation, industry competitive analysis. Prerequisites: MBA:8180.
- FIN:9160 Quantitative Finance and Deep Learning** **0,3 s.h.**
Quantitative techniques in investment and trading with focus on machine learning approaches; introduction to quantitative approaches already popular in investment and trading including quantitative security selection, portfolio construction, statistical arbitrage, and algorithm trading; emerging machine learning techniques in financial industry including advanced regression methods, news sentiment analysis, and deep learning with applications in price forecasting and high frequency trading. Corequisites: BAIS:6060 or BAIS:6040, if not taken as a prerequisite.
- FIN:9200 Portfolio Management** **2-3 s.h.**
Introduction to fundamental elements of modern portfolio theory, application to investment analysis; investment environment, instruments, types of investors; concepts of risk and return, broad perspective on historical risk and return of various asset classes; asset allocation decision, risk and return dynamics of a multiple securities portfolio; varied asset pricing models, how capital markets work for investors and users of capital. Prerequisites: MBA:8180.
- FIN:9210 Derivatives** **2-3 s.h.**
Examination of the wide range of derivative securities that cover the financial landscape; the market place, trading, and investors; different derivative securities in existence, their relationship with the underlying securities, and pricing; applications of derivative securities to risk management and speculation; application of principles to fixed income, international finance, real estate, and securitization. Prerequisites: MBA:8180.
- FIN:9220 Fixed Income Securities** **2-3 s.h.**
Conceptual framework and tools to undertake the valuation of fixed income securities and the management of fixed income portfolios; varied fixed income instruments and the markets in which they trade; introduction to basic building blocks of fixed income analysis, including concepts of duration, convexity, and term structure of interest rates; application of concepts in bond portfolio immunization strategies; use of interest rate derivatives in portfolio hedging applications. Prerequisites: MBA:8180.
- FIN:9225 Applied Fixed Income Analysis - Hart Fund** **3 s.h.**
Management of fixed income fund portfolio; legal environment in which the fund operates; students analyze and recommend fixed income investments, implement controls to monitor fund's performance; decisions and investment recommendations are made by students; each student is assigned a specific fixed income asset class (i.e., high-yield debt) to monitor, analyze, and predict future investment returns; employment of historical and predictive analytics to estimate short term and long term returns for asset classes; and collectively determine the mean variance portfolio. Prerequisites: MBA:8180 and FIN:9220.
- FIN:9230 Real Estate Finance and Investments** **2-3 s.h.**
In-depth understanding of concepts and techniques of real estate financial analysis, equity investment decision making; real estate investing from analysis of developments through the securitization of mortgages; mortgage markets and pricing, real estate finance and investments, mortgage-backed securities, development process, real estate valuation, tax effects, securitized real estate, real estate cycles, application of derivative instruments, strategic asset allocation. Prerequisites: MBA:8180.
- FIN:9240 International Finance** **2-3 s.h.**
Introduction to structure and functioning of global financial markets; currency market, international equity markets; use of derivatives in currency risk management for corporate and investment needs; corporate investment decisions in an international context. Prerequisites: MBA:8180.

FIN:9250 Applied Securities Analysis - Henry Fund**I 3 s.h.**

Manage Henry Fund portfolio, learn legal environment in which the fund operates, analyze potential investments, implement controls to monitor the fund's performance; decisions and investment recommendations made by students; each student analyzes an economic sector and geographic region (i.e., utilities analyst and specialist in South East Asia); while the fund cannot currently invest directly in foreign listed stocks, it holds U.S. listed stocks with significant overseas interests and students are able to invest in a number of ADRs. Prerequisites: MBA:8180.

FIN:9260 Applied Securities Analysis - Henry Fund**II 3 s.h.**

Continuation of FIN:9250. Prerequisites: FIN:9250 and MBA:8180.

FIN:9270 Security Analysis**3 s.h.**

Valuation of financial securities (primarily equities) using discounted cash flow model; industry, regulatory analysis; financial statement analysis; active portfolio management; value-based management techniques; valuation of firms outside the United States. Prerequisites: MBA:8180.

FIN:9280 Global Structured Finance**2-3 s.h.**

Design of debt, equity, and hybrid financing techniques and risk mitigation techniques to resolve issuer and investor problems that conventional methods cannot address; conceptual and practical understanding of structured and hybrid products; how securities are designed, priced and meet investors' needs; major structured financing and risk mitigating arrangements induced by global market conditions and developments. Prerequisites: MBA:8180.

FIN:9290 Alternative Investments and Portfolio Strategies**2-3 s.h.**

Continuation of FIN:9200; alternative investments, including hedge funds, private equity funds, and venture capital vehicles; purpose of alternative investments, including the risk/return profile of alternatives and correlations with traditional asset classes; specific hedge fund styles, strategies, risk profiles; portfolio strategy topics, including diversification benefits, management of downside risk, international diversification, behavioral finance, performance measures, and performance attribution analysis. Prerequisites: FIN:9200 and MBA:8180.

FIN:9300 Corporate Investment and Financing Decisions**2-3 s.h.**

Underpinnings and optimization of corporations' investment and financing decisions; firm-wide and project-specific cost of capital, optimal capital structure decisions; in-depth capital budgeting methods, including real options techniques; corporate investment module of the class includes simulation analysis using Crystal Ball; cost of capital, valuation techniques, advanced capital budgeting, capital structure and dividend policy, option pricing models applied to corporate finance. Prerequisites: MBA:8180.

FIN:9310 Corporate Financial Strategy**2-3 s.h.**

Major strategic decisions within the corporate form; risk management, including why firms engage in it, their methods for doing so, and exercises in the simulation of uncertainty; dividends and repurchases under the payout policy decision; corporate governance topics, including executive compensation, board structure, and institutional monitoring; merger and acquisitions analysis, including regulation, valuation, anti-takeover devices, payment method, and LBOs; divestitures and other restructuring topics, including corporate diversification, spin-offs, carve-outs, private workouts, and Chapter 11. Prerequisites: MBA:8180.

FIN:9330 Investment Banking**3 s.h.**

How investment banks fill critical roles in maintaining well-functioning financial markets and provide access to capital and strategic advice to companies and governments; recent global financial crisis; how banker's role as intermediary between companies and markets adds value and creates conflicts and risk. Prerequisites: MBA:8180.

FIN:9350 Wealth Management**2-3 s.h.**

Rapid growth of the field of wealth management over several decades, driven by general increase in personal wealth and increased responsibility for individuals to manage their own wealth; knowledge and tools to enter the financial services industry; financial planning industry, client characteristics, tax shield structures, insurance, asset allocation plans, estate planning, behavioral finance. Prerequisites: MBA:8180.

FIN:9390 Applied Financial Analysis: Industry Project**3 s.h.**

Hands-on practical experience in corporate finance or investments; work in teams on a corporate finance project or an investment project for a corporate or institutional client; partner companies identify financial issues, challenges, and opportunities for students to help solve; students work with the companies and a faculty member to provide an analysis of the situation and proposals of actions to be taken. Prerequisites: MBA:8180.

FIN:9391 Thesis in Finance - Master of Science in Finance**arr.**

Students conduct original research in finance, supervised by a Department of Finance faculty member. Prerequisites: MBA:8180.

FIN:9400 Professional Development and Business Acumen**0-3 s.h.**

Preparation for postgraduate careers and exposure to relevant information that does not fit cleanly into academic work; how to grow a professional network and build depth of knowledge and breadth of business acumen; focus on helping students investigate various finance roles, land the all-important summer and postgraduate employment, and demonstrate professionalism in business; informational input on current trends/topics from outside business professionals, along with shared student experiences, are important cornerstones and require student preparation and participation. Requirements: admission to M.S. in finance.

Finance, B.B.A.

Requirements

The Bachelor of Business Administration with a major in finance requires a minimum of 120 s.h., including 21 s.h. of work for the major. Students must have a cumulative g.p.a. of at least 2.00 in all college coursework attempted, all college coursework attempted in business, all college coursework attempted in the major, all coursework attempted at the University of Iowa, all business coursework attempted at the University of Iowa, and all coursework in the major attempted at the University of Iowa.

The program provides a balance of theory, applications, and financial information technology that facilitates students' transition from classroom to workplace. Through fundamental finance principles and state-of-the-art financial market information technologies, students develop analytical abilities to interpret financial market data, implement the latest trading and investment strategies, and make effective managerial decisions in national as well as international settings.

With the goal of enhancing students' career development, the program stresses learning by doing, partnership with industry, and internships. Students receive a balanced education consistent with the globalization of business and the explosion in financial markets and information technology.

The Bachelor of Business Administration with a major in finance requires the following coursework. For B.B.A. common requirements, see the Bachelor of Business Administration [p. 1130] in the Catalog.

Code	Title	Hours
Finance Common Required Courses		12
Finance Required Electives		9
Total Hours		21

Finance Common Required Courses

Code	Title	Hours
All of these:		
FIN:3020	Professional Finance Seminar	1
FIN:3100	Financial Information Technology	2
FIN:3200	Investment Management	3
FIN:3300	Corporate Finance	3
ACCT:3020	Financial Accounting and Reporting	3

Finance Required Electives

Code	Title	Hours
A total of three courses chosen from the following two lists:		
FIN:3400	Principles of Risk Management and Insurance	3
FIN:4020	Topics in Finance	3
FIN:4210	Futures and Options	3
FIN:4220	Fixed Income Securities	3
FIN:4230	Real Estate Process	3

FIN:4240	International Finance	3
FIN:4250	Applied Equity Valuation	3
FIN:4310	Advanced Corporate Finance	3
FIN:4320	Commercial Banking	3
FIN:4330	Investment Banking	3
FIN:4340	Wealth Management	3
or FIN:4350	Applied Wealth Management	
FIN:4450	Risk Modeling	3

Students may include a maximum of one of these in their three electives:

FIN:4410	Enterprise Risk Management	3
FIN:4420	Property and Liability Insurance	3
FIN:4430	Life and Health Insurance	3
FIN:4440	Employee Benefit Plans	3
FIN:4460	Insurer Operations and Captive Management	3

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Finance, B.B.A.

Course	Title	Hours
Academic Career		
Any Semester		

Students are required to complete 52 s.h. of non-business coursework. Courses with a prefix of ACCT, BAIS, BUS, ECON, ENTR, FIN, MGMT, MSCI, and MKTG will not count towards non-business hours. Check degree audit for non-business hours or confer with academic advisor.

To fulfill the Tippie RISE experiential learning requirement, complete an approved course in at least one of the following categories: research with faculty, internship course, study abroad, experiential course.^a

Students who need to complete the World Language requirement should consult with their academic advisor about when to add courses to plan of study. World Language counts as non-business coursework.

Students must satisfy the Tippie College of Business residence requirement: 45 s.h. of UI coursework after admission to Tippie.

Hours	14
Total Hours	120-123

- a See degree audit for course options.
- b Enrollment in math courses requires completion of a placement exam.
- c GE courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
- d BUS:2200 should be completed in the second year before FIN:3020.
- e FIN:3100 should be taken concurrently with FIN:3000; prerequisite for most Finance major courses.
- f BUS:3000 should be taken the first semester after admission to the Tippie College of Business; may be deferred one semester. Direct admits take BUS:3000 in their second year.
- g Select from list of approved courses in the General Catalog or on degree audit.
- h Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>

Career Advancement

Careers for students majoring in finance include corporate treasury operations, cash management, mergers and acquisitions, investment banking, sales and security trading, security analysis, commercial banking and financial services, credit analysis, mortgage lending, financial planning, consulting, public administration, insurance roles, and real estate.

Over 90 percent of students reported that they found permanent employment, were accepted to graduate school, or were not seeking employment within six months of graduation.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs. For more information about careers, visit the Pomerantz Career Center website.

Finance, M.S.

Requirements

The Master of Science program in finance requires a minimum of 45 s.h. of graduate credit. A major g.p.a. and a cumulative g.p.a. of at least 2.75 is required in all coursework.

The M.S. with a major in finance requires the following coursework.

Core Courses

Students should consult their academic advisor about the possibility of waiving a core course if they have a cumulative undergraduate g.p.a. of at least 3.30 or have passed the Certified Public Accountant (CPA) or Chartered Financial Analyst (CFA, Level 1) Examination.

Code	Title	Hours
FIN:9150	Financial Modeling and Firm Valuation	2
FIN:9200	Portfolio Management	3
FIN:9210	Derivatives	3
FIN:9220	Fixed Income Securities	3
FIN:9300	Corporate Investment and Financing Decisions	3
FIN:9400	Professional Development and Business Acumen (taken fall and spring semesters for 1 s.h. each)	2
BAIS:9100	Data and Decisions	3
MBA:8130	Business Communication (taken spring and fall semesters for 1 s.h. each)	2
MBA:8140	Corporate Financial Reporting	3
MBA:8170	International Economic Environment of the Firm	3
MBA:8180	Managerial Finance	3
Total Hours		30

Electives

Elective credit varies for students. The following elective coursework is possible. Students should consult their advisor.

Code	Title	Hours
All students must complete one of the following experiential elective options:		
FIN:9225	Applied Fixed Income Analysis - Hart Fund	3
FIN:9250 & FIN:9260	Applied Securities Analysis - Henry Fund I-II	6
FIN:9390	Applied Financial Analysis: Industry Project	3
FIN:9391	Thesis in Finance - Master of Science in Finance	arr.
Any of these:		
FIN:4030	Securities Industry Essentials Exam Prep	1
FIN:9140	Enterprise Risk Management	3
FIN:9230	Real Estate Finance and Investments	3

FIN:9240	International Finance	3
FIN:9280	Global Structured Finance	3

FIN:9330	Investment Banking	3
FIN:9350	Wealth Management	3
ACCT:9030	Financial Accounting Standards and Analysis	3
ACCT:9050	Taxes and Business Strategy	3
ACCT:9120	Design and Use of Cost Management Systems	3
ACCT:9130	Financial Reporting: Theory and Practice	3
ACCT:9170	Advanced Accounting Analytics	3
BAIS:6040	Data Programming in Python	3
BAIS:6050	Data Management and Visual Analytics	3
BAIS:6060	Data Programming in R	3
BAIS:6070	Data Science	3
BAIS:6140	Information Visualization	3
BAIS:9110	Advanced Analytics	3
BAIS:9210	Introduction to Modeling with VBA	3
CS:4400	Database Systems	3
CS:5110	Introduction to Informatics	3
ECON:4800	Econometric Analysis	3
ECON:5800	Econometrics	3
ISE:6760	Pattern Recognition for Financial Data	3
ISE:6780	Financial Engineering and Optimization	3
STAT:4100	Mathematical Statistics I	3
STAT:4101	Mathematical Statistics II	3

Additional elective credit possible for courses in analytics, computer science, engineering, mathematics, physics, statistics, or actuarial science (e.g., quantitative/technical) with advisor approval

Combined Programs

M.S./M.S. in Business Analytics (Career Subprogram)

The combined Master of Science in finance/Master of Science in business analytics with a career subprogram allows students to pursue two degrees simultaneously, earning both more quickly than they would if the degrees were pursued separately. The Department of Finance collaborates with the Department of Business Analytics to offer the combined program.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined program. For more information, see the M.S. in business analytics (career) [p. 1148] in the Catalog.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Applicants must:

- have earned a bachelor's degree from a U.S. college or university, or have earned an equivalent degree from another country;
- submit unofficial transcripts with their application and official transcripts for admission;
- have earned a minimum g.p.a. of at least 3.00 or the international equivalent;
- submit a statement of purpose with a maximum length of 500 words; and
- submit two recommendations that must be received within two weeks of the submission deadline.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

Applicants who use the IELTS test are required to take the on-campus English Proficiency Examination.

Application deadlines are as follows—

Priority deadline: December 15

International student deadline: March 15

Domestic student deadline: June 15

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Complete end of semester employment placement survey as directed by Career Management.		
Meet with your Career Management coach and Professional Director.		
Attend Career Management Center sessions offered.		
Verify completion of all degree requirements with program administrator.		
Apply to and secure post-graduation employment.		
Hours		13
Total Hours		45

- Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
- FIN:9400 is taken during both fall and spring of the first year for a total of 2 s.h.
- MBA:8130 is taken during both first year spring and second year fall for a total of 2 s.h.
- Choose electives from a pre-approved list or with departmental approval.

- e Spring experiential electives: FIN:9225, FIN:9391, or FIN:9250 (must also take FIN:9260 in fall). Fall experiential electives: FIN:9225, FIN:9391, FIN:9390, FIN:9260 (must have taken FIN:9250 in spring).
- f Apply to and secure a summer internship or arrange a summer research project.

Career Advancement

Careers for M.S. graduates in finance include corporate treasury operations, cash management, mergers and acquisitions, investment banking, sales and security trading, security analysis, commercial banking and financial services, credit analysis, mortgage lending, financial planning, consulting, public administration, insurance roles, and real estate.

The Career Services team offers multiple resources to help students find internships and jobs.

Doctor of Philosophy

Graduate students in finance may earn a Doctor of Philosophy in business administration. For a description of the Ph.D. program and requirements, see the Ph.D. in business administration [p. 1156] in the Catalog and visit the Department of Finance website.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

International Business

Coordinators

- Jennifer E. Bertrand (College of Liberal Arts and Sciences),
Stephanie G. Fountain (Tippie College of Business)

Undergraduate certificate: international business

Website: <https://tippie.uiowa.edu/current-students/undergraduates/academics/certificates/international-business-certificate>

The Tippie College of Business and the College of Liberal Arts and Sciences offer the undergraduate Certificate in International Business. The program is designed for students who intend to pursue careers in international business as well as those interested in gaining a better understanding of the global economy and a broader awareness of the political, historical, and social environment in which international business operates.

Programs

Undergraduate Program of Study Certificate

- Certificate in International Business [p. 1195]

International Business, Certificate

Requirements

The undergraduate Certificate in International Business requires a minimum of 29 s.h. and satisfaction of the certificate's world language or study abroad requirement (total credit depends on a student's choice of world language or study abroad experience). In addition to a world language or study abroad, the program includes study of international business and economics, international relations and institutions, and the contemporary art, literature, culture, and/or politics of one of several geographical regions (Asia, Europe, Latin America, Middle East/Africa, or Russia/Eastern Europe). The range of courses permits students to tailor areas of specialization suited to their individual interests and to complement majors in business and in liberal arts and sciences.

Students must maintain a g.p.a. of at least 2.00 in work for the certificate. Certificate courses may not be taken pass/nonpass. A course may not be used to satisfy more than one certificate requirement. The certificate program is open to current University of Iowa undergraduate students and to individuals who are not enrolled in a UI graduate or professional degree program.

Students should declare their intention to earn the certificate as early as possible, talk with an advisor about certificate requirements, and work to create an individual plan of study. Tippie College of Business students should talk with the advising staff at the college's Undergraduate Program Office; College of Liberal Arts and Sciences students should talk with a Certificate in International Business advisor at the Academic Advising Center. Individuals who hold a bachelor's degree from another institution should contact the University's Office of Admissions.

A minimum of 20 s.h. of certificate coursework (other than language courses) must be completed at the University of Iowa or in approved study abroad programs. Students who plan to count study abroad credit toward the certificate should consult a Certificate in International Business advisor before leaving campus.

The Certificate in International Business requires the following coursework.

Code	Title	Hours
	International Business Courses	17
	International Relations and Institutions Courses	6
	One of these:	0-20
	World Language (0-20 s.h., depending on student's background)	
	Study Abroad Experience (3 s.h. not used in another area for the certificate)	
	Area Studies Courses	6
	Total Hours	29-49

International Business

These courses provide students with an essential understanding of economics, which is central to all business operation. They also help students develop knowledge of the functional areas of international business.

Code	Title	Hours
Both of these:		
ECON:1100	Principles of Microeconomics	4
ECON:1200	Principles of Macroeconomics	4
Three of these (total of 9 s.h.):		
BUS:2450	Business and Culture in China	3
BUS:2550	International Business in Asia Pacific	3
ECON:3345	Global Economics and Business	3
ECON:3620	Economic Growth and Development	3
ECON:4110	International Economics	3
ENTR:4460	Entrepreneurship and Global Trade	3
FIN:4240	International Finance	3
MGMT:3450	International Business Environment	3
MGMT:4500	Strategy, Innovation and Global Competition	3
MKTG:4300	International Marketing	3
LAW:8600	International Business Transactions	3
LAW:8631	International Trade Law: Basic Norms and Regulations	3
One of these may be counted toward the 9 s.h. requirement above:		
CHIN:3103	Business Chinese I	3
FREN:3410	Business French	3
GRMN:3214	Business German	3
JPNS:3500	Japanese for Professional Purposes I	3
SPAN:2080	Business Spanish	4
SPAN:3080	Spanish for International Business	3

Tippie study abroad programs may be applicable, including London winter program; International Business in Sydney, Australia; International Business in Italy; Business and Culture in China; Tippie global internships; and more. Credit only applies in one area of the certificate. Students should consult their advisor to determine where their experience will apply.

International Relations and Institutions

These courses familiarize students with comparative politics, social geography, foreign policy, and issues related to world population and the environment—topics relevant to decision making in the international business world.

World Language or Study Abroad Experience

Certificate students gain insight into the culture of another world region and deepen their understanding of their own language and culture by learning a world language or completing a study abroad experience.

Students who choose language study are required to develop intermediate-level competence in a language that is spoken in one of several geographic regions (Asia, Europe, Latin America, Middle East/Africa, or Russia/Eastern Europe) by completing one of the approved language sequences below.

Students who choose to complete a study abroad experience are expected to coordinate it with the coursework they use to fulfill the certificate's area studies requirement (see "Area Studies" below). They must earn at least 3 s.h. of graded credit for the study abroad experience that is not used in another area of the certificate.

For questions about languages not listed or about study abroad coursework, see a Certificate in International Business advisor.

Arabic

Code	Title	Hours
All of these:		
ARAB:1001- ARAB:1002	Elementary Modern Standard Arabic I-II	10
ARAB:2001- ARAB:2002	Intermediate Modern Standard Arabic I-II	10

Chinese

Code	Title	Hours
This sequence:		
CHIN:1111- CHIN:1112	First-Year Chinese: First Semester - First-Year Chinese: Second Semester	10
One of these sequences:		
CHIN:2101- CHIN:2102	Second-Year Chinese: First Semester - Second-Year Chinese: Second Semester (both courses)	10
CHIN:2103- CHIN:2104	Accelerated Second-Year Chinese: First Semester - Accelerated Second-Year Chinese: Second Semester (both courses)	6

French

Code	Title	Hours
One of these:		
FREN:1001- FREN:1002	Elementary French I-II (both courses)	10
FREN:1010	First-Year French Review	5
All of these:		
FREN:2001- FREN:2002	Intermediate French I-II (both courses)	10
One course for which FREN:2002 is prerequisite (may include Iowa Regents Program credit)		

German

Code	Title	Hours
One of these:		
GRMN:1001- GRMN:1002	Elementary German I-II (both courses)	8
GRMN:1010	First-Year German Review	5
GRMN:1020	Intensive Elementary German	6
One of these:		
GRMN:2001- GRMN:2002	Intermediate German I-II (both courses)	8
GRMN:2020	Intensive Intermediate German	6
And:		
One course for which GRMN:2002 or GRMN:2020 is prerequisite		

Italian

Code	Title	Hours
One of these:		
ITAL:1101- ITAL:1102	Elementary Italian I-II (both courses)	10
ITAL:3002	Intensive Elementary Italian	6

All of these:

ITAL:2203- ITAL:2204	Intermediate Italian I-II (both courses)	8
-------------------------	--	---

One course for which ITAL:2204 is prerequisite

Japanese

Code	Title	Hours
All of these:		
JPNS:1001- JPNS:1002	First-Year Japanese: First Semester - First-Year Japanese: Second Semester	10
JPNS:2001- JPNS:2002	Second-Year Japanese: First Semester - Second-Year Japanese: Second Semester	10

Korean

Code	Title	Hours
All of these:		
KORE:1101- KORE:1102	First-Year Korean: First Semester - First-Year Korean: Second Semester	8
KORE:2101- KORE:2102	Second-Year Korean: First Semester - Second-Year Korean: Second Semester	8

Portuguese

Code	Title	Hours
One of these:		
PORT:2000	Accelerated Elementary Portuguese	5
PORT:2010 & PORT:2015	Elementary Portuguese I-II (both courses)	6
PORT:3050	Intensive Portuguese for Spanish Speakers	4

And this course, unless PORT:3050 is taken:

PORT:2500	Accelerated Intermediate Portuguese	5
-----------	-------------------------------------	---

And:

One course for which PORT:2500 or PORT:3050 is prerequisite

Russian

Code	Title	Hours
All of these:		
RUSS:1111- RUSS:1112	First-Year Russian I-II	10
RUSS:2111- RUSS:2112	Second-Year Russian I-II	8

And:

One course for which RUSS:2112 is prerequisite

Spanish

Code	Title	Hours
One of these:		
SPAN:1001- SPAN:1002	Elementary Spanish I-II (both courses)	10
SPAN:1003	Elementary Spanish Review	5
SPAN:1004	Accelerated Elementary Spanish	6

One of these:

SPAN:1501- SPAN:1502	Intermediate Spanish I-II (both courses)	10
SPAN:1503	Accelerated Intermediate Spanish	6
SPAN:1505	Accelerated Intermediate Spanish for Heritage Speakers	5

And:

One course taught in Spanish for which SPAN:1502, SPAN:1503, or a higher-level course is prerequisite

Swahili

Code	Title	Hours
All of these:		
SWAH:1001- SWAH:1002	Elementary Swahili I-II	8
SWAH:2001- SWAH:2002	Intermediate Swahili I-II	8

Area Studies

Area studies topics are critical to students' understanding of how society and culture influence the people with whom they share the world—and with whom they may conduct business. The following courses help students learn about the culture, contemporary history, art, literature, and politics of a specific geographic region.

Students complete 6 s.h. from one geographic region. They should select a region that is related to their chosen world language or study abroad experience.

Asia

Appropriate for these languages: Chinese, Japanese, or Korean.

Total Hours		48-52

- a If completing world language proficiency instead of study abroad. Students who choose this option are required to develop intermediate-level competence in a language by completing an approved language sequence. See General Catalog for details.
- b Area studies courses must align with world language or study abroad geographic region.
- c See General Catalog for a list of approved courses.

Management and Entrepreneurship

Chair

- Amy E. Colbert

Undergraduate major: management (B.B.A.)

Graduate degree: management subprogram for the Ph.D. in business administration

Faculty: [https://tippie.uiowa.edu/people?](https://tippie.uiowa.edu/people?department=Management%20and%20Entrepreneurship)

[department=Management%20and%20Entrepreneurship](https://tippie.uiowa.edu/management-and-entrepreneurship)

Website: <https://tippie.uiowa.edu/management-and-entrepreneurship>

The Department of Management and Entrepreneurship offers study in managing human resources, teamwork and project management, strategic management, law and ethics, leadership and personal development, negotiations, international business, and entrepreneurial management.

The department offers the undergraduate major in management and the subprogram in management that leads to the Ph.D. in business administration. Additionally, the Department of Management and Entrepreneurship contributes to the M.B.A. program; see the Master of Business Administration Program [p. 1225] in the Catalog.

Programs

Undergraduate Program of Study

Major

- Major in Management (Bachelor of Business Administration) [p. 1208]

Graduate Program of Study

Major

- Management subprogram for the Doctor of Philosophy [p. 1213] in Business Administration

Courses

Management and Entrepreneurship Courses

MGMT:1300 First-Year Seminar 1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

MGMT:2000 Introduction to Law 3 s.h.

Legal issues surrounding start-up and day-to-day management of a business; contract law, standard business formations, tort law, employment law, business ethics, and alternative dispute resolution. Requirements: sophomore standing.

MGMT:2100 Introduction to Management 3 s.h.

Principles of management, organizational structure, decision making, leadership, line-staff relationships, and administration of organizations; overview of the demands and challenges facing managers, behaviors of effective managers, management theory, personal effectiveness, decision making, team skills, and leadership skills. Requirements: sophomore standing.

MGMT:3050 Professional Preparation for Management 1 s.h.

Survey of career paths in the field of management through discussions with individuals working in human resources, management consulting, entrepreneurial endeavors, and more; hands-on activities for students to hone the skills required to succeed in today's workplace.

MGMT:3200 Individuals, Teams, and Organizations 3 s.h.

Theories of organizational behavior applied to current business trends for individuals, teams, organizations; personality, managing diversity, work-family conflict, self-managed teams, charismatic leadership, work motivation, managing conflict, organizational culture. Prerequisites: MGMT:2000 and MGMT:2100.

MGMT:3250 Leading Innovation 3 s.h.

Knowledge and skills needed to lead teams and organizations—formally or informally—to achieve sustainable innovation culture, strategy, execution, and outcomes; how to navigate corporate innovation challenges from culture to management and resourcing, in order to successfully lead innovation efforts; problem definition, critical thinking, metrics, design thinking, and entrepreneurial business model development; innovation prerequisites, roles, leadership skills, and strategy. Prerequisites: MGMT:2000 and MGMT:2100.

MGMT:3300 Strategic Human Resource Management 3 s.h.

People management activities, policies, and practices that promote effective organizations; how changes in technology, business restructuring, legal and social concerns, other issues affect human resource management. Prerequisites: MGMT:2000 and MGMT:2100.

MGMT:3400 Employment Law 3 s.h.

Laws affecting employers and employees, such as regulatory health and safety policies, unemployment and retirement benefits, and employment discrimination including hiring, termination, testing issues. Prerequisites: MGMT:2000 and MGMT:2100.

MGMT:3450 International Business Environment 3 s.h.

Differences in international and domestic business; cultural, legal, political factors for managers. Requirements: junior or higher standing.

MGMT:3500 Nonprofit Organizational Effectiveness I 3 s.h.

Operational and financial aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as ENTR:3595, MUSM:3500, NURS:3595, RELS:3700, SSW:3500.

MGMT:3600 Nonprofit Organizational Effectiveness II 3 s.h.

Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Same as NURS:3600, RELS:3701, SSW:3600.

MGMT:3700 Field Experience: Nonprofit Leadership and Philanthropy 3 s.h.

Faculty-supervised professional work experience with a nonprofit organization with associated academic content.

MGMT:3800 Entrepreneurial Leadership Academy I 3 s.h.

Students hone leadership and project management skills through weekly workshops, guest speakers, and course discussion; preparation to actively manage and lead all phases of a business project; topics include client management, advanced project management skills, how to have tough conversations at work, and how to structure and lead a meeting for optimal results; first in a two-course sequence. Prerequisites: MGMT:2100. Requirements: declared management and entrepreneurship major and 60 s.h. completed. Same as ENTR:3800.

MGMT:3850 Entrepreneurial Leadership Academy II 3 s.h.

Work in small groups to provide strategic management consulting services to Iowa-based companies; experienced entrepreneurs and C-level executives provide mentoring to teams; students independently communicate with their client, learn to employ the latest techniques for assessing competitive markets and identifying growth opportunities, and ultimately develop recommendations and prepare a final report for their client; second in a two-course sequence. Prerequisites: MGMT:3800 or ENTR:3800. Same as ENTR:3850.

MGMT:3999 CIMBA Italy Experiential Leadership 1-3 s.h.

Leadership Initiative for Excellence (LIFE) includes a three-day training that enhances key leadership competencies including effective communication, decision making, teamwork, focus, and interpersonal skills; Learn, Enrich, Achieve, Perform (LEAP) includes and builds upon concepts in LIFE, and is a semester-long professional development program that utilizes self-assessment, one-on-one and group coaching, and developmental seminars; for students enrolled in the CIMBA Italy Program.

MGMT:4000 Topics in Management 1-3 s.h.

Topics not regularly offered in other courses. Prerequisites: MGMT:2100.

MGMT:4050 Directed Readings in Management and Organizations arr.**MGMT:4100 Dynamics of Negotiations** 3 s.h.

Predictable aspects and dynamics of bargaining experiences; simulations, experiential exercises to foster skills needed for effective negotiation in almost any situation. Requirements: 60 s.h. completed.

MGMT:4200 Staffing and Talent Management 3 s.h.

Staffing processes; external influences such as labor markets, the legal environment; support activities such as job analysis, employment planning; staffing activities such as internal and external recruiting, selection. Prerequisites: MGMT:3300 and MGMT:3200. Corequisites: MGMT:3400.

MGMT:4300 Leadership and Personal Development 3 s.h.

Practical development and application of leadership and managerial skills to enhance individual and organizational effectiveness. Prerequisites: MGMT:3200.

MGMT:4325 Team and Project Management 3 s.h.

Fundamentals of managing teams and group projects; emphasis on practical application, using case studies, and interactive and experiential exercises. Prerequisites: MGMT:3200 and MGMT:3300.

MGMT:4350 Performance Management and Strategic Rewards 3 s.h.

Role of pay and other rewards on organizational objectives; compensation's impact on employee behavior and performance; mix of pay and benefits in compensation systems; legal environment regulating pay and benefits; nonmonetary forms of reward; the role of performance management, pay, and other rewards on employee performance and organizational objectives is examined; includes performance appraisals, coaching, performance feedback, incentive systems, the mix of pay and benefits in compensation systems, and the legal environment regulating pay and benefits. Prerequisites: MGMT:3300 and MGMT:3200.

MGMT:4500 Strategy, Innovation and Global Competition 3 s.h.

Development of skills for firm strategy formation in a complex and technology-driven global economy; analytical tools that are essential to any consultant, manager, or entrepreneur facing dynamic industry environments. Prerequisites: MGMT:2100.

MGMT:4600 Nonprofit Ethics and Governance 3 s.h.

Tools to help identify, understand, and resolve ethical issues in nonprofit sectors; how individual beliefs and societal standards shape ethical decision making; application of ethical frameworks to classic and contemporary ethical dilemmas; how various forms of governance shape ethical behavior in organizations; case studies, readings, lectures, and guest speakers.

MGMT:4999 Honors Thesis in Management arr.

Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University of Iowa Honors Program guidelines; may include empirical research, library research, applied projects.

MGMT:7120 Methods for Field Research (Ph.D.) 2 s.h.

Field methods commonly used in behavioral research with emphasis on surveys; different types of field research designs; evaluation of advantages and disadvantages of different research approaches; practice generating research questions and hypotheses appropriate for field survey designs; issues related to levels of analysis; develop and administer surveys to maximize response rates; identify appropriate samples; brief introduction to statistical approaches for analyzing survey data.

MGMT:7124 Methods for Qualitative Research 2 s.h.

Qualitative methods available to researchers; role and contributions of qualitative methods in research; reasons why qualitative research papers get rejected by journals and strategies to avoiding them; work with qualitative data; philosophy of science, formulating research questions, sampling and gaining access, alternative qualitative data collection methods, ways of coding and analyzing qualitative data, building theory from qualitative data.

MGMT:7128 Methods for Experimental Research 2 s.h.

Nature of research and principles of experimental design, including laboratory and field experiments (quasi-experiments), event sampling, and methods of small-group research; analysis of variance (ANOVA), analysis of covariance (ANCOVA), multi-attribute analysis of variance (MANOVA); orthogonal, planned and unplanned comparisons, factorial experiments including repeated measures, nested-factors design, Latin square designs; analysis of data sets with SPSS.

MGMT:7140 Meta-Analysis in Behavioral Social Sciences (Ph.D.) 3 s.h.

Methods for quantitative integration of findings in behavioral and social sciences; overall effect size or correlation, whether conflicting findings documented in research literature are due to moderators (interactions) or statistical and measurement artifacts.

MGMT:7160 Measurement Theory and Methods in the Behavioral and Social Sciences (Ph.D.) 3 s.h.

Measurement and statistical methods needed for conduct of methodologically sound, publishable research; kinds and levels of measurement; role of measurement in theory development and cumulative research knowledge; theory of measurement error; types of reliability and their estimation; corrections for bias in research results due to measurement error; basic scaling methods; criterion-related, content, and construct validity; cross-validation and shrinkage formulas; factor analysis; statistical power in research studies; introduction to meta-analysis; item analysis and scale construction; structural equation modeling. Requirements: basic statistical methods course.

MGMT:7320 Organizational Theory Ph.D. 2 s.h.

Organizational theory; effect of changing environment and technological factors on organizational structure and effectiveness; resource dependency and power, conflict, interorganizational network, population ecology, economic theories of organization, institutional theory.

MGMT:7323 Foundations of Organizational Theorizing 2-3 s.h.

Examination of the field of micro-organizational behavior (micro-OB); development of ability to evaluate and generate papers that make a theoretical contribution to the field; classic and contemporary research related to prevailing theories; students engage in weekly writing, including a series of theory building exercises and peer reviewing; objectives include supporting peers in generating new theoretical questions, models, and/or frameworks, and providing an overview of theoretical contributions in several important areas in organizational behavior.

MGMT:7328 Academic Writing 2-3 s.h.

Development of critical thinking skills and practices associated with successful academic writing; students learn and practice how to write stylized sections of a social science paper effectively (e.g., literature review, hypothesis development); how to write for impact; research-supported productive writing habits, including how to give and receive feedback on early drafts of writing; writing style/mechanics (e.g., using active voice); writing assignments include a combination of step-by-step revisions to an existing, self-selected paper and shorter hands-on exercises targeted at specific writing skills.

MGMT:7340 Group Processes (Ph.D.) 3 s.h.

In-depth understanding of how work groups and teams can be made more effective in organizations; team design issues (i.e., task type, interdependence, leadership, member composition); process issues including power, influence, communications, conflict, collective memory, and intergroup relations.

MGMT:7350 Leadership (Ph.D.) 3 s.h.

Understanding and preparation for implementing leadership in organizations; focus on reading and analysis of basic research-related leadership theories; contrast "great person" theories, traditional behavioral and situational theories, and transformational leadership theory.

MGMT:7360 Motivation and Attitudes (Ph.D.) 3 s.h.

Motivational processes, attitudes, communication and interorganizational networks; emphasis on motivational antecedents and consequences, theoretical implications for models of work performance.

MGMT:7370 Reward Systems (Ph.D.) 2 s.h.

Compensation systems, government influences, equity in compensation and individual wage determination; research-based examination of performance evaluation and appraisal, theories of work performance.

MGMT:7385 Social and Human Capital 2 s.h.

Theory, research, and methods for understanding social capital as a resource available to individuals resulting from the social structure which they are located; readings focus on application of social networks to various content areas at individual, team, and organizational units of analysis; examination of relationships among social and human capital on individual and team outcomes; emphasis on understanding existing theory and empirical findings; social network research in terms of study design and analysis through software programs including UCINET and R.

MGMT:7700 Mentored Research arr.

Management research conducted by doctoral students under faculty supervision; culminates in second-year research paper.

MGMT:7800 Foundations of Human Resource Management 2-3 s.h.

Broad survey of foundational topics in human resource management, particularly from a micro perspective, interspersed with special topics of growing interest within the field; introduction to foundational theoretical and empirical research on topics of staffing, training and development, performance management and compensation, including an examination of trending topics of interest in these areas; students develop skills necessary to evaluate, criticize, and contribute to literature on human resource management.

MGMT:7900 Contemporary Topics in Management and Organizations arr.

Research topics in human resources and organizational behavior.

MGMT:7950 Directed Readings in Management and Organizations arr.

MGMT:7975 Thesis in Management and Organizations arr.

Management research conducted by doctoral students under faculty supervision; culminates in dissertation.

MGMT:9090 Influence and Constructive Persuasion 3 s.h.

Exploration of methods of persuasion and the science behind why and how influence works in a contemporary business setting; leadership as a function of consensus building, convincing, and motivating in today's team-based, knowledge-centric enterprises; how leaders select from a variety of influence techniques to get others' commitment to a course of action rather than commanding others; persuasion—using solid evidence coupled with emotional appeal—as capacity to present a message in a way that leads others to support it; how persuasion, when used effectively, creates a sense of freedom—others freely choose your perspective and support it.

MGMT:9091 Corporate Social Responsibility and Sustainability 2-3 s.h.

Introduction to main corporate social responsibility (CSR) and sustainability issues; current debates; costs and benefits of CSR/sustainability; relationship between leadership, innovation, and CSR; CSR's effects on companies' ability to attract and retain good employees; numerous cases studies ranging from small to large companies from various sectors including food and agriculture, manufacturing, finance, mining, energy, retail, transportation; students read and debate articles and case studies written by leading business experts, academics, and CEOs; individual or teamwork on a CSR change analysis.

MGMT:9092 Effective Managerial Communication 2-3 s.h.

Decisive personal and organizational skills for business leaders and entrepreneurs; at individual level, students will refresh writing, listening, speaking, and interpersonal skills for business settings; at the organizational level, course provides crucial managerial skills—how to conduct an effective meeting, questioning skills for employment selection, engaging in small talk, and communication during a crisis.

MGMT:9093 Communication and Digital Strategy 3 s.h.
Fundamentals of applied communication skills—written, verbal, and presentations.

MGMT:9110 Dynamics of Negotiations 2-3 s.h.
Predictable aspects and dynamics of bargaining experiences; simulations, experiential exercises to foster skills needed for effective negotiation in almost any situation. Requirements: M.B.A. enrollment.

MGMT:9120 Leadership and Personal Development 2-3 s.h.
Major theories; determinants of leader effectiveness, personal and career success; practical development of leadership, managerial skills to enhance individual, organizational effectiveness.

MGMT:9130 Strategic Management of Change 3 s.h.
How congruence in organizational strategy, structure and culture, job design, and employee characteristics produces effective organizations; emphasis on managing organizational change, implementing and working in teams, project management. Prerequisites: MBA:8120.

MGMT:9150 Nonprofit Organizational Effectiveness I 3 s.h.
Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as HMP:6360, PBAF:6278, RELS:6070, SPST:6010, SSW:6247, URP:6278.

MGMT:9160 Nonprofit Organizational Effectiveness II 3 s.h.
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Requirements: for HMP:6365—HMP:6360 or MGMT:9150. Same as HMP:6365, PBAF:6279, RELS:6075, SPST:6020, SSW:6248, URP:6279.

MGMT:9185 Project Management 2-3 s.h.
Preparation for managing projects and project portfolios; project selection, project planning and budgeting, scheduling, resource allocation, project control; integration of project planning tools, including project management software.

MGMT:9210 Law and Ethics 2-3 s.h.

Legal issues surrounding start-up and day-to-day management of a business; contract law, standard business formations, tort law, employment law, business ethics, and alternative dispute resolution; exploration of the ways in which ethics and law intersect as well as the ways in which law reflects various ethical judgments; consideration and comparison of the roles of law and the role of ethics in our society.

MGMT:9220 Maximizing Team Performance 3 s.h.
Current approaches to implementing effective teams within organizations; team selection and formation, group dynamics, facilitation skills, performance and obstacle management.

MGMT:9230 Managing and Preventing Conflict 3 s.h.
Skills for management of high-conflict situations in the workplace and for long-term business success and job satisfaction; experience developing mediation-based skills and communication techniques to prevent and resolve workplace conflicts.

MGMT:9250 Managing Employee Performance 3 s.h.
Concepts and practices to effectively manage, measure, and improve employee performance; establishing and communicating organizational expectations, the manager as coach and motivator, measurement methodologies, and performance improvement methods; concepts and practices to effectively manage, measure, and improve employee performance; establishing and communicating organizational expectations; the manager as coach and motivator, performance improvement methods, and designing more effective reward practices.

MGMT:9260 Strategic Employee Development 3 s.h.
Concepts, practices in training and development; strategic issues affecting the design, implementation, and evaluation of training programs and of career management and organizational development activities.

MGMT:9270 Human Resource Management 3 s.h.
Systematic approach to managing human resources through practices consistent with validated theories and empirical research; human resources practices and business strategies; human resources strategy, recruitment and selection, training and development, employment law, international human resources, career management, compensation.

MGMT:9290 Global Business Management 3 s.h.
Theoretical knowledge and practical skills that are critical to successfully compete in the global marketplace and to make sound management decisions in international contexts; economic, political, legal, and social aspects of a business environment in foreign markets; multinational companies' winning moves in entering and growing in these markets; best practices in managing people in different cultural settings.

Management, B.B.A.

Requirements

The Bachelor of Business Administration with a major in management requires a minimum of 120 s.h., including 22 s.h. of work for the major. To graduate, students must have a cumulative g.p.a. of at least 2.00 in all college coursework attempted, all coursework attempted at the University of Iowa, all college business coursework attempted, all business coursework attempted at the University of Iowa, all college management and entrepreneurship coursework attempted, and all management and entrepreneurship coursework attempted at the University of Iowa.

The program is designed to give students a thorough background in the department's study areas as well as an understanding of their application to real-life situations. Specific courses, research projects, and other experiences, such as simulations, are blended to include both theoretical and pragmatic aspects of the field.

All B.B.A. students majoring in management choose one of three tracks: entrepreneurial management, human resource management, or leadership and management. The entrepreneurial management track is intended for students who plan to start their own business or work in a small business. The human resource management track prepares students to pursue careers in human resources or to earn a degree in law. The leadership and management track focuses on the skills and competencies needed to lead a project, a team, or an organization; it is best suited for students considering management or consulting careers. Each track provides a solid background in general management principles in addition to a specialized focus.

The B.B.A. with a major in management requires the following coursework. To view the common B.B.A. requirements, see the Bachelor of Business Administration [p. 1125] in the Catalog.

Entrepreneurial Management Track Courses

Students in this track are not eligible to earn the B.A. in enterprise leadership or the Certificate in Entrepreneurial Management.

Students in the entrepreneurial management track complete the following coursework.

Code	Title	Hours
All of these:		
MGMT:3050	Professional Preparation for Management	1
or ENTR:3050	Professional Preparation for Enterprise Leadership and Entrepreneurship

MGMT:3600	Nonprofit Organizational Effectiveness II	3
MGMT:4200	Staffing and Talent Management	3
MGMT:4350	Performance Management and Strategic Rewards	3
ENTR:3350	Entrepreneurial Strategy	3
ENTR:4200	Entrepreneurship: Business Consulting	3
ENTR:4400	Managing the Growth Business	3
Entrepreneurial leadership academy II course		3

Academic Plans

Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Management, B.B.A.

- Entrepreneurial Management Track [p. 1209]
- Human Resource Management Track [p. 1210]
- Leadership and Management Track [p. 1211]

Entrepreneurial Management Track

Course	Title	Hours
Academic Career		
Any Semester		

Students are required to complete 52 s.h. of non-business coursework. Courses with a prefix of ACCT, BAIS, BUS, ECON, ENTR, FIN, MGMT, MSCI, and MKTG will not count towards non-business hours. Check degree audit for non-business hours or confer with academic advisor.

To fulfill the Tippie RISE experiential learning requirement, complete an approved course in at least one of the following categories: research with faculty, internship course, study abroad, experiential course.^a

Students who need to complete the World Language requirement should consult with their academic advisor about when to add courses to plan of study. World Language counts as non-business coursework.

Students must satisfy the Tippie College of Business residence requirement: 45 s.h. of UI coursework after admission to Tippie.

Career Advancement

Recent graduates have found jobs as team leads, project managers, people managers, human resource managers, and entrepreneurs at a range of organizations.

Over 90 percent of students reported that they found permanent employment, were accepted to graduate school, or were not seeking employment six months after graduation.

Doctor of Philosophy

Graduate students in management and entrepreneurship may earn a Doctor of Philosophy in business administration. For a description of the Ph.D. program and requirements, see the Ph.D. in business administration [p. 1156] in the Catalog and visit the Department of Management and Entrepreneurship website.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Marketing

Chair

- Dhananjay Nayakankuppam

Undergraduate major: marketing (B.B.A.)

Graduate degree: marketing subprogram for the Ph.D. in business administration

Faculty: [https://tippie.uiowa.edu/people?](https://tippie.uiowa.edu/people?keywords=&departments=176&category=All)

[keywords=&departments=176&category=All](https://tippie.uiowa.edu/people?keywords=&departments=176&category=All)

Website: <https://tippie.uiowa.edu/marketing>

The study of marketing concerns itself with all activities related to the marketing and distribution of goods and services, from producers to consumers. The goal of the department is to make strong contributions to marketing practice and marketing theory with innovative teaching, cutting-edge research, and active community outreach. The marketing curriculum provides a broad foundation in marketing concepts along with opportunities to specialize in areas of vocational interests. The department utilizes multiple teaching methods, including experiential learning, research experiences, case analyses, and online and face-to-face classroom training to prepare students to solve a variety of marketing problems that arise in our increasingly complex global economy.

The Department of Marketing offers the undergraduate major in marketing and the subprogram in marketing that leads to the Ph.D. in business administration. Additionally, the department participates in the M.B.A. program; see Master of Business Administration Program [p. 1225] in the Catalog.

Related Certificate

Event Management

The Department of Marketing (Tippie College of Business), the Departments of Communication Studies and Health and Human Physiology, and the School of Journalism and Mass Communication (College of Liberal Arts and Sciences) collaborate to offer the undergraduate Certificate in Event Management. Students who earn the certificate will know and be able to demonstrate the basic principles of organizing a successful event. They will gain a robust understanding of the diverse field of event management and careers in the event management industry. For information about the certificate, see the Certificate in Event Management [p. 479] in the Catalog.

Programs

Undergraduate Program of Study

Major

- Major in Marketing (Bachelor of Business Administration) [p. 1218]

Graduate Program of Study

Major

- Marketing subprogram for the Doctor of Philosophy [p. 1224] in Business Administration

Courses

Marketing Courses

MKTG:1300 First-Year Seminar 1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

MKTG:3000 Introduction to Marketing Strategy 3 s.h.

Philosophy and activities of marketing; marketing environment of an organization; strategies with respect to marketing decisions, buyer behavior; spreadsheet analysis of marketing problems.

MKTG:3050 Professional Preparation in Marketing 2 s.h.

Overview of alternative marketing careers; required skills and personal characteristics that drives success in these fields; hard and soft skills required in major types of marketing careers; development of a professional brand identity and strategy to find marketing internships and permanent employment opportunities; marketing's relationship to other business and organizational functions and to external environment. Corequisites: MKTG:3000.

MKTG:3051 Career Preparation for Marketing Management 1 s.h.

Finding and successfully competing for career opportunities in marketing management; includes online exercises, interactions with marketing executives, and participation in one of the national organizations representing marketing management professionals. Prerequisites: MKTG:3000 and MKTG:3050.

MKTG:3052 Career Preparation for Retailing 1 s.h.

Finding and successfully competing for career opportunities in retailing; online exercises, interactions with retailing executives, and participation in one of the national organizations representing retailing professionals. Prerequisites: MKTG:3000 and MKTG:3050.

MKTG:3053 Career Preparation for Professional Sales 1 s.h.

Finding and successfully competing for career opportunities in professional sales; online exercises, interactions with sales executives, and participation in one of the national organizations representing sales professionals. Prerequisites: MKTG:3000 and MKTG:3050.

MKTG:3054 Career Preparation for Market Analytics 1 s.h.

Finding and successfully competing for career opportunities in market analytics; online exercises, interactions with market research executives, and participation in one of the national organizations representing market research professionals. Prerequisites: MKTG:3000 and MKTG:3050.

MKTG:3055 Career Preparation for Marketing 1 s.h.

Finding and successfully competing for career opportunities in marketing; online exercises, interactions with executives, and participation in a national organization representing professionals. Prerequisites: MKTG:3000 and MKTG:3050 and (MKTG:3100 or MKTG:3200). Requirements: 90 s.h. completed.

MKTG:3100 Marketing Research 3 s.h.

Marketing, research methods; role of marketing research information as a tool in management decision making. Prerequisites: MKTG:3000 and (MSCI:2800 or BAIS:2800 or STAT:2020 with a minimum grade of B or ECON:4800 or STAT:4101).

- MKTG:3101 Marketing Metrics** 3 s.h.
Identifying and measuring key metrics that are the focus for marketing plans and the backbone for evaluating marketing performance (e.g., penetration, share of requirements, customer satisfaction, churn rates, click-through rates, and customer lifetime value); relationship between conceptual models of business-to-business and business-to-consumer behaviors and the selection of appropriate metrics; emphasis on use of metrics as basic inputs for goal setting, marketing decision making, and evaluation. Prerequisites: MKTG:3000 and MKTG:3100.
- MKTG:3102 Marketing Analytics** 3 s.h.
Marketing science models used in strategic and tactical marketing decisions; application of consumer behavior in the development of quantitative models that inform marketing mix decisions (advertising, pricing, and salesforce effort), new product development, product line management, and category management; topics may include product mapping, latent class (segmentation) analysis, conjoint analysis, choice modeling (binary and multinomial logic), diffusion models (word-of-mouth), decision-calculus ("models and manager" technology), churn analysis and web analytics. Prerequisites: MKTG:3000 and MKTG:3100.
- MKTG:3103 Advanced Marketing Research** 3 s.h.
Traditional and nontraditional research techniques to address business problems that have a relationship to basic research; primary focus on hands-on experience and peer-based learning. Prerequisites: MKTG:3000.
- MKTG:3200 Consumer Behavior** 3 s.h.
Behavioral and social aspects of marketing; research methods and findings from behavioral sciences, their relation to production, consumption, and marketing of products, services. Prerequisites: MKTG:3000.
- MKTG:3300 Web Business Strategy** 3 s.h.
Introduction to World Wide Web business and marketing; concepts, methods, and applications associated with doing business on the web; web page construction and design; case studies and/or entrepreneurial projects. Prerequisites: MKTG:3000.
- MKTG:3400 Retail Strategies** 3 s.h.
Strategies for retail site selection, store design, supply chain management, customer relationship management/customer service; merchandising management strategies for planning merchandise assortments, buying systems, buying merchandise, pricing, promotion. Prerequisites: MKTG:3000.
- MKTG:3401 Merchandise Management** 3 s.h.
Merchandise and service mix strategies for alternative retail concepts, including various store and online formats; topics include national brands versus private label, multi-channel distribution, logistics, replenishment strategies, pricing, promotion, product assortment, store layout, and point-of-sale and in-store merchandising. Prerequisites: MKTG:3000.
- MKTG:3700 Marketing Institute Seminar I** 2 s.h.
Soft skills and professional expertise to succeed in marketing and consulting careers; résumé and interview training, industry presentations, business case assignments, lectures. Prerequisites: MKTG:3000. Requirements: admission to the Marketing Institute.
- MKTG:3701 Marketing Institute Field Studies** 2 s.h.
Plan, design, carry out, and report on a marketing research project for a profit or nonprofit client organization; communicate with managers, apply knowledge of marketing research, meet deadlines, and convert research findings into actionable recommendations for management. Prerequisites: MKTG:3000 and MKTG:3700. Requirements: admission to the Marketing Institute.
- MKTG:3702 Marketing Institute Seminar II** 2 s.h.
Development of soft skills and professional expertise to succeed in marketing and consulting careers; résumé and interview training, industry presentations, business case assignments, lectures; mentor students in marketing institute seminar. Prerequisites: MKTG:3000 and MKTG:3700 and MKTG:3701. Requirements: admission to the Marketing Institute.
- MKTG:4000 Contemporary Topics in Marketing** 3 s.h.
Topics not regularly offered in other courses. Prerequisites: MKTG:3000.
- MKTG:4050 Directed Readings in Marketing** arr.
- MKTG:4101 Integrated Marketing Communications** 3 s.h.
Making marketing communication decisions and understanding how marketing communications work; planning and evaluation of marketing communications; theories, models, and tools to make better marketing communication decisions; course uses an Integrated Marketing Communications perspective, which involves understanding the role of the different promotional mix elements and coordinating them to develop effective marketing communication programs. Prerequisites: MKTG:3000.
- MKTG:4200 Sales Management** 3 s.h.
Personal selling, management of sales force; emphasis on recruitment, selection, training of sales representatives; problems in allocation of sales effort, supervision, control. Prerequisites: MKTG:3000.
- MKTG:4201 Professional Selling** 3 s.h.
Personal selling function in overall business strategy and professional selling process that underlies successful sales careers; emphasis on hands-on experiences in developing practical skills in sales strategy, analytics, and communications skills; students develop and make sales presentations, engage in role-playing exercises, and complete applied selling exercises as individuals or in sales teams; focus is on professional selling in a business environment, but students will also apply course concepts in other interpersonal business communications settings. Prerequisites: MKTG:3000.
- MKTG:4250 Marketing and Sustainability** 3 s.h.
Concepts for developing and implementing sustainable marketing strategies; developing more environmentally friendly products, more sustainable logistical systems, socially responsible pricing, and promoting sustainable products in a socially responsible way. Prerequisites: MKTG:3000.
- MKTG:4275 Social Media Marketing** 3 s.h.
Fundamentals of social media in a marketing context; establishing clear organizational goals, developing appropriate marketing strategies, and determining key campaign logistics (who, when, where); guest speakers and hands-on projects involving social media. Prerequisites: MKTG:3000.

- MKTG:4300 International Marketing** 3 s.h.
Differences in global environment: how cultural considerations, political, legal, and economic conditions affect market entry strategies and marketing mix decisions; development of marketing plan for non-U.S. environments. Prerequisites: MKTG:3000.
- MKTG:4400 Digital Marketing** 3 s.h.
Foundational understanding of digital marketing and how successful (and unsuccessful) marketing campaigns use online and mobile platforms; fundamentals of digital marketing including internet marketing strategies, user-generated content, search engine optimization, website design and management, inbound marketing, email marketing, social media marketing, and data analytics. Prerequisites: MKTG:3000.
- MKTG:4405 Marketing Sales and Promotion** 3 s.h.
While there will always be some need for selling, the aim of marketing is to know the customer so well that a product or service sells itself—marketing done well should result in customers ready to buy; starting with the customer and working backwards, students gain insight into common customer pain points, and how companies improve customer experience and produce what customers will purchase; use of case studies to analyze real-world marketing problems; discussion of strategies and tactics to increase sales and compete successfully in today's challenging business environment. Prerequisites: MKTG:3000.
- MKTG:4410 Customer Relationship Management** 3 s.h.
Analytical approaches to customer relationship management; issues, techniques, and terminology associated with database marketing and data mining; analysis of customer databases; assessing lifetime valuation (LTV) of customers, identifying "high potential" customers, estimating return on marketing investment, and building predictive models to estimate the probability of response to a marketing campaign. Prerequisites: MKTG:3000.
- MKTG:4500 Marketing Capstone** 3 s.h.
Marketing problems of organizations; emphasis on marketing manager's role in developing, presenting goal-oriented marketing strategies; application of marketing concepts to real business situations. Prerequisites: MKTG:3000 and MKTG:3050 and MKTG:3100 and MKTG:3200 and (MKTG:3101 or MKTG:3102 or MKTG:3103 or MKTG:3300 or MKTG:3400 or MKTG:3401 or MKTG:3701 or MKTG:4000 or MKTG:4101 or MKTG:4200 or MKTG:4201 or MKTG:4250 or MKTG:4275 or MKTG:4300 or MKTG:4400 or MKTG:4410 or MKTG:4800). Requirements: completion of 90 s.h.
- MKTG:4800 Marketing Consulting Project** 3 s.h.
Experience in planning, designing, carrying out, reporting on a marketing research project for a profit or nonprofit client organization; communication with managers, application of marketing research, meeting deadlines, converting research findings into action recommendations for management. Prerequisites: MKTG:3000 and MKTG:3100.
- MKTG:4999 Honors Thesis in Marketing** arr.
Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University Honors Program guidelines; may include empirical research, library research, applied projects.
- MKTG:7800 Seminar in Consumer Behavior - Ph.D.** 3 s.h.
Key facets of consumer behavior—information processing, perception, memory, learning, attitude formation, attitude change, decision making, emotion; behavioral research methods.
- MKTG:7825 Problems and Solutions in Behavioral Research** 3 s.h.
Cultivation of Ph.D. students' ability to be independent scholars with regard to theory building, testing, and assessing contributions; heavy focus on theory development and construction of nomological nets with an emphasis on behavioral research.
- MKTG:7850 Seminar in Marketing Models - Ph.D.** 3 s.h.
Theoretical, operational models in marketing, with emphasis on recent advances; in-depth criticism of models, participation in model development project.
- MKTG:7900 Seminar in Research Topics - Ph.D.** arr.
Individual research topics.
- MKTG:7950 Directed Readings in Marketing - Ph.D.** arr.
- MKTG:7975 Thesis in Marketing** arr.
- MKTG:9000 Directed Readings in Marketing** arr.
- MKTG:9010 Contemporary Topics in Marketing** 1-3 s.h.
Topics not regularly offered in other courses. Prerequisites: MBA:8110.
- MKTG:9015 Social Media Marketing for Business** 3 s.h.
Fundamentals of social media marketing; establishing clear organizational goals for engaging in social media to market a product or service, developing solid strategies for implementation, and determining other key campaign logistics. Prerequisites: MBA:8110.
- MKTG:9110 Category Management** 3 s.h.
Marketing strategy related to manufacturing product line interactions, retailer product assortment, consumer response; category definition, product line pricing and branding, cross-category promotions, channel coordination, efficient consumer response, loyalty programs, database marketing. Prerequisites: MBA:8110.
- MKTG:9120 Customer Relationship Management** 3 s.h.
Analytical approaches to customer relationship management; issues, techniques and terminology associated with database marketing and data mining; analysis of customer databases; assessing lifetime valuation (LTV) of customers, identifying "high potential" customers, estimating return on marketing investment, building predictive models to estimate the probability of response to a marketing campaign. Prerequisites: MBA:8110.
- MKTG:9150 Brand Management** 3 s.h.
Strategies for building, leveraging, and defending brands; principles of consumer behavior, how they relate to building brand identity and equity; branding of consumer goods and services. Prerequisites: MBA:8110.
- MKTG:9155 Digital Marketing Insights, Strategies, and Applications** 3 s.h.
Introduction and examination of foundational, strategic and operational concepts of digital marketing through a combination of interactive lectures, case discussion, and project work; materials taught from a business-to-business (B2B) and business-to-consumer (B2C) perspective and considers marketplace dynamics, emerging technology, consumer insights, and data driven digital channels that inform a corporate vision for digital, a go-to-market strategy, and executional roadmap; introduction and knowledge advancement of tools and levers of digital marketing, followed by application to real world scenarios. Prerequisites: MBA:8110.

MKTG:9165 Digital Marketing Analytics 3 s.h.

Comprehensive introduction to current analytic tools and technologies used in digital marketing; hands-on analyses with JMP, a state-of-the-art visually stunning data analysis software; strategic applications of marketing analytics to data from B2C and B2B cases. Prerequisites: (MBA:8150 or MSCI:9100 or BAIS:9100) and MBA:8110.

MKTG:9170 Business to Business Marketing 3 s.h.

Industrial buyer behavior, buyer-seller relationships, interactive product policy and market segmentation, distribution and selling systems; skill development in market strategy formulation for industrial products and services, and in solving problems and making decisions about industrial marketing. Prerequisites: MBA:8110.

MKTG:9190 International Marketing 3 s.h.

Domestic versus international perspective; identification and evaluation of opportunities and risks in non-U.S. markets; research problems in global markets; effects of international organizations, foreign exchange, macroeconomic policies, local law, and cultural differences on consumer behavior and marketing decisions; multinational versus global marketing strategies (entry, product adaptation, channel logistics, pricing, promotion); emphasis on practical applications. Prerequisites: MBA:8110.

MKTG:9200 Field Studies in Marketing 3 s.h.

Experience in planning, designing, carrying out, reporting on a marketing research project for a profit or nonprofit client organization; communication with managers, application of marketing research, meeting deadlines, converting research findings into action recommendations for management. Prerequisites: MBA:8110 and MBA:8150.

MKTG:9300 Applied Marketing Research 2-3 s.h.

Research design, survey design, sampling, data analysis, qualitative research methods, research project management. Prerequisites: MBA:8110 and MBA:8150.

MKTG:9310 Marketing Analytics 2-3 s.h.

Quantitative tools to support marketing planning decisions, including forecasting, elasticity analysis, conjoint analysis, and customer LTV; analysis of syndicated data. Prerequisites: MSCI:9100 or BAIS:9100 or MBA:8150.

MKTG:9320 Strategic Brand Positioning 2-3 s.h.

Define market boundaries; use customer and competitor analyses to create sustainable market positions; create and manage brand identities; brand architecture, brand equity measurement. Prerequisites: MBA:8110.

MKTG:9330 Product and Pricing Management 2-3 s.h.

Create and capture value through product and service design, including stage-gate evaluation models; implement pricing strategy for new products and existing product lines. Prerequisites: MBA:8110.

MKTG:9340 Customer Analysis 2-3 s.h.

Use customer insights to support successful marketing programs; organizational, individual, and joint decision making; post sale satisfaction behaviors. Prerequisites: MBA:8110.

MKTG:9350 Marketing Communication and Promotions 2-3 s.h.

Develop effective communication programs for business and consumer markets; manage agency relationships; integrate media/vehicle platforms; track and evaluate investments in communications and promotions. Prerequisites: MBA:8110.

MKTG:9360 Category Management 2-3 s.h.

Manufacturer-retailer relationships, product line planning, efficient consumer response, cross-category marketing strategies, competition between national brands and store labels, retailer positioning, customer loyalty.

Marketing, B.B.A.

Several decades ago, the study of marketing dealt almost exclusively with business activities involved in the flow of goods from production to consumption. Today it includes principles that are more widely applicable; they are as relevant to the success of arts, sports, and social programs as they are to firms selling goods and services. A major in marketing includes study in the behavioral sciences, communications, statistical analysis, and computer methods as well as marketing decision making.

Requirements

The Bachelor of Business Administration with a major in marketing requires a minimum of 120 s.h., including 21 s.h. of work for the major. Students must have a cumulative g.p.a. of at least 2.00 in all college coursework attempted, all college coursework attempted in business, all college coursework attempted in the major, all coursework attempted at the University of Iowa, all business coursework attempted at the University of Iowa, and all coursework in the major attempted at the University of Iowa.

The program is designed to provide undergraduate students with an understanding of the business, social, and economic roles of marketing and to prepare them for marketing careers.

All students complete the common required courses and select one of the four marketing tracks: marketing management, retail management, professional sales and management, or marketing analytics.

The B.B.A. with a major in marketing requires the following coursework. To view the common B.B.A. requirements, see the Bachelor of Business Administration [p. 1130] in the Catalog.

Code	Title	Hours
	Marketing Common Required Courses	12
	Marketing Required Track Courses	9
	Total Hours	21

Some of these courses have prerequisites; students must complete all of a course's prerequisites before they may register for the course.

Marketing Common Required Courses

Students in all tracks must complete these courses.

Code	Title	Hours
MKTG:3050	Professional Preparation in Marketing	2
MKTG:3055	Career Preparation for Marketing	1
MKTG:3100	Marketing Research	3
MKTG:3200	Consumer Behavior	3
MKTG:4500	Marketing Capstone (must be taken at the University of Iowa)	3

Marketing Required Track Courses

Students complete the requirements from one of the four tracks below.

Code	Title	Hours
Marketing Management Track		
	Three marketing courses chosen from the "Marketing Electives" list below	9
Marketing Analytics Track		
MKTG:3101	Marketing Metrics	3
MKTG:3102	Marketing Analytics	3
	One additional marketing course, chosen from the "Marketing Electives" list below	3
Retail Management Track		
MKTG:3400	Retail Strategies	3
MKTG:3401	Merchandise Management	3
	One additional marketing course, chosen from the "Marketing Electives" list below	3
Professional Sales and Management Track		
MKTG:4200	Sales Management	3
MKTG:4201	Professional Selling	3
	One additional marketing course, chosen from the "Marketing Electives" list below	3

Marketing Electives

Code	Title	Hours
MKTG:3101	Marketing Metrics	3
MKTG:3102	Marketing Analytics	3
MKTG:3103	Advanced Marketing Research	3
MKTG:3300	Web Business Strategy	3
MKTG:3400	Retail Strategies	3
MKTG:3401	Merchandise Management	3
MKTG:3701	Marketing Institute Field Studies	2
MKTG:4000	Contemporary Topics in Marketing	3
MKTG:4101	Integrated Marketing Communications	3
MKTG:4200	Sales Management	3
MKTG:4201	Professional Selling	3
MKTG:4250	Marketing and Sustainability	3
MKTG:4300	International Marketing	3
MKTG:4400	Digital Marketing	3
MKTG:4405	Marketing Sales and Promotion	3
MKTG:4410	Customer Relationship Management	3
MKTG:4800	Marketing Consulting Project	3

Academic Plans

Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Marketing, B.B.A.

- Marketing Management Track [p. 1219]
- Retail Management Track [p. 1220]
- Professional Sales and Management Track [p. 1221]
- Marketing Analytics Track [p. 1222]

Marketing Management Track

Course	Title	Hours
Academic Career		
Any Semester		
Students are required to complete 52 s.h. of non-business coursework. Courses with a prefix of ACCT, BAIS, BUS, ECON, ENTR, FIN, MGMT, MSCI, and MKTG will not count towards non-business hours. Check degree audit for non-business hours or confer with academic advisor.		
To fulfill the Tippie RISE experiential learning requirement, complete an approved course in at least one of the following categories: research with faculty, internship course, study abroad, experiential course. ^a		0 - 3
Students who need to complete the World Language requirement should consult with their academic advisor about when to add courses to plan of study. World Language counts as non-business coursework.		
Students must satisfy the Tippie College of Business residence requirement: 45 s.h. of UI coursework after admission to Tippie.

Career Advancement

The Bachelor of Business Administration (B.B.A.) program in marketing prepares students for positions in sales, market research, retailing, purchasing, or advertising. Employment opportunities exist for positions as market analysts, merchandise managers, buyers, purchasing agents, advertising managers, brand managers, consultants, and sales representatives in a variety of for-profit and nonprofit organizations.

Over 90 percent of students reported that they found permanent employment, were accepted to graduate school, or were not seeking employment within six months of graduation.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs. For more information about careers, visit the Pomerantz Career Center website.

Doctor of Philosophy

Graduate students in marketing may earn a Doctor of Philosophy in business administration. For a description of the Ph.D. program and requirements, see the Ph.D. in business administration [p. 1156] in the Catalog and visit the Department of Marketing website.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Master of Business Administration Program

Associate Dean, Graduate Management Programs

- Jennifer J. Blackhurst

Assistant Deans

- David J. Deyak, Colleen M. Downie, Dawn T. Kluber

Professional degree: M.B.A.

Professional certificates: business fundamentals; finance; leadership; marketing

Faculty: <https://tippie.uiowa.edu/people>

Website: <https://tippie.uiowa.edu/future-graduate-students/mba-programs>

The Master of Business Administration (M.B.A.) program provides students with a foundation for future growth and flexibility in professional management. The program, which is fully accredited by AACSB International—the Association to Advance Collegiate Schools of Business, enables students to build broad-based professional portfolios of analytical skills, knowledge, leadership, and applied experiences. The curriculum is rigorous, yet learning takes place in a collaborative environment that builds teamwork skills and encourages independent problem solving.

Students in Iowa's M.B.A. programs represent a variety of backgrounds, undergraduate majors, and professional experience. The curriculum is designed for college graduates in any field; previous business coursework is not required. However, full-time work experience is required for admission.

The Departments of Accounting, Business Analytics, Economics, Finance, Management and Entrepreneurship, and Marketing all contribute to the Master of Business Administration program through faculty participation and coursework.

Programs

Professional Programs of Study

Major

- Master of Business Administration [p. 1227]

Certificates

- Certificate in Business Fundamentals [p. 1232]
- Certificate in Finance [p. 1233]
- Certificate in Leadership [p. 1234]
- Certificate in Marketing [p. 1235]

Courses

See course lists in the individual Tippie College of Business departmental sections of the Catalog for descriptions of M.B.A. electives.

Graduate Management Programs (M.B.A. Program) Courses

MBA:8010 M.B.A. IMPACT 0 s.h.

Introduction to the Tippie M.B.A. program and its culture; activities accentuate themes of involvement, motivation, professionalism, achievement, and challenge; week-long immersion in collaborative team-building experiences.

MBA:8110 Marketing Management 2-3 s.h.

Concepts, principles, models of marketing management; focus on strategic planning, management decision making, and implementation of marketing programs.

MBA:8120 Management in Organizations 2-3 s.h.

How to explain, predict, and influence behavior in organizations; decision making, leadership, communication, group skills in management positions; motivation, leadership, teams, organizational culture, organizational design, individual differences, organizational change.

MBA:8130 Business Communication 1-3 s.h.

Effective communication to become a successful business professional and leader; strengthen ability to speak and write confidently, competently, and effectively, regardless of venue; varied team and individual presentation coaching, applied exercises.

MBA:8140 Corporate Financial Reporting 2-3 s.h.

Contemporary financial reporting practices in the United States; how alternative accounting treatments affect the usefulness of financial information in applied decision settings.

MBA:8150 Business Analytics 2-3 s.h.

Introduction to analytical techniques for making business decisions; utilizing Excel to apply descriptive and predictive analytical tools to solve practical business problems using real world data; dealing with uncertainty in decision making; formal probability concepts and statistical methods for describing variability (decision trees, random variables, hypothesis testing); application of techniques (linear regression, Monte Carlo simulation, linear optimization) to model, explain, and predict for operational, tactical, and strategic decisions.

MBA:8160 Managerial Economics 1-3 s.h.

Models of consumer and firm behavior with applications; market equilibrium and structure; pricing decisions.

MBA:8170 International Economic Environment of the Firm 2-3 s.h.

Basic determinants of aggregate output, employment, wages, unemployment, consumption, investment, international trade flows, interest rates, exchange rates, prices and inflation in open economies; sources and nature of economic growth; effects of domestic and foreign monetary, fiscal policies; effects of trade, exchange rate policies.

MBA:8180 Managerial Finance 2-3 s.h.

Time value of money, applications of present value techniques; stock and bond valuation, capital budgeting, cost of capital calculation, portfolio formation and efficient market analysis, financial statement analysis, pro forma analysis, hedging financial risks. Requirements: MBA:8140 or an undergraduate-level course in financial accounting or finance.

MBA:8200 Strategic Business Consulting 1-6 s.h.

Plan, schedule, and deliver strategic consulting services to commercial enterprises; project definition, preparation and presentation of deliverables, client relationship management.

MBA:8210 Global Business Strategy 3 s.h.

Strategic frameworks and skills critical for success in the global marketplace; content of an economic environment; cultural, ethical, and legal issues in the conduct of international business; how companies enter foreign markets and grow international subsidiaries, succeed in mergers and acquisitions, cooperate in joint ventures and strategic alliances.

MBA:8220 Ethics and the Law 1-2 s.h.

Legal and ethical issues surrounding startup and day-to-day management of a business; contract law, standard business formations, tort law, employment law, business ethics, alternative dispute resolution.

MBA:8230 Introduction to Leadership 1-2 s.h.

Major theories; practical development of leadership and managerial skills to enhance individual and organizational effectiveness.

MBA:8240 Operations and Supply Chain 2-3 s.h.

Planning and decision-making activities for managing an organization's operations in both manufacturing and services, with an emphasis on production and service delivery strategy, process design, capacity planning, process analytics, queueing, and an introduction to supply chain management including supply chain design and coordination. Prerequisites: MBA:8150.

MBA:8300 Foundations in Strategy 2-3 s.h.

Key elements of domestic competitive and corporate strategy; industry analysis (understanding the importance of industry for firm performance); strategies for achieving competitive advantage (cost focus, differentiation focus); corporate strategy (corporate scope, horizontal diversification, vertical integration); topics of global strategy, which may include challenges of attaining competitive advantage in foreign markets, such as cross-national distance and liabilities of foreignness, as well as international strategies (replication strategy, adaptation strategy, arbitrage strategy).

MBA:8309 Consulting Project Leadership 1-2 s.h.

Student Team Leads for the Business Solution Center engage in activities to support the launch of spring consulting projects; initial client interactions, project scope, project planning documents, project arrangement letters, and detailed work plans in consultation with their client and Business Solutions Center leadership; basics of leading a team of student consultants. Prerequisites: MBA:8110 and MBA:8120 and MBA:8140 and MBA:8150 and MBA:8180 and MBA:8190 and MBA:8300. Requirements: full-time M.B.A. standing.

MBA:8310 Business Integration 1-3 s.h.

Student teams run an operational business simulation, conduct organizational/industry analysis, assess market opportunities, define strategic direction, compete for company profitability and market share. Prerequisites: 5 of the following are required: MBA:8110, MBA:8140, MBA:8150, MBA:8180, (MBA:8190 or MBA:8240), MBA:8300. Recommendations: completion of all six prerequisites.

MBA:8330 Seminar in Strategic Management I 1-3 s.h.

Introduction to strategic management; the role of marketing, operations, and finance in strategic planning; case studies.

MBA:8400 M.B.A. Internship 0 s.h.**MBA:8410 Application in Organizational Leadership 0-1 s.h.**

Opportunity to develop leadership skills necessary for managing student organizations; class discussion, workshops, guest speakers; for M.B.A. organization treasurers and presidents.

MBA:8500 Seminar in International Business 0-6 s.h.

Issues and challenges facing organizations doing business in international markets; social, economic, political factors, business policies and customs in the global environment; may include travel, study abroad. Requirements: M.B.A. enrollment.

MBA:8501 M.B.A. Coaches Program 1 s.h.

Development of coaching skills while leading a rigorous peer-to-peer mentoring program with first-year M.B.A. students; improve ability to communicate, motivate, influence, train, and develop others as well as develop high level competency in coaching in critical career development skills, such as business communications, crafting a personal brand pitch, interviewing preparation, and creating and leveraging a network; successful leaders are skilled coaches, so the benefits of this course to both coach and mentee, extend far beyond the classroom experience and time as a Tippie student.

MBA:9120 Introduction to Leadership 1 s.h.

Major theories; practical development of leadership and managerial skills to enhance individual and organizational effectiveness.

Master of Business Administration, M.B.A.

The Master of Business Administration includes several programs: the professional M.B.A. (including a new online M.B.A. option), executive M.B.A., M.B.A. in Hong Kong, and the M.B.A. in Italy (CIMBA M.B.A.). Students in the professional M.B.A. program have the opportunity to enroll in combined degree programs in business analytics, medicine, and social work, or to earn the Certificate in Healthcare Management. See "Combined Programs" under the M.B.A. Professional Program [p. 1227] in this section of the Catalog.

M.B.A. Executive Program

The M.B.A. Executive Program (EMBA program) requires 46 s.h. of coursework. It is conducted at the Pomerantz Center on the University's Iowa City campus and at the Pappajohn Education Center in Des Moines, Iowa. See program locations on the Tippie College of Business website.

Coursework for the M.B.A. Executive Program spans 16 months (three semesters and one summer). The program begins in mid-August with a five-day residency. It continues with classes on Friday and Saturday every other week. A second five-day residency is held at the beginning of the second year. Students have a four-week winter break, and summer classes are online.

Each entering class progresses through the program as a group, and students work in study groups of 4-6 members throughout the program. The curriculum includes an 11-day international business seminar, and students have access to executive coaching as part of their participation in the program.

The M.B.A. Executive Program requires the following coursework.

Core Courses

Code	Title	Hours
MBA:8110	Marketing Management	3
MBA:8120	Management in Organizations	3
MBA:8140	Corporate Financial Reporting	3
MBA:8150	Business Analytics	3
MBA:8170	International Economic Environment of the Firm	3
MBA:8180	Managerial Finance	3
MBA:8240	Operations and Supply Chain	3
MBA:8300	Foundations in Strategy	3
MBA:8310	Business Integration	2
MBA:8330	Seminar in Strategic Management I	1
MBA:8500	Seminar in International Business	2
MGMT:7900	Contemporary Topics in Management and Organizations	2
Total Hours		31

Required EMBA Courses

Students complete the remainder of their coursework with the following; courses are subject to change, so students should consult their advisor.

Code	Title	Hours
All of these:		
ACCT:9020	Strategic Cost Analysis	3
FIN:9300	Corporate Investment and Financing Decisions	3
MGMT:9110	Dynamics of Negotiations	3
MGMT:9210	Law and Ethics	3
MGMT:9270	Human Resource Management	3

Admission

Admission is limited to experienced managers and executives who want to broaden their management skills without interrupting their professional careers. Applicants typically have seven or more years of postgraduate managerial experience. Previous academic work in business is not required.

M.B.A. Professional Program

The Professional M.B.A. Program (PMBA program) is tailored for working professionals building on the synergies of concurrent work and learning. The program prepares graduates to be effective managers and leaders in the global marketplace. The curriculum is designed for students with varied backgrounds, undergraduate majors, and professional experience. Previous coursework in business is not required.

Courses are offered each semester during evening hours or weekends at three locations in Iowa: Cedar Rapids at the Tippie College of Business Cedar Rapids Center, Des Moines at the John and Mary Pappajohn Education Center (JMPEC), and the Quad Cities at the Birchwood Fields Learning Center; see program locations on the Tippie College of Business website.

Online M.B.A.

A new online M.B.A. option, launched fall 2019, allows students to complete the entire degree online. Classes typically include recorded lectures paired with synchronous live web sessions. Similar to the in-person option, teamwork is an integral part of the online M.B.A.

Requirements

Program requirements include 45 s.h. of credit including a business core of nine courses plus six electives. The core develops competency in general management skills and key functional business areas. The electives contribute to the development of an area of expertise and foster a deeper understanding of management and business practices. Electives are offered in analytics, entrepreneurship, finance, leadership and management, marketing, and operations/supply chain. Students may take part in several global learning opportunities in international locations to increase their understanding of the global business environment and its implications for business conduct and decision making.

Students may earn a professional Certificate in Finance [p. 1233], Leadership [p. 1234], or Marketing [p. 1235] while they fulfill requirements for the M.B.A. without taking courses beyond the 45 s.h. required for the degree. Through

a separate application, PMBA students also may earn the Certificate in Business Analytics [p. 1154] while they fulfill requirements for the M.B.A. The Certificate in Business Analytics is not available online; however, students pursuing the online M.B.A. option may be considered for admission to the Certificate in Business Analytics program if they are willing to complete the certificate at one of the three program locations.

Students can complete the degree requirements in as few as two-and-one-half years or extend their study to as long as 10 years. Most students earn the M.B.A. in about three years, taking two courses each fall and each spring semester and one course during the summer.

Code	Title	Hours

Admission

The PMBA program admits students for entry in summer, fall, or spring; applications are accepted throughout the year. Admission decisions are based on completed application materials, including quality of work experience, undergraduate grade-point average, scores on the Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) General Test, and recommendations. Applicants should have at least one and one-half years of postbaccalaureate professional work experience before admission and must be fully employed in a professional position to be considered for admission.

Applicants whose first language is not English must score at least 100 (internet-based) on the Test of English as a Foreign Language (TOEFL) or must have a successful admission interview. In place of TOEFL, the program accepts International English Testing System (IELTS) scores. For information about registering for TOEFL or IELTS and reporting

scores to the University, visit English Requirements for M.B.A. Admission on the Office of Admissions website.

Admission decisions are made before registration begins for completed applications received by the priority application deadline. Admitted applicants who have met the priority application deadline may request registration for classes on the first registration date. The University must receive completed application materials by the following application deadlines.

Summer session (May): May 1

Fall semester (August): August 1

Spring semester (January): January 1

GMAT/GRE Waiver

Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) General Test waivers may be granted. The following requirements must met in order to be considered.

The applicant has earned a master's or terminal degree, including a Ph.D., M.D., J.D., or Pharm.D. from an accredited U.S. postsecondary institution posted on the U.S. Department of Education website. The applicant who has earned an advanced degree from a non-U.S. postsecondary institution will be considered for a waiver by exception.

The applicant must have earned a cumulative g.p.a. of 3.00 or higher on a 4.00 scale (or equivalent) in all graduate work used to fulfill the degree requirements.

Waivers may be granted when an applicant has significant professional experience and strong academic performance at the undergraduate level or while a pre-M.B.A. student. The following requirements need to be met to be considered.

The applicant has six or more years of postbaccalaureate professional work experience and has demonstrated career progression.

The applicant has earned a cumulative undergraduate g.p.a. of 3.25 or higher on a 4.00 scale with grades of B or higher in two or more quantitative courses, such as algebra or a more advanced course; or a cumulative g.p.a. of 3.00 or higher in a minimum of three University of Iowa M.B.A. courses while in pre-M.B.A. status, including grades of B or higher in two of the following courses—business analytics, managerial economics, corporate financial reporting, or managerial finance.

Enrollment in Courses Before Formal Admission

Individuals who have not yet been formally admitted to the program may request pre-M.B.A. status by submitting their résumé and transcript to the PMBA program for approval. They should have at least one-and one-half years of postbaccalaureate professional work experience. Those granted pre-M.B.A. status may enroll in a maximum of five PMBA courses with a maximum of two courses during each 10- or 12-week session and one course during shorter sessions. Pre-M.B.A. status is not available for students pursuing the online M.B.A. program option.

Students must take one of the following courses sometime during pre-M.B.A. status.

Code	Title	Hours
MBA:8140	Corporate Financial Reporting	3
MBA:8150	Business Analytics	3
MBA:8160	Managerial Economics	3
MBA:8180	Managerial Finance	3

Credit earned during pre-M.B.A. status is applied to the requirements for the degree once the applicant is admitted to the program. The University of Iowa must receive completed application materials for pre-M.B.A. status by the following application deadlines.

Summer session (May): May 8

Fall semester (August): August 1

Spring semester (January): January 1

Combined Programs

Combined degree programs allow students to pursue two degrees simultaneously, earning both more quickly than they would if they pursued each degree separately.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the combined degree program.

M.B.A./M.D.

The M.B.A. Program collaborates with the Carver College of Medicine to offer the combined Master of Business Administration (Professional M.B.A.)/Doctor of Medicine program. For more information about the medicine degree, see the Doctor of Medicine, M.D. [p. 1693] (Carver College of Medicine) section of the Catalog.

M.B.A./M.S. in Business Analytics (Professional Subprogram)

The M.B.A. Program along with the Department of Business Analytics offers a combined Master of Business Administration (Professional M.B.A.)/Master of Science in business analytics (professional subprogram) degree option. Students complete 33 s.h. of M.B.A. credit paired with 27 s.h. of business analytics credit. For more information, see the M.S. in business analytics (professional) [p. 1151] in the Tippie College of Business section of the Catalog or contact the Professional M.B.A. Program.

M.B.A./M.S.W.

The M.B.A. Program collaborates with the School of Social Work to offer the combined Master of Business Administration (Professional M.B.A.)/Master of Social Work program. For more information, see the Master of Social Work, M.S.W. [p. 1000] (College of Liberal Arts and Sciences) section of the Catalog or contact the Professional M.B.A. Program.

M.B.A./Certificate in Healthcare Management

The M.B.A. Program collaborates with the College of Public Health to offer a combined Master of Business Administration (Professional M.B.A.)/Certificate in Healthcare Management. M.B.A. students complete four specified healthcare management courses (12 s.h.) in place of four M.B.A. electives to earn the certificate. For more information, see the Certificate in Healthcare Management [p. 1939]

(College of Public Health) section of the Catalog or contact the Professional M.B.A. Program.

M.B.A. in Hong Kong

The M.B.A. program in Hong Kong (Hong Kong M.B.A.) requires 45 s.h. of graduate credit. The curriculum is designed for students with various backgrounds, experience, and academic majors who are living in or near Hong Kong or Taiwan. The program does not require previous coursework in business.

Students complete the required courses in sequence; most complete the program in 16-20 months. Each course begins with two weeks of online coursework followed by two consecutive weekends of classes in Hong Kong and an additional two weeks of online coursework. Faculty from the University of Iowa travel to Hong Kong to teach the weekend classes. Some courses offer a video conference option for students living in Taiwan. Students also have the opportunity to study on campus in Iowa City for up to one semester.

The M.B.A. in Hong Kong requires the following coursework.

Code	Title	Hours
MBA:8110	Marketing Management	3
MBA:8120	Management in Organizations	3
MBA:8140	Corporate Financial Reporting	3
MBA:8150	Business Analytics	3
MBA:8160	Managerial Economics	3
MBA:8170	International Economic Environment of the Firm	3
MBA:8180	Managerial Finance	3
MBA:8240	Operations and Supply Chain	3
MBA:8300	Foundations in Strategy	3
Hong Kong M.B.A. business electives (consult advisor)		18
Total Hours		45

Admission

Students are admitted to the program year-round. Admission decisions are based on a completed application, which includes a résumé, academic qualifications, an essay, letters of recommendation, and an interview. Applicants must have at least three years of professional-level work experience.

M.B.A. in Italy

The M.B.A. program in Italy (CIMBA M.B.A.) requires 52-55 s.h. of graduate credit. The 11-month full-time program is held primarily at the CIMBA campus in Paderno del Grappa, Italy, but the final course is completed on the University of Iowa campus in Iowa City. A two-year part-time program also is available for working professionals living in Italy.

The program focuses on personal leadership development and emphasizes strategic management, consulting, and international business. Students apply what they learn through a consulting project with local and international companies. In addition to the M.B.A. degree, students earn certificates through Kepner-Tregoe in problem solving and decision making, and in project management. The program draws its faculty from the University of Iowa and from institutions across the United States and Europe.

The full-time program admits students only for fall semester entry. Part-time applicants typically start in the fall but may be permitted to begin the program at other times.

The M.B.A. CIMBA program requires the following coursework.

Code	Title	Hours
MBA:8110	Marketing Management	3
MBA:8120	Management in Organizations	3
MBA:8140	Corporate Financial Reporting	3
MBA:8150	Business Analytics	3
MBA:8160	Managerial Economics	3
MBA:8170	International Economic Environment of the Firm	2
MBA:8180	Managerial Finance	3
MBA:8240	Operations and Supply Chain	3
MBA:8300	Foundations in Strategy	3
ACCT:9020	Strategic Cost Analysis	3
BAIS:9110	Advanced Analytics	2-3
BAIS:9120	Managing the Supply Chain	2-3
BAIS:9220	Introduction to Information Systems	3
ENTR:9100	Entrepreneurship and Innovation	3
FIN:9300	Corporate Investment and Financing Decisions	3
MGMT:9210	Law and Ethics	2
MGMT:9120	Leadership and Personal Development	3

Students complete Italy M.B.A. elective courses to complete degree requirements (consult advisor)

Admission

Admission decisions are based on an applicant's completed application, which includes a résumé, academic qualifications, essays, an interview, and scores on the Graduate Management Admission Test (GMAT) or Graduate Record Exam (GRE) General Test. Applicants must have at least two years of professional work experience.

Business Fundamentals, Professional Certificate

Requirements

The professional Certificate in Business Fundamentals requires 15 s.h. of credit. Students must earn a cumulative g.p.a. of at least 2.75 in certificate coursework. If students have completed one or more of the same courses for another certificate, they must consult their advisor to ensure they earn 15 s.h. to complete the certificate program.

The certificate is open to University of Iowa graduate students who are fully employed with at least 18 months of postbaccalaureate professional work experience. It is not available to students who are admitted to the pre-M.B.A. or Professional M.B.A. Program. However, students who have completed the business fundamentals certificate may use the certificate courses to fulfill degree requirements once admitted to the Professional M.B.A. Program. Students interested in applying to the Professional M.B.A. Program should do so before they complete certificate requirements; they must meet admission requirements of the Professional M.B.A. Program.

The certificate is designed to introduce students to the core principles of business. Coursework covers select disciplines within business—accounting, analytics, finance, managing organizations, marketing, and strategy. Students gain knowledge and develop skills that will immediately strengthen their performance as employees and managers. The certificate is comprised of Professional M.B.A. Program courses, allowing students to benefit from the same coursework and faculty members as M.B.A. students.

The Certificate in Business Fundamentals requires the following coursework.

Code	Title	Hours
All of these:		
MBA:8110	Marketing Management	3
MBA:8120	Management in Organizations	3
MBA:8140	Corporate Financial Reporting	3
MBA:8180	Managerial Finance	3
One of these:		
MBA:8150	Business Analytics	3
MBA:8300	Foundations in Strategy	3

Admission

Admission decisions are based upon completed application materials, including academic performance and quality and quantity of work experience. Applicants must have an undergraduate cumulative g.p.a. of at least 2.75 or a graduate cumulative g.p.a. of at least 3.00, with at least 18 months of full-time professional work experience after completion of their baccalaureate degree. Applicants must be fully employed in a professional capacity to be considered.

Applicants whose first language is not English must score at least 100 (internet-based) on the Test of English as a Foreign Language (TOEFL) or must have a successful admission interview. In place of the TOEFL, the certificate program

accepts satisfactory International English Language Testing System (IELTS) scores. See English Requirements for M.B.A. Admission on the Office of Admissions website.

Applications are accepted throughout the year; admission is for summer, fall, or spring entry.

Finance, Professional Certificate

Requirements

The professional Certificate in Finance requires 15 s.h. of credit. Students must earn a cumulative g.p.a. of at least 2.75 in certificate coursework. If students have completed any of the same courses for another certificate, they must consult their advisor to ensure they earn 15 s.h. to complete the certificate program.

The certificate is open to individuals who are fully employed with at least 18 months of postbaccalaureate professional experience and a desire to complete the certificate to build their financial skills, and to current Professional M.B.A. Program students. Students in the Professional M.B.A. Program may complete the certificate as they complete their degree; the certificate is designed to fit into the M.B.A. curriculum allowing students to earn the M.B.A. and the certificate without additional coursework.

The certificate is ideal for students who wish to gain specialized knowledge of financial concepts. Students can select courses to focus their study in specific areas of finance such as corporate finance, investments, portfolio management, and wealth management.

The Certificate in Finance requires the following coursework.

Code	Title	Hours
This course:		
MBA:8180	Managerial Finance	3
Four of these:		
BAIS:6150	Financial Analytics	3
FIN:9010	Contemporary Topics in Finance	3
FIN:9140	Enterprise Risk Management	3
FIN:9150	Financial Modeling and Firm Valuation	3
FIN:9200	Portfolio Management	3
FIN:9220	Fixed Income Securities	3
FIN:9230	Real Estate Finance and Investments	3
FIN:9240	International Finance	3
FIN:9270	Security Analysis	3
FIN:9280	Global Structured Finance	3
FIN:9290	Alternative Investments and Portfolio Strategies	3
FIN:9300	Corporate Investment and Financing Decisions	3
FIN:9310	Corporate Financial Strategy	3
FIN:9350	Wealth Management	3

Admission

Admission decisions are based upon completed application materials, including academic performance and quality and quantity of work experience. Applicants must have an undergraduate cumulative g.p.a. of at least 2.75 or a graduate cumulative g.p.a. of at least 3.00, with at least 18 months of full-time professional work experience after completion

of their baccalaureate degree. Applicants must be fully employed in a professional position to be considered.

Applicants whose first language is not English must score at least 100 (internet-based) on the Test of English as a Foreign Language (TOEFL) or must have a successful admission interview. In place of the TOEFL, the certificate program accepts satisfactory International English Language Testing System (IELTS) scores. See English Requirements for M.B.A. Admission on the Office of Admissions website.

Applications are accepted throughout the year; admission is for summer, fall, or spring entry.

Leadership, Professional Certificate

Requirements

The professional Certificate in Leadership requires 15 s.h. of credit. Students must earn a cumulative g.p.a. of at least 2.75 in certificate coursework. If students have completed any of the same courses for another certificate, they must consult their advisor to ensure they earn 15 s.h. to complete the certificate program.

The certificate is open to individuals who are fully employed with at least 18 months of postbaccalaureate professional experience and a desire to complete the certificate to build their skills, and to current Professional M.B.A. Program students. Students in the Professional M.B.A. Program may complete the certificate as they complete their degree; the certificate is designed to fit into the M.B.A. curriculum allowing students to earn the M.B.A. and the certificate without additional coursework.

Modern-day leadership is about facilitating change, maximizing team and employee performance, influencing others, and leading companies and people to greatness. Students who pursue the leadership certificate learn the skills to effectively lead others. The certificate is appropriate for working professionals in all business functions and industries.

The Certificate in Leadership requires the following coursework.

Code	Title	Hours
Both of these:		
MBA:8120	Management in Organizations	3
MGMT:9120	Leadership and Personal Development	3
Three of these:		
MBA:8130	Business Communication	3
ENTR:9400	Evaluating Innovation Opportunities	3
ENTR:9500	Managing the Growth Business	3
ENTR:9700	Entrepreneurship: Business Consulting	3
MGMT:9090	Influence and Constructive Persuasion	3
MGMT:9091	Corporate Social Responsibility and Sustainability	3
MGMT:9092	Effective Managerial Communication	3
MGMT:9110	Dynamics of Negotiations	3
MGMT:9130	Strategic Management of Change	3
MGMT:9185	Project Management	3
MGMT:9210	Law and Ethics	3
MGMT:9220	Maximizing Team Performance	3
MGMT:9230	Managing and Preventing Conflict	3

MGMT:9250	Managing Employee Performance	3
MGMT:9260	Strategic Employee Development	3
MGMT:9270	Human Resource Management	3
MGMT:9290	Global Business Management	3

Admission

Admission decisions are based upon completed application materials, including academic performance and quality and quantity of work experience. Applicants must have an undergraduate cumulative g.p.a. of at least 2.75 or a graduate cumulative g.p.a. of at least 3.00, with at least 18 months of professional work experience after completion of their baccalaureate degree. Applicants must be fully employed in a professional position to be considered.

Applicants whose first language is not English must score at least 100 (internet-based) on the Test of English as a Foreign Language (TOEFL) or must have a successful admission interview. In place of the TOEFL, the certificate program accepts satisfactory International English Language Testing System (IELTS) scores. See English Requirements for M.B.A. Admission on the Office of Admissions website.

Applications are accepted throughout the year; admission is for summer, fall, or spring entry.

Marketing, Professional Certificate

Requirements

The professional Certificate in Marketing requires 15 s.h. of credit. Students must earn a cumulative g.p.a. of at least 2.75 in certificate coursework. If students have completed any of the same courses for another certificate, they must consult their advisor to ensure they earn 15 s.h. to complete the certificate program.

The certificate is open to individuals who are fully employed with at least 18 months of postbaccalaureate professional experience and a desire to complete the certificate to build their skills, and to current Professional M.B.A. Program students. Students in the Professional M.B.A. Program may complete the certificate as they complete their degree; the certificate is designed to fit into the M.B.A. curriculum allowing students to earn the M.B.A. and the certificate without additional coursework.

The study of marketing includes the activities and processes for creating, communicating, and delivering products and services that add value for customers. Students learn the foundations of marketing and build specialized skills in a diversity of marketing functions, including the newest concepts and tools in digital and social marketing.

The Certificate in Marketing requires the following coursework.

Code	Title	Hours
This course:		
MBA:8110	Marketing Management	3
Four of these:		
MBA:8150	Business Analytics	3
MKTG:9010	Contemporary Topics in Marketing	3
MKTG:9015	Social Media Marketing for Business	3
MKTG:9120	Customer Relationship Management	3
MKTG:9150	Brand Management	3
MKTG:9155	Digital Marketing Insights, Strategies, and Applications	3
MKTG:9165	Digital Marketing Analytics	3
MKTG:9170	Business to Business Marketing	3
MKTG:9190	International Marketing	3
MKTG:9310	Marketing Analytics	3
MKTG:9300	Applied Marketing Research	3
MKTG:9320	Strategic Brand Positioning	3
MKTG:9330	Product and Pricing Management	3
MKTG:9340	Customer Analysis	3
MKTG:9350	Marketing Communication and Promotions	3

Admission

Admission decisions are based upon completed application materials, including academic performance and quality and quantity of work experience. Applicants must have an

undergraduate cumulative g.p.a. of at least 2.75 or a graduate cumulative g.p.a. of at least 3.00, with at least 18 months of full-time professional work experience after completion of their baccalaureate degree. Applicants must be fully employed in a professional position to be considered.

Applicants whose first language is not English must score at least 100 (internet-based) on the Test of English as a Foreign Language (TOEFL) or must have a successful admission interview. In place of the TOEFL, the certificate program accepts satisfactory International English Language Testing System (IELTS) scores. See English Requirements for M.B.A. Admission on the Office of Admissions website.

Applications are accepted throughout the year; admission is for summer, fall, or spring entry.

Risk Management and Insurance

Director

- Thomas R. Berry-Stoelzle (Finance)

Associate Director

- Bryce Parker (Vaughan Institute)

Undergraduate certificate: risk management and insurance

Faculty: <https://tippie.uiowa.edu/about-tippie/centers-institutes/vaughan-institute/contacts>

Website: <https://tippie.uiowa.edu/about-tippie/centers-institutes/vaughan-institute/risk-management-insurance-certificate>

The financial services/insurance sector is the second largest economic sector in Iowa, including 29 headquartered companies and 228 branches. Risk management and insurance is a diverse field with many career opportunities, including corporate risk manager, risk management consultant, employee benefits manager, insurance broker, underwriter, wealth manager, financial analyst, claims adjuster, producer (sales), actuary, and auditor.

The Emmett J. Vaughan Institute of Risk Management and Insurance prepares students for risk management careers. In addition to the coursework, the Vaughan Institute provides professional development opportunities—networking events with industry speakers, scholarships, a mentorship program with alumni, and a job fair.

The certificate program is designed to give students an in-depth understanding of risk management tools as well as hands-on experience using them. It provides students with the knowledge to understand the business model of insurance. Experiential learning is a cornerstone of the program. Students work as consultants solving real world risk management challenges for companies in eastern Iowa. These projects are supervised by industry professionals, while conceptual classes are taught by research-active professors with global reputations. The Vaughan Institute was named a Global Center of Insurance Excellence, one of only 20 in the world.

Risk management and insurance courses provide value to students' personal lives by familiarizing them with insurable risks and types of insurance (property, liability, life and health). With the selection of elective courses, students learn about employee benefit plans, wealth management, real estate, and banking, among others.

In addition, over 84 percent of students enrolled in the certificate program secure internships during their time in the program, while 98 percent receive a full-time position in a career field associated with risk management and insurance.

Programs

Undergraduate Program of Study Certificate

- Certificate in Risk Management and Insurance [p. 1237]

Resources

The Vaughan Institute provides numerous opportunities for students. It offers:

- an active student organization—Gamma Iota Sigma;
- over \$50,000 in scholarships awarded to Vaughan students each academic year;
- networking events with industry professionals;
- a series of speaker events with recent graduates to assist in résumé preparation, and refinement of interview skills;
- an industry mentor program;
- a student résumé book sent to over 250 employers;
- professional development opportunities, such as the August Vaughan Institute Golf Challenge;
- trips to professional conferences in locations such as Chicago, Dallas, and San Antonio;
- a student newsletter with job and internship announcements; and
- a risk management and insurance career fair.

Career Advancement

Risk management is a growing field in all industries with huge potential for career advancement. It is estimated that 400,000 industry positions in the industry will be available by 2024. Six of every ten risk management and insurance (RMI) professionals will retire in the next decade, which is 30 percent higher than any other industry.

While 75 percent of RMI graduates remain in the Midwest, others are working in 36 states and four countries. Graduates are employed in 14 different industries and by 175 different companies. Nearly 40 percent work for insurance companies, brokers, and agencies.

Popular careers include those in analysis (finance, investments, credit, portfolio, risk), underwriting, auditing, working for brokers or agencies, actuarial and consulting work, corporate finance, marketing, investment banking, management, sales, and as entrepreneurs.

Risk Management and Insurance, Certificate

Requirements

The undergraduate Certificate in Risk Management and Insurance (RMI) requires at least 26-35 s.h. of credit: 35 s.h. for B.B.A. students with a major in finance, 34-35 s.h. for students with a major in mathematics (specialization in risk management and insurance or in finance), 23 s.h. for actuarial science majors, and 26 s.h. for other majors.

Students must maintain a g.p.a. of at least 2.00 in work for the certificate. The certificate may be earned by any student admitted to the University of Iowa who is not concurrently enrolled in a graduate or professional degree program.

Students must declare their intent to earn the certificate with the RMI advisor. Some courses have prerequisites; students must complete prerequisites before they may register for a course. For more information, see the Certificate in Risk Management and Insurance on the Emmett J. Vaughan Institute of Risk Management and Insurance website.

The Certificate in Risk Management and Insurance requires the following coursework.

Foundation Courses

All students complete the following (11 s.h.).

Code	Title	Hours
ACCT:2100	Introduction to Financial Accounting (not required for actuarial science majors)	3
ECON:1100	Principles of Microeconomics	4
ECON:1200	Principles of Macroeconomics	4

RMI Courses

All students complete the following (15 s.h.).

Code	Title	Hours
One of these:		
FIN:3000	Introductory Financial Management	3
FIN:3300	Corporate Finance (for actuarial science majors)	3
ISE:2500	Engineering Economy (for engineering majors)	3
Both of these:		
FIN:3400	Principles of Risk Management and Insurance (with grade of C or higher)	3
FIN:4410	Enterprise Risk Management	3
Two of these:		
FIN:4420	Property and Liability Insurance	3
FIN:4430	Life and Health Insurance	3
FIN:4440	Employee Benefit Plans	3
FIN:4450	Risk Modeling	3
FIN:4460	Insurer Operations and Captive Management	3

Additional Coursework for Finance and Mathematics Majors

In addition to the above requirements, finance majors or mathematics majors (math program C, finance and RMI tracks) also must complete the following courses.

Finance Major

B.B.A. students majoring in finance complete three of these (9 s.h.).

Code	Title	Hours
BAIS:3025	VBA Spreadsheet Programming	3
MGMT:4100	Dynamics of Negotiations	3
MKTG:4200	Sales Management	3

A maximum of three finance courses (prefix FIN) numbered 4000 or above, excluding those taken to satisfy RMI courses above

Mathematics Major with Specialization

Students majoring in mathematics with a specialization in risk management and insurance or a specialization in finance complete three of these (8-9 s.h.).

Code	Title	Hours
ACCT:3020	Financial Accounting and Reporting	3
ACCT:3200	Income Measurement and Asset Valuation (accounting majors take this instead of ACCT:3020)	3
FIN:3100	Financial Information Technology	2
FIN:3200	Investment Management	3
FIN:3300	Corporate Finance	3
FIN:4210	Futures and Options	3
FIN:4220	Fixed Income Securities	3
FIN:4230	Real Estate Process	3
FIN:4320	Commercial Banking	3

Risk Management and Insurance Affiliated Courses

The Department of Finance offers six courses affiliated with the Emmett J. Vaughan Institute of Risk Management and Insurance that are included in the Certificate in Risk Management and Insurance curriculum. Students should view the course descriptions and prerequisites for each of the courses below.

Code	Title	Hours
FIN:3400	Principles of Risk Management and Insurance	3
FIN:4410	Enterprise Risk Management	3
FIN:4420	Property and Liability Insurance	3
FIN:4430	Life and Health Insurance	3
FIN:4440	Employee Benefit Plans	3
FIN:4450	Risk Modeling	3
FIN:4460	Insurer Operations and Captive Management	3

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Risk Management and Insurance, Certificate

Finance Majors

Course	Title	Hours
Academic Career		
Any Semester		
This sample plan is intended for BBA students majoring in finance.		
Students must successfully complete ECON:1100 Principles of Microeconomics and ECON:1200 Principles of Macroeconomics before beginning FIN:3400 Principles of Risk Management & Ins.		
To declare the certificate students should be enrolled in FIN:3400 Principles of Risk Management & Ins.		
Maintain a cumulative GPA of at least 2.00 in all courses, UI courses, RMI (Risk Management and Insurance) courses and UI RMI courses.		
Meet with the RMI advisor for planning and to learn about additional benefits of the RMI certificate; more information is included in the General Catalog and on Tippie College of Business website.		
Hours		0
First Year

Certificate: RMI elective ^d		3

Certificate: additional elective approved for finance majors^e 3

Certificate: additional elective approved for finance majors^e 3

Hours 9

Total Hours 35

- Discuss transfer credit or credit by exam with advisor.
- To be able to enroll in this course, students must have already completed the required minimum number of semester hours. See MyUI courses/registration page for details. The ACCT:2100 requirement is waived for actuarial science majors.
- May be taken any semester after prerequisites are completed. May also be taken first semester of year three concurrently with FIN:3000. Students must obtain a grade of C or higher in FIN:3400.
- Choose from FIN:4420, FIN:4430, FIN:4440, FIN:4450, or FIN:4460. Two RMI electives (6 s.h.) must be completed before graduation. Each course is offered only once per year. Typically at least two RMI elective courses are offered each fall and each spring. Some courses may satisfy the Tippie College of Business RISE requirement.
- Three electives (9 s.h.) are required before graduation. These include any finance course (prefix FIN) numbered 4000 or above that has not been previously taken. Finance majors may also take MGMT:4100, MKTG:4200, or BAIS:3025.
- This core required course is offered only in the fall. May be taken fall of year three or year four if prerequisite is completed. Course may satisfy the Tippie College of Business RISE requirement.

College of Dentistry

Dean

- David C. Johnsen

Executive Associate Dean

- Galen B. Schneider

Associate Dean, Education

- Michelle M. Krupp

Associate Dean, Finance and Facilities

- Scott K. Arneson

Associate Dean, Patient Care

- Michael J. Kanellis

Associate Dean, Research

- Xian Jin Xie

Associate Dean, Student Affairs

- Sherry R. Timmons

Professional degree: D.D.S.

Graduate degrees: M.S.; Ph.D.

Website: <https://www.dentistry.uiowa.edu/>

The College of Dentistry is an integral part of the University of Iowa and its health sciences campus. Its mission, which embraces the University's academic values as well as the ethical responsibilities implicit in educating future members of a profession, rests on a foundation representing every aspect of collegiate activity: education of students as general practitioners and specialists; research into all aspects of oral and dental disease and the delivery of health care; and service to the community, the state, and the profession.

Faculty members, D.D.S. students, dental specialty residents, and staff provide oral health care to patients at clinics in the Dental Science Building and the Center for Disabilities and Development. Faculty, staff, and students participate in interdisciplinary research and training activities involving the University's five health science colleges as well as other University colleges and departments.

Dentistry at the University of Iowa began in 1882 as a single department. In 1900 the University underwent general reorganization and the Dental Department became the College of Dentistry. Today the college is Iowa's only provider of predoctoral dental education and ranks as a leader in dental education nationwide.

The college and its educational programs are accredited by the Commission on Dental Accreditation of the American Dental Association, an independent tripartite commission authorized and recognized by the Office of Postsecondary Education.

Programs offered by the college cover the full spectrum of dentistry and closely integrated fields. They include the Doctor of Dental Surgery program (D.D.S.), which prepares general dentists. The college has advanced education programs in nine dental specialties, each of which may lead to certification in a specialized area of dentistry. In addition, advanced education programs in operative dentistry, geriatrics and special needs dentistry, and post-D.D.S. residency programs in hospital-based dentistry are available. The college has an oral science program, which offers a M.S.

or Ph.D. degree with or without a specialty certificate. To emphasize commitment to learning, the College of Dentistry has a wide variety of continuing education programs for dental and allied professions.

Faculty

Iowa's dental faculty are predominantly full-time. In addition, more than 100 part-time adjunct faculty members assist with clinical teaching in the D.D.S. and advanced residency programs. Approximately 88 percent of the college's faculty members hold D.D.S. or D.M.D. degrees and 12 percent represent other disciplines. The vast majority of faculty dentists have advanced education past the D.D.S., generally with master's degrees in specialty areas; about one-fifth hold a Ph.D.

The College of Dentistry is committed to the principle that diversity is essential to a strong educational environment—one that prepares new generations of dentists to provide high-quality care to patients from many backgrounds. The college's full-time faculty reflects that commitment.

Programs

Professional Program of Study (D.D.S.)

The Doctor of Dental Surgery program prepares students to practice general dentistry. It requires a minimum of three years of preprofessional study and four years of study in the College of Dentistry. See the Doctor of Dental Surgery [p. 1242] section for a description of the program's curriculum and information about a combined bachelor's degree and a D.D.S., the dentistry licensure examination, student organizations, expenses, admission, financial support, and academic rules and procedures.

Post-D.D.S. and Graduate Programs of Study

Several College of Dentistry departments offer professional certificate programs designed to prepare dentists for clinical specialty practice: endodontics [p. 1245]; operative dentistry [p. 1251]; oral pathology, radiology, and medicine [p. 1255]; orthodontics [p. 1262]; pediatric dentistry [p. 1266]; periodontics [p. 1268]; and prosthodontics [p. 1273]. Students who complete these programs satisfactorily are awarded a certificate. The Department of Oral and Maxillofacial Surgery [p. 1253] offers a four-year residency program that culminates in a certificate. The college also offers the Certificate in Geriatric and Special Needs Dentistry [p. 1248].

The College of Dentistry offers a Doctor of Philosophy and a Master of Science in oral science [p. 1259]. The M.S. is only offered in conjunction with a specialty certificate. Students earning the Certificate in Endodontics or the Certificate in Prosthodontics may earn an M.S. or a Ph.D. in oral science. Those earning the Certificate in Operative Dentistry, Certificate in Oral and Maxillofacial Pathology, Certificate in Oral and Maxillofacial Radiology (Department of Oral Pathology, Radiology, and Medicine), or the Certificate in Periodontics may earn an M.S. in oral science.

In addition, the Department of Orthodontics [p. 1262] offers a Master of Science in orthodontics, and the Department of Preventive and Community Dentistry [p. 1270] offers a Master of Science in dental public health.

For information about post-D.D.S. and graduate programs of study, see the College of Dentistry department sections of the Catalog.

Facilities

The College of Dentistry is located in the Dental Science Building on the University of Iowa health sciences campus, in proximity to the Roy J. and Lucille A. Carver College of Medicine, College of Nursing, College of Pharmacy, College of Public Health, and University of Iowa Hospitals & Clinics. The Bowen Science Building and the Hardin Library for the Health Sciences also are nearby.

The south wing of the Dental Science Building is devoted to clinical teaching. There are 248 operatories in departmental clinics, student laboratories, clinical research space, and a cafeteria. The three clinical floors of the south wing were recently remodeled as part of a comprehensive four-year project.

The west wing contains two floors of patient treatment areas and one floor of space for students. The clinical spaces include 44 dental operatories in the Geriatric and Special Needs Clinic, the Endodontic Clinic, Faculty General Practice, and the Craniofacial Clinical Research Center. Student areas include a classroom that accommodates 80 people, small-group study rooms, a seminar room, a student lounge, lockers, and showers.

The north wing houses the simulation clinic and technique bench teaching laboratory, the electronic classroom, college administrative offices, technology and media services, the academic Department of Preventive and Community Dentistry, and the research laboratories and faculty offices of the Iowa Institute for Oral Health Research.

Dental Education and Patient Care

Patient care is integral to dental education. Students and faculty members deliver oral health care in clinics on the health sciences campus and at several off-campus sites, including nursing homes. More than 45,600 people receive oral health care yearly in the college's clinics. Patients from throughout Iowa as well as from western Illinois and northern Missouri account for most of the 167,300 patient visits each year.

Interdisciplinary Centers and Research

Iowa Institute for Oral Health Research

The Iowa Institute for Oral Health Research occupies the first and fourth floors of the Dental Science Building's north wing. Laboratories are equipped to support a wide variety of research projects reflecting the complex nature of modern health care needs. Research at the institute is coordinated by the College of Dentistry.

There are four focus areas of research. The first area includes bioengineering, tissue engineering, stem cells, and biomaterials and materials research. The second area encompasses craniofacial, oral biology, genetics, and dental development. The third area includes public health, epidemiology, and behavioral sciences. The fourth area encompasses immunology, inflammation, microbiology, and caries and microbiome research. All focus areas are supported by the Division of Biostatistics and Computational

Biology. Clinical and translational research involving new innovative methods and products designed in the research laboratories is carried out in the Craniofacial Clinical Research Center. A new initiative is the development of a precision, personalized medicine database and biorepository at the College of Dentistry that will allow for more efficient and specialized patient care.

Although research is concentrated in these program areas, one of the unit's strengths has been the consistent level of interaction and collaboration among individuals and programs across the college and the University.

Craniofacial Anomalies Research Center

The role of the Craniofacial Anomalies Research Center is to understand the molecular mechanisms of genes and gene interactions that contribute to craniofacial/dental anomalies and birth defects. These genetic defects arise from inherited and somatic gene mutations due to environmental effects. The center researchers use mouse, ferret and zebrafish models, human genetic material, cell lines, and molecular/biochemistry approaches to understand gene function. With the advent of human genome sequencing and the decreasing costs of genomic analyses, it has become somewhat more efficient to identify genetic defects associated with human genetic defects and diseases. The use of these genetic screening approaches provides invaluable data and resources in the search for new genes involved in human craniofacial development and associated anomalies. The center collaborators reside in the Carver College of Medicine, and the Colleges of Dentistry, Pharmacy, and Public Health.

Craniofacial Clinical Research

For more than two decades, the College of Dentistry has offered outpatient research support for National Institutes of Health, Food and Drug Administration, and related federally supported research grants. Protocol-based studies are performed by faculty scientists and supported by oral health care industries. Scientists also engage in translational research that involves laboratory-to-clinical-research outcomes. College of Dentistry faculty use new technology to improve dental procedures and provide state-of-the-art methods to obtain the best outcomes for patients. A biorepository program helps researchers understand the causes of dental and oral diseases and genetic anomalies. It benefits Iowans by the potential diagnoses of diseases and their effects and provides new, improved patient treatment.

Through integrated research, education, and clinical programs, craniofacial clinical research facilitates the development of implants and their use as a therapeutic modality in dentistry. The program also integrates basic and clinical research with technology transfer to the clinical setting, enhancing predoctoral, postgraduate, and continuing education and expanding treatment options available to patients served by the college. Craniofacial Clinical Research also provides vital coordination of dental specialties that participate in this treatment modality.

Courses

Most College of Dentistry courses are offered by the college's departments and programs. They are listed and described in the corresponding General Catalog sections. The college also offers the following nondepartmental courses.

College of Dentistry Courses

DENT:4000 Pre-Dental Academy 0 s.h.

Hands-on experience for undergraduate students interested in dentistry; interaction with faculty, residents, and current students in simulation clinic; didactic sessions; admissions information; changing health care environment, digital dentistry, dental esthetics, introduction to dental specialties, drilling and filling. Offered summer session.

DENT:8100 First-Year Continuing Session arr.

DENT:8110 Dental First-Year UI Interprofessional Education 0 s.h.

Application of previously learned concepts to relevant health care experiences using interprofessional skills and team-based health care concepts; development of skills related to leadership in health care teams, pain management from an interprofessional team, and application of ethics and professionalism concepts; online modules and group activities.

DENT:8200 Second-Year Continuing Session arr.

DENT:8210 Dental Second-Year Interprofessional Education 0 s.h.

Application of previously learned concepts to relevant health care experiences using interprofessional skills and team-based health care concepts; development of skills related to leadership in health care teams, pain management from an interprofessional team, and application of ethics and professionalism concepts; online modules and group activities.

DENT:8300 Third-Year Continuing Session arr.

DENT:8371 Quality Assurance I 1 s.h.

Patient management, record writing skills, and quality assurance concepts; students coordinate treatment, patient relations, and issues of quality assurance for a group of patients; ethical and moral dilemmas in relation to dental practice.

DENT:8372 Quality Assurance II 1 s.h.

Continuation of DENT:8371; patient management, record writing skills, and quality assurance concepts; students coordinate treatment, patient relations, and issues of quality assurance for a group of patients; ethical and moral dilemmas in relation to dental practice.

DENT:8400 Fourth-Year Lectures and Clinics arr.

DENT:8485 Clinical Admissions Emergency 2 s.h.

Clinical evaluation, diagnosis, and treatment of patients with dental emergencies; patient assessment and referral to appropriate department for treatment.

DENT:8489 Clinical Practice and Professionalism V1 s.h.

Quality assurance from viewpoint of practicing dentist, dental educator, dental epidemiologist, court system; analysis of senior dental practice in relation to quality assurance criteria.

DENT:9000 Advanced Clinical Comprehensive Dentistry 0 s.h.

Clinical experience for professional improvement. Requirements: dental degree.

Doctor of Dental Surgery

Professional degree: D.D.S.

Website: <https://www.dentistry.uiowa.edu/>

The Doctor of Dental Surgery program prepares students to practice general dentistry. The D.D.S. is a professional degree awarded by the College of Dentistry.

Dentistry Licensure Examination

The State of Iowa accepts clinical examination results from all Regional Dental Testing Services (CRDTS, WREB, CDCA/ADEX, SRTA, CITA). Examinations are administered at several testing sites located at dental schools in the United States. Once the regional dental exam is completed, a licensure application is then filed with the dental board of each state a student would like to practice dentistry.

For licensure, all states also require the National Board Dental Examination, conducted by the Joint Commission on National Dental Examinations (JCNDE). Many states, including Iowa, also require a jurisprudence examination.

Student Organizations

All dental students are members of the American Student Dental Association through its local chapter. The American Dental Education Association, the American Association of Dental Research (Student Research Group), the American Association for Women Dentists, the American Academy of Pediatric Dentistry student chapter, the American Association of Public Health dentistry student chapter, the Student National Dental Association, the Hispanic Dental Association student chapter, and the Tau Sigma Military Dental Club also have local chapters.

Students who rank in the upper 20 percent of their senior class are eligible for election to Omicron Kappa Upsilon, a national scholastic honorary dental society.

The national dental professional fraternity, Delta Sigma Delta, has a chapter at Iowa. The fraternity provides academic and social activities for students and their spouses.

Programs

Professional Program of Study

Major

- Doctor of Dental Surgery [p. 1243]

Academic Rules and Procedures

Promotions, Graduation

Student promotions and graduation are determined by the Collegiate Academic and Professional Performance (CAPP) Committee, which is made up of individuals appointed by the dean from the biomedical, preclinical, and clinical sciences and from other academic areas of the college. The performance committee may recommend to the executive associate dean that a student withdraw from the college or repeat specific courses when the student is deemed generally unprepared to be promoted or to enter the dental profession.

Committee for Appeals

When a student has been asked to withdraw from the college or wants special consideration of problems concerning promotion or graduation, the student may appeal to the dean. All appeals are heard by an ad hoc committee appointed by the dean. The ad hoc committee investigates new information that has not been available previously or that has not been discussed as fully as the student feels it should have been. The committee determines whether this new information, or important new insights that may have been gained, could have influenced the Collegiate Academic and Professional Performance Committee's decision. The recommendation of the appeals committee is submitted to the dean for final action.

Doctor of Dental Surgery, D.D.S.

The Doctor of Dental Surgery (D.D.S.) is a professional degree awarded by the College of Dentistry. Admission requirements include 90 s.h. of undergraduate credit, including specific required courses, completed at an accredited college; see Admission [p. 1243] in this section of the Catalog.

Students working toward a bachelor's degree in the University of Iowa College of Liberal Arts and Sciences before being admitted to the College of Dentistry may be able to complete their bachelor's degree during their first year in dentistry; see "Bachelor's Degree/D.D.S." under Requirements [p. 1243] in this section of the Catalog.

Requirements

The Doctor of Dental Surgery requires a minimum of three years of preprofessional study and four years of study in the College of Dentistry. Students are required to maintain a cumulative g.p.a. of at least 2.00 to earn the degree.

Coursework during the first and second years in the College of Dentistry integrates the biomedical sciences with preclinical and clinical disciplines. The biomedical sciences include gross anatomy, biochemistry, general histology, microbiology, pathology, pharmacology, and physiology. Students also study topics specific to dentistry, such as principles of occlusion, anesthesia and pain control, operative dentistry, periodontics, prosthodontics, cariology, and preventive dentistry. During the latter part of the first year, students are introduced to their first clinical patient treatment situation.

Second-year dental students continue their study of biomedical sciences, take preclinical courses, have additional patient treatment experiences in restorative and preventive dentistry, and are introduced to aesthetic and implant dentistry.

Third-year dental students rotate through a series of clerkships that expose them to eight clinical disciplines: endodontics, operative dentistry, oral and maxillofacial surgery, oral pathology, pediatric dentistry, periodontics, prosthodontics, and oral radiology and medicine.

Fourth-year dental students deliver comprehensive dental care in conditions that closely approximate those in private dental practice. They also are exposed to varied community dentistry health programs throughout Iowa and other states that include hospitals, nursing homes, and special care clinics. They may choose to participate in the Colorado Migrant Worker Program or the Indian Health Service Program. The community dentistry programs provide exposure to facets of dentistry usually not observable in an academic setting.

Biomedical Sciences in the Dental Curriculum

The following science courses are offered by University of Iowa departments outside the College of Dentistry and are a required part of the D.D.S. curriculum.

Code	Title	Hours
ACB:8120	Human Gross Anatomy for Dental Students	6
ACB:8121	General Histology for Dental Students	4

BIOC:8101	Biochemistry for Dental Students	3
MICR:8230	Dental Microbiology	3
MPB:8115	Human Physiology for Dental Students	4
OPRM:8240	Basic Pharmacology	3
PATH:8133	Introduction to Human Pathology for Graduate Students	4

Dentistry nondepartmental courses are listed under Courses [p. 1240] in the College of Dentistry section of the Catalog. Courses offered by the college's departments are listed in each department's General Catalog section.

Bachelor's Degree/D.D.S.

The College of Liberal Arts and Sciences (CLAS) allows its students to count 30 s.h. of elective credit earned in any other University of Iowa college toward graduation with a bachelor's degree. Under this policy, CLAS students who enroll in the College of Dentistry before completing their bachelor's degree may be able to complete their degree during their first year in dentistry. Students planning to take advantage of this plan must satisfy the CLAS residence requirement in order to enroll in the College of Dentistry. They also must fulfill all requirements for the bachelor's degree, including the GE CLAS Core [p. 20] requirements and the requirements for a major. Contact the College of Liberal Arts and Sciences for more information.

Admission

Applicants must submit a completed AADSAS (Associated American Dental Schools Application Service) application form to the American Dental Education Association (ADEA). The AADSAS application must be completed online at the American Dental Education Association website.

Applications are accepted in June of the year that precedes the year of entry. Completed applications must be on file at ADEA by October 1. Applicants should apply as early as possible. Notifications of acceptance are sent beginning in December.

Pre dental Studies

The basic academic requirement for admission to the College of Dentistry is completion of at least 90 s.h. of academic study at an accredited college. No more than 60 s.h. of credit is accepted from a junior college or two-year institution. The pre dental program of study should include the following.

English: satisfactory accomplishment in English composition, rhetoric, and speech commensurate with the academic requirements for a bachelor's degree at the college attended.

Physics: one year (equivalent to 8 s.h.), of which one-fourth must be laboratory work.

Chemistry: two years (equivalent to 16 s.h.), of which one year (equivalent to 8 s.h.) must be in organic chemistry; one-fourth of each year's study must be laboratory work.

Biological science: one year (equivalent to 8 s.h.), which must include appropriate laboratory work; the requirement may be satisfied by a one-year course in principles of biology, with instruction in cell biology, metabolism, organismic biology, animal biology, genetics, development, ecology, and evolution. Preference is given to applicants who have

completed more than 8 s.h. Courses in human anatomy and cell physiology are strongly recommended.

Biochemistry: one course (3 s.h.) that covers basic concepts in modern biochemistry and molecular biology.

Electives: sufficient coursework in the social sciences, philosophy, psychology, history, world languages, business, and mathematics to provide a well-rounded educational background.

Grade-Point Average Requirement

Applicants should have a cumulative g.p.a. higher than 2.50 on a 4.00 scale; a g.p.a. above 3.50 is preferred. The admissions committee gives special consideration to the quality of applicants' coursework in the pre-dental sciences, in addition to the cumulative grade-point average.

Interviews

Personal interviews are required of applicants for admission to the College of Dentistry. After a complete AADSAS application is received by the admissions office, select applicants are contacted to arrange an interview.

Required Dental Admission Test

All applicants must complete the Dental Admission Test (DAT) sponsored by the Council on Dental Education and Licensure of the American Dental Association. A computerized DAT is available throughout the year at designated Prometric centers. Tests must be scheduled in advance.

Test application forms are available online or by mail from the American Dental Association, 211 East Chicago Avenue, Chicago, IL 60611.

Deposit by Accepted Applicants

Applicants accepted before February 1 are required to submit a \$500 deposit within 30 days after notification of admittance. Applicants admitted after February 1 must submit the deposit within two weeks after notification of admittance. This deposit is not refundable but is credited toward the first fee payment. Applicants who fail to make the deposit within the time specified forfeit their place in the entering class.

Additional Admission Considerations

Fulfillment of the specific requirements listed for admission does not ensure admission to the College of Dentistry. The admissions committee reviews applicants who meet the minimum requirements and selects those who appear best qualified for the study and practice of dentistry. The committee considers quantitative and qualitative components of the application, letters of recommendations, the interview, and other factors.

Financial Support

Financial assistance for dental students is based on need. Dental students who demonstrate need are eligible for Health Professions, Stafford, and Grad PLUS loans. Students applying for loans must submit the Free Application for Federal Student Aid (FAFSA), including parental information in order to be considered for the Health Professions loan. Loans are

repayable over an extended period of time after the course of study is completed.

Collegiate short-term and long-term loans are available through the financial aid coordinator at the College of Dentistry.

Tuition scholarships are awarded each year to qualified entering dental students. The awards provide financial support up to \$15,000 per year for as many as four years, if the student maintains an appropriate level of academic and professional performance.

Information on financial assistance for dental students is available from the University's Office of Student Financial Aid as well as the College of Dentistry Office of Student Affairs.

Expenses

The College of Dentistry maintains the Supply-Instrument Management System (SIMS), which provides students with instruments and supplies necessary throughout their dental training. The SIMS usage fee for the D.D.S. is payable in installments over the four-year program.

A fee for expendable laboratory supplies is charged each of the first two years. A \$100 breakage fee also must be deposited; the deposit is refundable upon graduation or termination of enrollment.

Career Advancement

The Doctor of Dental Surgery program prepares students to practice general dentistry.

Endodontics

Head

- Fabricio B. Teixeira

Director, Graduate Program

- Anne E. Williamson

Professional certificate: endodontics

Faculty: <https://www.dentistry.uiowa.edu/endodontics-faculty>

Website: <https://www.dentistry.uiowa.edu/endodontics>

The Department of Endodontics provides education and training to predoctoral students and to professional students who may work toward a graduate degree along with their professional training. Some students participate with departmental faculty in research that contributes to the knowledge base of the specialty. Faculty and advanced students in the department also provide care to patients at the College of Dentistry.

D.D.S. Student Training

Coursework and clinical experiences in endodontics are of vital importance in the overall education of Doctor of Dental Surgery students. Preclinical endodontics, taught during the sophomore year, includes a didactic and a laboratory component. In clinical endodontics, taught during the junior year, students study both normal and pathological conditions of the dental pulp and periapex. Diagnosis of pulpal and periradicular disease and various specialized aspects of endodontic treatment are emphasized. Students treat endodontic patients under direct supervision of faculty and staff.

Tooth pain, anesthesia, diagnosis and treatment of pulpal and periradicular pathology, endodontic emergencies, endodontic radiologic interpretation, diagnosis and treatment of dental traumatic injuries, bleaching, retreatment, and apexification/apexigenesis.	

Endodontics, Professional Certificate

Requirements

The professional Certificate in Endodontics requires a minimum of 24 months of full-time formal training. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the certificate.

The certificate is a clinical specialty program designed to provide qualified dentists with the scientific knowledge and clinical skills they need to practice endodontics and/or pursue a career in dental education and research. The curriculum includes clinical and didactic courses. Students complete an original research project in endodontics and write a scientific paper on their research for submission to a refereed journal.

The program's goal is to develop competent diagnosticians and clinicians. Students learn the scientific and clinical basis of endodontics; develop clinical skills; gain knowledge of and experience in the educational process in order to function confidently as dental educators; and develop skills in designing, conducting, reporting, and publishing the results of original research.

The certificate program satisfies training requirements for eligibility for certification by the American Board of Endodontics. Students who complete the program are encouraged to seek board certification. Various activities throughout the course of study prepare students for the board examination process.

Once students enroll in the certificate program, they are not permitted to involve themselves in private dental practice enterprises outside the college. Failure to adhere to this policy may result in dismissal from the program.

Whenever possible, students should complete the certificate program without interruption. Students who demonstrate a need to discontinue the program temporarily should limit their time away to a maximum of one calendar year. Students must have permission from the endodontics graduate program director in order to interrupt their study.

Graduate Study

Certificate students may work toward a Master of Science or a Doctor of Philosophy in oral science while earning the certificate. Both graduate degree programs provide students with in-depth knowledge in a scientific training discipline as preparation for careers in academia and research.

Students normally require three years of full-time study to complete the Certificate in Endodontics and the M.S. degree, or at least four years to complete the certificate and the Ph.D. degree. Both graduate degree programs require more didactic coursework than the certificate program. The M.S. requires a thesis; the Ph.D. requires a dissertation. See Oral Science [p. 1259] in the Catalog.

Other graduate programs are available to endodontics certificate students, such as master's degrees in other disciplines, or a certificate in combination with a Ph.D. in a basic science area. Such programs are available by special arrangement, depending on a candidate's experience and goals. Consult the Department of Endodontics for more information.

Admission

Applicants to the endodontics certificate program must apply through the American Dental Education Association's Postdoctoral Application Support Services (ADEA PASS). Applicants must hold a D.D.S. or D.M.D. degree or a foreign equivalent and must meet the application requirements of the Graduate College. They should take the National Board Dental Examination, part one, and part two when it is available.

Applications should include official transcripts from all undergraduate and graduate institutions, an updated curriculum vitae, three letters of recommendation, a personal statement, and a photograph (two-inch head-and-shoulders view).

The certificate program begins July 1; ADEA PASS applications should be submitted no later than July 1 for admission the following summer. Finalists for admission are asked for a personal interview in July; admission decisions are made following interviews.

Financial Support

Applicants to the certificate program must be able to support themselves financially until they complete the program.

Prospective students should plan to pay for living expenses, tuition, books, specialized equipment (e.g., surgical operating microscope, notebook computer, and ultrasonic system), instrument usage, and other expenses.

Family Dentistry

Head

- David C. Holmes

Faculty: <https://www.dentistry.uiowa.edu/family-dentistry-faculty>

Website: <https://www.dentistry.uiowa.edu/family-dentistry>

The Department of Family Dentistry reinforces and refines the comprehensive approach to managing patients' oral health care needs.

D.D.S. Student Training

The senior year of the Doctor of Dental Surgery program integrates basic science knowledge, clinical skills, and dental laboratory experiences acquired during the first three years of dental school into a systematic approach to providing patient care.

Students who complete their education in family dentistry should:

- conduct themselves in a professional and ethical manner;
- understand the principles of comprehensive dental treatment planning;
- know the medical, ethical, and legal issues involved in patient care;
- be able to recognize the need for specialty consultation;
- be competent in coordinating and sequencing patient treatments;
- be effective members of the dental team;
- be prepared to enter general practice;
- be educated and trained for licensure examination; and
- appreciate the importance and value of lifelong learning.

Students spend five days a week in a clinical setting, where they gain experience in total patient management and care. Their didactic coursework builds on their previous education. All areas of clinical and didactic instruction, patient awareness, and sensitivity to patients' needs are stressed.

The department's practice management curriculum prepares students to evaluate practice locations and manage the business aspects of a dental practice.

Courses

Family Dentistry Courses

FAMD:8484 Dental Practice Management 2 s.h.
Principles of dental practice management; delivery of comprehensive dental treatment in a simulated group-practice clinical setting, with chairside dental assistants.

FAMD:8487 Clinical Experiences: Comprehensive Care I 3 s.h.
Clinical experiences in diagnosis, treatment planning, and delivery of integrated, comprehensive dental care.

FAMD:8488 Comprehensive Dental Patient Care I 15 s.h.
Refinement of clinical skills, judgment, and critical self-evaluation in the delivery of integrated, comprehensive dental care.

FAMD:8489 Clinical Experiences: Comprehensive Care II 3 s.h.
Clinical experiences in diagnosis, treatment planning, and delivery of integrated, comprehensive dental care.

FAMD:8491 Clinical Experiences: Comprehensive Care III 3 s.h.
Clinical experiences in diagnosis, treatment planning, and delivery of integrated, comprehensive dental care.

FAMD:8494 Current Topics in Dentistry I 1 s.h.
Emerging trends, research updates, and clinical updates to support critical thinking and lifelong learning.

FAMD:8495 Advanced Treatment Planning I 2 s.h.
Development of knowledge to implement comprehensive treatment plans involving a multidisciplinary approach in management of patients through case-based learning.

FAMD:8496 Current Topics in Dentistry II 1 s.h.
Emerging trends, research updates, and clinical updates to support critical thinking and lifelong learning.

FAMD:8497 Advanced Treatment Planning II 1 s.h.
Builds on FAMD:8495; development of advanced knowledge to implement complex comprehensive treatment plans involving a multidisciplinary approach in management of patients with complex medical and dental needs through case-based learning, lectures, and student case presentations.

FAMD:8498 Current Topics in Dentistry III 1 s.h.
Current techniques and findings; applications for general practitioner and graduate specialty programs.

FAMD:8499 Comprehensive Dental Patient Care II 15 s.h.
Continuation and refinement of clinical skills, judgment, and critical self-evaluation in the delivery of integrated, comprehensive dental care.

Geriatric and Special Needs Dentistry

Head, Department of Preventive and Community Dentistry

- Daniel J. Caplan

Director, Geriatric and Special Needs Dentistry

- Howard Cowen

Professional certificate: geriatric and special needs dentistry

Faculty: <https://www.dentistry.uiowa.edu/preventive-geriatric-special-needs-certificate-program-faculty>

Website: <https://www.dentistry.uiowa.edu/preventive-geriatric-special-needs-certificate-program>

The certificate program in geriatric and special needs dentistry prepares dentists to be leaders and teachers in this critical area of practice. The multidisciplinary program incorporates medicine and psychiatry and blends clinical and didactic experiences in varied settings, such as acute, palliative, rehabilitative, and long-term care. Its goal is to provide dental professionals with the knowledge and skills they need to provide patient-centered, sound, and realistic treatment plans for their geriatric and special needs patients.

The Certificate in Geriatric and Special Needs Dentistry is administered by the Department of Preventive and Community Dentistry [p. 1270].

GSND:5771 Advanced Clinical Training for Developmentally Disabled Adults II	0,2 s.h.

Geriatric and Special Needs Dentistry, Professional Certificate

Requirements

The professional Certificate in Geriatric and Special Needs Dentistry requires a minimum of one year of full-time study. The program prepares dentists to evaluate and manage the oral health problems of older adults across the spectrum of geriatric health care services as well as adults with special needs. It also prepares professionals for scholastic positions in geriatric education. Successful graduates meet the educational requirements for eligibility to take the fellowship examination of the Special Care Dentistry Association.

Certificate students have opportunities to collaborate with medical residents and other allied health care professionals in providing a holistic approach to care of patients whose dental and medical needs are complex. They gain experience in the College of Dentistry's patient care clinics and Geriatric Mobile Dental Unit, at St. Luke's Hospital (Cedar Rapids, Iowa), and at University of Iowa Hospitals & Clinics.

Highlights of the curriculum include advanced clinical geriatric and special needs dentistry, interdisciplinary geriatric patient assessment, geriatric dentistry case studies, outreach, and teaching practicum.

Admission

Applicants must hold a D.D.S. or D.M.D. degree from an accredited dental school. International students should have at least three years of experience and/or postgraduate prosthodontics training and be licensed dentists. All applicants must meet the admission requirements of the Graduate College. Contact the Geriatric and Special Needs Dentistry Certificate Program to learn more.

Hospital Dentistry

Head

- Kirk L. Fridrich (Oral and Maxillofacial Surgery)

Director, Graduate Program

- Darrick J. Zirker

Faculty: <https://gme.medicine.uiowa.edu/american-dental-association-general-practice-residency/our-people>

Website: <https://gme.medicine.uiowa.edu/hospital-dentistry-general-practice-residency>

The College of Dentistry operates a hospital dentistry clinical service at University of Iowa Hospitals & Clinics. The service includes divisions of general dentistry, maxillofacial prosthodontics, and oral and maxillofacial surgery, and it interacts with the college's specialties of orthodontics, periodontics, pediatric dentistry, endodontics, diagnosis, oral pathology, and prosthodontics.

The Hospital Dentistry Program offers a one-year general practice residency.

Residency

The general practice residency program prepares dentists for a broader scope of private practice in general dentistry. The program combines clinical and didactic training on an individual basis and meets fundamental requirements of the Commission on Dental Accreditation of the American Dental Association (ADA).

The residency covers one year of hospital-based training. Through postdoctoral clinical, didactic, and hospital experience, residents prepare to meet the oral health needs of a wide range of ambulatory and nonambulatory patients. Rotations and patient experiences are located at University of Iowa Hospitals & Clinics.

Residency training includes use of hospital resources, management of ambulatory patients, inpatients, same-day surgery patients, and emergency medical and dental patients. Residents participate in consultations with other hospital services and are assigned to appropriate hospital services to fulfill the objectives of the training program. They are appointed to the hospital's house staff and have the same privileges and responsibilities as residents in other professional education programs.

Admission

Applicants must be U.S. citizens or permanent residents and must be graduates of a dental school accredited by the American Dental Association. They also must be eligible for licensure to practice dentistry in the United States. Application deadline is October 1 for the following July 1. See the Hospital Dentistry-General Practice Residency Program website for admission and application requirements.

Operative Dentistry

Head

- Erica C. Teixeira

Professional certificate: operative dentistry

Faculty: <https://www.dentistry.uiowa.edu/operative-faculty>

Website: <https://www.dentistry.uiowa.edu/operative>

The Department of Operative Dentistry teaches the foundational concepts of dentistry to predoctoral dental students in caries management (diagnosis, prevention, repair, and restorative techniques). The primary departmental focus is to provide the knowledge, technical skills, critical thinking and judgment for the diagnosis, prevention, and management of dental caries, non-caries dental defects (attrition, abrasion, erosion, abfraction, developmental abnormalities, discoloration, and trauma), and elective esthetic smile enhancements. It also serves an equally important position to provide national leadership in dental research and advanced restorative technology in its collective faculty efforts and through the professional Certificate in Operative Dentistry.

D.D.S. Student Training

Coursework and clinical experiences in operative dentistry are fundamental to the overall education of Doctor of Dental Surgery students. Operative dentistry coursework covers roughly one quarter of curriculum time during the first three years of dental school as students progress toward competency in operative dentistry. The department's primary goal is to educate dental students, using the best evidence available and the latest proven approaches, to achieve and maintain optimal patient oral comfort, function, and aesthetics through risk-based diagnosis, prevention, and minimally invasive treatment of caries and noncarious lesions of the teeth.

Programs

Professional Program of Study

Certificate

- Certificate in Operative Dentistry [p. 1252]

Courses

Operative Dentistry Courses

OPER:5126 Operative Dentistry Seminar 0-1 s.h.
Review and critical analysis of operative dentistry literature.

OPER:5140 Operative Dentistry Advanced Clinic 0-3 s.h.
Medical and surgical clinical management of dental disease; special emphasis on minimally invasive dentistry using advanced aesthetic principles.

OPER:5234 Selected Applications of Operative Dentistry 0-3 s.h.
Advanced techniques completed on simulated patients.

OPER:5245 Pre-Clinical Teaching 0-3 s.h.
Teaching predoctoral dental students on simulated patients.

OPER:6246 Clinical Teaching 0-2 s.h.
Clinical teaching instruction in operative dentistry clinics.

OPER:8120 Dental Anatomy 3 s.h.
Basic dental terminology and nomenclature, human tooth morphology, creation of tooth crowns with wax.

OPER:8122 Introduction to Operative Dentistry 1 s.h.
Introduction to basic didactic knowledge and psychomotor skills in the practice of operative dentistry in a preclinical setting with simulated scenarios; for first-year dental students.

OPER:8124 Operative Dentistry I 5 s.h.
Basic didactic knowledge and psychomotor skills of principles, terminology, instruments, materials, and techniques utilized in the practice of operative dentistry in a preclinical setting with simulated scenarios; for first-year dental students. Prerequisites: OPER:8120.

OPER:8240 Operative Dentistry II 5 s.h.
Principles of caries and non-carious lesion management, design of cavity preparations, restoration of teeth, patient management, pain control; esthetic dentistry; tooth bleaching, tooth recontouring, esthetic buildups with dental composite; exercises on mannequins in simulation clinic and procedures performed on patients in operative clinic. Prerequisites: OPER:8124.

OPER:8369 Introduction to Operative Dentistry III 2 s.h.
Introduction to a combination of didactic and clinical aspects of operative dentistry; medical and surgical management of dental disease; emphasis on minimally invasive dentistry with advanced aesthetic principles.

OPER:8370 Operative Dentistry III arr.
Combination of didactic and clinical aspects of operative dentistry; medical and surgical management of dental disease; emphasis on minimally invasive dentistry with advanced aesthetic principles.

Operative Dentistry, Professional Certificate

Requirements

Students can earn the professional Certificate in Operative Dentistry in conjunction with an M.S. or Ph.D. in oral science. Completion of the certificate and the M.S. requires 36 months of full-time study. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the certificate.

The M.S. requires additional coursework as well as a thesis and oral and written comprehensive exams. Students have some flexibility in their curriculum to take courses that particularly interest them; see Oral Science [p. 1259] in the Catalog.

The Certificate in Operative Dentistry is a professional clinical advanced educational program that provides dentists with training for teaching, research, and the clinical practice of operative dentistry. The Operative Dentistry Advanced Education Program meets the educational requirements for application to take board certification examinations of the American Board of Operative Dentistry. Operative dentistry is recognized by the American Dental Association as an interest area in general dentistry.

Admission

Applicants to the certificate program must be graduates of an accredited United States or recognized international dental school and must meet the admission requirements of the Graduate College. The department may request an interview with an applicant.

Students must provide their own financial support for the certificate and degree programs, including research and thesis expenses.

For more information, visit the Graduate Program in Operative Dentistry web page.

Oral and Maxillofacial Surgery

Head

- Kirk L. Fridrich

Assistant Head

- Richard G. Burton

Director, Graduate Program

- Steven L. Fletcher

Professional certificate: oral and maxillofacial surgery

Faculty: <https://gme.medicine.uiowa.edu/oral-and-maxillofacial-surgery-residency/our-people/faculty>

Website: <https://gme.medicine.uiowa.edu/oral-and-maxillofacial-surgery-residency>

The Department of Oral and Maxillofacial Surgery combines clinical and didactic training to fit the individual interests, abilities, and development of students. Its training program for predoctoral students is based in the College of Dentistry, with some clinical assignments in the oral and maxillofacial surgery division at University of Iowa Hospitals & Clinics. Its certificate program is based primarily in the Oral and Maxillofacial Surgery Residency program at University of Iowa Hospitals and Clinics.

D.D.S. Student Training

The Doctor of Dental Surgery curriculum in oral and maxillofacial surgery is designed to develop a foundation of professional knowledge and surgical skills that will enable students to diagnose and manage surgical problems related to general dentistry practice. The program emphasizes high ethical standards and development of good surgical concepts and judgment.

The clinical portion of the curriculum allows students to develop surgical skills and apply the theoretical knowledge acquired in didactic courses. Theory and application of anesthesia-analgesia, intravenous sedation, and nitrous oxide analgesia techniques are presented through didactic and clinical experiences.

Programs

Professional Program of Study Certificate

- Certificate in Oral and Maxillofacial Surgery [p. 1254]

Facilities

The University of Iowa health sciences campus has outstanding basic and clinical science departments that stimulate and support scholarly research and superior clinical practice. Appropriate environments for residency training in oral and maxillofacial surgery are provided by University of Iowa Hospitals & Clinics, the College of Dentistry, and the Carver College of Medicine.

Courses

Oral and Maxillofacial Surgery Courses

OMFS:5208 Pain and Anxiety Control 0-3 s.h.

Nitrous oxide; intravenous, oral, intramuscular anxiety and pain control; pharmacology of agents; complications, their management.

OMFS:5220 Research Methodology arr.

Research terminology; application of ethical, quantitative, and qualitative approaches to research; critical analysis of published research; guide and oversee Institutional Review Board (IRB) protocol processes.

OMFS:8115 Anesthesia and Pain Control I 1 s.h.

Principles, techniques of complete medical history, head and neck examination, cardiovascular and respiratory examination; neuroanatomical, psychophysiological aspects of pain; pharmacologic action and techniques for using local anesthetics.

OMFS:8230 Basic Oral and Maxillofacial Surgery 2 s.h.

In-depth review and instruction pertaining to systemic medical considerations which may affect oral and maxillofacial surgery (OMFS), wound repair, principles of asepsis, routine and complicated exodontia, surgical complications and informed consent, preprosthetic surgery, medical emergencies, management of patients undergoing radiation therapy and chemotherapy, infections, OMFS trauma, temporomandibular disorders, and maxillary sinus and salivary gland disorders.

OMFS:8245 Anesthesia and Pain Control II 1 s.h.

Theory, application, and instrumentation of nitrous oxide and IV sedation; emphasis on cardiovascular and respiratory physiology; pre-anesthetic evaluation of patients and practical techniques for nitrous oxide sedation.

OMFS:8355 Advanced Oral and Maxillofacial Surgery 1 s.h.

History, evaluation, diagnosis, and treatment of diseases and traumatic injuries of the oral and maxillofacial region.

OMFS:8360 Clinical Oral and Maxillofacial Surgery arr.

Clinical experience at the College of Dentistry and University of Iowa Hospitals & Clinics.

Oral and Maxillofacial Surgery, Professional Certificate

Requirements

The department offers a four-year residency program that culminates in the professional Certificate in Oral and Maxillofacial Surgery. The program combines clinical and didactic training to prepare dentists for specialty practice. Every effort is made to adapt the program to the individual interests, abilities, and development of students, but it is essential that all students meet certain fundamental requirements.

Recommendations of the American Dental Association, the Committee on Graduate Training of the American Association of Oral and Maxillofacial Surgeons, and the American Board of Oral and Maxillofacial Surgery have been considered carefully in planning the structure and scope of training.

The residency period covers four years of hospital training, providing an orientation to hospital procedures, integration of basic and clinical sciences, acquisition of surgery principles, and familiarization with varied aspects of health services.

Competence in clinical oral and maxillofacial surgery requires knowledge of the basic medical sciences related to the specialty. In addition to hospital and clinical training, residents take advanced coursework in subjects such as applied pharmacology, surgical anatomy, pathology, physiology, and microbiology. They also review closely related disciplines such as radiology, anesthesiology, physical diagnosis, and laboratory procedures. Development and implementation of a research project under staff supervision enhance the value of the residency training.

The assumption of increased responsibility and the opportunity for clinical and operating room experience are important aspects of residency training. Residents gain clinical training in anesthesia through an assigned rotation in the Department of Anesthesia (Carver College of Medicine). Previous advanced training in physical diagnosis, physiology, pharmacology, and pathology take on greater clinical significance, and increased responsibility in the operating room as first assistant and surgeon further develops surgical judgment and skills.

Senior residents may be given responsibility for major oral and maxillofacial surgical cases during rotations at University of Iowa Hospitals & Clinics. Each fourth-year resident is assigned to a rotation as a clinical and didactic coordinator and assumes responsibility to qualify for examination by the American Board of Oral and Maxillofacial Surgery. To learn more about Iowa's program, visit the Oral and Maxillofacial Surgery Residency website.

Admission

Students may begin the four-year certificate program only on July 1. Applicants are selected through a post-D.D.S. dental matching program sponsored by the American Association of Oral and Maxillofacial Surgeons. The application deadline for the match in oral and maxillofacial surgery is September 1 for admission the following July. Appointments are made after the match results are revealed and the staff elects to take official

action. Appointments are offered on or before February 1 for the following July.

Applicants must have graduated from an accredited college of dentistry, should be in the upper one-fourth of their graduating class, and must be eligible to be licensed to practice dentistry in the United States.

Oral Pathology, Radiology, and Medicine

Head

- John W. Hellstein

Professional certificates: oral and maxillofacial pathology; oral and maxillofacial radiology

Faculty: <https://www.dentistry.uiowa.edu/oral-pathology-radiology-medicine-faculty>

Website: <https://www.dentistry.uiowa.edu/oral-pathology-radiology-medicine>

The Department of Oral Pathology, Radiology, and Medicine educates predoctoral students and professional students, who may pursue graduate study along with their professional training. The department has diverse curricular responsibility and a faculty with widely varied disciplinary expertise.

D.D.S. Student Training

The department teaches Doctor of Dental Surgery and other health care students about diseases that manifest in and around the oral and maxillofacial region. Students learn about the clinical, radiographic, laboratory, histopathologic, and therapeutic management of these diseases and about their etiology and natural history. They also study identification of systemic diseases and the oral implications through physical evaluation of patients.

Programs

Professional Programs of Study

Certificates

- Certificate in Oral and Maxillofacial Pathology [p. 1257]
- Certificate in Oral and Maxillofacial Radiology [p. 1258]

Facilities

Facilities reserved for the Department of Oral Pathology, Radiology, and Medicine include a radiology special procedures area, an interpretation room, a surgical oral pathology laboratory, a clinical pathology laboratory with areas for histopathology, and a seminar room for small groups of graduate and undergraduate students.

In addition, the College of Dentistry has joint-use research laboratories that are well equipped and staffed for conducting research involving histology, histochemistry, materials technology, radiobiology, ultrastructure, and electron probe analysis and quantification.

Courses

Oral Pathology, Radiology, and Medicine Courses

OPRM:5200 Stomatology Literature Review 0-3 s.h.
Current literature in oral and maxillofacial pathology and radiology; presentation of graduate student research; development of lectures or seminars for D.D.S. or graduate students, or continuing education for peers and practicing dentists.

OPRM:5225 Manifestations of Oral and Paraoral Disease 0-3 s.h.
Clinical experience in diagnosing, managing patients.

OPRM:5226 Oral Pathology for Graduate Students 0-1 s.h.
Head and neck diseases, abnormalities.

OPRM:5227 Surgical Oral Pathology 0-1 s.h.
Experience in day-to-day operations of surgical oral pathology laboratory; advanced training in histopathologic diagnosis of oral and maxillofacial diseases. Corequisites: OPRM:5240, if not taken as a prerequisite.

OPRM:5228 Introduction to Surgical Oral Pathology 0-1 s.h.
Day-to-day operations of surgical oral pathology laboratory; histopathologic diagnosis of oral and maxillofacial diseases.

OPRM:5230 Research in Oral Pathology, Radiology, and Medicine 0-3 s.h.
Includes thesis preparation.

OPRM:5238 Introduction to Histopathology 0-1 s.h.
Case studies; histopathologic diagnosis of diseases that affect oral and maxillofacial region.

OPRM:5240 Histopathology 0-1 s.h.
Case studies; advanced training in histopathologic diagnosis of diseases that affect oral and maxillofacial region. Corequisites: ORDN:5202, if not taken as a prerequisite.

OPRM:5241 Hospital Oral Pathology, Radiology, and Medicine 0-3 s.h.
Management of patient consultations, diagnosis, therapy at a hospital-based dental service.

OPRM:5242 Clinical Oral and Maxillofacial Radiology 0-3 s.h.
Radiologic manifestations of diseases; emphasis on craniofacial complex.

OPRM:5243 Practical Oral and Maxillofacial Radiology 0-3 s.h.
Clinic participation; supervision of dental and dental hygiene students, review of their cases; participation in clinical radiology conferences, laboratory exercises.

OPRM:5244 Technical Oral and Maxillofacial Radiology 0-3 s.h.
Experience with technical maintenance of darkroom, clinical equipment; troubleshooting under supervision of radiology staff.

OPRM:5245 Head and Neck Radiology 0-3 s.h.
Hospital-based rotation in diagnostic radiology with participation in interpretation sessions; CT, MRI, nuclear medicine, ultrasound.

OPRM:5246 Craniofacial Radiology 0-3 s.h.
Hospital-based rotation in diagnostic radiology; exposure to interpretive sessions on ultrasound, CT, MRI, nuclear medicine.

OPRM:5256 Advanced Oral Pathology 0-1 s.h.
Diseases involving orofacial organs; emphasis on bibliographic research, biodynamic analysis of pathologic processes, diagnostic interpretation; content adapted to student interests. Requirements: graduate standing in oral pathology.

OPRM:8120 Fundamentals of Oral Radiology 1 s.h.
Methods of clinical, radiographic examination, record keeping; correlation of basic, clinical sciences.

OPRM:8235 Oral Pathology I 2 s.h.

Application of biomedical science knowledge to diagnosis and management of oral and maxillofacial diseases, primarily surface epithelial diseases; classification of lesions and diseases of the oral and maxillofacial region into clinical categories, formulation of a clinical differential diagnosis, and recommendation of initial management based on clinical differential diagnosis.

OPRM:8236 Oral Pathology II 2 s.h.

Application of biomedical science knowledge to diagnosis and management of oral and maxillofacial diseases, primarily hard and soft tissue diseases/neoplasms and syndromes; identification of cause, pathogenesis, historical features, signs, symptoms, laboratory abnormalities, radiographic findings (where applicable), and recommended initial management of the most common and/or serious diseases and lesions of the oral and maxillofacial region.

OPRM:8240 Basic Pharmacology 3 s.h.

Principles of pharmacology, pharmacologic actions of drugs, and correlation with therapeutic uses.

OPRM:8245 Introduction to Clinical Oral Radiology 1 s.h.

Principles, techniques of diagnosis, radiology, clinical pathology in clinical practice.

OPRM:8355 Systemic Disease Manifestations 1 s.h.

Clinical medicine for dental students; basic information for patient evaluation.

OPRM:8360 Clinical Oral Diagnosis 1 s.h.

Diagnosis of orofacial diseases by clinical, laboratory, radiographic and treatment planning methods; clinical case analysis.

OPRM:8361 Clinical Oral Radiology arr.

Making and processing intraoral, extraoral radiographs; principles of radiographic interpretation.

OPRM:8365 Clinical Oral Pathology 1 s.h.

Oral and maxillofacial diseases: integration of the clinical, historical, radiographic features; therapeutic management.

OPRM:8368 Applied Dental Pharmacology 2 s.h.

Patients' medications and their implications for dental treatment; clinical use of medications that dentists may prescribe; guidelines for dental prescribing.

Oral and Maxillofacial Pathology, Professional Certificate

Requirements

The department offers the professional Certificate in Oral and Maxillofacial Pathology. The educational requirements of the certificate program meet the requirements for preparation of dental specialists set by the Commission on Dental Accreditation, the American Board of Oral and Maxillofacial Pathology. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the certificate.

Oral science involves the study of structure, function, and diseases of the oral and maxillofacial region. Study methods include examination of related histories, evaluation of clinical signs and symptoms, and use of biochemical, microscopic, and radiologic procedures to establish a diagnosis and plan for therapeutic management.

The department's programs are diverse and flexible, allowing students to obtain advanced clinical, didactic, and research-related education while earning a professional certificate. Students working toward the certificate may pursue a Master of Science in oral science in conjunction with the certificate; see "Graduate Study" below.

Graduate Study

Students earning the department's certificate may pursue a Master of Science in oral science while they work toward the certificate. They pursue the M.S. track that corresponds with the certificate. Each program combines the minimum requirements of the M.S. and the certificate; completion time usually is 36 to 48 months.

All students in the combined programs pursue comprehensive study of basic biologic and health sciences in preparation for teaching and research. They must complete the courses listed below, including the core courses and the basic science and departmental courses listed for their M.S. track. They also must prepare, submit, and defend their thesis based on the results of research conducted during their course of study. See the M.S. in oral science [p. 1260] in the Catalog for additional information about requirements and admission.

Core Courses

Code	Title	Hours
OPRM:5200	Stomatology Literature Review	0-1
OPRM:5226	Oral Pathology for Graduate Students	0-1
OPRM:5242	Clinical Oral and Maxillofacial Radiology	0-1
ORSC:5200	Seminars in Dental Research	1
ORSC:5210	Dental Sciences Research Methodology	2
ORSC:5212	Statistical Methods for Dental Research	3
ORSC:5215	Research Design in Dentistry	2
ORSC:5600	Research in Oral Science (taken for a total of 9 s.h.)	9

OTO:8199	Basic Otolaryngologic Science	2
----------	-------------------------------	---

Track Courses

Code	Title	Hours
OPRM:5225	Manifestations of Oral and Paraoral Disease	0-1
OPRM:5227	Surgical Oral Pathology	1
OPRM:5240	Histopathology	1
OPRM:5256	Advanced Oral Pathology	0-1
DPH:6017	Teaching Methods and Evaluation	2
MED:8133	Mechanisms of Health and Disease II	7
MED:8134	Mechanisms of Health and Disease III	11
MED:8223	Mechanisms of Health and Disease IV	10
ORSC:5280	Advanced Dental Therapeutics	1

Admission

Applicants must have successfully completed an accredited program leading to the D.D.S. or D.M.D., or an international equivalent, and must meet the admission requirements of the Graduate College. They must have a cumulative g.p.a. of at least 3.00 (or international equivalent) to be considered for admission.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

The department's faculty makes final decisions on acceptance of applicants who meet the requirements for admission. A personal interview is required.

Oral and Maxillofacial Radiology, Professional Certificate

Requirements

The department offers the professional Certificate in Oral and Maxillofacial Radiology. The educational requirements of the certificate program meet the requirements for preparation of dental specialists in oral and maxillofacial radiology set by the Commission on Dental Accreditation and the American Board of Oral and Maxillofacial Radiology. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the certificate.

Oral radiology involves the study of structure, function, and diseases of the oral and maxillofacial region. Study methods include examination of related histories, evaluation of clinical signs and symptoms, and use of radiologic procedures for interpretation and to establish a diagnosis and plan for therapeutic management.

The department's programs are diverse and flexible, allowing students to obtain advanced clinical, didactic, and research-related education while earning a professional certificate. Students working toward the certificate may pursue a Master of Science in oral science in conjunction with the certificate; see "Graduate Study" below.

Graduate Study

Oral Science

Director

- Jeffrey A. Banas (Pediatric Dentistry)

Graduate degrees: M.S. in oral science; Ph.D. in oral science

Website: <https://www.dentistry.uiowa.edu/dental-research-oral-science-program>

Graduate programs in oral science require that students complete courses from a core curriculum and conduct independent research leading to a thesis. The programs prepare graduates for a variety of career options.

Students must enroll in a professional certificate program offered by a College of Dentistry department in order to enroll in the Master of Science program in oral science. The following departments offer their certificate students the opportunity to earn M.S. degrees in oral science: endodontics, prosthodontics, operative dentistry, periodontics, and oral pathology, radiology, and medicine.

Programs

Graduate Programs of Study

Majors

- Master of Science in Oral Science [p. 1260]
- Doctor of Philosophy in Oral Science [p. 1261]

Courses

Oral Science Courses

ORSC:5200 Seminars in Dental Research 0-1 s.h.

ORSC:5210 Dental Sciences Research Methodology 0,2 s.h.

Practical, experimental procedures in dental research; literature and design; writing of research protocols. Offered summer session.

ORSC:5212 Statistical Methods for Dental Research 0,3 s.h.

Descriptive methods, elementary probability, distributions, populations and samples, methods for analyzing percentage data and paired and unpaired measurement data, regression, correlation, and analysis of variance.

ORSC:5215 Research Design in Dentistry 0,2 s.h.

Types of studies used in dentistry; design validity; sampling methodologies; major descriptive and experimental designs used in dental research; application of statistical tests to these designs. Offered spring semesters.

ORSC:5240 Pathophysiology of the Pulp-Dentin Complex 0-3 s.h.

Biology of tissue; emphasis on pathological changes. Offered spring semesters of even years. Prerequisites: ORSC:5210.

ORSC:5250 Current Concepts of Cariology 0,2 s.h.

Etiology of dental caries; pathogenesis, development of preventive measures. Offered spring semesters of odd years. Prerequisites: ORSC:5210.

ORSC:5260 Bone and Tooth Support Structure and Implants 0,2 s.h.

Biology of bone and periodontal structures; biologic basis for therapeutic use of dental implants. Offered fall semesters of odd years.

ORSC:5275 Oral Microbiology and Immunology 0,2 s.h.

Principles of microbiology and immunology, aspects of microbial community development in the oral cavity, basic concepts of host/parasite interactions related to development of oral diseases; biological, immunological, and clinical manifestations induced by major oral pathogens. Offered spring semesters of odd years. Requirements: microbiology, biochemistry, and biology. Recommendations: immunology.

ORSC:5280 Advanced Dental Therapeutics 0-1 s.h.

Antimicrobial, analgesic, related therapies; emphasis on drug/drug interactions, dental implications of chronic cardiovascular and central nervous system medications. Offered fall semesters.

ORSC:5600 Research in Oral Science arr.

Thesis research. Requirements: oral science M.S. or Ph.D. candidacy.

ORSC:5610 Independent Study 0-3 s.h.

Opportunity to pursue in-depth study in a particular area of interest; students meet with faculty member to design plan of study.

ORSC:5620 Oral Sciences Colloquium arr.

Presentations, seminars, and discussion sessions on research presentations; career and individual development plans for graduate and postdoctoral students in the oral sciences program.

Oral Science, M.S.

Requirements

The Master of Science program in oral science requires a minimum of 30 s.h. of graduate credit, including 21 s.h. of coursework, 9 s.h. of independent research leading to a thesis, and a final examination. M.S. students must spend at least two years in full-time residence at the University of Iowa.

Students pursuing the M.S. must be enrolled in a clinical specialty training program offered by a College of Dentistry department. Students should complete the M.S. and the clinical specialty training program in three years of study.

Admission

Applicants to the M.S. program must meet the admission requirements of the Graduate College and those specified by the clinical department, including Test of English as a Foreign Language (TOEFL) scores for applicants whose first language is not English.

A personal interview may be requested.

Programs normally begin July 1 each year.

Oral Science, Ph.D.

Requirements

The Doctor of Philosophy program in oral science requires a minimum of 72 s.h. of graduate credit, including advanced coursework and original research that culminates in the successful defense of a dissertation. Students must pass a comprehensive examination, prepare and gain approval of a research project, and complete and successfully defend a dissertation that describes the results of their research. Completion of the program usually requires four to six years of full-time study. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the degree.

Admission

Applicants to the Ph.D. program must meet the admission requirements of the Graduate College and those specified by the program. Applicants whose first language is not English must score at least 100 (internet-based) on the Test of English as a Foreign Language (TOEFL) or at least 550 on the paper-based test.

Applicants to the Ph.D. program must submit a statement describing past research experience and current research interests, and state how completion of the Ph.D. program fits their career goals.

Applications and transcripts are reviewed and accepted on a continuing basis. A personal interview may be requested.

Programs normally begin July 1 each year.

Orthodontics

Head

- Thomas E. Southard

Professional certificate: orthodontics

Graduate degree: M.S. in orthodontics

Faculty: <https://www.dentistry.uiowa.edu/orthodontics-faculty>

Website: <https://www.dentistry.uiowa.edu/orthodontics>

The Department of Orthodontics educates predoctoral, professional, and resident/graduate students for careers as practicing dentists, orthodontists, researchers, and teachers. The department also conducts major research programs and receives significant funding from the National Institutes of Health (NIH). It delivers state-of-the-art treatment to patients—adults, children, and adolescents with a range of orthodontic, craniofacial, and related issues.

The goal of the resident/graduate program in orthodontics is to educate competent individuals to initially practice orthodontics and dentofacial orthopedics. Additional goals include providing clinical services for citizens of Iowa and educating students in methods of scientific inquiry. The programs' objectives are to provide students with an in-depth education in biological and biomechanical principles related to orthodontics; to teach students to diagnose, plan, and deliver comprehensive orthodontic health care service; and to develop students' research and service skills.

Opportunities are available for research and independent study in the department, and there are special facilities for research in biomechanics and craniofacial growth. Interaction with other departments provides learning and research opportunities in surgical orthodontics, cleft lip and palate treatment, speech pathology, animal experimentation, and human growth.

D.D.S. Student Training

The Department of Orthodontics prepares Doctor of Dental Surgery students to competently recognize malocclusions of teeth in preparation for decision making regarding treatment or referral. The lecture course guides D.D.S. students in learning concepts of dental development and facial growth to maturity, as well as treatment-oriented subject matter ranging from limited, interceptive treatment through possible comprehensive treatment options. In a laboratory course, case-based material is utilized to give students experience with evaluating diagnostic casts, radiographs, and clinical findings for space management decision-making purposes. Experience also is included in the basics of fabricating a limited range of orthodontic appliances.

Courses

Orthodontics Courses

ORDN:5200 Control Theory and Craniofacial Morphogenetic Systems	0-1 s.h.
ORDN:5201 Orthodontic Theory: Diagnosis and Treatment Plan	0,2 s.h.
Diagnosis, treatment planning implementation.	
ORDN:5202 Diagnosis and Treatment Planning	0,2 s.h.
Literature concerning orthodontic diagnosis; treatment of particular problems; case histories of patients treated in graduate clinic.	
ORDN:5203 Advanced Orthodontic Technique	0-3 s.h.
Skills for treatment of disfiguring malocclusions; use of edgewise biomechanical therapy; laboratory focus on typodont exercises.	
ORDN:5204 Biomechanics	0-3 s.h.
ORDN:5205 Facial Growth	0-2 s.h.
Theories, processes; use of accepted facial growth concepts in treatment of individuals with malocclusions during active growth period.	
ORDN:5209 Orthodontic Practicum	0-3 s.h.
Clinical practice.	
ORDN:5210 Orthodontic Seminar	0-3 s.h.
Evaluation, discussion, criticism, defense of diagnostic and treatment approaches to orthodontic cases that need, are undergoing, or have completed orthodontic treatment.	
ORDN:5217 Cephalometrics	0-3 s.h.
Use of skull X-ray (lateral and/or postero-anterior) in formulating orthodontic diagnosis, treatment plans for malocclusions; cephalometrics as a tool for craniofacial structure research.	
ORDN:5220 Craniofacial Anatomy	0-3 s.h.
Literature on anatomy, phylogeny, ontogenesis, physiology of craniofacial structures.	
ORDN:5221 Surgical Orthodontic Seminar	0-1 s.h.
Evaluation, discussion, criticism, defense of diagnostic and treatment approaches to orthodontic cases that need, are undergoing, or have completed surgical-orthodontic treatment.	
ORDN:5400 Dental Treatment of Maxillofacial Deformities	0,2 s.h.
ORDN:5700 Orthodontics Clinic	0-1 s.h.
Clinical experience in orthodontics clinic.	
ORDN:6211 Problems: Orthodontics	0-3 s.h.
ORDN:6212 Research: Orthodontics	0-3 s.h.
ORDN:6215 Orthodontic Journal Club	0-3 s.h.
Current biological, technical publications.	
ORDN:6216 Practice Management	0-3 s.h.
Business management of orthodontic practice; solo practice, associateship, partnership, practice corporation.	
ORDN:8215 Growth and Development	1 s.h.
Normal human growth and development; emphasis on craniofacial region.	
ORDN:8235 Orthodontic Laboratory	1 s.h.
Limited care case diagnosis and treatment.	

ORDN:8236 Orthodontic Treatment 1 s.h.

From patient management to use of appliances for correcting some malocclusions in the general practitioner's office.

Orthodontics, Professional Certificate

Requirements

The professional Certificate in Orthodontics requires satisfactory completion of 24 months of intensive study, including lecture courses, seminars, clinical practicum, and a research paper. Students earn the certificate while they complete work for the M.S. in orthodontics. They must maintain a cumulative g.p.a. of at least 3.00 to earn the certificate.

Admission

Applicants must have a D.D.S. degree or equivalent and meet the admission requirements of the Graduate College. They should submit a letter from their respective dental school dean stating their class rank or that no class ranks are provided, and also supply three recommendation letters from dental school faculty.

Application deadline is August 1 for entry the following July 1. Applicants are required to travel to the University of Iowa for interviews with department faculty.

Orthodontics, M.S.

Requirements

The Master of Science program in orthodontics requires 59 s.h. of graduate credit. Students must satisfactorily complete a thesis based on an original research project to qualify for the M.S. degree. They must maintain a cumulative g.p.a. of at least 3.00 to earn the degree.

Students begin work on the two-year program in July.

The M.S. with a major in orthodontics requires the following work.

Summer, First Year

Code	Title	Hours
All of these:		
ORDN:5203	Advanced Orthodontic Technique	1
ORDN:5209	Orthodontic Practicum	2
ORDN:5217	Cephalometrics	3

Fall, First Year

Code	Title	Hours
All of these:		
ORDN:5201	Orthodontic Theory: Diagnosis and Treatment Plan	2
ORDN:5203	Advanced Orthodontic Technique	1
ORDN:5205	Facial Growth	2
ORDN:5209	Orthodontic Practicum	2
ORDN:5210	Orthodontic Seminar	2
ORDN:5221	Surgical Orthodontic Seminar	1
ORSC:5212	Statistical Methods for Dental Research	3

Spring, First Year

ORDN:6212	Research: Orthodontics	2
ORDN:6215	Orthodontic Journal Club	1

For more information, contact the Department of Orthodontics.

Admission

Applicants must have a D.D.S. degree or equivalent and meet the admission requirements of the Graduate College. Application deadline is August 1 for entry the following July 1. Applicants are required to travel to the University of Iowa for interviews with department faculty.

Pediatric Dentistry

Head

- Karin Weber-Gasparoni

Professional certificate: pediatric dentistry

Faculty: <https://www.dentistry.uiowa.edu/pediatric-faculty>

Website: <https://www.dentistry.uiowa.edu/pediatric>

The Department of Pediatric Dentistry instructs predoctoral and professional students in the prevention and treatment of dental diseases in children as well as individuals with special health care needs. Instruction combines didactic, laboratory, and clinical experiences and gives special consideration to reviewing current literature and managing dental problems of children and individuals with special health care needs. It also emphasizes efficient treatment through proper use of dental auxiliary personnel and record management.

D.D.S. Student Training

All second-year Doctor of Dental Surgery students participate in a one-semester lecture course that includes preclinical exercises in the Simulation Clinic. Third-year D.D.S. students participate in a clerkship, which includes a combined seminar and clinical course. During their fourth year, D.D.S. students participate in a rotation through the department's clinics.

Research Opportunities

Clinical and laboratory research projects have financial support from federal agencies and other sources. Major research areas include cariology, dental materials, dentistry for persons with special health care needs, growth and development, fluoride therapy, child behavior management, nutrition, prevention, and access to care.

Faculty

Faculty members hold numerous professional offices at national and state levels, committee memberships, consultantships, and honors in professional organizations. They serve as reviewers for professional journals and federal granting agencies. They also participate regularly in continuing education programs for dentists and other health science personnel. Fifteen of the department's faculty members are diplomates of the American Board of Pediatric Dentistry.

Programs

Professional Program of Study

Certificate

- Certificate in Pediatric Dentistry [p. 1267]

Courses

Pediatric Dentistry Courses

PEDO:5220 Social, Cultural, and Public Health Issues in Pediatric Dentistry 0-1 s.h.

PEDO:5700 Advanced Didactic Pediatric Dentistry 0-1 s.h.

Lectures in advanced pediatric dentistry.

PEDO:5704 Pediatric Dentistry Grand Rounds 0-1 s.h.
Pediatric dentistry rounds.

PEDO:5706 Journal Review Practicum 0-1 s.h.
Review of journal material in pediatric dentistry.

PEDO:5724 Oral Health Care for People with Special Health Care Needs 0-1 s.h.
Providing oral health care for individuals with disabilities.

PEDO:5730 Advanced Clinical Pediatric Dentistry 0-2 s.h.
Advanced study in clinical pediatric dentistry.

PEDO:5732 Pediatric Physical Diagnosis 0-1 s.h.
Pediatric physical diagnosis for dental practice.

PEDO:5738 Clinical Application of Pediatric Conscious Sedation 0-1 s.h.

PEDO:6710 Practical Teaching in Pediatric Dentistry 0-1 s.h.

PEDO:8240 Pediatric Dentistry Diagnosis and Treatment 3 s.h.
Growth and development, behavior management, diagnostic-preventive-restorative techniques for pediatric patients.

PEDO:8370 Pediatric Dentistry: Clinical Applications
Combination of didactic and clinical aspects of pediatric dentistry; radiographic interpretations, treatment planning, preventative and restorative treatment supported by didactic seminars; clinical examinations and treatments provided to infants and children less than 16 years of age.

Pediatric Dentistry, Professional Certificate

Requirements

The professional Certificate in Pediatric Dentistry is a two-year residency program that prepares students for certification by the American Board of Pediatric Dentistry. Certificate students are trained in all phases of pediatric dentistry and have career choices in private practice, public health, education, or research. Special emphasis is placed on development of leadership skills and strategies for serving vulnerable populations.

The department's certificate program is accredited by the Commission on Dental Accreditation of the American Dental Association.

Approximately 60 percent of the certificate program is devoted to advanced clinical activity, 30 percent to didactic courses and practice teaching, and 10 percent to original research. The program includes a core of didactic, clinical, and research-oriented courses supplemented by electives determined by students' individual interests.

Close associations with the UI Stead Family Children's Hospital, Stead Family Department of Pediatrics [p. 1801] in the Roy J. and Lucille A. Carver College of Medicine, the Center for Disabilities and Development, and University of Iowa Hospitals & Clinics permit emphasis on oral rehabilitation under general anesthesia, treatment of children with conscious sedation, instruction in physical diagnosis, and management of children with developmental disabilities.

Admission

Prospective students apply through the American Dental Education Association PASS program. Openings in the program are filled through the Postdoctoral Dental Matching Program. Applicants must meet the admission requirements of the Graduate College.

Financial Support

Stipends for the two-year program are provided by federal agencies and other sources.

Periodontics

Head

- Gustavo Avila-Ortiz

Professional certificate: periodontics

Faculty: <https://www.dentistry.uiowa.edu/periodontics-faculty>

Website: <https://www.dentistry.uiowa.edu/periodontics>

The Department of Periodontics educates predoctoral students as well as professional students who may elect to pursue graduate study along with their professional training. The department also provides interdisciplinary care for patients with complex treatment needs; generates new knowledge through its research programs; and provides professional service and leadership at all levels, local to worldwide.

D.D.S. Student Training

The periodontal program instructs Doctor of Dental Surgery students in the diagnosis and management of periodontal and peri-implant diseases and conditions. It combines didactic, laboratory, and clinical experiences and applies the biological concepts of periodontology to the comprehensive clinical management of patients.

Programs

Professional Program of Study

Certificate

- Certificate in Periodontics [p. 1269]

Facilities

The department has 22 modern, well-equipped operatories devoted exclusively to periodontics.

Research facilities include laboratories in histology, microscopy, biomaterials, quantitation, tissue culture, molecular biology and biochemistry, and microbiology. Other facilities are available by arrangement with University of Iowa Hospitals & Clinics, Eckstein Medical Research Building, and Medical Laboratories.

Courses

Periodontics Courses

PERI:5220 Periodontics Classic Literature Review arr.

Foundation of core concepts pertaining to the field of periodontology; includes review and critical analysis of landmark studies that have shaped the development of contemporary concepts in diagnosis and management of periodontal conditions and diseases and implant dentistry in a multidisciplinary context.

PERI:5700 Advanced Periodontology 0-1 s.h.

PERI:5710 Case Management Seminar 0-2 s.h.
Case management seminar in periodontics.

PERI:5720 Current Topics 0-1 s.h.
Current topics in periodontics.

PERI:5740 Periodontal Implant Provisionalization 0-1 s.h.

PERI:5750 Advanced Clinical Periodontics 0,2 s.h.

PERI:7208 Recent Advances in Periodontics 0-3 s.h.
Review of current literature.

PERI:7700 Practice Management 0-1 s.h.
Practice management in periodontics.

PERI:7701 Practice Teaching in Periodontics 0-2 s.h.

PERI:8120 Fundamentals in Periodontology I 2 s.h.
Normal periodontium, periodontal diseases, diagnosis etiology, epidemiology of periodontal diseases.

PERI:8230 Fundamentals in Periodontology II 1 s.h.
Periodontal treatment planning, prognosis, initial phase of periodontal therapy, treatment of acute periodontal problems, overview of surgical procedures.

PERI:8370 Clinical Periodontology 4 s.h.
Comprehensive concepts of periodontology and clinical management of patients.

Periodontics, Professional Certificate

Requirements

The professional Certificate in Periodontics requires 36 months of full-time study, including satisfactory completion of required didactic and clinical courses, satisfactory completion of comprehensive written and oral examinations, and an acceptable literature review or research paper. Opportunities are provided for experience in clinical and basic research.

Students working toward the Certificate in Periodontics may pursue the Master of Science in oral science in conjunction with the certificate; see "Graduate Study" below.

The certificate program provides a sound foundation for the clinical practice of periodontics. It meets all requirements of the American Dental Association's Commission on Dental Accreditation for advanced dental education programs in periodontics. It also meets the educational requirements for application to take board certification examinations of the American Board of Periodontology.

Certificate students must be financially prepared for uninterrupted pursuit of their program of study.

Graduate Study

Students earning the Certificate in Periodontics may pursue a Master of Science in oral science concurrently while working toward certificate completion. The M.S. program requires 36 months of full-time study, including satisfactory completion of required and elective courses, preparation and defense of an acceptable thesis based on original research, and satisfactory completion of comprehensive written and oral examinations. See Oral Science [p. 1259] in the Catalog.

Admission

Applicants to the periodontics certificate program must have a D.D.S. degree or the equivalent and meet the admission requirements of the Graduate College. Visit the College of Dentistry page on the Graduate Office of Admissions website to learn more about applying to the certificate program.

Preventive and Community Dentistry

Head

- Daniel J. Caplan

Director, Graduate Program

- John J. Warren

Graduate degree: M.S. in dental public health

Faculty: <https://www.dentistry.uiowa.edu/preventive-faculty>

Website: <https://www.dentistry.uiowa.edu/preventive>

The Department of Preventive and Community Dentistry educates future and practicing dental and oral health professionals, preparing them to understand and recognize:

- conditions that compromise patients;
- social, cultural, community, and political influences on dental practice;
- principles of preventive dentistry for individuals, groups, and communities; and
- considerations for preventing and treating oral disease in geriatric and special needs patients.

In addition to offering educational programs, the department provides patient care at the College of Dentistry and in a variety of off-campus settings. It also is home to research that advances dental public health. The department offers a Master of Science degree and the Certificate in Geriatric and Special Needs Dentistry [p. 1249].

D.D.S. Student Training

Predoctoral training in preventive, community, and geriatric dentistry is designed to increase Doctor of Dental Surgery students' awareness of preventive dental practices, aspects of dental practices affected by community factors, and care of compromised adult patients.

Community dentistry programs give students opportunities to interact with health care teams and the public in Iowa and around the world. The department conducts off-site community programs statewide, nationwide, and worldwide. It also operates the Geriatric and Special Needs Clinic, which is housed in the Dental Science Building.

Using the community dentistry programs as the classroom, D.D.S. students observe and participate in a variety of activities that nurture their awareness of the societal obligations they must assume in order to become effective practitioners.

Programs

Graduate Program of Study

Major

- Master of Science in Dental Public Health [p. 1272]

Courses

- Preventive and Community Dentistry Courses [p. 1270]
- Dental Public Health Courses [p. 1271]

Preventive and Community Dentistry Courses

PCD:8115 Clinical Practice and Professionalism I 1 s.h.

Preparation to deliver team-based interprofessional care through authentic lectures and group activities that reinforce interprofessional education (IPE) concepts by providing relevant and applicable health care experience; concepts and skills related to interprofessional education, team-based health care, interprofessional networking, ethics and professionalism, and person-centered care.

PCD:8116 Fundamentals of Clinical Dentistry 1 s.h.

Identification of health and disease in the mouth through self-assessment, nutritional self-assessment, practical methods of disease control, primary preventive dentistry methods and materials, and philosophy of preventive dentistry.

PCD:8117 Cariology and Preventive Therapies 2 s.h.

Principles of research design; introduction to microbiology and immunology; principles of oral microbiology with an emphasis on plaque development; microbiology of caries; coronal and root caries disease processes; dental caries epidemiology; roles of saliva and diet in dental health and disease; radiographic interpretation and clinical diagnosis; dental fluorosis; preventive dentistry treatment planning. Prerequisites: PCD:8116.

PCD:8118 Preventive Dentistry Assessment and Patient Care 4 s.h.

Patient oral assessment; charting sulcus depth, recession and hard tissues; progress notes, and entries in electronic patient record; preventive dentistry, caries, and periodontal risk assessment; oral hygiene instruction for collegiate recall patients; instrumentation for detection and removal of calculus deposits; practice with patient management skills and ergonomics. Prerequisites: PCD:8116 and PCD:8117.

PCD:8119 Clinical Practice and Professionalism II 1 s.h.

Introduction to patient-centered care, interpersonal and professional communication with patient, information exchange, and preventive treatment plan formulation in patient encounters.

PCD:8120 Introduction to Evidence-Based Dentistry I 1 s.h.

Fundamental concepts needed to critique clinical research articles and health-related websites.

PCD:8121 Introduction to Evidence-Based Dentistry II 1 s.h.

Application of concepts needed to critique scientific literature.

PCD:8218 Critical Thinking and Evidence-Based Dentistry in Treatment Planning 1 s.h.

Continuation of PCD:8120; evidence-based dentistry, critical thinking and treatment planning sessions; online and small group sessions. Prerequisites: PCD:8120.

PCD:8219 Clinical Practice and Professionalism III 1 s.h.

Continuation of PCD:8119; assessing patient understanding of practices for improving/maintaining oral health; overview of patient challenges to effective communication; application of behavioral science principles in dentistry and behavior theories. Prerequisites: PCD:8119.

PCD:8245 Clinical Preventive Dentistry 0,2 s.h.

Experience providing complete prophylaxis and preventive services for college patients; application of nutrition principles and communication skills in a clinic setting. Prerequisites: PCD:8118.

PCD:8319 Clinical Practice and Professionalism IV 1 s.h.
Continuation of PCD:8219; standardized patient exercises with chairside feedback and evaluation of communication skills; reflection regarding application of communication skills and behavioral science principles in patient encounters.

PCD:8355 Introduction to Geriatric Dentistry 2 s.h.
Biological, psychological, and social aspects of aging; normal aging and disease processes associated with aging; pathological changes that affect oral health treatment of dental diseases and patient management. Requirements: D.D.S. enrollment or completion of dental hygiene program. Same as ASP:8355.

PCD:8360 The Practice of Dentistry in the Community I 1-2 s.h.
Issues related to the role of the dental professional at a local and state level, including dental public health, health literacy, cultural competency, and forensic dentistry; the role of the state dental director.

PCD:8361 The Practice of Dentistry in the Community II 1-2 s.h.
Factors that affect the practice of dentistry and the dental profession including health care systems in the U.S. and abroad, Medicaid/Medicare, health/dental insurance, health care delivery systems, malpractice, role of the Iowa Dental Board, dental workforce, and quality of care.

PCD:8485 Broadlawns Medical Center arr.
Dental care to low-income patients in a metropolitan hospital-based clinic; community-related assignments; student team experience in Des Moines.

PCD:8488 St. Lukes Dental Health Center arr.
Experience providing clinical and outreach services for low-income children and adults with developmental disabilities at St. Luke's Hospital, Cedar Rapids; operative and behavioral dental problems, hospital protocol, special needs of low-socioeconomic clients.

PCD:8489 Geriatrics and Special Needs Program arr.
Experience in the Delta Dental of Iowa Geriatric and Special Needs Clinic and the Geriatric Mobile Dental Unit providing comprehensive care for medically, physically, intellectually, and/or cognitively compromised adults, functionally dependent elderly nursing home residents with portable dental equipment, and other underserved populations.

PCD:8494 Oral Health Field Clinic 5 s.h.
Extramural experiences developed according to student needs, extramural opportunities.

PCD:8498 International Outreach Program 0 s.h.
Participation in a two-week mission outreach program in Cambodia or Guatemala; requires successful completion of application process; for entering fourth-year dental students.

PCD:8499 International Exchange Program 10 s.h.
International extramural program; students learn about dentistry in an international dental program.

PCD:8500 Dental Student Research Honors Program arr.
Experience in conducting research. Requirements: D.D.S. enrollment and approval of mentor and program director.

Dental Public Health Courses

DPH:5000 Introduction to Dental Public Health 0,2 s.h.
Science, philosophy, practice of dental public health.

DPH:5001 Literature Review Methods: Dental Public Health 0,2 s.h.
Concepts and process of literature review, particularly in area of student's interest.

DPH:5005 Administration of Public Dental Programs 0,2 s.h.
Application of general management concepts; practical aspects of planning, financing, staffing, implementing, operating, evaluating dental public health programs at federal, state, local levels.

DPH:5006 Preventive Programs in Dental Public Health 0,2 s.h.
Prevention and control methods for major dental conditions, primarily dental caries and periodontal diseases; clinical efficacy and cost-effectiveness; development of comprehensive preventive oral health plan for a community.

DPH:5008 Field Experience in Dental Public Health arr.
Arranged with public and voluntary health agencies according to students' and agencies' needs.

DPH:5009 Advanced Field Experience in Dental Public Health 1-3 s.h.
Opportunity to research, develop, and implement programmatic objectives with local, state, national, and/or federal agencies and organizations on an issue that is both relevant to the student and the agency; may require off-site visits to agencies or organizations. Prerequisites: DPH:5008.

DPH:5014 Dental Care Policy and Financing 0,2 s.h.
Dental financing and policy issues: payment mechanisms for health care service providers, third-party prepayment plans, salaried and public-financed programs, Medicaid and Medicare programs, dental insurance systems, and care of the underserved.

DPH:5016 Introduction to Statistical Computing arr.
Use of statistical packages on a personal computer for data management and analysis. Offered summer session.

DPH:5031 Geriatric Care 0,2 s.h.
Aging demographics; effects of aging on the human body with emphasis on the masticatory system; diseases commonly found among the elderly; and dental care for the elderly in different settings.

DPH:6002 Research Protocol Seminar 0,2 s.h.
Development of a master's thesis protocol; identification of thesis topic, review of relevant literature, development of research methods, writing.

DPH:6003 Independent Study: Dental Public Health 1-3 s.h.

DPH:6004 Principles of Oral Epidemiology 0-3 s.h.
Interpretation of scientific literature, with respect to the distribution and determinants of oral diseases and conditions, including caries, periodontal diseases, tooth loss, oral cancer, and more.

DPH:6011 Thesis: Dental Public Health arr.
Protocol preparation; data collection, analysis, organization; writing, defense of research.

DPH:6017 Teaching Methods and Evaluation arr.
Philosophies of dental education, teaching methodologies, evaluation; focus on learning to write educational objectives, writing and analyzing exam items.

DPH:6018 Clinical Teaching Practicum: Preventive Dentistry 0-3 s.h.
Teaching experience in preventive dentistry clinic setting with first-year dental students; outcomes focused on methods in clinical teaching, evaluation, and remediation.

Dental Public Health, M.S.

Requirements

The Master of Science program in dental public health requires 40 s.h. of coursework and is designed to be completed in two academic years of full-time study. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the degree.

It prepares dentists and dental hygienists to be specialists in dental public health. The program emphasizes research and requires a research project culminating in the completion and defense of a thesis. Successful dentist graduates meet the educational requirements for eligibility to take the certifying examination of the American Board of Dental Public Health.

Admission

Applicants must have a D.D.S. degree or equivalent or be a dental hygienist with a baccalaureate degree. They also must meet the admission requirements of the Graduate College and complete the Graduate Record Examination (GRE) General Test.

Prosthodontics

Head

- Julie A. Holloway

Professional certificate: prosthodontics

Faculty: <https://www.dentistry.uiowa.edu/prosthodontics-faculty>

Website: <https://www.dentistry.uiowa.edu/prosthodontics>

Prosthodontics is the dentistry specialty involving restoring or replacing teeth using crowns, fixed partial dentures (bridges), removable partial dentures, complete dentures, maxillofacial prostheses, and dental implants.

D.D.S. Student Training

The Department of Prosthodontics instructs Doctor of Dental Surgery students in the basic principles, practices, and concepts of prosthodontics required for the practice of general dentistry. Students learn through laboratory projects and treatment of patients with differing prosthodontic needs.

Programs

Professional Program of Study Certificate

- Certificate in Prosthodontics [p. 1275]

Facilities

Most didactic, clinical, and laboratory instruction and patient treatment takes place in the Department of Prosthodontics, which is located in the Dental Science Building. The building also houses the Doctor of Dental Surgery (D.D.S.) program, training programs in specialties recognized by the American Dental Association, and the Iowa Institute for Oral Health Research.

The college and the department provide supporting technologies that include cone beam CT radiography, implant imaging software, laboratory CAD/CAM (computer-aided design and computer-aided manufacturing) systems, and dental lasers.

Advanced prosthodontic students spend time at University of Iowa Hospitals & Clinics, where they work closely with medical professionals in other disciplines to treat medically compromised prosthodontic patients and those who require maxillofacial rehabilitation.

Courses

Prosthodontics Courses

PROS:5700 Advanced Clinical Prosthodontics	0,2 s.h.
PROS:5710 Advanced Removable Prosthodontic Technique	0,2 s.h.
PROS:5720 Advanced Instrument Technique	0,2 s.h.
PROS:5730 Advanced Implant Techniques	0-2 s.h.
PROS:5740 Advanced Fixed Prosthodontics Technique	0,2 s.h.
PROS:5750 Clinical Issues and Treatment Planning in Prosthodontics	0-1 s.h.

PROS:6220 Fixed Prosthodontics Literature Review I **0-4 s.h.**
Fixed prosthodontic procedures; assigned readings, discussion of related research.

PROS:6221 Fixed Prosthodontics Literature Review II **0-4 s.h.**
Porcelain-fused-to-metal and ceramic restorations, color science and esthetics; assigned readings, discussion of related research.

PROS:6222 Implant Literature Review **0-4 s.h.**
Implant prosthodontics; assigned readings, discussion of related research.

PROS:6223 Occlusion Seminar **0-4 s.h.**
Occlusion and the temporomandibular system; assigned readings and discussion of related research.

PROS:6224 Graduate Restorative Materials **0,2 s.h.**
Dental materials science; mechanical, physical, and chemical properties of restorative materials; selection and manipulation.

PROS:6225 Complete Denture Literature Review **0-4 s.h.**
Complete denture prosthodontics; assigned readings, discussion of related research.

PROS:6226 RPD Literature Review **0-4 s.h.**
Removable partial denture prosthodontics; assigned readings, discussion of related research.

PROS:6700 Maxillofacial Prosthodontics Seminar **0-1 s.h.**

PROS:6710 Dental Implant Surgery for Prosthodontic Residents **arr.**
Lecture and literature review covering implant surgery and complications for prosthodontics residents.

PROS:7700 Maxillofacial Prosthodontics Rotation **0-1 s.h.**

PROS:8120 Treatment of Dentulous Patients: Introduction to Occlusion Lecture **1 s.h.**
Introduction to principles of occlusion and their clinical application.

PROS:8121 Treatment of Dentulous Patients: Introduction to Occlusion Lab **1 s.h.**
Patient simulation exercises demonstrating principles of occlusion.

PROS:8122 Treatment of Dentulous Patients: Fixed Prosthodontics for Single Anterior Teeth Lecture **1 s.h.**
Basic principles of fixed prosthodontics for single-unit anterior teeth; basic principles of tooth preparation, clinical steps, and digital procedures for fabrication of anterior single-tooth all-ceramic crowns and interim crowns. Prerequisites: PROS:8120 and PROS:8121.

PROS:8123 Treatment of Dentulous Patients: Fixed Prosthodontics for Single Anterior Teeth Lab **1 s.h.**
Patient simulation exercises in single anterior tooth preparation, and fabrication of single-unit anterior all-ceramic and interim restorations. Prerequisites: PROS:8120 and PROS:8121.

PROS:8124 Treatment of Dentulous Patients: Fixed Prosthodontics for Single Posterior Teeth Lecture **1 s.h.**
Basic biomechanical principles of fixed posterior single tooth prosthodontics; diagnosis and treatment planning for dentate patients including occlusion. Prerequisites: PROS:8120 and PROS:8121 and PROS:8122 and PROS:8123.

PROS:8125 Treatment of Dentulous Patients: Fixed Prosthodontics for Single Posterior Teeth Lab 1 s.h.

Patient simulation exercises in single posterior tooth preparation and laboratory fabrication of single-unit posterior definitive and interim restorations. Prerequisites: PROS:8120 and PROS:8121 and PROS:8122 and PROS:8123.

PROS:8240 Treatment of Partially Edentulous Patients: Fixed Multi-Unit Prosthodontics Lecture 1 s.h.

Basic biomechanical principles of fixed prosthodontics for multiple-unit fixed prostheses; diagnosis and treatment planning for partially edentulous patient, including occlusion and esthetic concerns.

PROS:8241 Treatment of Partially Edentulous Patients: Fixed Multi-Unit Prosthodontics Patient Simulation I 1 s.h.

Patient simulation exercises in preparation and fabrication of a three-unit fixed partial dental prosthesis and interim restoration.

PROS:8242 Treatment of Partially Edentulous Patients: Single Tooth Implant Lecture 1 s.h.

Principles, clinical steps, materials, and laboratory procedures necessary for single tooth fixed implant treatment. Prerequisites: PROS:8240 and PROS:8241.

PROS:8243 Treatment of Partially Edentulous Patients: Single Tooth Implant Patient Simulation 1 s.h.

Clinical steps in laboratory procedures for single tooth implant surgical guide fabrication and restoration. Prerequisites: PROS:8240 and PROS:8241.

PROS:8244 Treatment of Partially Edentulous Patients: Removable Partial Prosthodontics Lecture 1 s.h.

Basic biomechanical principles of tooth replacement with removable partial prosthodontics; diagnosis and treatment planning for partially edentulous patients. Prerequisites: PROS:8240 and PROS:8241 and PROS:8242 and PROS:8243.

PROS:8245 Treatment of Partially Edentulous Patients: Removable Partial Prosthodontics Patient Simulation 1 s.h.

Laboratory exercises in basic principles, clinical steps, and laboratory procedures necessary for fabrication of removable partial dentures. Prerequisites: PROS:8240 and PROS:8241 and PROS:8242 and PROS:8243.

PROS:8246 Treatment of Edentulous Patients: Removable Complete Prosthodontics Lecture 1 s.h.

Fundamental principles of diagnosis and treatment planning for edentulous patients, surgical and prosthodontic protocols for oral rehabilitation of edentulism. Prerequisites: PROS:8240 and PROS:8241 and PROS:8242 and PROS:8243 and PROS:8244 and PROS:8245.

PROS:8247 Treatment of Edentulous Patients: Removable Complete Prosthodontics Patient Simulation 1 s.h.

Laboratory exercises in basic principles, clinical steps, and laboratory procedures necessary for fabrication of complete dentures, including implant over-dentures. Prerequisites: PROS:8240 and PROS:8241 and PROS:8242 and PROS:8243 and PROS:8244 and PROS:8245.

PROS:8360 Prosthodontic Clinic arr.

Experience supplemented by individual supervision, demonstration.

PROS:8365 Prosthodontic Seminar I 1 s.h.

Application of knowledge in biological, basic sciences, and technique to clinical fixed and removable prosthodontics procedures.

PROS:8366 Prosthodontic Seminar II 1 s.h.

Application of knowledge in biological, basic sciences, and technique to clinical fixed and removable prosthodontics procedures.

PROS:8369 Introduction to Clinical Prosthodontics I 4 s.h.

Introduction to application of knowledge in principal, biological, basic sciences, and techniques to clinical fixed, removable, and implant prosthodontics procedures; clinical prosthodontics experience supplemented by individual supervision, demonstration.

PROS:8370 Introduction to Clinical Prosthodontics II 8 s.h.

Application of knowledge in principal, biological, basic sciences, and techniques to clinical fixed, removable, and implant prosthodontics procedures; clinical prosthodontics experience supplemented by individual supervision, demonstration.

Prosthodontics, Professional Certificate

Requirements

The professional Certificate in Prosthodontics requires a minimum of 36 months of study. Students must maintain a cumulative g.p.a. of at least 3.00 to earn the certificate. It prepares individuals for specialty clinical practice in the discipline.

The curriculum includes didactic courses and clinical training in all of the disciplines that make up the broad specialty of prosthodontics, including fixed and removable prosthodontics and dental implants, as well as maxillofacial prosthetics. Patient care is completed in close collaboration with the other dental specialties. Clinically-related basic science instruction complements the clinical curriculum.

Students working toward the Certificate in Prosthodontics must pursue the Master of Science in oral science in conjunction with the certificate.

The certificate program is accredited by the Commission on Dental Accreditation of the American Dental Association. Successful completion of the program satisfies the formal training requirement for eligibility to take the American Board of Prosthodontics certification examination.

Graduate Study

The M.S. program prepares individuals for careers in dental education and research and for independent study and professional growth. Students must prepare and defend a thesis for the M.S. in oral science based on original research. Facilities and support personnel for research are available through the college's Iowa Institute for Oral Health Research. See the M.S. in oral science [p. 1260] in the Catalog. Successful completion of the M.S. may allow further Ph.D. study.

Admission

Applicants must meet the admission requirements of the Graduate College. They must hold a D.D.S. or a D.M.D. degree from a dental school accredited by the American Dental Association or an equivalent degree.

The certificate program begins around July 1 each year. Applications are only made through Match, which places applicants into positions for their first year of training in postdoctoral dental education programs. A personal interview is required for select applicants; selection for an interview is based on qualifications and is by invitation only.

College of Education

Dean

- Daniel L. Clay

Associate Dean for Faculty and Academic Affairs

- Amanda H. Thein

Associate Dean for Research

- Saba R. Ali

Associate Dean for Teacher Education and Student Services

- Nancy J. Langguth

Undergraduate major: B.A.

Undergraduate minors: educational psychology; human relations

Graduate degrees: M.A.; M.A.T.; M.S.; Ed.S.; Ed.D.; Ph.D.

Graduate certificates: applied behavior analysis; online teaching

Website: <https://education.uiowa.edu/>

The nation's first university-level professorial chair in education was established at the University of Iowa in 1872. The department became the School of Education in 1907; and the College of Education, structured largely as it is today, was founded in 1913. Since then, the college's growth has mirrored the growth of the University.

Over the years, College of Education faculty members have been leaders in a variety of educational fields. Particularly noteworthy have been their contributions in the fields of educational testing and measurement. These contributions helped lay the foundation for today's testing and measurement industry, making Iowa City one of the best-known centers for this educational specialty.

The college has four departments—the Departments of Educational Policy and Leadership Studies [p. 1293], Psychological and Quantitative Foundations [p. 1317], Rehabilitation and Counselor Education [p. 1337], and Teaching and Learning [p. 1351].

Extramural Education

Through Distance and Online Education, selected College of Education courses are offered at off-campus sites and hours outside the traditional schedule. If taken after formal admission to a specific program, some of these courses may be applied to meet requirements for degrees. Students who plan to complete a degree program should apply for admission to the Graduate College and satisfy all application requirements for the degree program they wish to enter.

Special regulations govern such coursework. Students should obtain prior approval from their program advisor before registering in extramural courses. Students not regularly admitted to the University of Iowa also may register in extramural courses, but credit earned before admission does not count toward residency requirements.

Honors in Education

The College of Education Honors Opportunity Program is open to sophomores, juniors, and seniors who have maintained a g.p.a. of at least 3.50. Students with lower grade-point

averages who have demonstrated research potential also may be accepted, based on the recommendations of faculty and/or staff members and the education honors advisor. Honors Opportunity Program students must take EHOP:4100 Honors Seminar in Education, EHOP:4101 Senior Honors Project, and complete five additional honors experiences. Successful completion of the program results in recognition of the student as a College of Education honors graduate.

Faculty

All tenure-track faculty members hold earned doctorates in their teaching fields, and many have had teaching or administrative experience in the public schools. Several hold joint appointments in the College of Liberal Arts and Sciences.

Programs

Undergraduate Programs of Study

Majors

The College of Education offers the following undergraduate degree and programs.

Degree Program Offered

- Bachelor of Arts in Education Studies and Human Relations [p. 1287]

B.A.; the following programs are available:

- Education studies and human relations
- Education studies and human relations (education studies)
- Education studies and human relations (human relations)

Department of Teaching and Learning

The College of Education also offers eight undergraduate majors in teacher education licensure areas. Students pursuing any of the undergraduate majors complete a Teacher Education Program (TEP) approved by the State of Iowa through the College of Education. See TEP Licensure [p. 1278] in this section of the Catalog. See the Department of Teaching and Learning [p. 1351] in the Catalog for details about the majors.

B.A.; the following programs are available:

- Art education
- Elementary education
- English education
- Mathematics education
- Music education
- Science education
- Social studies education
- World language education

Combined B.A. (Special Education Subprogram)/M.A. in Teaching and Learning (Special Education Subprogram)

Effective spring 2021, Bachelor of Arts students interested in pursuing a graduate degree in special education may apply to the combined Bachelor of Arts with a special education subprogram/Master of Arts with a special education subprogram (K-8 instructional strategist I: mild/moderate; nonthesis) offered by the College of Education. Designed for undergraduate students majoring in elementary education

who are currently enrolled in the TEP program, the combined program enables students to earn a B.A. and M.A. in five years by beginning to earn graduate credit during their last semester of undergraduate study and counting up to 6 s.h. of qualifying credit toward both degrees. For more information, see Combined Programs [p. 1372] under the B.A. in elementary education section of the Catalog. Interested students should consult an advisor.

Minors

The College of Education offers two undergraduate minors for students who wish to be better informed about education and related fields: one in educational psychology and one in human relations, offering students an overview of various educational areas beyond, but supportive of, traditional education programs. The minors may help support students' future career objectives and benefit students in their roles as parents, taxpayers, or future members of local boards of education. View the minor in educational psychology [p. 1325] (Department of Psychological and Quantitative Foundations) and the minor in human relations [p. 1344] (Department of Rehabilitation and Counselor Education) in the Catalog to learn more.

Graduate Programs of Study

Graduate study in the College of Education is guided by the policies of the Graduate College, with additional requirements set by the College of Education's faculty. Graduate students in education enroll in the Graduate College and receive their degrees from that college. See the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Majors

The College of Education offers the following graduate degrees and programs.

Degree Programs Offered

Department of Educational Policy and Leadership Studies

M.A., Ed.D., Ed.S., and Ph.D. in educational policy and leadership studies; the following programs are available:

- Educational leadership (offered in the M.A., Ed.S., and Ph.D.)
- Higher education (offered in the Ed.D.)
- Higher education and student affairs (offered in the M.A., Ed.S., and Ph.D.)
- PK-12 administration (offered in the Ed.D.)
- School curriculum and assessment policy (offered in the Ed.S.)
- Schools, culture, and society (offered in the M.A. and Ph.D.)

Department of Psychological and Quantitative Foundations

M.A., Ed.S., and Ph.D. in psychological and quantitative foundations; the following programs are available:

- Counseling psychology (offered in the M.A.—Hong Kong and Ph.D.)
- Couple and family therapy (offered in the Ph.D.)
- Educational measurement and statistics (offered in the M.A. and Ph.D.)

- Educational psychology (offered in the Ph.D.)
- Learning sciences (offered in the M.A.)
- School psychology (offered in the Ed.S. and Ph.D.)

Department of Rehabilitation and Counselor Education

M.A. and Ph.D. in rehabilitation and counselor education; the following programs are available:

- Clinical mental health counseling (offered in the M.A.)
- Counselor education and supervision (offered in the Ph.D.)
- Rehabilitation counseling program (offered in the M.A.)
- School counseling (offered in the M.A.)

Department of Teaching and Learning

M.A., M.A.T., M.S., and Ph.D. in teaching and learning; the following programs are available:

- Art education (offered in the M.A. and M.A.T.)
- Developmental reading (offered in the M.A.)
- English education (offered in the M.A. and M.A.T.)
- Literacy, culture, and language education (offered in the Ph.D.)
- Mathematics education (offered in the M.A., M.A.T., and Ph.D.)
- Multilingual education (offered in the M.A.)
- Science education (offered in the M.S., M.A.T., and Ph.D.)
- Social studies education (offered in the M.A. and M.A.T.)
- Special education (offered in the M.A. and Ph.D.)
- STEM education (offered in the M.S.)
- Teaching, leadership and cultural competency (offered in the M.A.)
- World language education (offered in the M.A.T.)

Master of Arts

The College of Education offers a Master of Arts. Some of the college's M.A. programs are offered with thesis as well as without thesis. Nonthesis programs usually provide more specialized coursework than do thesis programs. Although a nonthesis program is not necessarily terminal, students who expect to continue their studies in a doctoral program are urged to select a thesis program in order to gain more experience in research procedures. Students who complete a nonthesis M.A. and are admitted to a Ph.D. program may be asked to submit evidence of writing and research skills to their advisor or department during the early part of their doctoral program. For information about programs that offer a thesis option, see the program descriptions under "Graduate Programs of Study" in College of Education department sections of the Catalog.

Coursework completed more than 10 years before the session in which the degree is to be conferred must be evaluated to determine how much credit may be accepted toward the degree requirements. Students must earn at least 24 s.h. in University of Iowa courses after formal admission to a master's degree.

Master of Arts in Teaching

The M.A.T. program is designed for academically superior liberal arts and sciences graduates who completed few or no professional education courses in their undergraduate programs. It is a nonthesis program with requirements that range from 45 s.h. to 67 s.h. of credit. See the M.A.T. in teaching and learning [p. 1403] in the Catalog.

The program leads to a master's degree and licensure as a secondary teacher in the fields of art, English, foreign languages, mathematics, science education, and social studies education. Admission to the program requires a g.p.a. of at least 3.00 in undergraduate coursework. The program includes 18 s.h. of graduate coursework in the student's teaching field. Students must complete a minimum of 20 s.h. of graduate work in education to satisfy licensure requirements.

Combined B.A./M.A.T. (Science Education Subprogram)

Bachelor of Arts students interested in pursuing a graduate degree in teaching may apply to the combined Bachelor of Arts/Master of Arts in Teaching with a science education subprogram offered by the College of Liberal Arts and Sciences and the College of Education. Designed for undergraduate students majoring in biology, chemistry, environmental sciences, mathematics, or physics, the combined program enables students to earn a B.A. and M.A.T. in five years by beginning to earn graduate credit during their fourth year of undergraduate study and by counting up to 18 s.h. of qualifying credit toward both degrees. For more information, see "Combined B.A./M.A.T." under Science Education [p. 1405] in the Master of Arts in Teaching, M.A.T. section of the Catalog. Interested students should consult an advisor.

Master of Science

The College of Education offers a Master of Science in teaching and learning with a science education subprogram. The degree requirements are similar to those for a Master of Arts. It also offers the Master of Science in teaching and learning with a STEM education subprogram.

Specialist in Education

The Ed.S. is granted upon completion of a prescribed two-year postbaccalaureate program designed for students preparing for professional work in fields such as administration and supervision, and special services. Of the minimum 60 s.h. required for the degree, 28 s.h. must be in the specialization area; the rest may be earned in cognate fields, supervised experience, research, and elective courses. The research must culminate in a written report.

Other requirements for the Ed.S. are the same as for the master's degree, except that an Ed.S. requires students to complete 30 s.h. of resident work on campus after admission to the program. Coursework completed 10 years before the final examination must be evaluated to determine the amount of credit that may be accepted toward program requirements.

Not all programs offer an Ed.S. degree. For a list of programs and degrees offered, see "Graduate Programs of Study" above.

Doctor of Education

The Ed.D. is designed for educators seeking a terminal doctoral degree to practice upper-level leadership in PK-20 educational settings. Based on the scholar-practitioner model, the Ed.D. differs from the Ph.D. in that it allows for a more practical-based approach, grounded in problem-based learning pedagogy, to use and perform applied research in educational settings. Ed.D. students must complete 75 s.h. post-baccalaureate, with at least 39 s.h. completed at the University of Iowa after formal program admission. Students are expected to already have a related masters degree when admitted to the program and to have been practicing in

education for a minimum of three years. Up to 36 s.h. may be transferred from the previous graduate degree for elective credit toward the 75 s.h. to earn the Ed.D. degree.

Doctor of Philosophy

The Ph.D. is the most advanced academic degree. It is conferred upon students who have demonstrated superior scholarship and mastery of research skills in coursework as well as in the preparation and defense of a dissertation. Ph.D. students must complete at least 39 s.h. while registered in the University of Iowa Graduate College and after formal program admission.

Certificates

The Certificate in Applied Behavior Analysis requires 21 s.h. of graduate credit. The certificate program is open to students enrolled in University of Iowa graduate degree programs and to individuals who are enrolled in the Graduate College as nondegree students. The purpose of the certificate is to provide professionals who have a background in education, psychology, and related services with expertise in behavior intervention and intensive educational interventions. Students who complete the program are eligible for national certification as board-certified behavior analysts. To learn more or apply, see the Certificate in Applied Behavior Analysis [p. 1292] in the Catalog.

The Certificate in College Teaching requires 12 s.h. of graduate credit. The certificate program is open to all University of Iowa students working toward a Ph.D. or other terminal graduate degree. The certificate program complements discipline-oriented graduate programs and prepares students for careers in postsecondary education. It requires coursework, supervised teaching experience, and preparation of a teaching portfolio. To learn more or to apply, see the Certificate in College Teaching [p. 1575] (Graduate College) in the Catalog.

The Certificate in Online Teaching requires 12 s.h. of graduate credit and is offered completely online. The certificate program is open to students enrolled in University of Iowa graduate degree programs and to individuals who are enrolled in the Graduate College as nondegree students. The certificate program develops students' skills in using technology to solve instructional problems associated with distance and time. The certificate's online format uses the techniques and approaches that the program teaches. To learn more or apply, see the Certificate in Online Teaching [p. 1316] in the Catalog.

Professional Improvement

Students who are interested in taking courses as nondegree students should apply for nondegree status to the Graduate College. They can then be admitted by a department on a nondegree basis by contacting the department. Students must be admitted to a department in order to complete a program objective such as teacher licensure.

TEP/Licensure

Teacher Education Programs (TEP) and Student Teaching

The College of Education offers a Teacher Education Program (TEP) that includes preparation for teaching in elementary, secondary, or K-12 education. It offers teacher preparation in art education, elementary education, English education,

mathematics education, music education, science education, social studies education, and world language education. Preparation for special education teaching is offered primarily as a master's degree program, but undergraduate students in the elementary education major may complete a special education endorsement for teaching elementary school students with mild or moderate disabilities. In cooperation with the School of Library and Information Science [p. 1600], the college offers graduate-level preparation for school teacher librarians.

In addition, the college offers specialized programs in additional elementary, secondary, middle school, and K-12 teaching areas. See "Added Endorsements" below.

The College of Education awards Bachelor of Arts undergraduate majors in elementary education and seven other majors. Majors in art education, English education, mathematics education, music education, science education, social studies education, and world language education require a corequisite content major from the College of Liberal Arts and Sciences. See the Department of Teaching and Learning [p. 1351] section of the Catalog for details about these majors. The majors require admission to the TEP.

Individuals with a previous bachelor's degree or a more advanced degree also may complete a TEP. See "Graduate and Postbaccalaureate Admission to TEPs" below and the Department of Teaching and Learning [p. 1351] section of the Catalog.

The Office of Student Services provides information on TEPs; offers assistance with admission, student field experiences, and teacher licensure/certification; and serves as a liaison with other University units and external agencies. For more information, visit the office's website.

Undergraduate Admission to TEPs

Undergraduate applicants to the University of Iowa who wish to become teachers may indicate their interest in the elementary education major or a secondary-level Teacher Education Program on their application for admission. Application materials for TEPs are available on the office's website and are filed through the web application, TK20 (Watermark).

Acceptance to a TEP is prerequisite to registration for most College of Education undergraduate courses.

Application Deadlines

Students must be admitted to the TEP in order to register for certain courses, to participate in field experiences/practicums, and to student teach. The priority admission deadline for fall semester is March 1, with applications accepted on a rolling basis until May 1. The priority admission deadline for spring semester is October 1, with applications accepted on a rolling basis until December 1. The ideal time to apply is by the priority deadline, so that students who are admitted to the program can be cleared for advising and registration in a timely manner. Applications are only considered by the faculty when all requirements are complete. Faculty members in each program area review and select applicants to be admitted to their program. Some program areas may reach capacity for acceptance before the final deadlines. Applicants are notified of admission decisions by email following faculty review.

General Requirements

Admission to TEPs is selective. Admission requirements may vary by program area. In order to be considered for admission to a TEP, an undergraduate student must satisfy the following

requirements: admission to the University of Iowa, a minimum amount of credit for college-level work, and a preadmission volunteer field experience in a regular K-12 classroom setting. There may be additional requirements. TEP application materials and current minimum application requirements are available on the Office of Student Services website.

Review of Applications

TEP admission is based on a faculty review of all application components. Meeting the minimum criteria does not ensure program admission. Selection is determined by academic achievement as reflected in grade-point average, aptitude as reflected by recommendations and personal statements, and the ability of the given program area to provide quality instruction and clinical and field experiences.

Direct Admissions Policy

The College of Education offers direct admission into the elementary education TEP. First-year students who present an American College Test (ACT) composite score of 27 or higher and a final high school g.p.a. of at least 3.80 are eligible for the direct admission track into the elementary education TEP. Students in this track must submit a qualifying 10-hour preadmission school field experience verification form by a selected deadline within their first year at the University of Iowa in order to validate their admission. The faculty and administration of the elementary education TEP reserve the right to cap enrollment in the direct admission track.

The College of Education also offers direct admission into the music education TEP. First-year students who, upon graduation from high school, have a high school g.p.a. of 3.00 or higher and have been accepted into a music studio will be directly admitted into the K-12 music education TEP. This admission is conditional until the minimum admission requirements are complete. The requirements include admission to the School of Music, completion of an essay in 500 words or less on why the applicant wishes to be a music teacher, and completion of the 10-hour preadmission school field experience verification form.

Graduate and Postbaccalaureate Admission to TEPs

Students with a previous bachelor's degree or more advanced degree may be admitted to a TEP as graduate or undergraduate students, and may have the option to pursue an additional undergraduate or graduate degree, or to pursue the TEP as a nondegree student. See the Department of Teaching and Learning [p. 1351] for degree program options. Students must apply to the TEP through the web application, **Tk20 (Watermark)**, and to the University of Iowa through the Office of Admissions. Application information is available from the Office of Student Services.

Graduate applicants must be eligible for admission to the Graduate College, which requires a g.p.a. of at least 3.00 in all previous college coursework. See the Graduate Admissions website.

Undergraduate applicants must meet the general requirements for undergraduate admission to the University of Iowa; see the Undergraduate Admissions website.

TEP Standards and Policies

Students in the TEP must meet grade-point average requirements each semester. Students who do not meet the requirements are placed on probation; those who fail to meet the requirements in a successive semester may be removed

from the TEP or denied admission to student teaching. For more information on standards and policies, consult the Office of Student Services.

InTASC Standards-Based Assessments

Once admitted to the TEP, teacher candidates' progress toward meeting professional standards is documented on Tk20 (Watermark), a web-based assessment system. Students apply to the TEP through the system, and throughout the program submit assignments designated by their respective program area for standards-based scoring on rubrics in common across all program areas.

Teacher Leader Professional Development Program

Teachers from the University of Iowa are distinguished by their preparation with world-class faculty researchers and clinical practitioners and a one-of-a-kind professional development program that highlights contemporary issues in 21st-century education. All requirements must be completed prior to student teaching. All teacher education students are required to participate.

Student Teaching

The final phase of the TEP is the professional semester, devoted to supervised student teaching and directed observation in a variety of situations. The student teaching semester is a full-time, all-day, experience. Faculty members, professional staff, and advanced graduate students who are experienced teachers serve as supervisors.

Periodic seminars provide for discussion and evaluation of student teachers' experiences. Transfer credit may not be used to satisfy the student teaching requirement.

To be admitted to the student teaching semester, students must submit a separate application to the Office of Student Services in the College of Education. All coursework in education, for the major, and for the degree must be completed before the student teaching semester. Applications are submitted during the calendar year before the student teaching semester. The deadline is November 15 for students planning to student teach the following fall semester and April 15 for students planning to student teach the following spring semester.

Admission to student teaching requires program area faculty approval as well as verification of satisfactory progress in meeting both College of Education professionalism standards and program area standards, which are set at the time of admission to the TEP. In some programs, standards are higher than the college's required g.p.a. of at least 2.70. Students should consult with their advisors regarding specific requirements for the program areas. For more information, contact the Office of Student Services.

Placement Options

Student teaching placements typically are in schools within a 60-70 mile radius of Iowa City, referred to as local placements. Students who receive faculty approval, based on academic and professional criteria, may have options to student teach in other locations, referred to as special sites. Special sites are schools in other parts of Iowa, the Midwest region, and in select urban districts in other parts of the United States, that have ongoing contracts with the College of Education for placement of student teachers. For more information on student teaching placement options, see the Office of Student Field Experiences website.

International Student Teaching

International student teaching experiences are available primarily through Global Gateway for Teachers, an Indiana University Program working in collaboration with the University of Iowa. Sites include Australia, China, Costa Rica, Ecuador, England and Wales, Greece, India, Ireland, Italy, Japan, New Zealand, Norway, Russian Federation, Scotland, Spain, and Tanzania.

Interested students must meet the regular requirements for student teaching and must have the approval of their advisor and the appropriate program coordinator. In most locations, students are assisted with housing by the on-site coordinator.

International assignments are for eight weeks. Students complete an eight-week assignment in a stateside placement followed by an eight-week assignment in an international placement. Secondary education students in some program areas (for instance, English education) are required to complete a full semester of student teaching in the United States before student teaching at an international site.

For more information about international student teaching opportunities, contact the Office of Student Services.

Program Completion Assessment

As a requirement for completion of an approved TEP for initial teaching licensure, the state of Iowa requires a program completion assessment. University of Iowa student teachers must pass the edTPA assessment of their program as a requirement for program completion.

Course Substitutions

Students who have completed courses that they wish to substitute for program requirements should consult with their advisors.

All University of Iowa students seeking an Iowa teaching license must complete EPLS:4180 Human Relations for the Classroom Teacher and EDTL:4900 Foundations of Special Education, or approved substitutes. Human relations courses offered through community colleges are not accepted.

Teacher Licensure/Certification

The Iowa Board of Educational Examiners issues teacher, support service, and administrator licenses on the recommendation of Iowa colleges and universities whose programs have been approved by the Iowa Department of Education. All University of Iowa preparation programs have Iowa Department of Education approval.

Licensure/certification requirements across the nation are subject to change. Students who plan to seek employment in a state other than Iowa should make every effort to be informed about current requirements in that state. Generally, students who apply out-of-state should first secure Iowa licensure.

To be recommended by the University of Iowa, applicants must complete all requirements of the appropriate approved program. A minimum of 20 s.h. of coursework applied to meet program requirements must be earned at the University of Iowa.

In the State of Iowa, applicants must be at least 21 years old to be granted a teaching license. The Iowa Board of Educational Examiners requires a national criminal history background check, an Iowa Division of Criminal Investigation background check, and registries and records checks for all new applicants for Iowa licensure. Disqualifying criminal

convictions and founded child abuse are set out Iowa Code 272.2 and Iowa Administrative Code 282-11.35, and in the Iowa Board of Educational Examiners Ethics Brochure.

The College of Education Office of Student Services provides Iowa application forms, fingerprinting procedures, and licensure/certification assistance to all students completing approved programs offered by the college. It also provides assistance to in-service teachers and other school professionals who are interested in adding endorsements to their Iowa license based on completion of State of Iowa minimum licensure requirements.

Added Endorsements

Current TEP students and in-service teachers may prepare for teaching additional subjects through added endorsement programs and courses.

Most added endorsements for kindergarten through 8th grade (K-8) are intended for TEP students and in-service teachers in elementary education. See the B.A. in elementary education [p. 1369] for these added endorsements. Other endorsements, including most secondary (grades 5-12) endorsements for which the University of Iowa offers a TEP, also can be available to elementary, secondary, or K-12 TEP students and teachers as added endorsements.

Preparation is offered for these added endorsements:

- K-12 English as a second language (ESL)
- PK-12 talented and gifted
- Grades 5-8 middle school (language arts, mathematics, science, and/or social studies);
- Grades 5-12 reading
- K-12 athletic coach

For additional information contact an academic advisor or licensure staff in the Office of Student Services.

Resources

Baker Teacher Leader Center

The Baker Teacher Leader Center (Baker TLC) develops, supports, and facilitates a variety of professional development opportunities for students, faculty, staff, and community members affiliated with the College of Education.

The Baker TLC manages the Teacher Leader Certificate, a value-added professional development certificate that provides students in the Teacher Education Program (TEP) opportunities to engage with innovative educational topics aimed toward developing their identities as emerging teacher leaders.

The Baker TLC operates a teacher licensure renewal credit program, offering relevant research and evidence-based professional development to practicing Iowa teachers. Professional development offered through the Baker TLC is aligned with needs identified by the Teacher Education Advisory Committee through survey responses received from school administrators, policy leaders, and faculty, and from information and data received from professional education organizations such as the Iowa Association of Colleges for Teacher Education (IACTE), the American Association of Colleges for Teacher Education (AACTE), and community partners.

The Baker TLC supports College of Education Global Education Initiatives including international and domestic partnerships

and programming, and professional learning opportunities for domestic and international faculty, staff, and students.

Belin-Blank Center for Gifted Education and Talent Development

Located in the Blank Honors Center, the Connie Belin and Jacqueline N. Blank International Center for Gifted Education and Talent Development conducts research, training, and service in gifted education and disseminates information on the education of gifted students. Professional development opportunities include the Belin-Blank Fellowship Program in Gifted Education, practicum and internship experiences, and coursework in gifted education (including coursework for the State of Iowa Talented and Gifted Endorsement).

Precollege student programs include Invent Iowa, Scholastic Art & Writing Awards, above-level testing for students in grades 3-9, precollege summer and academic year programs for high-ability students in grades 2-11, and the Iowa Online Advanced Placement Academy.

Other services include the Wallace Assessment and Counseling Clinic, which specializes in twice-exceptionality; and the Acceleration Institute, which is dedicated to the study of curricular acceleration for academically talented children. The center also administers the Bucksbaum Early Entrance STEAM Academy, a highly selective early-entrance program for students who have completed their sophomore or junior year in high school and are ready to enroll as full-time University of Iowa Honors students.

For more information, contact the Belin-Blank Center.

Blommers Measurement Resources Library

The Paul Blommers Measurement Resources Library includes books, journals, research reports, and reference materials related to educational and psychological measurement, testing, assessment, and evaluation, as well as an extensive collection of published and unpublished tests. The library supports the teaching and research needs of faculty, staff, and students at the University of Iowa, primarily serving the College of Education.

Center for Advanced Studies in Measurement and Assessment

The Center for Advanced Studies in Measurement and Assessment (CASMA) pursues interdisciplinary research-based initiatives that lead to advances in the methods and practice of educational measurement and assessment. CASMA performs, promotes, fosters, and disseminates research in measurement and psychometric methodologies that respond to contemporary needs and initiatives in testing.

Currently, the center devotes considerable resources to research on equating, scaling, and generalizability theory; it also offers workshops and training sessions on those topics. Extensive free suites of computer programs are available on the CASMA website. The site also features research reports and technical notes on measurement topics such as generalizability theory, equating methods, and linking with item response theory.

Center for Evaluation and Assessment

The Center for Evaluation and Assessment (CEA) provides third-party program evaluation, assessment, and other research services to a broad range of clients working in multiple programmatic areas. The center's mission is to provide high quality program evaluation and research services to support data-driven decision-making, to train graduate students, and to advance evaluation theory and practice.

Center for Research on Undergraduate Education

The Center for Research on Undergraduate Education (CRUE) is dedicated to the study of undergraduate education in America, from how academic and social experiences affect students to the methods schools use to improve students' chances for success in the classroom and beyond graduation. CRUE brings a methodologically balanced approach to the study of undergraduate education.

College of Education Writing Resource

The Writing Resource provides academic writing support for graduate students at the College of Education. Students sign up to work collaboratively with a writing tutor throughout the composing processes—from conceptualizing ideas to polishing and publishing/finalizing the paper. The mission is to facilitate each student's individual growth as a writer and to foster a collaborative writing community. Services are free to graduate students in the College of Education.

Cooperating Schools Program

The Cooperating Schools Program (CSP) is a University-wide service that facilitates placement of research projects and service-learning projects conducted by faculty, staff, and students in public schools throughout Iowa. The program provides information to help researchers obtain permission to conduct research in Iowa schools. The Cooperating Schools Program was instituted at the request of school administrators charged with the responsibility of approving research projects in their schools.

Education Technology Center

The Education Technology Center (ETC) provides computer services to College of Education faculty, staff, and students. In addition to internet access, services include collegiate file and application servers; standard office tools; specialized applications such as media production tools and qualitative and quantitative analysis programs; secure folders and directories; and electronic mailing lists for faculty, staff, and student groups. The ETC also provides website and digital signage (kiosk) development for College of Education departments, offices, and groups.

The Education Technology Center provides faculty with technical and design support for courses, research technologies, distance education, multimedia, and ePortfolio production.

SMART Boards and SMART Podiums, and wireless access are available throughout the college. Every classroom and conference room has a digital presentation system, and five

classrooms are outfitted for videoconferencing and distance education instruction.

Faculty members and students can check out wireless laptops, web cameras, computer projectors, digital audio recorders, digital video cameras, iPads, and other devices from the center. In all, the College of Education supports more than 850 computers, laptops, PDAs, and smartphones as well as seven servers.

Grants and Research Services Center

The Grants and Research Services Center (GRSC) provides grant and research-related support services for the college's faculty, staff, and students. GRSC staff members help identify internal and external funding sources, prepare and submit grant proposals and application materials, provide grant accounting services, and help in the preparation of applications for Human Subjects/Institutional Research Board review. The college also provides limited funds for faculty research, professional development, and travel.

Institute on Disability and Rehabilitation Ethics

The Institute on Disability and Rehabilitation Ethics (IDARE) is a cross-disciplinary, cross-institutional online community of scholars. Its goal is to use research, education, and consultation to improve the quality of ethical practice experienced by people with disabilities who receive services from rehabilitation, health, mental health, and social service professionals. IDARE works to influence disability policy and practice development nationally and locally and to influence professional organizations' consideration of ethical issues that affect people with disabilities and other marginalized populations.

Iowa Supports Education and Resources for Veterans and Enlisted

Iowa Supports Education and Resources for Veterans and Enlisted (I-SERVE) was created to help facilitate successful transitions for veterans and enlisted service members into higher education at the University of Iowa. I-SERVE is located in the Teacher Leader Center, on the first floor of the North side of Lindquist Center. The center assists veterans with accessing benefits, the application process, completing coursework, preparing for and searching for jobs, and achieving overall career success. I-SERVE also offers educational consultation, workshops, special programs, and presentations that enhance knowledge, skills, and attitudes of teachers and other professionals who work with veterans, military children, and families.

Iowa Testing Programs

Iowa Testing Programs (ITP) provides assessment expertise to schools in the state of Iowa and consultation to the Iowa Department of Education and area education agencies. Its faculty and staff develop standardized educational tests, such as the widely used Iowa Assessments, for use in elementary and secondary schools worldwide, and the Iowa Statewide Assessment of Student Progress, for use in the state of Iowa for summative assessment. Iowa Testing Programs also conducts research studies in educational measurement, publishes the results of these studies, sponsors lectures

and symposia, provides consulting and in-service training to educators and school systems, and provides training experience and financial support for graduate students and educational measurement, statistics, and evaluation.

Libraries

University of Iowa Libraries provides a wide variety of resources in print and online. Course reserve materials are available at the Main Library. An education librarian is available to help students with their research projects and assist faculty members and teaching assistants with their research and instructional needs.

Office of Graduate Teaching Excellence

The Office of Graduate Teaching Excellence (OGTE) is dedicated to excellence in college teaching and the preparation of future faculty. The office facilitates opportunities for research, teaching, and service. Through the Iowa Education Fellows Program (i-fellows), OGTE develops and conducts workshops and seminars that address the developmental needs of College of Education doctoral students, from their first semester on campus through completion of their degrees. The office also guides students through the process of earning the graduate Certificate in College Teaching (Graduate College).

Office of Student Services

The Office of Student Services assists students, faculty, staff, and the general public in graduate and undergraduate admission, undergraduate advising, Teacher Education Program (TEP) recruitment, Graduate College examinations, student field experiences, and teacher licensure/certification. It also serves as a liaison with other University units, including the Graduate College, the College of Liberal Arts and Sciences, the Office of Admissions, and the Office of the Registrar, and with external agencies, including the Iowa Department of Education, out-of-state teacher licensure/certification departments, and school district personnel in Iowa and outside of the state. A variety of application and information materials are available at the office and on its website.

Statistics Outreach Center

The Statistics Outreach Center (SOC), a service of the College of Education and Iowa Testing Programs, helps the college's faculty, staff, and students use quantitative statistical methods to produce high-quality research. The center offers short-term consulting on statistical data analysis and grant proposals to the College of Education at no charge and provides services to departments and grants outside the college on a fee basis. The SOC also offers a variety of educational opportunities involving statistical software. Information on course schedules, events, resources, and an appointment request form is available on the Statistics Outreach Center website.

Financial Support

College of Education students may be eligible for scholarships, awards, or graduate assistantships. Information about financial support for students is available at Scholarships and Awards on the college's website. The Graduate College posts a list of open assistantships on its website; see Graduate Assistantships and Grants.

The Graduate Record Exam (GRE) General Test is currently not required for graduate assistantships, teaching assistantships, or research assistantships in the College of Education.

Students interested in employment opportunities in the college's support units and special resources should contact the director of each facility and indicate their interests, their academic and experience records, and their career or degree goals at the University of Iowa.

Graduate Assistantships

Individual academic programs provide opportunities for teaching, research, or service assistantships as well as for fellowships and related employment opportunities. Inquiries should be addressed to the chair of the department or the director of the program in which students believe they can provide service or achieve an outstanding academic record. Assistantship appointments are usually, but not always, made by the program area.

Special Graduate Research Assistantships in Education

The Iowa Testing Programs provides funds to support a limited number of special graduate assistantships in education, in which students do research work under the direction of a faculty member of their choice. Students must be enrolled for at least 6 s.h. but not more than 12 s.h. per semester; assistantships are for the academic year and are renewable for a limited number of years. Students admitted to or pursuing any advanced degree program offered by the College of Education are eligible to apply, provided they are committed to a professional career in the United States.

Applicants must submit transcripts of all completed college work (undergraduate and graduate), recommendation forms specific to the assistantship, and scores on the Graduate Record Exam (GRE) General Test. For assistantship application forms, contact the Iowa Testing Programs directors. Application deadline is late February.

Scholarships and Awards

The College of Education presents a number of awards funded by donors; recipients must meet the criteria established by the donors for their awards. Recipients are presented with their award at a spring semester luncheon. For more information, see Scholarships and Awards on the college's website.

Duane D. Anderson Memorial Scholarship: awarded to a transfer student from an Iowa community college who is currently enrolled in a program in the College of Education.

Jack Bagford Elementary Education Scholarship: presented to an undergraduate or graduate student in elementary education who will be student teaching during the academic year following the award; recipient must be a resident of Iowa.

David and Connie Belin Honors Award: presented to graduating seniors who have completed all requirements for the Honors Opportunity Program.

Blommers-Hieronymus-Feldt Fellowship: presented to doctoral students in educational measurement and statistics.

Lowell Brandt Rehabilitation Counseling Award: presented to graduate students pursuing a master's degree in the rehabilitation counseling program.

Barry Bratton Memorial Award: presented to graduate students who have completed coursework that reflects a commitment to the systematic design and improvement of instructional processes and materials.

Robert L. Brennan Graduate Student Award: presented to a graduate student in the educational measurement and statistics program based on their research.

Dr. Bettye M. Caldwell and Dr. Fred T. Caldwell Scholarship: presented to undergraduate students interested in pursuing careers in early childhood development including the fields of education, sociology, psychology, and other related academic programs.

Jake and Kimberly Chung Scholarship: presented to a teacher education student for their student teaching semester.

Debra Clausen Memorial Scholarship: presented to a graduate student in the College of Education who will work at the Hospital School (now the Center for Disabilities and Development) to evaluate and develop learning programs for students with mental disabilities, including Down Syndrome, or to students pursuing careers in special education.

T. Anne Cleary Psychological Research Scholarship: presented to students in the Department of Psychological and Quantitative Foundations.

Laurie Jane Croft Scholarship: presented to deserving undergraduate or graduate students in the College of Education who are pursuing an endorsement certificate in gifted education.

Beulah A. and Robert L. Darrow Scholarship: presented to deserving students in the College of Education.

John Leonard Davies Scholarship: presented to a student who is a first- or second-semester senior in the Department of Teaching and Learning who is viewed as being creative and having outstanding potential for success in the field of K-12 education.

Harvey H. Davis Memorial Scholarship: presented to outstanding graduate students in educational leadership with preference given to students interested in the financing of education.

Mary Ann DePrenger Scholarship for Elementary Education: presented to students pursuing elementary education certification.

Dieckmann, Renken, Rockway Scholarship: presented to a student pursuing a Ph.D. in science education with secondary preference to a graduate student in science education.

Dale Grabinski Education Scholarship: presented to deserving undergraduate students in the teacher education program.

Dr. Mary Agnella Gunn Memorial Scholarship: presented to worthy undergraduate or graduate students in education.

John H. Haefner Memorial Scholarship: presented to a student who will be student teaching in the area of social studies.

Gladys and Margaret Harvey Education Scholarship: presented to students who show financial need and are enrolled in the College of Education.

Hemphill/Jones Higher Education Masters Student Award: presented to deserving students in the College of Education with preference given to historically

underrepresented students of color working toward an M.A. degree in higher education and student affairs.

Emma E. Holmes Education Scholarship: presented to an outstanding undergraduate or graduate student in any program in the College of Education; based on merit and need, the recipient must be a U.S. citizen with first preference for a student in the top 20 percent of their class, second preference for a student with demonstrated financial need.

Albert Hood Promising Scholar Award: presented to a doctoral student in the Department of Rehabilitation and Counselor Education and a student in the higher education and student affairs program with an approved prospectus.

H.D. Hoover Excellence Scholarship: presented to a graduate student working on mathematics achievement testing in the elementary grades.

Hubbard Family Legacy Award: presented to students majoring in mathematics, physics, or chemistry who are pursuing a secondary education teaching certificate with the intention to teach at the secondary level.

Kyle C. and Eula B. Jones Scholarship: presented to undergraduate and graduate students planning careers in elementary and secondary education and administration.

Charlotte and Ruby Junge Scholarship: presented to undergraduate or graduate students in elementary or secondary education who will be student teaching for a full semester.

Henry Kepner Math Education Scholarship: presented to deserving students who are pursuing a degree in math education.

Paul Larson Military/Veteran Student Scholarship: presented to College of Education student veterans and military students to help them achieve success in their studies in the College of Education.

Daniel G. Loetscher Memorial Science Education Scholarship: presented to students pursuing secondary education with an emphasis in the sciences, with preference given to those pursuing an emphasis in chemistry.

Perry Eugene McClenahan Memorial Scholarship: presented to an outstanding graduate student in educational administration.

Sheila E. McFarland Memorial Scholarship: presented to a student who will be student teaching for a full semester in the area of elementary education, preference for this award will be given to an Iowa resident.

Leonard A. Miller Memorial Scholarship: presented to an outstanding first-year M.A. student in rehabilitation counseling.

Helen Mackin Nichol Memorial Scholarship: presented to students from Iowa who are in secondary education and plan to teach and work with mentally and emotionally disturbed children.

Melvin R. Novick Award in Educational Measurement and Statistics: presented to a third- or fourth-year doctoral student in educational measurement and statistics who has at least a year of study remaining.

Paul Opstad Scholarship: presented to a full- or part-time graduate student in the College of Education whose career or scholarly interests focus on the concerns and needs of international students.

Margaret P. Park Scholarship: presented to deserving students in the College of Education with preference given to students from St. Louis County, Minnesota; Rock Island County, Illinois; or Iowa.

Ernest T. Pascarella Military Veteran Promise Award: presented to a graduate student veteran in the College of Education who demonstrates exceptional career promise.

Guy and Gladys Peterson Scholarship: presented to students admitted to the Teacher Education Program who have completed at least 12 s.h. of education coursework.

Betty Piercy Award: presented to a deserving student in the field of reading.

Kathleen M. Ramsay and Family Scholarship: presented to deserving students in the College of Education with preference given to third-year or higher-level students, or to students who have a focus in elementary or secondary education, and demonstrate financial need.

Ann Ramsey and Richard E. Posey Scholarship: presented to a student who is a junior pursuing a career in teaching or education.

Rolland Ray Award: presented to doctoral students completing a dissertation concerned with measurement in mathematics education, science education, social studies education, or English education.

Mary Maxine Redmond Scholarship: presented to undergraduate students from Iowa enrolled in the College of Education.

Albert and Martha Ruffalo First Generation Education Scholarship: presented to deserving students in the College of Education who are first-generation college students.

Richard L. Sanner Scholarship: presented to deserving graduate students in the College of Education.

Judith Young Saunders Scholarship: presented to an undergraduate or graduate student who is pursuing a degree in teacher education, with preference given to students with severe visual impairments.

Judy Skalsky Memorial Scholarship: presented to an undergraduate or graduate student majoring in art education.

Margaret A. Sloan Scholarship: presented to undergraduate or graduate students in the College of Education.

Maureen Medberry Snell Education Award: presented to outstanding students in the College of Education.

Carol M. and Ed Stenson Scholarship in Education: presented to undergraduate students pursuing a special education certification or degree in general teacher education who exhibit both financial need and academic merit.

Drs. Andrew and Jeanne Stevenson Scholarship: presented to students in the College of Education with preference to students studying science education who plan to one day teach science education.

Franklin D. and Louise P. Stone International Scholarship: presented to an outstanding international student pursuing a Ph.D. in the College of Education.

James and Coretta Stroud Fellowship: presented to an outstanding graduate student in educational psychology.

Grace Phelps Stucker Scholarship: presented to an undergraduate or graduate teacher education student.

Student Teaching Abroad Scholarship: presented to students who are doing their student teaching in a foreign country.

Edgar M. and Evelyn Benzler Tarruther Scholarship: presented to undergraduate and/or graduate students in elementary education.

University High School Innovative Development in Education Award (IDEA): presented to students during their secondary student teaching experience.

Emily C. Wagner Scholarship: presented to an undergraduate student in secondary education with an English education teaching degree who will be student teaching in the academic year following the award, preference for students who are residents of Iowa with a g.p.a. of at least 3.00 and demonstrated financial need.

Erwin and Louise Wasta International Scholarship: presented to an international student in the College of Education.

Ernest L. and Janet M. Yeakey Education Scholarship: presented to a deserving student in the College of Education with preference given to a student who is from the state of Iowa and pursuing math education.

Courses

- Education Interdepartmental Courses [p. 1285]
- Education Honors Opportunity Program Courses [p. 1286]

Most College of Education courses are offered by the college's departments and programs. They are listed and described in the corresponding General Catalog sections. The college also offers the following interdepartmental courses.

Education Interdepartmental Courses

EALL:4081 ePortfolio Design and Production 1-2 s.h.
Experience producing an ePortfolio and uploading it to the internet; practical experience using digital tools, content and design related to ePortfolio production; experience using a web browser, accessing the internet, and using a digital camera or scanner. Requirements: able to perform basic computer functions and use a World Wide Web browser. Same as EDTL:4081, EPLS:4081, PSQF:4081, RCE:4081.

EALL:4130 Introduction to Grant Writing 3 s.h.
Comprehensive training in grant proposal writing; basics of project development and management; core principles for writing small and large proposals to public and private funding sources; finer points of grant writing to increase competitiveness of future proposals and applications; for students with limited grant writing experience. Same as MUSM:4150.

EALL:5150 Introduction to Educational Research 3 s.h.
Principles of empirical educational research; logic of inquiry for both quantitative and qualitative research methodologies.

EALL:7475 Ph.D. ePortfolio in College Teaching 3 s.h.
Framework for connecting authentic evidence of scholarly work and teaching competencies; use of advanced web and multimedia technologies to link artifacts to ePortfolio templates.

Education Honors Opportunity Program Courses

EHOP:4100 Honors Seminar in Education **2 s.h.**

Research in education and related professions in collaboration with a College of Education faculty member of student's choice; preparation for senior honors project.

EHOP:4101 Senior Honors Project **1-2 s.h.**

Collaboration with a faculty member on research project; written report. Prerequisites: EHOP:4100.

Education Studies and Human Relations, B.A.

The education studies and human relations major (ESHR) in the College of Education is a multidisciplinary program that enhances broad liberal arts and sciences education for students by providing strong academic preparation, including skills in critical thinking and interpersonal communication.

Students who plan to earn the major pursue their academic interests with a variety of courses from across the College of Education's four academic departments to further career goals or prepare for future graduate study. They may choose to select among all the course offerings for the ESHR major or select one of two subprograms.

The education studies subprogram is for students interested in pursuing careers in education policy, assessment and evaluation, education programming and management, learning technologies, organizational learning, school district support roles, as well as competitive preparation for future graduate study in educational measurement, education policy, educational psychology, higher education, learning sciences, and student affairs.

The human relations subprogram is for students who are interested in careers in helping fields that rely on interpersonal communication and personal problem solving (e.g., addiction, case management), as well as competitive preparation for future graduate study in professional counseling, health service psychology, couple and family therapy, community leadership, and related fields.

Requirements

The Bachelor of Arts with a major in education studies and human relations (ESHR) requires a minimum of 120 s.h., including at least 30 s.h. of work in the major. Students must have a cumulative g.p.a. of at least 2.00 in all college coursework and in all UI coursework. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 20]. A course used for the GE CLAS Core cannot also be used to count toward major requirements. All courses must be taken on a graded basis, unless a course is only offered as nongraded.

Students in their first year at the University of Iowa who have earned less than 30 s.h. are advised through the University's Academic Advising Center. Those with more than 30 s.h. are advised through the Academic Advising Office at the College of Education.

The major can be paired with one of the minors offered through the College of Education (educational psychology or human relations) or a major or minor from the College of Liberal Arts and Sciences. At most, only 3 s.h. may be counted toward another major or minor.

The major consists of a 15 s.h. core curriculum plus an additional 15 s.h. chosen from the list of approved elective courses in a student's declared program of study. Students may choose ESHR as their major; or one of the two subprograms within the major, either education studies or human relations. Students are required to earn a minimum of 18 s.h. in ESHR coursework at the University of Iowa.

The B.A. with a major in education studies and human relations requires the following coursework.

Core Courses

All students must complete the following.

Code	Title	Hours
All of these:		
EDTL:2015	Teaching as a Human Endeavor	3
EPLS:3000	Foundations of Education	3
PSQF:1075	Educational Psychology and Measurement	3
RCE:4199	Counseling for Related Professions	3

Diversity/Multiculturalism Course

All students must complete the following.

Code	Title	Hours
One of these:		
EPLS:1240	Finding Your Path in Higher Education	3
EPLS:4180	Human Relations for the Classroom Teacher	3
PSQF:3104	Multicultural Issues in Counseling and Psychology	3
RCE:4197	Citizenship in a Multicultural Society	3

Electives

For the remaining 15 s.h. required for the major, students choose from the following list of courses, depending on their choice of subprogram or the major without a subprogram, to build a multidisciplinary slate of skills that enhances their future careers or graduate work. While students may choose any of these courses to earn the major without a subprogram, those who pursue the education studies (ES) subprogram or the human relations (HR) subprogram select courses relevant to their area.

Concentration Areas

Whether students pursue ESHR or one of its subprograms, guidelines for informal concentration areas may provide a useful resource in choosing electives that are meaningful, useful, and a cohesive program of study. Guidelines for informal concentration areas are offered as a course selection aid to be used in consultation with an academic advisor and are not listed on a student's transcript or diploma. These informal concentration areas are meant to be fluid over time to best reflect trends and issues in the field of education and helping professions. Further, students may create their own concentration focus that will meet their own career trajectory. The guidelines for informal concentration areas are located on the College of Education website.

- Education Studies and Human Relations Electives [p. 1287]
- Education Studies Subprogram Electives [p. 1288]
- Human Relations Subprogram Electives [p. 1289]

Education Studies and Human Relations Electives

Students in the education studies and human relations program must select 15 s.h., including at least two different

College of Education areas (EALL, EDTL, EPLS, RCE, PSQF, SIED), from the following.

Code	Title	Hours
EDTL:2122	Creativity, Imagination, Play, and Human Development through the Arts	3
EDTL:3002	Technology in the Classroom	2-3
EDTL:3187	Early Literacy Instruction for Young Children	3
EDTL:3382	Language and Learning	2-3
EDTL:3393	Reading and Teaching Adolescent Literature	3
EDTL:3715	Experiential Teaching and Learning	3
EDTL:4093	Teaching and Learning for a Global Perspective	3
EDTL:4096	Topics in Teaching and Learning (depending on topic; consult advisor)	3
EDTL:4355	Approaches to Teaching Writing	3
EDTL:4630	Psychology of Music	2-3
EDTL:4900	Foundations of Special Education	3
EPLS:1240	Finding Your Path in Higher Education (f not used for diversity/multicultural course)	3
EPLS:2098	The Student Affairs Profession	3
EPLS:3240	Undergraduate Topics in Education (depending on topic; consult advisor)	3
EPLS:4180	Human Relations for the Classroom Teacher (f not used for diversity/multicultural course)	3
EPLS:4200	Diversity and Inclusion in Athletics	3
PSQF:2115	Introduction to Counseling Psychology	3
PSQF:2116	Applied Child and Adolescent Psychology	3
PSQF:3104	Multicultural Issues in Counseling and Psychology (f not used for diversity/multicultural course)	3
PSQF:3333	Special Topics in Psychological and Quantitative Foundations (depending on topic; consult advisor)	3
PSQF:3700	Introduction to Understanding Trauma and Resilience	3
PSQF:4106	Child Development	3
PSQF:4133	The Adolescent and Young Adult	3
PSQF:4134	Parent-Teacher Communication	1-3
PSQF:4136	Home/School/Community Partnerships	3

PSQF:4143	Introduction to Statistical Methods	3
PSQF:4145	Marriage and Family Interaction	3
PSQF:4162	Introduction to Couple and Family Therapy	3
PSQF:4760	Participatory Learning and Media: Creating, Remixing, Making, and Education	3
PSQF:4910	Theories of Family Development	3
RCE:2081	Making a Vocational-Educational Choice	2-3
RCE:4110	Psychology of Food and Mood	3
RCE:4130	Human Sexuality	3
RCE:4131	Loss, Death, and Bereavement	3
RCE:4173	Trauma Across the Lifespan	3
RCE:4176	Child Abuse: Assessment, Intervention, and Advocacy	3
RCE:4180	Topical Seminar for Helping Professionals (depending on topic; consult advisor)	3
RCE:4195	Ethics in Human Relations and Counseling	3
RCE:4197	Citizenship in a Multicultural Society (if not used for diversity/multicultural course)	3
SIED:4135	The Nature of Science	3-4

Education Studies Subprogram Electives

Students in the education studies subprogram must select 15 s.h., including at least two different College of Education areas (EALL, EDTL, EPLS, RCE, PSQF, SIED), from the following.

Code	Title	Hours
EDTL:2122	Creativity, Imagination, Play, and Human Development through the Arts	3
EDTL:3002	Technology in the Classroom	2-3
EDTL:3187	Early Literacy Instruction for Young Children	3
EDTL:3382	Language and Learning	2-3
EDTL:3393	Reading and Teaching Adolescent Literature	3
EDTL:3715	Experiential Teaching and Learning	3
EDTL:4093	Teaching and Learning for a Global Perspective	3
EDTL:4096	Topics in Teaching and Learning (depending on topic; consult advisor)	3
EDTL:4355	Approaches to Teaching Writing	3
EDTL:4630	Psychology of Music	2-3
EDTL:4900	Foundations of Special Education	3
EPLS:1240	Finding Your Path in Higher Education (if not taken as diversity/multicultural course)	3

EPLS:2098	The Student Affairs Profession	3	PSQF:3333	Special Topics in Psychological and Quantitative Foundations (depending on topic; consult advisor)	3
EPLS:3240	Undergraduate Topics in Education (depending on topic; consult advisor)	3	PSQF:3700	Introduction to Understanding Trauma and Resilience	3
EPLS:4180	Human Relations for the Classroom Teacher (if not taken as diversity/multicultural course)	3	PSQF:4106	Child Development	3
EPLS:4200	Diversity and Inclusion in Athletics	3	PSQF:4133	The Adolescent and Young Adult	3
PSQF:3104	Multicultural Issues in Counseling and Psychology (if not taken as diversity/multicultural course)	3	PSQF:4134	Parent-Teacher Communication	1-3
PSQF:3333	Special Topics in Psychological and Quantitative Foundations (depending on topic; consult advisor)	3	PSQF:4136	Home/School/Community Partnerships	3
PSQF:3700	Introduction to Understanding Trauma and Resilience	3	PSQF:4143	Introduction to Statistical Methods	3
PSQF:4106	Child Development	3	PSQF:4145	Marriage and Family Interaction	3
PSQF:4133	The Adolescent and Young Adult	3	PSQF:4162	Introduction to Couple and Family Therapy	3
PSQF:4143	Introduction to Statistical Methods	3	PSQF:4910	Theories of Family Development	3
PSQF:4760	Participatory Learning and Media: Creating, Remixing, Making, and Education	3	RCE:2081	Making a Vocational-Educational Choice	2-3
RCE:4197	Citizenship in a Multicultural Society (if not taken as diversity/multicultural course)	3	RCE:4110	Psychology of Food and Mood	3
SIED:4135	The Nature of Science	3-4	RCE:4130	Human Sexuality	3
			RCE:4131	Loss, Death, and Bereavement	3
			RCE:4173	Trauma Across the Lifespan	3
			RCE:4176	Child Abuse: Assessment, Intervention, and Advocacy	3
			RCE:4180	Topical Seminar for Helping Professionals (depending on topic; consult advisor)	3
			RCE:4195	Ethics in Human Relations and Counseling	3
			RCE:4197	Citizenship in a Multicultural Society (if not taken as diversity/multicultural course)	3

Human Relations Subprogram Electives

Students in the human relations subprogram must select 15 s.h., including at least two different College of Education areas (EALL, EDTL, EPLS, RCE, PSQF, SIED), from the following.

Code	Title	Hours
EDTL:4096	Topics in Teaching and Learning (if not taken as diversity/multicultural course)	3
EPLS:3240	Undergraduate Topics in Education (depending on topic; consult advisor)	3
EPLS:4180	Human Relations for the Classroom Teacher (if not taken as diversity/multicultural course)	3
PSQF:2115	Introduction to Counseling Psychology	3
PSQF:2116	Applied Child and Adolescent Psychology	3
PSQF:3104	Multicultural Issues in Counseling and Psychology (if not taken as diversity/multicultural course)	3

Academic Standards and Probation

Students are expected to meet academic standards set by the college and to demonstrate reasonable progress toward a degree. If they do not meet all grade-point average conditions, then students are placed on academic probation. Students usually are allowed only one session to return to good academic standing. They are required to meet with an academic advisor. Students on academic probation who withdraw registration after the deadline for dropping courses may be dismissed.

Admission

Direct Admissions Policy

The College of Education offers direct admission into the education studies and human relations major. First-year students who present an American College Test (ACT) composite score of 21 or higher and a final high school g.p.a.

of at least 3.00 are eligible for the direct admission track. Interested students who do not meet the criteria for direct admission are encouraged to consider regular admission.

Regular Admissions Policy

Students who have completed a minimum of 12 s.h. of graded coursework at the University of Iowa or another accredited institution of higher education, including community colleges, and who have a g.p.a. of at least 2.50 are eligible for regular admission.

Applied Behavior Analysis

Chair, Department of Teaching and Learning

- Lia M. Plakans

Coordinator, Applied Behavior Analysis

- Seth A. King (Teaching and Learning)

Graduate certificate: applied behavior analysis

Faculty: <https://education.uiowa.edu/directories>

Website: <https://education.uiowa.edu/teach>

The purpose of the Graduate Certificate in Applied Behavior Analysis (ABA) is to provide professionals who have a background in education, psychology, and related services with expertise in behavior intervention and intensive educational interventions. Students who complete the program are eligible for national certification as board-certified behavior analysts. ABA is a growing service sector with opportunities for employment in schools, universities, and independent clinics.

The Certificate in Applied Behavior Analysis is administered by the Department of Teaching and Learning [p. 1351] and is granted by the Graduate College.

Programs

Graduate Program of Study Certificate

- Certificate in Applied Behavior Analysis [p. 1292]

Applied Behavior Analysis, Graduate Certificate

Requirements

The graduate Certificate in Applied Behavior Analysis requires 21 s.h. of graduate credit and is offered with hybrid and conventional courses. Students must maintain a g.p.a. of at least 2.50 in work for the certificate. They must earn at least a grade of C in each course required for the certificate. Courses may not be taken pass/nonpass. The certificate program is open to students enrolled in University of Iowa graduate degree programs and to individuals who are enrolled in the Graduate College as nondegree students.

The certificate program develops skills in behavioral intervention and intensive instruction. The course sequence contributes to eligibility for certification as a board-certified behavior analyst (BCBA). In addition to the course sequence offered through the certification program, obtaining the BCBA requires completion of a supervised practicum experience and successful completion of the behavior certification exam offered through the Behavior Analyst Certification Board. For additional details regarding certification, visit the Behavior Analyst Certification Board website or contact the applied behavior analysis certificate coordinator.

The Certificate in Applied Behavior Analysis requires the following coursework.

Code	Title	Hours
All of these:		
EDTL:4950	Behavioral and Social Interventions	3
EDTL:4975	Explicit Instruction	3
EDTL:5961	Foundation of Applied Behavior Analysis	3
EDTL:5963	Ethics and Professional Conduct of Behavior Analysts	3
EDTL:5966	Advanced Topics in Applied Behavior Analysis	3
EDTL:7953	Seminar: Single Subject Design Research	3
PEDS:7264	Clinical Applications of Applied Behavior Analysis	3

For more information, visit Certificate in Applied Behavior Analysis on the College of Education website.

Educational Policy and Leadership Studies

Chair

- David B. Bills

Program Coordinator, Educational Leadership

- Steven M. Triplett

Program Coordinator, Higher Education and Student Affairs

- Jodi Linley

Program Coordinator, Schools, Culture, and Society

- Katrina M. Sanders

Program Coordinator, Ed.D. Program

- Megan A. McVancel

Graduate degrees: M.A. in educational policy and leadership studies; Ed.S. in educational policy and leadership studies; Ed.D. in educational policy and leadership studies; Ph.D. in educational policy and leadership studies

Faculty: <https://education.uiowa.edu/directories>

Website: <https://education.uiowa.edu/epls>

The Department of Educational Policy and Leadership Studies offers academic programs that prepare administrators, professional personnel, teachers, and researchers in the fields of educational leadership, higher education and student affairs, and schools, culture, and society. The department also offers combined programs with other College of Education departments and with other University of Iowa colleges.

The department offers graduate degree programs in several major areas within educational policy and leadership studies:

educational leadership (offered in the M.A., Ed.S., and Ph.D.);

higher education (offered in the Ed.D.);

higher education and student affairs (offered in the M.A., Ed.S., and Ph.D.);

PK-12 administration (offered in the Ed.D.);

school curriculum and assessment policy (offered in the Ed.S.); and

schools, culture, and society (offered in the M.A. and Ph.D.).

The areas are described below under "Graduate Study Areas," followed by information about each degree program.

Applicants for admission to graduate degree programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Graduate Study Areas

Educational Leadership

Study in educational leadership prepares individuals for leadership positions. In addition to graduate degree programs, the area includes principal licensure and superintendent

endorsement. See the Master of Arts [p. 1300], Specialist in Education [p. 1304], and the Doctor of Philosophy [p. 1309] in this section of the Catalog.

Licensure

To be eligible for recommendation by the University of Iowa for licensure in Iowa as a principal or superintendent/area education agency administrator, students must complete the appropriate program. The specific requirements for each program are available from the Department of Educational Policy and Leadership Studies and the Office of Student Services. Students who hold an M.A. must satisfy all core requirements and must complete at the University of Iowa the minimum semester-hour program for each licensure level they seek. Because each administrative license has specific requirements, candidates are required to plan their programs with their advisors' approval.

Superintendent Endorsement

The superintendent endorsement curriculum is designed to prepare individuals for licensure as a school superintendent (pre-K-12) as well as for other school district leadership positions; for the chief administrator position in Iowa's area education agencies (AEA) as well as other AEA leadership positions; and for leadership positions in state or federal departments of education and related agencies. The superintendent endorsement requires a total of 30 s.h. of credit.

Students in the endorsement program must have an Iowa administrator license. They obtain the superintendent endorsement (State of Iowa endorsement 171) upon completing the required Ed.S. coursework and at least three years of principal experience.

Higher Education

The higher education program prepares educational leaders to be scholar practitioners who apply the knowledge, skills, and inquiry strategies to solve significant problems related to educational policies and practices in higher education. See the Doctor of Education [p. 1307] in this section of the Catalog.

Higher Education and Student Affairs

Advanced study in higher education and student affairs draws upon diverse perspectives from varied disciplines and professional fields to analyze critical issues and policies and their effects on students, faculty, administrators, staff, and other members of the higher education community. It also explores the complex interactive relationships among institutions of higher education, the external environment, and society at large.

The higher education and student affairs (HESA) program coalesces around a shared sense of responsibility to produce research and spark innovative thinking that addresses the contemporary challenges and persistent inequities permeating higher education. HESA offers educational leaders, scholars, and practitioners comprehensive expertise built from a range of intellectual traditions. Faculty have diverse philosophies, methods, disciplinary training, and personal backgrounds, ensuring students gain a deep understanding and interconnected view of the field.

Graduate degree programs in higher education and student affairs prepare professionals and scholar practitioners to serve as administrators, researchers, educators, and analysts in institutions of higher and postsecondary education and in related public and private agencies. The programs provide opportunities for concentrated study in student affairs

administration; higher education policy and leadership; teaching, learning, and curriculum; and diversity, equity, and foundations of higher education. See the Master of Arts [p. 1300], Specialist in Education [p. 1304], and the Doctor of Philosophy [p. 1309] in this section of the Catalog.

PK-12 Administration

The PK-12 administration program prepares educational leaders to be scholar practitioners who apply the knowledge, skills, and inquiry strategies to solve significant problems related to educational policies and practices in PK-12 educational settings. In addition to the graduate degree, individuals may complete requirements for superintendent endorsement. See the Doctor of Education, Ed.D. [p. 1307] in this section of the Catalog.

School Curriculum and Assessment Policy

The interdisciplinary program trains graduate students to become school leaders who know how to use assessment information for accountability purposes and curriculum evaluation. See the Specialist in Education [p. 1304] in this section of the Catalog.

Schools, Culture, and Society

Schools, culture, and society is an interdisciplinary area that enhances students' ability to analyze the influence of social and historical factors that frame contemporary issues in the formal social enterprise of education. See the Master of Arts [p. 1302] and the Doctor of Philosophy [p. 1311] in this section of the Catalog.

Programs

Graduate Programs of Study

Majors

- Master of Arts in Educational Policy and Leadership Studies [p. 1300]
- Specialist in Education in Educational Policy and Leadership Studies [p. 1304]
- Doctor of Education in Educational Policy and Leadership Studies [p. 1307]
- Doctor of Philosophy in Educational Policy and Leadership Studies [p. 1309]

Courses

Educational Policy and Leadership Studies Courses

EPLS:1029 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

EPLS:1240 Finding Your Path in Higher Education 3 s.h.

Overview of the liberal arts experience in higher education; theories of student success, socialization, and development; history of American liberal education; issues of diversity, equity, and social justice including privileged and marginalized identities, structural oppression, racism, sexism, ableism, and genderism; organizational structures of higher education. GE: Diversity and Inclusion.

EPLS:2098 The Student Affairs Profession 3 s.h.

Introduction to field of student affairs in context of higher education; focus on foundations of profession, including a brief history of field, professional associations, institutional differences, professional and ethical standards, functional areas in higher education, student learning and developmental theory, overview of graduate preparation, and current topics.

EPLS:3000 Foundations of Education 3 s.h.

Overview of American education, preschool through secondary; aims, history, philosophy of education; professional ethics, legal responsibilities; school curriculum, organization, finance, school law, political and social issues.

EPLS:3240 Undergraduate Topics in Education arr.

Seminar for extensive study of an education topic or issue.

EPLS:4081 ePortfolio Design and Production 1-2 s.h.

Experience producing an ePortfolio and uploading it to the internet; practical experience using digital tools, content and design related to ePortfolio production; experience using a web browser, accessing the internet, and using a digital camera or scanner. Requirements: able to perform basic computer functions and use a World Wide Web browser. Same as EALL:4081, EDTL:4081, PSQF:4081, RCE:4081.

EPLS:4110 Administration and Policy in Gifted Education 2 s.h.

Policy, administrative, evaluation issues in developing and maintaining gifted programs in a school setting; participants develop gifted program and policies for a school; for school executives and coordinators of gifted programs.

EPLS:4111 Evaluation of Gifted Programs 1 s.h.

Fundamentals of program evaluation essential for exemplary gifted programs.

EPLS:4113 Staff Development for Gifted Programs 1 s.h.

Planning, content, and delivery of staff development regarding gifted students and their needs.

EPLS:4150 Leadership and Public Service I 3 s.h.

Preparation for providing public service to a local community; leadership skills for effective mentoring of children in grades 6-10.

EPLS:4151 Leadership and Public Service II 2 s.h.

Preparation to provide leadership and public service to a local community agency; being a leader and a public servant in the context of societal oppressions such as racism, sexism, able-bodiedism; part of the human relations minor. Prerequisites: EPLS:4150.

EPLS:4180 Human Relations for the Classroom Teacher 3 s.h.

Influence of social factors such as discrimination, diversity, equity, racism, sexism, and ethnic and socioeconomic pluralism on American schools and classrooms; for teacher education candidates. GE: Values and Culture.

EPLS:4200 Diversity and Inclusion in Athletics 3 s.h.

Diversity and inclusion as major issues for coaches, sports managers, physical activity professionals, and athletic administration staff in their workplaces; define, discuss, and analyze effects of diversity and inclusion in the athletic organizational environment; experience of underrepresented groups in sport settings, covering differences of religion, race, ethnic origins, gender, sex, ability, appearance, and age; understanding power differences, based on diversity within an organizational environment, that help future leaders implement successful practices inclusive of all persons. Requirements: undergraduate standing and enrollment in interscholastic athletics/activities director certificate program.

EPLS:4240 Perspectives on Minority Education in the United States arr.

In-depth focus on one specific minoritized group, centering on the nature of their educational experience in the U.S.; may cover historical, cultural, legal, and sociological perspectives that have contributed to access, inclusion, policies, and legal realities; content may include PK-12, private, religious, and higher education settings.

EPLS:5090 Instructional Coaching for Teaching Excellence 3 s.h.

Dynamics of coaching to improve K-12 classroom teaching; appropriate for aspiring teacher leaders. Requirements: admission to the online M.A. in teaching program.

EPLS:5100 Issues and Policies in Higher Education 3 s.h.

Development of the idea of a university; selected functions, issues, policies of American higher education.

EPLS:5102 History of American Education 3 s.h.

Purposes of public education, diversity, and control of schooling from a historical perspective; emphasis on conflicting interpretations of pivotal events and educational movements; connections between educational policies and larger historical developments.

EPLS:5123 History of Ethnic/Minority Education 2-3 s.h.

Educational histories of American ethnic and minority groups; comprehensive understanding of American educational history, context for contemporary educational policy discussions.

EPLS:5126 Twentieth-Century Educational Movements 2-3 s.h.

Current educational policy debates concerning diversity and equity, historical roots of these policies; historical context for 20th-century equal education opportunity movements.

EPLS:5130 Sociology of Education 3 s.h.

Effects of school and school organization on educational outcomes; course-taking patterns and tracking, desegregation, differences in school sector; focus on entire span of student's academic career; examination of school and organizational effects at the primary, secondary, and postsecondary levels of education. Same as SOC:5130.

EPLS:5131 Race, Class, and Gender Inequalities in Education 3 s.h.

Role of ascribed characteristics (e.g., race, class, gender) on educational opportunities and outcomes; achievement gaps, school desegregation, social and cultural capital, peer influence, family attributes, neighborhood influence, influence of significant others, course-taking patterns, and educational destinations. Same as SOC:5165.

EPLS:5134 Education and the World of Work 2-3 s.h.

Relationship between education and work in individual and organizational behavior, and between educational and economic systems; economics, psychology, sociology, education.

EPLS:5142 Sociology of Higher Education 3 s.h.

Sociological approach to study of higher education; issues of inequality and stratification in higher education; focus on relationship between higher education and larger economic and demographic processes; college access, college destinations, attainment, and returns to a college degree. Same as SOC:5680.

EPLS:5154 Education, Race, and Ethnicity 2-3 s.h.

Role of education in ethnic and racial groups in contemporary and/or historical context.

EPLS:5156 Philosophies of Education 2,3,5 s.h.

Principal educational philosophers and philosophies that have influenced Western education; emphasis on how philosophical ideas and conflicts have shaped the educational scene.

EPLS:5157 Ethics in Education 3 s.h.

Major theories of the nature of ethical action and of value judgment; theoretical accounts related to the practical decision making contexts of teaching.

EPLS:5165 Introduction to Program and Project Evaluation 3 s.h.

Skills and knowledge required for conducting evaluations of products, projects, and programs; recent scholarship on evaluation and project management. Same as PSQF:5165.

EPLS:5210 Education and Social Change 2-3 s.h.

Role of educational institutions, in connection with political and economic structures, in the process of social change; illumination of theories of social change through case studies of educational systems in both less-developed and industrialized nations. Same as SOC:5810.

EPLS:5240 Topics in Education arr.

Seminar for intensive study of one problem, issue, or work field.

EPLS:5245 The American Professoriate 3 s.h.

Research on college and university faculty members; perspectives on faculty careers, values, beliefs, role in shared governance; tenure process and policies; issues unique to faculty members of color and women faculty members.

EPLS:5247 Multiculturalism in Higher Education 3 s.h.

Theory and application of multicultural competency in higher education.

EPLS:5250 Introduction to Higher Education and Student Affairs 3 s.h.

Foundations of student affairs work; overview of institutional cultures, legal issues, ethical principles, standards of practice in student affairs.

EPLS:5251 College Students and Their Environments 3 s.h.

Characteristics of college students and issues they face; students' institutional, social, cultural environments; impact of environments on student learning, development.

EPLS:5252 Administration of Higher Education and Student Affairs 3 s.h.

Administrative structures and processes in higher education settings. Requirements: higher education and student affairs major.

- EPLS:5253 Research, Assessment, and Evaluation in Higher Education** 3 s.h.
Theories, practices, and issues relevant to assessment of student outcomes and institutional effectiveness in higher education; basic overview of research, assessment, and evaluation; elements of assessment design, including methods for data collection and analysis; relevant ethical and political dilemmas; practical assessment activities. Requirements: M.A. standing in higher education and student affairs program.
- EPLS:5278 Helping Skills in Student Affairs Work** 3 s.h.
Development of ability to identify, understand, and intentionally apply the active attending and influencing skills; readings and class presentations.
- EPLS:6201 Foundations of School Administration** 3 s.h.
Organization and administration of American public education; principles and concepts of leadership and organizations; socioeconomic, political, and professional factors relating to education and school administration.
- EPLS:6206 Research Process and Design** 3 s.h.
Research process, with emphasis on fundamentals of experimental design, internal and external validity, correlational designs, and statistical inference.
- EPLS:6209 Survey Research and Design** 3 s.h.
Survey design and implementation; writing and evaluation of survey questions; error in survey research; techniques to reduce error; sampling; postcollection processing of survey data. Prerequisites: EPLS:6206 or PSQF:4143. Same as PSQF:6209.
- EPLS:6216 Finance in Higher Education** 3 s.h.
Theory, research, policy, and practice related to public and private funding of higher and postsecondary education.
- EPLS:6217 Theory and Practice of Leadership** 2-3 s.h.
Theory-based literature and critiques of leadership as applied to educational institutions.
- EPLS:6218 The Law and Higher Education** 3 s.h.
The role of law as it affects postsecondary institutions; analysis of case law in specific areas of concern to administrators, faculty, staff, students.
- EPLS:6220 History of Higher Education** 3 s.h.
History of postsecondary education in the United States; emphasis on conflicting interpretations of pivotal developments; consideration of access, curriculum, student life, academic freedom, role of universities in society, and balance of teaching, research and service from a historical perspective.
- EPLS:6221 The College Curriculum** 3 s.h.
Issues, principles, policies, and practices in college curriculum development; diverse philosophical, historical, cultural, social, psychological, political foundations of contemporary college curricula; perspectives on and models of college curriculum, related processes of teaching and learning; principles and practices that guide design and change of higher education curriculum.
- EPLS:6222 Introduction to Educational Policy** 3 s.h.
Theoretical and technical approaches to analysis and evaluation of contemporary public policies.
- EPLS:6224 Organizational Theory and Administrative Behavior** 3 s.h.
Theories and concepts of organizational behavior applied in structural, organizational, administrative contexts of American education.
- EPLS:6225 Higher Education Policy** 3 s.h.
Overview of state level higher education structures and policies; research on state level policy processes.
- EPLS:6226 Educational Management** 2-3 s.h.
Literature and research on management; emphasis on American education.
- EPLS:6228 K-12 Education Finance and Policy** 3 s.h.
Emphasis on policy funding and finance for administration and management in education and other settings.
- EPLS:6236 Administration of Students with Special Needs** 3 s.h.
Foundation for and skill practice in tasks performed by directors of special education and others administering to needs of special education students, and economically and socially deprived students; for prospective school administrative personnel. Same as EDTL:6936.
- EPLS:6237 History of the Teaching Profession** 3 s.h.
History of public school teaching, and teachers' problematic professional status; teacher education in the 19th and 20th centuries; formation and activities of teacher unions in the 20th century.
- EPLS:6238 Gender and Education in Historical Perspective** 3 s.h.
Gender in context of history of education in the United States; coeducation in common schools, academies, and high schools; women's arrival and experiences as college students; masculinity in higher education; single-sex versus coeducation; emphasis on conflicting historical interpretations. Same as GWSS:6238.
- EPLS:6239 LGBTQ History in Education** 3 s.h.
Lesbian, gay, bisexual, transgender, and questioning (LGBTQ) issues in context of history of education in United States; LGBTQ teachers, students, and studies in K-12 and higher education; emphasis on differences in historical interpretations. Same as GWSS:6239.
- EPLS:6242 Research for Effective School Leaders** 3 s.h.
Fundamental language of contemporary research; identification and application of basic research components to contemporary educational leadership problems; applicability of research toward effective decision making.
- EPLS:6260 Contemporary Management Strategies for the Pre-K-12 Principal** 3 s.h.
Leadership skills and management techniques for daily organization and operation of schools; emphasis on climate, communication, group processes, conflict resolution, curriculum management.
- EPLS:6265 Standards-Based Education and Accountability** 3 s.h.
Standards-based education; academic content standards, K-12 articulation, alignment studies, use of standardized test results to evaluate academic programs.
- EPLS:6266 Program Evaluation** 3 s.h.
Theoretical issues and considerations in evaluation of educational and social programs; evaluation design, methodology; metaevaluation; evaluation utilization. Same as PSQF:6265.
- EPLS:6270 Policy and Politics** 3 s.h.
Current issues from academic journals, states, think tanks, consortia.

- EPLS:6273 College Students** 3 s.h.
Overview of theories, research, practices, and issues relevant to understanding students in institutions of higher education. Requirements: Ph.D. standing in Higher Education and Student Affairs program.
- EPLS:6275 Diversity and Equity in Higher Education** 3 s.h.
Historical, contemporary, theoretical, and empirical aspects of diversity and equity in higher education; unique experiences of members of historically under-represented groups; challenges of transforming institutions to make them more responsive to the experiences of diverse groups.
- EPLS:6277 Readings in Diversity and Equity in Higher Education** 3 s.h.
Historical, contemporary, theoretical, and empirical aspects of diversity and equity in higher education; unique experiences of members of historically underrepresented groups; focus on compelling literature in the field.
- EPLS:6285 School and Community Relationships** 3 s.h.
Community analysis, politics and education, power groups and influences, school issues and public responses, public relations strategies.
- EPLS:6290 Master's Project** arr.
Research for the nonthesis program; topic approved by advisor.
- EPLS:6293 Individualized Instruction** arr.
Readings, special projects, and/or studies that reflect joint instructor/student interest.
- EPLS:6298 Legal Aspects of School Personnel** 3 s.h.
Teacher and student: liability, negotiations, rights, privileges, responsibilities of school personnel; principles of law derived from court decisions; constitutional and statutory provisions; for teachers and administrators.
- EPLS:6301 Professional Seminar I** 1 s.h.
Orientation to field; writing and academic support.
- EPLS:6302 Professional Seminar in Student Affairs II** 1 s.h.
Working with groups in higher education.
- EPLS:6303 Professional Seminar in Student Affairs III** 1 s.h.
Consulting, training, and curriculum development in student affairs.
- EPLS:6304 Professional Seminar in Student Affairs IV** 1 s.h.
Professional identity, job search support.
- EPLS:6305 Higher Education and Student Affairs Capstone** 3 s.h.
Completion of an applied project that synthesizes the full M.A. curriculum.
- EPLS:6307 Professional Seminar for Ed.D. Students: Orientation to the Ed.D.** 1 s.h.
Orientation to the educational doctorate; how to approach courses and professional work as a scholar-practitioner. Requirements: admission to the Ed.D. program in educational policy and leadership studies.
- EPLS:6311 Seminar: Research Topic in Education** 1-3 s.h.
Topic submitted by students, faculty.
- EPLS:6315 Orientation to the Superintendency** 3 s.h.
Leadership theory and research of the superintendent's role of increasing student achievement; personal goals for communication; ethics, integrity, flexibility, reflective, and collaborative leadership; expectations of the superintendent by the board of directors; defining one's role; developing an entry plan; dealing with social/emotional isolation of superintendency; and influences in the larger political, social, economic, legal, and cultural context.
- EPLS:6317 Operational Leadership and Management** 1 s.h.
Managing fiscal and physical resources responsibly, efficiently, and effectively; effective communication of school operations; leadership and management of nutrition program, transportation program, facilities, construction; board policy, legal issues; state reporting, ethical decision-making; relationship building, problem solving amidst barriers and various stakeholder groups.
- EPLS:6319 Human Resources Leadership** 2 s.h.
Leadership theory and research of the superintendent's role of aligning human resources practice and increasing student achievement; employment law; contract negotiations process/collective bargaining; contract maintenance; recruiting, selecting, developing, and retaining employees; working with labor unions and Public Employee Relations Board; special education law; Evaluator 2 Training. Requirements: Evaluator 1 Training.
- EPLS:6321 Social Advocacy Summit** 1 s.h.
Summit format; challenges and opportunities in Iowa's K-12 schools with changing demographics; opportunity for K-12 school districts and higher education institutions to engage in conversation on how to meet the needs of students and local school districts.
- EPLS:6323 School Finance** 2 s.h.
Manage fiscal and physical resources; communicate effectively with internal and external audiences regarding school operations; comply with state and federal mandates and local board policies; align educational programs, plans, actions, and resources with the district vision and goals.
- EPLS:6325 Organizational and Educational Leadership** 2 s.h.
Facilitate connections of students and families to health and social services that support a focus on learning as a district level leader in a school district; collaboratively establish a culture that welcomes and honors families and community and seeks ways to engage them in students learning; AEA structure, compliance and regulatory functions including special education.
- EPLS:6329 Legislative Summit** 1 s.h.
Collaborate with families and community members, respond to diverse community interests and needs, and mobilize community resources as a district level leader in a school district; work with legislators, build advocacy groups in a community, engage stakeholders, how to lobby legislators and meet with local senate and house representatives to participate in lobbying.
- EPLS:6332 College Student Psychosocial and Identity Development** 3 s.h.
Theoretical models of psychosocial and identity development in college students; applications to student affairs work.

- EPLS:6333 Practicum in Higher Education and Student Affairs** **arr.**
Small-scale research projects; supervised experience in planning, design, management, analysis, reporting of research activities; assignments to current and personal faculty research projects; student assumes major responsibility.
- EPLS:6334 College Student Learning, Cognitive, and Moral Development** **3 s.h.**
Learning and development of college students; theoretical models of learning, cognitive development, moral development; applications to student affairs work.
- EPLS:6336 Impact of College on Students** **3 s.h.**
Introduction to literature; career and economic returns, educational attainment and persistence, values and attitudes, learning and cognitive development, college student theory, assessment and methodological issues of studying college outcomes. Recommendations: introductory graduate-level research design course.
- EPLS:6352 Action Research in Educational Settings** **3 s.h.**
Theory and practice of action research design and methodology; understanding of positionality and bias in action research, how to assess strengths and weaknesses of action research studies; completion of an action research cycle.
- EPLS:6370 Quantitative Methods for Policy Analysis** **3 s.h.**
Methodological strategies for quantitative research; analysis of secondary data to investigate educational issues and policies; recoding variables, summation scaling and factor analysis, missing data, sample design and survey estimation, model building; implementation of linear and binary regression, regression diagnostics; hands-on experience conducting statistical analysis of social data. Prerequisites: PSQF:4143 and PSQF:6243.
- EPLS:6381 Analysis and Appraisal of Curriculum** **3 s.h.**
Comprehensive investigation of systematic procedures and resources for identifying and evaluating essential features and constituent elements of a given school district's curricular offering; state and federal requirements of the curricular program; for persons in administration, curriculum, and supervision programs or positions.
- EPLS:6383 Supervision and Evaluation** **3 s.h.**
Data collection and management skills; data-driven leadership; coaching and feedback techniques; teacher quality legislation; research and best practice regarding teacher evaluation, supervision; teaching standards.
- EPLS:6400 Early Childhood Leadership Clinical** **3 s.h.**
Classroom instruction and supervised experience with problems in early childhood educational administration; organization, planning, evaluation, decision making.
- EPLS:6401 Elementary Leadership Clinical** **3 s.h.**
Supervised experience working with problems in educational administration, including organization, planning, evaluation, decision making; individual project in a school setting.
- EPLS:6402 Secondary Leadership Clinical** **3 s.h.**
Supervised experience working with problems in educational administration, including organization, planning, evaluation, decision making; individual project in a school setting.
- EPLS:6403 Special Education Leadership Clinical** **3 s.h.**
Supervised experience working with problems in educational administration, including organization, planning, evaluation, decision making; individual project in a school setting.
- EPLS:6404 Central Administration Clinical** **3 s.h.**
Supervised experience working with problems in educational administration, including organization, planning, evaluation, decision making; individual project in a school setting.
- EPLS:6405 Superintendent Entry Plan and Portfolio Development** **1 s.h.**
Creating an effective entry plan, and where applicable, a professional portfolio as part of the series of clinical expectations for the superintendent preparation program; development of plan helps to create prior mutual expectation among the superintendent, board, staff, and community. Requirements: in final semester of superintendent endorsement program.
- EPLS:6415 Orientation to the Superintendency: Clinical** **2 s.h.**
Clinical experience aligned with course topics and assignments in a K-12 school or other educational organization; development of a clinical plan with the guidance of a university professor and local school district mentor based on course requirements, career goals, and interests.
- EPLS:6417 Operational Leadership Clinical** **1 s.h.**
Clinical experience aligned with course topics and assignments in the operational leadership course; completion of clinical in a K-12 school or other appropriate educational organization; development of a clinical plan based on course requirements, career goals, and student interests with guidance from a university professor and local school district mentor.
- EPLS:6419 Human Resources Leadership Clinical** **2 s.h.**
Clinical experience aligned with course topics and assignments in the human resources leadership course; completion of clinical in a K-12 school or other appropriate educational organization; development of a clinical plan based on course requirements, career goals, and student interests with guidance from a university professor and local school district mentor.
- EPLS:6425 Organizational and Educational Leadership Clinical** **1 s.h.**
Clinical experience aligned with course topics and assignments in the organizational and educational leadership course; completion of clinical in a K-12 school or other appropriate educational organization; development of a clinical plan based on course requirements, career goals, and student interests with guidance from a university professor and local school district mentor.
- EPLS:7373 Qualitative Research Design and Methods** **3 s.h.**
Theory and practice of qualitative research design and methodology; exploratory field experience in collection and analysis of data; individual and focus group interviews, participant observation. Requirements: Ph.D. standing.
- EPLS:7380 Practicum in College Teaching** **arr.**
Supervised college teaching experience in courses related to major academic areas; collaboration with faculty course instructors.
- EPLS:7385 Teaching and Learning in Higher Education** **3 s.h.**
Current theoretical and empirical literature on teaching and learning in higher education; focus on development of effective teaching practice. Same as EDTL:7385, GRAD:7385, PSQF:7385, RCE:7385.

EPLS:7392 Mixed Methods Research 3 s.h.

Introduction to mixed methods research in education; knowledge and skills necessary to conduct mixed methods study; history and language of mixed methods research; identification and processing arguments for and against mixed methods research; extend understanding of research in education; how to assess strengths and weaknesses of published mixed methods studies; investigation of one or more mixed methods research designs in depth; application of mixed methods research design to a research proposal. Prerequisites: EALL:5150. Requirements: formal introduction to quantitative and qualitative research methods, and familiarity with basic steps of research process. Recommendations: direct experience conducting research studies not required. Same as EDTL:7410.

EPLS:7395 Educational Specialist Research arr.

Individual instruction in the design, research, and writing of a research project of significant quality for upper-level graduate work.

EPLS:7432 Multicultural Initiatives 3 s.h.

Impact of culture, race, ethnicity, and intersection of identity in higher education, student affairs, and community agency settings; knowledge, skills, and competencies needed by teachers, student affairs professionals, social workers, counselors, and educational administrators to facilitate individual empowerment through relationships; focus on different ways to design multicultural initiatives to various professional work settings to promote diversity. Requirements: Ph.D. standing or advanced-level M.A. standing. Recommendations: introductory course on issues of race, culture, gender and/or any course on sociopolitical issues or structural oppression strongly recommended.

EPLS:7433 Current Issues in Higher Education and Student Affairs 3 s.h.

Current issues related to higher education; opportunity to clarify perspectives; review of literature in a particular area of interest; readings, class discussions, independent research, consultations with professionals in the field, student presentations. Requirements: higher education and student affairs Ph.D. standing.

EPLS:7444 Advanced Practicum in Student Affairs arr.

Supervised work experience in student affairs settings.

EPLS:7493 Ph.D. Thesis arr.

Supervision of research, design, and writing of Ph.D. thesis; individual instruction.

Educational Policy and Leadership Studies, M.A.

Educational Leadership

The Master of Arts program in educational policy and leadership studies with an educational leadership subprogram requires a minimum of 36 s.h. of graduate credit. Students must earn a cumulative g.p.a. of at least 3.00 in major coursework. The program prepares individuals for appointments as school principals and for positions in area education agencies and state departments of education. Upon completion of this degree, students will have completed the requirements to earn a master's degree and to obtain pre-K-12 principal and pre-K-12 supervisor of special education endorsement (State of Iowa endorsement 189). In order to obtain the State of Iowa endorsement, an individual must have at least three years of teaching at the pre-K-12 level.

With the aid of an advisor, each M.A. student prepares a plan of study that includes the following core requirements.

Core Requirements

Code	Title	Hours
EPLS:6201	Foundations of School Administration	3
EPLS:6236	Administration of Students with Special Needs	3
EPLS:6242	Research for Effective School Leaders	3
EPLS:6260	Contemporary Management Strategies for the Pre-K-12 Principal	3
EPLS:6285	School and Community Relationships	3
EPLS:6298	Legal Aspects of School Personnel	3
EPLS:6381	Analysis and Appraisal of Curriculum	3
EPLS:6383	Supervision and Evaluation	3

For Iowa licensure as a principal, students must hold an Iowa teacher license, have taught for three years, and meet the human relations requirement of the State of Iowa. Students must complete the core requirements listed above and the following required clinical courses.

Clinical Courses

Code	Title	Hours
EPLS:6400	Early Childhood Leadership Clinical	3
EPLS:6401	Elementary Leadership Clinical	3
EPLS:6402	Secondary Leadership Clinical	3
EPLS:6403	Special Education Leadership Clinical	3

Students earning an M.A. without principal licensure are not required to complete the clinical courses. Instead, they complete a series of electives (12 s.h.) approved by their

advisors. For more detailed information, see the Educational Leadership web page.

Comprehensive Examination

Students in the M.A. program with licensure or the M.A. program without licensure are required to take comprehensive examinations at the end of their program of study. The comprehensive examination is in the format of a mock interview for a building principal or similar leadership position. The faculty provides the candidate with a scenario on which they are expected to prepare a presentation to the educational leadership faculty who acts as the hiring team. The presentation is followed by questioning and feedback. Students must be registered in the Graduate College during their comprehensive examination semester if they plan to graduate at the end of the semester.

Admission

Applicants to the M.A. program in educational leadership must meet the admission requirements of the Graduate College. Admission decisions are made through a faculty review process. Factors considered include recommendations, grade-point average, and a statement of purpose from the candidate focused on leadership, time management, social justice, and meeting the needs of all students. The review team also considers additional evidence of academic ability and professional promise.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). For specific score requirements, see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Higher Education and Student Affairs

The Master of Arts program in educational policy and leadership studies with a higher education and student affairs subprogram requires a minimum of 40 s.h. of graduate credit. Students must earn a cumulative g.p.a. of at least 3.00 in major coursework. The program prepares individuals for careers in higher education, including academic administration, policy analysis, first-year programs, student activities and leadership, enrollment management, program evaluation, multicultural affairs, academic and career advising, residence life, and international student services.

The higher education and student affairs (HESA) program curriculum consists of coursework in postsecondary administration, college students and their environments, college student development, and current and emerging issues in higher education, as well as in research and assessment. The curriculum integrates theory and practice and is designed to be completed in two years of full-time study or equivalent part-time study.

The curriculum includes the HESA core, a supervised practice, and integrative experiences. Elective coursework is subject to advisor approval. An internship at an approved site is required for full admission to the program.

The M.A. in educational policy and leadership studies with a higher education and student affairs subprogram requires the following work.

Requirements

Common Core

Code	Title	Hours
All of these:		
EPLS:5100	Issues and Policies in Higher Education	3
EPLS:5247	Multiculturalism in Higher Education	3
EPLS:5250	Introduction to Higher Education and Student Affairs	3
EPLS:5251	College Students and Their Environments	3
EPLS:5252	Administration of Higher Education and Student Affairs	3
EPLS:5253	Research, Assessment, and Evaluation in Higher Education	3
EPLS:6332	College Student Psychosocial and Identity Development	3
EPLS:6334	College Student Learning, Cognitive, and Moral Development	3

Integrative Experiences

Code	Title	Hours
All of these:		
EPLS:6301	Professional Seminar I	1
EPLS:6305	Higher Education and Student Affairs Capstone	3
EPLS:6333	Practicum in Higher Education and Student Affairs (required once; students may enroll a maximum of 3 times; those with appropriate professional experiences may, with faculty approval, waive this requirement)	3

Electives

Students choose elective coursework in consultation with their advisor.

Code	Title	Hours
9-12 s.h. from these:		
EPLS:5278	Helping Skills in Student Affairs Work	3
EPLS:6206	Research Process and Design	3

EPLS:7380	Practicum in College Teaching (may be taken once up to 3 s.h.)	3
EPLS:7385	Teaching and Learning in Higher Education	3
EPLS:7432	Multicultural Initiatives	3

Courses from other departments also may be approved; students should consult their advisor.

Admission

Applicants must meet the admission requirements of the Graduate College. Admission is based on grade-point average and promise for professional growth. Transcripts, a résumé or curriculum vita, three letters of recommendation, and a personal statement are required. The Graduate Record Examination (GRE) General Test is optional; however, the GRE requirement for all College of Education programs of study has been suspended for the 2020-21 admissions cycle. The statement of purpose (one to three pages) should include professional goals, whether the applicant plans to enroll full- or part-time, and how the applicant's goals and experiences are consistent with the higher education and student affairs program's mission and values.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). For specific score requirements, see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Application deadline is December 15 for admission the following fall. Applicants who are recommended for admission are invited to come to campus on spring Campus Visit Day, during which they interview for internships. Full-time students must be employed at an approved site (usually in an approved internship).

Combined Program

M.A./M.S. in Urban and Regional Planning

The combined M.A. in educational policy and leadership studies with a higher education and student affairs subprogram (HESA)/M.S. in urban and regional planning fills a growing need for higher education academic administrators with knowledge and understanding of planning and sustainability principles and methods.

The combined program reduces the total semester hours required to earn both degrees from 90 to 68. Students can complete coursework for both programs in three years. All students are expected to meet the admission requirements of each respective program, take the required admission exams, and provide appropriate admission materials. The two programs make admission decisions independently.

Students may begin one program in advance of the other or begin the two programs concurrently. All requirements for each degree must be satisfied separately, which includes

passing the final examination for each program. For more information, see the M.S. in urban and regional planning [p. 1622] (Graduate College) in the Catalog.

Schools, Culture, and Society

The Master of Arts program in educational policy and leadership studies with a schools, culture, and society subprogram requires a minimum of 32 s.h. of graduate credit and is offered without thesis, although a thesis option is available. Students must earn a cumulative g.p.a. of at least 3.00 in major coursework. The program develops students' ability to analyze the influence of social and historical factors that frame contemporary issues in education.

Students complete at least 21 s.h. in schools, culture, and society courses in two disciplinary areas: sociology and history. They earn 12 s.h. in one of the disciplinary areas and 9 s.h. in the other area. The remaining 11 s.h. of coursework must be in a concentration area outside the schools, culture, and society disciplinary areas appropriate to the student's career and academic goals.

Students must satisfactorily complete a six-hour comprehensive examination covering their disciplinary concentration area and other two areas of study. Alternately, students may choose to write a thesis. The examining committee may elect to hold an oral examination after the exam.

Admission

Applicants must meet the admission requirements of the Graduate College. A personal interview with one or more members of the program's faculty is recommended. Undergraduate and/or graduate emphases in education, sociology, and the humanities (philosophy, history, and so forth) provide good background for graduate study of schools, culture, and society, although other emphases also may be useful.

Applicants must submit a personal statement explaining their professional goals, experiences, and research plans; undergraduate and graduate grade-point averages; undergraduate and graduate transcripts; three letters of recommendation; a résumé; and scores on the Graduate Record Exam (GRE) General Test (the GRE requirement has been suspended for the 2020-21 admissions cycle). Application deadline is February 15 for admission the following fall.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). For specific score requirements, see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Academic Plans

Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

a Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.

b Required once; students enroll in this course a maximum of 3 times. Students with appropriate experience, with faculty approval, may waive this requirement.

c See catalog for list of approved electives; courses outside the program require faculty advisor approval.

Educational Policy and Leadership Studies, Ed.S.

Educational Leadership

The Specialist in Education program in educational policy and leadership studies with an educational leadership subprogram requires 36 s.h. of graduate credit. Students must earn a cumulative g.p.a. of at least 3.00 in major coursework. The program prepares candidates to be superintendents in Iowa or to hold other district-level leadership positions in K-12 school districts. It also prepares them for appointments as area education agency chief administrators and for jobs in state or federal departments of education.

Students must complete 26 s.h. of coursework. They also must complete 10 s.h. of clinical work and present an entry plan. Many educational leadership courses are offered by distance education; see MyUI for information about courses offered during current semesters. At the conclusion of the program, students are required to present their first-year entry plan. For detailed information, refer to Ed.S. programs on the Educational Leadership website.

Students seeking superintendent endorsement must have an Iowa administrator license. They obtain the superintendent endorsement (State of Iowa endorsement 171) upon completing the required Ed.S. coursework and at least three years of principal experience.

Admission

Applicants must meet the admission requirements of the Graduate College and of the educational leadership program. Required application materials include transcripts, official Graduate Record Examination (GRE) General Test scores (the GRE requirement has been suspended for the 2020-21 admissions cycle), three letters of recommendation, and a personal statement of career goals. Admission is based on grade-point average and GRE scores (except for GRE scores in the 2020-21 admissions cycle), promise for scholarly and professional growth, and recommendations. Application deadline for fall semester is July 1; for spring semester, December 1; and for summer session, April 30. Complete applications are reviewed as they are received.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). For specific score requirements, see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Higher Education and Student Affairs

The Specialist in Education program in educational policy and leadership studies with a higher education and student affairs subprogram requires 60 s.h. of graduate credit. Students must earn a cumulative g.p.a. of at least 3.00 in major coursework. The program provides advanced graduate study in administration, policy studies, and specializations developed in consultation with an advisor.

The Ed.S. also may be awarded upon completion of a combined program of graduate work in higher education

and another academic field, or upon completion of a higher education sequence following a master's degree program in a different field.

Required Courses

The Ed.S. program of study must include the following.

Code	Title	Hours
	Professional Education and Related Field Courses	18
	Specialization Area Courses	28
	Electives (approved by a student's advisor)	10
EPLS:7395	Educational Specialist Research	4
Total Hours		60

Depending on the student's career goals, the program may include an appropriate structured and supervised internship, determined in consultation with the advisor.

Comprehensive Examination

A culminating experience is required of all students, the nature of which will be contracted with the advisor. An oral examination of the culminating experience may be required.

Related Field

Students majoring in another field who want to complete a related field in higher education and student affairs should consult with a higher education and student affairs faculty member early in their study. Plans of study are developed individually.

Admission

Applicants must meet the admission requirements of the Graduate College. Admission is based on grade-point average, Graduate Record Exam (GRE) General Test scores (the GRE requirement has been suspended for the 2020-21 admissions cycle), and promise for professional growth. Transcripts, GRE scores (except for the 2020-21 admissions cycle), three letters of recommendation, and a statement of educational goals are required.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). For specific score requirements, see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

School Curriculum and Assessment Policy

The Specialist in Education program in educational policy and leadership studies with a school curriculum and assessment policy subprogram requires a minimum of 36 s.h. of graduate credit beyond the master's degree (required credit may vary depending on a student's academic background, experiences, needs, and interests). Students must earn a cumulative g.p.a. of at least 3.00 in major coursework.

The interdisciplinary program trains graduate students to become school leaders who know how to use assessment information for accountability purposes and curriculum evaluation.

The program offers concentrations in policy, measurement and statistics, and curriculum and draws on coursework from

across the College of Education. Graduates are qualified to serve as educational leaders in the areas of school policy, assessment, and curriculum at federal, state, and district levels.

For more information on the school curriculum and assessment policy programs, see the Department of Educational Policy and Leadership Studies.

The Ed.S. in educational policy and leadership studies with a school curriculum and assessment policy subprogram requires the following work.

Core Requirements

Code	Title	Hours

Capstone Project

All students complete the capstone project.

Code	Title	Hours
This course:		
EPLS:7395	Educational Specialist Research	3

Admission

Applicants must meet the admission requirements of the Graduate College and of the school curriculum and assessment policy program. Factors considered include recommendations, grade-point average, Graduate Record Examination (GRE) General Test scores (the GRE requirement has been suspended for the 2020-21 admissions cycle), one to two page statement of goals, and other evidence of academic ability and professional promise. Application deadline for fall semester is July 1; for spring semester, December 1; and for summer session, April 30.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). For specific score requirements, see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

- 36 s.h. of graduate level coursework is the minimum required for students entering the program with a master's degree.
- Students must complete specific requirements in the University of Iowa Graduate College after program admission. Refer to the Graduate College website and the Manual of Rules and Regulations for more information.
- Research Methodology requirement; students select one Quantitative Research Methods course and one Qualitative Research Methods course.
- Students choose one Concentration Area (Policy, Measurement and Statistics, or Curriculum) and complete three courses; see General Catalog for list of approved courses.
- Capstone Project: students will write a substantive research paper and present it to an interdisciplinary faculty committee during their final semester in the Ed.S. program.

Educational Policy and Leadership Studies, Ed.D.

The Doctor of Education (Ed.D.) in educational policy and leadership studies is designed for educators who seek a terminal doctoral degree to practice upper-level leadership in pre-kindergarten through higher education (PK-20) settings. Based on the scholar-practitioner model, the Ed.D. differs from the Ph.D. degree in that it allows for a more practical-based approach to use and perform applied research in educational settings grounded in problem-based learning pedagogy. Students elect to join their cohort class either on campus in Iowa City or through a hybrid program. The Ed.D. employs a blended learning delivery of online, in-person, condensed, and weekend courses.

Educational Outcomes

Ed.D. graduates will be able to:

- apply the knowledge, skills, and inquiry strategies to solve significant problems related to educational policies and practices;
- evaluate and use data to make judgments to improve practice and policy;
- understand and apply evidence of effective organizational and systemic change for equity, inclusion, and justice;
- frame situations from multiple perspectives;
- identify and meet contemporary challenges facing schools and higher education;
- embrace differences of persons and perspectives;
- develop a critical and professional perspective that is ethical and promotes change for equity and inclusion;
- link theory with systematic inquiry and assessment to improve educational policy and practice; and
- execute a scholarly project that addresses real and complex problems in practice.

Higher Education

The Doctor of Education program in educational policy and leadership studies with a higher education subprogram requires a minimum of 75 s.h. of graduate credit. Up to 36 s.h. in transfer credit may be applied to the degree with advisor approval. Students who earned an Ed.S. degree may apply up to 48 s.h. toward the Ed.D. with advisor approval. All students must earn a cumulative g.p.a. of at least 3.00 in UI and transfer coursework.

The Ed.D. in educational policy and leadership studies with a higher education subprogram requires the following work.

Core Courses

Code	Title	Hours
All of these:		
EPLS:6217	Theory and Practice of Leadership	3
EPLS:6307	Professional Seminar for Ed.D. Students: Orientation to the Ed.D.	1
EPLS:6321	Social Advocacy Summit	1
One of these:		

EPLS:5240	Topics in Education (when topic is facilitating controversial dialogue/facilitator preparation)	3
EPLS:6275	Diversity and Equity in Higher Education	3
EPLS:7432	Multicultural Initiatives	3

Applied Research

Code	Title	Hours
All of these:		
EPLS:6266	Program Evaluation	3
An introduction to quantitative research in education course (consult advisor)		
An action research in educational settings course (consult advisor)		
A doctoral capstone proposal course (consult advisor)		
A capstone research project course (consult advisor)		

Higher Education Coursework

Students must complete coursework in higher education as follows.

Code	Title	Hours
All of these:		
EPLS:5252	Administration of Higher Education and Student Affairs	3
EPLS:6216	Finance in Higher Education	3
EPLS:6218	The Law and Higher Education	3
EPLS:6225	Higher Education Policy	3
EPLS:6336	Impact of College on Students	3

Electives

In consultation with their advisor, students must complete the remaining semester hours in elective coursework.

Admission

Applicants must meet the admission requirements of the Graduate College. They must have earned a bachelor's degree from a regionally accredited U.S. institution or an equivalent degree from another country as determined by the Office of Admissions; a master's degree with a g.p.a. of at least 3.00 in higher education, student affairs, student development, K-12 leadership, or another related field; and have at least three years of full-time experience in education.

Required application materials include transcripts from all higher education institutions attended, a résumé or curriculum vitae, official Graduate Record Examination (GRE) General Test scores (the GRE requirement has been suspended for the 2020-21 admissions cycle), letters of recommendation from an administrator and a faculty member, and a statement of purpose.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

For specific score requirements, see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

PK-12 Administration

The Doctor of Education program in educational policy and leadership studies with a PK-12 administration subprogram requires a minimum of 75 s.h. of graduate credit. Up to 36 s.h. in transfer credit may be applied to the degree with advisor approval. Students who earned an Ed.S. degree may apply up to 48 s.h. toward the Ed.D. with advisor approval. Students who have a current endorsement (State of Iowa endorsement 171) may include up to 42 s.h. transfer credit applied to the degree with advisor approval. All students must earn a cumulative g.p.a. of at least 3.00 in UI and transfer coursework.

The Ed.D. in educational policy and leadership studies with a PK-12 administration subprogram requires the following work.

Core Courses

Code	Title	Hours
All of these:		
EPLS:6217	Theory and Practice of Leadership	3
EPLS:6307	Professional Seminar for Ed.D. Students: Orientation to the Ed.D.	1
EPLS:6321	Social Advocacy Summit	1
One of these:		
EPLS:5240	Topics in Education (when topic is facilitating controversial dialogue/facilitator preparation)	3
EPLS:6275	Diversity and Equity in Higher Education	3
EPLS:7432	Multicultural Initiatives	3

Applied Research

Code	Title	Hours
All of these:		
EPLS:6266	Program Evaluation	3
An introduction to quantitative research in education course (consult advisor)		
An action research in educational settings course (consult advisor)		
A doctoral capstone proposal course (consult advisor)		
A capstone research project course (consult advisor)		

PK-12 Administration Coursework

Students must complete coursework in PK-12 administration as follows.

Code	Title	Hours
All of these:		
EPLS:6265	Standards-Based Education and Accountability	3
EPLS:6270	Policy and Politics	3
EPLS:6329	Legislative Summit	1

Additional coursework toward the superintendency endorsement or electives 8

To obtain superintendent endorsement, all requirements for the endorsement must be met including an additional 12 s.h. in PK-12 administration.

Electives

In consultation with their advisor, students must complete the remaining semester hours in elective coursework.

Admission

Applicants must meet the admission requirements of the Graduate College. They must have earned a bachelor's degree from a regionally accredited U.S. institution or an equivalent degree from another country as determined by the Office of Admissions; a master's degree with a g.p.a. of at least 3.00 in higher education, student affairs, student development, K-12 leadership, or another related field; and have at least three years of full-time experience in education.

Required application materials include transcripts from all higher education institutions attended, a résumé or curriculum vitae, official Graduate Record Examination (GRE) General Test scores (the GRE requirement has been suspended for the 2020-21 admissions cycle), letters of recommendation from an administrator and a faculty member, and a statement of purpose.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). For specific score requirements, see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Career Advancement

The Ed.D. prepares students for careers in PK-12 and higher education administrative leadership in educational institutions and related organizations.

Educational Policy and Leadership Studies, Ph.D.

Educational Leadership

The Doctor of Philosophy program in educational policy and leadership studies with an educational leadership subprogram requires a minimum of 90 s.h. of graduate credit. Students must earn a cumulative g.p.a. of at least 3.00 in major coursework. The program prepares scholarly professionals for leadership positions in a wide range of educational and public sector settings. Students acquire strong backgrounds in leadership, policy, and research. They equip themselves to discover, integrate, and apply knowledge as transformational leaders.

The Ph.D. in educational policy and leadership studies with an educational leadership subprogram requires the following work.

Code	Title	Hours
	Common Courses	12
	Cognate Courses	9
	Electives	29
	Concentration Area Courses	12
	Research Courses	18
	Dissertation	10
	Total Hours	90

Students also complete the comprehensive examination and a dissertation, described below.

Many educational leadership courses are offered by distance education; see MyUI for information about courses offered during current semesters.

For more detailed coursework information, see Educational Leadership on the Educational Policy and Leadership Studies website.

Research Courses

All educational leadership Ph.D. students must complete either EALL:5150 Introduction to Educational Research or EPLS:6206 Research Process and Design during the first year of their Ph.D. program. They also must complete a minimum of 15 s.h. in qualitative and quantitative coursework, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Students select from courses listed under Ph.D. Research Requirements on the College of Education website.

Comprehensive Examination

Students must satisfactorily complete a written take-home comprehensive examination consisting of three parts. The first part covers a student's major area of study, and the second covers two additional concentration areas. The third is on the student's outside area of study and is prepared by faculty members outside the Department of Educational Policy and Leadership Studies. The written exams are followed by an oral examination.

Dissertation

Students must write a dissertation based on an original research project in an area of educational leadership.

Students must earn 10 s.h. of credit for dissertation research. The doctoral program culminates with a final oral defense of the dissertation. Students must be registered at the University of Iowa during the session in which they graduate.

Admission

Applicants must meet the admission requirements of the Graduate College and of the educational leadership program. They also must satisfy the residency requirement of two full-time (at least 9 s.h.) registrations. Required application materials include transcripts, official Graduate Record Examination (GRE) General Test scores (the GRE requirement has been suspended for the 2020-21 admissions cycle), three letters of recommendation, and a personal statement of career goals. Admission is based on grade-point average and GRE scores, promise for scholarly and professional growth, and recommendations. Complete applications are reviewed as they are received.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). For specific score requirements, see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Higher Education and Student Affairs

The Doctor of Philosophy program in educational policy and leadership studies with a higher education and student affairs (HESA) subprogram requires a minimum of 90 s.h. of graduate credit. At least 39 s.h. must be earned while registered in the Graduate College at the University of Iowa, and after formal program admission. Students must earn a cumulative g.p.a. of at least 3.00 in major coursework.

The doctoral program prepares individuals to be leaders in student affairs and academic administration, graduate faculty at research universities, leaders in conducting research about college students and higher education, policy analysts in postsecondary institutions and public or private agencies, and teachers and academic leaders at two-year and four-year colleges. The HESA program integrates academic experience with the cocurricular learning experiences of students and studies the outcomes of both.

The Ph.D. in educational policy and leadership studies with a higher education and student affairs subprogram requires the following coursework.

Code	Title	Hours
	Substantive Core Courses	18
	Research Methods Courses	18-22
	Concentration Area Courses	18
	Graduate Electives	24
	Dissertation	12
	Total Hours	90-94

Substantive Core

The substantive core provides foundational understanding of higher education and general knowledge that all students must master, regardless of their career goals and interests. All courses in the core (18 s.h.) must be completed at the University of Iowa.

Code	Title	Hours
All of these:		
EPLS:6216	Finance in Higher Education	3
EPLS:6220	History of Higher Education	3
EPLS:6224	Organizational Theory and Administrative Behavior	3
EPLS:6273	College Students	3
EPLS:6275	Diversity and Equity in Higher Education	3
EPLS:6311	Seminar: Research Topic in Education	3

Research Methods

Research methods courses (at least 18 s.h.) assure that students achieve scholarly autonomy and initiative.

Basic Research Methods

Code	Title	Hours
Both of these (6 s.h.):		
EPLS:6206	Research Process and Design	3
EPLS:7373	Qualitative Research Design and Methods (or approved substitute)	3

Statistics/Linear Regression

These courses (6-8 s.h.) must be taken in this order.

Code	Title	Hours
One of these:		
PSQF:6242	Selected Applications of Statistics	3
PSQF:6243	Intermediate Statistical Methods	4
One of these:		
EPLS:6370	Quantitative Methods for Policy Analysis	3
PSQF:6244	Correlation and Regression	4

Advanced/Specialized Research Methods

Students consult with their advisor to choose two courses (at least 6 s.h.) from either list appropriate to their dissertation design and intended learning outcomes.

Qualitative Methods

Code	Title	Hours
EPLS:5240	Topics in Education (when topic is introduction to historical methodology or critical qualitative inquiry)	3
EPLS:7392	Mixed Methods Research	3
EDTL:7071	Critical Discourse Analysis in Educational Research	3
EDTL:7072	Advanced Methods of Literacy Research: Qualitative Data Analysis and Reporting	3
EDTL:7073	Ethnographic Methods, Theories, and Texts	3

RCE:7444	Qualitative Research in the Multicultural Context	3
----------	---	---

Another comparable research methods course approved by advisor

Quantitative Methods

Code	Title	Hours
EPLS:5240	Topics in Education (when topic is multilevel modeling)	3
EPLS:6209	Survey Research and Design	3
POLI:7003	Advanced Methodology	4
PSQF:6246	Design of Experiments	4
SOC:7170	Advanced Statistical Modeling of Data	3
SOC:7180	Structural Equation Modeling	3

Another comparable research methods course approved by advisor

Concentration Area

The concentration area (18 s.h.) gives students the opportunity to develop expertise in one area. Students consult with their advisor to develop the concentration curriculum.

Graduate Electives

Students choose 24 s.h. of elective graduate coursework in consultation with their advisors. A student and their advisor may determine that some of the graduate elective work may be drawn from appropriate previous graduate coursework that complements other aspects of the student's doctoral program.

Comprehensive Examination

The Ph.D. comprehensive examination consists of a question written by the student in consultation with their advisor, and formally approved by the HESA faculty. Students are expected to construct a well-supported argument informed by knowledge of the theory, research, and practice that constitutes the field of higher education based on the substantive core and the student's concentration. The written examination is followed by an oral examination.

Dissertation

The dissertation is a major research study planned in collaboration with the student's advisor. Students must write a formal dissertation proposal and submit it for approval, first to their advisor and then to the members of their doctoral committee. Students and their advisors determine when the proposal is complete. Students must earn 12 s.h. of dissertation research credit. The doctoral program culminates with a final oral defense of the dissertation.

Students must be registered at the University of Iowa each fall and spring semester from the semester in which they complete their comprehensive examination through the semester in which they defend their dissertation and graduate.

Admission

Applicants must meet the admission requirements of the Graduate College. Each applicant must submit a personal statement, undergraduate and graduate grade-point averages, undergraduate and graduate transcripts, three letters of recommendation, a résumé or curriculum vita, and scores on the Graduate Record Exam (GRE) General Test (the GRE requirement has been suspended for the 2020-21

admissions cycle). The statement of purpose (one to three pages) should include professional and/or research interests, whether the applicant plans to enroll full- or part-time, and how the applicant's goals and experiences are consistent with the higher education and student affairs program's mission and values.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). For specific score requirements, see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Application deadline is December 1 for admission the following fall.

For more information on higher education and student affairs programs, see the Department of Educational Policy and Leadership Studies.

Schools, Culture, and Society

The Doctor of Philosophy program in educational policy and leadership studies with a schools, culture, and society subprogram requires a minimum of 90 s.h. of graduate credit. Students must earn a cumulative g.p.a. of at least 3.00 in major coursework. The program develops students' ability to analyze the influence of social and historical factors that frame contemporary issues in education.

The Ph.D. in educational policy and leadership studies with a schools, culture, and society subprogram requires the following coursework.

Code	Title	Hours
	Common Core Courses	9
	Disciplinary Foundation Courses	12
	Interdisciplinary Focus Courses	12
	Cognate Courses	27
	Research Tools	18
	Dissertation	12
	Total Hours	90

Common Core

Students must complete all three courses in the common core (9 s.h.).

Code	Title	Hours
EPLS:5102	History of American Education	3
EPLS:5126	Twentieth-Century Educational Movements	3
EPLS:5130	Sociology of Education	3

Disciplinary Foundation

Students choose one of two disciplinary foundation areas: sociology or history. They complete 12 s.h. in the area by taking three courses offered by the Department of Educational Policy and Leadership Studies (prefix EPLS) and one course offered by the corresponding department in the College of Liberal Arts and Sciences: sociology (prefix SOC) or history (prefix HIST). The following lists provide examples of courses appropriate for the two disciplinary foundation areas.

Sociology

Code	Title	Hours
EPLS:5131	Race, Class, and Gender Inequalities in Education	3
EPLS:5134	Education and the World of Work	3
EPLS:5142	Sociology of Higher Education	3
EPLS:5210	Education and Social Change	3
EPLS:5240	Topics in Education (when topic is sociology of education)	3

History

Code	Title	Hours
EPLS:5123	History of Ethnic/Minority Education	3
EPLS:5240	Topics in Education (when topic is history of education)	3
EPLS:6220	History of Higher Education	3
EPLS:6237	History of the Teaching Profession	3
EPLS:6238	Gender and Education in Historical Perspective	3
EPLS:6239	LGBTQ History in Education	3

Interdisciplinary Focus

Students choose one of two interdisciplinary focus areas: diversity and equity, or policy contexts. They take four courses in that area (total of 12 s.h.) chosen from the corresponding list. At least two of the courses (6 s.h.) must be from outside their disciplinary foundation area (see "Disciplinary Foundation" above).

Diversity and Equity

Code	Title	Hours
EPLS:5123	History of Ethnic/Minority Education	3
EPLS:5154	Education, Race, and Ethnicity	3
EPLS:5157	Ethics in Education	3
EPLS:6237	History of the Teaching Profession	3
EPLS:6238	Gender and Education in Historical Perspective	3
EPLS:6239	LGBTQ History in Education	3
EPLS:6275	Diversity and Equity in Higher Education	3

One relevant course from another department, with advisor's approval

Policy Contexts

Code	Title	Hours
EPLS:5134	Education and the World of Work	3
EPLS:5157	Ethics in Education	3
EPLS:5210	Education and Social Change	3
EPLS:6225	Higher Education Policy	3

EPLS:6237	History of the Teaching Profession	3
EPLS:6270	Policy and Politics	3
One relevant course from another department, with advisor's approval		

Cognate Courses

Students must complete at least 27 s.h. of additional graduate-level coursework in a field or fields that are relevant to their scholarly and professional goals. Students commonly complete some or all of the 27 s.h. with relevant graduate-level coursework from other University of Iowa programs or with approved transfer credit from other institutions. A student's advisor, in consultation with other faculty members in the program, determine which coursework to accept.

Research Tools

Students must take at least 18 s.h. in research methods.

Basic Research Methods

Code	Title	Hours
Both of these:		
EPLS:6206	Research Process and Design	3
EPLS:7373	Qualitative Research Design and Methods	3
With approval, students may substitute a course above for one of the following:		
EDTL:7070	Qualitative Research Methods in Teaching and Learning	3
PSQF:7331	Seminar: Educational Psychology I - Current Topics (when topic is qualitative educational research methods)	3
RCE:7338	Essentials of Qualitative Inquiry	3

Intermediate Statistics and Linear Regression

Code	Title	Hours
Both of these:		
PSQF:6242	Selected Applications of Statistics	3
EPLS:6370	Quantitative Methods for Policy Analysis	3

Advanced and/or Specialized Research Methods

Students consult with their advisor to choose two courses from either list appropriate to their dissertation design.

Qualitative or Non-Quantitative Courses

Code	Title	Hours
EPLS:5240	Topics in Education (when topic is historical methodology in education or analysis of philosophical argumentation)	3
EPLS:7392	Mixed Methods Research	3

EDTL:7071	Critical Discourse Analysis in Educational Research	3
EDTL:7072	Advanced Methods of Literacy Research: Qualitative Data Analysis and Reporting	3
EDTL:7073	Ethnographic Methods, Theories, and Texts	3
EDTL:7751	Advanced Qualitative Data Analysis	3
PSQF:6265	Program Evaluation	3
RCE:7444	Qualitative Research in the Multicultural Context	3

Other comparable research methods courses approved by student's advisor and schools, culture, and society program

Quantitative Courses

Code	Title	Hours
EPLS:5240	Topics in Education (when topic is multilevel modeling)	3
EPLS:6209	Survey Research and Design	3
EPLS:6370	Quantitative Methods for Policy Analysis	3
POLI:7003	Advanced Methodology	4
PSQF:6249	Factor Analysis and Structural Equation Models	3
SOC:5160	Research Design and Methods	3
SOC:7170	Advanced Statistical Modeling of Data	3
SOC:7180	Structural Equation Modeling	3

Other comparable research methods courses approved by student's advisor and schools, culture, and society program

Students who want to enroll in an advanced/specialized course not listed above, and wish to receive credit toward their program requirements, must obtain prior approval from their advisor and from the schools, culture, and society program.

Comprehensive Examination

The comprehensive examination consists of two take-home exams, each with a maximum of 15 pages. The first exam covers the student's disciplinary foundation (history or sociology), and the second covers the student's interdisciplinary focus area (diversity and equity or policy contexts) and the common core (history or sociology, not including the disciplinary focus).

Dissertation

After completing the comprehensive examination, students write a formal dissertation prospectus and submit it for approval first to their dissertation advisor and then to the members of their dissertation committee. The dissertation prospectus must be formally approved by the dissertation advisor and the dissertation committee before a student may begin dissertation research.

Students must earn 12 s.h. of dissertation research credit. The dissertation process culminates with a final oral defense of the dissertation. Students must register at the University

of Iowa each fall and spring semester until the dissertation is successfully defended and the Ph.D. is awarded.

Admission

Applicants must meet the admission requirements of the Graduate College. A personal interview with one or more members of the program's faculty is recommended. Undergraduate and/or graduate emphases in education, sociology, and the humanities (philosophy, history, and so forth) provide good background for graduate study of schools, culture, and society, although other emphases also may be useful.

Applicants must submit a personal statement explaining their professional goals, experiences, and research plans; undergraduate and graduate grade-point averages; undergraduate and graduate transcripts; three letters of recommendation; and scores on the Graduate Record Exam (GRE) General Test (the GRE requirement has been suspended for the 2020-21 admissions cycle).

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). For specific score requirements, see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Admission is for fall semester entry. Application deadline is January 15 for admission the following fall.

For more information on schools, culture, and society programs, see the Department of Educational Policy and Leadership Studies.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

- g Work with academic advisor to select appropriate graduate level coursework in the specialization area. See General Catalog & COE website for specifics.

- h Work with academic advisor for approval to select electives in related field, including graduate transfer credits.
- i Typically taken after most required coursework is completed; work with advisor to complete the exam.
- j Must be completed within 5 years of Comprehensive Exam.
- k Up to 12 s.h. total thesis credit allowed; work with academic advisor to determine.

Online Teaching

Chair, Department of Psychological and Quantitative Foundations

- Megan Foley Nicpon

Coordinator, Online Teaching

- Kathy L. Schuh (Psychological and Quantitative Foundations)

Graduate certificate: online teaching

Faculty: <https://education.uiowa.edu/directories>

Website: <https://education.uiowa.edu/academic-programs/educational-psychology-learning-sciences/certificate-online-teaching>

The growth of online teaching presents a need to address course quality, instructor training, assessment of teaching effectiveness and student learning, and retention. The Certificate in Online Teaching is an online graduate program designed to prepare students for the realities of online teaching and to help them expand their career options.

The Certificate in Online Teaching is administered by the Department of Psychological and Quantitative Foundations [p. 1317] and is granted by the Graduate College.

Programs

Graduate Program of Study

Certificate

- Certificate in Online Teaching [p. 1316]

Online Teaching, Graduate Certificate

Requirements

The graduate Certificate in Online Teaching requires 12 s.h. of graduate credit and is offered completely online. Students must maintain a g.p.a. of at least 2.50 in work for the certificate. Certificate courses may not be taken pass/nonpass. The certificate program is open to students enrolled in University of Iowa graduate degree programs and to individuals who are enrolled in the Graduate College as nondegree students.

The certificate program develops students' skills in using technology to solve instructional problems associated with distance and time. The certificate's online format uses the techniques and approaches that the program teaches.

The Certificate in Online Teaching requires the following coursework.

Code	Title	Hours
PSQF:6205	Design of Instruction	3
PSQF:6211	Universal Design and Accessibility for Online Instruction	3
PSQF:6215	Web-Based Learning	3
PSQF:6216	Tools and Utilities for Online Teaching	3

For more information, visit Certificate in Online Teaching on the College of Education website.

Psychological and Quantitative Foundations

Chair

- Megan Foley Nicpon

Undergraduate minor: educational psychology
Graduate degrees: M.A. in psychological and quantitative foundations; Ed.S. in psychological and quantitative foundations; Ph.D. in psychological and quantitative foundations

Faculty: <https://education.uiowa.edu/directories>

Website: <https://education.uiowa.edu/pq>

The Department of Psychological and Quantitative Foundations offers programs in these areas: counseling psychology, couple and family therapy, educational measurement and statistics, educational psychology, learning sciences, and school psychology. These programs have two general goals: to help students acquire the knowledge and skills that are necessary to function effectively in settings that require the application of psychological and quantitative principles, and to extend knowledge and understanding of the teaching/learning process as it occurs in a variety of settings. The department's degree programs incorporate both goals, but the Master of Arts and Specialist in Education programs emphasize the first goal, and the Doctor of Philosophy programs emphasize the second.

The department offers graduate degree programs in the following major areas within psychological and quantitative foundations:

counseling psychology (offered in the M.A. and Ph.D.);

couple and family therapy (offered in the Ph.D.);

educational measurement and statistics (offered in the M.A. and Ph.D.);

educational psychology (offered in the Ph.D.);

learning sciences (offered in the M.A.); and

school psychology (offered in the Ed.S. and Ph.D.).

In addition to the graduate degrees and the undergraduate minor offered as programs of study, the department offers the following College of Liberal Arts and Sciences GE CLAS Core [p. 20] courses:

PSQF:1020 Elementary Statistics and Inference, approved for the Quantitative or Formal Reasoning area; and

PSQF:2115 Introduction to Counseling Psychology, approved for the Social Sciences area.

Applicants for admission to the graduate degree programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Programs

Undergraduate Program of Study Minor

- Minor in Educational Psychology [p. 1325]

Graduate Programs of Study Majors

- Master of Arts in Psychological and Quantitative Foundations [p. 1326]
- Specialist in Education in Psychological and Quantitative Foundations [p. 1329]
- Doctor of Philosophy in Psychological and Quantitative Foundations [p. 1330]

Courses

Students may receive credit for only two of these three courses: STAT:1010 Statistics and Society, STAT:1020 Elementary Statistics and Inference (same as PSQF:1020 Elementary Statistics and Inference), and STAT:1030 Statistics for Business. Credit for STAT:1010 is given only if the course is taken before STAT:1020 (same as PSQF:1020) or STAT:1030.

Psychological and Quantitative Foundations Courses

PSQF:1020 Elementary Statistics and Inference 3 s.h.
 Graphing techniques for presenting data, descriptive statistics, correlation, regression, prediction, logic of statistical inference, elementary probability models, estimation and tests of significance. Requirements: one year of high school algebra or MATH:0100. GE: Quantitative or Formal Reasoning. Same as STAT:1020.

PSQF:1027 Mindfulness Foundations in the Helping Professions 3 s.h.
 Training in Mindfulness-Based Practices; application to personal and professional life.

PSQF:1029 First-Year Seminar 1 s.h.
 Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

PSQF:1039 Undergraduate Excellence Seminar 1 s.h.
 Designed to enhance student's ability to successfully navigate the undergraduate experience by providing an opportunity to develop new skills and behaviors, as well as reflect on attitudes, in order to achieve academic and personal success.

PSQF:1050 Learning Online Successfully 2 s.h.
 Experiences in an online environment and opportunities to engage with digital materials for learning to develop skills and strategies for future classes; assess resources for successful online learning, participate in a variety of online learning environments including online discussions and collaborations, develop strategies for reading and marking digital materials, managing time for working and studying online, and plan for future courses that may be online or include digital course materials.

PSQF:1075 Educational Psychology and Measurement 3 s.h.
 Principles and classroom applications of cognitive and social development, learning and cognition, motivation, and assessment.

PSQF:2115 Introduction to Counseling Psychology 3 s.h.
 Historical and philosophical foundations of counseling psychology; theories, application, and work of counseling psychologists. GE: Social Sciences.

PSQF:2116 Applied Child and Adolescent Psychology**3 s.h.**

Overview of child and adolescent development, psychopathology, and basic-level intervention; foundation for working in applied child and adolescent mental health settings; typical areas of psychological difficulty, including developmental disorders, ADHD, depression, anxiety, substance use; contextual and environmental factors, including abuse, poverty, neglect.

PSQF:3028 Mindfulness for Educators: Psychological Foundations, Applications, and Practices**1-2 s.h.**

Exploration of research-based implications for teaching, learning, and daily living; skillful engagement of demands educators face in personal and professional lives; mindfulness as paying attention in present moment and relating wisely to what is occurring; specific mindfulness practices that integrate awareness into daily living; how research and program evaluations throughout the world document that consistent practice of mindfulness improves attention and concentration; ability to respond skillfully to stress, self-regulation of emotion, physical and mental health, communication, life satisfaction.

PSQF:3075 Brain Behavior**3 s.h.**

Course is applied in nature, so that students not only learn brain behavior and anatomy, but also learn how these are directly related to neurological and neurobehavioral disorders; helps to understand the biological aspects of disorders that are needed to treat in practice settings; for students in applied psychology or other applied programs of study. Prerequisites: PSY:2701 and PSQF:2115 with a minimum grade of C-.

PSQF:3103 Early Childhood Guidance**4 s.h.**

Effective communication, understanding child development and behavior, appropriate limits and rules, structuring problem solving and consequences, fostering self control, organizing classroom environment and curriculum to support child behavior, methods to address persistent and challenging behaviors; nurturance and child guidance via parenting, child rearing practices, and child-family relations.

PSQF:3104 Multicultural Issues in Counseling and Psychology**3 s.h.**

Introduction to multicultural competencies and its importance to counseling, psychology, and helping professions; psychological concepts and research pertaining to privilege; racism, race, culture, sexual orientation, social class and classism, and their application in culturally adapted psychotherapy interventions; how these matters and other cultural identities and constructs are handled and used in applied psychology and counseling; focus on intersection of research and practice.

PSQF:3191 Asian American Experiences**3 s.h.**

Aggregate experiences of Asian Pacific Americans, starting from developments in countries of origin to their contemporary issues; histories of various Asian Pacific American groups (e.g., Chinese, Korean, Filipino, Japanese, Asian Indian, Hawaiians, Vietnamese, etc.), as well as culture, politics, the media, and stereotypes; similarities among the different Asian Pacific American groups, as well as a comparative look at how African, Latino, and Native American experiences help shape and contribute to Asian Pacific America.

PSQF:3333 Special Topics in Psychological and Quantitative Foundations**arr.**

Topics related to psychological and quantitative foundations.

PSQF:3700 Introduction to Understanding Trauma and Resilience**3 s.h.**

Introduction to understanding key concepts of trauma-informed systems of care in multiple settings; identification of various types of trauma along with behaviors and responses seen in survivors of trauma; students trace effects of historical trauma of marginalized communities and multiple trauma survivor groups to understand the consequences of trauma and its impact in the culture; resilience and strategies to offset consequences of trauma. Same as SSW:3700.

PSQF:4081 ePortfolio Design and Production**1-2 s.h.**

Experience producing an ePortfolio and uploading it to the internet; practical experience using digital tools, content and design related to ePortfolio production; experience using a web browser, accessing the internet, and using a digital camera or scanner. Requirements: able to perform basic computer functions and use a World Wide Web browser. Same as EALL:4081, EDTL:4081, EPLS:4081, RCE:4081.

PSQF:4106 Child Development**3 s.h.**

Theories and research findings about typical course of child development, differences in development. Requirements: junior standing.

PSQF:4111 Human Motivation**3 s.h.**

Principles of motivation and their application to applied settings, especially to the classroom as teachers try to motivate students. Requirements: junior standing.

PSQF:4120 Psychology of Giftedness**3 s.h.**

Theories of learning, child development, motivation; issues unique to gifted education. Same as RCE:4120.

PSQF:4121 Identification of Students for Gifted Programs**3 s.h.**

Interpretation of standardized tests and other measurement instruments used to identify academic talent and program effectively for grades K-12; ability, aptitude, achievement tests; current issues in the uses of various instruments. Same as RCE:4121.

PSQF:4122 Math Programming for High Ability Students**1 s.h.**

Unique challenges and opportunities confronted by teachers of high-ability students; theory and practice, development of program outlines for implementation. Same as EDTL:4022.

PSQF:4123 Academic Acceleration: Providing Excellence and Equity in Education for High Ability Students**arr.**

Acceleration as an effective curricular intervention for high-ability students; forms of acceleration, research evidence for acceleration, and process of implementing acceleration; reasons for persistent negative attitudes about acceleration; advocacy for acceleration; skills for effective practice and implementation. Requirements: computer with internet access, sound card, Adobe Reader, and Adobe Flash Player.

PSQF:4125 Counseling and Psychological Needs of the Gifted**1 s.h.**

Psychological aspects of giftedness, counseling techniques appropriate for gifted children, adolescents; socio-emotional concerns, career development, underachievement. Same as RCE:4125.

PSQF:4126 Cognitive and Affective Needs of Underachieving Gifted**1 s.h.**

Diagnostic strategy for identifying types of underachievement, teaching and counseling interventions appropriate for each. Same as RCE:4126.

PSQF:4128 Neuroscientific Implications for Gifted 1 s.h.

Neurology of behavior and neurodegenerative disease; the psychology of learning and memory, its application to gifted education.

PSQF:4129 Creativity: Issues and Applications in Gifted Education 1 s.h.

Theories that underpin contemporary definitions of creativity; instruments developed to measure creativity; activities in the school environment that enhance or inhibit student creativity. Same as RCE:4129.

PSQF:4130 Early Adolescent Development 3 s.h.

Psychological growth and development of the early adolescent (ages 10-14), including the physical, cognitive, social, emotional, and sexual development of the middle-school aged child.

PSQF:4133 The Adolescent and Young Adult 3 s.h.

Psychological and social aspects of adolescence and young adulthood; emphasis on theory, research, and practical applications.

PSQF:4134 Parent-Teacher Communication 1-3 s.h.

Realities of working with parents; interpersonal skills; options for parent support services. Same as EDTL:4934.

PSQF:4136 Home/School/Community Partnerships 3 s.h.

Issues related to collaboration among families, educators, community members in implementing school programs. Same as EDTL:4936.

PSQF:4143 Introduction to Statistical Methods 3 s.h.

Analysis, interpretation of research data; descriptive statistics; introduction to probability, sampling theory, statistical inference (binomial, normal distribution, t-distribution models); linear correlation, regression. Same as STAT:4143.

PSQF:4145 Marriage and Family Interaction 3 s.h.

Contemporary American couple, marriage, and family relationships; mate selection. Same as RCE:4145.

PSQF:4150 Introduction to Educational Measurement 3-4 s.h.

Test development procedures, reliability, validity, item writing, evaluation of item and test characteristics; classroom assessment methods; interpretation of scores from standardized achievement and aptitude tests; no background in statistics assumed.

PSQF:4162 Introduction to Couple and Family Therapy 3 s.h.

Evolution of the family therapy movement and issues related to functional and dysfunctional family systems; significant models of family therapy and specific techniques. Same as RCE:4162.

PSQF:4520 Bayesian Statistics 3 s.h.

Bayesian statistical analysis, with focus on applications; Bayesian and frequentist methods compared; Bayesian model specification, choice of priors, computational methods; hands-on Bayesian data analysis using appropriate software; interpretation and presentation of analysis results. Prerequisites: STAT:3200 and (STAT:3101 or STAT:4101 or STAT:3120). Same as IGPI:4522, STAT:4520.

PSQF:4740 Issues in K-12 Assessment 3 s.h.

Examination of research, policies, and practices related to classroom and large-scale educational assessment; focus on use and construct of formative and summative assessments for classroom teaching and basics of educational measurement; coverage of educational assessment including development of plans that integrate teaching and assessment; use of formative assessment strategies and providing effective feedback to students; crafting objective, performance, and portfolio assessments; evaluation of students; interpretation of state-mandated tests and standardized achievement tests.

PSQF:4750 Learning Environments: Design, Context, and Activity 3 s.h.

Students explore the design of learning environments and the kinds of activities that take place there; includes a general background on design of learning environments; emphasis on project- and problem-based learning (considered to be keys to 21st-century learning), media inclusion, and how teacher facilitation/questioning and cooperative learning are foundational for success.

PSQF:4760 Participatory Learning and Media: Creating, Remixing, Making, and Education 3 s.h.

Teaching and learning with 21st-century digital media; pedagogical approaches characterized by participatory learning that expands and blurs boundaries of the classroom; remixing educational, social, and entertainment-based media toward pedagogical ends that meet instructional goals; engagement with social media, web-based video, interactive media, podcasts, games, and simulations.

PSQF:4910 Theories of Family Development 3 s.h.

Overview of historical and contemporary theories across disciplines about family development and family relationships; examination of family as a context for relationships between partners and between parents and children across the life course; evaluation of research on family system (e.g., coupling, "doing" gender, parenting, work and family balance, family transitions, economic hardship).

PSQF:5150 Introduction to Counseling and Skills 3 s.h.

Introduction to the field of counseling and psychology; provides students with clinical foundational skills; students explore the counseling process, how to conduct interviews, and how to integrate theory into their assessment and clinical work; introduction to basic concepts of working relationship and alliance, common factors, and interventions; practice provides students with experiences needed to understand concepts.

PSQF:5151 Health and Wellness Counseling Psychology 3 s.h.

Introduction to the concepts of health psychology and wellness in counseling and psychology; focus on psychological, biological, and ecological factors impacting health and wellness in multiple cultural contexts; research on psychological and holistic interventions, prevention strategies for clients across the lifespan.

PSQF:5152 Assessment and Diagnosis 3 s.h.

Group and individual appraisal techniques used to support career, educational, and personal planning and development; exploration of standardized and non-standardized data and information gathering methods, validity, reliability, psychometric statistics, factors influencing appraisals, use and interpretation of appraisal results with varied populations; assessment techniques and interviews connected to psychological diagnosis through standardized diagnostic frameworks, such as the DSM and ICD.

- PSQF:5165 Introduction to Program and Project Evaluation** 3 s.h.
Skills and knowledge required for conducting evaluations of products, projects, and programs; recent scholarship on evaluation and project management. Same as EPLS:5165.
- PSQF:5193 Special Readings and Projects** arr.
Supervised individual study. Requirements: senior standing.
- PSQF:5194 Continuing Education Individual Study** arr.
Supervised individual study.
- PSQF:5199 Topical Workshop in Psychological and Quantitative Foundations** arr.
School, educational, and counseling psychology and allied disciplines; for professionals and graduate students in education, mental health, social services, related fields.
- PSQF:5219 Foundations of Health Service/School Psychology** 3 s.h.
Introduction to health service/school psychology; becoming competent leaders in health service in community settings; roles and functions of psychologists in health service; ethical standards, issues, and professional practices related to health service psychology; legal issues; current topics and trends.
- PSQF:5226 Assessment of Giftedness** 3 s.h.
Training and practice in assessment of gifted children. Same as RCE:5226.
- PSQF:5262 Advanced Couple and Family Therapy** 3 s.h.
Review and critique couple and family therapy theory, ethics, and techniques as applied to problems of couple and family over the life span; multicultural considerations. Requirements: advanced graduate standing. Recommendations: PSQF:4162.
- PSQF:5265 Research Methods in Couple and Family Therapy** 3 s.h.
Review and analysis of pertinent literature in area of research methods in couple and family therapy; exploration of stages of clinical trials and the process of federal funding of intervention research in couple and family therapy and family psychology; commonly used research methods in couple and family therapy reviewed and critically analyzed; students use these methods to survey research literature in top journals of the field.
- PSQF:6200 Educational Psychology** 3 s.h.
Psychology of the learning/instruction process: theoretical perspectives on learning, instruction, motivation, and assessment; developmental concepts, social processes, individual variation, learning and technology, biological basis of learning.
- PSQF:6203 Tools and External Representations in Individual and Social Learning** 3 s.h.
Theories and approaches to research and practice regarding the use of technology and scientific representations in teaching and learning; historical, cultural, cross-species, and contemporary informal lenses applied to understanding human knowledge as it interacts with tools and how tools mediate thinking and learning; project to design a technology-supported learning solution for a problem related to teaching and learning.
- PSQF:6204 Foundations of the Learning Sciences** 3 s.h.
Foundations of interdisciplinary science of learning; theory and method of study of cognition in sociocultural context; design-based approaches to research on learning; history of several key concepts traced to determine origins; how contemporary literature is situated in this intellectual history.
- PSQF:6205 Design of Instruction** 3 s.h.
Introduction to processes used to design, develop, implement, and evaluate effective instruction; projects.
- PSQF:6206 Advanced Child Development** 3 s.h.
Theories of social and cognitive development; in-depth study of several current issues in the field.
- PSQF:6208 Digital Media and Learning** 3 s.h.
Theory, design, and evaluation of instructional media.
- PSQF:6209 Survey Research and Design** 3 s.h.
Survey design and implementation; writing and evaluation of survey questions; error in survey research; techniques to reduce error; sampling; postcollection processing of survey data. Prerequisites: EPLS:6206 or PSQF:4143. Same as EPLS:6209.
- PSQF:6211 Universal Design and Accessibility for Online Instruction** 3 s.h.
Universal Design for Learning (UDL) framework; introduction to accessibility for online learning environment; use of UDL with any curriculum to provide more students with access to learning, including online learning environment.
- PSQF:6213 Advanced Lifespan Development** 3 s.h.
Selected theories and research in development across the lifespan; focus on relevance for instruction and counseling.
- PSQF:6214 Design of Learning Environments: Theory, Practice, and Method** 3 s.h.
Theory, practice, and research method of the design of learning environments; broadly conceived understanding of technology-based learning environments; includes a semester-long project to design or evaluate the design of a learning environment, technology-based or otherwise.
- PSQF:6215 Web-Based Learning** 3 s.h.
Theory and practice of designing websites to support or deliver instruction; student project to create an instructional website that integrates the theory and principles from class readings.
- PSQF:6216 Tools and Utilities for Online Teaching** 3 s.h.
Guidance for future online teachers in making well-informed decisions on what technologies need to be adopted and applied for high quality, successful online educational programming in a variety of environments (e.g., K-12, higher education, business and industry); choosing, learning, evaluating, and using different types of technologies to produce online instruction; how to learn; initiating and managing learning and professional development for effective online teaching. Corequisites: PSQF:6205, if not taken as a prerequisite.
- PSQF:6217 Seminar in College Teaching** 1-3 s.h.
Preparation for college teaching; for graduate students planning to teach. Same as GRAD:6217.
- PSQF:6220 Quantitative Educational Research Methodologies** 3 s.h.
Procedures for planning, conducting, and reporting research; evaluation of current methods in educational research; quantitative designs and methods. Prerequisites: PSQF:4143 or STAT:4143.
- PSQF:6223 Introduction to Counseling Psychology Practice/Research I** 3 s.h.
Historical, theoretical, professional, scientific traditions associated with counseling psychology; professional ethical principles.

PSQF:6225 Introduction to Counseling Psychology Practice/Research II 3 s.h.

Learning and performance of basic helping skills; integration of these skills with counseling theories, broader counseling strategies; laboratory-based.

PSQF:6230 Research in Educational Psychology 1-3 s.h.

Design, implementation, and presentation of an educational psychology empirical research project. Requirements: graduate standing in educational psychology.

PSQF:6233 Ethics for Behavioral Psychologists 1 s.h.

Ethics that are unique to applied behavior analysis; ethical considerations.

PSQF:6235 Multicultural Counseling 3 s.h.

Theoretical and practical aspects of the cultural adaptation process; implications for interventions in diverse populations; issues. Requirements: counseling skills introductory course.

PSQF:6238 Assessment of Learning Differences 3-4 s.h.**PSQF:6241 Quantitative Policy Analysis for Practitioners** 3 s.h.

Introduction to applied research and statistics with focus on understanding quantitative research, data collection and analysis, and reporting results for decision making.

PSQF:6242 Selected Applications of Statistics 3 s.h.

Application and interpretation of correlation techniques, chi-square, t- and f-tests, interval estimation, simple cases of analysis of variance. Prerequisites: PSQF:4143.

PSQF:6243 Intermediate Statistical Methods 4 s.h.

Foundation for more advanced applied courses; logic of statistical inference, chi-square, and other tests of statistical hypotheses; small sample error theory, interval estimates, introduction to analysis of variance, selected nonparametric methods. Requirements: for PSQF:6243—PSQF:4143; for STAT:6513—STAT:4143. Same as STAT:6513.

PSQF:6244 Correlation and Regression 4 s.h.

Correlation techniques; selected bivariate procedures, multiple, partial, curvilinear correlation; multiple linear regression; sampling theory applied to regression analysis and correlation coefficients; simple causal models. Requirements: for PSQF:6244—PSQF:6243; for STAT:6514—STAT:6513. Same as STAT:6514.

PSQF:6245 Applied Multivariate Analysis 3 s.h.

Multivariate descriptive statistics, multivariate normal distribution, Hotelling's T-squared, MANOVA, multivariate regression, principal components, discrimination and classification, cluster analysis. Prerequisites: STAT:3200 and STAT:3210. Requirements: facility with matrix algebra. Same as STAT:6540.

PSQF:6246 Design of Experiments 4 s.h.

Theory and methods in the planning and statistical analysis of experimental studies; testing of hypotheses about linear contrasts among means in single-factor and multifactor, completely randomized, and repeated measurement designs. Requirements: for PSQF:6246—PSQF:6243; for STAT:6516—STAT:6513. Same as STAT:6516.

PSQF:6247 Nonparametric Statistical Methods 3 s.h.

Selected nonparametric methods; one- and two-sample location tests and estimation methods, measures of association, analyses of variance; emphasis on relationships to classical parametric procedures. Same as STAT:6547.

PSQF:6248 Research Synthesis and Meta-Analysis 3 s.h.

Rationale and methods for research synthesis and meta-analysis; conceptual issues in quantitative research synthesis in the social sciences and other disciplines, including medicine; thorough understanding of concept of sampling distribution is needed to understand the statistical methods introduced. Prerequisites: PSQF:6246 or PSQF:6244.

PSQF:6249 Factor Analysis and Structural Equation Models 3 s.h.

Foundations of exploratory and confirmatory factor analysis methods; least squares and maximum likelihood approaches; problems in factor extraction, rotation, interpretation; structural equation models via LISREL; assumptions and limitations of alternative approaches. Prerequisites: PSQF:6244 and PSQF:6246.

PSQF:6250 Computer Packages for Statistical Analysis 1-3 s.h.

Computer programs and systems designed to execute statistical analysis (SAS, SPSS, BMDP, and others); lectures on regression techniques, analysis of variance, multivariate techniques; practice in entering data, calling up desired programs, interpreting computer output. Prerequisites: PSQF:6243. Requirements: elementary knowledge of computer programming.

PSQF:6252 Introduction to Multivariate Statistical Methods 3 s.h.

Selected topics in multivariate analysis, including multivariate significance tests, principal components and factor analysis, discriminant analysis, canonical correlation, multivariate analysis of variance (MANOVA). Prerequisites: PSQF:6244 and PSQF:6246.

PSQF:6254 Causal Inference and Observational Designs 3 s.h.

Conceptual and technical issues in the design of observational and quasi-experimental studies in natural settings and the appropriate analysis of data for making causal inferences. Requirements: PSQF:6220 and PSQF:6244 and PSQF:6246.

PSQF:6255 Construction and Use of Evaluation Instruments 3 s.h.

Design and construction of measures used in educational evaluation: achievement tests, attitude scales, performance measures, questionnaires; emphasis on methods of instrument development and evaluation of instrument characteristics. Prerequisites: PSQF:4143 and PSQF:6257.

PSQF:6257 Educational Measurement and Evaluation 3 s.h.

Evaluation and use of standardized tests and inventories in individual and group assessment; analyzing reliability, validity, normative data; interpreting measures of achievement, intelligence, aptitude, interests, attitudes, personality; current issues; for counselors, administrators, teachers, measurement specialists. Corequisites: PSQF:4143.

PSQF:6258 Theory and Technique in Educational Measurement 3 s.h.

Mathematical foundations, principal results, and applications of classical test theory; perspectives on conditional error variance; binomial error model and applications; introduction to generalizability theory; advanced measurement topics. Prerequisites: PSQF:6243 and PSQF:6257.

- PSQF:6259 Scaling Methods** 3 s.h.
Unidimensional and multidimensional scaling techniques; item response theory with a focus on polytomous models; introduction to available computer programs for scaling; applications in educational and psychological research. Prerequisites: PSQF:6262. Corequisites: PSQF:6249 and PSQF:6252.
- PSQF:6262 Item Response Theory** 3 s.h.
Theoretical foundations and practical applications; mathematical models and estimation techniques; emphasis on current applications and issues in testing; computer estimation programs. Prerequisites: PSQF:6243 and PSQF:6257.
- PSQF:6263 Consultation Theory and Practice** 3 s.h.
Review of concepts and practice of consultation and collaboration in educational and human services settings; focus on mental health, organizational, behavioral, and instructional models. Same as RCE:6263.
- PSQF:6265 Program Evaluation** 3 s.h.
Theoretical issues and considerations in evaluation of educational and social programs; evaluation design, methodology; metaevaluation; evaluation utilization. Same as EPLS:6266.
- PSQF:6275 Constructivism and Design of Instruction** 3 s.h.
Theoretical foundations of constructivism; application of constructivist principles to the design of instruction.
- PSQF:6281 Cognitive Theories of Learning** 3 s.h.
Theories of cognition as they relate to learning, education, and changes in individual thinking, behavior, and identity; development of expertise; mental representations and psychological mechanisms; design of cognitive assessments and learning tasks; focus on learning in academic disciplines, clinical contexts, and game-based environments.
- PSQF:6292 Supervised Research in Educational Psychology** 1-3 s.h.
Identification of research problems, development of research designs and materials, conducting of research studies; faculty-guided activity or seminars.
- PSQF:6293 Individual Instruction in Psychological and Quantitative Foundations** arr.
- PSQF:6299 M.A. Project: Portfolio/Internship/Practicum** 3 s.h.
Individual portfolio/internship/practicum project; reflection, revision, and presentation of educational psychology portfolio.
- PSQF:6312 Psychopathology Across the Lifespan** 3 s.h.
DSM IV categories, related diagnostic issues.
- PSQF:7201 Counseling Psychology Research Writing** 3 s.h.
How to write scientifically in counseling psychology; qualitative and quantitative research writing, literature reviews, methodologies, discussions; APA style.
- PSQF:7225 Introduction to Health Service/School Psychology Practice** 1-3 s.h.
Introduction to practice of health service/school psychology; framework for understanding role and function, legal and ethical boundaries, professional requirements; preparation for practicum.
- PSQF:7237 Beginning Practicum in School Psychological Service** arr.
Supervised practicum in psychological and educational evaluation in school settings. Prerequisites: PSQF:6238.
- PSQF:7245 Evaluation of Children with ADHD and LD** arr.
Clinical experience in conducting pediatric neuropsychology examinations in the Pediatric Attention/Learning Disorders Clinic. Requirements: course on psychological testing (including IQ) and graduate psychology standing (school, counseling, rehabilitation, clinical). Same as PEDS:7245.
- PSQF:7270 Scholarly Integrity and Responsible Conduct of Educational Research and Evaluation** arr.
Students are introduced to and deepen their knowledge and skill in applying principles for the responsible conduct of educational research and evaluation and related social sciences; two modules addressing core areas identified by federal policy as minimal requirements for knowledge and skill in practice of research with scholarly integrity; format is discovery and discussion—presentation of background information for each topic is followed by discussion of case studies and other examples relevant to each topic; for research assistants.
- PSQF:7305 Psychotherapy I: Dynamic and Phenomenological Approaches** 3 s.h.
Major psychodynamic and existential-phenomenological theories of personality; emphasis on implications for psychotherapy.
- PSQF:7306 Psychotherapy III: Work Psychology and Career Interventions** 3 s.h.
Foundations of career interventions; emphasis on major assessment instruments (vocational interests, values, abilities/skills, personality) and career counseling processes, skills, techniques.
- PSQF:7309 Personality Assessment** 3 s.h.
Standardized and projective techniques for personality assessment; preparation for competent administration and interpretation of varied tests and measures.
- PSQF:7310 Intelligence Assessment** 3 s.h.
Standardized intelligence testing; preparation to administer and interpret intelligence tests for children and adults.
- PSQF:7313 Psychopathology in Childhood** 3 s.h.
Current theories regarding the development of psychopathology in children and adolescents; current approaches to treatment for disorders in children and adolescents.
- PSQF:7315 Social and Emotional Assessment of Children and Adolescents** 3 s.h.
Link between personality theory, child and adolescent assessment; interpretation, integration of assessment information; record reviews, interviews, objective tests, projective techniques. Prerequisites: PSQF:6238.
- PSQF:7320 History and Systems of Psychology** 3 s.h.
Philosophical underpinnings of psychology, early systems in psychology, developments in the 20th century.
- PSQF:7331 Seminar: Educational Psychology I - Current Topics** arr.
Intensive investigation of a specific research topic.
- PSQF:7337 Advanced Practicum in School Psychology** arr.
Supervised experience in psychological interventions, consultation, counseling in school and clinic settings. Prerequisites: PSQF:6238 and PSQF:7237.
- PSQF:7342 Research Project in School Psychology** arr.
Experience in research facilities on campus; writing research questions, planning a research study, writing a research article.

- PSQF:7344 Academic Interventions** 3 s.h.
Interventions used by school and support system personnel to address academic skill deficits among children and adolescents; instructional design and delivery problems associated with deficits.
- PSQF:7346 Behavioral Interventions** 3 s.h.
Interventions used by school and support system personnel to address behavioral and social/emotional status of children, adolescents.
- PSQF:7347 Home/School/Community: System Interventions** 3 s.h.
Interventions used by school and support system personnel; focus on work with parents, siblings. Same as RCE:7347.
- PSQF:7350 Seminar in Evaluation** 2-3 s.h.
In-depth examination of selected topics. Prerequisites: PSQF:5165 or EPLS:5165 or PSQF:6265 or EPLS:6266. Requirements: two courses in program evaluation.
- PSQF:7352 Seminar: Behavioral Assessment and Evaluation** 3 s.h.
Broadens skills of graduate students who engage in research with exceptional persons; research designs are usually taught in the Department of Psychological and Quantitative Foundations, but because of the nature of handicapping conditions and the low incidence of some handicaps, the single-subject design yields better research information. Same as EDTL:7952.
- PSQF:7354 Seminar: Experimental Approaches in Counseling Research** arr.
Application of experimental methodology to study of counseling and vocational phenomena.
- PSQF:7355 Seminar: Educational Measurement and Evaluation** arr.
Critical examination of current issues and problems of the professional worker in the field of educational measurement and evaluation as reflected in research literature, other professional communication media.
- PSQF:7356 Process and Outcomes in Counseling Psychotherapy** 3 s.h.
Advanced knowledge of the state of process and outcome research on psychotherapeutic procedures. Requirements: Ph.D. candidacy in appropriate field.
- PSQF:7358 Equating and Scaling of Educational Tests** 3 s.h.
Designs and methods, including linear, equipercentile, and item response theory methods; emphasis on concepts, applications to testing programs, research. Prerequisites: PSQF:6243 and PSQF:6257.
- PSQF:7361 Advanced Practicum in Couple and Family Therapy** 1-3 s.h.
Opportunity to accumulate client contact and supervision hours towards graduation and licensure; conceptual and executive skills, observational skills and abilities to work as a member of a therapeutic team, awareness of how personal growth and development as a therapist impacts work with clients, comfort and motivation to learn multiple training levels provided, creation of collaborative and supportive atmosphere on all practicum levels. Requirements: enrollment in couple and family therapy program.
- PSQF:7365 Theories of Psychotherapy** 3 s.h.
Major psychotherapy theories with emphasis on empirically validated theories used in clinical practice.
- PSQF:7367 Social Psychology and Social Systems** 3 s.h.
Social aspects of behavior in organizations; behavioral science theory and research on organizations, system change, transformation, leadership.
- PSQF:7375 Topics in Educational Measurement and Statistics** 1-3 s.h.
- PSQF:7380 Practicum in College Teaching** arr.
Supervised college teaching experience in courses related to major academic areas, in collaboration with faculty course instructors.
- PSQF:7385 Teaching and Learning in Higher Education** 3 s.h.
Current theoretical and empirical literature on teaching and learning in higher education; focus on development of effective teaching practice. Same as EDTL:7385, EPLS:7385, GRAD:7385, RCE:7385.
- PSQF:7388 Family Development** 3 s.h.
Overview of research relating to family development, family structure, and cultural/ethnic diversity; how research can be applied to clinical practice; focus on strengths and challenges of families with varying structures, cultural dimensions in family functioning, developmental perspectives on family functioning, and how these factors can advance family systems based on research and practice.
- PSQF:7389 Seminar in Couple Intervention Research** 3 s.h.
Overview of couple intervention and outcome research; focus on evidence-based couple therapies (i.e., Emotionally Focused Couple Therapy, Behavioral Couple Therapy, work of John Gottman); research addressing effectiveness and efficiency of couple interventions in treatment of couple distress issues highly comorbid with distress, including review of mental and physical health problems; research addressing factors associated with treatment outcomes.
- PSQF:7390 Supervision of School Psychology Practicum/Internship** arr.
Experience supervising school psychology practicum or internship students. Requirements: Ph.D. standing.
- PSQF:7393 M.A. Thesis in Psychological and Quantitative Foundations** arr.
- PSQF:7394 Supervised Research in Counseling Psychology** 1-3 s.h.
- PSQF:7395 Social Context and Family Research** 3 s.h.
Review and analysis of pertinent research surrounding social contexts in which families live; specific focus on reviewing and critically analyzing decade reviews and current advancements in family research; students evaluate how research surrounding social context and family research is relevant to the practice of couple and family therapy.
- PSQF:7399 Supervision in Couple and Family Therapy** 3 s.h.
Supervision of Master's-level couple and family therapy students; mentoring supervision received from supervision instructor; assignments reflect requirements for AAMFT Approved Supervisor designation; fulfills didactic requirement for AAMFT Approved Supervisor status. Requirements: enrollment in couple and family therapy program.

PSQF:7404 Seminar in Child and Adolescent Intervention Research 3 s.h.

Review and analysis of pertinent literature and evidenced-based interventions for children and adolescents; focus on review and critical analysis of published outcome studies in areas of childhood and adolescent disorders; examination and critique of effective interventions that have undergone stages 1-3 clinical trials; active discussions of research findings for clinical implications. Prerequisites: PSQF:5262.

PSQF:7434 Practicum in Counseling Psychology 3 s.h.

Supervised practice in counseling services. Prerequisites: PSQF:6223 and PSQF:6225.

PSQF:7437 Internship in School Psychology arr.

Supervised internship for Ph.D. students in school psychology. Requirements: completion of required courses.

PSQF:7450 Practicum in Program Evaluation arr.

Supervised experience in designing and implementing components of program evaluations. Prerequisites: PSQF:5165 or EPLS:5165 or PSQF:6265 or EPLS:6266. Requirements: two courses in program evaluation.

PSQF:7452 Leadership, Consultation, and Supervision 3 s.h.

Overview of intervention modalities other than individual and group therapy, especially those that pertain to leadership within organizations, consultation with organizations and communities, and supervision of the work of others; capstone course in counseling psychology sequence. Prerequisites: PSQF:6223 and PSQF:6225.

PSQF:7453 Advanced Practicum in Counseling Psychology 1-3 s.h.

Supervised work in counseling services. Prerequisites: PSQF:7434.

PSQF:7455 Generalizability Theory 3 s.h.

Analysis of variance methods applied to estimation of components of various types of measurement error variance; basic concepts, mathematical foundations, models, assumptions, designs, applications; relationships with other measurement theories. Prerequisites: PSQF:6246 and PSQF:6258.

PSQF:7457 Advanced Group Leadership Experience 3 s.h.

Practice working in a psychotherapy group; review major theories on group psychotherapy processes, integrate empirical research on effectiveness of group work; multicultural considerations in group psychotherapy; didactic and experiential format. Prerequisites: RCE:7357.

PSQF:7458 Internship in Counseling Psychology arr.

Supervised work in internship setting. Prerequisites: PSQF:7434 and PSQF:7453. Requirements: Ph.D. standing in counseling psychology and completion of all requirements except dissertation.

PSQF:7459 Seminar: Issues and Trends in Counseling Research 4 s.h.

Recent trends, including debates and findings in literature related to best practices for the profession. Same as RCE:7458.

PSQF:7460 Seminar: Research in Counseling 3 s.h.

Methods, examples, ethics, multicultural issues, problems of counseling research. Requirements: Ph.D. enrollment. Same as RCE:7460.

PSQF:7465 Issues and Ethics in Professional Psychology 3 s.h.

Professional ethics; issues in professional practice of psychology.

PSQF:7493 Ph.D. Thesis in Psychological and Quantitative Foundations arr.

PSQF:7500 Advanced Practical Experience in Couple and Family Therapy 1-3 s.h.

Supervised experience in professional couple and family therapy; clinical or academic field placement and seminar; required for couple and family therapy students. Requirements: successful completion of couple and family therapy program comprehensive examination.

PSQF:7604 Scholarly Integrity and Responsible Conduct of Educational Research and Evaluation for Postdocs 0 s.h.

Students are introduced to and deepen their knowledge and skills in applying principles for the responsible conduct of educational research and evaluation and related social sciences; two modules addressing core areas identified by federal policy as minimal requirements for knowledge and skill in practice of research with scholarly integrity; format is discovery and discussion—presentation of background information for each topic is followed by discussion of case studies and other examples relevant to each topic; for postdoc associates.

Educational Psychology, Minor

Requirements

The undergraduate minor in educational psychology requires 15 s.h., including at least 12 s.h. earned at the University of Iowa and 12 s.h. earned in courses numbered 3000 or above. Students must maintain a g.p.a. of at least 2.50 in all courses for the minor. Coursework in the minor may not be taken pass/nonpass. Transfer credit must be approved in order for it to count toward the minor. The minor is open to all students enrolled in an undergraduate degree program.

The minor provides an enriched background in educational psychology, educational testing, and research methods in education. Students earning the minor select a department advisor, who helps them choose appropriate coursework. It does not lead to certification for public school teaching.

Coursework for the minor in educational psychology must include 15 s.h. selected from the following list.

Code	Title	Hours
PSQF:1075	Educational Psychology and Measurement	3
PSQF:4106	Child Development	3
PSQF:4111	Human Motivation	3
PSQF:4120	Psychology of Giftedness	3
PSQF:4133	The Adolescent and Young Adult	3
PSQF:4134	Parent-Teacher Communication	1-3
PSQF:4143	Introduction to Statistical Methods	3
PSQF:4150	Introduction to Educational Measurement	3-4
PSQF:4750	Learning Environments: Design, Context, and Activity	3
PSQF:4760	Participatory Learning and Media: Creating, Remixing, Making, and Education	3
PSQF:5165	Introduction to Program and Project Evaluation	3

Contact the Office of Student Services for more information about the minor.

Psychological and Quantitative Foundations, M.A.

Counseling Psychology (Hong Kong)

The department is not admitting students to the counseling psychology subprogram held in Hong Kong at this time.

The Master of Arts program in psychological and quantitative foundations with a counseling psychology subprogram is held in Hong Kong. The program requires a minimum of 34 s.h. of graduate credit with no thesis. Prerequisites for some of the required courses may mean that students will need to complete additional coursework. Students are expected to maintain a cumulative g.p.a. of at least 2.75. Courses are taught year round, and each course covers one month of instruction and one month of no instruction. Students can complete their M.A. in at least 24 months.

The program provides students with education in the theories, research, and scholarship about the principles and foundational knowledge in counseling psychology. Students learn relevant psychological interventions, strategies, and remediation to work with people in order to effectively solve problems, respond to client situations, and plan for the future. Because there is no supervised practicum component to this degree, students who graduate with the M.A. are not eligible to practice counseling psychology or be licensed in the United States. However, students will be qualified to apply for doctoral programs in professional psychology and counseling fields such as clinical counseling, school psychology, counselor education, rehabilitation counseling, and school counseling.

Required Courses

Code	Title	Hours
All of these:		
PSQF:4162	Introduction to Couple and Family Therapy	3
PSQF:5150	Introduction to Counseling and Skills	3
PSQF:5151	Health and Wellness Counseling Psychology	3
PSQF:5152	Assessment and Diagnosis	3
PSQF:6235	Multicultural Counseling	3
PSQF:6246	Design of Experiments (section EXW)	4
PSQF:6312	Psychopathology Across the Lifespan	3
PSQF:7306	Psychotherapy III: Work Psychology and Career Interventions	3
PSQF:7457	Advanced Group Leadership Experience	3
PSQF:7465	Issues and Ethics in Professional Psychology	3
RCE:4174	Positive Psychology	3
Total Hours		34

Admission

Applicants must submit an application for admission through the Office of Graduate Admissions, two letters of recommendation, a professional résumé or curriculum vita, a personal statement that details the reasons for seeking admission to the program, and a writing sample. Faculty in the counseling psychology program will review applications and make decisions on who is admitted to the program. Students are admitted to the program in the fall, spring, and summer sessions.

Educational Measurement and Statistics

The Master of Arts program in psychological and quantitative foundations with an educational measurement and statistics subprogram requires a minimum of 30 s.h. of graduate credit with thesis and 32 s.h. of graduate credit without thesis. Students are expected to maintain a cumulative g.p.a. of at least 2.75.

The program provides students with basic knowledge of educational measurement and research methodology. Graduates find employment in large school systems, state departments of education, test publishing organizations, and research centers. The program also is appropriate for students who wish to broaden their knowledge of measurement and research methodology for personal development or professional improvement.

Students must complete a core of courses (approximately 26 s.h.) that includes a graduate-level survey course in educational psychology, elementary and intermediate courses in statistical methods, a course in quantitative educational research methodology, and courses in the development and use of evaluation instruments. Students who already have completed equivalent courses at another institution may add more advanced courses to the core.

Thesis students complete 4 s.h. of additional coursework beyond the core and 2 s.h. of thesis credit. Nonthesis students complete 6 s.h. of additional coursework beyond the core.

The six-hour comprehensive examination typically includes three-hour examinations in educational measurement and in applied statistics. With the approval of the M.A. committee, a student may take two-hour examinations in these fields plus a two-hour examination in educational psychology or a substitute area. Three-hour examinations assume a minimum of three courses in the area; two-hour examinations assume a minimum of two courses in the area.

Admission

Applicants must meet the admission requirements of the Graduate College. They should have a combined verbal and quantitative score of at least 300 on the Graduate Record Examination (GRE) General Test; however, the GRE requirement has been suspended for the 2020-21 admissions cycle. Completion of at least one college mathematics course and experience as a teacher or researcher are desirable. Applicants who do not meet these requirements but who show offsetting evidence of superior ability may be granted conditional admission.

Applicants must submit a statement of purpose that explains how the educational measurement and statistics subprogram will help them accomplish their educational and vocational goals.

For information about admission dates, contact the educational measurement and statistics program coordinator.

Learning Sciences

The Master of Arts program in psychological and quantitative foundations with a learning sciences subprogram has a strong emphasis on how theory and research inform the understanding of learners, learning, instruction, and the technology and environments in which learning and instruction occur. The program requires a minimum of 30 s.h. of graduate credit. Students are expected to maintain a cumulative g.p.a. of at least 2.75. A thesis is not required.

The curriculum includes courses in the theories of the learning sciences, design of effective learning environments and technologies, and implementation of instructional design. Elective opportunities allow students to choose an interest area to develop a multidisciplinary specialization. Current areas include technology and media, human development and motivation, and measurement and evaluation. The capstone experience of the program is an internship/practicum/portfolio that allows students to apply knowledge of the learning sciences in a context of interest. Students develop a program of study in consultation with their advisor.

Full-time students typically take at least 9 s.h. each semester, with the option of additional summer session work; they usually complete the program in four semesters. Part-time students take 3 to 6 s.h. each semester; they usually complete the degree in two or three years.

Students may apply substitute equivalent coursework from another institution or department for required or recommended courses.

The M.A. in psychological and quantitative foundations with a learning sciences subprogram requires the following coursework.

Required Courses

Code	Title	Hours
All of these:		
PSQF:6200	Educational Psychology	3
PSQF:6203	Tools and External Representations in Individual and Social Learning	3
PSQF:6204	Foundations of the Learning Sciences	3
PSQF:6205	Design of Instruction	3
PSQF:6214	Design of Learning Environments: Theory, Practice, and Method	3
PSQF:6281	Cognitive Theories of Learning	3
PSQF:6299	M.A. Project: Portfolio/ Internship/Practicum	3
One of these:		
PSQF:6208	Digital Media and Learning	3
PSQF:6215	Web-Based Learning	3

Electives

Elective opportunities allow a student to choose an area of interest to develop a multidisciplinary specialization.

Students choose two courses (6 s.h.) from one of the following focus areas.

Human Development and Motivation

Code	Title	Hours
PSQF:4106	Child Development	3
PSQF:4111	Human Motivation	3
PSQF:4133	The Adolescent and Young Adult	3
PSQF:6206	Advanced Child Development	3

Technology and Media

Code	Title	Hours
PSQF:4760	Participatory Learning and Media: Creating, Remixing, Making, and Education	3
PSQF:6211	Universal Design and Accessibility for Online Instruction	3
PSQF:6216	Tools and Utilities for Online Teaching	3

One of these, if not taken as a required course above:

PSQF:6208	Digital Media and Learning	3
PSQF:6215	Web-Based Learning	3

Measurement and Evaluation

Code	Title	Hours
PSQF:4143	Introduction to Statistical Methods	3
PSQF:4740	Issues in K-12 Assessment	3
PSQF:5165	Introduction to Program and Project Evaluation	3
PSQF:6220	Quantitative Educational Research Methodologies	3
PSQF:6257	Educational Measurement and Evaluation	3
PSQF:6265	Program Evaluation	3

Admission

Applicants must meet the admission requirements of the Graduate College, including the minimum grade-point average. Viable applicants should have a verbal score of at least 146 and a quantitative score of at least 149 on the Graduate Record Examination (GRE) General Test (the GRE requirement has been suspended for the 2020-21 admissions cycle); successful applicants generally score higher.

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

Admission decisions are announced approximately six weeks after the application deadline. Applicants who accept admission or financial aid and do not relinquish either one on or before April 15 should consider themselves committed and should not solicit or accept another offer. Offers made by the program after April 15 include the provision that the offer is void if the applicant has accepted and continues to hold a previous offer from another program listed in the American Psychological Association publication, *Graduate Study in*

Psychology and Associated Fields. This policy is consistent with standards set by the association's Board of Educational Affairs.

Application deadline for fall semester entry is January 15 with review beginning soon after. Applications after the deadline will not be considered for funding.

Psychological and Quantitative Foundations, Ed.S.

Requirements

The educational specialist (Ed.S.) program in psychological and quantitative foundations with a school psychology subprogram requires a minimum of 67 s.h. of graduate credit. Students are expected to maintain a cumulative g.p.a. of at least 3.00.

The program provides coursework and supervised field experience in education and psychology, enabling graduates to qualify for Iowa licensure as a school psychologist (State of Iowa endorsement 236). The Ed.S. degree is an option for current students in the Ph.D. in psychological and quantitative foundations with a school psychology subprogram.

The curriculum includes courses in psychological foundations, psychoeducational foundations, school psychology, and research methods. Other requirements include a prepracticum, a written portfolio, and a project paper prepared in conjunction with PSQF:7342 Research Project in School Psychology.

The Ed.S. in psychological and quantitative foundations includes the following coursework.

Code	Title	Hours
One of these (or equivalent):		
PSQF:5219	Foundations of Health Service/School Psychology	3
PSQF:7225	Introduction to Health Service/School Psychology Practice	3
All of these (or equivalents):		
PSQF:6206	Advanced Child Development	3
PSQF:6235	Multicultural Counseling	3
PSQF:6238	Assessment of Learning Differences	3
PSQF:6243	Intermediate Statistical Methods	4
PSQF:6263	Consultation Theory and Practice	3
PSQF:7310	Intelligence Assessment	3
PSQF:7313	Psychopathology in Childhood	3
PSQF:7315	Social and Emotional Assessment of Children and Adolescents	3
PSQF:7237	Beginning Practicum in School Psychological Service	3
PSQF:7337	Advanced Practicum in School Psychology	9
PSQF:7342	Research Project in School Psychology (Ed.S. project)	4
PSQF:7437	Internship in School Psychology (Ed.S. field experience)	5

PSQF:7465	Issues and Ethics in Professional Psychology	3
EDTL:4900	Foundations of Special Education	3
EDTL:4950	Behavioral and Social Interventions	3
EDTL:7953	Seminar: Single Subject Design Research	3
RCE:5202	Introduction to Group Counseling	3
RCE:5222	Counseling Children and Adolescents in Schools	3

Psychological and Quantitative Foundations, Ph.D.

Counseling Psychology

The Doctor of Philosophy program in psychological and quantitative foundations with a counseling psychology subprogram requires a minimum of 103 s.h. of graduate credit. The program requires full-time study. Students are expected to maintain a cumulative g.p.a. of at least 3.00.

The goal of the program is to prepare counseling psychologists who will promote psychology as a science and contribute to the advancement of the profession. The faculty endorses a scientist/practitioner model of training and expects students to become competent researchers and proficient practitioners. Graduates find positions in a variety of settings, including higher education, counseling centers, clinics, private practice settings, and hospitals.

The program is fully accredited by the American Psychological Association. Students must show appropriate levels of emotional balance and interpersonal skills and act within the American Psychological Association's *Ethical Principles of Psychologists*. For more information, contact the program director.

The Ph.D. in psychological and quantitative foundations with a counseling psychology subprogram requires the following work.

Research Requirements

Four research courses are required; students must take at least two quantitative courses, one qualitative course, and six semesters of the supervised research course as follows.

Code	Title	Hours
These two courses:		
PSQF:7331	Seminar: Educational Psychology I - Current Topics (when topic is qualitative educational research methods)	3
PSQF:7394	Supervised Research in Counseling Psychology (taken six semesters for 1 s.h. each)	6
One of these:		
PSQF:6242	Selected Applications of Statistics	3
PSQF:6243	Intermediate Statistical Methods (required if will take PSQF:6244 or PSQF:6246 below)	4
One of these:		
PSQF:6244	Correlation and Regression (must take PSQF:6243 before this course)	4
PSQF:6246	Design of Experiments (must take PSQF:6243 before this course)	4

PSQF:7201	Counseling Psychology Research Writing	3
-----------	--	---

Qualitative and quantitative methodology is discussed in PSQF:7394 Supervised Research in Counseling Psychology, which is directed each semester by faculty advisors. Research from each student is discussed and evaluated, critiqued, and supported.

Basic Psychology

All students are required to have a thorough grounding in the basic discipline of psychology. This may be achieved through a minimum of 3 s.h. of credit in each of the following four areas: biological bases of behavior, cognitive-affective bases of behavior, social bases of behavior, and history and systems. Students complete an additional 6 s.h. in the area of individual differences.

Counseling Psychology Core

Code	Title	Hours
PSQF:6223	Introduction to Counseling Psychology Practice/ Research I	3
PSQF:6225	Introduction to Counseling Psychology Practice/ Research II (therapy)	3
PSQF:6235	Multicultural Counseling	3
PSQF:7306	Psychotherapy III: Work Psychology and Career Interventions	3
PSQF:7309	Personality Assessment	3
PSQF:7310	Intelligence Assessment	3
PSQF:7354	Seminar: Experimental Approaches in Counseling Research (when topic is internship readiness/ professional issues)	3
PSQF:7356	Process and Outcomes in Counseling Psychotherapy	3
PSQF:7365	Theories of Psychotherapy	3
PSQF:7434	Practicum in Counseling Psychology	3
PSQF:7452	Leadership, Consultation, and Supervision (counseling psychology practice/ research III)	3
PSQF:7453	Advanced Practicum in Counseling Psychology (repeatable)	1-3
PSQF:7457	Advanced Group Leadership Experience	3
PSQF:7465	Issues and Ethics in Professional Psychology	3

Students must enroll in practicums to reach a specified level of client contact, supervision, and additional experience hours. The first practicum site is typically University Counseling Service. Subsequent placements at other sites must have prior approval of the counseling psychology faculty. Students must successfully complete one semester of PSQF:7434 Practicum in Counseling Psychology before enrolling in PSQF:7453 Advanced Practicum in Counseling Psychology.

Electives

Elective courses are determined in collaboration with the major advisor.

Internship

Students spend a calendar year in an internship setting approved by the counseling psychology faculty. The faculty determines student readiness to apply for the internship based on completion of all required coursework, successful defense of comprehensive exams, and successful completion of practicum requirements. Internships usually require geographic relocation.

Comprehensive Exam and Dissertation

The comprehensive examination consists of an oral and a written component. The exam includes research and practice elements. For more information, contact the program coordinator.

The dissertation research study is planned in collaboration with the student's major advisor. Dissertation credit ranges from 12 to 15 s.h.

Admission

Applicants must meet the admission requirements of the Graduate College. Preference is given to applicants who have an undergraduate g.p.a. above 3.00 and a graduate g.p.a. above 3.50; an undergraduate major, minor, or substantial coursework in psychology; a Graduate Record Examination (GRE) General Test verbal score of 152 or higher, quantitative score of 151 or higher, and analytical writing score of 3.5 or higher (the GRE requirement has been suspended for the 2020-21 admissions cycle); and previous research and counseling experience.

Students should submit a Graduate College application form, official transcripts of all previous college work, an official report of GRE General Test scores (the GRE advanced test in psychology is recommended but not required; however, the GRE requirement has been suspended for this academic year), a personal statement outlining career goals and reasons for seeking advanced training in counseling psychology, and three letters of recommendation from individuals qualified to assess the applicant's potential for completing the doctoral program. The faculty encourages applications from minorities, women, and persons from a wide range of backgrounds and academic preparation. The program typically accepts between seven and 10 students each year.

Students begin the program in fall. Application deadline is December 1; admission decisions usually are made by March 1. Applicants are invited to campus for interviews before final selection.

Couple and Family Therapy

The Doctor of Philosophy program in psychological and quantitative foundations with a couple and family therapy (CFT) subprogram requires a minimum of 73 s.h. of graduate credit. Students are expected to maintain a cumulative g.p.a. of at least 3.00.

The program aims to prepare couple and family therapists for roles in academic and research settings. Using a social justice and a relational/systemic perspective, the program prepares CFT students to become ethically and multiculturally

responsive scholars, clinicians, supervisors, and educators. The program has five goals: to equip students to generate and disseminate social justice and relational/systemic informed research using innovative research methods; to prepare effective CFT educators; to equip students with advanced couple and family therapy theoretical training for use in clinical and supervisory settings; to promote ethical practices of students in their scholarship, clinical, and educational endeavors; and to engender multicultural responsiveness of students in their scholarship, clinical, and educational endeavors.

Graduates are expected to have sufficient knowledge and skill to teach and conduct research at colleges and universities; supervise other professionals; and provide clinical services to individuals, couples, and families. Graduates also should have competencies to engage in and evaluate theory-based qualitative and/or quantitative research.

Requirements for the degree include coursework, a systematic review, a theory of change paper, an ethics autobiography paper, a comprehensive exam portfolio, an advanced practical experience, and a dissertation. Most students complete the program's required coursework in two or three years and take one or two years to complete the advanced practical experience and dissertation. The CFT faculty reviews each student annually; students must fulfill program requirements in order to continue in the program.

The Ph.D. in psychological and quantitative foundations with a couple and family therapy subprogram requires the following.

Research Requirement

Code	Title	Hours
All of these:		
PSQF:5265	Research Methods in Couple and Family Therapy	3
PSQF:6243	Intermediate Statistical Methods	4
PSQF:7331	Seminar: Educational Psychology I - Current Topics (when topic is qualitative educational research methods)	3
PSQF:7459	Seminar: Issues and Trends in Counseling Research	4
PSQF:7460	Seminar: Research in Counseling	3

Advanced Research Course

Code	Title	Hours
One of these:		
PSQF:6244	Correlation and Regression	4
PSQF:6246	Design of Experiments	4
An advanced qualitative course		3

Theoretical and Clinical Core

Code	Title	Hours
All of these:		
PSQF:5262	Advanced Couple and Family Therapy	3
PSQF:7356	Process and Outcomes in Counseling Psychotherapy	3

PSQF:7361	Advanced Practicum in Couple and Family Therapy (must be taken multiple times for total of 9 s.h.)	9
PSQF:7389	Seminar in Couple Intervention Research	3
PSQF:7395	Social Context and Family Research	3
PSQF:7399	Supervision in Couple and Family Therapy	3
PSQF:7404	Seminar in Child and Adolescent Intervention Research	3

Teaching Requirement

Code	Title	Hours
All of these:		
PSQF:6216	Tools and Utilities for Online Teaching	3
PSQF:6217	Seminar in College Teaching	3
PSQF:7380	Practicum in College Teaching	3
EALL:7475	Ph.D. ePortfolio in College Teaching	3

Ethics and Multicultural Course

Code	Title	Hours
This course:		
PSQF:6235	Multicultural Counseling	3

Comprehensive Examination

The comprehensive examination consists of a portfolio that a student has compiled during the program and its oral defense once coursework has been completed.

Advanced Practical Experience

Students must complete a clinical, research, academic, and/or administrative experience.

Code	Title	Hours
PSQF:7500	Advanced Practical Experience in Couple and Family Therapy (when topic is advanced practical experience)	2

Dissertation

Work for the doctoral dissertation employs a student's independent skills in conducting original research. The dissertation process is supervised by a student's advisor. Depending on a student's research questions, the dissertation may require quantitative, qualitative, or mixed methods and may involve data collection or the secondary analysis of an existing data set. The thesis advisor and the examining committee approve the topic and procedures at a formal prospectus meeting. The final oral examination on the thesis is conducted by the examining committee.

Code	Title	Hours
PSQF:7493	Ph.D. Thesis in Psychological and Quantitative Foundations	10

Admission

Applicants to the program must meet the department's general admission requirements. Applicants should have a graduate g.p.a. of at least 3.00 and a Graduate Record Exam (GRE) General Test combined verbal and quantitative score of at least 300 on the revised test or at least 1100 on the older version of the test; however, the GRE requirement has been suspended for the 2020-21 admissions cycle. They also must hold a master's degree in couple and family therapy or marriage and family therapy from a program that is accredited by the Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE) or its equivalent.

Students are admitted for fall entry. All application materials should be received on or before December 31, when the faculty begins evaluating applications. The program requires an interview with the faculty, in person, or by telephone. Generally, the interview is scheduled once complete application materials have been received.

Educational Measurement and Statistics

The Doctor of Philosophy program in psychological and quantitative foundations with an educational measurement and statistics subprogram requires a minimum of 90 s.h. of graduate credit. Students are expected to maintain a cumulative g.p.a. of at least 3.00.

The program prepares students for senior professional positions in educational measurement, evaluation, and statistical methods. Graduates find employment in colleges and universities, state and federal agencies, large public and private school systems, test publishing firms, and research centers.

During the first year of graduate study, a student and the advisor plan a program of study that is appropriate for the student's interests and vocational objectives. The typical program involves advanced work in educational measurement, data analysis methods, research methodology, and educational psychology. Work in other University of Iowa departments is encouraged.

Students who concentrate in statistics and intend to teach at the college level take courses in the mathematical theory of statistics. Those who concentrate in educational measurement and evaluation take appropriate courses in curriculum, counseling, or higher education. All students are required to develop familiarity with computer programming techniques and equipment.

Students who enter the program without completing an M.A. thesis must complete a substitute project before taking the Ph.D. comprehensive examinations.

After completing most of their coursework, students take the comprehensive examination, which typically consists of three 3-hour written examinations on educational measurement, applied statistics, and program evaluation or approved substitute areas, such as educational psychology or mathematical statistics, in which a student has completed at least 9 s.h. of coursework. In place of one written examination, the student's committee may assign a project involving analytical and evaluative skills, or research creativity. The written examinations are followed by an oral examination in which the committee seeks further evidence of the student's command of the three fields. A single decision is made on all aspects of the comprehensive examination.

Work for the Ph.D. concludes with the dissertation, which is included in the 90 s.h. required for the degree.

Research Requirement

Code	Title	Hours
One of these:		
PSQF:6220	Quantitative Educational Research Methodologies	3
An equivalent course comparable in content and level of rigor, such as EALL:5150		

Quantitative Requirements

Code	Title	Hours
This course:		
PSQF:6243	Intermediate Statistical Methods	4
Two of these:		
PSQF:6244	Correlation and Regression	4
PSQF:6246	Design of Experiments	4
PSQF:6247	Nonparametric Statistical Methods	3
PSQF:6249	Factor Analysis and Structural Equation Models	3
PSQF:6252	Introduction to Multivariate Statistical Methods	3
EPLS:6206	Research Process and Design	3
EPLS:6209	Survey Research and Design	3
EPLS:6370	Quantitative Methods for Policy Analysis	3

Qualitative Requirements

Code	Title	Hours
One of these (may be taken on a nongraded basis with approval of student's program and advisor):		
PSQF:7331	Seminar: Educational Psychology I - Current Topics (when topic is qualitative educational research methods)	3
EDTL:7070	Qualitative Research Methods in Teaching and Learning	3
EPLS:7373	Qualitative Research Design and Methods	3
RCE:7338	Essentials of Qualitative Inquiry	3
An equivalent course comparable in content, level, or rigor (consult advisor)		
One of these:		
PSQF:5165	Introduction to Program and Project Evaluation	3
PSQF:6265	Program Evaluation	3
PSQF:7331	Seminar: Educational Psychology I - Current Topics (when topic is conducting research online)	3
CNW:6654	Forms of the Essay (when topic is the ethnographic essay)	arr.

EDTL:6267	Seminar: Current Issues in Art Education (when topic is qualitative methods)	3-4
EDTL:7071	Critical Discourse Analysis in Educational Research	3
EDTL:7072	Advanced Methods of Literacy Research: Qualitative Data Analysis and Reporting	3
EDTL:7073	Ethnographic Methods, Theories, and Texts	3
EDTL:7410	Mixed Methods Research	3
EDTL:7751	Advanced Qualitative Data Analysis	3
EDTL:7774	Qualitative Research with Computer-Aided Qualitative Data Analysis Software	3
EDTL:7953	Seminar: Single Subject Design Research	3
EPLS:5240	Topics in Education (when topic is introduction to historical methodology)	arr.
RCE:7438	Advanced Qualitative Research Seminar in Rehabilitation and Counselor Education	3
RCE:7444	Qualitative Research in the Multicultural Context	3

Admission

Applicants must meet the admission requirements of the Graduate College. They must have a combined verbal and quantitative score of at least 300 on the Graduate Record Examination (GRE) General Test (the GRE requirement has been suspended for the 2020-21 admissions cycle) and must hold an M.A. from an accredited institution. Applicants who do not hold an M.A. degree are automatically considered for admission to the M.A. program. At least one year of professional experience in teaching, research, or a related field is desirable. Applicants who expect to concentrate in statistics should have training in college mathematics through differential and integral calculus. Applicants who do not meet these requirements but who show offsetting evidence of superior ability may be granted conditional admission.

Applicants must submit a statement of purpose that explains how the educational measurement and statistics subprogram will help them accomplish their educational and vocational goals.

For information about admission dates, contact the educational measurement and statistics program coordinator.

Educational Psychology

The Doctor of Philosophy program in psychological and quantitative foundations with an educational psychology subprogram requires a minimum of 72 s.h. of graduate credit. Students are expected to maintain a cumulative g.p.a. of at least 3.00.

Educational psychology is characterized by empirical research and theory typical of the social and behavioral sciences. The program is designed to help students master the core content and methods of educational psychology and acquire the depth

of knowledge and methodological sophistication necessary for original research that contributes to the discipline.

Students work closely with their advisor to develop a plan of study and define a program that matches their goals and interests. Those who begin the program after earning a master's degree or with coursework from another program may be able to waive some of the Ph.D. program requirements. Students who enter the program without completion of a M.A. thesis are required to complete a research practicum in which students assist with and later design and carry out original research during their first or second year. Students who have completed an empirical M.A. thesis acceptable to the faculty may omit the second-year project.

The program of study includes substantive areas within educational psychology and the learning sciences, including courses in cognition, development, learning theory, and the design of instruction, learning environments, and learning technologies. Other learning opportunities include a research practicum in which students assist with and eventually design and carry out original research, a slate of research courses that meet the College of Education's research requirements, a minor area of the student's choice, and a dissertation in the student's area of interest.

Research Requirement

The heart of educational psychology as a field is the creation, dissemination, and use of rigorous research to better understand and address educational issues. While many of the required courses address various aspects of the guiding principles set out by the National Research Council, students engage in the following coursework and research-related activities.

Code	Title	Hours
All of these:		
PSQF:6220	Quantitative Educational Research Methodologies	3
PSQF:6243	Intermediate Statistical Methods	4
PSQF:7331	Seminar: Educational Psychology I - Current Topics (when topic is qualitative educational research methods)	3
One of these:		
PSQF:6244	Correlation and Regression	4
PSQF:6246	Design of Experiments	4
PSQF:6247	Nonparametric Statistical Methods	3
PSQF:6252	Introduction to Multivariate Statistical Methods	3

Research Project

In consultation with a faculty member, students design, implement, and present an original second-year research study. This experience provides the opportunity to conduct a pilot study that will strengthen their thesis in terms of methods, instruments, theoretical grounding, or focus of research question. Student presentations of their research are open to the public. Students are encouraged to submit their study results for broader dissemination at a local, regional, or national conference.

For students who have received approval to omit this requirement because of an empirical thesis that is acceptable to the educational psychology faculty, an additional research course may be required.

Code	Title	Hours
PSQF:6230	Research in Educational Psychology	3

Required Courses

Code	Title	Hours
All of these:		
PSQF:6200	Educational Psychology	3
PSQF:6205	Design of Instruction	3
PSQF:6281	Cognitive Theories of Learning	3
PSQF:7493	Ph.D. Thesis in Psychological and Quantitative Foundations (minimum requirement)	10

Core Courses

Selection of courses depends on a student's area of specialization.

Code	Title	Hours
At least 15 s.h. from these:		
PSQF:6203	Tools and External Representations in Individual and Social Learning	3
PSQF:6204	Foundations of the Learning Sciences	3
PSQF:6206	Advanced Child Development	3
PSQF:6208	Digital Media and Learning	3
PSQF:6214	Design of Learning Environments: Theory, Practice, and Method	3
PSQF:6215	Web-Based Learning	3
PSQF:6275	Constructivism and Design of Instruction	3
PSQF:7331	Seminar: Educational Psychology I - Current Topics (topics vary; may be repeated if content is related to educational psychology)	arr.

Electives

Students may take up to 9 s.h. of elective coursework. Students can take PSQF:6217 Seminar in College Teaching and/or additional research courses. Other courses may be included in consultation with their advisor.

Minor Area

Students must complete a minimum of 12 s.h. that constitute a coherent program of coursework outside educational psychology and beyond the courses listed above. The minor area may be from a foundation discipline such as mathematics education, educational philosophy, or program evaluation. Courses must be numbered 5000 or above,

can span across departments and colleges, and must be consistent with a plan approved by a student's advisor.

Comprehensive Examination

The Ph.D. comprehensive examination emphasizes competence and depth in one or more narrowly defined areas of research and theory. Students choose from three options in consultation with their advisor and with the approval of the examining committee, composed of five faculty members and does not necessarily include the same faculty members as the dissertation committee. The options are a review article, an extended research activity, or a traditional comprehensive examination. For details of each option's requirements, contact the Department of Psychological and Quantitative Foundations.

Admission

Applicants must meet the admission requirements of the Graduate College, including the minimum grade-point average. They must have a verbal score of at least 150 and a quantitative score of at least 152 on the Graduate Record Examination (GRE) General Test; successful applicants usually score higher (however, the GRE requirement has been suspended for the 2020-21 admissions cycle).

Applicants whose first language is not English must submit official test scores to verify English proficiency. Applicants can verify English proficiency by submitting official test scores from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS).

Applicants who do not meet all admission requirements may be granted conditional admission on the basis of other evidence, such as high grade-point average, strong academic preparation, and highly supportive recommendations. Conditional admission is rare.

Admission is for fall entry. Application deadline is January 15; late applications might not be considered for funding. Review of applications begins soon after, when applicants who wish to be considered for fellowships and other awards are screened. Admission decisions are announced approximately six weeks after the application deadline.

Applicants who accept admission or financial aid and do not relinquish either one on or before April 15 may not solicit or accept another offer. Offers made by the program after April 15 include the provision that the offer is void if the applicant has accepted and continues to hold a previous offer from another program listed in the American Psychological Association publication *Graduate Study in Psychology and Associated Fields*. This policy is consistent with standards set by the association's Board of Educational Affairs.

School Psychology

The Doctor of Philosophy program in psychological and quantitative foundations with a school psychology subprogram requires a minimum of 115 s.h. of graduate credit. Students are expected to maintain a cumulative g.p.a. of at least 3.00.

The program's goal is to prepare doctoral-level school psychologists who will promote psychology as a science and contribute to the advancement of the profession. The faculty endorses a scientist/practitioner model of training and expects students to become competent researchers and proficient practitioners.

Students develop a plan of study in consultation with their academic advisors. They are required to have a thorough

grounding in the basic discipline of psychology, which may be achieved through earning a minimum of 3 s.h. of credit in each of the following areas: biological bases of behavior, cognitive/affective bases of behavior, social bases of behavior, individual differences, history and systems, and other course areas consistent with accreditation.

Students are required to complete yearly portfolio reviews, which include oral examinations; carry out a preliminary dissertation research project equivalent in scope to an M.A. thesis; participate in an internship; and complete a doctoral dissertation, earning a minimum of 10 s.h. in PSQF:7493 Ph.D. Thesis in Psychological and Quantitative Foundations. For further details, contact the program director.

Research Requirement

To receive credit for additional courses, students must obtain prior approval from their advisor and the school psychology program.

Code	Title	Hours

PSQF:6263	Consultation Theory and Practice (taken with PSQF:7337)	3
PSQF:7237	Beginning Practicum in School Psychological Service (minimum of 150 hours required)	3
PSQF:7310	Intelligence Assessment (taken with PSQF:7237)	3

PSQF:7313	Psychopathology in Childhood	3
PSQF:7315	Social and Emotional Assessment of Children and Adolescents	3
PSQF:7337	Advanced Practicum in School Psychology (minimum of 750 hours required)	12
PSQF:7344	Academic Interventions	3
PSQF:7346	Behavioral Interventions	3
PSQF:7352	Seminar: Behavioral Assessment and Evaluation	3
PSQF:7367	Social Psychology and Social Systems	3
PSQF:7380	Practicum in College Teaching (optional)	1-3
PSQF:7390	Supervision of School Psychology Practicum/ Internship	3
PSQF:7437	Internship in School Psychology (one year full-time or two years half-time; total of 1800 hours required)	3

Students must enroll in practicums to reach a specified level of client contact, supervision, and additional experience hours. Placements must have prior approval of the school psychology faculty. Students must successfully complete one semester of PSQF:7237 Beginning Practicum in School Psychological Service before enrolling in PSQF:7337 Advanced Practicum in School Psychology. Students must adhere to the most recent ethical principles and standards of the American Psychological Association.

Additional Courses

These courses are determined in collaboration with the major advisor.

Admission

Applicants must meet the admission requirements of the Graduate College. Preference is given to applicants with an undergraduate major in psychology or education with a g.p.a. above 3.00. A combined verbal and quantitative score of at least 308 and an analytic writing score of 4 or higher on the Graduate Record Examination (GRE) General Test are recommended but not required; however, the GRE requirement has been suspended for the 2020-21 admissions cycle. The faculty also encourages applications from individuals with an M.A. or Ed.S. degree and experience as psychologists or other human service providers.

Applications must include three letters of recommendation, a personal statement of interest and goals, and a writing sample. Complete application materials, including transcripts and test scores, must be received by January 1 to be considered for fall entry. Admission decisions are usually made by March 15. The program admits up to 10 students each year.

Rehabilitation and Counselor Education

Chair

- Noel Estrada-Hernandez

Undergraduate minor: human relations

Graduate degrees: M.A. in rehabilitation and counselor education; Ph.D. in rehabilitation and counselor education

Faculty: <https://education.uiowa.edu/directories>

Website: <https://education.uiowa.edu/rce>

The Department of Rehabilitation and Counselor Education prepares students to facilitate human development across the life span, to advocate for clients and students, and to serve local, national, and international communities through the delivery and creation of state-of-the-art counseling services. The department achieves these goals by advancing knowledge, skills, and attitudes appropriate for effective and ethical professional counseling practice and by conducting and disseminating related research.

The department prepares practitioners and scholars by offering graduate programs in four major areas within rehabilitation and counselor education:

clinical mental health counseling (offered in the M.A.);

counselor education and supervision (offered in the Ph.D.);

rehabilitation counseling program (offered in the M.A.); and

school counseling (offered in the M.A.).

It also offers basic courses in interviewing and interpersonal skills for students in other professional and graduate programs. In addition, the department offers an undergraduate minor in human relations.

Programs

Undergraduate Program of Study

Minor

- Minor in Human Relations [p. 1344]

Graduate Programs of Study

Majors

- Master of Arts in Rehabilitation and Counselor Education [p. 1345]
- Doctor of Philosophy in Rehabilitation and Counselor Education [p. 1349]

Facilities

An on-campus counseling suite serves as a laboratory for training. In addition, a wide variety of supervised clinical experiences are available in community agencies, schools, and colleges, as well as throughout the University. Internships may be completed at approved sites nationwide.

Admission

Prospective students must meet admission requirements for the individual programs as well as the department's general admission requirements. Criminal background checks may be required.

Applicants to any of the department's degree programs must satisfy the following admission requirements. Applicants also must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Applicants must submit the following:

- a completed graduate application form;
- copies of official transcripts of all previous undergraduate and graduate college work;
- official report of Graduate Record Exam (GRE) General Test verbal and quantitative scores (however, the GRE requirement has been suspended for the 2020-21 admissions cycle);
- a statement of an applicant's reasons for seeking an advanced degree in the department, including a statement of personal career objectives; and
- three current letters of recommendation from persons qualified to assess the applicant's prospects for completing the M.A. or Ph.D. and to assess the applicant's commitment to the profession.

The department may request a personal or telephone interview.

The following admission standards are considered for individual program admission decisions.

M.A. applicants should have an undergraduate g.p.a. of at least 3.00.

Ph.D. applicants should have a graduate g.p.a. of at least 3.00; those who have not been granted a graduate degree should have an undergraduate g.p.a. of at least 3.00.

International applicants must score at least 80 (internet-based) on the Test of English as a Foreign Language (TOEFL). The department may require applicants with lower TOEFL scores to complete University of Iowa coursework in English language fluency. TOEFL scores must be submitted with the application for admission.

Typically, doctoral students are not admitted unless they have completed a master's degree in counseling or a related field. Relevant work experiences are important. Students who are accepted without a related master's degree must complete core master's-level coursework before taking advanced Ph.D. courses. Required remedial courses and experiences are determined in consultation with the advisor and are included in a student's curriculum plan.

The criteria listed above are minimum standards for admission. Final admission decisions are made by faculty committees. Some of the department's programs have additional admission requirements; see the descriptions of the individual programs.

Application

For application materials, visit Iowa Graduate Admissions and the Department of Rehabilitation and Counselor Education website.

Applications must be complete before they can be reviewed. Applicants are responsible for providing a complete application dossier; to check on whether an application dossier is complete, contact the Office of Student Services in the College of Education.

Applicants are notified in writing after their applications have been reviewed. Applicants who are accepted must reply in writing in order to maintain their admission status.

Financial Support

Students in the department may apply for a wide variety of graduate assistantships. For example, many of the University's student service units award graduate assistantships. Applicants for assistantships should contact the department or the coordinator of the particular graduate program they plan to enter.

Applicants seeking fellowships or assistantships should complete their applications as early as possible.

Courses

Rehabilitation and Counselor Education Courses

RCE:1029 First-Year Seminar 1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

RCE:1030 Belin-Blank Center Seminar 1 s.h.

Presentations and discussions by University resource experts and Belin-Blank Center for Gifted Education staff. Requirements: Belin-Blank Center student.

RCE:2081 Making a Vocational-Educational Choice 2-3 s.h.

Vocational decision-making process, self-evaluation, exploration of the world of work; for students who are uncertain about their educational and vocational goals.

RCE:2090 Parenting and Family Life 3 s.h.

Parenting and family life with fathers who are currently incarcerated; enhancement of ongoing relationships with children and family; emphasis on assisting a father's relationship with his family with co-parenting strategies, nonviolent discipline, caring parenting styles, and behavioral management to foster successful child development; strategies for maintaining relationships with children and families; communication skills, building trust, positive discipline, behavioral management, conflict management, and positive visitation strategies. Requirements: Iowa Medical and Classification Center inmate.

RCE:4081 ePortfolio Design and Production 1-2 s.h.

Experience producing an ePortfolio and uploading it to the internet; practical experience using digital tools, content and design related to ePortfolio production; experience using a web browser, accessing the internet, and using a digital camera or scanner. Requirements: able to perform basic computer functions and use a World Wide Web browser. Same as EALL:4081, EDTL:4081, EPLS:4081, PSQF:4081.

RCE:4109 Introduction to Athlete Mental Health 3 s.h.

Overview of athlete mental health with emphasis on support services for high school and collegiate student-athletes as well as professional athletes; introduction to key players/stakeholders, ethical considerations, potential career paths for those pursuing careers in this industry, and importance of addressing mental health needs of athletes at all levels of sport participation.

RCE:4110 Psychology of Food and Mood 3 s.h.

Neurobehavioral and psychological determinants of food preference, behavior, and mood management; cultural meanings of food in North America, obesity, dieting, disordered eating; how we use food as a means of managing or damaging our food and health.

RCE:4111 Building Leadership and Success at Work 3 s.h.

Strategies to achieve employer expectations of effective leadership, communication, motivation, teamwork, and conflict management; students gain knowledge of self and how to best respond in various workplace situations.

RCE:4112 How to Interview to Get That Job! 3 s.h.

Learn two approaches to job interviews—how to interview to obtain a job and how to interview applicants for a job; gain knowledge and skills necessary to successfully conduct interviews from applicant and employer perspectives; review interview processes and legal and ethical boundaries within interviews; examine interview formats and styles and gain confidence to successfully respond to typical interview questions; learn to develop interview questions as an applicant and as an employer; communication best practices prior/during/following an interview.

RCE:4113 Sleep, Sleep Deprivation, and Sleep Disorders 3 s.h.

Theories and stages of sleep; aging and normal sleep; impact of sleep and sleep deprivation on mental and physical health; overview of sleep disorders and treatments.

RCE:4114 Psychology of Body Modification and Self-Image 3 s.h.

Exploration of psychology and practices of body modification as related to self-image; dynamic relationship between body and identity; body modification accomplished in many ways and for many reasons (beauty, social status, religious expression, improve function, to rebel); how gender, race, culture, age, and health shape our attitudes about our bodies and our decision to make modifications; risks and benefits (physical, emotional, social) of making a body modification to ones' sense of self as it relates to others and to oneself.

- RCE:4115 Developing Ethical Awareness and Decision Making Through Virtual Environments** 3 s.h.
Introduction to ethical and decision making models using experiential activities in a virtual world; development of role playing characters in the PC-based virtual world of Skyrim; students face a multitude of ethical dilemmas, personal situations that explore participants' value systems, and decisions to be made in different contextual environments; review of several ethical models including developmental perspectives, approaches to ethical decision making, values scales, and moral development models which are applied to reflective writing activities and case presentations.
- RCE:4119 Family Issues in Giftedness** 1 s.h.
Family dynamics and issues that arise when one or more children are identified as gifted; parent/child, sibling, school/family relationships.
- RCE:4120 Psychology of Giftedness** 3 s.h.
Theories of learning, child development, motivation; issues unique to gifted education. Same as PSQF:4120.
- RCE:4121 Identification of Students for Gifted Programs** 3 s.h.
Interpretation of standardized tests and other measurement instruments used to identify academic talent and program effectively for grades K-12; ability, aptitude, achievement tests; current issues in the uses of various instruments. Same as PSQF:4121.
- RCE:4123 Gender Issues and Giftedness** 1 s.h.
Effect of gender on development of giftedness; differential needs of girls, boys; strategies for effective teaching, gender equity.
- RCE:4124 Ethnic and Cultural Issues and Giftedness** 1 s.h.
Effect of ethnicity and culture on development of giftedness; special needs of Black, Hispanic, Native American, and Asian gifted students; strategies for identification, programming.
- RCE:4125 Counseling and Psychological Needs of the Gifted** 1 s.h.
Psychological aspects of giftedness, counseling techniques appropriate for gifted children, adolescents; socio-emotional concerns, career development, underachievement. Same as PSQF:4125.
- RCE:4126 Cognitive and Affective Needs of Underachieving Gifted** 1 s.h.
Diagnostic strategy for identifying types of underachievement, teaching and counseling interventions appropriate for each. Same as PSQF:4126.
- RCE:4128 Advanced Leadership Seminar in Gifted Education** 1 s.h.
Development of administrative policies and programming based on empirical research; for experienced leaders in gifted education.
- RCE:4129 Creativity: Issues and Applications in Gifted Education** 1 s.h.
Theories that underpin contemporary definitions of creativity; instruments developed to measure creativity; activities in the school environment that enhance or inhibit student creativity. Same as PSQF:4129.
- RCE:4130 Human Sexuality** 3 s.h.
Introduction to human sexuality from a sociocultural perspective; readings and discussions of sensitive topics and explicit depictions/discussions of sexuality; students may relate their sexual experiences to course content; combination of formats.
- RCE:4131 Loss, Death, and Bereavement** 3 s.h.
Psychological study of death, grief, loss, bereavement, and coping from a multidimensional and multidisciplinary perspective; loss and grief as natural experiences that are not often explicitly discussed; overview of topics relating to death, including multicultural attitudes toward death, death practices, theories on loss and bereavement, and grieving throughout the life cycle; hospice and palliative care, suicide, and making meaning of life out of death; development of critical thinking skills by engaging in empirically based discussions.
- RCE:4132 Introduction to Addictions and Impulse Control Disorders** 3 s.h.
Exploration of addictions and impulse control disorders; legal, social, physical, and emotional issues related to addictions and impulse control disorders.
- RCE:4137 Introduction to Educating Gifted Students** 3 s.h.
Fundamental issues such as curriculum, counseling, family issues, gender and minority issues. Same as EDTL:4137.
- RCE:4140 Foundations of Leadership for Community Agencies** 3 s.h.
Preparation to become effective employees and leaders; emphasis on leadership roles in clinical and other human service or health care settings; how leadership transcends job title associated with high work performance; experiential activities that illustrate key didactic concepts and didactic lecture review, written assignments, experiential assignment, in-depth discussions illustrating key concepts.
- RCE:4145 Marriage and Family Interaction** 3 s.h.
Contemporary American couple, marriage, and family relationships; mate selection. Same as PSQF:4145.
- RCE:4162 Introduction to Couple and Family Therapy** 3 s.h.
Evolution of the family therapy movement and issues related to functional and dysfunctional family systems; significant models of family therapy and specific techniques. Same as PSQF:4162.
- RCE:4173 Trauma Across the Lifespan** 3 s.h.
Current theory and practice models related to trauma and crisis intervention; overview of multi-system level definitions of trauma experience (historical, individual, interpersonal, family, organizational, community, global); various approaches to trauma response theory; unique contributions that counselors offer (strength, resiliency, coping); commitments to multicultural and systems factors; macro- to micro-level understanding of trauma.
- RCE:4174 Positive Psychology** 3 s.h.
Promotion of human potential as a focus for counseling professionals that provides a supplement to diagnosis and treatment of pathology; how to achieve happiness, resilience, wellness, and life satisfaction through enhancement of human strengths and virtues.
- RCE:4175 Motivational Interviewing** 3 s.h.
Motivational Interviewing (Miller & Rollnick) and the stages of change model.
- RCE:4176 Child Abuse: Assessment, Intervention, and Advocacy** 3 s.h.
Preparation for work involving abused children or child abuse issues; appropriate for careers in counseling, education, health sciences, law, psychology, social work, and so forth; interactive approach.

- RCE:4177 Life After Service: Veterans in College** 3 s.h.
Introduction to various resources on campus related to increasing student veterans' success as college students; topics and assignments specifically tailored to military service-connected students (e.g., ROTC students, national guard or reserve military members, active duty veterans); topics include vocational rehabilitation, GI Bill, current events, and health care (sleep, TBI, traumatic stress responses, substance abuse); development of academic skills for writing, more effective studying, improved reading and note taking.
- RCE:4178 Microcounseling** 1,3 s.h.
Basic skills of listening, responding, empathy, focus; advanced skills of meaning, confrontation, reframing, directives, action skills.
- RCE:4179 Sexuality Within the Helping Professions** 3 s.h.
Relationship between sexuality and mental health; varied ethical and professional issues in sex therapy.
- RCE:4180 Topical Seminar for Helping Professionals** arr.
Topics for the continuing education of counselors and related professionals.
- RCE:4185 Introduction to Substance Abuse** 3 s.h.
Theories of addiction and pharmacology of psychoactive drugs; legal, familial, biological, multicultural, historical issues related to substance use and misuse.
- RCE:4187 Introduction to Assistive Technology** 3 s.h.
How assistive technology can be used for attainment of goals in education or work. Same as EDTL:4987.
- RCE:4188 Practicum in Teaching and Curriculum Development in Gifted Education** 1-6 s.h.
Experience in developing course materials for classes offered through the Belin-Blank Center for Gifted Education. Same as EDTL:4188.
- RCE:4191 Advocacy: Awareness, Assertiveness, and Activism** arr.
Introduction to advocacy skills—communicate, convey, negotiate or assert interests, desires, needs, and rights for self or others; opportunity to design and implement a plan of change; ecological model of human interaction that suggests a person must be viewed within context of one's environment(s); how having power on a personal and social level impacts one's environment and is central to a person's well-being; advocacy as a central function of helping professions.
- RCE:4192 Group Leadership in Human Sexuality** 0-3 s.h.
How to teach human sexuality; how to help students achieve an open-minded yet responsible attitude toward their own and others' sexuality. Prerequisites: RCE:4130.
- RCE:4193 Individual Instruction - Undergraduate** arr.
- RCE:4194 Interpersonal Effectiveness** 3 s.h.
Paradigms and techniques that enhance interpersonal relationship skills.
- RCE:4195 Ethics in Human Relations and Counseling** 3 s.h.
Morality and ethics; ethical issues; models and techniques for effective ethical decision making in personal and professional interactions.
- RCE:4197 Citizenship in a Multicultural Society** 3 s.h.
Human relationships in the context of societal oppressions such as racism, sexism, able-bodyism, and heterosexism.
- RCE:4199 Counseling for Related Professions** 3 s.h.
Counseling theories and techniques; ethical and multicultural considerations; small-group discussions, demonstrations, lectures.
- RCE:5200 Professional School Counselor** 3 s.h.
Professional identity of school counselors, K-12 school counseling program delivery systems, legal and ethical issues.
- RCE:5202 Introduction to Group Counseling** 3 s.h.
Research, theory, ethics, planning, and practice in group counseling; leadership styles and multicultural considerations; group participation. Prerequisites: RCE:5221. Corequisites: RCE:5278. Requirements: rehabilitation and counselor education enrollment.
- RCE:5203 Career Development** 3 s.h.
Preparation for counselors and student affairs professionals; career development concepts and theories, family and work, career counseling goals and objectives, exemplary techniques and materials, career program planning, evaluation procedures. Requirements: rehabilitation and counselor education enrollment.
- RCE:5204 School Culture and Classroom Management for School Counselors** 3 s.h.
American public elementary and secondary schools and the school counselor's role; classroom management for school counselors.
- RCE:5221 Theories of Counseling and Human Development Across the Life Span** 3 s.h.
Philosophical bases, ethical considerations, processes, issues, multicultural and life-span developmental considerations in counseling theories and techniques. Requirements: rehabilitation and counselor education M.A. enrollment.
- RCE:5222 Counseling Children and Adolescents in Schools** 3 s.h.
Theory and practice of school-based counseling interventions; child and adolescent development; prevention; special topics. Prerequisites: RCE:5221 or RCE:5278.
- RCE:5223 Counseling Gifted and Talented Students** 3 s.h.
Learning theories and best practices related to school counseling of gifted and talented students; academic, career, and personal/social development. Prerequisites: RCE:4137.
- RCE:5226 Assessment of Giftedness** 3 s.h.
Training and practice in assessment of gifted children. Same as PSQF:5226.
- RCE:5230 School Counseling Program Leadership and Management** 3 s.h.
Comprehensive K-12 school counseling program components and structures; program leadership, planning, accountability; behavioral consultation and collaboration; ethical, multicultural, family considerations. Corequisites: RCE:6321 or RCE:6322.
- RCE:5237 Seminar in Gifted Education** 2-3 s.h.
Teaching and counseling needs of gifted students K-12; intensive 10-day residential program. Requirements: work as teacher with Belin Fellowship.
- RCE:5238 Advanced Seminar in Gifted Education** 1 s.h.
Supervisory, administrative, and research issues; fellowships for seminar participants.

RCE:5241 Professional Counseling Orientation and Ethical Practice 3 s.h.

Historical, philosophical, legislative, societal, and multicultural overview of mental health process and practice in community-based settings; roles of rehabilitation and mental health professionals, nature of agencies, resources, contemporary issues, and ethics.

RCE:5242 Introduction to Rehabilitation Counseling and Case Management 3 s.h.

Introduction to the field of rehabilitation counseling; provides a foundation for subsequent study in rehabilitation counseling; students develop an appreciation and understanding of the rehabilitation profession in terms of its history, purpose, philosophy, process, personnel, programs, resources, and clients.

RCE:5247 Medical and Psychosocial Aspects of Disability Across the Developmental Life Span 6 s.h.

Medical evaluation as part of the rehabilitation process; body systems, medical terminology, medical description of disabilities; functional limitations; projection of potential for rehabilitation and mental health applied to planning and placement; dynamics of adjustment and coping for persons with chronic illness or those with disabilities through the life span; somatopsychological, psychosocial, and developmental perspectives on disability.

RCE:5248 Diagnosis and Treatment Planning for Traditional, Vulnerable, and Special Populations in Counseling 3 s.h.

Individual and group approaches to assessment and evaluation, including personal and environmental factors; psychiatric conditions, their diagnostic criteria using the DSM-5, and treatment planning considerations; biopsychosocial and psychiatric rehabilitation models used for case conceptualization and treatment planning, including functional assessment and client-driven rehabilitation planning for community reintegration; special considerations for diagnosing and treating vulnerable and special populations. Requirements: rehabilitation and counselor education enrollment.

RCE:5249 Medical and Psychopathological Aspects of Chronic Illness and Disability 3 s.h.

Description, classification, and theoretical perspectives related to psychiatric disorders; models of intervention in community-based settings.

RCE:5250 Multiculturalism in Helping Professions 3 s.h.

Theory and application of multicultural competency in the helping professions; ethical treatment of clients in the context of a multiculturally diverse society; knowledge, skill, self-awareness components relevant for helping practitioners. Requirements: rehabilitation and counselor education enrollment.

RCE:5253 Forensic Rehabilitation and Case Management 3 s.h.

Orientation to the profession of forensic rehabilitation or forensic vocational rehabilitation; development of knowledge and skills to act as a forensic professional in court proceedings involving persons with disabilities; emphasis on multiple areas of practice including social security determination, marital dissolution, personal injury, worker's compensation, and life care planning; students write expert testimony reports from assigned scenarios of injured workers for attorneys, insurance carriers, and administrative law judges.

RCE:5254 Assessment and Appraisal 3 s.h.

Presentation of materials related to assessment and appraisal for those who plan to work as professional counselors; didactic and experiential activities that enhance a counseling professional's work in the field; specifically, development of skills related to the administration, scoring, and interpretation of basic assessment materials and appraisal in a counseling setting.

RCE:5270 Issues and Ethics in Counseling 3 s.h.

Ethical standards and decision making; current issues; ethical, legal, and multicultural considerations for counseling in agencies and schools; emphasis on professional practice.

RCE:5278 Applied Microcounseling 3 s.h.

Development of basic and advanced counseling skills; preparation for work in education and community settings.

RCE:5279 Microskills for Rehabilitation Counseling 3 s.h.

Development of listening, empathy, reflection, and inquiry skills that are the foundation of counseling work; focus on development of self-awareness necessary for professionals in human service settings such as rehabilitation counseling; students learn and practice microcounseling skills that relate to working with individuals and small groups; for students pursuing a master's degree in rehabilitation counseling and desiring Council for Accreditation of Counseling and Related Educational Programs (CACREP) accredited practicum experience.

RCE:5280 Topical Seminar in Rehabilitation and Counselor Education arr.

Special topics dealing with contemporary problems of concern to counselors in specific settings.

RCE:5300 Culturally Relevant Social and Emotional Learning 3 s.h.

Social-emotional learning (SEL) focuses on developing students' competence in recognizing and managing emotions, developing empathy, making decisions, building relationships, and handling challenging situations; evidence on the impact of effective SEL has driven the introduction of state K-12 SEL standards and competencies; beyond applying principles of SEL, teachers need equitable instructional practices to link principles of learning with an understanding and appreciation for culture; examination of intersection of SEL and culturally-relevant pedagogy (CRP); principles and applications of culturally-relevant SEL in K-12 schools. Requirements: M.A. in teaching, leadership, and cultural competency program enrollment.

RCE:6263 Consultation Theory and Practice 3 s.h.

Review of concepts and practice of consultation and collaboration in educational and human services settings; focus on mental health, organizational, behavioral, and instructional models. Same as PSQF:6263.

RCE:6293 Individual Instruction - Graduate arr.**RCE:6300 Practicum in School Counseling 3 s.h.**

Supervised experience counseling and consulting in elementary and secondary school settings. Requirements: completion of school counseling core courses.

RCE:6321 Internship in Elementary School Counseling 6,12 s.h.

Supervised placement in an elementary school setting; performance of tasks, responsibilities of an elementary school counselor. Prerequisites: RCE:6300. Requirements: completion of all required school counseling courses.

RCE:6322 Internship in Secondary School Counseling**6,12 s.h.**

Supervised placement in a secondary school setting; performance of tasks, responsibilities of a secondary school counselor. Prerequisites: RCE:6300. Requirements: completion of all required school counseling courses.

RCE:6323 Internship in Middle School Counseling**3 s.h.**

Supervised placement in a middle school setting; performance of tasks and responsibilities of a middle school counselor. Prerequisites: RCE:6300. Requirements: completion of all required school counseling courses.

RCE:6341 Occupational Information, Job Development, and Job Placement**3 s.h.**

Obtaining appropriate jobs for individuals with disabilities who have received rehabilitation services; client, counselor, employer, job specifications.

RCE:6342 Psychosocial Aspects of Health and Disability Across the Developmental Lifespan**3 s.h.**

Dynamics of adjustment and coping for persons with chronic illness or those with disabilities through the life span; somatopsychological, psychosocial, and developmental perspectives on disability.

RCE:6346 Practicum in Rehabilitation Counseling**3 s.h.**

Clinical preparation to work specifically with persons with mental health and other disabilities in order to effectively promote positive changes in their employment status (where applicable), level of social integration, level of independence, quality of life, and mental health; individual clinical preparation goals established within the parameters of the clinical continuum to ensure skill development and a strong knowledge base, which serve to promote qualified providers of rehabilitation counseling services. Prerequisites: RCE:5279.

RCE:6347 Internship in Rehabilitation Counseling**arr.**

Advanced clinical experiences under faculty supervision in a community rehabilitation agency; student interns receive weekly individual and monthly group supervision; emphasis on application of rehabilitation and mental health counseling and case management methods, techniques, and vocational knowledge in work with clients; consultation with professionals, business, and industry as needed to enhance services to persons with disabilities for the purposes of job development/placement and/or independent living rehabilitation. Prerequisites: RCE:5279 and RCE:6346.

RCE:6348 Prepracticum in Rehabilitation and Mental Health Counseling**3 s.h.**

Counseling laboratory to promote knowledge, skills, and awareness of effective and ethical counseling methods, and fundamentals of helping relationships and case management. Prerequisites: RCE:5221. Corequisites: RCE:5278.

RCE:6349 Practicum in Clinical Mental Health Counseling**arr.**

Experience in a community agency serving individuals with disabilities and mental health disorders, supervised by a certified rehabilitation counselor in an approved site. Prerequisites: RCE:6353.

RCE:6350 Internship I: Rehabilitation and Mental Health Counseling**3-6 s.h.**

Experience to enhance competency in agencies and with persons represented in student's specialty area. Prerequisites: RCE:6349.

RCE:6352 Internship in Clinical Mental Health Counseling**arr.**

Full-time clinical experience in rehabilitation and mental health settings; training in wide range of rehabilitation and mental health functions under supervision of a qualified M.A. counselor with appropriate credentials. Prerequisites: RCE:6350.

RCE:6353 Pre-Practicum and Case Management in Counseling**3 s.h.**

Development of accurate listening, empathy, reflection, and inquiry skills as well as goal setting techniques that are the foundation of counseling work; strong applied and experiential approach with special focus on development of self-awareness dexterity necessary for professionals in clinical mental health counseling; students learn and practice microcounseling skills in class and lab sessions that relate to working with individuals and small groups; applied pre-practicum allows students to work with an analog client as well as didactic instruction. Corequisites: RCE:5221.

RCE:6354 Advanced Practicum in Clinical Mental Health Counseling**3 s.h.**

Advanced clinical experiences in clinical mental health counseling; supervision provided by faculty supervisor and site supervisor, who meet with the student during the semester for supervision and performance evaluation; emphasis on application of clinical mental health counseling knowledge, methods, and techniques in work with clients, and in consulting with other professionals and agencies as needed to enhance services to persons with mental health disabilities; emphasis also on application of principles and professional standards to real life situations. Prerequisites: RCE:6353 and RCE:6349.

RCE:6394 Research and Scholarship Internship**1-3 s.h.**

Preparation for comprehensive examination.

RCE:6500 Research and Program Evaluation**3 s.h.**

Introduction to research methods for counselors; research strategies that have dominated counseling literature; key concepts related to development of researchable questions, use and interpretation of quantitative and qualitative analyses, factors impacting design integrity, and use of findings to effect counseling program modifications; focus on essential approaches needed to conceptualize and develop a research proposal.

RCE:7255 Advanced Career Development and Counseling**3 s.h.**

Major concepts and research evidence about life-span vocational behavior; theories of vocational choice, adjustment, development in a multicultural world.

RCE:7338 Essentials of Qualitative Inquiry**3 s.h.**

Principles, processes of qualitative research in education; methods of design, data collection and analysis, interpretation, trustworthiness. Requirements: Ph.D. enrollment and introductory research course.

RCE:7347 Home/School/Community: System Interventions**3 s.h.**

Interventions used by school and support system personnel; focus on work with parents, siblings. Same as PSQF:7347.

RCE:7353 Advanced Counseling and Psychotherapy**3 s.h.**

Theories, techniques, and ethics of counseling clients with personal and interpersonal problems; ethical and multicultural considerations.

- RCE:7357 Advanced Group Counseling and Psychotherapy** 3 s.h.
Theories and techniques of group counseling and psychotherapy; integration of theory, experience, and research in group counseling; ethical and multicultural considerations.
- RCE:7360 Advanced Practicum in Counseling** arr.
Supervised practice in counseling; intensive analysis of counselor ethics, styles, methods. Advanced graduate standing in counselor education and consent of instructor required. Prerequisites: RCE:5221. Requirements: Ph.D. enrollment, advanced graduate standing in counselor education, and counseling introductory practicum; and concurrent enrollment in RCE:5249 for rehabilitation counselor education student.
- RCE:7380 Internship in Teaching** arr.
Supervised college teaching experience in counselor education courses; teaching in collaboration with faculty, observation and critiques of teaching, participation in course planning and evaluation procedures; ethical and multicultural considerations.
- RCE:7385 Teaching and Learning in Higher Education** 3 s.h.
Current theoretical and empirical literature on teaching and learning in higher education; focus on development of effective teaching practice. Same as ECTL:7385, EPLS:7385, GRAD:7385, PSQF:7385.
- RCE:7400 Seminar: Ethics and Issues in Counseling** 3 s.h.
Ethical, professional, and contemporary issues in counseling practice, education, and research. Requirements: rehabilitation and counselor education Ph.D. enrollment.
- RCE:7438 Advanced Qualitative Research Seminar in Rehabilitation and Counselor Education** 3 s.h.
Exploration of qualitative research at advanced theoretical, practical, and technical level, inside and outside a typical classroom environment; scholarly discussions. Prerequisites: RCE:7338.
- RCE:7444 Qualitative Research in the Multicultural Context** 3 s.h.
Exploration of qualitative research in multicultural context; application of knowledge gained in introductory qualitative courses; utilization of qualitative skill sets for completion of a multicultural-focused project; multicultural field research project which may involve travel or virtual connections outside of regular class time; field experience projects with online problem-based learning activities, consultation, and virtual supervised small group work. Prerequisites: PSQF:6235 or RCE:5250 or RCE:7338.
- RCE:7448 Integrated Developmental Theory and Counseling** 3 s.h.
Advanced issues, theoretical perspectives, and research in human development across the life span; influential theories in human development; related implications for counseling, supervision, and research; integrated understanding of perspectives through position papers, reflection papers, and research proposal project. Requirements: graduate standing in rehabilitation and counselor education.
- RCE:7450 Advanced Social Psychology of Disability** 3 s.h.
Disability issues from individual and societal perspectives; psychosocial aspects of disability and disability studies; seminar. Requirements: Ph.D. enrollment.
- RCE:7451 Advanced Multiculturalism** 3 s.h.
Impact of culture, race, ethnicity, and intersections of identity on counseling in higher education and student affairs settings. Prerequisites: RCE:5250.
- RCE:7454 Supervision Theory and Practice** 3 s.h.
Conceptual models, ethics, multicultural considerations, research, and program design for counselor supervision and consultation.
- RCE:7455 Internship in Supervision** arr.
Supervision of students enrolled in counseling practicum. Prerequisites: RCE:7454.
- RCE:7457 Seminar: Professional Orientation to Counselor Education, Supervision, Leadership, and Advocacy** 4 s.h.
Professional orientation for students seeking degrees and employment in counselor education and supervision (CES); analysis of by-laws, competency statements, and professional responsibilities for specialists in CES; identification of key leadership practices; evaluation of leadership principles as applied to CES; development of a plan for future leadership in CES; students analyze needs of client stakeholder groups, evaluate current approaches to advocacy, develop an advocacy plan, and examine their own professional awareness, knowledge, and skill sets for negotiating work/life in academia and/or administration.
- RCE:7458 Seminar: Issues and Trends in Counseling Research** 4 s.h.
Recent trends, including debates and findings in literature related to best practices for the profession. Same as PSQF:7459.
- RCE:7459 Seminar: Leadership and Advocacy in Counselor Education and Supervision** 3 s.h.
Leadership principles and theories, including applications to counselor education; student leadership potential and skills explored through self-reflective model.
- RCE:7460 Seminar: Research in Counseling** 3 s.h.
Methods, examples, ethics, multicultural issues, problems of counseling research. Requirements: Ph.D. enrollment. Same as PSQF:7460.
- RCE:7461 Practicum in Research** arr.
Experience designing and implementing research relevant to student's plan of study, under supervision of rehabilitation and counselor education faculty member.
- RCE:7462 Advanced Practicum in Clinical Teaching** 1-3 s.h.
Preparation for doctoral students to conduct didactic and experiential learning opportunities with counselors in training. Prerequisites: RCE:7454.
- RCE:7465 Internship in Clinical Practice** arr.
Supervised experience in professional counseling, counselor supervision, consultation, and teaching counseling.
- RCE:7466 Leadership and Advocacy Internship in Counselor Education** 3 s.h.
Supervised experience in service learning activities in a variety of settings to build advocacy and leadership skills; leadership skill development opportunities that enhance doctoral students' future potential as counselor education advocates and consultants. Prerequisites: RCE:7360.
- RCE:7493 Ph.D. Thesis** arr.

Human Relations, Minor

Requirements

The undergraduate minor in human relations requires a minimum of 15 s.h. of credit, including 12 s.h. earned at the University of Iowa. Students must maintain a g.p.a. of at least 2.50 in all courses for the minor and in all UI courses for the minor. Coursework in the minor may not be taken pass/nonpass, but may count toward the minor if offered as S/U or S/F. Transfer credit must be approved by the chair of the Department of Rehabilitation and Counselor Education in order to count toward the minor.

The minor is open to all University of Iowa students enrolled in an undergraduate degree program.

The minor in human relations requires the following coursework.

Code	Title	Hours
This course:		
RCE:4199	Counseling for Related Professions	3
At least 12 s.h. from these:		
RCE:2081	Making a Vocational-Educational Choice	2-3
RCE:4109	Introduction to Athlete Mental Health	3
RCE:4110	Psychology of Food and Mood	3
RCE:4111	Building Leadership and Success at Work	3
RCE:4112	How to Interview to Get That Job!	3
RCE:4113	Sleep, Sleep Deprivation, and Sleep Disorders	3
RCE:4114	Psychology of Body Modification and Self-Image	3
RCE:4130	Human Sexuality	3
RCE:4131	Loss, Death, and Bereavement	3
RCE:4132	Introduction to Addictions and Impulse Control Disorders	3
RCE:4140	Foundations of Leadership for Community Agencies	3
RCE:4145	Marriage and Family Interaction	3
RCE:4162	Introduction to Couple and Family Therapy	3
RCE:4173	Trauma Across the Lifespan	3
RCE:4174	Positive Psychology	3
RCE:4175	Motivational Interviewing	3
RCE:4176	Child Abuse: Assessment, Intervention, and Advocacy	3
RCE:4178	Microcounseling	3
RCE:4179	Sexuality Within the Helping Professions	3
RCE:4180	Topical Seminar for Helping Professionals	3
RCE:4185	Introduction to Substance Abuse	3

RCE:4187	Introduction to Assistive Technology	3
RCE:4191	Advocacy: Awareness, Assertiveness, and Activism	3
RCE:4192	Group Leadership in Human Sexuality	0-3
RCE:4193	Individual Instruction - Undergraduate	arr.
RCE:4194	Interpersonal Effectiveness	3
RCE:4195	Ethics in Human Relations and Counseling	3
RCE:4197	Citizenship in a Multicultural Society	3
EALL:4130	Introduction to Grant Writing	3
EPLS:4150	Leadership and Public Service I	3
EPLS:4151	Leadership and Public Service II	2
EPLS:4180	Human Relations for the Classroom Teacher (requires special permission for students not enrolled in TEP)	3
PSQF:2115	Introduction to Counseling Psychology	3
PSQF:2116	Applied Child and Adolescent Psychology	3
SSW:3700	Introduction to Understanding Trauma and Resilience	3

Contact the Department of Rehabilitation and Counselor Education for more information about the minor.

Rehabilitation and Counselor Education, M.A.

Maintaining Good Standing

M.A. students in the Department of Rehabilitation and Counselor Education must meet the following standards in order to remain in their degree programs and advance to candidacy and remain a candidate for a degree:

- maintain a g.p.a. of at least 3.00;
- successfully complete practicums and internships;
- maintain professional behavior consistent with the ACA Code of Ethics (American Counseling Association) and any additional code of professional ethics adhered to in any agency in which a student completes a practicum or internship; and
- demonstrate progress toward the degree through successful completion of semester hours specified in the curriculum plan and active registration each session (exceptions may be approved by the advisor).

Each student's academic and professional progress is reviewed annually. A written report is provided to the student and a copy is placed in the student's department file.

Probational Status

Students who earn a cumulative g.p.a. lower than 3.00 are placed on probational status and are notified in writing. Students on probational status have two consecutive sessions to raise their grade-point average to the established standard. If that requirement is not met, a student may be removed from the program. Students are allowed one probational status during their program of study.

RCE Standards

The following are the standards of the Department of Rehabilitation and Counselor Education at the University of Iowa, which are the key performance indicators for M.A. students.

- acquire the awareness, knowledge, and skills of a professional counselor and/or counselor educator;
- develop a process of ongoing reflective practice in relation to cultural humility and the profession's multicultural, social justice, and ethical counseling competencies and education;
- develop counseling skills that will address problems in living from a developmental/life span approach;
- cultivate a commitment to ethical practices and behavior in counseling, counselor education, supervision, and research; and
- acquire an understanding of the social, vocational, educational, and psychological needs of individuals served in various settings such as schools, vocational, or counseling centers.

Clinical Mental Health Counseling

The Master of Arts program in rehabilitation and counselor education with a clinical mental health counseling subprogram requires a minimum of 60 s.h. of graduate credit. Full-time students can complete the program in approximately 20 months (four semesters). The program prepares professional

counselors to provide assistance with psychological wellness through flexible, consumer-oriented therapy to individuals experiencing various problems in living, including mental disorders and substance abuse. They combine traditional psychotherapy with a practical, problem-solving approach that creates a dynamic efficient path for change and problem resolution.

Clinical mental health counselors work in a variety of settings, including public government agencies; private practice; community mental health agencies; managed behavioral health care organizations; integrated delivery systems; hospitals, including the Veteran's Administration; employee assistance programs; and substance abuse treatment centers. They provide interventions designed to help individuals with their immediate needs such as assessment and diagnosis, psychotherapy, treatment planning, brief and solution-focused therapy, alcoholism and substance abuse treatment, psychoeducational and prevention, and crisis management.

The M.A. program in clinical mental health counseling is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). Graduates of the program are eligible for certification by the National Board for Certified Counselors. By completing the program's coursework, students also complete the courses they must take in order to apply for licensure as mental health counselors in Iowa.

The curriculum blends academic work with supervised clinical experiences. Students take two semesters of practicum and one semester of internship concurrently with academic courses. The program concludes with a full-time internship (40 hours per week) during a spring semester. Students are assigned to mental health agencies or facilities that meet CACREP accreditation standards and that have programs or clientele who match a student's interests and educational objectives. Clinical placements require criminal background checks. Supervised practicums, internships, and comprehensive examinations are not offered during summer sessions.

The M.A. in rehabilitation and counselor education with a clinical mental health counseling subprogram requires the following work.

RCE:4185	Introduction to Substance Abuse	3
RCE:4187	Introduction to Assistive Technology	3
RCE:5280	Topical Seminar in Rehabilitation and Counselor Education (may be taken more than once if the topic differs)	arr.

Comprehensive Examination

The comprehensive examination consists of two exams totaling six hours: a three-hour departmental comprehensive examination and a three-hour written examination on the process and practice of clinical mental health counseling. Exams are offered only during fall and spring semesters.

Admission

Applicants must meet the department's general admission requirements. They should have a good academic record and relevant experiences. No specific undergraduate major area of study is required for the M.A. program, but a major in one of the social sciences is considered good preparation.

Postbaccalaureate work and volunteer experiences relevant to the field of mental health counseling is preferred. The program encourages applications from persons traditionally underrepresented in the field, particularly those with a disability and/or members of minority or ethnic groups. A personal interview is required, either in person or by telephone.

Applications for full-time study are accepted for fall semester entry; applications for full-time study are reviewed beginning March 1. Applications for part-time study are accepted for fall and spring semesters and are considered when class space permits.

Students pursue a sequenced plan of study that begins in the fall semester. Although students may be admitted for any semester, the program highly recommends that full-time students begin in the fall.

Rehabilitation Counseling Program

The Master of Arts program in rehabilitation and counselor education with a subprogram in the rehabilitation counseling program requires a minimum of 60 s.h. of graduate credit. Full-time students can complete the program in approximately 20 months (four semesters). The program prepares professional counselors to provide assistance in psychological wellness, employment, independent living, and personal or economic development to persons with disabilities and other individuals who encounter barriers in meeting their own functional needs.

Rehabilitation counselors work in a variety of settings, including public agencies such as state vocational rehabilitation programs and Veterans Affairs vocational rehabilitation programs, independent living centers, community-based rehabilitation centers and supported employment, psychiatric rehabilitation programs, transition from school to work programs, and private for-profit worker's compensation and insurance rehabilitation agencies. They provide interventions designed to help persons with disabilities adapt to the demands of their environments. They also prepare the environments to accommodate an individual's needs. Assessment, personal and vocational counseling, development of rehabilitation and treatment plans, case management, service coordination, psychosocial adjustment, job development, placement, and follow-up are typical services that rehabilitation and mental health counselors provide.

The M.A. program in rehabilitation counseling is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). Graduates of the program are eligible for certification by the Commission on Rehabilitation Counselor Certification (CRCC).

The curriculum blends academic work with supervised clinical experiences. Students take one semester of practicum and one semester of internship concurrently with academic courses. The program concludes with a full-time internship (40 hours per week) during a spring semester. Students are assigned to rehabilitation agencies or facilities that meet CACREP accreditation standards and that have programs or clientele who match a student's interests and educational objectives. Clinical placements require criminal background checks. Supervised practicums, internships, and comprehensive examinations are not offered during summer sessions.

The M.A. in rehabilitation and counselor education with a rehabilitation counseling subprogram requires the following work.

RCE:4185	Introduction to Substance Abuse	3
RCE:4187	Introduction to Assistive Technology	3
RCE:5280	Topical Seminar in Rehabilitation and Counselor Education	arr.

Comprehensive Examination

The comprehensive examination consists of two exams totaling six hours: a three-hour departmental comprehensive examination and a three-hour written examination on the process and practice of rehabilitation counseling. Exams are offered only during fall and spring semesters.

Admission

Applicants must meet the department's general admission requirements. They should have a good academic record and relevant experience such as assisting individuals with disabilities. No specific undergraduate major area of study is required for the M.A. program, but a major in one of the social sciences is considered good preparation. Postbaccalaureate work experience relevant to the field of rehabilitation counseling is preferred. The program encourages applications from persons traditionally underrepresented in the field, particularly those with a disability and/or members of minority or ethnic groups. A personal interview is required, either in person or by telephone.

Applications for full-time study are accepted for fall semester entry; applications for full-time study are reviewed beginning March 1. Applications for part-time study are accepted for fall and spring semesters and are considered when class space permits.

Students pursue a sequenced plan of study that begins in the fall semester. Although students may be admitted for any semester, the program highly recommends that full-time students begin in the fall.

School Counseling

The Master of Arts program in rehabilitation and counselor education with a school counseling subprogram requires a minimum of 60 s.h. of graduate credit. The program prepares individuals to work effectively as counselors in K-12 school settings. It is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). Successful graduates are eligible for K-12 school counselor licensure in Iowa.

During the first few semesters, students take core counseling courses, including coursework focusing on counseling children and adolescents, school counseling programs, and courses focusing on clinical practice in the schools (practicum and internship). Students are expected to complete at least 100 clock hours in practicum and 600 clock hours in internship activities in an approved school setting, under the supervision of an experienced licensed school counselor and a University faculty supervisor.

Students who enter without teaching licensure are required to take the following classes in education: EPLS:3000 Foundations of Education, EDTL:4900 Foundations of Special Education, and PSQF:6200 Educational Psychology.

Students must complete program and department core courses as outlined on the Department of Rehabilitation and Counselor Education website before enrolling in RCE:6300 Practicum in School Counseling for the fall semester of their second year in the program. All students are required to complete a background check the semester before they enroll in the practicum. Students who are not licensed teachers must complete coursework in education before enrolling in the practicum.

Each student's progress is reviewed periodically by the major advisor and yearly by the school counseling program. Students who have successfully completed all prerequisites for RCE:6300 are reviewed in the semester before they take the practicum course, to assure that they are prepared for it. Additionally, students are evaluated to assure their readiness for the internship RCE:6321 Internship in Elementary School Counseling or RCE:6322 Internship in Secondary School Counseling, which requires assignment in approved schools for the fall and/or spring semesters.

The M.A. in rehabilitation and counselor education with a school counseling subprogram requires the following work.

Required Courses

The following schedule of required courses reflects a two-and-one-half year program of study. Students who do not have teacher licensure are required to complete the following courses in education: EPLS:3000 Foundations of Education, EDTL:4900 Foundations of Special Education, and PSQF:6200 Educational Psychology. Students who have completed the required courses should consult with their advisor regarding electives in order to fulfill the 60 s.h. requirement.

EDTL:4940	Characteristics of Disabilities	3
Electives (consult advisor)		6
Total Hours		60

Comprehensive Examination

Students are required to take comprehensive exams for the departmental core and for school counseling during their final semester of internship. Comprehensive exams include a written six-hour exam in the departmental core and school counseling. An oral exam also is required unless waived by the comprehensive exam committee.

Admission

Applicants must meet the department's general admission requirements. They should have an undergraduate g.p.a. of 3.00 or higher. The department prefers that applicants have one year of teaching experience or successful experiences with children and/or adolescents, which they must document in a written statement. Graduate Record Exam (GRE) General Test scores must be on file at the University; however, the GRE requirement has been suspended for the 2020-21 admissions cycle.

Applications are accepted for summer and fall entry and should be submitted by January 25th.

Rehabilitation and Counselor Education, Ph.D.

Maintaining Good Standing

Ph.D. students in the Department of Rehabilitation and Counselor Education must meet the following standards in order to remain in their degree programs and advance to candidacy and remain a candidate for a degree:

- maintain a g.p.a. of at least 3.00;
- successfully complete a practicum, internship, or equivalent professional experience;
- maintain professional behavior consistent with the ACA Code of Ethics (American Counseling Association) and any additional code of professional ethics adhered to in any agency in which a student completes a practicum or internship; and
- demonstrate progress toward the degree through successful completion of semester hours specified in the curriculum plan and active registration each session (exceptions may be approved by the advisor).

Each student's academic and professional progress is reviewed annually. A written report is provided to the student and a copy is placed in the student's department file.

Probational Status

Students who earn a cumulative g.p.a. lower than 3.00 are placed on probational status and are notified in writing. Students on probational status have two consecutive sessions to raise their grade-point average to the established standard. If that requirement is not met, a student may be removed from the program. Students are allowed one probational status during their program of study.

RCE Standards

The following are the standards of the Department of Rehabilitation and Counselor Education at the University of Iowa, which are the key performance indicators for Ph.D. students.

- acquire the awareness, knowledge, and skills of a professional counselor and/or counselor educator;
- develop a process of ongoing reflective practice in relation to cultural humility and the profession's multicultural, social justice, and ethical counseling competencies and education;
- develop counseling skills that will address problems in living from a developmental/life span approach;
- cultivate a commitment to ethical practices and behavior in counseling, counselor education, supervision, and research; and
- acquire an understanding of the social, vocational, educational, psychological needs of individuals served in various settings such as schools, vocational, or counseling centers.

Requirements

The Doctor of Philosophy program in rehabilitation and counselor education with a counselor education and

supervision (CES) subprogram requires a minimum of 72 s.h. of graduate credit. The program provides students with knowledge and skills related to general counseling (including mental health and school counseling), teaching, consulting, supervising counselors, and conducting research. Graduates enter professional work as counselors, counselor supervisors, counselor educators, researchers and/or consultants, or work in other positions requiring expertise in human relations. Students may choose an emphasis in an area agreed upon by faculty advisors.

Counselor education and supervision graduates are prepared to teach the knowledge and skills required of professional counselors and to supervise beginning and advanced counselors, perform counseling interventions with individuals and groups, and teach human relations skills in colleges or universities. They provide professional consultation with counseling practitioners, educators, and policymakers about counseling program development and evaluation. They also may perform research that contributes to knowledge about counseling, supervision, and counselor education.

The program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). The American Counseling Association (ACA), the Association for Counselor Education and Supervision (ACES), and The National Council on Rehabilitation Education (NCRE) are the professional organizations most related to program activities.

Curriculum includes required courses in counseling, in research tools and applications, and a dissertation.

Most students complete their coursework in three years and take a fourth year to complete the dissertation. Students who have not completed a master's degree program approved by the Council for Accreditation of Counseling and Related Educational Programs (CACREP) may need to remedy deficiencies by taking appropriate coursework at the master's degree level.

The Ph.D. in rehabilitation and counselor education with a counselor education and supervision subprogram requires the following work.

Required Courses

Code	Title	Hours
All of these:		
RCE:7255	Advanced Career Development and Counseling	3
RCE:7338	Essentials of Qualitative Inquiry	3
RCE:7353	Advanced Counseling and Psychotherapy	3
RCE:7360	Advanced Practicum in Counseling (section 2)	3
RCE:7380	Internship in Teaching	3
RCE:7385	Teaching and Learning in Higher Education	3
RCE:7400	Seminar: Ethics and Issues in Counseling	3
RCE:7450	Advanced Social Psychology of Disability	3
RCE:7451	Advanced Multiculturalism	3
RCE:7454	Supervision Theory and Practice	3
RCE:7455	Internship in Supervision	3

RCE:7457	Seminar: Professional Orientation to Counselor Education, Supervision, Leadership, and Advocacy	4
RCE:7458	Seminar: Issues and Trends in Counseling Research	4
RCE:7460	Seminar: Research in Counseling	3
RCE:7465	Internship in Clinical Practice (at least 240 hours)	3
RCE:7466	Leadership and Advocacy Internship in Counselor Education	3
PSQF:6265	Program Evaluation	3

Required Research Courses

Students must complete a specific sequence of research courses which include distributed coursework in both qualitative and quantitative areas. In consultation with the academic advisor, they select from basic and advanced doctoral research courses listed under RCE Doctoral Research Requirements on the Department of Rehabilitation and Counselor Education website.

Elective Minor Area

Students can elect to take a series of courses, typically a minimum of three, outside the Department of Rehabilitation and Counselor Education (in consultation with a major and minor advisor) to enhance and support their teaching and research interests.

Master's Thesis Project or Equivalent

Students are required to submit a previously conducted master's thesis for faculty review and approval or to complete a new supervised experiential research project before taking comprehensive exams. Students without an approved M.A. or M.S. thesis enroll in the following.

Code	Title	Hours
RCE:6394	Research and Scholarship Internship	1-3

Comprehensive Examination

The comprehensive examination consists of an oral defense of a student's portfolio, which covers six professional competency domains in counselor education, and an exam on the minor area. The examination may be taken during a student's final semester of coursework, which typically includes an internship.

Dissertation

The major research project culminating in the doctoral thesis may be on any topic related to counseling and counselor education. The thesis advisor and the examining committee approve the topic and procedures at a formal prospectus meeting. The final oral examination on the thesis is conducted by the examining committee. Students usually earn 10 s.h. for dissertation work, but in some instances they may earn up to 15 s.h. The dissertation committee must include at least two counselor education and supervision faculty members.

Code	Title	Hours
RCE:7493	Ph.D. Thesis	10-15

Admission

Applicants must meet the department's general admission requirements. In addition, applicants must provide evidence of successful experience in counseling or a closely related profession. Applicants without experience may be admitted if their credentials indicate exceptional strengths.

Applicants also must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Students may be admitted for fall, spring, or summer entry, but the department strongly advises application for fall entry. Consideration of applications begins January 15 for fall entry; all application materials should be received by this date.

Teaching and Learning

Chair

- Lia M. Plakans

Undergraduate majors: art education (B.A.); elementary education (B.A.); English education (B.A.); mathematics education (B.A.); music education (B.A.); science education (B.A.); social studies education (B.A.); world language education (B.A.); science studies (B.S., granted by the College of Liberal Arts and Sciences)

Graduate degrees: M.A. in teaching and learning; M.A.T. in teaching and learning; M.S. in teaching and learning; Ph.D. in teaching and learning

Faculty: <https://education.uiowa.edu/directories>

Website: <https://education.uiowa.edu/teach>

Department of Teaching and Learning programs prepare graduates for positions in public schools, local and state education agencies, clinical settings, and institutions of higher education. All licensure programs are approved by the Iowa Department of Education.

Undergraduate students pursuing a B.A. with a major in art education, elementary education, English education, mathematics education, music education, science education, social studies education, or world language education, must satisfy the GE CLAS Core [p. 20] requirements.

Undergraduate students pursuing a B.S. with a major in sciences must meet the College of Liberal Arts and Sciences requirements for the Bachelor of Science degree, including the GE CLAS Core [p. 20]; see the College of Liberal Arts and Sciences Academic Policies Handbook.

The Department of Teaching and Learning offers, or jointly administers with departments in the College of Liberal Arts and Sciences, advanced degree programs in the following fields of professional interest: art education; developmental reading; English education; foreign language, second language, and English as a Second Language education; literacy, culture, and language education; mathematics education; music education; science education; social studies education; special education; STEM education; and teaching, leadership, and cultural competency.

The department offers graduate degree programs in three major areas: elementary education, secondary education, and special education.

Elementary education programs:

- art education (offered in the M.A. and M.A.T. in teaching and learning);
- developmental reading (offered in the M.A. in teaching and learning);
- teaching, leadership, and cultural competency (offered in the M.A. in teaching and learning).

Secondary education programs:

- art education (offered in the M.A. and M.A.T. in teaching and learning);
- developmental reading (offered in the M.A. in teaching and learning);
- English education (offered in the M.A. and M.A.T. in teaching and learning);

foreign language and English as a Second Language (ESL) education (offered in the M.A. and M.A.T. in teaching and learning);

literacy, culture, and language education (offered in the Ph.D. in teaching and learning);

mathematics education (offered in the M.A., M.A.T., and Ph.D. in teaching and learning);

science education (offered in the M.S., M.A.T., and Ph.D. in teaching and learning);

social studies education (offered in the M.A. and M.A.T. in teaching and learning);

special education (offered in the M.A. and Ph.D. in teaching and learning);

STEM education (offered in the M.S. in teaching and learning); and

teaching, leadership, and cultural competency (offered in the M.A. in teaching and learning).

The secondary education area also collaborates with the College of Liberal Arts and Sciences to offer an education option for graduate students earning an M.S. in mathematics; an M.A. and Ph.D. in music with a concentration in music education; and a combined B.A./M.A.T. in teaching and learning with a science education subprogram for undergraduates majoring in biology, chemistry, environmental sciences, or physics. In addition, the area offers an ESL endorsement for individuals who are enrolled in a Department of Teaching and Learning graduate degree program or who are licensed in-service teachers.

In addition, the M.A. in music [p. 852] is administered by the School of Music (College of Liberal Arts and Sciences) in cooperation with the College of Education. The concentration in music education provides students with deeper insights into music, the theory and practice of music education, and the role of music in the school curriculum.

The Ph.D. in music [p. 854] with concentration in music education prepares students for teaching, research, and administrative posts. Graduates find employment as college teachers of music education classes and activities; as band, chorus, and orchestra directors; and as administrators of music departments and schools of music. Some apply their skills in public schools as music supervisors, research and curriculum consultants, and directors of city or district school music programs. Doctor of Philosophy students whose concentration is music therapy enroll in the Ph.D. program with concentration in music education. Modifications in the curricular requirements are made to reflect the professional knowledge and skills required for positions such as college teaching or advanced clinical or research positions in music therapy. Both programs are administered by the School of Music [p. 817] (College of Liberal Arts and Sciences) in cooperation with the College of Education.

Special education program:

- special education (offered in the M.A. and Ph.D. in teaching and learning).

Applicants for admission to University of Iowa graduate degree programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

The graduate Certificate in Applied Behavior Analysis is offered by the Department of Teaching and Learning. To

learn more, see the Certificate in Applied Behavior Analysis [p. 1292] in the Catalog.

Programs

Undergraduate Programs of Study

Majors

- Major in Art Education (Bachelor of Arts) [p. 1367]
- Major in Elementary Education (Bachelor of Arts) [p. 1369]
- Major in English Education (Bachelor of Arts) [p. 1375]
- Major in Mathematics Education (Bachelor of Arts) [p. 1378]
- Major in Music Education (Bachelor of Arts) [p. 1381]
- Major in Science Education (Bachelor of Arts) [p. 1384]
- Major in Social Studies Education (Bachelor of Arts) [p. 1387]
- Major in World Language Education (Bachelor of Arts) [p. 1397]
- Major in Science Studies (Bachelor of Science) [p. 1389]

Graduate Programs of Study

Majors

- Master of Arts in Teaching and Learning [p. 1399]
- Master of Arts in Teaching in Teaching and Learning [p. 1403]
- Master of Science in Teaching and Learning [p. 1410]
- Doctor of Philosophy in Teaching and Learning [p. 1412]

Financial Support

A limited number of teaching assistantships are available for graduate students. Assignments vary. Some involve supervising undergraduate majors enrolled in practicums; some involve teaching sections of undergraduate methods courses and supervising student teachers; others consist primarily of research activities. Graduate assistants may register for a maximum of 12 s.h. of credit per semester, but they must register for at least 6 s.h. per semester.

All assistantships are awarded on a competitive basis. Applicants must have been admitted to regular status in the Graduate College and to an advanced program in the College of Education. For information about assistantships, consult the College of Education advisor in the appropriate field.

Courses

- Teaching and Learning Courses [p. 1352]
- Science Education Courses [p. 1366]

Teaching and Learning Courses

EDTL:1050 Opportunities in Education 2 s.h.
Introduction for underrepresented students to the teaching profession and its widely varied opportunities; faculty, students, recipients of awards in education; tours of Iowa City schools; reflection on and personal integration of class learning experiences, consideration of future plans.

EDTL:1129 First-Year Seminar 1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

EDTL:1133 Teaching as a Profession 1 s.h.
Teaching as a profession in the American education system; examining motivations to become a teacher; historical perspectives; social, legal, and ethical issues; examining career paths in the field of education.

EDTL:2000 Big Ideas: Creativity for a Lifetime 3 s.h.
Exploration of what senior artists can teach about creativity and aging; interdisciplinary project-based collaborative learning opportunities that consider role of arts and creativity across a lifespan; essential skills necessary to be professionals in numerous careers including health, social work, education, humanities, and the arts; identification of ways for students to be more creative in their own lives and work. GE: Values and Culture. Same as ARTS:2000, ASP:2000, RHET:2000.

EDTL:2015 Teaching as a Human Endeavor 3 s.h.
Introduction to teaching with focus on role as a human endeavor including purposes, goals, and values; special attention to contemporary issues in teaching and learning with an overview of planning processes, role of settings, contexts, and differentiation; exploration of appropriate ways to study teaching across disciplines and under various professional standards.

EDTL:2073 Finding Your Comfort Zone: Secrets to Success 1,3 s.h.
Understanding the strengths and challenges of people with special needs; insights into unwritten "rules" of college life; optional practicum involves working hands-on with people who have multiple learning and cognitive disabilities; students with disabilities or those interested in learning more about disabilities are encouraged to enroll.

EDTL:2122 Creativity, Imagination, Play, and Human Development through the Arts 3 s.h.
Theories related to human development and visual arts; use of visual arts to make meaning from experience; ways to integrate visual arts into everyday life; cognitive and physical processes involved in making, understanding, and looking at visual art through studio experiences; theories of cognitive development; role of visual art in education; introduction to art production, history, criticism, and aesthetics. GE: Literary, Visual, and Performing Arts.

EDTL:2210 Full STEAM Ahead: The Role of Art in Science, Technology, Engineering, and Math 3 s.h.
Examination of artists' contributions to STEM and how innovations in STEM have shaped art; readings from art history, historical texts, technological advances, and scientific, engineering, and mathematics journals; how a discovery in one area can have a ripple effect across fields, and how to make diverse connections to content areas in teaching and research.

EDTL:2670 Peacebuilding, Singing, and Writing in a Prison Choir 3 s.h.

Students sing with the Oakdale Community Choir inside the Iowa Medical and Classification Center as a service-learning component; students explore meanings of peacebuilding for themselves and community, and use their imaginations to consider new directions of peacebuilding through reading, reflecting, writing, inner peacebuilding, and communal peacebuilding projects; use of choral singing inside prisons to build peace, create positive social connections, transform attitudes toward healing approaches to justice, and inspire a sense of deep care within oneself and among others. GE: Diversity and Inclusion.

EDTL:2821 Oral Interpretation 3 s.h.

Weekly performances to develop and define communication skills for professional careers in teaching and business; poetry, prose, monologue, storytelling, duo interpretation, reader's theatre, and demonstration speeches. Same as COMM:2821.

EDTL:2963 Monsters, Victims, and Villains: Changing Perceptions 3 s.h.

Introduction to implementation of performance opportunities for special populations (defined as those with cognitive or physical disability) and underrepresented populations; students gain skills necessary to create radical opportunities for and implementation of performances including individuals with disabilities in theatre, dance, and music; students from different backgrounds experience collaborative artistic excellence while redefining audience expectations; historic background for perceptions of disability. GE: Diversity and Inclusion. Same as THTR:2605.

EDTL:3001 Introduction to Museum Studies 3 s.h.

Overview of museum history, function, philosophy, collection, and curatorial practices; governance and funding issues; exhibition evaluation and audience studies; examples from Stanley Museum of Art, Museum of Natural History, Old Capitol Museum, and Medical Museum. GE: Social Sciences. Same as ANTH:3001, MUSM:3001, SIED:3001.

EDTL:3002 Technology in the Classroom 2-3 s.h.

Workshops on journalism/mass media curriculum, audio/video production, photojournalism, publication design, journalistic writing techniques, advising student publications. Same as JMC:3210.

EDTL:3059 Introduction to Education and the Regents Alternative Pathway to Iowa Licensure Program 4 s.h.

Foundational knowledge and understanding of educational practices for teacher intern candidates in the Regents Alternative Pathway to Iowa Licensure (RAPIL) program; topics include students as learners, the instructional process, and assessment. Requirements: admission to the RAPIL program.

EDTL:3060 Learning and Instruction for Today's Classrooms 4 s.h.

First course in the Regents Alternative Pathway to Iowa Licensure program. Requirements: admission to the RAPIL program.

EDTL:3061 Instructional Planning, Strategies, and Assessment 4 s.h.

Fourth course in the Regents Alternative Pathway to Iowa Licensure program. Requirements: admission to the RAPIL program.

EDTL:3062 Learning Communities 3 s.h.

Fifth course in the Regents Alternative Pathway to Iowa Licensure program. Requirements: admission to the RAPIL program.

EDTL:3063 Creating Classrooms Conducive to Teaching and Learning 3 s.h.

Third course in the Regents Alternative Pathway to Iowa Licensure program. Requirements: admission to the RAPIL program.

EDTL:3064 Intern Seminar on Critical Issues in Education 3 s.h.

Sixth course in the Regents Alternative Pathway to Iowa Licensure program. Requirements: admission to the RAPIL program.

EDTL:3065 Methods in Teaching in the Secondary Classroom 3 s.h.

Learn, identify, and implement effective content-specific secondary teaching methods with focus on active student engagement; students develop and enhance instructional planning/pedagogy with special emphasis on content-specific secondary teaching methods, including reading in content area; describe and implement process of pre-, formative, and summative assessment strategies, appropriately aligning them in the instructional design of secondary content lessons; taking specific steps toward improving professional dispositions.

EDTL:3091 Secondary Education Program Orientation and Classroom Management 1,3 s.h.

Overview including opportunities, policies and procedures, requirements and expectations, and services associated with the Teacher Education Program; characteristics of the classroom environment and their implications for organization and management; concepts and principles teachers can use when thinking about managerial tasks in the classroom; for prospective middle and secondary school teachers.

EDTL:3095 Teaching Reading in Secondary Content Areas 1,3 s.h.

Integration of reading strategies into secondary content areas for teacher candidates in secondary education.

EDTL:3103 Assessment for Instructional Planning and Practice 3 s.h.

Fundamentals of using assessment data to make instructional planning decisions that preservice educators need in their advanced coursework and classrooms; practical application with curriculum-based procedures; emphasis on classroom-based procedures used to make educational decisions to plan instruction for students, particularly those who are experiencing academic difficulty. Requirements: admission to TEP.

EDTL:3114 Parent-Child Relationships 3 s.h.

Roles and relationships within and between families, culture, society; identify (family) resources and concerns based on children's development, abilities.

EDTL:3120 Methods and Materials: Music for the Classroom Teacher 2 s.h.

Development of music skills, techniques, knowledge of methods and materials for teaching music to young children; for elementary education majors. Requirements: admission to TEP.

EDTL:3123 Reading and Responding to Children's Literature 3 s.h.

Reading and teaching of children's literature; becoming more knowledgeable readers of children's literature; using children's literature in elementary classroom for aesthetic, personal, social, and critical purposes; wide range of literary texts in different genres and multiple ways readers might experience these texts given particular teaching approaches; ways in which readers interact with texts and with each other to make meaning as they read and discuss literature. Requirements: admission to elementary TEP.

EDTL:3127 Methods and Materials: Physical Education, Health, and Wellness 2-3 s.h.

Methods, curriculum. Requirements: admission to TEP.

EDTL:3130 Adaptive Physical Education for the Elementary Classroom Teacher 2 s.h.

Create and deliver quality, inclusive physical education for students with mental, physical, or emotional disabilities; identify and evaluate the needs of disabled students, plan units and lessons with appropriate modifications for all learners, write an IEP, comply with IDEA in a physical education setting. Prerequisites: EDTL:3127.

EDTL:3131 Movement Education 2 s.h.

Movement education as a basis for psychomotor and cognitive development in children; summary of basic growth and motor development; in-depth instruction on theory and application of movement education curriculum, and practice on design and execution of movement education lessons.

EDTL:3139 American Government and Civics for the Elementary Classroom Teacher 3 s.h.

Foundations and processes of American government as related to development of civic literacy in elementary students and their teachers; founding documents, legal precedents, social and economic changes throughout American history; research-based teaching and learning processes from social studies education. Requirements: admission to TEP.

EDTL:3141 Elementary School Mathematics: Number and Operations 3 s.h.

Problem-solving approach to current trends in math education and process of teaching math; current math content knowledge assessed at start and end of course; opportunities to strengthen number and operations content knowledge; how children in grades K-5 think about and learn math; core ideas of learning, teaching, planning, and assessing number and operations concepts and skills; research-based pedagogical strategies that help children develop math concepts and procedures. Requirements: admission to TEP.

EDTL:3142 Elementary School Mathematics: Geometry and Measurement 3 s.h.

Problem-solving approach to current trends in math education; current math content knowledge assessed at start and end of course; opportunities to strengthen geometry and measurement content knowledge; how children in grades K-5 think about and learn math; core ideas of learning, teaching, planning, and assessing geometry and measurement concepts and skills; research-based pedagogical strategies that help children in elementary school develop math concepts and procedures. Requirements: admission to TEP.

EDTL:3143 Methods of Elementary Art and Field Experiences 3 s.h.

Application of studio methods to teaching children in Saturday Children's Art Class Program. Same as ARTE:3143.

EDTL:3146 Elementary School Mathematics: Data/Probability and Algebra 3 s.h.

Problem-solving approach to current trends in math education and process of teaching math; current math content knowledge assessed at start and end of course; opportunities to strengthen data analysis/probability and algebra content knowledge; how grade K-5 children think about and learn math; core ideas of learning, teaching, planning, and assessing data/probability and algebra concepts and skills; research-based pedagogical strategies that help children develop math concepts and procedures. Requirements: admission to TEP.

EDTL:3160 Reading and Language Arts Methods for Primary Students in Grades K-3 3 s.h.

Theoretical foundations and practical skills to become reflective professionals who can design and implement effective reading and language arts instruction; authentic formative assessment for economically, academically, culturally, racially, and linguistically diverse children in grades K-3; for preservice elementary teachers. Prerequisites: EDTL:3190 and EDTL:3002. Requirements: admission to elementary TEP.

EDTL:3161 Social Studies for the Elementary Classroom Teacher 3 s.h.

Individual growth and change due to environment, economy, and technology; focus on developing teacher's understanding of social and behavioral sciences and how they relate to geography, history, and government in student's growth toward democratic citizenship; emphasis on need to develop intellectually stimulating curricula based on Iowa Core in behavioral science; lesson and curriculum development from research-based best practices in teaching social studies and driven by Iowa Core goals and objectives; technology as a teaching tool and focus of investigation in today's society. Prerequisites: EDTL:3002 and EDTL:3190. Requirements: admission to elementary TEP.

EDTL:3163 Methods: Elementary School Mathematics 2-3 s.h.

Content; techniques of teaching and means of assessment for K-6 mathematics. Prerequisites: EDTL:3190 and EDTL:3002 and (EDTL:3141 or MATH:1120). Corequisites: EDTL:3170 and EDTL:3174. Requirements: admission to TEP.

EDTL:3164 Reading and Language Arts Methods for Intermediate Students in Grades 3-6 3 s.h.

Theoretical foundations and practical skills to become reflective professionals who can design and implement effective reading and language arts instruction; authentic formative assessment for economically, academically, culturally, racially, and linguistically diverse children in grades 3-6; for preservice elementary teachers. Prerequisites: EDTL:3190 and EDTL:3002. Requirements: admission to elementary TEP.

EDTL:3165 Elementary Science Methods I 3 s.h.

Meaningful and practical learning experiences to foster elementary science learning environments that engage learners in scientific practices and understanding of biological and chemical sciences; essential concepts; instruction to promote elementary student learning; learning, teaching, subject matter, curriculum, and assessment.

- EDTL:3166 Elementary Science Methods II** 3 s.h.
Meaningful and practical learning experiences to foster elementary science learning environments that engage learners in scientific practices and understanding of physical and earth/space sciences; essential concepts; instruction to promote elementary student learning; learning, teaching, subject matter, curriculum, and assessment.
- EDTL:3168 History for the Elementary Classroom Teacher** 3 s.h.
Development of historical literacy in elementary students and their teachers; connecting children to the past using family histories; interactions and patterns in world history; diverse perspectives in U.S. history; using primary sources to investigate state and local history. Requirements: admission to TEP.
- EDTL:3170 Elementary Classroom Management** 1-3 s.h.
Activities, techniques, strategies, theories related to effective classroom management. Prerequisites: EDTL:3190 and EDTL:3002. Corequisites: EDTL:3163 and EDTL:3174.
- EDTL:3172 Elementary Reading Practicum** 3-4 s.h.
Experience in teaching literacy to elementary students; opportunity to learn from an experienced teacher within a functioning classroom; supervisor with classroom experience mentors and supports students at practicum site; on-site practicum experiences preceded by on-campus seminar experience with practicum coordinator and supervisors; for preservice teachers. Prerequisites: EDTL:3002 and EDTL:3190 and EDTL:3160 and EDTL:3164. Corequisites: EDTL:4171.
- EDTL:3174 Elementary Math Practicum** arr.
Experience in teaching mathematics to elementary students; opportunity to learn from an experienced teacher within a functioning classroom; supervisor with classroom experience mentors and supports students at practicum site; on-site practicum experiences preceded by on-campus seminar experience with practicum coordinator and supervisors; for preservice teachers. Prerequisites: EDTL:3002 and EDTL:3190. Corequisites: EDTL:3163 and EDTL:3170.
- EDTL:3175 Elementary Social Studies/Science Practicum** 2 s.h.
Experience in teaching social studies and science to elementary students; opportunity to learn from an experienced teacher within a functioning classroom; mentoring and support from supervisor with classroom experience at practicum site; onsite practicum experiences preceded by on-campus seminar with practicum coordinator and supervisors; assignments designed to enrich and augment onsite experiences and tied to student's current methods courses; for preservice teachers. Requirements: admission to TEP.
- EDTL:3180 Drama in the Classroom** 3 s.h.
Theories of community, culture, identity in relation to language arts teaching and learning; emphasis on incorporating multiple literacies, both oral and print, into language arts curricula; action research involving oral literacy. Same as THTR:3610.
- EDTL:3187 Early Literacy Instruction for Young Children** 3 s.h.
Service-learning involving lecture, class discussion, and student participation in an early literacy program for preschoolers; concepts and skills necessary to conduct story time groups with young children that target development of print knowledge; application of learning by reading to small groups of preschool children. Recommendations: CSD:3118. Same as CSD:3187.
- EDTL:3190 Orientation to Elementary Education** 1-2 s.h.
Overview of elementary education expectations, including options for student teaching; classroom observation, lesson planning, performance indicators, INTASC standards, classroom management, information about mandatory child abuse reporting, blood-borne pathogens, professional ethics.
- EDTL:3204 Art Education Studio and Field Components** 3 s.h.
Art training related to processes of elementary and secondary school art teaching; studio methods applied to teaching children and adolescents. Requirements: concurrent enrollment in EDTL:3290 for Teacher Education Program student.
- EDTL:3205 Methods of Secondary Art and Field Experience** 3 s.h.
Art education theory and methods at secondary levels; art curriculum, unit, and lesson planning; evaluation, motivation, instructional materials; observational techniques.
- EDTL:3212 Tasting Art: How the Senses Enhance Our Experience of Art** 3 s.h.
Investigates how artists initiate sensory reactions in viewers through close looking at objects, careful reading of historical and contemporary texts, and producing art; examining how diverse fields such as social studies, science, math, literature, psychology, philosophy, and cultural studies have informed artists' interpretations of their environments; how to bring art into a variety of content areas to enrich the learner's understanding; how to analyze art, art history, art criticism, aesthetics, and art production.
- EDTL:3215 The Museum of Today and Tomorrow: How Museums Enhance the K-12 Classroom** 3 s.h.
What do museums have to offer teachers? How are they relevant to social studies, math, English, and science teachers? Students are put in charge of answering these questions and build their knowledge about art and innovative teaching strategies in the K-12 classroom and museum, practice designing lessons around a work of art, and apply their knowledge about art and curriculum into interactive online modules; students work directly with art on campus in the Lindquist Art Collection in the College of Education and the University of Iowa Stanley Museum of Art. Same as MUSM:3215.
- EDTL:3290 Introduction and Practicum: Art** 2-3 s.h.
Practice of learning from an experienced art teacher in an art classroom and setting; observations in an art classroom side-by-side with experience and insight gained through participating and teaching in the Saturday Art Workshop Program. Requirements: admission to TEP.
- EDTL:3375 Teaching and Performing Shakespeare** 3 s.h.
Students work through Shakespeare's most frequently taught plays—*Romeo and Juliet*, *Macbeth*, *A Midsummer Night's Dream*, *Hamlet*, and *The Tempest*—by focusing on various learning strategies and resources; each play is taught in a different method, using a different edition, and through distinct teaching resources, most notably on the difference between the page (close reading, archival skills, historical analysis) and the stage (watching, reviewing, and, most importantly, producing drama).

- EDTL:3382 Language and Learning** 2-3 s.h.
How language reflects and constructs learners' identities and cultures; readings related to oral and written language, native and second language development, linguistic diversity; discussion of the relationship of language theory to schools of language instruction. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. Same as ENGL:3190.
- EDTL:3393 Reading and Teaching Adolescent Literature** 3 s.h.
Reading and evaluation of literature suitable for junior and senior high school students. English majors and English and Creative Writing majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. Same as ENGL:3191.
- EDTL:3492 Heritage Language Teaching** 3 s.h.
Focus on cutting-edge research and methods to develop adequate curriculum, language courses, and programs for heritage speakers (HS); readings include bilingual development, sociolinguistics, language teaching, and heritage speakers' affective needs; use of these theories to help understand, develop, and apply best practices in teaching HS; topics also help create best practices in teaching mixed language courses for second language (L2) and HS students. Taught in English. Requirements: at least one course taught in Spanish at the 2000 level or above. Same as SPAN:3192.
- EDTL:3532 Introduction and Practicum: Mathematics** 3 s.h.
Experience designing and teaching lessons with varied instructional intent and use of multiple instructional strategies; study and practice methods of managing classroom learning environment; significant time spent in cooperating schools, on-campus meetings. Requirements: admission to TEP.
- EDTL:3534 Methods: Middle School Mathematics** 3 s.h.
Subject matter content, teaching and assessment techniques for grades 5-9 math; how students learn mathematics; mathematics curricular planning for all students.
- EDTL:3605 Instrumental Techniques** 2 s.h.
Same as MUS:3605.
- EDTL:3610 Introduction and Practicum: Music** 2 s.h.
Experience observing and assisting music teachers and students in elementary or secondary schools; three hours per week in the school plus on-campus class meetings. Requirements: admission to TEP.
- EDTL:3620 Methods and Materials: General Music** 3 s.h.
Methods for teaching general music in elementary and secondary schools. Prerequisites: EDTL:3002 and EDTL:3610.
- EDTL:3635 Instrumental Conducting** 3 s.h.
Advanced skills for instrumental conducting, score analysis, rehearsal techniques, literature selection. Prerequisites: MUS:3625. Same as MUS:3635.
- EDTL:3640 Choral Methods** 3 s.h.
Organization, implementation of effective choral music programs for all ages. Same as MUS:3640.
- EDTL:3645 Choral Conducting and Literature** 3 s.h.
Advanced skills appropriate to choral conducting, analysis, literature selection studied and implemented to develop a secure approach to choral art; students preparing to teach in the elementary or secondary schools must register under EDTL:3645. Prerequisites: MUS:3625. Same as MUS:3645.
- EDTL:3650 Instrumental Methods and Materials** 3 s.h.
Elementary and secondary instrumental music methods course required for K-12 music teacher certification. Same as MUS:3650.
- EDTL:3715 Experiential Teaching and Learning** 3 s.h.
Introduction to practice of experiential learning and teaching; students create and lead experiential activities in formal and informal learning environments; exploration of factors that impact the value of an experience and assess impact; integration of multiple disciplines and perspectives in a collaborative manner; skills for processing and guiding reflection to determine outcomes of experiences; work collaboratively to design, plan, execute, and determine outcomes of an experience for a target population.
- EDTL:3905 Teaching Deaf and Hard of Hearing Students** 3-4 s.h.
Issues in d/Deaf education; management techniques, communication strategies, teaching strategies, instructional materials, hands-on activities, assessments, parent involvement; use of technology, ethnic and cultural diversity, classroom management, pre-reading techniques, literacy development, educational program options. Taught in English and/or American Sign Language. Requirements: for 4 s.h. option—concurrent enrollment in ASL:2002, if not taken as a prerequisite. Same as ASLE:3905.
- EDTL:3915 Introduction: Strategist I (Elementary)** 1-2 s.h.
Teaching students with mild disabilities in elementary resource placements; current trends and issues, basic and theoretical approaches, implications of federal and state statutes, multidisciplinary team approaches to providing appropriate educational programming; students complete a practicum with an elementary special education teacher. Requirements: admission to TEP.
- EDTL:3976 Reading Intervention for Students At Risk** 3 s.h.
Reading instructional approaches for students at risk for, or with reading disabilities; students enrolled in lab apply content while working with a reading disability student; use of effective teaching principles and research-based practices for designing and delivering instruction in reading (including oral and silent reading), vocabulary development, reading fluency, comprehension. Requirements: admission to TEP.
- EDTL:4021 Science for High Ability Students** 1 s.h.
Unique challenges and opportunities confronted by teachers of students with above average ability and interest in science; theory and practice; development of program outlines for science programs.
- EDTL:4022 Math Programming for High Ability Students** 1 s.h.
Unique challenges and opportunities confronted by teachers of high-ability students; theory and practice, development of program outlines for implementation. Same as PSQF:4122.
- EDTL:4024 Differentiating Projects with Technology** 1 s.h.
Use of digital tools to enrich student presentations; PowerPoint slide shows, presentations uploaded to World Wide Web, interactive multimedia presentations via HyperStudio.
- EDTL:4025 Differentiated Instruction for the Gifted** 1 s.h.
Program options for K-12 gifted students; student abilities and needs linked with various curriculums; case studies, school materials.

- EDTL:4026 Reading for High-Ability Students** 1 s.h.
Purposes and methods of reading instruction, with focus on developmentally appropriate needs of high-ability readers; genres of literature, enriched and accelerated reading curricula, role of reading in social and emotional development of gifted students.
- EDTL:4029 Developing Leadership Skills for Gifted and Talented Students, K-12** 1 s.h.
- EDTL:4032 Middle School Curriculum, Methods, and Practicum** 3 s.h.
Junior high and middle school development compared; characteristics of exemplary programs, disciplinary and interdisciplinary trends; variety of teaching methods (group and individual); hands-on activities. Requirements: admission to TEP.
- EDTL:4065 Social Studies for High-Ability Learners** 1-2 s.h.
Intersection of unique challenges presented by talented students and challenges of designing, implementing, and assessing quality inquiry-based social studies instruction; background in social studies or social studies education not required.
- EDTL:4066 Curriculum Concepts in Gifted Education** 3 s.h.
Analyzing and refining understanding of curriculum in context of: needs of gifted and talented students, rationale for and implementation of curriculum differentiation, and curriculum principles for and applications to gifted and talented; designed for preservice and inservice educators, as well as those interested in curriculum development, design, and delivery.
- EDTL:4067 Conceptions of Talent Development** 3 s.h.
Students review conceptions of talent development and explore possibilities for appropriate programming in specific fields across various stages in life; traditional opportunities in gifted education programs; stages of development in early childhood; development of knowledge and skills in addition to and beyond organized educational programs.
- EDTL:4072 Thinking Skills** 1 s.h.
Factors involved in teaching thinking skills as a total concept; the relationship of critical and creative thinking; review of published programs.
- EDTL:4073 Programming/Curriculum for High Ability Students** 1 s.h.
Programming and curriculum for K-12 students identified as gifted or highly able; in-class differentiations, special projects for pull-out programs, facilitating research projects, mentoring in advanced programming.
- EDTL:4074 Differentiation at the Secondary Level** 1 s.h.
Importance of differentiation for gifted learners in middle school and high school; differentiation through advanced placement programs as well as broader perspectives on differentiation; essentials for differentiation understood and applied to a lesson that will be implemented with students.
- EDTL:4081 ePortfolio Design and Production** 1-2 s.h.
Experience producing an ePortfolio and uploading it to the internet; practical experience using digital tools, content and design related to ePortfolio production; experience using a web browser, accessing the internet, and using a digital camera or scanner. Requirements: able to perform basic computer functions and use a World Wide Web browser. Same as EALL:4081, EPLS:4081, PSQF:4081, RCE:4081.
- EDTL:4085 Current Readings and Research in Gifted Education** 1 s.h.
Research in the field of gifted education and talent development; applications of research to ensure best practices in providing services and programs for high-ability learners.
- EDTL:4087 Seminar: Curriculum and Student Teaching** 1-3 s.h.
Discussions, role-playing, group and individual reports, analysis of critical incidents, classroom management, videotapes of student classroom performance pertinent to participants' student teaching experiences. Requirements: student teaching.
- EDTL:4089 Special Subject Area Student Teaching** arr.
Supervised teaching experience in a single subject in grades 1-6.
- EDTL:4091 Observation and Laboratory Practice in the Secondary School** arr.
Student teaching experience in performing the duties of regular classroom teachers under supervision of experienced personnel in secondary schools.
- EDTL:4092 Observation and Laboratory Practice in the Secondary School** arr.
Continuation of EDTL:4091.
- EDTL:4093 Teaching and Learning for a Global Perspective** 3 s.h.
Examination of conceptualizations and themes, along with theories, strategies, and resources that can inform teaching and learning for global competence education in all disciplines; teaching for prejudice reduction and education for informed and responsible global citizenship; creation of a standards-based curriculum project; designed for practicing teachers.
- EDTL:4096 Topics in Teaching and Learning** arr.
- EDTL:4137 Introduction to Educating Gifted Students** 3 s.h.
Fundamental issues such as curriculum, counseling, family issues, gender and minority issues. Same as RCE:4137.
- EDTL:4153 Gifted and General Education Collaboration** 1 s.h.
Need for differentiated learning experiences throughout the school day for gifted students; how classroom teachers and gifted/talented resource teacher collaborate to provide appropriate instructional services to gifted students; collaborative models, planning process, and recommendations for both direct and indirect services. Requirements: internet access.
- EDTL:4171 Diversity and Exceptionalities in Literacy Instruction** 3 s.h.
Elaborates on content from EDTL:3160 and EDTL:3164; issues in theoretically sound reading and writing assessment, instruction in K-8 classrooms where local, state, and national goals play increasing roles; reading and writing processes; teaching and learning of reading and writing; focus on role of language and conversation in learning, content area reading instructional strategies, classroom-based reading and writing assessment, special issues in teaching, and learning with textbooks. Prerequisites: EDTL:3190 and EDTL:3002 and EDTL:3160 and EDTL:3164.

EDTL:4187 Effective Teaching Strategies for the Elementary Teacher: Student Teaching Seminar 3 s.h.

Provides student teachers with a structured, consistent forum to critically examine and engage in professional dialogue related to the process of becoming a teacher; draws on personal classroom experiences as well as theories and ideas about education studied throughout the teacher education program; guided by the InTASC Model Core Teaching Standards and the Iowa Teaching Standards, students study and discuss principles of effective teaching practice that lead to improved student achievement; as students work through components of planning, instruction, assessment, and lesson reflection, they complete a Teacher Performance Assessment (edTPA). Requirements: elementary education major in student teaching semester.

EDTL:4188 Practicum in Teaching and Curriculum Development in Gifted Education 1-6 s.h.

Experience in developing course materials for classes offered through the Belin-Blank Center for Gifted Education. Same as RCE:4188.

EDTL:4189 Practicum in Gifted/Talented Education 1 s.h.

Experience developing course materials for classes offered through the Belin-Blank Center for Gifted Education.

EDTL:4190 Supervised Teaching in the Elementary School: Interactive Phase arr.

Student teaching at the elementary level (K-9). Corequisites: EDTL:4091. Requirements: application to the Office of Teacher Education and Student Services.

EDTL:4191 Supervised Teaching in the Elementary School: Pre- and Post-Active Phase arr.

Corequisites: EDTL:4190. Requirements: application to the Office of Teacher Education and Student Services.

EDTL:4192 Special Area Student Teaching arr.

Supervised teaching and observation in specific areas of elementary curriculum.

EDTL:4193 Independent Study arr.

Requirements: senior standing.

EDTL:4199 Program Models in Gifted Education 3 s.h.

Development and refinement of preservice and inservice educators' understanding of academic programs; needs of gifted and talented students, including diverse and often underrepresented groups of students; rationale for and implementation of a comprehensive program model for gifted students. Requirements: internet access.

EDTL:4210 Museum Without Walls: Museum, Art Education, and Community Engagement in the Digital Age 3 s.h.

Collaborative work to recreate one exhibition from the University of Iowa Stanley Museum of Art that took place before the flood of 2008; creation of content that contributes to a virtual museum experience; introduction to digital tools commonly used in design of exhibitions; recreation of historical exhibitions based on documentary photographs in museum and University archives and research on the premise of the exhibition and objects on view; how digital artifacts might be used in different contexts; use of museum and digital environments as labs for lifelong and distance learning. Same as INTM:4210, MUSM:4210.

EDTL:4220 The Avant-Garde at the University of Iowa 3 s.h.

In 1968, the intermedia program was established in the School of Art and Art History as one of the first art programs that deliberately brought studio training and a range of other academic and performance disciplines together in order to foster new experimental practices; the UI also is home to the International Dada Archive and Research Center, established in 1979; using resources of the UI library and museum, students examine the ways avant-garde ideas enter into everyday life, and how radical ideas come to shape, transform, and activate new ways of learning today.

EDTL:4314 Introduction and Practicum: Secondary English 3 s.h.

Experience observing and assisting English or speech teachers and students in secondary schools; 12 hours per week in the school plus on-campus class meetings.

EDTL:4315 Learning to Teach Secondary English/Language Arts and Field Experience 3 s.h.

Organizational techniques, methods, materials for teaching high school English; experience in simulated teaching situations during laboratory sessions, integrated with lectures and discussions. Prerequisites: EDTL:4314. Same as ENGL:4810.

EDTL:4355 Approaches to Teaching Writing 3 s.h.

Theories, practices, strategies, and history of writing and teaching writing. English majors may apply this course to the following area and/or period requirement. AREA: Nonfiction and Creative Writing. GE: Engineering Be Creative. Same as CNW:4355.

EDTL:4392 Voice, Drama, and Debate in the Secondary Schools 3 s.h.

Introduction to elements of classical and contemporary rhetoric, the art of debate, oral interpretation and public speaking, dramatic methods in the classroom, and theater management; important issues and vocabulary of drama and debate including literary, theatrical, pedagogical, and sociohistorical concepts and terms; importance of classical rhetorical strategies and their relevance in the political realm; students work through drama, the creative process of playwriting, acting, designing, and staging a play.

EDTL:4393 Critical Media Studies and Production in Secondary Schools 3 s.h.

Introduction to teaching media in secondary schools; preparation to teach critical media literacy, media law and ethics, forms of journalism writing, and production process; emphasis on essential role of media in a democratic society; exploration of instructional strategies and organization practices to guide secondary students to think critically as media consumers and producers; students write and produce their own texts and experience processes to strengthen understanding of learning standards for secondary media students—communication, collaboration, creativity, and critical thinking.

EDTL:4394 Secondary Reading Instruction 2-3 s.h.

Methods and materials used in teaching developmental reading in all junior and senior high school content areas. Prerequisites: EDTL:4314.

EDTL:4406 Foreign Language Education Practicum I 3 s.h.

Skill development for teaching languages in the early grades; curriculum design, test creation, microteaching with inservice teachers. Prerequisites: EDTL:4410. Corequisites: EDTL:4416.

EDTL:4407 Foreign Language Education Practicum**II 3 s.h.**

Practice in lesson design, classroom management techniques, evaluation skills during work with inservice foreign language teachers. Prerequisites: EDTL:4410. Corequisites: EDTL:4417.

EDTL:4410 Teaching K-12 Second Language Learners**3 s.h.**

Second language learning and teaching in the multicultural classroom; influence of school setting, societal context. Requirements: admission to TEP.

EDTL:4416 Learning to Teach Second Languages I**3 s.h.**

Approaches, methods, and techniques of teaching the modalities of listening, speaking, reading, and writing in a second language. Corequisites: EDTL:4406.

EDTL:4417 Learning to Teach Second Languages II**3 s.h.**

Curriculum design, classroom management, student evaluation, technology, using context to teach culture in second languages. Prerequisites: EDTL:4410 or EDTL:6483. Corequisites: EDTL:4407.

EDTL:4418 ESL Practicum I**4 s.h.**

Skill development for teaching English as a second language; curriculum design, test creation, microteaching with inservice teachers.

EDTL:4465 Methods: Teaching English as a Foreign Language**3 s.h.**

Explores approaches, methods, and practices in teaching English as a foreign language; history of language teaching approaches as well as cutting-edge innovations; all four skill areas are covered (speaking, listening, reading, writing); ethical issues concerning linguistically diverse learners and the impact of English language policies around the world; students will develop skills in teaching approaches for English Language Learners (ELLs), including lesson and unit planning and materials evaluation and adaptation.

EDTL:4467 Methods: ESL and Bilingual Education**4 s.h.**

Exploration of approaches, methods, and practices in teaching English to speakers of other languages in K-12 school settings; communicative and content-based approaches to language learning with practical application of theory and research; issues concerning linguistically diverse learners covered with pedagogical implications; skills in teaching approaches for English language learners; lesson and unit planning, materials evaluation and adaptation, and assessment for placement, diagnosis, exit, and evaluation of English language learners.

EDTL:4468 Instruction of English Language Learners for K-12 Classrooms**3 s.h.**

Preparation to work with English Learners (ELLs) in K-12 settings; dramatic increase in this population over recent decade; need for teachers to understand sociocultural and linguistic challenges faced by ELLs and their families; proficiency in instructional and differentiation strategies for instructing ELLs; ELL variation and cultural considerations, English language development standards, second language teaching and learning, differentiation for ELLs, effective practice for ELL instruction and assessment; for students in teacher preparation program.

EDTL:4498 Language Structure for Teaching English Language Learners**4 s.h.**

Exploration of theory, rules, and examples to gain practical understanding of the system of language structure; focus on working with English language learners from a variety of first language backgrounds in educational settings; principles of discourse, phonology, morphology, syntax, pragmatics, and semantics that build a framework for discussion of applications and analysis of student and teacher language; address English language learners' development in P-12 settings; strategies to evaluate learner language; increase awareness of language challenges for English language learners that can occur in spoken and written educational instruction and materials. Requirements: admission to TEP.

EDTL:4535 Methods: High School Mathematics**3 s.h.**

Subject matter content, teaching and assessment techniques for grades 9-12 math; how students learn mathematics; mathematics curricular planning for all students. Prerequisites: EDTL:3534.

EDTL:4565 Mathematics in Management and Social Sciences**3 s.h.**

Various real life applications of modern mathematics including management, decision making, issue of optimization, methods for optimal scheduling, voting methods, game theory, error checking, and other related strategies.

EDTL:4630 Psychology of Music**2-3 s.h.**

Cognition of music, affective response, aesthetic response, musical ability. Same as MUS:4630.

EDTL:4640 Introduction to Music Research**2-3 s.h.**

Preparation for conducting research on music behavior.

EDTL:4751 Science Methods I: Early Learners with Field Experience**3 s.h.**

Introduction to students, schools, the purpose of schooling children in science, learning theories, science curricula, contemporary science education issues, effective science teaching.

EDTL:4752 Science Methods II: Junior High with Field Experience**3 s.h.**

Developing, writing, and orally defending a robust research-based framework for teaching science that includes student goals, student actions, content, materials, activities, teaching behaviors and strategies, contemporary learning theories, self-evaluation. Prerequisites: EDTL:4751.

EDTL:4753 Science Methods III: High School with Field Experience**3 s.h.**

Articulating, experiencing, practicing a research-based framework for teaching science in the real world of students, schools, teaching. Prerequisites: EDTL:4752. Corequisites: EDTL:4779.

EDTL:4768 Computer Science Methods**3 s.h.**

Introduction to issues and ideas related to instruction of computer science courses; how to integrate computer science learning into other content areas or content learning into computer science courses in meaningful ways; meets all requirements the Iowa Board of Educational Examiners have set forth for computer science methods courses including curriculum development, project-based methodologies, communication about computing, and digital citizenship.

EDTL:4779 Secondary School Science Practicum**arr.**

Supervised teaching experience in a single subject; secondary school setting.

EDTL:4811 Introduction and Practicum: Secondary Social Studies 3 s.h.

Experience observing and assisting social studies teachers and students in secondary schools; nine hours per week in the school plus on-campus class meetings. Requirements: admission to TEP.

EDTL:4870 Methods: Secondary Social Studies 3 s.h.

Analysis of the teaching-learning process; organization of social studies content for teaching purposes; evaluation of learning procedures and new strategies; practicum work includes microteaching, computer-assisted modules, lesson plan development, writing test items.

EDTL:4876 Advanced Methods for Teaching and Learning in a Culturally Responsive Classroom 3 s.h.

Multiculturalism and equity issues in education that support development of resources and lesson activities to appeal to a diverse student body; asynchronous online course for educators in all disciplines who are pursuing licensure or currently teaching in a K-12 classroom, advanced technological literacy not required. Eight weeks. Requirements: successful completion of a methods course in K-12 licensure program.

EDTL:4900 Foundations of Special Education 3 s.h.

Students with disabilities, gifted and talented; strategies for effective treatment, collaboration between regular and special education teachers; remediation of academic, behavioral, social problems.

EDTL:4921 Transition and Related Issues 3 s.h.

Curriculums, programs, and delivery systems that help persons with disabilities move from preschool to elementary, elementary to middle school, middle school to high school, and to postsecondary life; emphasis on ecological and task analysis, transition planning strategies, interagency collaboration, self-determination, access to resources and support services.

EDTL:4922 Supervised Teaching: Elementary Strategist I 6 s.h.

Student teaching at the elementary level in a program for students with mild to moderate disabilities. Requirements: elementary education major.

EDTL:4934 Parent-Teacher Communication 1-3 s.h.

Realities of working with parents; interpersonal skills; options for parent support services. Same as PSQF:4134.

EDTL:4936 Home/School/Community Partnerships 3 s.h.

Issues related to collaboration among families, educators, community members in implementing school programs. Same as PSQF:4136.

EDTL:4940 Characteristics of Disabilities 3 s.h.

Etiologies of mild/moderate disabilities; current educational trends; educational alternatives; importance of multidisciplinary team; psychological and social-emotional characteristics of individuals.

EDTL:4950 Behavioral and Social Interventions 3 s.h.

Individual behavioral management, behavioral change strategies, and social interaction strategies, methods, and techniques for individuals with exceptional learning needs.

EDTL:4967 Integrated Disability Studies Practicum 1-3 s.h.

Hands-on, interactive experience to learn what is involved in working with young adult students with multiple learning and cognitive disabilities; four whole-group classroom sessions and required attendance at one UI REACH course.

EDTL:4975 Explicit Instruction 3 s.h.

Empirically supported methods for teaching reading and mathematics K-12 to students with mild-moderate disabilities; assessment and curricular adaptations to individual needs.

EDTL:4980 Special Education Literacy 3 s.h.

Curriculum and materials to teach reading explicitly; making instructional decisions about student progress, evidence-based practices, and strategies to teach reading to students with disabilities; pedagogical principles and practices to instruct a whole class, small group, or individuals; focus on essential knowledge and skills associated with assessment, instruction, intervention, and assistive technology for students with and at risk for disabilities in grades K-8; designing lesson plans that incorporate reading strategies, practices, and assistive technology within reading instruction.

EDTL:4982 Instructional Decision Making in Education 3 s.h.

Overview of and practical application with curriculum-based procedures for assessment and evaluation; classroom-based measures to make educational decisions for instruction of students, particularly those experiencing academic difficulty.

EDTL:4983 Academic and Behavioral Strategies for Students with Learning Disabilities and Behavioral Disorders 3 s.h.

Merge theory and practices for assessing, planning interventions, delivering instruction, and monitoring progress for individuals who have learning disabilities and emotional/behavioral disorders.

EDTL:4984 Academic Skills for Students with Special Needs 3 s.h.

Introduction to appropriate methodology for teaching academic skills to students with significant learning difficulties; how to teach students effectively regardless of the label that might be applied to them or the setting to which they might be assigned; effective application of classroom-based measurement, curriculum development, and instructional strategies for teaching academic skills to education students with special needs.

EDTL:4987 Introduction to Assistive Technology 3 s.h.

How assistive technology can be used for attainment of goals in education or work. Same as RCE:4187.

EDTL:4990 Interdisciplinary Issues in Disabilities 1-3 s.h.

Critical issues related to interdisciplinary delivery of services to persons with developmental disabilities; observation and participation in staffing and consultation; opportunity for related community experiences.

EDTL:5055 Academic Writing Workshop 3 s.h.

Drafting and workshopping academic papers including dissertations, proposals, manuscripts, conferences, and courses; discussions center on cross-disciplinary perspectives about academic writing processes and discourses; rhetorical considerations in academic writing; audience and readership within and across disciplines; clear and effective communication of data; writing choices, styles, and tones; students set writing goals and projects.

EDTL:5080 Workshop: Teacher Training for Advanced Placement Courses 1-2 s.h.

Focus on a particular academic content area.

EDTL:5081 Facilitating Student-Centered Discussions**3 s.h.**

Support for educators who want to create classroom environments that prioritize student voice and democratic exchange of ideas; theoretical approaches to classroom discourse and dialogic teaching; how linguistic and racial power inform and constrain discussion; students analyze their current classroom discourse practices through theoretical lenses, including how teachers and students are informed by historically dominant discourse norms and ways that discussion topics and issues are labeled as controversial.

EDTL:5083 Diagnostic Reading Instruction**3 s.h.**

Examination of research, policies, and practices related to reading assessments and intervention for school-aged children and adolescents; key focus on translating theoretical foundations of reading into practice of designing targeted interventions for students with varying strengths and weaknesses in core reading components; activities provide an understanding of underlying principles of diagnostic reading instruction and field-based practice in administering, scoring, and interpreting reading assessments; making data-based decisions about instruction for individual and small groups of students. Requirements: admission to M.A. in teaching, leadership, and cultural competency program.

EDTL:5085 Generation Innovation: Technology Integration in 21st-Century K-12 Schools**3 s.h.**

Exploration of the technology that shapes 21st-century U.S. schools, curriculum, and teacher professional development; examination of ways in which technology integration and use shapes student learning and identity development. Requirements: admission to M.A. program in teaching, leadership, and cultural competency.

EDTL:5087 Anti-Oppressive Literature Instruction**3 s.h.**

Support for K-12 teachers in selecting, analyzing, and planning discussions about literary texts in support of anti-racist and anti-oppressive teaching and learning; educators and scholars committed to critical pedagogy and anti-racist and anti-oppressive education argue that reading and analyzing texts by and about people of color and historically marginalized groups is an essential part of equitable, democratic education; how education is never neutral; choosing an explicit anti-oppressive stance; recognizing literature's role in promoting equity and analyzing oppressive forces in education.

EDTL:5090 Diversity and Identity in K-12 Schools**3 s.h.**

Advanced seminar on diversity- and identity-related issues in K-12 education for practicing teachers and K-12 professionals; students engage in regular self-evaluation of practices and develop deeper understanding of racism, sexism, classism, and other forms of oppression as they relate to the practices of K-12 teachers and schools; curricular and pedagogical decision making, relative to impact on student identity. Requirements: admission to master's in teaching, leadership, and cultural competency program.

EDTL:5091 LGBTQ Topics in Education**3 s.h.**

In spite of many challenges that lesbian, gay, bisexual, transgender, and queer-identified youth experience in U.S. K-12 schools, queer youth demonstrate agency and action as they create positive spaces and community for their identities; examination of the intersection of policy and practice with respect to queer identities at all levels of K-12 education; history of queerness in the U.S. with focus on the creation of the concept of compulsory heterosexuality and the manner in which this concept is reinforced in K-12 schools.

EDTL:5095 Issues in U.S. Schools**3 s.h.**

Addresses critical questions facing American public schools—governance, finance, and policy structures that have influenced teaching and learning in public schools; particular emphasis on disproportionate access and privilege within the institutions that comprise and support public schooling. Requirements: admission to the M.A. in teaching, leadership, and cultural competency program.

EDTL:5099 Conducting School-Based Action Research**3 s.h.**

Focus on teachers or administrators as change agents and researchers in schools/districts; scholarly approach to improving teaching and learning by way of an action research project. Requirements: completion of all M.A. in teaching, leadership, and cultural competency coursework.

EDTL:5104 Language Disorders in School-Aged Children**3 s.h.**

Emphasis on elementary grades; usually taken in conjunction with EDTL:4192, which provides approximately 70 hours of supervised clinical practice in elementary schools. Recommendations: primarily for communication sciences and disorders majors. Same as CSD:5104.

EDTL:5535 Current Issues in Mathematics Education**1-3 s.h.**

Recent curriculum developments, experimental programs, research relevant to classroom instruction, trends in education that may have a significant impact on mathematics programs.

EDTL:5600 Graduate Music Education Workshop**1 s.h.**

For inservice music teachers; topics vary. Same as MUS:5600.

EDTL:5601 Graduate Music Education Workshop II**1 s.h.**

Varied topics; for inservice music teachers. Same as MUS:5601.

EDTL:5610 Foundations of Music Education Curricula**3 s.h.**

Curriculum development, instructional materials, analysis of current teaching methods and techniques in school music programs; historical foundations of music education.

EDTL:5961 Foundation of Applied Behavior Analysis**3 s.h.**

Foundational knowledge in basic principles and philosophical assumptions of behavior analysis, behavioral terminologies, verbal operants, and measurement concepts; explicitly links theory of behavior to practical application (e.g., special education); one of seven courses needed to qualify for the Board Certified Behavior Analyst (BCBA) exam. Corequisites: EDTL:7953.

EDTL:5962 Function of Behaviors and Interventions**4 s.h.**

Functional assessment/analysis and interventions designed to change behaviors; describing and implementing components of functional behavioral assessment; using results of a functional assessment to develop a program to teach appropriate behavior and/or decrease inappropriate behaviors; development of an instructional program to teach desired behaviors; third in a four-course sequence to prepare Chinese-speaking students to sit for the Board Certified Assistant Behavior Analyst (BCaBA) certification exam sponsored by the Behavior Analyst Certification Board (BACB). Prerequisites: EDTL:5961 and EDTL:7953.

EDTL:5963 Ethics and Professional Conduct of Behavior Analysts 3 s.h.

Issues related to ethical and professional conduct of behavior analysts when working with clients according to the Behavior Analyst Certification Board (BACB) professional disciplinary and ethical standards and guidelines for responsible conduct for behavior analysts; links BACB ethical standards to conduct standards of related disciplines and touches on pervasive ethical conduct considerations for professionals conducting research or providing services to vulnerable populations.

EDTL:5964 Behavior Analyst Practicum 1-4 s.h.

Development, implementation, and evaluation of techniques that produce behavior changes in clients; discussion of key issues related to techniques of applied behavior analysis; review of various theoretical, conceptual, historical, legal, and practical aspects of behavior analysis; provides a portion of the supervisory component as required by the Behavior Analyst Certification Board (BACB).

EDTL:5965 Ethics and Professional Conduct of Behavior Analysts II 3 s.h.

Addresses issues related to ethical and professional conduct of behavior analysts when working with clients according to the Behavior Analyst Certification Board (BACB) Professional Disciplinary and Ethical Standards and Guidelines for Responsible Conduct for Behavior Analysts; this is a second course in ethics and professional conduct designed to prepare students who speak Chinese to sit for the Board Certified Behavior Analyst certification exam sponsored by the BACB; students in this course will examine the BACB Guidelines for Responsible Conduct and issues related to (a) interventions, (b) behavior change systems, and (c) implementation, management, and supervision. Prerequisites: EDTL:5961 and EDTL:5963 and EDTL:7953.

EDTL:5966 Advanced Topics in Applied Behavior Analysis 3 s.h.

Behavior-change considerations, behavior-change systems, intervention, and issues related to implementation, management, and supervision; devotes specific attention to interventions commonly applied to individuals with developmental disabilities.

EDTL:6015 Ph.D. Seminar: Literacy, Culture, and Language Education 3 s.h.

Exploration of theoretical and epistemological foundations in literacy, culture, and language education; exposure to diverse disciplinary and interdisciplinary foundations that inform literacy education, cultural studies, multilingual education, and social studies education; goal is for students to identify a disciplinary and interdisciplinary focus that will inform their research.

EDTL:6104 Literature for Children II 3 s.h.

Current theory, research, and practice in reading and responding to children's literature; genre and topic vary. Same as ENGL:6104.

EDTL:6164 Early Literacy Development and Instruction 2-3 s.h.

Understanding of early reading and writing experiences; relationship of reading to other communication areas; knowledge of instructional approaches, techniques, materials, assessment procedures; interrelationship of home and school experiences; identification of current and crucial issues and relevant research.

EDTL:6165 Reading and Writing Across Intermediate Grades 3 s.h.

Issues in teaching, learning, and assessment of students grades 4-9; fostering positive literate identities, literacy engagement, strategies for reading, writing, and critically responding to texts in a range of genres and formats and across content areas.

EDTL:6167 Inquiry-Based Curriculum Development in Early Childhood and Elementary Classrooms 3 s.h.

Theoretical and practical organization of developmentally appropriate curricula and teaching methods to promote learning.

EDTL:6171 Advanced Reading Clinic Techniques 2-3 s.h.

Instructional procedures for children and early adolescents with severe learning problems in reading; causes of reading disorders; educational prognosis for severely disabled readers. Corequisites: EDTL:6172.

EDTL:6172 Advanced Reading Clinic Practicum 2-3 s.h.

Practice in selecting and using instructional procedures that address the needs and interests of struggling literacy learners, with emphasis on teaching to students' strengths; how to fit clinical teaching techniques into an overall literacy instructional program. Corequisites: EDTL:6171.

EDTL:6267 Seminar: Current Issues in Art Education 3-4 s.h.

Analysis of literature in art education and related disciplines. Same as ARTE:6267.

EDTL:6293 Individual Instruction arr.**EDTL:6315 M.A. Seminar: English Education arr.**

Significant developments in English education; primary and collateral readings. Same as ENGL:6315.

EDTL:6393 Master's Thesis arr.**EDTL:6400 Fundamentals of Second Language Assessment 3 s.h.**

How to write language tests; discussion of fundamental issues in development of new tests or selection of existing tests. Same as SLA:6503.

EDTL:6402 Second Language Program Management 3 s.h.

Preparation for supervising, administering foreign language programs at all levels; for precollegiate language teachers and graduate students. Same as SLA:6504.

EDTL:6403 Language Policy and Planning 3 s.h.

Theoretical foundations, research methods, and findings in language policy and planning research; consideration of local, national, and international language policies; multiple disciplinary perspectives on language policy including linguistics, political science, law, and sociology.

EDTL:6409 Cultural Curriculum 3 s.h.

Culture's role in foreign/second language teaching; definition, pedagogy, assessment, and materials that allow culture to be taught and learned. Same as SLA:6970.

EDTL:6480 Issues in Foreign Language Education 3 s.h.

Theoretical perspectives of pivotal research issues at the forefront of foreign language education; systems available to foreign language professionals for disseminating research. Same as SLA:6500.

EDTL:6483 Multilingual Education and Applied Linguistics**3 s.h.**

Introduction to research in language teaching and learning, drawing on theories and research in applied linguistics, sociolinguistics, anthropology, and psychology; students gain understanding of fundamentals in second language acquisition, educational linguistics, applied linguistics, and methods used in teaching and learning second/foreign languages; applications and implications of research considered when reviewing multilingual education policy and practice. Same as ASIA:6483, SLA:6506.

EDTL:6484 Reading in a Second Language**3 s.h.**

Current theory, research, practice in second language reading field; role of textual features and the reader in reading comprehension. Same as SLA:6501.

EDTL:6497 Principles of Course Design for Second Language Instruction**3 s.h.**

Contemporary views of second language curriculum design; guidelines necessary for the creation of prototypical curriculum units to be transposed into classroom-ready forms; for individuals interested in foreign language materials development. Same as SLA:6502.

EDTL:6531 Technology in School Mathematics**2-3 s.h.**

Methods, materials, issues, pedagogy, assessment; use, evaluation of technology for mathematics teaching and learning; implications for organization, development of course content.

EDTL:6534 Foundations of Mathematics Education**2-3 s.h.**

History of U.S. mathematics education; learning theory applied to teaching, learning mathematics; curriculum design; curriculum/standards and achievement patterns in the United States and other countries; equity; research literature.

EDTL:6536 Teaching of Geometry**2-3 s.h.**

Current developments in teaching middle school/junior high and high school geometry; selection, organization of content; research on teaching and learning.

EDTL:6539 Teaching of Algebra**2-3 s.h.**

Current developments in curriculum and instructional methods in secondary school algebra; classroom use of the history of algebra, use of technologies, implications of current research for the algebra classroom.

EDTL:6563 STEM Through Mathematical Modeling**3 s.h.**

Prepares potential STEM teachers or in-service teachers who want to develop integrated STEM learning environments to learn mathematical modeling as an interdisciplinary instructional approach; mathematical modeling practice to learn and teach mathematics, science, engineering, and technology focused on students' understanding of new concepts from an individual knowledge basis; engagement in problem-based learning where individuals develop conjectures, critique arguments, and revise ideas to reach conclusions; students will understand how people learn new concepts and how teachers should provide adequate learning environments for students to learn and understand the core concepts of STEM.

EDTL:6570 Foundation of School Mathematics Curriculum**3 s.h.**

Elementary and secondary background developments in school and mathematics curriculum; definitions, historical perspective, reform, theories of knowledge, implementation, evaluation, international perspectives, issues in mathematics curriculum.

EDTL:6600 Individual Projects in Music Education**1-2 s.h.**

Projects of special concern to individual music teachers in public schools.

EDTL:6757 Learning in the Science Classroom**2-3 s.h.**

Assumptions about learning and about learning theories and their impact on pedagogical actions; how some concepts are planned and implemented.

EDTL:6758 Writing in the Science Classroom**3 s.h.**

Literacy in the science classroom; theoretical and pedagogical perspectives; practical classroom activities that lead to effective writing and increased learning.

EDTL:6759 Advanced Pedagogy**3 s.h.**

Theoretical and practical perspectives on pedagogy; how to assess practice, provide feedback, and build learning pathways for teachers.

EDTL:6761 STEM Research and Leadership Seminar**3 s.h.**

Broad overview of research supporting new and innovative teaching practices in STEM disciplines and integrated STEM learning; focus on relevant journals related to STEM learning and teaching; students will summarize, critique, and discuss a variety of research perspectives and articles and describe how the information relates to their current teaching; students explore ways to improve their STEM pedagogical and instructional practices and methods for assessing critical student outcomes; students develop awareness of research that provides a foundation for effective STEM teaching and learning and strategies for implementing research supported practices in STEM learning contexts of all types.

EDTL:6762 STEM Experiential Learning**3 s.h.**

Overview of research supporting new and innovative teaching practices in STEM disciplines and integrated STEM learning; focus on problem-based and experiential learning curriculum, instruction, and assessment by engaging in authentic experiences and reflecting on how these influence practice and student learning; facilitates ability to solve real world STEM problems of interest to students and community through engagement with community partners; assists students to acquire and demonstrate 21st-century competencies the STEM workplace identifies as critical; provides authentic, meaningful, and cross-curricular experience in facilitating student engagement in real-world situations.

EDTL:6764 STEM Extracurricular Experience and Capstone**6 s.h.**

Engages teachers in STEM experience outside the traditional classroom; provides 90-hour STEM inclusive experience coupled with a capstone project; engagement with STEM community leaders, business partners, or outreach leaders to develop a plan for participation in and investigation of a STEM related experience; may work with a STEM extracurricular activity in a school or university, a STEM related business or industry partner, or a STEM related grant funded project through a university; course completion is accomplished through a capstone sharing of their experience, how the experience has solidified their understanding of STEM, and how the experience will impact their classroom activities.

EDTL:6765 STEM Independent Research 3 s.h.

Opportunity to develop an independent research project and explore a STEM education question of personal interest; students design and carry out research in an authentic STEM learning environment, collect and analyze data, develop claims and conclusions based on their research, present findings, and develop a plan for utilizing findings to improve STEM education learning environments. Prerequisites: EDTL:6761.

EDTL:6766 Physical Science Topics in STEM Education 3 s.h.

Increase knowledge of physical science content in a form that is relevant to education standards, such as Next Generation Science Standards (NGSS), and connected to engaging and contemporary issues in physical science; weekly expectations differentiated to provide opportunities for deepening knowledge of science; students gain insight into teaching science and work together to think critically on the conceptual basis of subject matter appropriate for learners in their context; for educators at all levels (e.g., elementary, secondary, informal settings).

EDTL:6767 Systems Thinking in Biology and Integrated STEM Education 3 s.h.

Preparation for potential STEM or in-service teachers who want to design integrated STEM learning environments and cultivate students' systems thinking skills; emphasis on computational modeling environments in biology education; how to craft problems based on principles derived from primary literature on systems thinking and STEM educational research; no programming experience required or expected. Recommendations: general background in biology, chemistry, and physics.

EDTL:6833 History and Foundations of Social Studies Education 3 s.h.

Historical, philosophical, social foundations of social studies education; recent debates over content and instructional processes; student research proposals.

EDTL:6840 Theories and Perspectives in Global Education 3 s.h.

Examination of theories and perspectives within global education that help to understand historical and contemporary social, political, economic, and cultural issues; relationship to international studies, international education, global cultures, human rights, social justice, and other areas; interaction with global educators who conduct research and/or teach in institutes of higher education around the world.

EDTL:6841 Attaining a Global Perspective 2-3 s.h.

Rationales, conceptualizations, and themes in global perspectives in education, implications for curriculum change; elements of perspective consciousness, cultural universals, cultural diversity, cross-cultural awareness, global systems, global history, global issues; application and evaluation of ideas within fields of study and varied teaching situations.

EDTL:6906 Practicum with Exceptional Persons arr.

Practicum experience with students with disabilities; experiences differ depending upon student's program of study.

EDTL:6909 Seminar: Graduate Supervised Teaching 1 s.h.

For students enrolled in graduate student teaching practicum. Requirements: special education major.

EDTL:6936 Administration of Students with Special Needs 3 s.h.

Foundation for and skill practice in tasks performed by directors of special education and others administering to needs of special education students, and economically and socially deprived students; for prospective school administrative personnel. Same as EPLS:6236.

EDTL:6950 Strategist I Student Teaching: Elementary arr.

Student teaching in an elementary mild and moderate special education program.

EDTL:6951 Strategist I Student Teaching: Secondary arr.

Student teaching in a secondary mild and moderate special education program.

EDTL:6953 Strategist II Student Teaching: Elementary arr.

Student teaching in K-8 learning disabilities or behavior disorders.

EDTL:6954 Strategist II Student Teaching: Secondary arr.

Student teaching in secondary learning disabilities or behavior disorders.

EDTL:6955 Social and Behavioral Interventions 3 s.h.

Design, implementation, and evaluation of function-based interventions for students with significant behavioral challenges; functional behavior assessment, multi-component intervention design, and single-subject methodology to test effects of intervention in a K-12 school.

EDTL:7004 Schooling in the United States 3 s.h.

Governance, finance, and policy structures that have influenced teaching and learning in public schools.

EDTL:7008 Seminar: Research and Current Issues arr.

Review of literature, critical analysis of reported research, and study of current issues and problems for a specific curricular area; topics vary.

EDTL:7015 Ph.D. Seminar in Language, Literacy, and Culture arr.

Historical, recent research and theory in literacy education; topics vary.

EDTL:7033 Seminar on Teacher Education 3 s.h.

History, structure, and politics of teacher education; current practice and agendas for reform; new developments in teacher assessment.

EDTL:7040 Advanced Topics in Teaching and Learning arr.

Topics vary.

EDTL:7070 Qualitative Research Methods in Teaching and Learning 3 s.h.

Conceptual and practical exploration of qualitative research design methods, including data collection, analysis, and reporting; understanding proposal writing.

EDTL:7071 Critical Discourse Analysis in Educational Research 3 s.h.

Critical discourse analysis (CDA) as theory and method; social and power relations, identities, and knowledge through written, visual, and spoken texts in social settings, such as schools, families, communities; theoretical and methodological traditions of CDA in educational research; critical approaches to analyzing spoken, written, and visual texts. Prerequisites: EDTL:7070 or EPLS:7373 or PSQF:7331 or RCE:7338.

EDTL:7072 Advanced Methods of Literacy Research: Qualitative Data Analysis and Reporting 3 s.h.

Advanced course in traditional and contemporary qualitative data analysis methods and varied forms of reporting to understand, critique, and conduct research about literacy learning and teaching. Prerequisites: EDTL:7070 or EPLS:7373 or PSQF:7331 or RCE:7338.

EDTL:7073 Ethnographic Methods, Theories, and Texts 3 s.h.

Practical and theoretical background for conducting ethnographic field studies in literacy, schooling, language, or a field of student's choice; methods, methodologies, and perspectives from anthropology, sociology, folklore, journalism, literary criticism, cultural, critical, and composition theory; read historical and contemporary ethnography, consider ethnographic forms of expression (films, graphics, fiction, poems); roles, responsibilities, and ethics of writer, reader, viewer, and informant; tools, methods, and writer's techniques to develop an ethnographic portfolio. Prerequisites: EDTL:7070 or EPLS:7373 or PSQF:7331 or RCE:7338.

EDTL:7092 Field Service Project arr.
Individual field service project in a specific curricular area; for advanced students.

EDTL:7093 Research Project arr.
Individual research projects in a specific curricular area; for advanced students.

EDTL:7165 Reading Clinic: Supervision arr.
Supervised experience in guiding and improving teacher performance in clinical practicums.

EDTL:7380 Practicum in College Teaching arr.
Supervised college teaching experience in courses related to major academic areas; collaboration with faculty course instructors.

EDTL:7385 Teaching and Learning in Higher Education 3 s.h.
Current theoretical and empirical literature on teaching and learning in higher education; focus on development of effective teaching practice. Same as EPLS:7385, GRAD:7385, PSQF:7385, RCE:7385.

EDTL:7405 Research Methods in Second Language Teaching and Learning 3 s.h.
Overview of common research methods used to study second language (L2) teaching and learning and related fields; variety of readings from current L2 publications, presentations, video testimonials by active L2 researchers, discussions of readings, and activities designed to process and apply concepts; field research methods; designing a rigorous research study on topic of student's choice; speaking and writing with confidence about research methods used in other studies.

EDTL:7406 Proposal Writing for Second Language Research 3 s.h.
Procedures and techniques for writing research proposals at the doctoral level; written research proposal dealing with a question in second language teaching and learning.

EDTL:7410 Mixed Methods Research 3 s.h.

Introduction to mixed methods research in education; knowledge and skills necessary to conduct mixed methods study; history and language of mixed methods research; identification and processing arguments for and against mixed methods research; extend understanding of research in education; how to assess strengths and weaknesses of published mixed methods studies; investigation of one or more mixed methods research designs in depth; application of mixed methods research design to a research proposal. Prerequisites: EALL:5150. Requirements: formal introduction to quantitative and qualitative research methods, and familiarity with basic steps of research process. Recommendations: direct experience conducting research studies not required. Same as EPLS:7392.

EDTL:7493 Ph.D. Thesis arr.

EDTL:7535 Seminar: Research in Mathematics Education arr.
Analysis of current research, research methodology, curriculum developments in mathematics education; topics vary.

EDTL:7600 Seminar: Current Topics in Music Education 1-3 s.h.
Major areas of professional and research interest.

EDTL:7640 Advanced Research in Music Education 3 s.h.
Design, performance, analysis, and reporting of music research.

EDTL:7707 Research: Science Education arr.
Planning of individual research projects by M.S. and Ph.D. students.

EDTL:7750 Seminar: Science Education 0-2 s.h.
Discussion of completed faculty and doctoral candidates' research, national issues, program features.

EDTL:7751 Advanced Qualitative Data Analysis 3 s.h.
Varied approaches to qualitative data analysis and philosophical foundations; analysis and interpretation of qualitative data; writing qualitative research findings. Prerequisites: EDTL:7070 or EPLS:7373 or PSQF:7331 or RCE:7338.

EDTL:7755 Independent Study in Science Education Research 2-3 s.h.

EDTL:7756 Research Apprenticeship in Science Education 3 s.h.
Practical experiences in science education research in a collaborative, team-oriented environment; apprenticeship model of instruction in which students' participation in authentic tasks and their learning are mutually constitutive; engagement in actual research practices to produce an empirically based product; development of expertise with some aspect of research methodology determined by instructor; for graduate students with interests in research or development based in K-16 contexts.

EDTL:7774 Qualitative Research with Computer-Aided Qualitative Data Analysis Software 3 s.h.
Qualitative data analysis using computer-aided qualitative data analysis software (CAQDAS); emphasis on methodological approaches to data analysis, and practical and experiential aspects of using CAQDAS to conduct these stages of analysis; opportunity to work with ATLAS.ti, NVivo, Dedoose, and the Coding Analysis Toolkit (CAT); capstone product is a research report based upon qualitative analysis; students strongly encouraged to analyze data from their own research.

EDTL:7932 Field Service Project in Special Education Internship **arr.**

Part-time or full-time experience as an intern in school districts or area education agencies; develops skills in supervision and administration of special education.

EDTL:7943 Proseminar: Issues, Trends, and Research in Special Education **2-3 s.h.**

Conceptual and practical development of research across special education and related disciplines; empirical review of the literature; focus on professional writing skills.

EDTL:7944 Proseminar: Issues, Trends, and Research in Special Education II **2-3 s.h.**

Recent research from a variety of special education areas reviewed by students; simulated comprehensive examinations. Prerequisites: EDTL:7943.

EDTL:7945 Current Issues and Trends in Learning Disabilities **3 s.h.**

Readings and discussions of current issues and trends in learning disabilities (e.g., definition, prevalence, interventions, subtyping, assessment).

EDTL:7948 Contemporary Research in Behavioral Disorders **3 s.h.**

In-depth analysis of current research in behavioral disorders; emphasis on evaluating its methodology and contribution to the field.

EDTL:7952 Seminar: Behavioral Assessment and Evaluation **3 s.h.**

Broadens skills of graduate students who engage in research with exceptional persons; research designs are usually taught in the Department of Psychological and Quantitative Foundations, but because of the nature of handicapping conditions and the low incidence of some handicaps, the single-subject design yields better research information. Same as PSQF:7352.

EDTL:7953 Seminar: Single Subject Design Research **3 s.h.**

Reviews of single subject research, development of student proposals; focus on special education, applied research.

Science Education Courses**SIED:3001 Introduction to Museum Studies** **3 s.h.**

Overview of museum history, function, philosophy, collection, and curatorial practices; governance and funding issues; exhibition evaluation and audience studies; examples from Stanley Museum of Art, Museum of Natural History, Old Capitol Museum, and Medical Museum. GE: Social Sciences. Same as ANTH:3001, EDTL:3001, MUSM:3001.

SIED:4102 Societal and Educational Applications of Earth Science and Environmental **arr.**

Major ideas and principles of earth and environmental sciences; emphasis on common applications in today's world.

SIED:4103 Societal and Educational Applications of Biological Sciences **arr.**

Basic conceptual themes of biology, how they have been derived; emphasis on a current social issue related to biology.

SIED:4105 Societal and Educational Applications of Physical Sciences **arr.**

Major ideas of physics and how they have been derived; emphasis on how such ideas affect modern society.

SIED:4106 Societal and Educational Applications of Chemical Concepts **arr.**

Principles of chemistry as applied in industry, communication, daily living.

SIED:4110 Exploring the Geology, Mining History, and Environmental Issues of the Colorado Rockies **4 s.h.**

Basic concepts of physical geology, historical, and environmental geology of the Rocky Mountains in context of mineral exploration, mining, and environment; collection of a teaching suite of basic igneous, sedimentary, and metamorphic rocks and rock forming minerals; scientific/educational photography, field inquiry, and curriculum development projects; students spend 10 days probing the mountains of Colorado for clues to its geologic past including mountains, seas, and volcanic activity; knowledge is tested in the field along with connecting the geology of Colorado with future teaching employment locations.

SIED:4115 Directed Study **arr.****SIED:4135 The Nature of Science** **3-4 s.h.**

Ideas on understanding and ways of thinking that are essential in a world shaped by science, technology, engineering, and mathematics; focus on increasing science literacy by examining the nature of science; comparison of characteristics specific to individual science disciplines; identification of great episodes and debates in history of science and habits that are essential for science literacy; scope and sequence of content and process skills for K-12 curriculum, instruction, and assessment.

Art Education, B.A.

Requirements

The Bachelor of Arts with a major in art education requires a minimum of 120 s.h., including a minimum of 48 s.h. in art professional education courses and a minimum of 33 s.h. in art education content courses. Students must maintain a g.p.a. of at least 2.70 in professional education course requirements. They also must complete the GE CLAS Core [p. 20]. The major requires admission to the Teacher Education Program (TEP). Application information can be obtained through the Office of Student Services.

Students must earn a B.A. in art [p. 112] or a B.F.A. in art [p. 112] in the School of Art and Art History at the University of Iowa in order to earn the B.A. in art education; both degrees may be earned at the same time. Separate application to each degree program is required. Graduates who have earned one of these degrees at another institution and wish to earn the B.A. in art education should consult the Department of Teaching and Learning; additional coursework may be required.

The art major provides a foundation in art history as well as an understanding of the formal traditions and contemporary practices in studio art. Students take courses in the school's studio art programs, including animation, ceramics, graphic design, three-dimensional (3-D) design, drawing, intermedia, jewelry and metal arts, painting, photography, printmaking, and sculpture. Students also complete coursework in teacher licensure including student teaching.

An Iowa secondary teaching license qualifies holders to teach in grades 5-12. Additional subject area endorsements can be completed in any 5-12 licensure program. Students who plan to teach art typically complete a program that prepares them for both elementary- and secondary-level licensure. For more information and an advisor, contact the Department of Teaching and Learning.

For initial licensure, student teaching must be an all-day, full-semester experience. Most students are placed in a district within a 60-mile radius of Iowa City. Placements outside this area require special approval and are considered on an individual basis. Special site programs provide experience in districts with diverse populations and students also may apply to student teach at international sites for the second half of the semester.

Additional information about options for student teaching and application procedures is available from the Office of Student Services. Applications for student teaching must be submitted during the calendar year before the student teaching semester. The deadline for student planning to student teach the following fall semester is November 15 and April 15 for the following spring semester.

The B.A. with a major in art education requires the following work.

Professional Education Course Requirements

Students complete 48 s.h. from the following.

Foundation Courses

Foundation courses may be completed before or after admission to the major.

Code	Title	Hours
All of these:		
EDTL:4900	Foundations of Special Education	3
EPLS:3000	Foundations of Education	3
PSQF:1075	Educational Psychology and Measurement	3

Additional Licensure Courses

Code	Title	Hours
All of these:		
EDTL:2122	Creativity, Imagination, Play, and Human Development through the Arts	3
EDTL:3002	Technology in the Classroom	2
EDTL:3091	Secondary Education Program Orientation and Classroom Management	3
EDTL:3095	Teaching Reading in Secondary Content Areas	1
EDTL:3143	Methods of Elementary Art and Field Experiences	3
EDTL:3204	Art Education Studio and Field Components	3
EDTL:3205	Methods of Secondary Art and Field Experience	3
EDTL:3290	Introduction and Practicum: Art	3
EPLS:4180	Human Relations for the Classroom Teacher	3

Student Teaching

Transfer students should consult their adviser since they must complete certain courses before they student teach.

Code	Title	Hours
All of these:		
EDTL:4087	Seminar: Curriculum and Student Teaching	3
EDTL:4091	Observation and Laboratory Practice in the Secondary School	6
EDTL:4192	Special Area Student Teaching	6

Mathematics Course

Students must complete a college-level math course. Most students complete this course as a part of their GE CLAS Core [p. 20] requirement in Quantitative or Formal Reasoning. For questions about how the math course can be applied to the licensure requirement, see Academic Advising on the College of Education website.

Code	Title	Hours
One of these:		
CS:1110	Introduction to Computer Science	3
CS:1210	Computer Science I: Fundamentals	4

STAT:1010	Statistics and Society	3
STAT:1020/ PSQF:1020	Elementary Statistics and Inference	3
STAT:1030	Statistics for Business	4
Any mathematics course (prefix MATH), except MATH:0100 or MATH:1005		

Art Education Content Courses

Students complete at least 33 s.h. from the following.

Art History

Code	Title	Hours
Two of these:		
ARTH:1040	Arts of Africa	3
ARTH:1050	From Cave Paintings to Cathedrals: Survey of Western Art I	3
ARTH:1060	From Mona Lisa to Modernism: Survey of Western Art II	3
ARTH:1070	Asian Art and Culture	3
ARTH:1095	Native American Art	3
And:		
Two additional art history courses, excluding ARTH:1080, ARTH:4999, and the art history courses above		6

Studio Art

Code	Title	Hours
Both of these:		
ARTS:1510	Basic Drawing	3
ARTS:1520	Design Fundamentals	3

Two-Dimensional Art

Code	Title	Hours
Two of these:		
ANIM:3125	Animation I	4
DRAW:2310	Life Drawing I	3
DSGN:2500	Graphic Design I	3
PHTO:2600	Photography I	3
PNTG:2410	Painting I	3
PRNT:2610	Introduction to Printmaking	3

Three-Dimensional Art

Code	Title	Hours
Both of these:		
CERM:2010	Ceramics I: Handbuilding	3
CERM:2020	Ceramics II: Wheel Throwing	3
One of these:		
INTM:2710	Introduction to Intermedia	3
MTLS:2910	Introduction to Jewelry and Metal Arts	3
SCLP:2810	Undergraduate Sculpture I	3
TDSN:2210	Problems in 3-D Design	3

Electives

Students complete their major requirements with additional art or art history courses.

Elementary Education, B.A.

Requirements

The Bachelor of Arts with a major in elementary education requires a minimum of 120 s.h., including at least 81 s.h. for the major. Students must complete all requirements for the elementary education major and the Teacher Education Program (TEP), including student teaching. Students who are pursuing the combined B.A. with the special education subprogram and the M.A. in teaching and learning with the special education subprogram must complete the requirements of the elementary education major plus the coursework required to complete the M.A. degree. All B.A. students must complete the GE CLAS Core [p. 20].

As a requirement for completion of an approved TEP for initial teaching licensure, the state of Iowa requires a passing score on edTPA, a performance-based assessment. Passing the edTPA is required before recommendation for licensure or certification to any state.

Elementary Education Requirements

The B.A. with a major in elementary education requires the following work.

Foundation Courses

Students may complete the foundation courses before being admitted to the major in elementary education, but the courses are not prerequisite to admission to the major.

Code	Title	Hours
All of these:		
EDTL:2122	Creativity, Imagination, Play, and Human Development through the Arts	3
EDTL:4900	Foundations of Special Education	3
EPLS:3000	Foundations of Education	3
PSQF:1075	Educational Psychology and Measurement	3

Courses for the Major

Code	Title	Hours
All of these:		
EDTL:3002	Technology in the Classroom	2
EDTL:3103	Assessment for Instructional Planning and Practice	3
EDTL:3120	Methods and Materials: Music for the Classroom Teacher	2
EDTL:3123	Reading and Responding to Children's Literature	3
EDTL:3127	Methods and Materials: Physical Education, Health, and Wellness	2
EDTL:3160	Reading and Language Arts Methods for Primary Students in Grades K-3	3

EDTL:3161	Social Studies for the Elementary Classroom Teacher	3
EDTL:3163	Methods: Elementary School Mathematics	3
EDTL:3164	Reading and Language Arts Methods for Intermediate Students in Grades 3-6	3
EDTL:3165	Elementary Science Methods I	3
EDTL:3166	Elementary Science Methods II	3
EDTL:3170	Elementary Classroom Management	2
EDTL:3172	Elementary Reading Practicum	4
EDTL:3174	Elementary Math Practicum	1
EDTL:3190	Orientation to Elementary Education	2
EDTL:4171	Diversity and Exceptionalities in Literacy Instruction	3
EPLS:4180	Human Relations for the Classroom Teacher	3
STAT:1010	Statistics and Society	3
One of these:		
EDTL:3141	Elementary School Mathematics: Number and Operations	3
MATH:1120	Logic of Arithmetic	4
One of these:		
EDTL:3142	Elementary School Mathematics: Geometry and Measurement	3
MATH:1140	Mathematical Basis of Elementary Geometry	3

Student Teaching

Students seeking initial licensure must complete the following.

Code	Title	Hours
EDTL:4187	Effective Teaching Strategies for the Elementary Teacher: Student Teaching Seminar	3
EDTL:4190	Supervised Teaching in the Elementary School: Interactive Phase	6
EDTL:4191	Supervised Teaching in the Elementary School: Pre- and Post-Active Phase	6

Endorsements

Students have the option of completing an endorsement in one of the following areas: art, English, English as a Second Language (ESL), mathematics, middle school, music, reading, science, social studies, and special education (Instructional Strategist I: Mild/Moderate). Courses in the endorsement area may be taken pass/nonpass if they are offered with the pass/nonpass option. Requirement lists for each endorsement area are available from the Department of Teaching and Learning.

The University of Iowa also offers an added endorsement in talented and gifted education.

Transfer Students

Before they student teach, transfer students must complete the following courses at the University of Iowa.

Code	Title	Hours
All of these:		
EDTL:3002	Technology in the Classroom	2
EDTL:3190	Orientation to Elementary Education	1-2
A practicum		
Two of these:		
EDTL:3123	Reading and Responding to Children's Literature	3
EDTL:3160	Reading and Language Arts Methods for Primary Students in Grades K-3	3
EDTL:3161	Social Studies for the Elementary Classroom Teacher	3
EDTL:3163	Methods: Elementary School Mathematics	3
EDTL:3164	Reading and Language Arts Methods for Intermediate Students in Grades 3-6	3

Transfer students must follow the normal application procedures. In addition, they are asked to complete a disclosure statement describing all practicum experiences they have taken at other institutions and a release statement allowing the College of Education Office of Student Services to contact all institutions where they have done professional preparatory work.

TEP: Secondary Education

The College of Education offers the Teacher Education Program (TEP) in secondary education for undergraduate students in the College of Liberal Arts and Sciences. Students must complete all requirements for graduation from the College of Liberal Arts and Sciences, including the GE CLAS Core [p. 20] and the requirements for their majors (see College of Liberal Arts and Sciences [p. 17] in the Catalog). They also must complete all requirements of the College of Education's TEP.

Licensure/certification requires a major of at least 30 s.h. of coursework in one of the secondary school subject areas listed below. Licensure/certification course requirements for each major are available from the Department of Teaching and Learning. Candidates for secondary school teaching licensure/certification also may receive approval to teach in additional subject areas by completing an approved program of 12-24 s.h. or more of coursework in those areas.

As a requirement for completion of an approved TEP for initial teaching licensure, the state of Iowa requires a passing score on edTPA, a performance-based assessment. Passing the edTPA is required before recommendation for licensure or certification to any state.

The College of Education offers secondary school teacher preparation programs in the following areas.

Art

*Coaching

English

*English as a second language

Mathematics

*Middle school

Music

*Reading

Science, including biology, chemistry, physics, earth science, and 9-12 all science

Social science, including anthropology, economics, geography, history, political science, psychology, and sociology

*All social sciences

*Talented and gifted

World languages—Chinese, French, German, Italian, Japanese, Latin, Spanish

*Available as an additional approval area only; a major in one of the other areas is required for licensure.

An Iowa secondary teaching license qualifies holders to teach in grades 5-12. Students planning to teach art or music typically complete a program that prepares them for both elementary- and secondary-level licensure.

Secondary teacher preparation programs in foreign language also offer a program that leads to licensure/certification as a subject matter specialist in grades K-8. This K-8 licensure/certification is available only in the same subject area as the secondary certification.

For more information and the name of an advisor, contact the Department of Teaching and Learning.

Requirements

Undergraduates working toward licensure/certification to teach in secondary schools must complete the following requirements in addition to the requirements of their major. All coursework must be completed before student teaching.

Code	Title	Hours
EDTL:3002	Technology in the Classroom (must be taken during student's first semester in the college)	2
EDTL:3091	Secondary Education Program Orientation and Classroom Management	3
EDTL:3095	Teaching Reading in Secondary Content Areas (must be taken during student's first semester in the college)	1
EDTL:4900	Foundations of Special Education	3
EPLS:3000	Foundations of Education	3
EPLS:4180	Human Relations for the Classroom Teacher	3
PSQF:1075	Educational Psychology and Measurement	3
One or more introduction and practicum courses in the major field		2-3
One or more methods of teaching courses in the major field		3-6
One college-level mathematics course, except MATH:0100 or MATH:1005		
Student teaching		15

For initial licensure in all subject areas, student teaching must be an all-day, full-semester experience. Most students are placed in a district within a 70-mile radius of Iowa City. Placements outside this area require special approval and are considered on an individual basis. Special programs provide experience in districts with diverse populations, including

Aldine, Texas (Houston area) and Rialto, California. In most program areas, students also may apply to student teach at international sites for the second half of the semester.

Additional information about options for student teaching and application procedures is available from the Office of Student Services. Applications for student teaching must be submitted during the calendar year before the student teaching semester. The deadline is November 15 for students planning to student teach the following fall semester and February 15 for students planning to student teach the following spring semester.

Transfer Students

Transfer students must complete the following work before they student teach.

Code	Title	Hours
EDTL:3002	Technology in the Classroom	2-3
EDTL:3091	Secondary Education Program Orientation and Classroom Management	3
EDTL:3095	Teaching Reading in Secondary Content Areas	1

Appropriate methods courses

A practicum at the University of Iowa

All coursework in the major

Transfer students must follow the normal application procedures. In addition, they are asked to complete a disclosure statement describing all practicum experiences they have taken at other institutions and a release statement allowing the College of Education's Office of Student Services to contact all institutions where they have done professional preparatory work.

Elementary Education with Special Education Subprogram Requirements

Effective spring 2021, elementary education students may pursue the B.A. in elementary education with a special education subprogram if they have been admitted to the M.A. in teaching and learning with a special education subprogram (K-8 instructional strategist I: mild/moderate with no thesis) and complete the M.A. degree.

It is appropriate for students who are currently enrolled in the Teacher Education Program (TEP) as undergraduates working toward a major in elementary education. Students who desire to pursue a M.A. degree, who are motivated to broaden their experience, and are inspired to serve students with disabilities are well suited for pursuing this combined program.

Students may complete both degrees in five years. In their last semester of undergraduate coursework, students enroll in two M.A.-level courses in special education (EDTL:4950 Behavioral and Social Interventions and EDTL:4984 Academic Skills for Students with Special Needs) that count toward both degrees. Once they complete all B.A. requirements, students complete the remaining M.A. special education courses. They are then eligible for their student teaching field experience. Students compete two placements—one in general education elementary education and one in K-8 special education—thus making them eligible for teaching licensure in both elementary education and special education. To obtain licensure they only need to complete and pass

edTPA, a performance-based assessment in elementary education.

The B.A. in elementary education with a special education subprogram and the M.A. in teaching and learning with a special education subprogram (K-8 instructional strategist I: mild/moderate with no thesis) requires the following work.

Foundation Courses

Code	Title	Hours
All of these:		
EDTL:2122	Creativity, Imagination, Play, and Human Development through the Arts	3
EDTL:4900	Foundations of Special Education	3
EPLS:3000	Foundations of Education	3
PSQF:1075	Educational Psychology and Measurement	3

Courses for the Major

Code	Title	Hours
All of these:		
EDTL:3002	Technology in the Classroom	2
EDTL:3103	Assessment for Instructional Planning and Practice	3
EDTL:3120	Methods and Materials: Music for the Classroom Teacher	2
EDTL:3123	Reading and Responding to Children's Literature	3
EDTL:3127	Methods and Materials: Physical Education, Health, and Wellness	2
EDTL:3160	Reading and Language Arts Methods for Primary Students in Grades K-3	3
EDTL:3161	Social Studies for the Elementary Classroom Teacher	3
EDTL:3163	Methods: Elementary School Mathematics	3
EDTL:3164	Reading and Language Arts Methods for Intermediate Students in Grades 3-6	3

Student Teaching

Students seeking initial licensure must complete the following.

Code	Title	Hours
------	-------	-------

All of these:

EDTL:4187	Effective Teaching Strategies for the Elementary Teacher: Student Teaching Seminar	3
-----------	--	---

EDTL:4190	Supervised Teaching in the Elementary School: Interactive Phase	6
-----------	---	---

EDTL:4922	Supervised Teaching: Elementary Strategist I	6
-----------	--	---

Combined Programs

B.A. (Special Education Subprogram)/M.A. in Teaching and Learning (Special Education Subprogram)

Effective spring 2021, the combined B.A. in elementary education with a special education subprogram and the M.A. in teaching and learning with a special education subprogram (K-8 instructional strategist I: mild/moderate; nonthesis) program is available for students. Students are able to earn both degrees in less time than it would take to complete both degrees separately.

Students pay undergraduate tuition and fees during the combined undergraduate/graduate semester which is generally in the spring semester of their fourth year. In the following semester when they begin coursework for the M.A., they pay graduate tuition and fees. For more information on the combined program, see "Elementary Education with Special Education Subprogram Requirements" under Requirements [p. 1369] in this section of the Catalog.

Admission

Applicants must:

- be a University of Iowa undergraduate student enrolled in the B.A. in elementary education TEP program,
- have completed at least 74 s.h.,
- have a g.p.a. of at least 3.25 (the admissions committee considers other aspects of an application when the undergraduate g.p.a. is below 3.25), and
- submit a writing sample.

Applicants have the option to submit a Graduate Record Examination (GRE) General Test score. A score above 300 may bolster an application with an undergraduate g.p.a. below 3.25; however, the GRE requirement has been suspended for the 2020-21 admissions cycle.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

- a The Academic Advising Center advises Elementary Education Interest students. Students are advised for success, based on academic strengths, and not necessarily for a four-year plan. Students may apply for Elementary Education admission after 30 s.h. are earned.
- b The following foundation courses may be completed prior to admission to the Elementary Education program, but are not prerequisites for admission: PSQF:1075, EDTL:2122, EDTL:4900, EPLS:3000.
- c GE courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
- d Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
- e Complete the College of Education verification of 10 hour field experience form available on the Office of Educational Services web page.
- f Fulfills a major requirement and a GE Core Course.
- g Please see your advisor and the College of Education website for detailed application instructions and deadlines.
- h Fulfills a major requirement and may fulfill a GE requirement.
- i All coursework must be completed prior to student teaching.
- j Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>
- k As a requirement for completion of an approved Teacher Education Program for initial teaching licensure, the state of Iowa requires a passing score on this exam. The test is required before recommendation for licensure or certification to any state.

Career Advancement

The B.A. program prepares students to teach kindergarten through grade 6. In Iowa, the elementary specialization areas are designated as kindergarten through grade 8.

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

English Education, B.A.

Requirements

The Bachelor of Arts with a major in English education requires a minimum of 120 s.h., including a minimum of 41 s.h. in English professional education courses and a minimum of 27 s.h. in English education content courses. Students must maintain a g.p.a. of at least 2.70 in professional education course requirements. They also must complete the GE CLAS Core [p. 20]. The major requires admission to the Teacher Education Program (TEP). Application information can be obtained through the Office of Student Services.

Students must earn a B.A. in English [p. 405] or a B.A. in English and creative writing [p. 415] at the University of Iowa in order to earn the B.A. in English education; both degrees may be earned at the same time. Separate application to each degree program is required. Graduates who have earned one of these degrees at another institution and wish to earn the B.A. in English education should consult the Department of Teaching and Learning; additional coursework may be required.

The Department of English offers courses in literature, cultural studies, language, and critical and creative writing. In these courses, students read poetry, fiction, essays, criticism, and theory to acquire methods for understanding literature and culture and respond creatively to the texts. In addition to providing these essential elements of a liberal arts and sciences education, the department's courses can augment students' specialized interests in other fields. Students also complete coursework in teacher licensure including student teaching.

An Iowa secondary teaching license qualifies holders to teach in grades 5-12. Additional subject area endorsements can be completed in any 5-12 licensure program. For more information and an advisor, contact the Department of Teaching and Learning.

For initial licensure, student teaching must be an all-day, full-semester experience. Most students are placed in a district within a 60-mile radius of Iowa City. Placements outside this area require special approval and are considered on an individual basis. Special site programs provide experience in districts with diverse populations and students also may apply to student teach at international sites for the second half of the semester.

Additional information about options for student teaching and application procedures is available from the Office of Student Services. Applications for student teaching must be submitted during the calendar year before the student teaching semester. The deadline for student planning to student teach the following fall semester is November 15 and April 15 for the following spring semester.

The B.A. with a major in English education requires the following work.

Professional Education Course Requirements

Students must complete 41 s.h. from the following.

Foundation Courses

Foundation courses may be completed before or after admission to the major.

Code	Title	Hours
All of these:		
EDTL:4900	Foundations of Special Education	3
EPLS:3000	Foundations of Education	3
PSQF:1075	Educational Psychology and Measurement	3

Additional Licensure Courses

Code	Title	Hours
All of these:		
EDTL:3002	Technology in the Classroom	2
EDTL:3091	Secondary Education Program Orientation and Classroom Management	3
EDTL:4314	Introduction and Practicum: Secondary English	3
EDTL:4315	Learning to Teach Secondary English/Language Arts and Field Experience	3
EDTL:4394	Secondary Reading Instruction	3
EPLS:4180	Human Relations for the Classroom Teacher	3

Student Teaching

Transfer students should consult their adviser since they must complete certain courses before they student teach.

Code	Title	Hours
All of these:		
EDTL:4087	Seminar: Curriculum and Student Teaching	3
EDTL:4091	Observation and Laboratory Practice in the Secondary School	6
EDTL:4092	Observation and Laboratory Practice in the Secondary School	6

Mathematics Course

Students must complete a college-level math course. Most students complete this course as a part of their GE CLAS Core [p. 20] requirement in Quantitative or Formal Reasoning. For questions about how the math course can be applied to the licensure requirement, see Academic Advising on the College of Education website.

Code	Title	Hours
One of these:		
CS:1110	Introduction to Computer Science	3
CS:1210	Computer Science I: Fundamentals	4
STAT:1010	Statistics and Society	3
STAT:1020/ PSQF:1020	Elementary Statistics and Inference	3
STAT:1030	Statistics for Business	4

Any mathematics course (prefix MATH), except MATH:0100 or MATH:1005

English Education Content Courses

Students must complete at least 27 s.h. from the following.

Oral Communication and Language Development

Code	Title	Hours
This course:		
EDTL:3382	Language and Learning	3

Written Communication

Code	Title	Hours
Both of these:

Total Hours	128-135

- These majors include a BA in English or a BA in English and creative writing.
- Choose a math course that will satisfy the Teacher Education Program math requirement.
- GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
- Students who have already completed the GE World Languages requirements before entering college may use the spaces for education courses usually taken in the second year (EPLS:3000 or ENGL:3190 or ENGL:3191). Or, students may take creative writing (prefix CW or CNW, numbered 2000-4000).
- Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
- Students majoring in English are not required to fulfill the GE CLAS Core Interpretation of Literature requirement but instead may substitute a Literary, Visual, and Performing Arts course excluding: DANC:1010 through DANC:2040, DANC:4880, and MUS:1020.
- Students who have already completed the GE World Languages requirement prior to the second year may use the spaces for added endorsements such as English Language Arts - All (5-12).
- Complete the College of Education verification of 10 hour field experience form available on the Office of Educational Services web page.
- Please see the College of Education website for detailed application instructions and deadlines. Admission is selective and a priority deadline exists.
- Fulfills a major requirement and may fulfill a GE requirement.
- Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>
- As a requirement for completion of an approved Teacher Education Program for initial teaching licensure, the state of Iowa requires a passing score on this exam. The test is required before recommendation for licensure or certification to any state.

Mathematics Education, B.A.

Requirements

The Bachelor of Arts with a major in mathematics education requires a minimum of 120 s.h., including 42 s.h. in mathematics professional education courses, and a minimum of 41-42 s.h. in mathematics education content courses for students earning the B.A. in mathematics or a minimum of 47-50 s.h. in mathematics education content courses for students earning the B.S. in mathematics. Students must maintain a g.p.a. of at least 2.70 in professional education course requirements. They also must complete the GE CLAS Core [p. 20]. The major requires admission to the Teacher Education Program (TEP). Application information can be obtained through the Office of Student Services.

Students must earn a B.A. in mathematics [p. 789] (Program B) or a B.S. in mathematics [p. 796] (Program B) at the University of Iowa in order to earn the B.A. in mathematics education; both degrees may be earned at the same time. Separate application to each degree program is required. Graduates who have earned one of these degrees at another institution and wish to earn the B.A. in mathematics education should consult the Department of Teaching and Learning; additional coursework may be required. Students also complete coursework in teacher licensure including student teaching.

An Iowa secondary teaching license qualifies holders to teach in grades 5-12. Additional subject area endorsements can be completed in any 5-12 licensure program. For more information and an advisor, contact the Department of Teaching and Learning.

For initial licensure, student teaching must be an all-day, full-semester experience. Most students are placed in a district within a 60-mile radius of Iowa City. Placements outside this area require special approval and are considered on an individual basis. Special site programs provide experience in districts with diverse populations and students also may apply to student teach at international sites for the second half of the semester.

Additional information about options for student teaching and application procedures is available from the Office of Student Services. Applications for student teaching must be submitted during the calendar year before the student teaching semester. The deadline for student planning to student teach the following fall semester is November 15 and April 15 for the following spring semester.

The B.A. with a major in mathematics education requires the following work.

Professional Education Course Requirements

Students complete 42 s.h. from the following.

Foundation Courses

Foundation courses may be completed before or after admission to the major.

Code	Title	Hours

- a Completion of the Mathematics (Program B) BA major requirements (41-42 s.h.), the Teacher Education Program requirements (39 s.h.), and all general education requirements (including World Languages) (48-52 s.h.) exceeds the minimum 120 s.h. expected for a bachelor's degree in CLAS. Students pursuing this program of study should expect to take higher than average number (15 s.h.) of semester hours per term, take summer classes, and/or extend graduation time frame beyond four years.
- b These majors include a BA in mathematics (program B) or a BS in mathematics (program B) at the University of Iowa.
- c Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
- d Enrollment in math courses requires completion of a placement exam.
- e Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
- f Course required for the Teacher Education Program and may be completed prior to admission to the College of Education.
- g GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
- h Complete the College of Education verification of 10 hour field experience form available on the Office of Educational Services web page.
- i Required for admission into the Teacher Education Program.
- j Please see the College of Education website for detailed application instructions and deadlines. Admission is selective and a priority deadline exists.
- k Course may also be offered in the summer session.
- l Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
- m Course required for the Teacher Education Program and may only be completed after admission to the College of Education.

- n Course must be completed during the first semester of enrollment in the Teacher Education Program.
- o Requirement should be completed after admission to the Teacher Education Program.
- p Students must complete MATH:4050, a fall-only course, or MATH:4060, a spring-only course.
- q Post-calculus courses are numbered 2000 or above, excluding: MATH:3700, MATH:3750, MATH:3995, MATH:3996, MATH:3997, MATH:4010, and MATH:4020.
- r Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>
- s As a requirement for completion of an approved Teacher Education Program for initial teaching licensure, the state of Iowa requires a passing score on this exam. The test is required before recommendation for licensure or certification to any state.

Music Education, B.A.

Requirements

The Bachelor of Arts with major in music education requires a minimum of 120 s.h., including a minimum of 44 s.h. in music professional education courses and 75-81 s.h. in the B.M. in music degree from the College of Liberal Arts and Sciences. Students must maintain a g.p.a. of at least 2.70 in professional education course requirements. They also must complete the GE CLAS Core [p. 20]. The major requires admission to the Teacher Education Program (TEP). Application information can be obtained through the Office of Student Services.

Students must earn a B.M. in music [p. 838] with a performance subprogram of brass/woodwind, organ, percussion, piano, piano with teacher education, string, or voice at the University of Iowa in order to earn the B.A. in music education; both degrees may be earned at the same time. Separate application to each degree program is required. Graduates who have earned this degree at another institution and wish to earn the B.A. in music education should consult the Department of Teaching and Learning; additional coursework may be required.

The B.M. with a major in music is intended for undergraduates who have a strong background in music, and who wish to major in music as part of a broad liberal arts education irrespective of specific career aspirations. The curriculum includes musicianship, performance, and electives. The program is designed for students who have solid abilities and interest in music but are not planning on careers as musicians, or for those who wish to pursue a double major or earn more than one bachelor's degree. Students must audition and be accepted into a performance area. They develop musicianship, performance skills, and select from a wide variety of music electives. Students also complete coursework in teacher licensure including student teaching.

An Iowa secondary teaching license qualifies holders to teach in grades 5-12. Additional subject area endorsements can be completed in any 5-12 licensure program. Students who plan to teach music typically complete a program that prepares them for both elementary- and secondary-level licensure. For more information and an advisor, contact the Department of Teaching and Learning.

For initial licensure, student teaching must be an all-day, full-semester experience. Most students are placed in a district within a 60-mile radius of Iowa City. Placements outside this area require special approval and are considered on an individual basis. Special site programs provide experience in districts with diverse populations and students also may apply to student teach at international sites for the second half of the semester.

Additional information about options for student teaching and application procedures is available from the Office of Student Services. Applications for student teaching must be submitted during the calendar year before the student teaching semester. The deadline for student planning to student teach the following fall semester is November 15 and April 15 for the following spring semester.

The B.A. with a major in music education requires the following work.

Professional Education Course Requirements

Students complete 44 s.h. from the following.

Foundation Courses

Foundation courses may be completed before or after admission to the major.

Code	Title	Hours
All of these:		
EDTL:4900	Foundations of Special Education	3
EPLS:3000	Foundations of Education	3
PSQF:1075	Educational Psychology and Measurement	3

Additional Licensure Courses

Code	Title	Hours
All of these:		
EDTL:3002	Technology in the Classroom	2
EDTL:3091	Secondary Education Program Orientation and Classroom Management	3
EDTL:3095	Teaching Reading in Secondary Content Areas	1
EDTL:3610	Introduction and Practicum: Music	2
EDTL:3620	Methods and Materials: General Music	3
EDTL:3640	Choral Methods	3
EDTL:3650	Instrumental Methods and Materials	3
EPLS:4180	Human Relations for the Classroom Teacher	3

Student Teaching

Transfer students should consult their adviser since they must complete certain courses before they student teach.

Code	Title	Hours
All of these:		
EDTL:4087	Seminar: Curriculum and Student Teaching	3
EDTL:4091	Observation and Laboratory Practice in the Secondary School	6
EDTL:4192	Special Area Student Teaching	6

Mathematics Course

Students must complete a college-level math course. Most students complete this course as a part of their GE CLAS Core [p. 20] requirement in Quantitative or Formal Reasoning. For questions about how the math course can be applied to the licensure requirement, see Academic Advising on the College of Education website.

Code	Title	Hours
One of these:		
CS:1110	Introduction to Computer Science	3

CS:1210	Computer Science I: Fundamentals	4
STAT:1010	Statistics and Society	3
STAT:1020/ PSQF:1020	Elementary Statistics and Inference	3
STAT:1030	Statistics for Business	4
Any mathematics course (prefix MATH), except MATH:0100 or MATH:1005		

Music Education Content Courses

In addition to the requirements below, students complete other music courses that relate to their major field of study.

Wind Instruments, Percussion, Piano with Band Emphasis, Organ with Band Emphasis Majors

Code	Title	Hours
All of these (10 s.h.):		
EDTL:3605	Instrumental Techniques (students select appropriate topic of flute/percussion, brass, or woodwinds)	2
EDTL:3635	Instrumental Conducting	3
MUS:1165	Hawkeye Marching Band	1
MUS:1711	Jazz Rhythms and Interpretation I	1
MUS:3659	Class Strings	1
MUS:3666	Marching Band Techniques	1
MUS:3760	Jazz Band Techniques	1

Voice Majors

Code	Title	Hours
All of these (7 s.h.):		
EDTL:3645	Choral Conducting and Literature	3
MUS:1121	Secondary Performance - Piano	1
MUS:2213	Group Instruction in Piano III	1
MUS:3664	Introduction to Wind and Percussion Instruments	2

String Instrument Majors

Code	Title	Hours
All of these (8 s.h.):		
EDTL:3635	Instrumental Conducting	3
MUS:3664	Introduction to Wind and Percussion Instruments	2
MUS:3659	Class Strings (taken three times for 1 s.h. each)	3

Piano with Choral Emphasis, Organ with Choral Emphasis Majors

Code	Title	Hours
All of these (11 s.h.):		
EDTL:3645	Choral Conducting and Literature	3
MUS:1120	Secondary Performance - Voice (taken twice for 1 s.h. each)	2

MUS:1510	Diction for Singers I	2
MUS:2510	Diction for Singers II	2
MUS:3664	Introduction to Wind and Percussion Instruments	2

Electives

Students consult their advisor and complete their major requirements with additional music courses.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Social Studies Education, B.A.

Requirements

The Bachelor of Arts with major in social studies education requires a minimum of 120 s.h., including a minimum of 39 s.h. in social studies professional education courses, 30-36 s.h. in social studies education content courses, and 15 s.h. in a social studies area outside of their designated major area of study. Students must maintain a g.p.a. of at least 2.70 in professional education course requirements. They must also must complete the GE CLAS Core [p. 20]. The major requires admission to the Teacher Education Program (TEP). Application information can be obtained through the Office of Student Services.

Students must earn one of these majors at the University of Iowa in order to earn the B.A. in social studies education: a B.A. in anthropology [p. 78], a B.S. in anthropology [p. 85], a B.A. in economics [p. 1161], a B.S. in economics [p. 1165], a B.A. in geography [p. 538], a B.S. in geography [p. 546], a B.A. in history [p. 660], a B.A. in political science [p. 917], a B.S. in political science [p. 921], a B.A. in psychology [p. 936], a B.S. in psychology [p. 940], a B.A. in sociology [p. 1018], or a B.S. in sociology [p. 1027]; both degrees may be earned at the same time. Separate application to each degree program is required. Graduates who have earned one of these degrees at another institution and wish to earn the B.A. in social studies education should consult the Department of Teaching and Learning; additional coursework may be required.

An Iowa secondary teaching license qualifies holders to teach in grades 5-12. Additional subject area endorsements can be completed in any 5-12 licensure program. For more information and an advisor, contact the Department of Teaching and Learning.

For initial licensure, student teaching must be an all-day, full-semester experience. Most students are placed in a district within a 60-mile radius of Iowa City. Placements outside this area require special approval and are considered on an individual basis. Special site programs provide experience in districts with diverse populations and students also may apply to student teach at international sites for the second half of the semester.

Additional information about options for student teaching and application procedures is available from the Office of Student Services. Applications for student teaching must be submitted during the calendar year before the student teaching semester. The deadline for student planning to student teach the following fall semester is November 15 and April 15 for the following spring semester.

The B.A. with a major in social studies education requires the following work.

Professional Education Course Requirements

Students complete 39 s.h. from the following.

Foundation Courses

Foundation courses may be completed before or after admission to the major.

Code	Title	Hours
All of these:		
EDTL:4900	Foundations of Special Education	3
EPLS:3000	Foundations of Education	3

a These majors include a BA in anthropology, a BS in anthropology, a BA in economics, a BS in economics, a BA in geography, a BS in geography, a BA in history, a BA in political science, a BS in political science, a BA in psychology, a BS in psychology, a BA in sociology, or a BS in sociology.

b Complete the College of Education verification of 10 hour field experience form available on the Office of Educational Services web page.

c Please see the College of Education website for detailed application instructions and deadlines. Admission is selective and a priority deadline exists.

d As a requirement for completion of an approved Teacher Education Program for initial teaching licensure, the state of Iowa requires a passing score on this exam. The test is required before recommendation for licensure or certification to any state.

Science Studies, B.S.

Science studies provides preparation in more than one discipline of science; a consideration of science from a philosophical, historical, and sociological perspective; an introduction to applied science (technology); and an education sequence.

Program planning in science studies requires the cooperation and involvement of a variety of University departments and colleges. Most of the program's requirements are drawn from courses offered by these varied academic units.

Learning Outcomes

Students who major in science studies gain:

- knowledge in two or more areas of science;
- a specified proficiency in mathematics as a tool of science (with more mathematics study required for the physical science emphases than for the biological ones);
- a view of science from a historical, philosophical, and cultural perspective; and
- experience with the application of scientific knowledge.

Research

Each faculty member in science studies is responsible for one or more areas of research. Major interests include studies of effective teaching and learning, science through writing, philosophy and sociology of science, individualized learning, social issues in science and technology, curriculum planning and development, professional development, intellectual development related to teaching and learning science, studies of effective use of hands-on activities, and evaluation and assessment of science instruction and programs.

Programs and Projects

A wide range of funded programs provides ample opportunity for students to be involved in innovative development and research in science studies.

Science studies faculty members collaborate on a number of international research projects in many countries. Activities include faculty exchanges and cross-national studies.

International students enrich the opportunities for graduate studies in science studies. New international collaborative efforts are under way each year.

Requirements

The Bachelor of Science with a major in science studies (awarded by the College of Liberal Arts and Sciences) requires a minimum of 120 s.h., including at least 48 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all courses for the major and in all UI courses for the major. They also must complete the College of Liberal Arts and Sciences GE CLAS Core [p. 20].

The major in science studies is interdisciplinary. It is intended for students interested in education; it is not intended to prepare students for advanced study in one area of science. When graduates of the science studies program elect to pursue graduate study in a specific area of science, they often must complete additional coursework in that discipline after they are admitted to the Graduate College.

The science studies curriculum includes courses offered by science departments in the College of Liberal Arts and

Sciences, science applications courses, and courses in the history, philosophy, and sociology of science.

The major offers five emphasis areas: all-science, biology, chemistry, earth science, and physics. The all-science emphasis area is open only to students who will earn teacher licensure and would like equal preparation in biology, chemistry, earth science, and physics. Students who choose the all-science emphasis area do not choose a secondary emphasis area. They must complete all requirements for teacher licensure in order to graduate in the all-science emphasis area.

Students who do not choose the all-science emphasis area may elect whether or not to earn teacher licensure. They choose a primary and a secondary emphasis area from biology, chemistry, earth science, and physics, acquiring depth in the primary emphasis area equivalent to six semesters of sequential study and preparation in the secondary area equivalent to four semesters of sequential study.

All science studies students must complete the requirements for their emphasis area(s) plus the broad field science block. Those who wish to earn teacher licensure also must complete the College of Education's Teacher Education Program (TEP), including the 47 s.h. professional education sequence; see "Teacher Licensure" below.

Special Rules

The Science Studies Program may involve many faculty advisors and more than one college or department. Consequently, the following special rules apply to science studies students.

At least 10 s.h. of graded credit in science must be earned at the University of Iowa.

No credit from the CLEP Natural Science General Examination may be applied toward the major in science studies.

Courses for the major may not be taken pass/nonpass. Grades from all courses applied toward the science studies major are used in computing a student's grade-point average in the major, both at the University of Iowa and overall.

Since mathematics forms an integral part of so many aspects of modern science, all-science emphasis area education students are urged to complete appropriate advanced courses in both pure and applied mathematics (including statistics and computer science) so that they may be qualified to do graduate work and quantitative research later.

The B.S. with a major in science studies requires the following coursework.

All-Science Emphasis Area

Students who choose the all-science emphasis area do not choose a secondary emphasis area. They complete a minimum of 48 s.h. for the major, including at least 36 s.h. in the following coursework (at least 9 s.h. in each of the four science disciplines—biology, chemistry, earth science, and physics), and 12 s.h. in the broad field science block. They also must complete all requirements for teacher licensure (see "Teacher Licensure" below).

Biology

Code	Title	Hours
At least 9 s.h. from these:		
BIOL:1411	Foundations of Biology	4
BIOL:1412	Diversity of Form and Function	4
BIOL:2211	Genes, Genomes, and the Human Condition	3
BIOL:2673	Ecology	3
BIOL:3172	Evolution	4
HHP:3500	Human Physiology	3

Chemistry

Code	Title	Hours
At least 9 s.h. from these:		
CHEM:1110	Principles of Chemistry I	4
CHEM:1120	Principles of Chemistry II	4
CHEM:2021	Fundamentals of Chemical Measurements	3
CHEM:2210	Organic Chemistry I	3
CHEM:2220	Organic Chemistry II	3

Earth Science

Code	Title	Hours
At least 9 s.h. from these:		
EES:1030	Introduction to Earth Science	3-4
EES:1040	Evolution and the History of Life	3-4
EES:1050	Introduction to Geology	4
EES:1080	Introduction to Environmental Science	3-4
EES:3000	Geologic Training Assignment	1-3
EES:3070	Marine Ecosystems and Conservation	3

Physics

At least 9 s.h. chosen as follows.

Code	Title	Hours
At least one of these:		
ASTR:1070	Stars, Galaxies, and the Universe	3-4
PHYS:1200	Physics of Everyday Experience	3
No more than one of these:		
PHYS:1511	College Physics I	4
PHYS:1611	Introductory Physics I	4
PHYS:1701	Physics I	4
No more than one of these:		
PHYS:1512	College Physics II	4
PHYS:1612	Introductory Physics II	3-4
PHYS:1702	Physics II	4

Broad Field Science Block

Students must complete 12 s.h. from the following.

Code	Title	Hours
This course:		
SIED:4135	The Nature of Science	4
At least two of these:		
SIED:4102	Societal and Educational Applications of Earth Science and Environmental	4
SIED:4103	Societal and Educational Applications of Biological Sciences	4
SIED:4105	Societal and Educational Applications of Physical Sciences	4
SIED:4106	Societal and Educational Applications of Chemical Concepts	4

Biology Emphasis Area

Students who choose biology as their primary emphasis area complete a minimum of 50 s.h. for the major, including 23-25 s.h. in the following biology coursework plus at least 15 s.h. in a secondary emphasis area (chemistry, earth science, or physics) and 12 s.h. in the broad field science block. With their advisor's permission, students may include a science applications course in their secondary emphasis area.

Code	Title	Hours
This sequence:		
BIOL:1411- BIOL:1412	Foundations of Biology - Diversity of Form and Function	8
One of these:		
BIOL:1311	Human Genetics in the Twenty-First Century	3
BIOL:2512	Fundamental Genetics	4
One of these:		
BIOL:2374	Biogeography	3
BIOL:2673	Ecology	3
One of these:		
BIOL:1370	Understanding Evolution	3
BIOL:3172	Evolution	4
One of these:		
BIOL:3343	Animal Physiology	3
HHP:3500	Human Physiology	3
One of these:		
BIOC:3110	Biochemistry	3
BIOL:2723	Cell Biology	3
BIOL:3233	Introduction to Developmental Biology	3
BIOL:3363	Plant Developmental Biology	3
And both of these:		
Coursework in a secondary emphasis area (chemistry, earth science, or physics)		15
Coursework listed under "Broad Field Science Block" below		12

Broad Field Science Block

Students must complete 12 s.h. from the following.

Code	Title	Hours
This course:		
SIED:4135	The Nature of Science	4
At least two of these:		
SIED:4102	Societal and Educational Applications of Earth Science and Environmental	4
SIED:4103	Societal and Educational Applications of Biological Sciences	4
SIED:4105	Societal and Educational Applications of Physical Sciences	4
SIED:4106	Societal and Educational Applications of Chemical Concepts	4

Chemistry Emphasis Area

Students who choose chemistry as their primary emphasis area complete a minimum of 50 s.h. for the major, including 23 s.h. in the following chemistry coursework plus at least 15 s.h. in a secondary emphasis area (biology, earth science, or physics) and 12 s.h. in the broad field science block. With their advisor's permission, students may include a science applications course in their secondary emphasis area.

Code	Title	Hours
All of these:		
CHEM:1110 & CHEM:1120	Principles of Chemistry I-II	8
CHEM:2210	Organic Chemistry I	3
CHEM:2220	Organic Chemistry II	3
CHEM:2410	Organic Chemistry Laboratory	3
CHEM:3250	Inorganic Chemistry (spring)	3
One of these:		
BIOC:3110	Biochemistry	3
CHEM:3110	Analytical Chemistry I	3
CHEM:4431	Physical Chemistry I	3
And both of these:		
Coursework in a secondary emphasis area (biology, earth science, or physics)		15
Coursework listed under "Broad Field Science Block" below		12

Broad Field Science Block

Students must complete 12 s.h. from the following.

Code	Title	Hours
This course:		
SIED:4135	The Nature of Science	4
At least two of these:		
SIED:4102	Societal and Educational Applications of Earth Science and Environmental	4
SIED:4103	Societal and Educational Applications of Biological Sciences	4
SIED:4105	Societal and Educational Applications of Physical Sciences	4

SIED:4106	Societal and Educational Applications of Chemical Concepts	4
-----------	--	---

Earth Science Emphasis Area

Students who choose earth science as their primary emphasis area complete a minimum of 48 s.h. for the major, including at least 21 s.h. in the following earth science coursework plus at least 15 s.h. in a secondary emphasis area (biology, chemistry, or physics) and 12 s.h. in the broad field science block. With their advisor's permission, students may include a science applications course in their secondary emphasis area.

Code	Title	Hours
Both of these:		
EES:1040	Evolution and the History of Life	4
EES:1080	Introduction to Environmental Science	4
One of these:		
EES:1030	Introduction to Earth Science	3-4
EES:1050	Introduction to Geology	4
One of these:		
EES:2831	Geologic Field Methods	3
EES:3000	Geologic Training Assignment	1-3
EES:3300	Sedimentary Geology	4
EES:3840	Structural Geology	4
One of these:		
EES:3020	Earth Surface Processes	3
EES:3210	Principles of Paleontology	3
EES:3360	Soil Genesis and Geomorphology	3
One of these:		
EES:1290	Energy and the Environment	3
GEOG:1050	Foundations of GIS	4
GEOG:4010	Field Methods in Physical Geography	3
One of these:		
EES:3070	Marine Ecosystems and Conservation	3
EES:3080	Introduction to Oceanography	2
And both of these:		
Coursework in a secondary emphasis area (biology, chemistry, or physics)		15
Coursework listed under "Broad Field Science Block" below		12

Broad Field Science Block

Students must complete 12 s.h. from the following.

Code	Title	Hours
This course:		
SIED:4135	The Nature of Science	4
At least two of these:		
SIED:4102	Societal and Educational Applications of Earth Science and Environmental	4

SIED:4103	Societal and Educational Applications of Biological Sciences	4
SIED:4105	Societal and Educational Applications of Physical Sciences	4
SIED:4106	Societal and Educational Applications of Chemical Concepts	4

Physics Emphasis Area

Students who choose physics as their primary emphasis area complete a minimum of 47 s.h. for the major, including at least 20 s.h. in the following physics coursework plus at least 15 s.h. in a secondary emphasis area (biology, chemistry, or earth science) and 12 s.h. in the broad field science block. With their advisor's permission, students may include a science applications course in their secondary emphasis area.

Code	Title	Hours
One of these sequences:		
PHYS:1511- PHYS:1512	College Physics I-II (if physics is a secondary emphasis area)	8
PHYS:1611- PHYS:1612	Introductory Physics I-II	8
PHYS:1701- PHYS:1702	Physics I-II	8
One of these:		
PHYS:2703	Physics III	4
PHYS:3710	Intermediate Mechanics	3
One of these:		
ASTR:1070	Stars, Galaxies, and the Universe (if physics is a secondary emphasis area)	3-4
ASTR:1080	Exploration of the Solar System (if physics is a secondary emphasis area)	3-4
ASTR:1771	Introductory Astronomy I: Basic Astrophysics and Planetary Astronomy	4
One of these:		
PHYS:3811	Electricity and Magnetism I	3
PHYS:3850	Electronics	4
This course:		
PHYS:1200	Physics of Everyday Experience	3
And both of these:		
Coursework in a secondary emphasis area (biology, chemistry, or earth science)		15
Coursework listed under "Broad Field Science Block" below		12

Broad Field Science Block

Students must complete 12 s.h. from the following.

Code	Title	Hours
This course:		
SIED:4135	The Nature of Science	4
At least two of these:		

SIED:4102	Societal and Educational Applications of Earth Science and Environmental	4
SIED:4103	Societal and Educational Applications of Biological Sciences	4
SIED:4105	Societal and Educational Applications of Physical Sciences	4
SIED:4106	Societal and Educational Applications of Chemical Concepts	4

Teacher Licensure

Students interested in teaching in elementary and/or secondary schools should seek admission to the Teacher Education Program (TEP) in the College of Education.

To qualify for licensure in secondary teaching, students in the TEP complete a degree in education as well as a related College of Liberal Arts and Sciences degree. See Teacher Education Program Application and Admission on the College of Education website for details on requirements and deadlines for applying to the College of Education and about TEP choices of majors leading to licensure.

Honors

Honors in the Major

The science studies program offers outstanding students the opportunity to graduate with honors in the major. Honors students must maintain a cumulative University of Iowa g.p.a. of at least 3.33 and fulfill other requirements; contact the Science Education program for more information about graduating with honors in the science studies major.

University of Iowa Honors Program

In addition to honors in the major, students have opportunities for honors study and activities through membership in the University of Iowa Honors Program. Visit Honors at Iowa to learn about the University's honors program.

Membership in the UI Honors Program is not required to earn honors in the science studies major.

Academic Plans

Four-Year Graduation Plan

The Four-Year Graduation Plan is not available to students majoring in science studies.

Sample Plans of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Degree Application: apply on MyUI before deadline (typically in February for spring, September for fall)ⁱ

Hours 14-17

Total Hours 124-136

- Enrollment in chemistry courses requires completion of a placement exam.
- Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
- Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
- Fulfills a major requirement and may fulfill a GE requirement.
- GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
- Students must take two of the applications courses SIED:4102, SIED:4103, SIED:4105, or SIED:4106.
- Students must complete 15 semester hours in their secondary emphasis area.
- Choose from BIOC:3110, BIOL:2723, BIOL:3233, or BIOL:3363. Some courses are offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
- Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>. If applicable search for "Early and Late Participation" to find this page (e.g. participate in graduation ceremony in May, degree conferral in August).

Total Hours	126-138

- a Fulfills a major requirement and may fulfill a GE requirement.
- b Students who have completed four years of a single language in high school have satisfied the GE CLAS Core World Languages requirement. Enrollment in world languages courses requires a placement exam, unless enrolling in a first-semester-level course.
- c GE CLAS Core courses may be completed in any order unless used as a prerequisite for another course. Students should consult with an advisor about the best sequencing of courses.
- d Students may use elective courses to earn credit towards the total s.h. required for graduation or to complete a double major, minors, or certificates.
- e Students must take two of the applications courses SIED:4102, SIED:4103, SIED:4105, or SIED:4106.
- f Students may take SIED:4102 in the summer and then adjust plan accordingly.
- g Students must complete 15 semester hours in their secondary emphasis area.
- h Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>. If applicable search for "Early and Late Participation" to find this page (e.g. participate in graduation ceremony in May, degree conferral in August).

Career Advancement

The Pomerantz Career Center offers multiple resources to help students find internships and jobs.

World Language Education, B.A.

Requirements

The Bachelor of Arts with a major in world language education requires a minimum of 120 s.h., including a minimum of 48 s.h. in world language professional education courses and 30-36 s.h. in world language education content courses. Students must maintain a g.p.a. of at least 2.70 in professional education course requirements. They also must complete the GE CLAS Core [p. 20]. The major requires admission to the Teacher Education Program (TEP). Application information can be obtained through the Office of Student Services.

Students must earn one of these majors at the University of Iowa in order to earn the B.A. in world language education: a B.A. in Asian languages and literature [p. 157] with a Chinese or Japanese subprogram, a B.A. in French [p. 489], a B.A. in German [p. 571], a B.A. in Italian [p. 493], a B.A. in Russian [p. 164], a B.A. in Spanish [p. 1051], or a B.A. in classical languages [p. 250] with a Latin language emphasis; both degrees may be earned at the same time. Separate application to each degree program is required. Graduates who have earned one of these degrees at another institution and wish to earn the B.A. in world language education should consult the Department of Teaching and Learning; additional coursework may be required.

An Iowa secondary teaching license qualifies holders to teach in grades 5-12. Additional subject area endorsements can be completed in any 5-12 licensure program. Secondary teacher preparation programs in world language also offer a program that leads to licensure as a subject matter specialist in grades K-8. For more information and an advisor, contact the Department of Teaching and Learning.

For initial licensure, student teaching must be an all-day, full-semester experience. Most students are placed in a district within a 60-mile radius of Iowa City. Placements outside this area require special approval and are considered on an individual basis. Special site programs provide experience in districts with diverse populations and students also may apply to student teach at international sites for the second half of the semester.

Additional information about options for student teaching and application procedures is available from the Office of Student Services. Applications for student teaching must be submitted during the calendar year before the student teaching semester. The deadline for student planning to student teach the following fall semester is November 15 and April 15 for the following spring semester.

The B.A. with a major in world language education requires the following work.

Professional Education Course Requirements

Students complete at least 48 s.h. from the following.

Foundation Courses

Foundation courses may be completed before or after admission to the major.

Code	Title	Hours
All of these:		
EDTL:4900	Foundations of Special Education	3
EPLS:3000	Foundations of Education	3
PSQF:1075	Educational Psychology and Measurement	3

Additional Licensure Courses

Code	Title	Hours
All of these:		
EDTL:3002	Technology in the Classroom	2
EDTL:3091	Secondary Education Program Orientation and Classroom Management	3
EDTL:3095	Teaching Reading in Secondary Content Areas	1
EDTL:4406	Foreign Language Education Practicum I	3
EDTL:4407	Foreign Language Education Practicum II	3
EDTL:4410	Teaching K-12 Second Language Learners	3
EDTL:4416	Learning to Teach Second Languages I	3
EDTL:4417	Learning to Teach Second Languages II	3
EPLS:4180	Human Relations for the Classroom Teacher	3

Student Teaching

Transfer students should consult their adviser since they must complete certain courses before they student teach.

Code	Title	Hours
All of these:		
EDTL:4087	Seminar: Curriculum and Student Teaching	3
EDTL:4091	Observation and Laboratory Practice in the Secondary School	6
EDTL:4092	Observation and Laboratory Practice in the Secondary School	6
Optional course:		
EDTL:4089	Special Subject Area Student Teaching	3-6

Mathematics Course

Students must complete a college-level math course. Most students complete this course as a part of their GE CLAS Core [p. 20] requirement in Quantitative or Formal Reasoning. For questions about how the math course can be applied to the licensure requirement, see Academic Advising on the College of Education website.

Code	Title	Hours
One of these:		
CS:1110	Introduction to Computer Science	3
CS:1210	Computer Science I: Fundamentals	4

STAT:1010	Statistics and Society	3
STAT:1020/ PSQF:1020	Elementary Statistics and Inference	3
STAT:1030	Statistics for Business	4
Any mathematics course (prefix MATH), except MATH:0100 or MATH:1005		

World Language Education Content Courses

Students must complete 30-36 s.h. in an approved College of Liberal Arts and Sciences world language major.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Hours 14

Total Hours 47

- These majors include a BA in Asian languages and literature with a Chinese or Japanese subprogram, a BA in French, a BA in German, a BA in Italian, a BA in Russian, a BA in Spanish, or a BA in classical languages with a Latin language emphasis.
- Complete the College of Education verification of 10 hour field experience form available on the Office of Educational Services web page.
- Please see the College of Education website for detailed application instructions and deadlines. Admission is selective and a priority deadline exists.
- Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
- Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
- As a requirement for completion of an approved Teacher Education Program for initial teaching licensure, the state of Iowa requires a passing score on this exam. The test is required before recommendation for licensure or certification to any state.

Teaching and Learning, M.A.

Art Education

The Master of Arts in teaching and learning with an art education subprogram requires a minimum of 38 s.h. of graduate credit. Students must maintain a g.p.a. of at least 3.00 while enrolled in the program.

The program prepares highly qualified teachers of art for elementary and secondary schools and community colleges. Its strong academic emphasis helps teachers who are creative artists to become highly literate in the history and language of art.

Requirements

The M.A. plan of study includes a total of 18 s.h. in studio art and art history (either 12 s.h. of studio art and 6 s.h. of art history, or 12 s.h. of art history and 6 s.h. of studio art); a total of 8 s.h. in EDTL:6267 Seminar: Current Issues in Art Education (or equivalent); and a total of 12 s.h. in additional coursework, specified after a student begins the program.

M.A. students also must complete a studio thesis or a written thesis.

Admission

Applicants must meet the admission requirements of the Graduate College. They must have completed the equivalent of the minimum coursework in art required for a University of Iowa B.A. or B.F.A. in art and must have a license/certificate to teach art. Applications must include a representative portfolio of the applicant's work, consisting of eight digital reproductions of artwork and one example of written work, which may be a paper previously written for a course or an original paper.

Developmental Reading

The Master of Arts in teaching and learning with a developmental reading subprogram requires a minimum of 33 s.h. of graduate credit with thesis and a minimum of 35 s.h. of graduate credit without thesis. Students must maintain a g.p.a. of at least 3.00 while enrolled in the program.

The program prepares graduate students for positions as reading specialists in kindergarten and grades 1-12. The required coursework develops the skills, knowledge, and competence needed for supervisory, curricular, and remedial teaching positions in reading. The program also builds a background in reading for students who want to specialize further in the area and eventually to teach and/or conduct research at a college or university.

Successful completion of this program, combined with one year of successful teaching experience that includes teaching reading as a significant part of the responsibility, qualifies a student for certification as a reading specialist.

The M.A. in teaching and learning with a developmental reading subprogram requires the following coursework.

Required Courses

Code	Title	Hours
All of these:		
EDTL:4171	Diversity and Exceptionalities in Literacy Instruction	3
EDTL:4394	Secondary Reading Instruction	2-3
EDTL:6164	Early Literacy Development and Instruction	2-3
EDTL:6165	Reading and Writing Across Intermediate Grades	3
EDTL:6167	Inquiry-Based Curriculum Development in Early Childhood and Elementary Classrooms	3
EDTL:6171	Advanced Reading Clinic Techniques	2-3
EDTL:6172	Advanced Reading Clinic Practicum	2-3
EDTL:7008	Seminar: Research and Current Issues (literacy)	3

One of these:

PSQF:4106	Child Development	3
PSQF:4130	Early Adolescent Development	3
PSQF:4133	The Adolescent and Young Adult	3
PSQF:6200	Educational Psychology	3

Students who have completed educational psychology and/or human growth and development coursework relating only to grades K-8 should choose PSQF:4130 Early Adolescent Development, PSQF:4133 The Adolescent and Young Adult, or PSQF:6200 Educational Psychology from the list above. Those who have completed work relating only to grades 5-12 should choose PSQF:4106 Child Development or PSQF:6200 Educational Psychology.

Code	Title	Hours
One of these:		
PSQF:4150	Introduction to Educational Measurement	3-4
PSQF:6238	Assessment of Learning Differences	3-4
An approved literacy assessment course		
One of these:		
EDTL:7165	Reading Clinic: Supervision	arr.
EPLS:6383	Supervision and Evaluation	3

Thesis

A thesis is required for the thesis option.

Code	Title	Hours
EDTL:6393	Master's Thesis	2

Electives

Students, in consultation with their advisors, may select the remaining required semester hours as electives from areas such as curriculum, supervision, language arts, testing and evaluation, linguistics, or speech pathology.

Comprehensive Examination

Comprehensive examinations are typically composed of two components. In consultation with an advisor, students select from a menu of options that best meets their professional goals. Options might include writing a paper for publication, designing a professional development workshop, a review of literature focused on one aspect of their studies, and writing/submitting a grant to fund a project at their school.

Admission

Applicants must meet the admission requirements of the Graduate College. They must have an undergraduate g.p.a. of at least 3.00; hold an early childhood, elementary, or secondary school teaching certificate; and show evidence of completing two years of successful teaching experience.

English Education

The Master of Arts in teaching and learning with an English education subprogram requires a minimum of 30 s.h. of graduate credit. Students must maintain a g.p.a. of at least 3.00 while enrolled in the program.

The program is intended for experienced teachers of English. It provides opportunities for professional development and preparation for department chairs, supervisors of English, and curriculum specialists for secondary schools.

M.A. students specialize in English education and in one or two other areas. The other area(s) may include reading, writing, curriculum, adolescent literature, or a literary area. Students and their advisors plan the program of study together. The only required course is EDTL:6315 M.A. Seminar: English Education. At the end of the program, students take a comprehensive examination in English education and in their chosen area(s), or they may choose to write a thesis.

Admission

Applicants must meet the admission requirements of the Graduate College. They should have taken extensive coursework in English and should have taught English for at least two years. Application should be made to the College of Education.

Mathematics Education

The Master of Arts in teaching and learning with a mathematics education subprogram requires a minimum of 32 s.h. of graduate credit. Students must maintain a g.p.a. of at least 3.00 while enrolled in the program.

The program provides students with advanced specialization in mathematics and education as a better foundation for K-12 teaching.

Required Courses

M.A. students take a minimum of 9 s.h. of coursework in mathematics approved by their advisor. They also take a minimum of four courses in mathematics education, which must include EDTL:5535 Current Issues in Mathematics Education and three courses chosen in consultation with their advisor.

Students choose a cognate area, usually enrolling in three or more courses in the area. Suggested areas include educational psychology, educational statistics and

measurement, history or philosophy of education, pure or applied mathematics, instructional design and technology, counselor education, curriculum, administration, and special education. Courses are chosen in consultation with a faculty member from their cognate area.

Students also complete a sufficient number of electives in mathematics and education, chosen with the approval of their advisor, to complete 32 s.h. of credit.

Comprehensive Examination

Students take three two-hour comprehensive exams: one in mathematics education, the second in mathematics, and the third in their cognate area.

Admission

Applicants must meet the admission requirements of the Graduate College. Except in unusual cases, they should hold a professional license/certificate to teach school mathematics.

Multilingual Education

The Master of Arts in teaching and learning with a multilingual education subprogram requires a minimum of 33-36 s.h. of graduate credit. Students take at least 15 s.h. in second language education coursework, 9 s.h. in graduate language or linguistics, and 9 s.h. in the cognate area. They must earn 9 s.h. in courses numbered 5000 or above. Students must maintain a g.p.a. of at least 3.00 while enrolled in the program. Candidacy for the master's degree is reevaluated annually. Students must maintain a g.p.a. of at least 3.00 while enrolled in the program.

The program is designed for students who would like to pursue a multilingual education specialization in teaching (kindergarten through college) or in related fields (e.g., language laboratory directors, instructional materials designers, or evaluation specialists). It also offers enrichment in multilingual language pedagogical knowledge for practicing teachers. Students may design programs with a special focus.

The M.A. in teaching and learning with a multilingual education subprogram requires the following work, including these suggested courses.

Code	Title	Hours
All of these:		
EDTL:6400	Fundamentals of Second Language Assessment	3
EDTL:6483	Multilingual Education and Applied Linguistics	3
EDTL:6497	Principles of Course Design for Second Language Instruction	3
At least 6 s.h. from these:		
EDTL:6402	Second Language Program Management	3
EDTL:6403	Language Policy and Planning	3
EDTL:6409	Cultural Curriculum	3
EDTL:6480	Issues in Foreign Language Education	3
EDTL:6484	Reading in a Second Language	3
Target Language		

In consultation with their advisor, students select at least 9 s.h. of graduate language courses in their area of interest

Cognate Area

Students complete at least 9 s.h. of coursework chosen in consultation with their advisor

Master's Examination

Students take a written exam during the semester in which they plan to graduate. The exam covers second language education and the two study areas selected by a student. It is written by the graduate committee, which consists of at least three faculty members, two of whom must be from world language education. The candidate and the advisor discuss and formalize the exam's content and process eight months before the exam.

Admission

Applicants must meet the admission requirements of the Graduate College. They must be proficient in English and in another language and must have earned at least 20 s.h. in undergraduate, upper-division world language coursework. Applicants should submit a statement of purpose explaining their graduate study goals. A g.p.a. of at least 3.00 in undergraduate coursework and some experience living, working, and/or studying in the culture of the applicant's chosen target language are preferred. International applicants whose first language is not English must score at least 81 (internet-based) on the Test of English as a Foreign Language (TOEFL) with a speaking score of 26 and a writing score of 25.

Social Studies Education

The Master of Arts in teaching and learning with a social studies education subprogram requires 38 s.h. of graduate credit. Students must maintain a g.p.a. of at least 3.00 while enrolled in the program.

The program provides an opportunity for interdisciplinary work in education, history, social science, or related areas for classroom teachers, high school department chairs, supervisors, and others interested in advancing their competence in history and the social sciences and greater proficiency in teaching and supervision.

Requirements

Students create a course of study in consultation with their advisor that aligns with their interests related to social studies education and/or their profession. Students distribute the program's required 38 s.h. among three concentration fields in history or a social science (or related area), social studies and global education, and general education. At least 9 s.h. must be earned in history or a social science and in general education courses numbered 3000 or above. Students also must earn at least 9 s.h. in courses numbered 6000 or above offered through the social studies education program or a related area of education.

Thesis Option

Students who choose the thesis option complete a research or investigative problem. If the thesis is research or investigation in history, social science, or a related area, the thesis director is a member of the appropriate department. If the thesis is an

investigative problem in social studies education, the thesis director is a College of Education faculty member.

Comprehensive Examination

Candidates select one faculty member from each concentration area to serve as a committee member responsible for creating and reviewing a question for the written exam. Committee members are selected in consultation with a candidate's advisor. The required comprehensive examination consists of three two-hour written exams, one on each of the three concentration fields.

Admission

Applicants must meet the admission requirements of the Graduate College. They should have a bachelor's degree in education, history, or one of the social sciences from an accredited institution; a cumulative g.p.a. of at least 3.00; a g.p.a. of at least 3.00 in history and/or social science courses; and two letters of recommendation. Evidence of writing ability in a completed major paper or essay also is required. Typically, applicants are expected to hold a secondary teaching license/certificate.

Special Education

The Master of Arts in teaching and learning with a special education subprogram requires a minimum of 32 s.h. of graduate credit. Students must maintain a g.p.a. of at least 3.00 while enrolled in the program.

The program prepares individuals to deliver appropriate levels of service to students with disabilities at the elementary and secondary levels, in either public or private settings. Applicants with a master's degree and special education certification may request admission in order to obtain an additional area of special education licensure/certification (i.e., professional improvement). Students typically receive licensure/certification in at least one area upon completing the program. Contact the Department of Teaching and Learning for specific program requirements.

Special education programs are offered in K-8 and 5-12 Instructional Strategist I: Mild/Moderate, and K-12 Instructional Strategist II: BD/LD. These programs are designed to prepare graduates for positions in public schools, local and state education agencies, clinical settings, and institutions of higher education. All teacher licensure/certification programs are approved by the Iowa Department of Education.

Admission

Applicants must meet the admission requirements of the Graduate College. They must have an undergraduate g.p.a. of at least 3.00 and/or at least 3.00 on a minimum of 12 s.h. of graduate coursework. A combined verbal and quantitative score of at least 300 on the Graduate Record Exam (GRE) General Test is preferred; however, the GRE requirement has been suspended for the 2020-21 admissions cycle. Applicants seeking initial teacher licensure must have at least 10 hours of documented experience in K-12 schools. Applicants whose first language is not English must score at least 100 (internet-based) on the Test of English as a Foreign Language (TOEFL).

Application materials must include a completed Graduate College application form; copies of official transcripts for all college coursework; an official report of Graduate Record Exam (GRE) General Test scores; three current letters of

recommendation; and evidence of experience and/or teacher licensure/certification. An interview may be requested.

Final admission decisions are made by the special education graduate admissions committee.

Teaching, Leadership, and Cultural Competency

The Master of Arts in teaching and learning with a teaching, leadership, and cultural competency subprogram requires a minimum of 33 s.h. of graduate credit. Students must maintain a g.p.a. of at least 3.00 while enrolled in the program.

The program is offered completely online. The program addresses identified needs within the profession: English Language Learner (ELL) instruction, cultural competency in the classroom, evidenced-based frameworks for technology integration, educational leadership, and teacher leader/instructional coaching best practices.

Students take a 24 s.h. core, including courses in instructional leadership, cultural competency and diversity, assessment, technology, and curriculum; and 9 s.h. of specialized coursework. Iowa teachers can apply their course credits toward their ongoing learning requirements for maintaining licensure. The program requirements also are aligned with the National Board for Professional Teaching Standards (NBPTS) certification process. Additionally, elective tracks are aligned with Iowa added endorsements in talented and gifted (TAG); science, technology, engineering, and math (STEM); and English as a second language (ESL).

The M.A. in teaching and learning with a teaching, leadership, and cultural competency subprogram requires the following coursework.

Code	Title	Hours
All of these:		
EDTL:5090	Diversity and Identity in K-12 Schools	3
EDTL:5095	Issues in U.S. Schools	3
EDTL:6483	Multilingual Education and Applied Linguistics	3
EPLS:5090	Instructional Coaching for Teaching Excellence	3
PSQF:4740	Issues in K-12 Assessment	3
PSQF:4750	Learning Environments: Design, Context, and Activity	3
EDTL:5099	Conducting School-Based Action Research	3
Specialization courses (consult advisor)		9
One of these:		
EDTL:5085	Generation Innovation: Technology Integration in 21st-Century K-12 Schools	3
PSQF:4760	Participatory Learning and Media: Creating, Remixing, Making, and Education	3

Admission

Applicants must meet the admission requirements of the Graduate College. They must have a bachelor's degree, a g.p.a. of at least 3.00 in undergraduate coursework, a

teaching license, or relevant significant teaching experience in K-12 education. Applicants are asked to supply two letters of recommendation from individuals familiar with their work in schools or in an educational program. International applicants whose first language is not English must score at least 81 (internet-based) on the Test of English as a Foreign Language (TOEFL).

Teaching and Learning, M.A.T.

Art Education

The Master of Arts in Teaching in teaching and learning with an art education subprogram requires a minimum of 58 s.h. of graduate credit. Students must maintain a g.p.a. of at least 3.00 while enrolled in the program.

The program is designed primarily for graduates of baccalaureate degree programs in art who would like to become teachers but have no previous coursework in education. It features advanced work in art along with the courses required for certification. Additional art coursework may be advised to render the student's degree equivalent to one from the University of Iowa and to fulfill licensure requirements. Successful completion of the program enables students to receive a credential to teach art in grades K-12.

The M.A.T. in teaching and learning with an art education subprogram requires the following work.

Code	Title	Hours
All of these:		
	A course in creativity, imagination, and play; human development through art (must be taken during student's first semester in the college; consult advisor)	3
EDTL:3002	Technology in the Classroom	2
EDTL:3091	Secondary Education Program Orientation and Classroom Management	3
EDTL:3095	Teaching Reading in Secondary Content Areas	1
EDTL:3143	Methods of Elementary Art and Field Experiences	3
EDTL:3204	Art Education Studio and Field Components	3
EDTL:3205	Methods of Secondary Art and Field Experience	3
EDTL:3290	Introduction and Practicum: Art	3
EDTL:4087	Seminar: Curriculum and Student Teaching	3
EDTL:4091	Observation and Laboratory Practice in the Secondary School	6
EDTL:4192	Special Area Student Teaching	6
EDTL:4900	Foundations of Special Education	3
EDTL:6267	Seminar: Current Issues in Art Education	4
EPLS:3000	Foundations of Education	3
EPLS:4180	Human Relations for the Classroom Teacher	3
PSQF:6200	Educational Psychology	3
	Graduate-level coursework in art studio or art history or a related area (consult advisor)	6

The coursework in art studio or art history or a related field may contribute to licensure requirements. Other art

licensure requirements may be taken prior to or in addition to the courses listed above. To be considered for a teaching assistant (TA) position, students must take EDTL:7380 Practicum in College Teaching for 1 s.h. after their first semester in the program and after completion of EPLS:3000 Foundations of Education, EPLS:4180 Human Relations for the Classroom Teacher, and PSQF:6200 Educational Psychology, and a course in creativity, imagination, and play: human development through art.

Comprehensive Examination

Students complete comprehensive examinations before their student teaching semester. The comprehensive examination involves a reflective project supervised by art education faculty. The project encompasses issues explored throughout the course of study and can involve inquiry through studio work or practice. For deadlines, checklist, and instructions, see Graduate Exams on the Office of Student Services website.

TEP: Secondary Education

Graduate students may be admitted to a program leading to teacher licensure/certification as "certification only" candidates in the Graduate College. They are subject to all Graduate College policies; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website. Eligible graduate students also may complete initial teacher licensure/certification requirements by earning an M.A.T. in teaching and learning with the art education subprogram.

Admission

Applicants must meet the admission requirements of the Graduate College. They should have completed a baccalaureate degree program in art, equivalent to that which is offered through the College of Liberal Arts and Sciences at the University of Iowa, with an undergraduate g.p.a. of at least 3.00. Candidates also must meet all Teacher Education Program (TEP) application requirements. Since the M.A.T. is a credentialing program, candidates must not have qualified previously for a credential.

English Education

The Master of Arts in Teaching in teaching and learning with an English education subprogram requires a minimum of 45 s.h. of graduate credit. Students must maintain a g.p.a. of at least 3.00 while enrolled in the program.

The program is designed for students who have an undergraduate degree in English and few or no professional education courses. Successful completion of the program enables students to receive a credential to teach English in secondary schools.

The M.A.T. in teaching and learning with an English education subprogram requires the following work.

English

Code	Title	Hours
All of these:		
EDTL:3382	Language and Learning	3
EDTL:3393	Reading and Teaching Adolescent Literature	3
EDTL:4355	Approaches to Teaching Writing	3

EDTL:6315	M.A. Seminar: English Education	arr.
-----------	---------------------------------	------

Students may take the following English courses as part of the M.A.T. program or as part of their undergraduate program:

A course in Shakespeare

Three courses in American literature

A course in British literature

A course in nonfiction or creative writing, in addition to EDTL:4355

Education

Code	Title	Hours
All of these:		
EDTL:3002	Technology in the Classroom (must be taken during student's first semester in the college)	2
EDTL:3091	Secondary Education Program Orientation and Classroom Management	3
EDTL:4087	Seminar: Curriculum and Student Teaching	3
EDTL:4091	Observation and Laboratory Practice in the Secondary School	arr.
EDTL:4092	Observation and Laboratory Practice in the Secondary School	arr.
EDTL:4314	Introduction and Practicum: Secondary English (must be completed before enrollment in EDTL:4315 and EDTL:4394)	3
EDTL:4315	Learning to Teach Secondary English/Language Arts and Field Experience	3
EDTL:4394	Secondary Reading Instruction	3
EDTL:4900	Foundations of Special Education	3
EPLS:3000	Foundations of Education	3
EPLS:4180	Human Relations for the Classroom Teacher	3
PSQF:6200	Educational Psychology	3

Comprehensive Examination

The comprehensive examination involves a series of reflective projects supervised by English education faculty. The projects encompass issues explored throughout the course of study and involve integration of theory and practice.

TEP: Secondary Education

Graduate students may be admitted to a program leading to teacher licensure/certification as "certification only" candidates in the Graduate College. They are subject to all Graduate College policies; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website. Eligible graduate students also may complete initial teacher licensure/certification requirements by earning an M.A.T. in teaching and learning (English education).

Admission

Applicants must meet the admission requirements of the Graduate College. They must have been granted a B.A. in English or the equivalent, with an undergraduate g.p.a. of at least 3.00. They also must meet all Teacher Education Program (TEP) application requirements. Since the M.A.T. is a credentialing program, candidates must not have qualified previously for a credential. Applicants are expected to have no more than 6 s.h. of coursework in professional education courses before admission.

Mathematics Education

The Master of Arts in Teaching in teaching and learning with a mathematics education subprogram requires a minimum of 48 s.h. of graduate credit. Students must maintain a g.p.a. of at least 3.00 while enrolled in the program.

The program is designed primarily for students who decide they would like to become teachers and have already completed a B.S. or B.A. in mathematics. It features advanced work in mathematics along with the courses required for certification. It is a means by which students can obtain both a master's degree and certification. It is assumed that students have completed a baccalaureate degree in mathematics equivalent to one that would be completed at the University of Iowa, but has no previous coursework in education. More coursework may be advised if there are mathematics courses a student has not taken as part of the undergraduate mathematics baccalaureate degree program to render the student's degree equivalent to one from the University of Iowa.

The M.A.T. in teaching and learning with a mathematics education subprogram requires the following work.

Education

Code	Title	Hours
The first three courses should be taken during the first semester of registration:		
EDTL:3002	Technology in the Classroom	2
EDTL:3091	Secondary Education Program Orientation and Classroom Management	3
EDTL:3095	Teaching Reading in Secondary Content Areas	1
All of these:		
EDTL:3532	Introduction and Practicum: Mathematics	3
EDTL:3534	Methods: Middle School Mathematics	3
EDTL:4535	Methods: High School Mathematics	3
EDTL:4900	Foundations of Special Education	3
EPLS:3000	Foundations of Education	3
EPLS:4180	Human Relations for the Classroom Teacher	3
PSQF:6200	Educational Psychology	3

One additional graduate-level mathematics education course in consultation with an advisor

The following courses are taken concurrently and constitute the student teaching semester:

EDTL:4087	Seminar: Curriculum and Student Teaching	3
EDTL:4091	Observation and Laboratory Practice in the Secondary School	6
EDTL:4092	Observation and Laboratory Practice in the Secondary School	6

Graduate Mathematics Requirements

Code	Title	Hours
If necessary, courses that fulfill the University of Iowa mathematics major with at least one additional mathematics graduate course (one of the following):		
MATH:4050	Introduction to Discrete Mathematics	3
MATH:4060	Discrete Mathematical Models	3
MATH:4120	History of Mathematics	3

Comprehensive Examination

The comprehensive exam includes a required two-part exam in mathematics and mathematics education. At the discretion of the examining committee, this exam may consist of two parts and is both written and oral. The mathematics and mathematics education comprehensive examinations will not duplicate course examinations, but will assess both mathematics education and the mathematics specialization area chosen by a student.

Admission

Applicants must meet the admission requirements of the Graduate College. They also must meet all Teacher Education Program (TEP) application requirements. Candidates should have completed a baccalaureate degree program in mathematics equivalent to that which is offered through the College of Liberal Arts and Sciences at the University of Iowa. An undergraduate g.p.a. of at least 3.00 is required for admission and must be maintained throughout the enrollment period.

Combined Program

B.A. in Mathematics/M.A.T.

The College of Liberal Arts and Sciences and the College of Education offer students the opportunity to earn their Bachelor of Arts in mathematics/Master of Arts in Teaching degree in education with a mathematics education subprogram in as little as five years.

The Combined B.A./M.A.T. (4+1) program is a seamless process whereby students can progress from undergraduate to graduate status. The usual period of study for both the Bachelor of Arts and the Master of Arts in Teaching degree is six years. Through careful planning, many of the courses required for the M.A.T. program can be taken during the undergraduate years, creating an opportunity to focus the fifth year of study on the comprehensive and student teaching requirements. Visit B.A./M.A.T. Mathematics Education on the College of Education website.

Admission

Students are eligible to apply to the 4+1 program during their sophomore or junior year if they have a cumulative g.p.a. of at least 3.25 or if they meet special considerations. Application materials must include a completed application to the Teacher Education Program (TEP); two recommendations from University of Iowa faculty; a career plan describing how this program will enhance the student's scholarly and/or career goals; and an unofficial transcript of student's prior work.

Students who submit completed applications will be notified within 30 days if they have been accepted into the program. The program accepts a limited number of students each year on a competitive basis. Once accepted into the program, a student meets with an advisor to select an advisory committee to plan a course of study.

During the sixth semester, a student in the program who has completed 80 s.h. of undergraduate work and maintained a 3.00 minimum g.p.a. must apply to the Graduate College. Application to the Graduate College must include a completed Graduate College application form; a letter of application/statement of purpose; one additional letter of recommendation from a faculty member in the mathematics major; Graduate Record Exam (GRE) General Test scores (the GRE requirement has been suspended for the 2020-21 admissions cycle); and Test of English as a Foreign Language (TOEFL) test scores for international students.

Students are granted undergraduate/graduate credit for coursework during the seventh semester; they begin paying graduate tuition during the eighth semester until completion of the program. The baccalaureate degree must be conferred at the end of the eighth semester or in the program's fourth year.

Science Education

The Master of Arts in Teaching in teaching and learning with a science education subprogram requires a minimum of 48 s.h. of graduate credit. Students must maintain a g.p.a. of at least 3.00 while enrolled in the program.

The program is designed primarily for graduates of bachelor's degree programs in science who decide that they would like to become teachers. It features advanced work in science along with the courses required for certification, enabling students to earn a master's degree and teaching certification at the same time. It is assumed that students have completed considerable coursework in science (at least 56 s.h.) as undergraduates, but no previous coursework in education. Students' science coursework should be equivalent to that required by the University of Iowa Science Education program.

The M.A.T. in teaching and learning with a science education subprogram requires the following work.

Professional Education Foundation Sequence

Code	Title	Hours
All of these:		
EDTL:3002	Technology in the Classroom (must be taken during student's first semester in the college)	2

EDTL:3091	Secondary Education Program Orientation and Classroom Management	3
EDTL:3095	Teaching Reading in Secondary Content Areas (must be taken during student's first semester in the college)	1
EDTL:4900	Foundations of Special Education	3
EPLS:3000	Foundations of Education	3
EPLS:4180	Human Relations for the Classroom Teacher	3
One of these:		
PSQF:1075	Educational Psychology and Measurement	3
PSQF:6200	Educational Psychology	3
Science education courses taken in the following sequence:		
EDTL:4751	Science Methods I: Early Learners with Field Experience	3
EDTL:4752	Science Methods II: Junior High with Field Experience	3
These two taken concurrently:		
EDTL:4753	Science Methods III: High School with Field Experience	3
EDTL:4779	Secondary School Science Practicum	2
These three taken concurrently:		
EDTL:4087	Seminar: Curriculum and Student Teaching	3
EDTL:4091	Observation and Laboratory Practice in the Secondary School	6
EDTL:4092	Observation and Laboratory Practice in the Secondary School	6

Electives

A minimum of one graduate course in biology, chemistry, earth science, or physics is required. Students who have satisfied portions of the required science coursework listed above must take additional science coursework to meet the minimum requirement of 48 s.h.

Comprehensive Examination

Students complete comprehensive examinations before their student teaching semester. Two written comprehensive exams, one in science education and one in a science specialization area, are required. Students may not duplicate course examinations in these areas.

TEP: Secondary Education

Graduate students may be admitted to a program leading to teacher licensure/certification as "certification only" candidates in the Graduate College. They are subject to all Graduate College policies; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website. Eligible graduate students also may complete initial teacher licensure/certification requirements by earning an M.A.T. in teaching and learning (science education).

Admission

Applicants must meet the admission requirements of the Graduate College. They must have a bachelor's degree with a major or the equivalent in one of the sciences. A g.p.a. of at least 3.00 is required for admission and must be maintained throughout the program. Applicants must meet all Teacher Education Program (TEP) application requirements.

Combined Program

B.A./M.A.T.

College of Liberal Arts and Sciences students who want to teach science and are working toward a Bachelor of Arts degree with a major in biology, chemistry, environmental sciences, or physics may apply to the combined Bachelor of Arts/Master of Arts in Teaching with a science education subprogram offered by the College of Liberal Arts and Sciences and the College of Education. The combined program enables students to earn a B.A. and an M.A.T. in five years by beginning to earn graduate credit during their fourth year of undergraduate study and by counting up to 18 s.h. of qualifying credit toward both degrees.

B.A. students are admitted to the combined program before their fourth year. They may begin taking education courses during their third year, but they may not earn graduate credit for them until their fourth and fifth years, after they have been admitted to the combined program. Students take 30 s.h. of coursework during the fifth year and must complete all remaining requirements for both degrees that year.

Science Specialization (Broad Field Science Block)

The following courses are required for the undergraduate degree in science studies at the University of Iowa. They need not be repeated by M.A.T. candidates who need one or more advanced courses in their major science area, or by students from other interdisciplinary science discipline programs that prepare teachers for grades 6-9.

Code	Title	Hours
This course:		
SIED:4135	The Nature of Science	4
Two of these (unless completed during undergraduate study):		
SIED:4102	Societal and Educational Applications of Earth Science and Environmental	4
SIED:4103	Societal and Educational Applications of Biological Sciences	4
SIED:4105	Societal and Educational Applications of Physical Sciences	4
SIED:4106	Societal and Educational Applications of Chemical Concepts	4

Education courses required for the combined program are listed under "Combined Program" above. Requirements for the B.A. degree are listed under the B.A. in biology [p. 181], B.A. in chemistry [p. 212], B.A. in environmental sciences [p. 455], and B.A. in physics [p. 885] (College of Liberal Arts and Sciences) in the Catalog.

Social Studies Education

The Master of Arts in Teaching in teaching and learning with a social studies subprogram requires at least 47 s.h. of graduate credit. Students must maintain a g.p.a. of at least 3.00 while enrolled in the program.

The program provides an opportunity for interdisciplinary work in education, history, social science, or related areas. It is for students who have a bachelor's degree in history or a social science (or considerable coursework in one of the areas) and who wish to obtain a teaching license/certificate while earning the M.A.T. degree. Students must apply to both the Graduate College and the College of Education.

Requirements

Students should have completed considerable work in the social sciences and/or history as undergraduates. Students in the College of Education's Teacher Education Program (TEP) for secondary education in social studies may not apply credit they have earned as undergraduates in required licensure courses to the 38 s.h. required for the M.A.T., even though the credit counts toward state teaching licensure.

Students who completed EDTL:4811 Introduction and Practicum: Secondary Social Studies and/or EDTL:4870 Methods: Secondary Social Studies as undergraduate or postbaccalaureate students at the University of Iowa are required to retake these courses during the M.A.T. program and before student teaching. Required teaching licensure coursework completed at other colleges or universities is reviewed on a case-by-case basis.

Students who were accepted to the undergraduate TEP before they received a baccalaureate degree must complete a college-level math course.

For licensure, students must complete 30 s.h. in a history or social science area; the 30 s.h. may include previous undergraduate and/or graduate-level coursework. Required professional education coursework not completed as part of the baccalaureate degree must be completed for licensure.

Students also must complete 15 s.h. in an additional history or social science licensure area; previous undergraduate coursework may apply.

Of the total semester hours required for the M.A.T., students must earn at least 8 s.h. in courses numbered 6000 or above in social studies education and a minimum of 9 s.h. of graduate coursework in history or a social science area. Students should take at least one course taught by the instructor who will serve on the examining committee in the history or social science area.

Students must complete all of the following professional education courses, unless they completed some of them as part of their bachelor's degree. In such cases, the semester-hour requirement is reduced accordingly, but it never is below 47 s.h. All students must take the coursework required for meeting all Iowa Department of Education requirements for teacher licensure/certification.

Professional Education Courses

Code	Title	Hours
All of these:		
EDTL:3002	Technology in the Classroom (must be taken during student's first semester in the college)	2
EDTL:3091	Secondary Education Program Orientation and Classroom Management	3
EDTL:3095	Teaching Reading in Secondary Content Areas (must be taken during student's first semester in the college)	1
EDTL:4087	Seminar: Curriculum and Student Teaching	3
EDTL:4091	Observation and Laboratory Practice in the Secondary School	6
EDTL:4092	Observation and Laboratory Practice in the Secondary School	6
EDTL:4811	Introduction and Practicum: Secondary Social Studies	3
EDTL:4870	Methods: Secondary Social Studies	3
EDTL:4900	Foundations of Special Education	3
EPLS:3000	Foundations of Education	3
EPLS:4180	Human Relations for the Classroom Teacher	3
PSQF:6200	Educational Psychology	3

Comprehensive Examination

Candidates select one faculty member from each concentration area to serve as a committee member responsible for creating and reviewing a question for the written exam. Committee members are selected in consultation with a candidate's advisor. The required comprehensive examination consists of three two-hour written exams, one on each of the three concentration fields.

TEP: Secondary Education

Graduate students may be admitted to a program leading to teacher licensure/certification as "certification only" candidates in the Graduate College. They are subject to all Graduate College policies; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website. Eligible graduate students also may complete initial teacher licensure/certification requirements by earning an M.A.T. in teaching and learning (social studies education).

Admission

Applicants must meet the admission requirements of the Graduate College. They should have a bachelor's degree in education, history, or one of the social sciences from an accredited institution; a cumulative g.p.a. of at least 3.00; a g.p.a. of at least 3.00 in history and/or social science courses; and two letters of recommendation. Evidence of writing ability in a completed major paper or essay also is required.

World Language Education

The Master of Arts in Teaching in teaching and learning with a world language education subprogram requires a minimum of 54 s.h. of graduate credit. Students must maintain a g.p.a. of at least 3.00 while enrolled in the program.

The program is designed for superior liberal arts and sciences graduates who have had few or no professional education courses. Successful completion of the program leads to elementary and/or secondary teacher licensure. The M.A.T. is available in Chinese, French, German, Japanese, Latin, and Spanish.

Students must take 24 s.h. of post-secondary coursework in their language of licensure to obtain their teaching license. This work can be taken prior to entry into this program as part of an undergraduate degree program.

The M.A.T. in teaching and learning with a world language education subprogram requires the following work. Students also must complete at least 9 s.h. in graduate coursework either in the language department corresponding to their language of licensure or in world language teaching.

Professional Education

Code	Title	Hours
All of these:		
EDTL:3002	Technology in the Classroom (must be taken during student's first semester in the college)	2
EDTL:3091	Secondary Education Program Orientation and Classroom Management	3
EDTL:3095	Teaching Reading in Secondary Content Areas (must be taken during student's first semester in the college)	1,3
EDTL:4900	Foundations of Special Education	3
EPLS:3000	Foundations of Education	3
EPLS:4180	Human Relations for the Classroom Teacher	3
PSQF:6200	Educational Psychology	3

World Language Teaching

Students complete these courses (at least 28 s.h.).

Code	Title	Hours
All of these:		
EDTL:4406	Foreign Language Education Practicum I	3
EDTL:4407	Foreign Language Education Practicum II	3
EDTL:4416	Learning to Teach Second Languages I	3
EDTL:4417	Learning to Teach Second Languages II	3
EDTL:6483	Multilingual Education and Applied Linguistics	3

The following courses are taken concurrently and constitute the student teaching semester:

EDTL:4087	Seminar: Curriculum and Student Teaching	1, 3
EDTL:4091	Observation and Laboratory Practice in the Secondary School	6
EDTL:4092	Observation and Laboratory Practice in the Secondary School	6

K-12 Licensure

The K-12 licensure option requires the following course.

Code	Title	Hours
EDTL:4089	Special Subject Area Student Teaching	1-4

Comprehensive Examination

A comprehensive examination is required. The examination reflects a candidate's depth and breadth of knowledge in world language education, including but not limited to theory and practice as well as knowledge of and proficiency in the target language and/or literature of the candidate's choice. The candidate and the advisor discuss the exam's content and format eight months before the exam.

TEP: Secondary Education

Graduate students may be admitted to a program leading to teacher licensure/certification as "certification only" candidates in the Graduate College. They are subject to all Graduate College policies; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website. Eligible graduate students also may complete initial teacher licensure/certification requirements by earning an M.A.T. in teaching and learning (world language education).

Admission

Applicants must meet the admission requirements of the Graduate College. They must have been granted a bachelor's degree with a major or a strong concentration in a second language and must have an undergraduate g.p.a. of at least 3.00. They also must meet all Teacher Education Program (TEP) application requirements.

ESL Endorsement

An ESL endorsement enables an individual to teach English as a Second Language in K-12 in the state of Iowa. Because teaching endorsements are additional areas of expertise added to a teaching license, applicants must be current students in a Teacher Education Program (TEP) or licensed in-service teachers.

Admission

Applicants to the ESL endorsement program must submit a one-page essay explaining why they wish to teach ESL and a transcript of all university-level coursework, along with the English as a Second Language Added Endorsement Program K-12 application. Applicants whose first language is not English must provide evidence of a minimum score of 26 (internet-based) on the speaking section of the Test of English as a Foreign Language (TOEFL) and have completed one of the following.

Code	Title	Hours
	Four semesters of commonly taught languages such as French, German, Hebrew, Italian, Portuguese, Russian, or Spanish; or a proficiency level of Intermediate Low on the ACTFL Guidelines	
	Three semesters of less commonly taught languages such as Arabic, Chinese, or Japanese; or a proficiency level of Novice High on the ACTFL Guidelines	
LING:3001	Introduction to Linguistics (with a grade of B or higher)	3

Applicants are admitted to the ESL endorsement program twice a year; application deadlines are October 1 and March 1.

Teaching and Learning, M.S.

Science Education

The Master of Science in teaching and learning with a science education subprogram requires a minimum of 38 s.h. of graduate credit. Students must maintain a g.p.a. of at least 3.00 while enrolled in the program.

The program is designed for teachers and supervisors (K-college) and professionals in related fields, such as medical education, college teaching, museum program management, and outreach programs. It is intended to provide experience in understanding teaching and learning and the research processes required to advance the field. Students complete coursework in four areas: science education, education, research, and science. Their individual programs of study are approved by the science education faculty.

The M.S. in teaching and learning with a science education subprogram requires the following coursework.

Required Courses

Code	Title	Hours
All of these:		
EDTL:6757	Learning in the Science Classroom (no substitute for this course)	3
EDTL:6759	Advanced Pedagogy (no substitute for this course)	3
EDTL:7755	Independent Study in Science Education Research (taken two times for 3 s.h. each)	6
Two science content courses chosen in consultation with advisor		6
A minimum of 12 s.h. chosen from these:		
EDTL:6758	Writing in the Science Classroom	3
PSQF:4143	Introduction to Statistical Methods	3
PSQF:6200	Educational Psychology	3
PSQF:6220	Quantitative Educational Research Methodologies	3
PSQF:6275	Constructivism and Design of Instruction	3
RCE:7338	Essentials of Qualitative Inquiry	3
One additional qualitative or quantitative research methods course chosen in consultation with advisor		
May include one of these:		
EDTL:7004	Schooling in the United States	3
EDTL:7033	Seminar on Teacher Education	3

Thesis

Students must complete a thesis, for which they earn 2-4 s.h. of credit.

Code	Title	Hours
EDTL:6393	Master's Thesis	2-4

Final Examination

A final oral examination is administered on campus in which candidates defend their thesis. This examination includes a critical inquiry into the purposes, methods, and results of the thesis research investigation.

The final examination is conducted by a committee of no fewer than three members of the graduate faculty. In some cases, the committee must include a member from outside science education; consult the department.

Admission

Applicants must meet the admission requirements of the Graduate College. They should hold an undergraduate major in a science area (or combination of science areas), in science education, or in elementary education with a science emphasis. The department recommends that applicants have teaching licensure/certification unless they are preparing for careers in allied health, museums, or community colleges.

STEM Education

The Master of Science in teaching and learning with a STEM education subprogram requires 36 s.h. of graduate credit. Students must maintain a g.p.a. of at least 3.00 while enrolled in the program.

The program focuses on science, technology, engineering, and mathematics (STEM) education. The program includes coursework that may be used toward the K-12 STEM specialist endorsement. Degree requirements include online coursework to fit the schedule of a practicing teacher. The STEM education subprogram is not a licensure program.

The M.S. in teaching and learning with a STEM education subprogram requires the following coursework.

Required Courses

STEM Pedagogy Courses

Code	Title	Hours
All of these:		
EDTL:6563	STEM Through Mathematical Modeling	3
EDTL:6761	STEM Research and Leadership Seminar	3
EDTL:6762	STEM Experiential Learning	3
EDTL:6764	STEM Extracurricular Experience and Capstone	6

College of Education Course

Code	Title	Hours
This course:		
EDTL:5095	Issues in U.S. Schools	3

Science/Mathematics Courses

Code	Title	Hours
Two of these:		
EDTL:4565	Mathematics in Management and Social Sciences	3

EDTL:4768	Computer Science Methods	3
EDTL:6766	Physical Science Topics in STEM Education	3
EDTL:6767	Systems Thinking in Biology and Integrated STEM Education	3
This course:		
EDTL:6765	STEM Independent Research (taken two times for 3 s.h. each)	6

- international applicants whose first language is not English must score at least 81 (internet-based) with a minimum score of 600 on the Test of English as a Foreign Language (TOEFL) or a minimum International English Language Testing System (IELTS) score of 7.0 (with no subscore lower than 6.0).

Teaching licensure/certification is recommended for the M.S. degree and required if the candidate seeks the K-12 STEM specialist endorsement from the Board of Educational Examiners (BOEE).

Additional Coursework

Code	Title	Hours
At least two of these (chosen in consultation with an advisor):		
EDTL:5085	Generation Innovation: Technology Integration in 21st-Century K-12 Schools	3
EDTL:5090	Diversity and Identity in K-12 Schools	3
EDTL:5535	Current Issues in Mathematics Education	3
EDTL:6534	Foundations of Mathematics Education	3
EDTL:6570	Foundation of School Mathematics Curriculum	3
PSQF:4143	Introduction to Statistical Methods	3
PSQF:6200	Educational Psychology	3

K-12 STEM Specialist Endorsement

The University of Iowa does not offer a state-approved program for the K-12 STEM Specialist endorsement. In addition to the master's degree, teachers must have met the requirements for a standard Iowa teaching license with endorsement in mathematics, science, engineering, industrial technology, or agriculture. They must demonstrate completion of 12 s.h. of science and 12 s.h. of math content coursework (including computer science), which may include content coursework completed as part of this subprogram as well as other college-level courses. In addition, they must have completed 3 s.h. of engineering or technological design coursework not included in this subprogram; ENGR:1100 Introduction to Engineering Problem Solving and ENGR:1300 Introduction to Engineering Computing may be options for the requirement. Once the courses are completed, teachers may apply to the Board of Educational Examiners for transcript analysis and to add the endorsement.

Admission

Applicants must meet the admission requirements of the Graduate College. These include:

- a bachelor's degree from a regionally accredited American college or university or an equivalent degree from another country as determined by the Office of Graduate Admissions with an undergraduate major in a given science or math area (or combination of science areas), science education, math education, or in elementary education with a science or math emphasis;
- a minimum g.p.a. of 3.00 or the foreign equivalent as determined by the Office of Graduate Admissions; and

Teaching and Learning, Ph.D.

Ph.D. Required Research Courses

Students admitted to doctoral programs must complete the program's research requirements.

Required Core Courses

All Ph.D. students in the Department of Teaching and Learning must complete one or both of the following core courses, depending upon program requirements.

Code	Title	Hours
EDTL:7004	Schooling in the United States	3
EDTL:7033	Seminar on Teacher Education	3

Cognate Areas

The following list of cognates offered by program areas in the department is not exhaustive; students may select cognates from this list, or they may customize their own cognate areas in consultation with their advisors.

Multilingual Education

Code	Title	Hours
This course:		
EDTL:6483	Multilingual Education and Applied Linguistics	3
Two of these, chosen in consultation with faculty:		
EDTL:6400	Fundamentals of Second Language Assessment	3
EDTL:6402	Second Language Program Management	3
EDTL:6403	Language Policy and Planning	3
EDTL:6409	Cultural Curriculum	3
EDTL:6480	Issues in Foreign Language Education	3
EDTL:6484	Reading in a Second Language	3
EDTL:6497	Principles of Course Design for Second Language Instruction	3

Gifted Education

Administrative Strand

Code	Title	Hours
Two of these, chosen in consultation with faculty:		
EPLS:4110	Administration and Policy in Gifted Education	2
EPLS:4111	Evaluation of Gifted Programs	1
EPLS:4113	Staff Development for Gifted Programs	1

Programming Strand

Code	Title	Hours
Both of these:		
EDTL:4066	Curriculum Concepts in Gifted Education	3
EDTL:4199	Program Models in Gifted Education	3

Psychology Strand

Code	Title	Hours
Two of these, chosen in consultation with faculty:		
RCE:4120	Psychology of Giftedness	3
RCE:4121	Identification of Students for Gifted Programs	3
RCE:4137	Introduction to Educating Gifted Students	3
RCE:5226	Assessment of Giftedness	3
RCE:5237	Seminar in Gifted Education	3

Language, Literacy, and Culture

Code	Title	Hours
Both of these:		
EDTL:7015	Ph.D. Seminar in Language, Literacy, and Culture (when topic is introduction to language, literary, and culture)	arr.
EDTL:7015	Ph.D. Seminar in Language, Literacy, and Culture (topic chosen in consultation with advisor)	arr.

General Emphasis

Code	Title	Hours
This course:		
EDTL:7008	Seminar: Research and Current Issues (topic chosen in consultation with advisor)	arr.

Elementary Emphasis

Code	Title	Hours
One of these:		
EDTL:6104	Literature for Children II	3
EDTL:6164	Early Literacy Development and Instruction	2-3
EDTL:6165	Reading and Writing Across Intermediate Grades	3

Secondary Emphasis

Code	Title	Hours
One of these:		
EDTL:3393	Reading and Teaching Adolescent Literature	3
EDTL:6315	M.A. Seminar: English Education	arr.

Mathematics Education

Code	Title	Hours
Both of these:		
EDTL:5535	Current Issues in Mathematics Education	1-3
EDTL:7535	Seminar: Research in Mathematics Education	arr.
Two of these:		
EDTL:6531	Technology in School Mathematics	2-3
EDTL:6534	Foundations of Mathematics Education	2-3
EDTL:6536	Teaching of Geometry	2-3
EDTL:6539	Teaching of Algebra	2-3

Science Education

Code	Title	Hours
All of these:		
EDTL:6757	Learning in the Science Classroom	2-3
EDTL:6759	Advanced Pedagogy	3

Special Education

Code	Title	Hours
All of these:		
EDTL:7945	Current Issues and Trends in Learning Disabilities	3
EDTL:7948	Contemporary Research in Behavioral Disorders	3
EDTL:7953	Seminar: Single Subject Design Research	3

Literacy, Culture, and Language Education

The Doctor of Philosophy in teaching and learning with a literacy, culture, and language education (LCLE) subprogram requires a minimum of 73 s.h. of graduate credit. All students must maintain a g.p.a. of at least 3.00 while enrolled in the program. Students may be able to use some coursework completed for their master's degree toward the Ph.D.; most courses for the Ph.D. should be numbered 5000 or above.

This interdisciplinary program brings together scholarly traditions and contemporary theory in multilingual education and applied linguistics, literacy and cultural studies, and social studies education. The program provides students with the necessary content area knowledge and research skills for independent research, program administration, and varied leadership positions in LCLE education. In consultation with their advisor, students create a program of study that fits their interests and professional aspirations.

The Ph.D. in teaching and learning with a literacy, culture, and language education subprogram requires the following coursework.

Required Courses

Code	Title	Hours
This course:		
EDTL:6015	Ph.D. Seminar: Literacy, Culture, and Language Education	3

One of these:		
EDTL:7004	Schooling in the United States	3

EDTL:7033	Seminar on Teacher Education	3
-----------	------------------------------	---

This course:		
EDTL:7093	Research Project	3

Disciplinary and Interdisciplinary Foundations

Students choose a disciplinary area in literacy education, multilingual education, or social studies education for their three foundational courses. They then select one or both of the other areas for their interdisciplinary foundation coursework.

Code	Title	Hours
All of these:		
At least three courses in a chosen area of concentration		9
At least two courses in other areas of concentration		6

Research Methods

Code	Title	Hours
Both of these:		
EDTL:7070	Qualitative Research Methods in Teaching and Learning	3
A LCLE research methods course (consult advisor)		3
One of these:		
PSQF:6242	Selected Applications of Statistics	3
PSQF:6243	Intermediate Statistical Methods (for students who utilize quantitative methods in their dissertation)	4

And:		
Two additional advanced research methods courses in quantitative, qualitative, or mixed methods in consultation with their advisor		6

Electives

Students choose 24 s.h. of elective coursework in consultation with their advisor. Courses may be taken in any department and can be partially or completely unified as a cognate area of study.

Comprehensive Examination

Upon completion of their coursework, students take their comprehensive exam. This is an opportunity for students to show a comprehensive understanding of the scholarship in the field. Successful completion of the exam identifies candidates who are ready for dissertation work.

Dissertation

After students pass their comprehensive exam, they consult with their advisor to choose a dissertation committee with at least five faculty members who approve the dissertation

proposal. After a successful defense of their dissertation, students conduct dissertation research in the following course.

Code	Title	Hours
EDTL:7493	Ph.D. Thesis	10

Admission

Applicants must meet the admission requirements of the Graduate College. They must have earned a bachelor's degree with an undergraduate g.p.a. of at least 3.00 on a 4.00 scale and earned a master's degree or have completed significant graduate coursework. It is recommended applicants have at least two years of teaching experience in a related field within or outside of the United States.

Application materials should include a statement of purpose, official transcripts from all institutions attended, a sample of academic writing, three current letters of recommendation, and the official report of Graduate Record Exam (GRE) General Test scores (however, the GRE requirement has been suspended for the 2020-21 admissions cycle). International applicants whose first language is not English, and do not meet the waiver requirements, must submit their Test of English as a Foreign Language (TOEFL) scores.

Mathematics Education

The Doctor of Philosophy in teaching and learning with a mathematics education subprogram requires a minimum of 80-90 s.h. of graduate credit. Students must have a cumulative g.p.a. of 3.00 or higher in all graduate work in mathematics, all University of Iowa graduate work in mathematics, all graduate work, and all University of Iowa graduate work.

The program prepares supervisors, teacher education personnel, community college personnel, and researchers in mathematics education. It is administered by the College of Education. Students must update graduate coursework completed more than 10 years before admission to the program.

The Ph.D. program in teaching and learning with a mathematics education subprogram requires the following coursework.

Required Courses

Students must complete EALL:5150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative coursework, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Students select from courses listed under Ph.D. Research Requirements on the College of Education website.

Core Course

Code	Title	Hours
One of these:		
EDTL:7004	Schooling in the United States	3
EDTL:7033	Seminar on Teacher Education	3

In addition, students must complete an approved cognate area; see "Additional Requirements" below.

Students must complete a minimum of 24 s.h. of graduate work in the Departments of Computer Science, Mathematics, and Statistics and Actuarial Science, as approved by their advisor. Electives are encouraged in the pure mathematics and applied mathematics sequences.

Students who completed their mathematics requirement at another institution must complete at least 6 s.h. of additional coursework in mathematics at the University of Iowa, chosen with advisor approval. They also must complete at least six courses in mathematics education, including EDTL:5535 Current Issues in Mathematics Education and EDTL:7535 Seminar: Research in Mathematics Education.

Additional Requirements

Students concentrate in two additional comprehensive examination areas in either the mathematical sciences or education. A minimum of three courses usually are required for a comprehensive examination area, but candidates should consult with faculty members in the areas selected to determine which courses they should take in order to adequately prepare for the examinations.

Students must complete a total of at least 36 s.h. in College of Education courses; this includes the coursework listed above. They must complete an approved cognate area; a partial list of potential cognate areas is available from the mathematics education program.

Comprehensive Examination

Students take three written comprehensive examinations, one in mathematics education and two in other fields of education or mathematics; an oral examination follows the written examinations.

Dissertation

Candidates complete a dissertation on a research problem in mathematics education. A prospectus of the proposed research must be presented to the dissertation committee before candidates undertake the study. Upon completion of the dissertation, candidates defend the dissertation in an oral examination. Students must earn dissertation credit in the following course.

Code	Title	Hours
EDTL:7493	Ph.D. Thesis	10

Admission

Applicants must meet the admission requirements of the Graduate College. They must have an undergraduate major in mathematics or the equivalent, a current teaching license/certificate, and at least two years of teaching experience are strongly preferred. A faculty review committee makes admission decisions.

Science Education

The Doctor of Philosophy in teaching and learning with a science education subprogram requires a minimum of 85 s.h. of graduate credit. Students must maintain a g.p.a. of at least 3.00 while enrolled in the program.

The program is designed for individuals who aspire to positions as college and university science educators; major supervisors in national, state, and local systems; teachers in small liberal arts colleges; instructors of general education science courses at major universities; research directors in

science education; and professionals in medical and/or allied health education.

The Ph.D. in teaching and learning with a science education subprogram requires the following coursework.

Required Courses

Students in science education must complete a minimum of 15 s.h. in qualitative and quantitative coursework, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Students select from courses listed under Ph.D. Research Requirements on the College of Education website. Course selections must be consistent with other requirements for the degree.

Core Courses

All doctoral students in science education must complete one or both of the following core courses. Students may not substitute other courses for these.

Code	Title	Hours
EDTL:7004	Schooling in the United States	3
EDTL:7033	Seminar on Teacher Education	3

In addition, all doctoral students in the Department of Teaching and Learning must complete an approved cognate area; see "Cognate Areas" under Ph.D. Required Research Courses [p. 1412] in this section of the Catalog.

Science Education

Code	Title	Hours
All of these (15 s.h.):		
EDTL:6757	Learning in the Science Classroom	3
EDTL:6758	Writing in the Science Classroom	3
EDTL:6759	Advanced Pedagogy	3
Graduate-level science education courses chosen in consultation with advisor		
		6

Education

Code	Title	Hours
Three courses chosen in consultation with advisor		9

Research in Science Education

Code	Title	Hours
Both of these (21 s.h.):		
EDTL:7750	Seminar: Science Education (taken three times for 1 s.h. each)	3
EDTL:7755	Independent Study in Science Education Research (taken six times for 3 s.h. each)	18

Science Area

Students complete a family of courses (total of 12 s.h.) in a major science area.

Dissertation

Students earn 10 s.h. of thesis credit in EDTL:7493 Ph.D. Thesis.

Admission

Applicants must meet the admission requirements of the Graduate College. They should have completed a bachelor's degree in a science area (or combination of science areas), in science education, or in elementary education with a science emphasis; have a cumulative g.p.a. of at least 3.00 on undergraduate and graduate work; and have a combined score of at least 300 on the verbal and quantitative portions of the Graduate Record Exam (GRE) General Test (however, the GRE requirement has been suspended for the 2020-21 admissions cycle). Applicants must submit three letters of recommendation; a statement of purpose describing their reasons for pursuing graduate work and their goals for graduate study; and an example of their academic writing.

Special Education

The Doctor of Philosophy in teaching and learning with a special education subprogram requires a minimum of 90 s.h. of graduate credit. Students must maintain a g.p.a. of at least 3.00 while enrolled in the program.

The program prepares students for teaching and research positions in higher education, and for curriculum, supervisory, and research positions in state and local education agencies. The program permits students to study and practice extensively in their special education interest area and in an interest area outside of special education.

The Ph.D. curriculum includes an emphasis on research skills, all facets of special education, an approved cognate area, and at least one specialization area.

Required Courses

Code	Title	Hours
This course:		
EALL:5150	Introduction to Educational Research	3

Quantitative Research Requirements

Code	Title	Hours
Both of these:		
PSQF:4143	Introduction to Statistical Methods	3
PSQF:6243	Intermediate Statistical Methods	4
Two of these:		
EPLS:6206	Research Process and Design	3
PSQF:6220	Quantitative Educational Research Methodologies	3
PSQF:6244	Correlation and Regression	4
PSQF:6246	Design of Experiments	4
PSQF:6247	Nonparametric Statistical Methods	3
PSQF:6249	Factor Analysis and Structural Equation Models	3
PSQF:6252	Introduction to Multivariate Statistical Methods	3

Qualitative Research Requirements

Code	Title	Hours
This course:		
EDTL:7953	Seminar: Single Subject Design Research	3
One of these:		
EDTL:7410	Mixed Methods Research	3
EPLS:7373	Qualitative Research Design and Methods	3

Core Course

Code	Title	Hours
One of these:		
EDTL:7004	Schooling in the United States	3
EDTL:7033	Seminar on Teacher Education	3

Proseminar Courses

Code	Title	Hours
All of these:		
EDTL:7943	Proseminar: Issues, Trends, and Research in Special Education	3
EDTL:7944	Proseminar: Issues, Trends, and Research in Special Education II	3
EPLS:6236	Administration of Students with Special Needs	3

Seminar Requirements

Code	Title	Hours
Both of these:		
EDTL:7945	Current Issues and Trends in Learning Disabilities (Both of these:)	3
EDTL:7948	Contemporary Research in Behavioral Disorders	3

Practicum Requirement

Code	Title	Hours
One of these (3 s.h.):		
EDTL:7380	Practicum in College Teaching	arr.
EDTL:7092	Field Service Project	arr.

Cognate

Students also must complete a cognate in a discipline outside of special education (minimum of 9 s.h.).

Comprehensive Examination and Dissertation

In addition, students are required to write the comprehensive examination and complete a doctoral dissertation, earning a minimum of 10 s.h. in the following course.

Code	Title	Hours
EDTL:7493	Ph.D. Thesis	10

Admission

Applicants must meet the admission requirements of the Graduate College. They must have a master's degree or equivalent in special education; those without an M.A. thesis must have completed an equivalent project. Applicants should have a graduate g.p.a. of at least 3.50 and a combined verbal and quantitative score of at least 300 on the Graduate Record Exam (GRE) General Test; however, the GRE requirement has been suspended for the 2020-21 admissions cycle. Applicants whose first language is not English must score at least 100 (internet-based) on the Test of English as a Foreign Language (TOEFL). Applicants should have at least one year of full-time teaching experience with exceptional children; several years are preferred.

Application materials must include a completed Graduate College application form, copies of official transcripts for all college coursework, an official report of Graduate Record Exam (GRE) General Test scores, three current letters of recommendation, and evidence of experience and/or teacher licensure/certification. An interview may be requested.

Final admission decisions are made by the special education graduate admissions committee.

UI REACH

Director

- William Loyd Jr.

Faculty: <https://education.uiowa.edu/directories>

Website: <https://education.uiowa.edu/services/reach>

Program of Study

UI REACH (Realizing Educational and Career Hopes) is a transition certificate program for college students with disabilities, such as autism, intellectual disabilities, and learning disabilities. The program prepares young adults to become independent and contributing members of the community. Coursework, campus life, and career experiences help students to reach their full potential.

The UI REACH experience integrates academic enrichment, career development, student life, and transition to create a dynamic collegiate opportunity. A few of the program offerings include:

- integrated, Big Ten University experience with on-campus residence hall living;
- individualized weekly advising with professional staff;
- specialized core curriculum delivered by quality College of Education instructors;
- inclusive academic learning opportunities including traditional classes for credit or audit;
- employment preparation and career development;
- community-based internships and employment opportunities with local businesses;
- access to over 500 student organizations and numerous inclusive campus activities;
- on-call emergency 24-hour support;
- scholarships and other financial aid options;
- a four-year certificate with second- and third-year certificate options; and
- events around the country to reconnect for current students, alumni, and families.

For more information, visit the UI REACH website.

Courses

UI REACH Courses

REA:0010 Social Skills I **2 s.h.**

Basic interpersonal skills needed to succeed in academic, social, and employment environments; structured learning process for gaining discrete social skills necessary to initiate and maintain conversations in a variety of settings; awareness of feelings and cues in conversation to respond appropriately and have successful reciprocal interactions; lectures, modeling, role play, and practice in the community.

REA:0020 Computers and Technology I **2 s.h.**

Training in computer literacy and practical skills for computer use in everyday life; computer parts and functions, the Windows operating system, computer applications; use of the personal computer to improve personal, academic and workplace productivity; group discussion, demonstrations, and multimedia experience support diverse learning styles.

REA:0021 Computers and Technology II **2 s.h.**

Builds on REA:0020; fundamental computer competencies and strategies to simplify everyday life and enhance workplace performance; opportunity to improve practical skills for the workplace, communication with others, and daily life; tools for improving personal organization and communication and for meeting academic, entertainment, and workplace needs; group discussion, demonstration, independent exploration, and a multimedia experience support diverse learning styles.

REA:0022 Assistive Technology Applications **1 s.h.**

How to access and employ current assistive technology applications to support lifelong learning, academic skill building, vocational experiences, and independent community living; how functional assistive technology and adaptive tools can maximize personal achievement and independence for individuals of varied abilities; students explore and operate assistive technology tools including, but not limited to, text readers, voice-to-text, cognitive aids, and navigation.

REA:0030 Health and Wellness I - Exploration **2 s.h.**

Importance of health and wellness, personal relationships, sexuality and making healthy choices; overview of health and wellness topics college students face—nutrition, substance use, risky behaviors, personal relationships, sexual health, mental health.

REA:0031 Health and Wellness II - Healthy Lifestyles **2 s.h.**

Health and wellness personalized for students; help in assessing individual health and wellness decisions and behaviors to improve current and long-term health and wellness; small group discussion, individual assessments, real-life exploration, interactions with health educators, one-on-one student support; second in a series.

REA:0040 Personal Finance and Math I **2 s.h.**

Understanding of numbers, operations, and managing personal finances; computation strategies, problem-solving strategies, skills for good consumers; opportunity to practice math skills in the community and the workplace; first in a series.

REA:0041 Personal Finance and Math II **2 s.h.**

Skills and knowledge needed for managing personal finances; banking, budgeting, insurance, how to be a good consumer; students plan for their financial future by studying paycheck information, actual income, and tax responsibility; research on independent living costs; second in a series.

REA:0050 Lifetime Reading and Writing **2 s.h.**

Enhancement of leisure reading; library visit to discover interesting genres, activities to review books, discussion of components (e.g., plot, characters); techniques of good readers; writing tools for success in daily living; writing forms including short organizational forms (e.g., to-do lists, grocery lists), family correspondence, business letters; observation and demonstration of writing techniques; use of writing as a form of self-expression, organization, and communication with others.

REA:0062 Social Skills II **2 s.h.**

Continuation of REA:0010; more advanced relationship skills that require self-regulation; self-awareness; applying skills for communicating under stress; structured learning process including repetitive practice and modeling as key components.

- REA:0070 Life Skills I - Transitions** 2 s.h.
Components of successful independent and community living; personal safety issues, effective communication skills for interacting with peers and college personnel, how to access broad community resources for living, work, and leisure; students develop a plan for personal daily routines; classroom activities, practical experiences on campus and in the community.
- REA:0072 Life Skills II - On Your Own** 2 s.h.
Goal setting and planning for independent living after college; how to use daily living skills from college in students' planned home communities; skills required for finding and managing a home or apartment, using community resources and agencies, and meeting basic needs; how to be interdependent and independent in the community.
- REA:0073 Life Skills III - Transition Planning** 2 s.h.
Work on transition plan during spring semester of final year—goal setting and planning for independent living after college; how to use daily living skills from college in students' planned home communities; using community resources and agencies; meeting basic needs; how to be interdependent and independent in student's home community; identification of transition team members; plan and lead transition meeting.
- REA:0074 Household Management II** 3 s.h.
Continuation of REA:0075; preparation for independent apartment living; experiential training, assessment to determine support needs; apartment living, personal care, value shopping and budgeting, preparing meals, successful community living.
- REA:0075 Household Management I** 3 s.h.
Independent living skills introduced in the life skills and health and wellness courses; hands-on experience in room care, clothing care, food/kitchen safety, meal planning and nutrition, food preparation, simple recipes, grocery shopping, event planning.
- REA:0076 Community Leisure and Advocacy** 1 s.h.
Utilizing community resources while promoting self-advocacy and leadership; student support for transitioning from a university setting to community living; exploration of community resources related to recreation, entertainment, and independent living using multiple media sources for information gathering; field trips to investigate local resources; research related resources within students' home communities. Requirements: enrollment in UI REACH program.
- REA:0078 Historical Documentary Making** 2 s.h.
History of disabilities (learning and physical disabilities); ground work for making a historical documentary; desktop documentary software used by student teams to produce documentaries on history of disability rights movement. Requirements: enrollment in UI REACH program.
- REA:0079 Service Learning** 2 s.h.
Classroom-based learning combined with community service; available resources and ways to better a community; assessment of community needs, research volunteer organizations, service-learning opportunities within the community.
- REA:0090 Current Events** 1-2 s.h.
Forum to increase knowledge and ability to comment on current events; voting and political process, civic responsibilities in the local and federal elections process, how students can participate; use of various forms of media (i.e., print, broadcast, internet) to develop critical thinking skills related to awareness of current events and their impact; personal safety issues; effective communication skills for interacting with peers and college personnel.
- REA:0100 Career Exploration** 4 s.h.
Opportunity to explore, enhance, or broaden work interests, skills, and potential career opportunities; interest inventories, review of vocational experiences, interactive employer presentations, informational interviews, job site experiences; focus on self-assessment of one's individual vocational strengths.
- REA:0101 Job Search Strategies** 2 s.h.
Fundamental tools and techniques for getting a job; students create a résumé, including references and updated work history; interview techniques, information gathering, thank-you letters, work-related vocabulary, appropriate behaviors and attitudes for a successful job search; role playing, demonstrations, real-world practice.
- REA:0103 Job Search Strategies II** 2 s.h.
Continuation of REA:0101; update résumés, references, and cover pages; appropriate behaviors and attitudes for successful job search; seek and apply for jobs with assistance from instructor.
- REA:0200 Business Support Seminar** 1 s.h.
Aspects of careers in business support; office procedures, word processing skills, oral and written communication, records management, business terminology.
- REA:0202 Education Career Seminar** 1 s.h.
Aspects of careers in education; additional training typically required for careers in education, child/student needs, lesson planning.
- REA:0203 Health Services Seminar** 1 s.h.
Aspects of careers in health services; office procedures and equipment, customer service skills, terminology used in health care environments.
- REA:0204 Hospitality Seminar** 1 s.h.
Aspects of careers in hospitality; customer service skills, phone and counter etiquette, vocabulary used in the hospitality industry.
- REA:0205 Human Services Seminar** 1 s.h.
Aspects of careers in human services; types of human services environments, interpersonal relationships and boundaries, paperwork requirements, terminology commonly used in human services environments.
- REA:0207 Marketing/Sales Seminar** 1 s.h.
Aspects of careers in marketing and sales; customer service skills, use of retail equipment, marketing techniques and the importance of product appearance, pricing and advertising, vocabulary used in a retail sales environment.
- REA:0208 Parks and Natural Resources Seminar** 1 s.h.
Aspects of careers in parks and natural resources management; operation and maintenance of equipment, safety procedures, customer service skills, typical vocabulary for positions involving care and management of shrubs, trees, flowers, and turf.

- REA:0209 Skilled Trades Seminar** 1 s.h.
Aspects of careers in the skilled trades; occupational skill standards in specific skilled trades, apprenticeships or advanced training required, safety in the workplace, vocabulary typical for specific skilled-trade work environments.
- REA:0210 Information/Technology Seminar** 1 s.h.
Aspects of careers in information technology; occupational skill requirements and standards, knowledge of typical equipment employees must operate, safety in the workplace, typical vocabulary for information technology work environments.
- REA:0211 Culinary Arts Seminar** 1 s.h.
Different types of careers in the food industry; workplace skills and tasks; continuing training and education options; equipment and food safety; basic preparation steps, food presentation, place settings; field trips. Requirements: enrollment in UI REACH program.
- REA:0213 Recreation Seminar** 1 s.h.
Aspects of careers in recreation, training and education requirements, tasks at work, and job prospects.
- REA:0220 Digital Citizenship** 2 s.h.
Making informed choices regarding media and technology in a digital age; exploration of media balance and well-being, online communication and relationships, privacy and security, and the impact of a digital footprint; responsible decision making and communication methods in an online world. Prerequisites: REA:0020.
- REA:0250 Academics and Life Skills Exploration I** 1-3 s.h.
Expand basic academic and/or life skills with discovery, experiential learning, progress monitoring, and self-reflection; focus on strengthening foundational skills in practical academics and life skills; first of a two-part series.
- REA:0251 Academics and Life Skills Exploration II** 1-2 s.h.
Builds on basic academic and/or life skills explored in REA:0250; UI REACH instructors and university faculty work together to enhance learning opportunities while providing explicit, interactive learning opportunities; progress monitoring, reflection, and focus on maintenance of basic academic and life skills; second of a two-part series.
- REA:0252 Academics and Life Skills Enrichment I** 1-3 s.h.
Broaden and diversify academic and student life experiences; address specific interest areas of students; focus on communication, relationships, academics, and independent life; individualize, extend, and provide depth to student's current level of knowledge and skills.
- REA:0253 Academics and Life Skills Enrichment II** 1-2 s.h.
Builds on extended and diversified learning opportunities provided in REA:0252; transfer of skills and knowledge to new situations and environments encountered as students transition to workplace and home communities.
- REA:0300 Internship I - Prep** arr.
Introduction to functional skills, job expectations, environments of the workplace; students venture out into the community and see first-hand what a specific career or job entails; role of the influencer; small groups, job shadowing, tryouts—depending on individual needs and abilities; create a résumé; summer job searching skills; preparation for Internship II—applications, interviews, contacting employers.
- REA:0301 Internship II** arr.
Internship experience leading to increased independence in the workplace (e.g., more independent operation of equipment, socialization, workplace safety, problem solving, conflict management); opportunity to acquire additional workplace skills in the student's career emphasis area; employers and mentors guide students in fulfilling their job responsibilities; students maintain a journal and discuss their experience with their advisor or instructor; second of three consecutive internships.
- REA:0302 Internship III** arr.
Internship experience with opportunities to develop more advanced skills for independent communication, problem solving, and workplace performance in the student's career emphasis area; employers and mentors observe the student in the workplace; students maintain a journal and discuss their experience with their advisor or instructor; third of three consecutive internships.
- REA:0303 Internship IV** arr.
Individualized community work experiences with periodic classroom seminars; building independent work skills, such as researching bus routes and emailing weekly journals; students, instructors, and employers evaluate student's work performance.
- REA:0304 Internship V** arr.
Continuation of REA:0303; community work experiences with periodic classroom seminars; emphasis on work skills in student's career area of choice; soft skills needed to be an independent worker.
- REA:0305 Advanced Internship** arr.
Development of advanced workplace skills in time management, communication, problem solving, and performance; one or more internships individualized to meet needs for further workplace soft skill development; observation in workplace by instructors, employers and mentors; journaling and discussion of experience with UI REACH staff; tracking time via method that works for individual needs; internship experiences and classroom seminars; emphasis on work skills in any career area and soft skills needed to be an independent worker. Requirements: UI REACH fourth-year enrollment.
- REA:0325 Computer and Technology Literacy I** 2 s.h.
Self-paced course to improve personal, academic, and career computer literacy and skills; online learning modules and computer-based programs to increase computer skills; email and internet searching, online learning options, online banking and purchasing, Microsoft Office programs, and online career resources.
- REA:0326 Computer and Technology Literacy II** 2 s.h.
Self-paced course builds on skills learned in REA:0325; extends and provides depth to student's current level of skill; coursework focuses on enhancing personal, academic, and career computer literacy; group discussion, demonstration, independent exploration, and practice to further develop computer skills; email, online career resources, Google Drive, social networking, and budgeting.
- REA:0501 Special Topics** arr.
Topics include leisure resources, current events, science, family life, consumerism, community involvement, self-determination, self-advocacy, leadership, assistive technology, mentoring; course assignments, instruction, and student assessment in classroom and/or community settings; may be required or elective course.

College of Engineering

Dean

- Harriet Nembhard

Associate Dean, Academic Programs

- Nicole M. Grosland

Interim Associate Dean, Graduate Programs and Research

- H.S. Udaykumar

Director, Center for Bioinformatics and Computational Biology

- Thomas L. Casavant

Codirectors, Iowa Institute for Biomedical Imaging

- Colin P. Derdeyn, Milan Sonka

Director, IIHR—Hydroscience and Engineering

- Gabriele Villarini

Director, University of Iowa Technology Institute

- Karim Abdel-Malek

Undergraduate degree: B.S.E.

Undergraduate certificates: naval science and technology; technological entrepreneurship

Graduate degrees: M.S.; Ph.D.

Graduate certificate: sustainable water development

Website: <https://www.engineering.uiowa.edu/>

Engineers play an important role in modern society. They design and develop new and improved materials, products, and processes ranging from nanoparticles to antibiotics to major bridges and dams. Engineers are in demand across a broad spectrum of industry, spanning traditional fields such as mechanical and electrical engineering to the emerging fields of artificial intelligence and medicine. Engineers not only satisfy society's demand for improved performance, reliability, and safety of products, they also supply solutions for unforeseen societal consequences that may arise as the result of new technologies.

The College of Engineering has six academic departments: the Roy J. Carver Department of Biomedical Engineering [p. 1433] and the Departments of Chemical and Biochemical Engineering [p. 1446], Civil and Environmental Engineering [p. 1462], Electrical and Computer Engineering [p. 1481], Industrial and Systems Engineering [p. 1500], and Mechanical Engineering [p. 1516].

Moreover, research and educational activities of the college are supported by four research centers and institutes: the Center for Bioinformatics and Computational Biology, the Iowa Institute for Biomedical Imaging, IIHR—Hydroscience & Engineering, and the University of Iowa Technology Institute.

Programs

Undergraduate Programs of Study

The College of Engineering offers the Bachelor of Science in Engineering [p. 1426] (B.S.E.) with majors in biomedical [p. 1433], chemical [p. 1446], civil [p. 1462], electrical [p. 1481], computer science and engineering, environmental [p. 1474], industrial [p. 1500], and mechanical [p. 1516] engineering. For information about each B.S.E. major, see the Catalog's College of Engineering department sections.

The college also offers combined undergraduate degree programs with the College of Liberal Arts and Sciences and the Tippie College of Business; a dual degree with the University of Northern Iowa; a combined bachelor's/master's degree program in each engineering discipline; and a combined bachelor's/master's degree with the School of Urban and Regional Planning (also see the graduate Certificate in Transportation Studies [p. 1632] in the Graduate College). For additional information, see "Combined and Dual Degrees" in the Bachelor of Science in Engineering [p. 1428] section of the Catalog.

In addition, the College of Engineering offers an undergraduate Certificate in Naval Science and Technology [p. 1531], and partners with the Tippie College of Business to offer a Certificate in Technological Entrepreneurship [p. 1535] for undergraduate engineering students.

Graduate Programs of Study

The College of Engineering offers graduate degree programs, the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) in biomedical engineering [p. 1433], chemical and biochemical engineering [p. 1446], civil and environmental engineering [p. 1462], electrical and computer engineering [p. 1481], industrial and systems engineering [p. 1500], and mechanical engineering [p. 1516]. See the College of Engineering Graduate Studies website for an overview, and the departmental sections in the Catalog for information about specific areas of research and study, admission and degree requirements, and financial support for the graduate programs. The College of Engineering also offers the graduate Certificate in Sustainable Water Development [p. 1532].

In addition, the college administers the M.S. in engineering and information technology [p. 1431].

High School Program of Study

FIRST: FTC

For Inspiration and Recognition of Science and Technology (FIRST) gives students the opportunity for real-world application of science, technology, engineering, and math (STEM) concepts. Students participate in an atmosphere that encourages team building, entrepreneurship, and sportsmanship. FIRST Tech Challenge (FTC) allows teams of students to be responsible for designing, building, and programming robots to compete in an alliance format against other teams. Teams are required to develop strategy and build robots based on sound engineering principles. Students learn about working in a team environment, effective communication skills, the ability to fail and succeed at the same time, and competing fairly while being supportive of their competition.

Facilities and Resources

College of Engineering Facilities

Seamans Center for the Engineering Arts and Sciences

The Seamans Center for the Engineering Arts and Sciences is home to the College of Engineering. In addition to faculty offices, classrooms, conference rooms, instructional laboratories, and faculty offices, the Seamans Center houses the Lichtenberger Engineering Library, the Hanson Center for Technical Communication, a machine shop, electronic shop, student work spaces, computational facilities, and research laboratories. A number of classrooms and open spaces located throughout the building were designed to readily accommodate collaborative work.

Engineering Student Services

The professional staff of Engineering Student Services administer student services for the College of Engineering, including advising, tutoring, student records, and global engineering. It also is the administrative home of Engineering Career Services and the Hanson Center for Technical Communication.

Engineering Career Services

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development. Engineering Career Services offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, job offer evaluation, and much more. They are committed partners with the Pomerantz Career Center and facilitate on-campus interviewing and administration of the University's online recruiting system, Handshake.

Hanson Center for Technical Communication

The Hanson Center for Technical Communication (HCTC) is an endowed program that works closely with engineering faculty to create, manage, and grade writing assignments across the curriculum. In addition, the HCTC is home to an innovative writing center that conducts hundreds of one-on-one and team tutoring sessions each year. The center's director and assistant director supervise professional writing consultants and peer tutors.

HCTC writing consultants are University of Iowa graduate and doctoral students. They grade hundreds of lab reports, topical papers, and technical essays each semester. Using course-specific rubrics created by the director, they provide individualized feedback throughout the writing process.

HCTC peer tutors are undergraduate engineers who have shown exceptional promise as communicators. In addressing global concerns (organization, clarity, and relevant analysis), they help their fellow students transform rough drafts into persuasive, logical documents.

Global Engineering

Many of today's top employers have an international reach and are seeking engineering graduates with global experiences and competencies in order to effectively interact with colleagues and customers around the world. Successful engineers are able to communicate across cultures, work on diverse teams, and productively deal with issues and conflicts arising from difference.

University of Iowa engineering students have a variety of opportunities to study or pursue internships or research abroad. Students can enroll in credit-bearing courses in English to fulfill engineering or general education requirements or earn credits toward a minor in another discipline or world language. In addition to completing coursework abroad, engineering students can pursue experiential opportunities abroad, including global internships, conducting independent research in other countries, and volunteering. The College of Engineering and the University support these endeavors by offering a variety of scholarships and financial aid.

In addition to completing coursework abroad, engineering students can pursue additional opportunities abroad, such as global internships, conducting research in other countries, and volunteering. The College of Engineering and the University support these endeavors by offering a variety of scholarships and financial aid.

Engineering Computer Services

Engineering Computer Services (ECS) provides **information technology** administration for curricular, administrative, and research computing at the College of Engineering. The college has three drop-in computer labs with 225 high-end Linux and Windows computer workstations with graphics processing unit (GPU) support, a 24-seat computer classroom, a 45-seat machine learning and virtual reality-capable computer classroom, and a 400-seat virtual computer lab with GPU support that students can access from the internet. Numerous public domain and commercial engineering applications support the full range of engineering classes. Software is regularly upgraded, and hardware is refreshed at least every four years. The college's computer labs are open 24 hours a day, every day of the year.

Engineering Electronics Shop

The Engineering Electronics Shop (EES) is a full-service electronics facility that supports sales and service for the College of Engineering, the University, and the surrounding area. EES provides design, construction, repair, calibration, and preventive maintenance services for teaching and research laboratories. EES maintains more than 10,000 parts in stock, including electronic components, computer and office supplies, and lockers for rent. The shop has laser cutting/etching equipment, 3-D printers, and a poster-plotting service.

Engineering Machine Shop

The Engineering Machine Shop (EMS) is a full-service, light manufacturing facility that supports curricular, research, and operational needs of the College of Engineering and the University. EMS provides professional design and fabrication services and gives students, staff, and faculty controlled access to a student shop that contains a variety of manufacturing equipment. The shop has a high resolution 3-D scanner, commercial 3-D printers, a waterjet, a full wood shop, welding, and multi-axis CNC machines.

Lichtenberger Engineering Library

The Lichtenberger Engineering Library is a branch of the University of Iowa Main Library and is a center of engineering college activity. Its collections include more than 140,000 volumes and electronic full-text access to over 5,000 engineering and scientific journals. It offers electronic access to primary engineering and scientific indexes and abstracts, and full-text access to standards and U.S. patents. The library also maintains a substantial collection of publications from major engineering societies and a collection of national and international standards.

Tools also are available for check out to students and faculty in order to allow for more hands-on projects and use in class assignments. Example tools include screwdrivers, scales, and light meters. The library provides 35 computer workstations with specialized software packages and a significant amount of study space for students. Study spaces allow for individual as well as group study. The library features individual study carrels, group tables, lounge chairs, a collaborative work station, and movable whiteboards. Library personnel are available to assist with specialized engineering-related reference and informational questions. Personnel also provide course- and topic-specific instructional programs to further critical thinking and lifelong learning skills.

NEXUS

NEXUS is an art and engineering program. NEXUS promotes collaboration efforts between the College of Engineering and the art community by getting people and ideas together. The goal is to involve students in science, technology, engineering, arts, and mathematics (STEAM) projects throughout the University and the surrounding community. The program helps participants to think outside the box.

College of Engineering Research Centers

Center for Bioinformatics and Computational Biology

The Center for Bioinformatics and Computational Biology (CBCB) is a multidisciplinary research center dedicated to applying high-performance networking and computing to basic life science and applied biomedical research. With faculty and students representing more than 20 traditional disciplines, the CBCB has contributed to the understanding of inherited human diseases, including blinding eye disease, cancer, deafness, diabetes, autism, schizophrenia, hypertension, obesity, and heart disease. For almost 20 years, the CBCB has been at the cutting edge of high throughput molecular discovery and interpretation in transcriptomics, genomics, and proteomics. At the confluence of these efforts lies the current wavefront of personalized genomic medicine, to which the CBCB plays a central role in partnership with labs, centers, and institutes across the University's Carver College of Medicine and basic science programs across campus. The CBCB also has been a center for industry start-ups and partnerships with numerous commercial enterprises. The center is jointly sponsored by the College of Engineering and the Carver College of Medicine.

Iowa Institute for Biomedical Imaging

The Iowa Institute for Biomedical Imaging (IIBI) conducts research in the following areas: medical imaging (CT, MR, OCT, PET, SPECT, ultrasound, multimodality imaging), medical image analysis and computer-aided diagnosis; cardiovascular

image analysis (angiography-intravascular ultrasound data fusion, MR image analysis of congenital heart disease, coronary CT image analysis, early detection of cardiovascular disease); pulmonary image analysis (CT and MR image analysis of the lung); cell image analysis (cell tracking, shape analysis); virtual surgery planning (augmented reality for surgical planning), cancer-related assessment of tumor progression/regression, staging, general machine learning; and disease/treatment outcome prediction. The institute is sponsored by the College of Engineering and the Carver College of Medicine.

IIHR—Hydroscience & Engineering

IIHR—Hydroscience & Engineering is a world-renowned center with almost 100 years of education, research, and public service focusing on hydraulic engineering and fluid mechanics. Based in the C. Maxwell Stanley Hydraulics Laboratory, a five-story red brick building on the banks of the Iowa River, IIHR is a unit of the College of Engineering. IIHR students, faculty members, research engineers and scientists, and staff work together to understand and manage one of the world's greatest resources—water. Students from around the world benefit from IIHR's comprehensive multidisciplinary approach, which includes basic fluid mechanics, laboratory experimentation, and computational approaches.

IIHR activities include fluid dynamics (turbulent flows, vortex dynamics, ship hydrodynamics, biological fluid flow, atmospheric boundary layer, experimental and computational fluid dynamics); environmental hydraulics (hydraulics structures, river mechanics, hydraulic structures, fish passage, sediment management, heat disposal in water bodies and power productions, bioremediation of groundwater, computational hydraulics, water-quality monitoring); water and air resources (air pollution, hydroclimatology, hydrogeology, hydrology, hydrometeorology, remote sensing, water resources and basin-scale processes); environmental engineering and science (PCBs in the air and water, innovative ways of removing contaminants from the soil and water, ultra-fine particles of pollutants in the atmosphere, bioremediation strategies for persistent groundwater contaminants); and water sustainability (development of sound strategies and technological solutions to meet the challenges facing society's growing need for water resources). In 2009, the Iowa Flood Center was founded at IIHR as the only academic center devoted solely to flood-related research and education.

The University of Iowa's Water Sustainability Initiative (WSI) brought new interdisciplinary expertise to the institute in 2013 when WSI faculty members (based in the Colleges of Liberal Arts and Sciences, Engineering, and Public Health) affiliated with IIHR. The Iowa Geological Survey joined IIHR in 2014, bringing new expertise in Iowa's subsurface resources, groundwater modeling, innovative geophysical skills, and more.

Students gain hands-on experience through close cooperation with faculty and staff on research projects funded by industry, government, and other organizations.

University of Iowa Technology Institute

At the University of Iowa Technology Institute (ITI), the mission is to cultivate collaboration across disciplines, invent advanced technologies, and conduct trailblazing research in design, simulation, and experimentation that enables a safer and more productive future. The institute provides a unique environment for research and development that spans 27

laboratories and the involvement of more than 180 faculty, staff, and student researchers.

The ITI conducts basic and applied research in the environment and energy, aerospace technology, biotechnology, systems and sensors, and vehicle safety and automated driving. The institute focuses on modeling and simulation, and conducts research in flight testing and human performance (the Operator Performance Laboratory); human modeling and simulation (the Virtual Soldier Research program); driving and transportation (the National Advanced Driving Simulator); advanced manufacturing, technology and robotics; biomedical and biochemical research; and multidisciplinary research in the fields of machine learning, smart sensors, remote sensing, renewable energy, and modeling of environmental change.

The institute has a satellite office in Orlando, Florida, and has major contracts with the U.S. military and industry partners.

Courses

The engineering course requirements for engineering majors are outlined in the respective Catalog sections. Each undergraduate program builds upon a core program (see the Bachelor of Science in Engineering [p. 1426] in the Catalog). Not all engineering core courses listed below are required for each engineering major. Core program courses are intended for College of Engineering students. Undergraduate students in other disciplines who wish to register for core engineering courses should contact Engineering Student Services.

- Core Engineering Courses [p. 1423]
- Engineering and Information Technology Courses [p. 1425]

Core Engineering Courses

ENGR:0000 Engineering Internship 0 s.h.

For engineering students completing a semester-long internship experience while working 35-40 hours a week at a professional company.

ENGR:0001 Engineering Co-op 0 s.h.

Multiple-semester cooperative education experience for students working 35-40 hours a week at a professional company.

ENGR:0002 Engineering Half-Time Internship 0 s.h.

For engineering majors participating in the Cooperative Education and Internship Program and averaging 15-20 hours per week on assignment.

ENGR:0004 Engineering Academic Internship arr.

Academic credit for engineering majors participating in the Cooperative Education and Internship Program. Requirements: for international students—F-1 or J-1 visa, engineering undergraduate standing, full-time internship offer letter in hand (at least 40 hours/week and one semester in length), internship approved by International Student and Scholar Services for F-1 Curricular Practical Training (CPT) or J-1 Academic Training (AT), concurrent registration in approved 3 s.h. distance education or evening course, and preapproval of internship by Engineering Career Services; non-international students may be eligible on case-by-case basis.

ENGR:0006 Engineering Global Internship/Co-op 0 s.h.

For engineering majors participating in the Cooperative Education and Internship Program working on a global assignment.

ENGR:1000 Engineering Success for First-Year Students 1 s.h.

Introduction to engineering student life; electronic resources; keys to and skills for success; coping with adversity; selecting a major; advising; curriculum choices and career objectives; ethics; communication; internships and co-ops; job search skills.

ENGR:1029 First-Year Seminar arr.

Introduction to engineering fields of study; work closely with a faculty member or senior administrator; participation that eases the transition to college-level learning; cutting-edge research taking place in the College of Engineering.

ENGR:1100 Introduction to Engineering Problem Solving 3 s.h.

Development and demonstration of specific problem solving skills; directed project or case study involving actual engineering problems and their solutions.

ENGR:1300 Introduction to Engineering Computing 3 s.h.

Engineering problem solving using computers; introduction to digital computations, problem formulation using a procedural high-level language; structured, top-down program design methodology; debugging and testing; introduction to use of software libraries; examples from numerical analysis and contemporary applications in engineering. Corequisites: MATH:1550.

ENGR:1550 FIRST Tech Challenge - Introduction to Engineering Problem Solving 3 s.h.

Introduction to engineering problem solving and design; projects introduce students to common elements of engineering problem solving and design (e.g., application of organizing principles to describe engineered systems, economic analysis upon which to base decisions, technical presentation and analysis of data), and provides an opportunity for students to apply common elements of problem solving in the solution of engineering problems in context of a structured problem solving and design process. Taught in high schools by state certified teachers.

ENGR:2110 Engineering Fundamentals I: Statics 2-3 s.h.

Vector algebra, forces, couples, moments, resultants of force couple systems; friction, equilibrium analysis of particles and finite bodies, centroids; applications. Prerequisites: MATH:1550. Corequisites: MATH:1560 and PHYS:1611.

ENGR:2120 Engineering Fundamentals II: Electrical Circuits 3 s.h.

Kirchhoff's laws and network theorems; analysis of DC circuits; first order transient response; sinusoidal steady-state analysis; elementary principles of circuit design; SPICE analysis of DC, AC, and transient circuits. Corequisites: MATH:2560.

ENGR:2130 Engineering Fundamentals III: Thermodynamics 3 s.h.

Basic elements of classical thermodynamics including first and second laws, properties of pure materials, ideal gas law, reversibility and irreversibility, and Carnot cycle; control volume analysis of closed simple systems and open systems at steady state; engineering applications, including cycles. Prerequisites: PHYS:1611 and CHEM:1110. Corequisites: MATH:1560.

ENGR:2510 Fluid Mechanics 4 s.h.

Fluid properties; hydrostatics; transfer of mass, momentum, and energy in control-volume and differential forms; dimensional analysis and similitude; laminar and turbulent flow in conduits; flow past bluff bodies and airfoils; engineering applications; experimental laboratories, computer simulation projects. Prerequisites: MATH:2560 and ENGR:2710. Corequisites: ENGR:2130.

ENGR:2710 Dynamics 3 s.h.

Vector calculus, Newton's laws, 3-D motion of particles and multiparticle systems, 2-D motion of rigid bodies applications. Prerequisites: ENGR:2110 and MATH:1550.

ENGR:2720 Materials Science 3 s.h.

Concepts and examples of selection and applications of materials used by engineers; mechanical, electrical, and thermal properties that govern a material's suitability for particular applications; lectures supplemented by laboratory experiments. Prerequisites: CHEM:1110. Corequisites: MATH:1550.

ENGR:2730 Computers in Engineering 2-3 s.h.

Advanced programming; good software engineering techniques including pseudocode and documentation dynamic data structures, recursive programming, procedural and object-oriented computing, inheritance, and standard template library; C++. Prerequisites: ENGR:1300.

ENGR:2750 Mechanics of Deformable Bodies 3 s.h.

Elementary theory of deformable bodies, stress, strain; axial, transverse, bending, torsion, combined and buckling loads; deflection of beam. Prerequisites: ENGR:2110. Corequisites: MATH:2560.

ENGR:2760 Design for Manufacturing 3 s.h.

Fundamentals of design, engineering graphics, and manufacturing processing; computer graphics using Pro/ENGINEER for CAD and CAM; typical industrial processes, including casting, welding, machining, forming; laboratory exercises and projects. Corequisites: ENGR:2720.

ENGR:2995 Introduction to Artificial Intelligence and Machine Learning in Engineering 3 s.h.

Introduction to artificial intelligence (AI), machine learning, data science, and data driven problem solving across all engineering disciplines; topics include supervised and unsupervised learning, clustering, heuristics, feature selection, ethics of AI—fairness and privacy issues, and performance evaluation; first in a series. Prerequisites: ENGR:1300. Corequisites: MATH:2550. Requirements: practical knowledge of programming, rudimentary understanding of probability concepts, and sophomore standing.

ENGR:4000 Engineering Honors Seminar 1 s.h.

Completion of an approved project under the supervision of a faculty member. Requirements: engineering honors and junior or higher standing.

ENGR:4001 Leadership Seminar: Mediocrity is Not an Option 1 s.h.

Skills needed to gain competitive edge in professional world with understanding that mediocrity is not an option; importance of developing a career plan, power of networking, significance of soft skills, value of mentoring; participation in series of discussions and activities; deeper insight of strengths and weaknesses, how to enhance skills that employers desire, and become effective leaders in workplace; presentation by retired chief operating officer of a leading aerospace company.

ENGR:4003 Women in Science and Engineering Leadership Seminar 1 s.h.

WiSE peer mentors develop practical mentoring and leadership skills while participating in a one-on-one relationship with a first-year UI student in a STEM major; peer mentors meet monthly with mentees, submit meeting reflection/evaluations, and attend three educational or social events hosted by WiSE or another University entity during the semester.

ENGR:4005 Developing Cultural Intelligence for STEM Leadership 1 s.h.

How cultural values impact technological innovation; knowledge and strategies to develop skills for leadership in the global marketplace; activities include the Cultural Intelligence (CQ) assessment and mapping of cultural values and case studies for innovation; students use CQ dimensions to develop a plan to deepen CQ skills; exploration of culturally intelligent collaboration and problem solving in science, technology, engineering, and mathematics (STEM) fields; how to represent these skills in professional settings. Requirements: upper-level undergraduate or graduate standing.

ENGR:4010 Engineering Grand Challenges Program Fellow 0 s.h.

The Engineering Grand Challenges Program is designed to prepare tomorrow's engineering leaders to solve the grand challenges facing society during the next century; through completion of components of the program, students have the opportunity to engage in research relating to their selected grand challenge, explore interdisciplinary coursework, gain an international perspective, engage in entrepreneurship, and give back to the community through service learning; for students who have been accepted as a fellow into the Engineering Grand Challenges Program and are working on completion of the program requirements. Requirements: acceptance to the Engineering Grand Challenges Program.

ENGR:4011 Engineering Grand Challenges Program Scholar 0 s.h.

The Engineering Grand Challenges Program is designed to prepare tomorrow's engineering leaders to solve the grand challenges facing society during the next century; through completion of components of the program, students have the opportunity to engage in research relating to their selected grand challenge, explore interdisciplinary coursework, gain an international perspective, engage in entrepreneurship, and give back to the community through service learning; for students who have been accepted as a scholar to the Engineering Grand Challenges Program and are working on completion of the program requirements. Requirements: acceptance to the Engineering Grand Challenges Program.

ENGR:4012 Engineering Grand Challenges Program Final 0 s.h.

The Engineering Grand Challenges Program is designed to prepare tomorrow's engineering leaders to solve the grand challenges facing society during the next century; through completion of components of the program, students have the opportunity to engage in research relating to their selected grand challenge, explore interdisciplinary coursework, gain an international perspective, engage in entrepreneurship, and give back to the community through service learning; for students who have been accepted to the Engineering Grand Challenges Program and are in the final semester of completing the program requirements. Requirements: acceptance to the Engineering Grand Challenges Program.

ENGR:7270 Engineering Ethics 1 s.h.

Introduction to practical issues associated with being a responsible scientist; topics in responsible conduct of research in engineering and the sciences using case studies, presentations, and discussions with visiting speakers; conforms to mandates set by the Office of the Vice President for Research and the Graduate College to train graduate students and postdoctoral scholars/fellows in responsible conduct of research. Requirements: first-year graduate standing in College of Engineering.

ENGR:7604 Engineering Ethics for Post Docs 0 s.h.

Introduction to practical issues associated with being a responsible scientist; topics in responsible conduct of research in engineering and the sciences using case studies, presentations, and discussions with visiting speakers; conforms to mandates set by the Office of the Vice President for Research and the Graduate College to train graduate students and postdoctoral scholars/fellows in responsible conduct of research. Requirements: new postdoctoral research scholar/fellow in College of Engineering.

Engineering and Information Technology Courses

EIT:5120 Modern Automation and Control 3 s.h.

Study of sensor, motors, control, process automation, and internet of things (IoT).

EIT:5135 Modern Information Systems 3 s.h.

Introduction to enterprise information systems; RESTful service model, cloud service models, data storage models, big data considerations, network basics, security and privacy considerations; blockchain technology and its applications.

EIT:5150 Applied Artificial Intelligence 3 s.h.

Artificial Intelligence (AI), search and logic, data science and analysis, advanced machine learning and deep learning, digital manufacturing and design, signal processing and fault diagnosis, AI robotics and computer vision, and applications in engineering.

EIT:5155 Cyber-Physical Systems 3 s.h.

Introduction to modern "smart" systems providing intelligent monitoring, control, and coordination of societal, environmental, and business infrastructure; layered architecture for, relevant applications of, and projects involving conceptual design of cyber-physical systems.

EIT:5211 Machine Learning and Scientific Computing in Engineering 3 s.h.

Numerical methods in scientific computing; root problems and optimization; linear algebraic equations; eigenvalue problems; numerical differentiation and integration; interpolation and curve fitting; initial value and boundary value problems; machine learning in regression, classification, and clustering problems; Python programming and scikit-learn packages.

EIT:5216 Manufacturing Process and Modeling 3 s.h.

Fundamental science, modeling, and simulation technologies in materials processing; essential knowledge in automation and control of manufacturing systems; material removal processes, forming, microfabrication, and nontraditional material processes; finite element modeling/simulation of material processes; automation and control of manufacturing systems and processes.

EIT:5220 Advanced Control Engineering 3 s.h.

State-space representation of linear systems, equilibrium points, linearization, controllability, observability, stability, state feedback control, linear observer design, and separation principle.

EIT:5224 Mechanical Design and Realization 3 s.h.

Solid modeling, assemblies, drawings, geometric dimensioning and tolerancing, and basic engineering design process; use of analysis tools (e.g., Finite Element Analysis), fatigue and durability, optimization software.

EIT:5240 Kinematics of Modern Robotics 3 s.h.

Robotics motion, configuration space, and path planning.

EIT:5298 Mechanical Component Durability and Integrity Analysis 3 s.h.

System and component design, stress analysis, static failure, fatigue, fracture mechanics, vibration, materials science, and product life cycle.

EIT:5351 Cybersecurity 3 s.h.

Taxonomy of security threats and attacks; chain-of-trust principle; authentication, access control, and security domains; perimeter security and defense in depth; cryptographic protocols; key management and distribution; security assessment, internet of things (IoT) security and privacy issues.

EIT:5352 Modern Database Systems 3 s.h.

Introduction to contemporary database architectures: relational, key-value, document store, and graph-based; relative strengths and weaknesses of database architectures; enterprise scalability issues; data aggregation and visualization; project work involving use of modern database systems (e.g., MySQL, Redis, MongoDB, Neo4j).

EIT:5353 Big Data and Machine Learning 3 s.h.

Storage, management, and analysis of very large data sets; distributed file systems and object stores; MapReduce framework for processing large data sets; machine learning techniques; classification and clustering; pattern recognition; projects involving big data and machine learning frameworks (e.g., Apache Hadoop).

EIT:5380 Software Engineering Methods, Tools, and Frameworks 3 s.h.

Modern agile software development practices for cloud and web-based applications using state-of-the-art software engineering languages, tools, and technologies; software as a service (SaaS) architecture; software testing; introduction to enterprise application development frameworks; team-based project.

EIT:5381 Enterprise Software Engineering 3 s.h.

Modern DevOps practices and toolchains for enterprise information systems; scalable architecture; cloud services (e.g., SaaS, PaaS, IaaS); load balancing/autoscaling; identity management and security; performance monitoring and tuning; continuous integration and hot deployment.

EIT:5382 Human-Computer Interaction Design and User Experience 3 s.h.

Principles and guidelines for design and evaluation of human-computer interactions (HCI); design methodologies (e.g., participatory design, low- and high-fidelity prototyping); user interface technologies (e.g., input and output devices, interaction styles); quantitative and qualitative evaluation of user interfaces (e.g., expert reviews, usability testing).

Bachelor of Science in Engineering

Undergraduate major: B.S.E.

Website: <https://www.engineering.uiowa.edu/>

The Bachelor of Science in Engineering (B.S.E.) degrees in biomedical, chemical, civil, electrical, industrial, and mechanical engineering are accredited by the Engineering Accreditation Commission (EAC) of ABET. The two new programs—environmental engineering, and computer science and engineering—are preparing for their initial accreditation review in 2020. The environmental engineering program will be reviewed by the EAC, while the computer science and engineering program will be reviewed by the EAC and the Computing Accreditation Commission (CAC) of ABET.

Each program has its own set of articulated educational objectives, while all programs are designed to ensure that graduates possess the following at the time of graduation:

- an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics;
- an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors;
- an ability to communicate effectively with a range of audiences;
- an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts;
- an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives;
- an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions; and
- an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Computer science and engineering majors will be able to do each of the following as they relate to directly to computing:

- analyze a complex computing problem and apply principles of computing and other relevant disciplines to identify solutions;
- design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline;
- communicate effectively in a variety of professional contexts;
- recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles;
- function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline; and

- apply computer science theory and software development fundamentals to produce computing-based solutions.

Each program emphasizes a broad understanding of fundamental principles common to all engineering disciplines and provides students with the opportunity to specialize in a selected engineering discipline. All programs build on the University's research strengths. Program flexibility is provided by a curriculum in which each student develops engineering competency within a particular academic program and complements it with a tailored thematic option in support of chosen career objectives—for example, engineering practice, project management, research, and development.

This section of the Catalog provides information about requirements that all B.S.E. students must fulfill, regardless of their engineering major, as well as admission information.

Engineering students may earn more than one B.S.E. degree. They also may combine undergraduate degree programs to earn a B.S.E. and a degree in the College of Liberal Arts and Sciences or the Tippie College of Business, or a combined B.S.E./M.S. in urban and regional planning, or a combined B.S.E./M.S. in engineering; see "Combined and Dual Degrees" in the Bachelor of Science in Engineering, B.S.E. [p. 1428] section of the Catalog.

Undergraduate Majors, Minors and Certificates

Majors

The College of Engineering has six departments and offers eight undergraduate B.S.E. majors. View the B.S.E. majors under each of the College of Engineering departments in the Catalog.

Minors

The College of Engineering does not offer a minor. Engineering students may earn minors in a number of programs offered by other undergraduate colleges at the University of Iowa. For descriptions of minors and their requirements, view Find Your Program on the General Catalog website and select undergraduate minors.

Certificates

The College of Engineering offers two undergraduate certificate programs. Engineering students may earn certificates offered by colleges across the University. The College of Engineering partners with the Tippie College of Business to offer the Certificate in Technological Entrepreneurship [p. 1535], which is tailored specifically for engineering students who intend to start and operate their own business or who would like to understand and learn about managing innovation in business environments. The college also offers the Certificate in Naval Science and Technology [p. 1531]. Other certificates of particular interest to engineering students include the Certificate in International Business [p. 1195] and the Certificate in Sustainability [p. 2021]. For descriptions of certificates and their requirements, view Find Your Program on the General Catalog website and select undergraduate certificates.

Cooperative Education and Internship Program

The Cooperative Education and Internship Program offers students the opportunity to explore engineering careers and

develop engineering skills through periods of professional practice while they are still students. Supervised professional engineering-related experiences in business, industry, education, or government expose students to the challenges and opportunities of an engineer. Students with co-op and/or internship experience are sought by employers and usually receive higher starting salaries upon graduation.

The program structure focuses on goal setting at the beginning, analysis and reflection at the midpoint, and evaluation and feedback near the end. Experiences range from ten-week summer internships to multi-term co-ops. Qualified students may choose to alternate periods of on-campus study with full-time work experience, or they may elect to work half-time while taking at least 6 s.h. of coursework. Students may apply to the program following their first year. Academic record and class status are considered in acceptance decisions. For further details, see Engineering Career Services on the College of Engineering website.

Engineering Grand Challenges Scholars Program

The Engineering Grand Challenges Scholars Program (GCSP) is designed to prepare students to develop innovative engineering solutions to the 14 Grand Challenges facing society in this century, as identified by the National Academy of Engineering (NAE). There are two tiers of participation in the Engineering Grand Challenges Scholars Program at the University of Iowa—fellows and scholars. Students are required to complete several components related to one of the 14 grand challenges prior to graduation:

- Research experience—project or independent research related to one of the 14 grand challenges;
- Interdisciplinary curriculum—preparing engineering students to work at the overlap with public policy, business, law, ethics, and human behavior, as well as medicine and the sciences;
- Entrepreneurship—preparing students to translate invention to innovation and to develop market ventures that scale to global solutions in the public interest;
- Global dimension—developing students' global perspective necessary to address challenges that are inherently global as well as to lead innovation in a global economy; and
- Service learning—developing and deepening students' social consciousness and their motivation to bring their technical expertise to bear on societal problems.

The University of Iowa's Engineering Grand Challenge Scholars Program was the seventh in the United States and the first in the Big Ten to be approved by the national committee. More details about the program and requirements can be found on the College of Engineering Grand Challenges Scholars Program web page.

Programs

Undergraduate Program of Study Major

- Bachelor of Science in Engineering [p. 1428]

Policies

Students can view academic policies on the College of Engineering website.

Admission

First-year students are eligible for direct admission into the College of Engineering if they meet the Iowa Board of Regents score of at least 265 on the Regent Admission Index (RAI), have a cumulative high school g.p.a. of at least 3.33, and meet the high school course requirements.

Engineering high school course requirements include four years of English/language arts; four years of mathematics, including one year of precalculus or equivalent; two years of a single world language; three years of natural science, preferably with at least one year of chemistry and at least one year of physics; and two years of social studies. Grades of A or B in all high school math and science courses are highly recommended.

Incoming students who do not meet the world language requirement may be admitted on conditional status for a maximum of four semesters in order to complete two semesters of an introductory college-level world language.

Students who are unsure whether to pursue a degree in engineering or a degree in liberal arts and sciences are strongly encouraged to begin in engineering if they meet the admission requirements.

Students who fall short of the engineering admission requirements may enroll in the College of Liberal Arts and Sciences and be designated as Engineering Interest students. They may apply to transfer into the College of Engineering for the following semester once they have successfully completed MATH:1850 Calculus I (preferably MATH:1550 Engineering Mathematics I: Single Variable Calculus), and CHEM:1110 Principles of Chemistry I or PHYS:1611 Introductory Physics I with grades of A or B.

More information about admission and the College of Engineering is available on the college's website.

Transfer Applicants

Transfer applicants must have completed the same high school unit requirements as entering first-year students and must submit an official high school transcript as well as a transcript of college work undertaken at other institutions. To transfer to the College of Engineering, students must have demonstrated success in math, science, and engineering courses, ideally earning all As and Bs with no grade lower than a C in these foundation subjects. Transfer students must have completed MATH:1850 Calculus I and either CHEM:1110 Principles of Chemistry I or PHYS:1611 Introductory Physics I (the first semester of chemistry designed for majors or the first semester of calculus-based physics) or their equivalents. Overall grade-point average also is considered in transfer applications.

Information about admission requirements for transfer students is available on the college's website.

Bachelor of Science in Engineering, B.S.E.

Requirements

The Bachelor of Science in Engineering (B.S.E.) requires a minimum of 128 s.h. Students must be enrolled in the UI College of Engineering for the last 30 s.h. of work toward the degree, or 45 of the last 60 s.h., or a total of 90 s.h. They must have a g.p.a. of at least 2.00 on all college work used to satisfy degree requirements as well as on all work undertaken at the University of Iowa.

Engineering students earn the B.S.E. degree in one of eight undergraduate programs of study (majors): biomedical engineering, chemical engineering, civil engineering, computer science and engineering, electrical engineering, environmental engineering, industrial engineering, or mechanical engineering. Each program's curriculum is divided into four major components: the common core, engineering topics, an elective focus area (EFA), and the general education component.

Core Requirements

The College of Engineering offers a common curriculum through the third semester of study for all students in the eight engineering disciplines, thereby allowing students to change programs during the first three semesters without a loss in course credit.

The core includes RHET:1030 Rhetoric, a first-year course in writing, speaking, and critical reading; ENGR:1100 Introduction to Engineering Problem Solving and ENGR:1300 Introduction to Engineering Computing, which cover a breadth of topics from engineering as a profession to team design projects to engineering computations and computer programming; and a series of mathematics, basic science, and fundamental engineering courses.

The fundamental engineering courses use the underlying principles learned in the mathematics and the basic sciences to understand and predict the behavior of idealized models of real components or systems encountered in engineering. These courses include fundamentals of statics, thermodynamics, and electrical circuits. Students should complete the core requirements according to the following three-semester plan.

Code	Title	Hours
First Semester		
All of these:		
ENGR:1000	Engineering Success for First-Year Students (all majors)	1
ENGR:1100	Introduction to Engineering Problem Solving (biomedical, chemical, civil, environmental, electrical, industrial, and mechanical majors)	3
CHEM:1110	Principles of Chemistry I (all majors)	4
MATH:1550	Engineering Mathematics I: Single Variable Calculus (all majors)	4

RHET:1030	Rhetoric (all majors)	4
-----------	-----------------------	---

Second Semester

All of these:

ENGR:1300	Introduction to Engineering Computing (all majors)	3
CHEM:1120	Principles of Chemistry II (biomedical, chemical, and environmental majors)	4
MATH:1560	Engineering Mathematics II: Multivariable Calculus (all majors)	4
MATH:2550	Engineering Mathematics III: Matrix Algebra (all majors)	2
PHYS:1611	Introductory Physics I (all majors)	4

Third Semester

All of these:

ENGR:2110	Engineering Fundamentals I: Statics (all majors)	2
ENGR:2120	Engineering Fundamentals II: Electrical Circuits (all majors)	3
ENGR:2130	Engineering Fundamentals III: Thermodynamics (all majors)	3
MATH:2560	Engineering Mathematics IV: Differential Equations (all majors)	3
PHYS:1612	Introductory Physics II (biomedical, civil, computer science and engineering, electrical, industrial, and mechanical majors)	3-4

Required Program Courses and Elective Focus Area (EFA)

The curriculum for each B.S.E. major is described in each program's departmental Catalog section; see biomedical engineering [p. 1433], chemical and biochemical engineering [p. 1446], civil and environmental engineering [p. 1462], electrical and computer engineering [p. 1481], industrial and systems engineering [p. 1500], or mechanical engineering [p. 1516].

Each program has a number of elective focus areas. The EFAs are designed to help students achieve exposure to and depth of study in an area that is complimentary to their major. The EFAs enable students to gain technical skills consistent with their career goals. Moreover, these electives may contribute to earning a minor and/or certificate.

General Education Component

The general education component promotes understanding of and appreciation for arts, community, culture, and learning through coursework. Students are required to complete 15 sh. of the general education component as outlined below:

- Engineering Be Creative: 3 s.h.
- College of Liberal Arts and Sciences GE CLAS Core [p. 20] (general education) course: 3 s.h. (industrial engineering students are required to complete PSY:1001 Elementary Psychology)
- Approved subjects: 9 s.h.

Credit may be earned by examination; consult the College of Engineering.

Students who enter the College of Engineering with a B.A. or B.S. degree are considered to have satisfied the general education component requirement.

Students who enroll in a combined degree program in the College of Engineering and in the College of Liberal Arts and Sciences or in the Tippie College of Business are considered to have satisfied the College of Engineering's general education requirement once they have completed all requirements for the liberal arts and sciences degree or the business degree.

Combined and Dual Degrees

B.S.E. and Undergraduate Degrees

B.S.E./B.B.A.

The College of Engineering and the Tippie College of Business offer a combined degree program in which students earn two University of Iowa bachelor's degrees: a Bachelor of Business Administration (B.B.A.) from the Tippie College of Business and a Bachelor of Science in Engineering (B.S.E.) from the College of Engineering.

Students in the combined program must complete all requirements for both degrees, including all general education requirements. They must enroll in appropriate mathematics and engineering courses early in their course of study in order to complete the program in a timely way. Because courses in natural sciences, mathematics, humanities, and social sciences count toward the B.B.A. and the B.S.E., students may count a single course toward both degrees.

Students usually meet the degree requirements of both colleges in about five years; the time required depends on a student's choice of major study areas. Students should consult their advisors about whether the second-grade-only option is available to them. They are assigned two advisors, one in the Tippie College of Business Undergraduate Program Office and the other in their College of Engineering major department.

To enter the combined degree program, students must have approval from both colleges and must be admitted to both colleges. Interested students should contact the Student Development Center. For information about the B.B.A., including requirements for the degree, see the Bachelor of Business Administration, B.B.A. [p. 1130] (Tippie College of Business) in the Catalog.

B.S.E./Liberal Arts and Sciences Degree

Students may earn two University of Iowa bachelor's degrees in a combined program in the College of Engineering and the College of Liberal Arts and Sciences. Successful candidates are awarded a B.S.E. (Bachelor of Science in Engineering) by the College of Engineering and a B.A. (Bachelor of Arts), B.S. (Bachelor of Science), B.F.A. (Bachelor of Fine Arts), or B.M. (Bachelor of Music) by the College of Liberal Arts and Sciences.

Students in combined degree programs must complete all requirements for both degrees, including the College of Liberal Arts and Sciences GE CLAS Core [p. 20] and the College of Engineering general education component.

Students in the combined program usually are able to meet the degree requirements of both colleges in about five academic years. The exact length of time necessary to complete the program is determined by the major areas of study selected in each college. Students who enter the combined degree program are assigned two faculty advisors, one in their major department in the College of Engineering and the other in their major department in the College of Liberal Arts and Sciences.

To enter the combined degree program, students must be admitted to both the College of Engineering and the College of Liberal Arts and Sciences and must have College of Engineering approval to enter the combined degree program. Combined degree program applicants must meet the high school course or unit requirements for admission to each of the two colleges.

It is crucial that students enroll in the proper mathematics and engineering courses early in their course of study to expedite the completion of the program. The specific engineering courses taken by each student vary according to one's engineering major. Since courses in natural sciences, mathematics, humanities, and social sciences are accepted for credit by both colleges, students may be able to count a particular course toward both degrees.

Contact the Student Development Center for information about specific requirements. To learn about liberal arts and sciences majors, visit College of Liberal Arts and Sciences [p. 17] in the Catalog and select majors of interest in the departments.

B.S./B.S.E. Dual Degree with Northern Iowa

The 3+2 dual degree program leads to a B.S. in applied physics from the University of Northern Iowa (UNI) and a B.S.E. from the University of Iowa. It requires approximately three years of study at UNI followed by approximately two years of study at Iowa. There is no guarantee that students can complete the 3+2 degree in five years.

Students interested in the program are guaranteed admission to the University of Iowa portion of the program if they have a g.p.a. of at least 3.00 (B average) in all coursework and in the chemistry, mathematics, and physics courses required by the University of Northern Iowa physics department.

During the first three years of the program, students complete at least 90 s.h. of coursework at the University of Northern Iowa. They must successfully complete courses in each of the following areas: chemistry, mathematics through differential equations, physics to satisfy the applied physics major requirements, and courses to satisfy the general education requirements. Credit for courses passed with a grade of C or higher is transferred to the University of Iowa as credit for equivalent coursework.

At the University of Iowa, students complete the B.S.E. requirements that were current at the time of their admission to the UI College of Engineering. Coursework completed at the University of Iowa is transferred to the University of Northern Iowa and applied toward the requirements for that institution's B.S. in applied physics.

When transferring to Iowa from UNI, students must submit applications for admission, housing, and financial aid to the University of Iowa by the University's established deadlines.

B.S.E. and Graduate Degrees

B.S.E./M.S. Programs in Engineering

Engineering students may be eligible to enroll in one of the College of Engineering's combined B.S.E./M.S. programs, which allow students to begin working toward a master's degree in engineering while they are completing their bachelor's degree. The combined programs, which are offered by each of the college's departments, permit students to count certain courses toward both degrees, completing both programs in less time than they would need to complete them separately. See "Combined Programs" in each department's B.S.E. sections of the Catalog.

B.S.E. in Biomedical Engineering (Biomechanics and Biomaterials Track)/M.S. in Occupational and Environmental Health (Industrial Hygiene Subprogram)

B.S.E. students majoring in biomedical engineering in the biomechanics and biomaterials track who are interested in earning a Master of Science in occupational and environmental health with an industrial hygiene subprogram may apply to the combined B.S.E./M.S. program offered by the College of Engineering and the College of Public Health. The combined program permits students to count a limited amount of credit toward the requirements of both degrees, enabling them to begin the study of public health before they complete the bachelor's degree. See the M.S. in Industrial Hygiene—Undergrad to Grad information on the Department of Occupational and Environmental Health (College of Public Health) website.

B.S.E. in Civil Engineering/M.S. in Urban and Regional Planning

The College of Engineering and the School of Planning and Public Affairs offer the combined Bachelor of Science in Engineering in civil engineering/Master of Science program in urban and regional planning. The program, which is completed in five years, is designed for students who wish to pursue a public or private sector career in planning, a field that encompasses the development of alternatives to improve the quality of life in cities and regions.

For additional information on the B.S.E. in civil engineering [p. 1471], see that section of the Catalog. For more information about the graduate degree, see the M.S. in urban and regional planning [p. 1622] (Graduate College) in the Catalog. Contact Engineering Student Services for information about applying to the combined program.

B.S.E. in Computer Science and Engineering/M.C.S.

The College of Engineering and the Department of Computer Science (College of Liberal Arts and Sciences) offer a combined B.S.E. in computer science and engineering/Master of Computer Science for computer science and engineering undergraduate students.

The combined degree program allows students to count a limited amount of credit toward both degrees. For more information, see the Master of Computer Science, M.C.S. [p. 326] in the Catalog.

Honors

Honors in Engineering

Outstanding undergraduate students who demonstrate exceptional accomplishment through research, directed independent study, teaching internships, or other approved nondegree enrichment activities may graduate with honors in engineering. They must maintain a University of Iowa g.p.a. of at least 3.33, complete an honors project with a faculty member, and participate in a college-wide honors seminar with faculty members and other honors students. Successful completion of the honors requirements leads to a B.S.E. with honors, which is noted on the student's transcript. See the College of Engineering Honors Program web page for details.

University of Iowa Honors Program

In addition to honors in engineering, undergraduate students have a variety of opportunities for honors study and activities through membership in the University of Iowa Honors Program; visit Honors at Iowa to learn about the University's honors program.

Career Advancement

Engineering is a well-respected profession that is used as a foundation for a variety of careers in industry, medicine, law, government, and consulting. Engineering majors hold eight of the top ten spots on the list of top-paid majors for bachelor's degree graduates, according to the National Association of Colleges and Employers (NACE). On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

Engineering and Information Technology, M.S.

The rapid expansion of computer, information, and advanced manufacturing technology throughout all segments of business and industry is creating challenges for companies that seek to keep pace with the latest technological and engineering advancements. The M.S. in engineering and information technology program is intended to provide a rigorous, yet broadly accessible platform for practicing B.S.-level engineers and bachelor's degree graduates from other related disciplines to obtain advanced training in contemporary engineering and information technology areas.

Rather than focusing in one area, the M.S. program provides a breadth of exposure to areas that are key to the design, implementation, and manufacturing of complex, smart systems. This exposure includes coursework in software engineering, networking, cloud computing, machine learning, robotics, advanced manufacturing, testing/quality assurance, and associated legal, regulatory, environmental, and ethical issues.

The M.S. in engineering and information technology is administered by the College of Engineering.

Requirements

The M.S. in engineering and information technology program is currently being revised. Applications are not being accepted at this time.

The Master of Science program in engineering and information technology requires 30 s.h. of graduate credit. Students must maintain a cumulative g.p.a. of at least 3.00. Students are allowed up to 6 s.h. of approved transfer credit.

All courses are taught at the John Deere Davenport Works in Davenport, Iowa. Students work with an academic advisor to formulate a plan of study. The degree requires 12 s.h. of core courses and 18 s.h. in a subprogram—information technology or mechanical engineering.

The M.S. with a major in engineering and information technology requires the following coursework.

Core Courses

Students should consult their advisor for appropriate course selection.

Code	Title	Hours
All of these:		
EIT:5120	Modern Automation and Control	3
EIT:5135	Modern Information Systems	3
EIT:5150	Applied Artificial Intelligence	3
EIT:5155	Cyber-Physical Systems	3

Specialization Areas

Students choose one of the two subprograms below.

Information Technology

Code	Title	Hours
All of these:		
EIT:5351	Cybersecurity	3
EIT:5352	Modern Database Systems	3
EIT:5353	Big Data and Machine Learning	3
EIT:5380	Software Engineering Methods, Tools, and Frameworks	3
EIT:5381	Enterprise Software Engineering	3
EIT:5382	Human-Computer Interaction Design and User Experience	3

Mechanical Engineering

Code	Title	Hours
All of these:		
EIT:5211	Machine Learning and Scientific Computing in Engineering	3
EIT:5216	Manufacturing Process and Modeling	3
EIT:5220	Advanced Control Engineering	3
EIT:5224	Mechanical Design and Realization	3
EIT:5240	Kinematics of Modern Robotics	3
EIT:5298	Mechanical Component Durability and Integrity Analysis	3

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Applicants must have a bachelor's degree in engineering, computer science, or a related field and an undergraduate g.p.a. of at least 3.00. Those whose g.p.a. is slightly below 3.00 may be considered for admission. No Graduate Record Examination (GRE) General Test scores are required.

Those whose first or official language is not English must score as follows on the Test of English as a Foreign Language (TOEFL): a score of 550 or higher on the paper-based (PBT) version or a score of 81 or higher on the internet-based (iBT) version.

Career Advancement

The M.S. degree will assist those who need to learn more about the career areas in which they currently work. Practicing engineers, whose expertise is outside of the computing and information technology area may need to gain additional knowledge in areas such as software engineering, networking, databases, and computer security. Likewise, engineers with expertise in traditional computer-related areas may need to broaden their skill set to include an understanding of the internet of things (IoT),

machine learning, and other smart-system technologies and methodologies.

Roy J. Carver Department of Biomedical Engineering

Chair

- Joseph M. Reinhardt

Undergraduate major: biomedical engineering (B.S.E.)

Graduate degrees: M.S. in biomedical engineering; Ph.D. in biomedical engineering

Faculty: <https://bme.engineering.uiowa.edu/people>

Website: <https://bme.engineering.uiowa.edu/>

The past half century has seen tremendous growth of technological activity in biology and medicine. As engineers increasingly have become involved with projects in the life and health sciences, biomedical engineering has emerged to bridge the gap between these sciences and engineering.

The Roy J. Carver Department of Biomedical Engineering fosters interdisciplinary activities across departments and colleges and maintains strong ties with the Carver College of Medicine and the Colleges of Dentistry, Nursing, and Public Health. The department strives to provide a well-rounded and superior engineering education that attracts outstanding students at both the undergraduate and graduate levels; to conduct high-quality research that enables faculty members and students to keep pace with and initiate new developments; and to serve government, industry, and institutions worldwide by making the department's facilities and faculty expertise accessible.

Department faculty members have teaching and research expertise in areas related to cardiovascular and fluid biomechanics, musculoskeletal biomechanics, biomaterials and tissue engineering, bioinstrumentation, biosystems, biomedical imaging, biological signal analysis, bioinformatics and computational biology, respiratory and pulmonary engineering, and other allied fields. Several faculty members have joint appointments with the Carver College of Medicine, the College of Dentistry, or the College of Public Health. Biomedical engineering undergraduates and graduate students collaborate with faculty members and their colleagues on research problems in the life and health sciences.

Programs

Undergraduate Program of Study

Major

- Major in Biomedical Engineering (Bachelor of Science in Engineering) [p. 1440]

Graduate Programs of Study

Majors

- Master of Science in Biomedical Engineering [p. 1443]
- Doctor of Philosophy in Biomedical Engineering [p. 1444]

Facilities

Undergraduate Teaching Laboratories

Seven dedicated undergraduate teaching laboratories are associated with the required and elective courses in biomedical engineering: the Biomechanics and Biomaterials Laboratory; the Biomedical Imaging Laboratory; the Carver Biomechanics and Mechanobiology Laboratory; the Carver Cellular Engineering Laboratory; the Carver Medical Device Design Laboratory; the Senior Design Laboratory; and the Systems, Instrumentation, and Data Acquisition Laboratory.

Biomechanics and Biomaterials Laboratory

The Biomechanics and Biomaterials Laboratory is equipped to perform experiments relating to the cardiovascular and human musculoskeletal systems as well as the various properties of biomaterials. The laboratory houses a table-top material testing machine; two cone-and-plate viscometers; compact stress-strain devices for characterizing cardiovascular tissues; goniometers; human structures biomechanical modeling sets and associated sensors; digital still, video, and motion-capture cameras for kinematic analysis; a ski binding tester; a drop tower for impact testing; digital calipers; various skeletal/bone models; an assortment of hand tools; and dissecting tools. The lab is used for the course BME:2500 Biomaterials and Biomechanics, elective courses in cardiovascular and musculoskeletal biomechanics, and senior design projects.

Biomedical Imaging Laboratory

The Biomedical Imaging Laboratory provides computer and experimental equipment to allow students to become familiar with biomedical imaging hardware and software for biomedical image analysis. The laboratory has four lab benches with computers for teamwork, two desktop ultrasound machines, and two desktop magnetic resonance imaging devices. In addition, the lab has 12 sets of in-house-built optics laboratory kits that use light sources and semitranslucent objects to simulate basic x-ray physics. Concepts such as image magnification as it relates to source-object distance (SOD)/source-image distance (SID), depth-dependent magnification, ideal point source versus parallel beam source effects, and projection image formation with lack of depth information artifacts. An instructor workstation and computer projector are available for presentations and software demonstrations. The lab is used primarily for the core course BME:2210 Bioimaging and Bioinformatics, the elective course BME:5210 Medical Imaging Physics, and for senior design projects.

Carver Biomechanics and Mechanobiology Laboratory

The Carver Biomechanics and Mechanobiology Laboratory (CBML) is a shared resource in the Roy J. Carver Department of Biomedical Engineering with a mission to enhance teaching, training, and research in the field of biomechanics and mechanobiology. Biomechanics and mechanobiology involve the study of how cells, fluids, tissues, and organs respond to physical forces. The lab contributes to the understanding of cardiovascular disease, cancer metastasis, wound healing, medical device function, and stem cell therapies.

The lab houses a planar biaxial stress-strain test apparatus, a pulse duplicator apparatus for characterizing blood flow through mechanical and tissue heart valves, a micron-resolution particle image velocimetry (micro-PIV) system for quantifying flow and particle dynamics at the microscale, a stent crimper for characterizing vascular stent designs, a multimode plate reader for quantifying cell activity and extracellular matrix (ECM) remodeling, a lyophilizer for quantifying elastin and collagen content in soft tissue samples, a micromanipulator for performing micropipette aspiration studies, and a controlled microscope room for imaging live cells over long durations. The lab is used for courses in cardiovascular biomechanics and cellular engineering, other elective courses, and senior design projects.

Carver Cellular Engineering Laboratory

This laboratory trains students in cell culture and biochemical analysis techniques as a foundation for future work in quantitative cell-based studies. Students learn basic cell culture techniques, protein and nucleic acid analysis, as well as techniques for studying the effects of engineered materials on cellular systems.

Major equipment in the lab includes laminar flow hoods, cell culture incubators, centrifuges, spectrophotometers, an ultracold freezer, protein and nucleic acid electrophoresis equipment, thermal cyclers, microscopes, an automated microplate reader, and various support apparatus used in cell-based studies. This teaching lab is used for the courses, BME:2400 Cell Biology for Engineers and BME:5421 Cell Material Interactions.

Carver Medical Device Design Laboratory

The Carver Medical Device Design Laboratory provides a space for students to gather to collaborate on the design of medical implants, fixtures for testing such implants, and software for modeling, analyzing, and optimizing the function of these devices. Space and equipment are provided for progressing from a back-of-the-napkin sketch to a finalized computer-aided design (CAD) model and through multiple iterations of physical prototypes.

A variety of tools and equipment are available such as a micro 24 laser system, a benchtop milling machine, a bandsaw and lathe, a soldering station, an expanded plasma cleaner, a micro pulse arc welder, and five computer workstations. The lab was established to serve students with an interest in medical device design and in required and elective courses in the areas of biomaterials, biomechanics (cardiovascular and musculoskeletal), and the senior design sequence.

Senior Design Laboratory

The Senior Design Laboratory provides a collaborative atmosphere for student groups as they create working prototypes. It has computer workstations, project workspace, and storage space for the development of senior design projects. In addition, a variety of tools and equipment are available in the lab, including electronics measurement devices, soldering tools, Dremel tools, miscellaneous sample medical equipment, and other resources for students. It is used by students taking BME:4910 Biomedical Engineering Senior Design I and BME:4920 Biomedical Engineering Senior Design II.

Systems, Instrumentation, and Data Acquisition Laboratory

The Systems, Instrumentation, and Data Acquisition Laboratory is equipped to measure biomedical variables of clinical and physiological interest, to design and build electronic instrumentation, and to conduct modeling experiments in physiology. It is used for the elective courses, BME:2200 Systems, Instrumentation, and Data Acquisition and BME:4710 Medical Device Design Studio, for biomeasurements and biological systems analysis, and senior design projects.

Research Facilities and Laboratories

Bioinformatics and Computational Biology Laboratory

The Bioinformatics and Computational Biology Center is wired for high-speed networking (100-megabit and gigabit ethernet, hardwired and wireless). It includes two dedicated Linux clusters, 126 computing systems, 178 CPUs, more than 20 terabytes of RAM, and 250 terabytes of disk space.

Computer resources include a dedicated experimental, reconfigurable computer cluster of 18 Linux systems (36 CPUs) connected with a dedicated, switched, copper Gigabit Ethernet intranet and a second dedicated computer server cluster of 16 Linux systems (32 CPUs) connected with a dedicated, switched, fiber-optic Gigabit Ethernet intranet.

An additional 78 computers are used as compute servers, web servers, database servers, file servers, workstations, laptops, and for other developmental and experimental needs.

Biomechanics of Soft Tissues Laboratory

The Biomechanics of Soft Tissues Laboratory (BioMOST) houses ViVitro Pulse duplicating left-heart simulating flow loop system, mechanical extension testers, durability testers for accelerated testing of valves, flow loop with programmable pump, resistors and compliance chambers, optical micrometer, a furnace for nitinol shape memory alloy stent fabrication, and the Vascular Simulations Replicator (a portable realistic angio-suite friendly blood flow simulator). The lab also houses high-end image and data processing workstations.

Carver Laboratory for Regenerative Engineering and Translational Science

The Carver Laboratory for Regenerative Engineering and Translational Science is a state-of-the-art multi-investigator wet laboratory devoted to cell and tissue-based research. The laboratory is a transformational space that enables the biomedical engineering faculty and students (graduate and undergraduate research assistants) to interact with one another by bringing together investigators with similar yet varying fields of study, all with an emphasis on cellular and tissue engineering. The laboratory has a direct impact on training graduate students and contributes to numerous research projects across campus. The laboratory has been designed to be responsive to current and future needs; to encourage interaction among engineers, scientists, and physicians from various disciplines; to help recruit and retain

qualified faculty and students; and to facilitate partnerships and development.

The laboratory is equipped with major equipment to synthesize and characterize biomaterials, including a chemical fume hood, rotary evaporator, freeze-dryer, rheometer, and several light-based curing systems. To enable growth, maintenance, and characterization of mammalian cells, the lab also houses biosafety cabinets, incubators, a transfection system, automated cell counter, low-volume spectrophotometer, microplate reader, thermal cyclers, quantitative polymerase chain reaction (PCR) instruments, electrophoresis units, and a gel imaging system. The dedicated microscope room includes an atomic force microscope and several fluorescent microscopes, which are equipped with confocal and live cell imaging capabilities.

Collaborative Computational Laboratory

The Collaborative Computational Laboratory is a shared research computing resource. Research focus areas include computational fluid dynamics, medical image analysis, magnetic resonance imaging, machine learning, and artificial intelligence. Desktop computers, compute servers, and access to the campus research data storage and high-performance computing cluster are available through the lab.

Computational Biomolecular Engineering Laboratory

The Computational Biomolecular Engineering Laboratory, located in the Bowen Science Building, is a collaboration between the Roy J. Carver Department of Biomedical Engineering and the Department of Biochemistry. It includes eight workstations used to simulate biomolecular phenotypes in the context of understanding the genetics of hearing loss, rare renal diseases, and vision loss. Heavy use is made of the University of Iowa Argon compute cluster, including dedicated availability of 30 compute nodes, 50 Nvidia graphics processing units (GPUs), and 100 terabytes of backed-up storage. The lab distributes a high performance physics-based molecular simulation code called Force Field X (FFX) that is being used to produce a family of protein structures for genes associated with hearing loss, available in the Deafness Variation Database. The software also is being used to predict how pharmaceuticals crystalize (i.e., into drug tablets) and to understand their thermodynamic properties (e.g., solubility).

Large Scale Digital Cell Analysis Laboratory

The Large Scale Digital Cell Analysis System (LSDCAS) is an automated microscopy system designed to perform non-perturbing live cell imaging. LSDCAS has been used in studies designed to determine mechanisms of cell death following treatment with anti-cancer therapies. Current studies involve the adaptation of the LSDCAS technology toward the development of automatic single-cell analysis techniques to be used in drug discovery. LSDCAS consists of two computer-controlled inverted Hoffman modulation contrast microscopes outfitted with environmental control chambers, motorized stages, shutters, focusing systems, and high-resolution digital camera systems.

LSDCAS is housed in a dedicated microscopy room that provides the dark environment necessary for systems that operate around the clock automatically recording cell growth and other phenomena. LSDCAS data is stored and analyzed

using a data center consisting of an 8 processor Linux server with 16 gigabytes of RAM, a 30 terabyte hardware RAID storage system, and a 30 terabyte robotic tape backup system. Web application software and many other programs provide robust analysis capabilities for the large variety of data produced by the system. The LSDCAS code base contains over one hundred thousand lines of program code developed over the past two decades to provide automatic single cell analysis capabilities of general interest in cell biology. In addition, the lab has equipment and technologies generally used in cell and molecular biology, including protein and nucleic acid gel electrophoresis analysis systems, real-time reverse transcription polymerase chain reaction (RT-PCR) systems, cell culture incubators, a laminar flow cell culture biosafety cabinet, a chemical fume hood, -80°C freezer, other refrigerators and freezers, an ice machine, water purification system, autoclave, and many other tools, reagents, and devices.

Orthopedic Biomechanics Laboratory

The Orthopedic Biomechanics Laboratory occupies 20 rooms on the ground floor of Westlawn. It is configured primarily for macroscopic-level physical testing of musculoskeletal constructs (e.g., bones, articular joints, orthopedic implants) and for corresponding computational modeling. The physical testing area includes a multipurpose wet lab, a multipurpose dry lab, a surgical preparation room, a mechanical testing room, a machine shop, and a specimen storage area. The computational modeling area is arranged around eight separate workstation seats in two adjoining partially partitioned areas. Adjacent to these core operational areas are offices for faculty, research staff, students, and fellows; a secretarial/reception area; a conference room; and a library.

Regenerative Engineering Laboratory

The Regenerative Engineering Laboratory inhabits over 1,000 square feet of the Pappajohn Biomedical Discovery Building. The lab is fully equipped to support research at the interface of materials, engineering, and cell biology. The Biosafety Level 2 (BSL-2) cell culture room in the lab has two Panasonic cell culture incubators, two Thermo Scientific biological safety cabinets, a fluorescent microscope, 37°C bead bath, and centrifuges. A separate four-color fluorescence microscope also is available. The fully automated Leica DMI6000 captures four-color fluorescence images at up to 63x magnification. A built-in z-motor and post-acquisition analysis software allows for the capture and analysis of three dimensional z-stacks.

The chemistry part of the lab is equipped for biodegradable particle synthesis and analysis. In addition to a fume hood, sink, and laboratory counters, the lab has an analytical grade Mettler Toledo XS64 balance, water bath sonicator, homogenizer, syringe pumps, and a LabConco -86°C Cascade Lyophilizer. To support long term storage of the reagents required for the molecular biology and chemistry portions of the lab, a variety of cold storage options are available including 4°C, -20°C, -80°C, and -130°C.

Spine Biomechanics Research Laboratory

The Spine Biomechanics Research Laboratory is equipped for interdisciplinary research. The lab's MTS Bionix servohydraulic testing equipment (with extended columns) permits application of uniaxial tension or compression together with axial torsion under displacement or load control. The lab also has a fully automated three-dimensional motion measuring system. These devices are used to test mechanical

properties of biomechanical joints and tissues, and for biomechanical evaluation of the performance of surgical treatment modalities. Other equipment includes digital cameras, surgical tools, and sensors (i.e., linear variable differential transformers, six-degrees-of-freedom load cell, pressure transducers, digital inclinometers).

A biaxial biomechanical culture system is available for application of controlled compression and/or shear forces onto the intervertebral disc during culture in order to investigate the disc's biological responses to mechanical loads. This culture system is used in conjunction with an incubator in which cells and tissues can be cultured. Basic equipment for histology and immunohistochemical analyses includes a microtome, ovens, a microscope, and glassware for chemical processes.

Courses

Biomedical Engineering Courses

These advanced courses are offered infrequently depending on the research focus of currently enrolled graduate students: BME:6610 Spine Mechanics, BME:6415 Advanced Biomechanics and Modeling of Soft Tissues, and BME:6110 Mechanics of Cells and Cellular Systems.

For current and planned course offerings, visit the University's MyUI website.

BME:0000 Biomedical Engineering Internship/Co-op 0 s.h.

Biomedical engineering students participating in the Cooperative Education Program register for this course during work assignment periods; registration provides a record of participation in the program on the student's permanent record. Requirements: admission to Cooperative Education Program.

BME:1010 First-Year Forum 1 s.h.

Presentations by faculty, graduate students, collaborators from the Carver College of Medicine, and Colleges of Dentistry and Law; may include visits to laboratories and industries.

BME:2010 Professional Seminar: Biomedical Engineering 1 s.h.

Professional aspects of biomedical engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Requirements: sophomore or higher standing.

BME:2200 Systems, Instrumentation, and Data Acquisition 4 s.h.

Introduction to engineering art and science of modeling, acquisition, and analysis of data collected from living systems; modeling of physiological and biological systems; concepts of analog circuit design, with emphasis on circuits for collecting data for biomedical applications using operational amplifiers, active filters, conversion, and interface to microcomputers; patient safety; clinical circuits; analysis of data using time domain and Fourier domain techniques and models; time domain sampling, and Nyquist sampling theorem. Prerequisites: ENGR:2120. Corequisites: HHP:3500, and BIOS:4120 or STAT:3510.

BME:2210 Bioimaging and Bioinformatics 4 s.h.

Introduction to bioinformatics and biomedical imaging; computer algorithms, machine learning, databases and SQL, the web and web servers, ethics, computer security, genome technology, public warehouses of biological data; medical imaging hardware and software for acquisition and analysis of medical images, especially those collected from X-ray, CT, MR, and ultrasound systems; medical imaging system physics, including interaction of energy with tissue, concepts of image spatial and temporal resolution; applications of filtering, enhancement, and image processing for analysis of medical images. Prerequisites: ENGR:1300 and BIOL:1411. Corequisites: BIOS:4120 or STAT:3510.

BME:2400 Cell Biology for Engineers 3 s.h.

Introduction to fundamental concepts in quantitative cell biology from an engineering perspective. Prerequisites: BIOL:1411. Corequisites: BIOS:4120 or STAT:3510.

BME:2500 Biomaterials and Biomechanics 4 s.h.

Introduction to mechanics and materials in biological systems; principles of mechanics (stress, strain, motion, fluid flow) presented and used to characterize behavior of biological entities (tendon/ligament, bone and cartilage, blood, blood vessels, heart); principles of material science; role of biomaterials (metals, polymers, ceramics) in medical devices. Prerequisites: ENGR:2110. Corequisites: HHP:3500, and BIOS:4120 or STAT:3510.

BME:2710 Engineering Drawing, Design, and Solid Modeling 3 s.h.

Introduction to methods and principles used by engineers to define and describe geometry and topology of engineered components; use of Parametric Technology's Creo Pro (formerly ProEngineer) 3-D CAD software; emphasis on elements of design; basic commands used in parametric design to develop spatial visualization skills and the ability to create and understand 3-D solid parametric design for assembly and 3-D drawing documentation; creation of 3-D assemblies and detailed drawings from art of design to part, utilization of solid modeling techniques.

BME:3010 Leadership and Resourcefulness 1 s.h.

Development of leadership skills and resourcefulness for real-world professional work and life. Requirements: completion of BME:1010 and two semesters of BME:2010.

BME:3200 Systems Biology for Biomedical Engineers 3 s.h.

Introduction to computational approaches relevant to systems biology; although systems biology is comprised of both experimental and computational aspects, the focus is on the latter, providing an introduction to the use of deterministic models to study biochemical reaction networks; computational models will be constructed using Wolfram Mathematica to provide insights into the complexities of biochemical systems and also serve to acquaint students with the types of modeling approaches used to study these systems. Prerequisites: BME:2400 and BME:2200.

BME:3710 Medical Device Design: The Fundamentals 3 s.h.

Introduction to medical device design process; project-based; development of prototyping and fabrication skills needed for engineering design projects, safety, communication, and teamwork; focus on physical rehabilitation science and assistive technologies; preparation for senior design course sequence. Prerequisites: BME:2500 and BME:2710. Corequisites: BME:4010. Requirements: junior standing.

- BME:3998 Individual Investigations: Biomedical Engineering** **arr.**
Individual projects for biomedical engineering undergraduate students, such as laboratory study, engineering design projects, analysis and simulation of an engineering system, computer software development, research.
- BME:4010 Biomedical Engineering Design Seminar** **1 s.h.**
Students develop an awareness of design with emphasis on biomedical applications; principles and tools of user-centered design; basics of intellectual property (IP); skills for use in senior design and beyond. Requirements: junior standing.
- BME:4310 Computational Biochemistry** **3 s.h.**
Introduction to biomolecular modeling and computer simulation techniques; biomolecular structure and molecular driving forces; principles of structural optimization and conformational sampling; applications to biomolecular phenotypes; scripting and molecular visualization in PyMol, setting up and running molecular dynamics simulations using VMD and NAMD, performing refinement of X-ray diffraction data sets using Phenix, and executing Poisson-Boltzmann electrostatic calculations using APBS. Prerequisites: (MATH:1560 or MATH:1860) and CHEM:1120. Recommendations: BIOC:3110 or BIOC:3120. Same as BIOC:4310.
- BME:4314 Introduction to Synthetic Biology in the Lab** **4 s.h.**
Introduction to theory and practice of large-scale design goals of synthetic biology in which various types of DNA instructions, known from decades of research and discovery on specific biological systems, are taken out of context and used to execute various novel tasks designed to solve real-world problems; basic laboratory instruction in standardized construction techniques for stringing together off-the-shelf DNA components that are then introduced into organisms capable of executing the instructional set; controlled experiments to investigate the degree of variability exhibited by engineered genetic constructs. Prerequisites: BIOL:1411. Same as BIOL:4314.
- BME:4710 Medical Device Design Studio** **3 s.h.**
Intermediate medical device design geared towards electro-mechanical design and techniques; builds on foundational knowledge acquired in BME:3710 and BME:2200; focus on advanced prototyping skills including solid modeling, proper electrical component selection, integrating electrical components into hardware design, and testing electro-mechanical device against industry standards. Prerequisites: BME:2200 and BME:2500 and BME:2710 and BME:3710.
- BME:4910 Biomedical Engineering Senior Design I** **4 s.h.**
Individual or group work on a creative design project involving current problems in biomedical engineering; interdisciplinary projects involving biomedical engineering and health sciences faculty members; first semester of a year-long senior capstone design project. Prerequisites: (BIOS:4120 or STAT:3510) and BME:4010. Requirements: senior standing.
- BME:4920 Biomedical Engineering Senior Design II** **4 s.h.**
Second semester of a year-long senior capstone design project begun in BME:4910. Prerequisites: BME:4910.
- BME:5010 Seminar in Biomedical Engineering** **0 s.h.**
Presentation of recent advances in biomedical engineering. Requirements: graduate standing.
- BME:5101 Biomaterials and Implant Design** **3 s.h.**
Introduction to material and mechanical considerations underlying a broad range of medical implants; emphasis on understanding factors involved in orthopedic device design; major classes of biomaterials; considerations that underlie implant design, use, failure; contemporary areas of biomaterials and implant development. Prerequisites: ENGR:2750 and BME:2500.
- BME:5200 Biomedical Signal Processing** **3 s.h.**
Application of signal processing methods (e.g., Fourier, Laplace, z-transforms) to biomedical problems, such as analysis of cardiac signals, circadian rhythm, the breathing cycle; computer simulation lab. Same as IGPI:5212.
- BME:5210 Medical Imaging Physics** **3 s.h.**
Physics and data acquisition techniques of major medical imaging modalities (X-ray, CT, MR, ultrasound, PET, SPECT); physical interactions of energy with living tissue; principles and methods for acquiring imaging data and subsequent image construction; how individual modalities influence image quality; MATLAB programming required. Second in a medical imaging sequence. Prerequisites: BME:2200 and BME:2210. Same as ECE:5470, IGPI:5206.
- BME:5251 Advanced Biosystems** **3 s.h.**
Biological systems unique to systems analysis; operation under nonequilibrium conditions; tools for systems analysis developed from models of systems at equilibrium (i.e., mechanical systems); fundamental difference between biological and mechanical systems that impact systems analysis; expand knowledge of linear systems and begin work with nonlinear systems; various modeling and analysis approaches useful in biomedical and biomedical engineering research. Prerequisites: BME:2200. Same as IGPI:5251.
- BME:5320 Bioinformatics Techniques** **3 s.h.**
Informatics tools and techniques applied to modern problems in biomedicine and basic life sciences; common tools, experience applying tools in contemporary problem settings; genomics and genetics, how to sequence a genome, transcription and expression, SNPs, Perl, BioPerl, Perl modules, Ensembl API, BLAST/BLAT, NCBI, UCSC, Ensembl Genome browsers, linkage, association, disease gene identification. Prerequisites: BIOL:1411 and (ENGR:2730 or CS:2110 or CS:5110). Same as ECE:5210, IGPI:5321.
- BME:5330 Computational Genomics** **3 s.h.**
Introduction to computational methods used in genome analysis and functional genomics; biological sequence analysis, sequence database search, microarray data analysis, biological network analysis; in-depth coverage of principal genome science challenges and recent solutions. Prerequisites: (BIOS:4120 or STAT:3510) and (CS:5110 or ENGR:1300). Recommendations: completion of BME:5320. Same as BIOL:5320, ECE:5220, GENE:5173, IGPI:5330.
- BME:5340 Contemporary Topics in Biomedical Engineering** **3 s.h.**
New and emerging areas of biomedical engineering and related fields; specific content varies.
- BME:5421 Cell Material Interactions** **3 s.h.**
Current thought and techniques in the engineering and assessment of biomaterials. Prerequisites: BME:2400.

BME:5430 Biotransport 3 s.h.

Energy, mass, and momentum transport in living systems; processes essential for understanding how physiological systems function from molecular level through scale of tissues and organs; fluid mechanics and physiological flows, mass transport, biochemical kinetics and reactions, bioheat transfer; conservation laws; various biological applications. Prerequisites: BME:2500.

BME:5435 Systems Biology for Biomedical Engineering 3 s.h.

Although systems biology is comprised of both experimental and computational aspects, focus is on computational aspects; introduction to deterministic models of biochemical reaction networks; development and application of mathematical models of reaction networks using systems of nonlinear ordinary differential equations; numerical techniques employed to study system stability and perform simulations in realistic biological contexts. Prerequisites: BME:2400 and BME:2200.

BME:5441 Numerical and Statistical Methods for Bioengineering 3 s.h.

Mathematics and computation as indispensable tools needed to model and explain complex phenomena relevant to biomedical engineering problems; introduction to concepts from linear algebra, differential equations, probability and statistics, nonlinear model regression, optimization, numerical integration, and other numerical methods, all using Matlab. Prerequisites: MATH:2560 and MATH:2550.

BME:5445 Stem Cells in Regenerative Engineering 3 s.h.

Discovery and history of stem cells, how they are defined and grouped, and various techniques for their isolation, creation, culture, and characterization; focus on current state of stem cells in medical research and treatment of human disease, as well as future outlook of their use; particular emphasis placed on practical knowledge that students may find useful as they pursue careers in cellular and tissue engineering. Prerequisites: BME:2400 or BIOL:2723.

BME:5451 Research Methods in Cellular Engineering 3 s.h.

Statistical approaches and principles of assays routinely used in cell engineering; design of experiments and statistical approaches commonly used to analyze biological data including t-tests and one- and two-way ANOVAs, taking into consideration the constraints of cellular engineering research; students design, execute, and analyze data collected from actual experiments; review of recently published literature and analysis of public data sets to understand how each assay and test contributes to understanding of cellular phenotype. Prerequisites: BIOL:1411 and (STAT:3510 or BIOS:4120).

BME:5510 Cardiovascular Biomechanics 3 s.h.

Mechanics—forces and motion—at the heart of the cardiovascular system; fluid and solid mechanics inherent to the motion of the heart, valves, arteries, and veins, and how they facilitate the flow of blood; how to use mechanics to understand and diagnose the severity of cardiovascular disease states and to design implants and devices. Prerequisites: BME:2500.

BME:5520 Cardiovascular Fluid Mechanics 3 s.h.

Anatomy and physiology of the human circulatory system, pressure-flow relationship in arteries, elastic properties of the arterial wall, steady and pulsatile flow dynamics, flow dynamics of human heart valves, flow dynamics past valve prostheses, fluid mechanical measurements in circulation, relationship between fluid mechanics and diseases in human circulation. Prerequisites: BME:2500 and BME:5510.

BME:5530 Design of Circulatory Implants and Artificial Organs 3 s.h.

Exploration of current innovations and new technologies; examination of various devices currently on the market from a standpoint of design variables and objectives (i.e., stents, heart valves, dialyzers, VADs, artificial organs); biomedical engineers' vital role in design and improvement of these implants. Prerequisites: BME:2500 and BME:5510.

BME:5540 Quantitative Studies of Respiratory and Cardiovascular Systems 3 s.h.

Quantitative physiological aspects of respiratory and cardiovascular systems; classical models of these systems are considered including lumped element models, branching tree structures, and distributed parameter models to predict wave propagation in compliant walled tubes filled with compressible or incompressible fluids; development of extensive computer models to simulate the behavior of these systems in frequency- and time-domains, under various conditions of health and disease. Prerequisites: BME:2200 and HHP:3500.

BME:5550 Cardiovascular Tissue Mechanics 3 s.h.

Solid mechanics principles applied to understand behavior of tissues in the cardiovascular system; mechanical properties of ventricles, valves, and blood vessels, their normal function, how they are affected by disease states; solid mechanics of tissue-prosthesis interactions. Prerequisites: ENGR:2750 and BME:2500 and BME:5510.

BME:5610 Musculoskeletal Biomechanics 3 s.h.

Principles of solid mechanics applied to analytical, experimental investigation of biological systems; emphasis on applications in kinesiology of human musculoskeletal system. Prerequisites: BME:2500 and ENGR:2750.

BME:5620 Introduction to Applied Biomedical Finite Element Modeling 3 s.h.

Introduction to finite element modeling as applied to biomechanics-related applications. Prerequisites: ENGR:2750 and BME:2500.

BME:5630 Kinetics of Musculoskeletal Systems 3 s.h.

Principles of kinematics; kinetics applied to analytical and experimental investigation of musculoskeletal systems; mathematical foundations for kinematic and kinetic analyses; examples of mathematical modeling of human movements. Prerequisites: ENGR:2710.

BME:5640 Ergonomics of Occupational Injuries 3 s.h.

Epidemiology, surveillance systems, ergonomics, biomechanics, physiology, psychology, legal aspects, and cost control. Prerequisites: BME:2500. Corequisites: ENGR:2750.

BME:5715 Advanced Medical Device Design Studio 3 s.h.

Continuation of BME:3710 and BME:4710; biomedical engineering project based; focus on advanced prototyping and manufacturing techniques of mechanical and electromechanical medical devices; implementation of design controls and testing to medical industry standards for quality and safety; development of project management skills and communication within a team; final course in medical device design sequence. Prerequisites: BME:2200 and BME:2500 and BME:2710 and BME:3710 and BME:4710.

BME:5720 Optimization of Structural Systems 3 s.h.

Advanced topics; optimization of structural topology, shape, and material; finite dimensional dynamic response optimization, sensitivity analysis, distributed parameter systems; projects. Same as CEE:5236.

BME:5998 Individual Investigations: Biomedical Engineering arr.

Individual projects for biomedical engineering graduate students, such as laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

BME:5999 Research: Biomedical Engineering M.S. Thesis arr.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of the requirements for the M.S. with thesis in biomedical engineering. Requirements: graduate standing.

BME:6110 Mechanics of Cells and Cellular Systems 3 s.h.

Mechanics of cells; focus on cellular mechanical properties, responses to mechanical stimuli, cellular forces and measurement, and computational tools; cellular environment considered with implication to disease pathologies and medical device design considerations.

BME:6225 Communicating Science 3 s.h.

Writing and speaking about biomedical engineering and science research; key principles of writing with clarity and cohesion; practice applying these principles on a piece of research writing students are currently working on; review of best practices for presenting research to peers and at conferences; students share their work with peers through writing and presentations.

BME:6415 Advanced Biomechanics and Modeling of Soft Tissues 3 s.h.

Application of continuum mechanics and modeling to study of biological tissues and biomaterials.

BME:6610 Spine Mechanics 3 s.h.

Biomechanics applied to mechanics of the human spine; clinical aspects; state-of-the-art in spine research; basic engineering principles for biomechanical analysis. Prerequisites: BME:5610.

BME:6630 Human Response to Vibration 3 s.h.

Exploration of the human body, a complex mechanism exposed to mechanical shock and vibration from many sources, under many conditions; interactions and applicable exposure standards, effects of whole-body and hand-arm vibration. Requirements: graduate standing in College of Engineering or College of Public Health.

BME:7999 Research: Biomedical Engineering Ph.D. Dissertation arr.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for Ph.D. with thesis in biomedical engineering.

Biomedical Engineering, B.S.E.

Educational Objectives

The department provides undergraduate students with a contemporary education in a multidisciplinary field of engineering. Its objective is to produce graduates who:

- advance the biomedical field through the responsible analysis and design of devices, systems, processes, and policies that improve human health;
- pursue a wide range of career options, including those in industry, academia, and medicine; and
- collaborate on multidisciplinary teams and become leaders in their chosen field.

Requirements

The Bachelor of Science in Engineering requires a minimum of 128 s.h. Students must have a g.p.a. of at least 2.00 on all college work used to satisfy degree requirements as well as on all work undertaken at the University of Iowa.

The major in biomedical engineering builds on the foundation provided by the B.S.E. core requirements, preparing students for the challenges and opportunities associated with careers in the profession.

The program has been designed carefully to enable students to satisfy the entrance requirements of the Graduate [p. 1536] College. Students whose choice of electives includes a three-course sequence in organic chemistry, an additional biology course, and a biochemistry course may satisfy entrance requirements of the Carver College of Medicine [p. 1658], the College of Dentistry [p. 1239], or the allied health sciences.

All engineering students complete the B.S.E. core requirements for the Bachelor of Science in Engineering [p. 1428].

Biomedical engineering students must choose a track, which constitutes the elective focus area for the biomedical engineering major. They may choose one of four preapproved tracks—bioimaging, bioinformatics, biomechanics and biomaterials, and cellular engineering. Each track may be designated pre-medicine by taking the necessary track electives. Each approved track has a group of four required courses and a list of suggested electives.

Tracks

Bioimaging Track

Bioimaging represents the acquisition, processing, and visualization of structural or functional images of living systems. Medical imaging and image processing are integral to the extraction of anatomical and biological information from the systems level down to the molecular level with the goal of clinically seeking to reveal, diagnose, or examine diseases, as well as to the study of normal anatomy and physiology.

Bioinformatics Track

Bioinformatics is an interdisciplinary field that develops methods and software tools for modeling and understanding biological data and systems that are typically represented

by large amounts of data. Bioinformatics is a combination of computer science, statistics, informatics, and engineering to analyze and interpret biological and genomic data. It is used for the identification of candidate genes to better understand the genetic basis of disease, unique adaptations, and differences between populations.

Biomechanics and Biomaterials Track

Biomechanics is the study of structure and function. It is the application of principles from classical mechanics to problems in biological systems. This track emphasizes cardiovascular and/or musculoskeletal biomechanics. The study of biomaterials plays an important role in the design of implants and surgical instrumentation for both cardiovascular and musculoskeletal applications.

Cellular Engineering Track

Cellular engineering involves the application of engineering principles to problems in cellular and molecular biology, particularly as they relate to human health. The goal of this track is to equip students with the quantitative tools necessary to understand, manipulate, and control cellular and subcellular processes for a range of biomedical applications, including those related to stem cells, tissue engineering, and regenerative medicine.

For details about tracks and their requirements, visit biomedical engineering Tracks on the department's website.

Combined Programs

B.S.E./M.S.

The College of Engineering offers a combined Bachelor of Science in Engineering/Master of Science for biomedical engineering undergraduate students who intend to earn a M.S. in biomedical engineering. Students admitted to this program are allowed to apply three engineering courses (9 s.h.) towards both the B.S.E. and M.S. degree requirements, take an additional 3 s.h. of graduate coursework before completing their B.S.E., and attend and participate in the departmental graduate seminar. Students may begin to work on their coursework or master's thesis starting as early as the summer following the junior year of undergraduate studies.

Students applying to the B.S.E./M.S. program in biomedical engineering must meet the following criteria at the time of application:

- a minimum of 80 s.h. completed towards their B.S.E. degree,
- a cumulative g.p.a. of 3.50 or higher, and
- identification of a thesis or project mentor.

B.S.E./M.S. in Electrical and Computer Engineering

B.S.E. students majoring in biomedical engineering who are interested in earning a Master of Science in electrical and computer engineering may apply to the combined B.S.E./M.S. program offered by the College of Engineering. The combined program permits students to count a limited amount of credit toward the requirements of both degrees. See the M.S. in electrical and computer engineering [p. 1497] in the Catalog.

B.S.E. (Biomechanics and Biomaterials Track)/M.S. in Occupational and Environmental Health (Industrial Hygiene Subprogram)

B.S.E. students majoring in biomedical engineering in the biomechanics and biomaterials track who are interested in earning a Master of Science in occupational and environmental health with an industrial hygiene subprogram may apply to the combined B.S.E./M.S. program offered by the College of Engineering and the College of Public Health. The combined program permits students to count a limited amount of credit toward the requirements of both degrees, enabling them to begin the study of public health before they complete the bachelor's degree. See the M.S. in Industrial Hygiene—Undergrad to Grad information on the Department of Occupational and Environmental Health (College of Public Health) website.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Degree Application: apply on MyUI before deadline
(typically in February for spring, September for fall)

Hours	16
Total Hours	134

- a Enrollment in math courses requires completion of a placement exam.
- b Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
- c Enrollment in chemistry courses requires completion of a placement exam.
- d 1 s.h. does not count toward 128 s.h. total required for graduation.
- e Typically this course is offered in fall and spring semesters. Check MyUI for course availability since offerings are subject to change.
- f Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
- g Typically this course is offered in fall, spring, and summer semesters. Check MyUI for course availability since offerings are subject to change.
- h Courses with prerequisites; students should complete a prerequisite waiver form.
- i Students may select a course from all GE CLAS Core categories except Rhetoric, Quantitative or Formal Reasoning, and Natural Sciences.
- j Two Track Electives must be Engineering topics courses.
- k A full list of approved course subjects can be found on the College of Engineering General Education Component website.
- l Choose from Engineering Electives (Other Suggestions) or courses not chosen from Engineering Topics
- m Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>

Career Advancement

B.S.E. graduates with a major in biomedical engineering may pursue career opportunities in biomedical industries, such as design and development of biomedical instrumentation, diagnostic aids, life support systems, prosthetic and orthotic devices, and man-machine systems; or they may pursue traditional career opportunities in industry, such as those rooted in mechanical or electrical engineering disciplines. Other career options are available in government (Food and Drug Administration, Environmental Protection Agency, National Institutes of Health, Veterans Affairs). Some biomedical engineering graduates elect to continue formal education in engineering, medicine, or law. On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

Engineering Career Services develops and promotes experiential education and professional opportunities for students in the College of Engineering. Professional staff coordinate the college's co-op and internship program, engage in employer outreach, and provide opportunities for students to network with employers, including an engineering career fair each semester and other programming related to career development.

Engineering Career Services also offers individual advising and class presentations on résumé and cover letter preparation, job and internship search strategies, interviewing skills, and job offer evaluation.

Biomedical Engineering, M.S.

Graduate study in biomedical engineering prepares students to use contemporary methods at an advanced level during a professional career in engineering design, development, and research.

Each student's course of study is based on individual background, career objectives, and sound academic practice.

An individual program for each student may be developed from courses offered by the Roy J. Carver Department of Biomedical Engineering and other departments, especially mechanical engineering, electrical engineering, physiology, mathematics, and biological sciences. Students who want a more general program may combine emphases, while those who want some specialization in a particular field can achieve their goals through the combination of departmental courses and appropriate electives from other departments in the College of Engineering and the University.

Requirements

The Master of Science program in biomedical engineering requires a minimum of 30 s.h. of graduate credit, with or without thesis. Students who choose the nonthesis program must earn at least 6 s.h. of credit in courses numbered 5000 or above. Those who choose the thesis program may count no more than 6 s.h. of thesis research and writing credit toward the degree. Students must maintain a cumulative g.p.a. of at least 2.75 in all work for the degree. The M.S. may be a terminal degree or a step toward the Ph.D.

A tentative plan of study for each student is determined through consultation with an advisor. An M.S. committee of at least three graduate faculty members, including at least two on the biomedical engineering faculty, is appointed by the dean of the Graduate College. A student's plan of study is reviewed by the committee before the student has completed 18 s.h. of coursework. The plan of study then is submitted for review to the department chair. All students must successfully complete the final examination administered by their committee.

All M.S. students (thesis or nonthesis) must successfully complete the Graduate Core Courses as part of their graduate curriculum. Students are expected to complete them during their first year of study. Additionally, students are required to complete 18 s.h. of graduate-level coursework in the College of Engineering over the course of their studies. B.S./M.S. fast track students may include courses taken during year four and/or year five.

Graduate Core Courses

Code	Title	Hours
ENGR:7270	Engineering Ethics	1
HHP:3500	Human Physiology	3
ME:5113	Mathematical Methods in Engineering (or equivalent graduate mathematics course; approval of academic advisor required before registering)	3

Depending upon a student's performance in Graduate Core Courses and the nature of their research project, the student's

examining committee may specify additional coursework to be completed to satisfy the Graduate Core Courses requirement.

Graduate Core Courses may be substituted by other equivalent courses at the discretion of the student's examining committee. Equivalent coursework taken as part of a student's undergraduate or graduate studies prior to starting the M.S. program at the University of Iowa may satisfy one or more of the Graduate Core Courses requirements. Students who wish to request a substitution or a waiver of HHP:3500 Human Physiology must submit a Core Course substitution or waiver form. Forms may be obtained from the graduate program coordinator.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Applicants who have earned a baccalaureate or postbaccalaureate degree in engineering or in the mathematical or physical sciences with a g.p.a. of at least 3.00, and who have a combined verbal and quantitative score of 310 on the Graduate Record Examination (GRE) General Test are eligible to be considered for admission to the Master of Science program.

Reference letters, research interests, previous graduate grade-point average, and other factors may be considered in admission decisions.

Financial Support

Research assistant positions are available on a variety of research projects, and a limited number of teaching assistant positions may be available. Selection of recipients is usually based on scholastic achievement and research interest. These awards may be made on a semester, academic year, or calendar year basis. Awards and reappointments are competitive and are based on a student's potential contribution to the teaching and research goals of the department. Students who fulfill their research assistant responsibilities and continue to make satisfactory progress toward their degree objective receive preference in new awards.

Career Advancement

Biomedical engineers with M.S. degrees can pursue career opportunities in the health care industry in the fields of biomedical devices, diagnostic equipment, and software. Graduates have started careers in research, design, development, sales, and entrepreneurship, and advance to administrative and leadership positions in their organizations. Graduates also have careers with health care providers such as in hospitals, or used their biomedical engineering expertise to advance careers in medicine and law. Faculty mentors assigned to graduate students aid in their professional development. Students are exposed to opportunities through seminar speakers who have relevant expertise that are invited to campus.

The Graduate College offers numerous career advancement opportunities and professional development programs for graduate students. Ongoing program offerings, news, and announcements can be found under Professional Development on the Graduate College website.

Biomedical Engineering, Ph.D.

Graduate study in biomedical engineering prepares students to use contemporary methods at an advanced level during a professional career in engineering design, development, and research. Each student's course of study is based on individual background, career objectives, and sound academic practice.

An individual program for each student may be developed from courses offered by the Roy J. Carver Department of Biomedical Engineering and other departments, particularly mechanical engineering, electrical engineering, physiology, mathematics, and biological sciences. Faculty members in the department have teaching and research expertise in cardiovascular and fluid biomechanics, musculoskeletal biomechanics, biomaterials and tissue engineering, bioinstrumentation, biosystems, biomedical imaging, biological signal analysis, bioinformatics and computational biology, and other allied fields.

Ph.D. programs may center on any one of the previously described areas through the choice of appropriate coursework and research topic.

Requirements

The Doctor of Philosophy program in biomedical engineering requires a minimum of 72 s.h. of graduate work, including acceptable transfer credit. At least 42 s.h. must be earned in formal coursework taken after the B.S. is awarded, and at least 12 s.h. must be earned for research and the thesis. Students who enter with an M.S. may count a maximum of 33 s.h. of approved transfer credit toward the Ph.D., but they must earn 39 s.h. of graduate credit at the University of Iowa, including at least 12 s.h. for research and the thesis. Based on a student's research progress, examination results, or other measures, the graduate committee may require additional formal coursework to strengthen perceived areas of weakness.

All Ph.D. students must successfully complete the Graduate Core Courses as part of their graduate curriculum. Students are expected to complete them during their first year of study. Additionally, students must complete 18 s.h. of graduate-level coursework in the College of Engineering over the course of their studies. Medical scientist training program students are required to complete 12 s.h. of graduate-level coursework in the College of Engineering.

Graduate Core Courses

Code	Title	Hours
ENGR:7270	Engineering Ethics	1
HHP:3500	Human Physiology	3
ME:5113	Mathematical Methods in Engineering (or equivalent graduate mathematics course; approval of academic advisor required before registering)	3

Depending upon a student's performance in Graduate Core Courses and the nature of their research project, the student's examining committee may specify additional coursework

to be completed to satisfy the Graduate Core Courses requirement.

Graduate Core Courses may be substituted by other equivalent courses at the discretion of the student's examining committee. Equivalent coursework taken as part of a student's undergraduate or graduate studies prior to starting the biomedical engineering graduate program at the University of Iowa may satisfy one or more of the Graduate Core Courses requirements. Students who wish to request a substitution or a waiver of HHP:3500 Human Physiology must submit a Core Course substitution or waiver form. Forms may be obtained from the graduate program coordinator.

Admission to the Ph.D. program is conditional until students successfully complete a qualifying examination. The biomedical engineering faculty administers the exam and decides whether a student's performance on it is adequate for admission to the Ph.D. program.

Admission to Ph.D. candidacy requires a g.p.a. of at least 3.00 on all graduate work at the University of Iowa. Upon completion of the coursework specified in the plan of study and with the required grade-point average and the advisor's recommendation, students are admitted to the comprehensive examination by their committee.

Having satisfactorily completed these examinations, students usually have only to complete and defend their dissertation at the final examination. Requirements for the Ph.D. generally can be completed in about three years beyond the master's degree.

Combined Programs

Ph.D./M.D.

Students may work toward the Doctor of Medicine degree and a Ph.D. in biomedical engineering in a combined degree program offered by the Carver College of Medicine and the College of Engineering. Applicants must be admitted to both programs before they may be admitted to the combined degree program. See the Medical Scientist Training Program [p. 1711] (Carver College of Medicine) in the Catalog.

Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College on the Graduate College website.

Reference letters, research interests, previous graduate grade-point average, and other factors may be considered in admission decisions.

Admission to the Doctor of Philosophy in biomedical engineering is conditional until students successfully complete a qualifying examination.

Financial Support

Research assistant positions are available on a variety of research projects, and a limited number of teaching assistant positions may be available. Selection of recipients is usually based on scholastic achievement and research interest. These awards may be made on a semester, academic year, or calendar year basis. Awards and reappointments are competitive and are based on a student's potential contribution to the teaching and research goals of the department. Students who fulfill their research assistant

responsibilities and continue to make satisfactory progress toward their degree objective receive preference in new awards.

Career Advancement

Biomedical engineers with Ph.D. degrees can pursue career opportunities in the health care industry in the fields of biomedical devices, diagnostic equipment, and software. Graduates have started careers in research, design, development, sales, and entrepreneurship, and advance to administrative and leadership positions in their organizations. Graduates also have careers with health care providers such as in hospitals, or used their biomedical engineering expertise to advance careers in medicine and law. Graduates also have careers in academia or at research institutions where they advance understanding of human health. Faculty mentors assigned to graduate students aid in their professional development. Students are exposed to opportunities through seminar speakers who have relevant expertise that are invited to campus.

The Graduate College offers numerous career advancement opportunities and professional development programs for graduate students. Ongoing program offerings, news, and announcements can be found under Professional Development on the Graduate College website

Chemical and Biochemical Engineering

Chair

- C. Allan Guymon

Undergraduate major: chemical engineering (B.S.E.)

Graduate degrees: M.S. in chemical and biochemical engineering; Ph.D. in chemical and biochemical engineering

Faculty: <https://cbe.engineering.uiowa.edu/people>

Website: <https://cbe.engineering.uiowa.edu/>

Chemical and biochemical engineers combine engineering principles with knowledge of mathematics and specific sciences—chemistry, the biological sciences, and physics—to develop and operate processes that convert raw materials into products that benefit society. For example, biochemical engineers might develop and operate processes to convert switchgrass into biofuels or to mass produce an antibiotic.

Chemical and biochemical engineers engage in a wide variety of activities that benefit the global community. Fuel cells, solar energy, and biorenewable fuels (e.g., biodiesel or ethanol) fall within the realm of chemical engineering. Chemical engineering distinguishes itself from other engineering professions with its reliance on chemical reactions and physicochemical transformations to produce a wide variety of important materials and products. Biochemical engineers are involved in a wide variety of industrial biocatalytic, fermentation, and cell culture processes that generate products ranging from the high fructose corn syrup in soft drinks to recombinant human insulin.

As part of their training, chemical and biochemical engineers learn ethical design and a respect for the larger issues in any design, such as community health, employee safety, and the global implications of the design. The University of Iowa's curriculum emphasizes chemical process safety and environmentally conscious chemical engineering design.

Programs

Undergraduate Program of Study

Major

- Major in Chemical Engineering (Bachelor of Science in Engineering) [p. 1452]

Graduate Programs of Study

Majors

- Master of Science in Chemical and Biochemical Engineering [p. 1456]
- Doctor of Philosophy in Chemical and Biochemical Engineering [p. 1459]

Facilities

Undergraduate Core

Materials Science Laboratory

The Materials Science Laboratory is equipped with optical microscopes and facilities for metallographic preparation. Mechanical tensile testing instruments, heat treatment and

sintering furnaces, and hardness testing machines also are available. Teaching aids include metallography specimen kits and crystallography packages.

Required Undergraduate Laboratories

Chemical Engineering Laboratory

The Chemical Engineering Laboratory provides instruction for undergraduate students in CBE:3150 Thermodynamics/Transport Laboratory and CBE:3155 Chemical Reaction Engineering/Separations Laboratory. It is equipped for experimentation in thermodynamics, fluid flow, heat transfer, mass transfer, chemical reaction engineering, and separations. The lab includes pilot plant equipment, such as a distillation column, wiped film evaporator, shell-and-tube heat exchanger, jacketed kettle, and agitated extractor. Other equipment includes a concentric tube heat exchanger, reciprocating plate extractor, membrane gas separator, fluid friction apparatus, and heat conduction apparatus. Analytical equipment includes gas chromatographs, UV-visible spectrophotometers, polarimeters, and refractometers.

The lab is continuously updated to reflect advances at the forefront of chemical engineering technology. Additionally, a wide array of small equipment is available to support laboratory projects and demonstrations in chemical engineering courses and for use by students performing independent investigations.

Chemical Process Safety Laboratory

The Chemical Process Safety Laboratory is an integral part of CBE:3125 Chemical Process Safety. It is equipped with two MiniFlash automatic flash point testers (closed cap), an advanced reactive system screening tool (ARSST), a minimum ignition energy (MIE) apparatus, a flammability chamber, a modified Hartmann tube, a Hartmann bomb, a liquid conductivity apparatus, a powder changeability apparatus, a powder volume resistivity apparatus, a Van de Graaff generator, two high impedance electrometers, a field meter, a Faraday cage, and relief sizing software. This equipment is used in a series of experiments to demonstrate the principles of flammability, reactivity, explosions, relief valve sizing, and electrostatics relevant to industry.

Biochemical Engineering Laboratory

The Biochemical Engineering Laboratory is an integral part of CBE:3205 Introduction to Biochemical Engineering. It is equipped with two controlled New Brunswick BioFlo/CelliGen 115 bioreactors, three New Brunswick C76 Water Bath Shakers, a UV-visible spectrometer, a Thermo Scientific NanoDrop 3300 fluorospectrometer, and a YSI 2700 Select Biochemistry Analyzer. This equipment is used to study the growth and metabolism of microorganisms and recombinant protein production.

Process Control Laboratory

The Process Control Laboratory is a modern, computer-based instructional laboratory that is integral to CBE:4105 Process Dynamics and Control in Design. The lab consists of computer control of a shell-and-tube heat exchanger and a level-and-flow control process rig with state-of-the-art industrial control interfaces.

The Computer Control Laboratory offers an ensemble of learning experiences with the same equipment. Additional laboratories provide instruction in the use of process

simulators that provide analogies and better insight into the control process. Topics include determination of the gain and time constants for single-capacitance systems; determination of gain, time constant, and damping factor of second-order processes; determination of open-loop and closed-loop response to step-and-ramp changes in input for single-capacitance and multicapacitance processes; approximations of multicapacitance systems as first-order and second-order processes with dead time; analysis of instrumentation characteristics and transfer functions; tuning and optimization of feedback control parameters (P, PI, PID); system identification through frequency response methods; and determination of system stability.

Experimental arrangements in the lab are simple enough in design to be easily understood, yet complicated enough to help students appreciate system characteristics inherent in industrial processes (e.g., large time lags, error in parameter estimation).

Graduate Facilities and Laboratories

The department offers a wide variety of facilities to support and develop research activities.

Air Pollution Computational, Field, and Laboratory Studies

The department maintains extensive facilities for computational, field, and laboratory studies of air pollution, carbon cycle gases, aerosols, and nanoparticles at the Center for Global and Regional Environmental Research (CGRER). The center occupies 5,000 square feet of lab and office space on the fourth floor of the Iowa Advanced Technology Laboratories.

CGRER houses one R2 ImmersaDesk Portable Large Scale Visualization System and is linked on campus to two more R2 ImmersaDesk units.

The center's computer laboratory for environmental and spatial data analysis provides numerous Windows and UNIX workstations, sophisticated software packages, and workstations and a file server necessary to run intensive visualization programs. The network backbone is University supported with high-speed wireless throughout. A variety of digital environmental databases and an extensive library of documentation and related references are available. There are 4 Beowulf Linux clusters on site and Linux clusters of 4, 16, 18, and 20 nodes for large computations and data assimilation. CGRER retains 15 TB of redundant storage and 50 TB of total storage; local storage space is scalable and expandable. A variety of software packages and programming languages are available for data analysis and display, including ArcInfo, ArcView, NCAR Graphics, MATLAB, S-PLUS, and Vis5D, as well as geographical information software. The Esri software suite is part of a University-wide site license.

Laboratory and field equipment includes aerosol samplers, including scanning mobility particle sizers for aerosols from 3 nanometer to 1 micron with time resolution to 30 seconds; aerosol particle sizers for aerodynamic measurements of in situ particles with time resolution to 1 second; and varied condensation particle counters for measuring total particle counts. Several hygroscopic tandem differential mobility analyzers are used, as well as varied aerosol generation devices and unique aerosol inlets for relative humidity (RH) and temperature modification and control. Cloud droplet number can be measured in the lab or in the field using

a Droplet Measurement Technologies cloud condensation nuclei detector. Advanced computer control of instruments is available through LabVIEW.

Selected instruments are field deployable in a custom air-conditioned trailer. Through collaboration with the IHR—Hydroscience & Engineering, access to micrometeorology sensors, 1D and 2D elastic and Raman lidar, and gas sensors is available, including multichannel ammonia monitors.

Biochemical Engineering

Biochemical engineering laboratories provide facilities for preparation of biological media and cultivation of organisms as well as for separation and analysis of biomolecules. This equipment includes biological incubators and floor incubator shakers, agitated and airlift bioreactors, light microscopes, autoclaves, Vi-Cell cell counter, thermocycler for polymerase chain reaction (PCR) amplification of DNA, high- and low-speed centrifuges, UV-Vis spectrophotometers, a lyophilizer, biological safety cabinets, and an anaerobic glove box. Phase-contrast and epifluorescence microscopes, gel electrophoresis systems, gas chromatography units with flame ionization and electron capture detectors, and several high-performance liquid chromatography systems with refractive index and photodiode array detectors are available for characterization of microorganisms and constituent biomolecules.

Through collaborative research agreements, graduate students also have access to specialized facilities for electron microscopy, large-scale fermentation, protein structure, recombinant DNA research, and tissue culture/hybridoma; the Flow Cytometry Facility; and the High Resolution Mass Spectrometry Facility.

Biomedical Engineering

The biomedical engineering laboratories house particle technology equipment including microemulsion equipment for drug encapsulation, sonicators, benchtop scale spray dryers, laser diffraction particle sizer, zetapotentiometer; DNA preparation equipment, gel electrophoresis apparatus; interfacial stress rheometer, surface tensiometer, UV-Vis/fluorescent plate reader, high-performance liquid chromatograph, luminometer, lyophilizer, custom-built simulated cough machine, microscopes, incubators, wet chemistry equipment, rotary shakers, incubated plate shakers, autoclave, centrifuges, and laboratory computers. Cell culture and bacterial culture facilities are housed adjacent to the laboratories.

Graduate students also have access to core research facilities including the Central Microscopy Research Facility, Flow Cytometry Facility, Iowa Institute of Human Genetics, Electron Spin Resonance Facility, Nuclear Magnetic Resonance Facility, High Resolution Mass Spectrometry Facility, and the Center for Gene Therapy.

Computer Facilities

The departmental computer facilities contain a variety of graphics workstations, printers, and microcomputers. The department is supported by the college's Engineering Technology Center, which maintains a large network of high performance UNIX and Windows XP workstations along with extensive commercial and public domain software. The department also has access to the University's central research facility in high-speed vector computation. This facility has SGI Power Challenge mini-supercomputers and provides nodes for external links for access to supercomputers.

Fundamentals and Applications of Photopolymerization

The Photopolymerization Center was established to advance fundamental understanding of the kinetics and mechanisms of photopolymerizations. To this end, the center provides unique opportunities for collaborations by industrial and academic investigators to explore photopolymerization processes and develop novel applications based on photopolymerizations.

The center provides equipment and instrumentation for the characterization of photopolymerization systems on the molecular, microscopic, and macroscopic levels. Center researchers pursue understanding of fundamental photophysical and photochemical processes involved in the photoinitiation reaction, characterization of high-speed propagation and termination kinetics that lead to the polymer structure, and evaluation of material properties through the course of the photopolymerization reaction. Both radical and cationic photopolymerizations are studied with state-of-the-art experimental techniques to elucidate the complex chemical and physical mechanisms that control the initiation, propagation, and termination of the active centers.

Courses

Chemical and Biochemical Engineering Courses

CBE:0000 Chemical Engineering Internship/Co-op 0 s.h.

Chemical engineering students participating in the Cooperative Education Program register for this course during work assignment periods; registration provides a record of participation in the program on the student's permanent record. Requirements: admission to Cooperative Education Program.

CBE:1000 CBE Departmental Seminar 1 s.h.

Introduction to the profession and the department; presentations by guest speakers, visits to laboratories and industries.

CBE:1180 First-Year Seminar 1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first- or second-semester standing.

CBE:2030 Energy and Society 3 s.h.

History of energy development and use throughout the world; how energy has affected the development of human societies; societal impact of engineering advances; current state of energy consumption worldwide, including distribution of energy sources, global variations in consumption, advantages and disadvantages of current energy sources; role of fossil fuel consumption in global climate change, potential scenarios for the future of energy.

CBE:2040 Environment, Energy, and Climate Change 3 s.h.

Traditional concerns (e.g., pollution and conservation of energy resources) with clear, scientific explanations; Earth's dynamic processes and response to natural and human-induced stresses; link between energy and climate; reasons why we need to support reducing emissions and build a clean and sustainable environment.

CBE:2050 Severe and Unusual Weather 3 s.h.

Basic weather concepts behind severe weather phenomena and essential safety information; how weather events cause billions of dollars in damage and thousands of casualties; winter storms can impact half of the nation, paralyzing the transportation network with icy roads and wind driven snow; tornadoes can strike within minutes tearing apart homes; hurricanes can destroy entire communities with strong winds, heavy rain, and deadly storm surge; how understanding severe weather and knowing what to do before, during, and after an event can significantly reduce injury, deaths, and property damage. Same as CEE:2050.

CBE:2105 Process Calculations 3 s.h.

Fundamental principles of chemical process analysis, including material and energy balances for single-unit and multiple-unit processes, analysis of reactive and nonreactive systems, introduction to equations of state, thermodynamics of multiphase systems. Prerequisites: MATH:1550.

CBE:3000 Professional Seminar: Chemical Engineering 1 s.h.

Professional aspects of chemical engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Prerequisites: CBE:2105. Requirements: sophomore standing.

CBE:3020 Applied Statistics for Chemical and Natural Resources Engineering 3 s.h.

Statistical and computational (Python programming) analysis of weather and climate data, univariate and multivariate statistics, hypothesis testing, statistical forecasting, forecast verification, time-series analysis, trend analysis, and principal component analysis.

CBE:3105 Chemical Engineering Thermodynamics 3 s.h.

Applications of thermodynamic principles to chemical and physical processes; prediction of material properties; phase and chemical equilibria applied to mixtures and reacting systems. Prerequisites: ENGR:2130. Corequisites: CBE:2105.

CBE:3109 Fluid Flow 2 s.h.

Fundamentals of fluid flow, including fluid statics, fluid rheology, laminar and turbulent flow in pipes, external flow, flow through packed beds, fluidized beds, pumps and compressors, boundary layer theory, potential flow, dimensional analysis, and Navier Stokes Equations. Corequisites: CBE:2105.

CBE:3113 Heat and Mass Transfer 3 s.h.

Fundamentals of heat and mass transfer including heat exchanger design; conductive, convective, and radiative heat transfer; mechanisms of diffusional and convective mass transfer. Prerequisites: MATH:2560 and CBE:2105. Recommendations: CBE:3109.

CBE:3117 Separations 3 s.h.

Solution of industrial problems including design of distillation, extraction, absorption, adsorption, drying, membrane processes, and mechanical separations. Prerequisites: CBE:2105 and CBE:3105. Corequisites: CBE:3113.

CBE:3120 Chemical Reaction Engineering 3 s.h.

Application of chemical reaction kinetics to design of chemical reactors: batch reactors, mixed flow reactors, plug flow reactors; reversible and irreversible single reactions; parallel, series, and mixed reactions; temperature and pressure effects on reactor design; heterogeneous catalysis; transport in porous catalysts. Prerequisites: MATH:2560. Corequisites: CBE:3105. Recommendations: CBE:3113.

CBE:3125 Chemical Process Safety**3 s.h.**

Application of transport phenomena, thermodynamics, chemical kinetics to study of safety, health, loss prevention; government regulations, toxicology/industrial hygiene, relief sizing, runaway reactions, toxic release and dispersion models, source models, fires and explosions, risk assessment, hazard identification, case studies and accident investigation, incorporation of safety into design; laboratory experiments. Prerequisites: CBE:3105 and CBE:3109. Corequisites: CBE:3113.

CBE:3150 Thermodynamics/Transport Laboratory**3 s.h.**

Error analysis, propagation of errors, experimental design, data collection techniques, report writing, oral presentations, laboratory safety; laboratory investigations of thermodynamics, fluid flow, heat transfer, fluid rheology. Prerequisites: CBE:3105 and CBE:3113. Recommendations: statistics course.

CBE:3155 Chemical Reaction Engineering/Separations Laboratory**3 s.h.**

Experimental design, data collection techniques, report writing, oral presentations; laboratory investigations of chemical reaction engineering and separations; experiments with plug flow and batch reactors, distillation, evaporation, membrane separation. Prerequisites: CBE:3117. Corequisites: CBE:3120. Recommendations: STAT:2020.

CBE:3205 Introduction to Biochemical Engineering**3 s.h.**

Biochemistry, cellular biology, recombinant DNA and hybridoma technologies; emphasis on engineering aspects of biotechnology, including enzyme kinetics, cell growth kinetics, transport phenomena in bioreactors, bioreactor design, bioseparations, formulation and sterilization of growth media, commercial applications of biotechnology. Prerequisites: CBE:2105. Corequisites: CBE:3109. Recommendations: CBE:3120.

CBE:3415 Statistical and Computational Analysis of Weather and Climate Data**3 s.h.**

Statistical and computational (Python programming) analysis of weather and climate data, univariate and multivariate statistics, hypothesis testing, statistical forecasting, forecast verification, time-series analysis, principal component analysis, trend analysis, and cluster analysis. Requirements: senior or graduate standing.

CBE:3998 Individual Investigations: Chemical Engineering**arr.**

Individual projects for chemical engineering undergraduate students, such as laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research.

CBE:4105 Process Dynamics and Control in Design**3 s.h.**

Theory and application of process dynamics to the design of chemical process control systems; mathematical models of unit operations, transfer functions, feedback and feed-forward control, stability, instrumentation, digital control systems; computer methods, including simulation and commercial software use; laboratory focus on process analysis and design. Prerequisites: MATH:2560 and CBE:2105 and (CBE:3109 or CBE:3110). Corequisites: CBE:3120.

CBE:4109 Chemical Engineering Process Design I**2 s.h.**

Engineering economics of process evaluation, including time value of money and bases for cost estimation; preliminary design of chemical process plants using computer-aided engineering. Prerequisites: CBE:3109 and CBE:3113 and CBE:3117. Corequisites: CBE:3120 and CBE:3125.

CBE:4110 Chemical Engineering Process Design II**3 s.h.**

Capstone chemical engineering course; design and optimization of chemical process plants; application of process calculations, thermodynamics, kinetics, process synthesis, energy efficiency in separations, heat-exchanger network synthesis, physical property estimation, safety, computer-aided design, unit operations theory, process control, and economics. Prerequisites: CBE:4109. Recommendations: CBE:4105 and CBE:3205.

CBE:4156 Scanning Electron Microscopy and X-Ray Microanalysis**arr.**

Microscopy methods for research; all aspects of research, from sample preparation to imaging to data analysis; when to use a particular microscopy procedure; theory, operation, and application of scanning electron microscopy, scanning probe microscopy, laser scanning microscopy, X-ray microanalysis. Requirements: a physical science course. Same as ACB:4156, EES:4156.

CBE:4195 Senior Enriching Activities Seminar**0 s.h.**

Aspects of chemical engineering education, including multidisciplinary team skills, understanding the impact of engineering practice locally and globally. Corequisites: CBE:4110. Requirements: completion of enriching activity.

CBE:4410 Sustainable Systems**3 s.h.**

New and emerging concepts in sustainable systems design and assessment. Same as CEE:4107.

CBE:4420 Environmental Chemistry**3 s.h.**

Principles of general, physical, organic chemistry applied in water and air systems; emphasis on qualitative and quantitative understanding of chemical kinetics and equilibrium; acid-base reactions, complex formation, precipitation, dissolution, and oxidation-reduction reactions; organic nomenclature. Prerequisites: CHEM:1120. Same as CEE:4150.

CBE:4459 Air Pollution Control Technology**3 s.h.**

Sources, environmental and health impacts, regulations, modeling of air pollution; processes and alternative strategies for control; global climate considerations. Same as CEE:4159, IGPI:4159.

CBE:5000 Seminar in Chemical and Biochemical Engineering**1 s.h.**

Presentation and discussion of recent advances and research in chemical and biochemical engineering by guest lecturers, faculty, students. Requirements: graduate standing.

CBE:5100 Graduate Professional Development Seminar**1 s.h.**

Seminar participants work with a faculty member to select and attend eight hours of approved seminars and professional development trainings at the University of Iowa; final meeting of participants is held to share notable seminars; typical seminar series include College of Engineering lectures, departmental and research center graduate seminars, the CBE professional seminar series, offerings of the Center for Teaching and Learning. Requirements: CBE masters standing.

CBE:5104 Introduction to Literature Review and Technical Writing**3 s.h.**

Review of technical literature, how to contribute to it; produce and present orally a peer-reviewed-journal-quality review article; brainstorming, group writing, research ethics, plagiarism. Recommendations: nonthesis track graduate standing.

- CBE:5105 Introduction to Literature Review and Proposal Writing** 3 s.h.
Tools for reviewing literature, skills for critical reading of publications, training in successful proposal writing; experience drafting a proposal that can be used as a starting point for the Ph.D. comprehensive.
- CBE:5110 Intermediate Thermodynamics** 3 s.h.
Fundamental principles of thermodynamics as applied to phase equilibrium; properties of fluids, first and second law, variable composition systems, behavior of real fluids, mathematical techniques for solution thermodynamics. Requirements: CBE:3105 or ME:3040 or graduate standing. Same as ME:5210.
- CBE:5115 Transport Phenomena I** 3 s.h.
Unified treatment of momentum, mass, energy transport in chemical engineering problems; use of vector and tensor notations in expressing equations of continuity, motion, energy.
- CBE:5120 Data Science in Chemical and Engineering Systems** 3 s.h.
Theory and application of numerical methods and data driven algorithms towards understanding chemical processes; scientific computing in Python programming language; numerical solutions to differential equations; nonlinear and constrained optimization; data preprocessing and visualization; dimensionality reduction and clustering; supervised machine learning.
- CBE:5140 Mathematical Methods in Engineering** 3 s.h.
Linear ordinary differential equations, series solutions of differential equations, special functions, Laplace transforms, Fourier series, matrices, linear systems, eigenvalue problems, second-order partial differential equations. Prerequisites: MATH:2550 and MATH:2560. Same as CEE:5513, ME:5113.
- CBE:5199 Contemporary Topics: Chemical and Biochemical Engineering** arr.
Research techniques for graduate students in chemical and biochemical engineering.
- CBE:5210 Bioseparations** 3 s.h.
Unit operations used to isolate and purify biologically derived chemicals, including flocculation, filtration, centrifugation, extraction, adsorption, chromatography, precipitation, crystallization, electrophoresis and cell disruption for intracellular product recovery.
- CBE:5250 Introduction to Biocatalysis** 3 s.h.
Applications of biological catalysis in varied industries; potential of biological catalysis to address future challenges in science and engineering.
- CBE:5300 Drug Delivery Devices** 3 s.h.
Why drug delivery devices are needed and how they are regulated; review of several clinical device categories (inhalation, transdermal, implantable) and preclinical technologies on the horizon.
- CBE:5310 Polymer Science and Technology** 3 s.h.
Uses, properties of industrially important polymeric materials; polymer chemistry, polymer structure, characterization, polymer processing. Prerequisites: CHEM:2220 or CHEM:2240. Corequisites: CBE:3120.
- CBE:5315 Polymer Chemistry** 3 s.h.
Monomer reactivity and polymerization reactions; step, radical, ionic, and ring-opening polymerizations. Prerequisites: CHEM:2220.
- CBE:5390 Photopolymerization Topics** 1 s.h.
Seminars presented by faculty members, research assistants, students.
- CBE:5405 Green Chemical and Energy Technologies** 3 s.h.
Strategies for pollution prevention for chemical processes studied at macroscale (industrial sector), mesoscale (unit operations), and microscale (molecular level); case studies. Prerequisites: CBE:2105.
- CBE:5410 Electrochemical Engineering** 3 s.h.
Fundamentals of electrochemical engineering; various applications; focus on processes and systems that transform chemical energy into electrical energy (e.g., batteries, fuel cells) and vice versa (e.g., electrolyzers, oxygen generators for medical applications); electrochemical engineering in an increasingly important role in energy, chemical, environmental, and biomedical sectors.
- CBE:5412 Atmospheric Modeling** 3 s.h.
Model equations and approaches for atmospheric dynamics and chemistry; numerical methods for radiative, chemical, and aerosol rates; parameterization of subgrid-scale processes; model evaluation and inverse modeling.
- CBE:5415 Satellite Image Processing and Remote Sensing of Atmosphere** 3 s.h.
Introduction to principles of atmospheric radiation and techniques for satellite image processing; hands-on experience with data calibration, image registration and enhancement, noise filtering and (supervised and unsupervised) multi-spectral classification of satellite imageries; various satellite sensors used for monitoring of different atmospheric processes and constituents. Same as IGPI:5415.
- CBE:5417 Physical Meteorology and Atmospheric Radiative Transfer** 3 s.h.
Physical processes for weather and climate including radiative transfer, cloud and precipitation formation, and atmospheric electricity; theory of scattering by atmospheric particles (e.g., clouds, aerosols, molecules), atmospheric radiative transfer equations, and numerical techniques and tools to solve these equations. Requirements: senior or graduate standing. Same as IGPI:5417.
- CBE:5425 Atmospheric Chemistry and Physics** 3 s.h.
Principal chemical and physical processes affecting atmospheric trace gas and pollutant cycles; emphasis on atmospheric photochemistry, aerosol science, major sources, and removal processes. Corequisites: CBE:3120. Same as CEE:5115.
- CBE:5740 Engineering Principles of Drug Delivery** 3 s.h.
Fundamental concepts in drug delivery from an engineering perspective: delivery mechanisms; materials and formulations for drug delivery; drug modifications (prodrugs, PEGylation); engineering principles of controlled release and targeted delivery (nanoparticles, microparticles, polymer and lipid based systems); quantitative understanding of drug transport; significance of biodistributions and pharmacokinetic models; toxicity issues; immune responses.
- CBE:5875 Perspectives in Biocatalysis** 1-3 s.h.
Applied enzymology, protein design, structure-activity relationships, biosensor technology, microbial transformations, biodegradation of environmental pollutants. Requirements: graduate standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as BIOC:5875, CEE:5875, CHEM:5875, MICR:5875, PHAR:5875.

CBE:5998 Individual Investigations: Chemical and Biochemical Engineering arr.

Individual projects for chemical and biochemical engineering graduate students; may include laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

CBE:5999 M.S. Thesis Research: Chemical and Biochemical Engineering arr.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for M.S. with thesis in chemical and biochemical engineering. Requirements: graduate standing.

CBE:6145 Diffusive Transport 3 s.h.

Diffusive transport of heat, mass, and momentum; phenomenological laws and analogies; analytical and numerical solution techniques; inverse heat conduction; multiphase and multicomponent systems. Prerequisites: ME:5145. Same as ME:6245.

CBE:6415 Advanced Satellite and Remote Sensing of Atmosphere 3 s.h.

Cloud masking and retrieval of cloud properties from satellites, aerosol detection and retrievals, Earth radiation energy budget, land and/or ocean remote sensing, microwave remote sensing, wind retrieval, multi-sensor intercomparison and validation, optimization and inversion theory; hands-on projects.

CBE:6435 Advanced Atmospheric Radiative Transfer 3 s.h.

Theory of scattering by atmospheric particles (e.g., clouds, aerosols, molecules), atmospheric radiative transfer equations, and techniques to solve these equations for solar and terrestrial radiation; numerical experiments with Mie scattering, T-matrix calculation, and radiative transfer models.

CBE:7999 Research: Chemical and Biochemical Engineering Ph.D. Dissertation arr.

Experimental and/or analytical investigation of an approved topic for Ph.D. in chemical and biochemical engineering.

Chemical Engineering, B.S.E.

Educational Objectives

The chemical engineering program produces graduates with a strong foundation of scientific and technical knowledge who are equipped with problem-solving, teamwork, and communication skills that will serve them throughout their careers consistent with the following educational objectives. Within a few years following graduation, graduates will:

- attain careers as practicing chemical engineers in fields such as biotechnology, chemicals, computation, energy, environmental engineering, food processing, microelectronics, pharmaceuticals, or polymers/advanced materials;
- pursue advanced studies in disciplines such as business, chemical engineering, dentistry, environmental engineering, law, medicine, or pharmaceuticals; or
- assume professional leadership roles.

The following methods and strategies are used in the chemical engineering undergraduate program to achieve these program educational objectives:

- foster a unique and personalized undergraduate experience by leveraging the advantages of a small college atmosphere within a comprehensive liberal arts and research university;
- provide a diverse, inclusive, and equitable environment for all students;
- enrich the undergraduate experience through cultural diversity, international opportunities, and/or experiential learning;
- provide a solid foundation and understanding of the fundamental principles of mathematics, science, and engineering;
- provide students with experience in learning and applying tools, and analyzing and interpreting data, to solve theoretical and open-ended chemical engineering problems;
- provide students with opportunities to participate in collaborative teams;
- develop students' written and oral communication skills to a wide range of audiences;
- provide students with opportunities to design and conduct chemical engineering experiments and to design systems, components, and chemical processes to meet specific needs and constraints;
- provide a contemporary grounding in ethical and professional responsibility, including global, economic, environmental, safety, and societal impacts of engineering decisions; and
- instill the desire and the understanding of the need for lifelong learning.

Requirements

The Bachelor of Science in Engineering requires a minimum of 128 s.h. Students must have a g.p.a. of at least 2.00 on all college work used to satisfy degree requirements as well as on all work undertaken at the University of Iowa. Seminars do not count toward the 128 s.h. required for the degree.

The major in chemical engineering provides a broad education at the leading edge of technology. It emphasizes fundamental concepts, problem solving, laboratory techniques, and communication skills. The biological sciences join physics, chemistry, and mathematics as foundation disciplines for chemical engineering.

All engineering students complete the B.S.E. core requirements, which include RHET:1030 Rhetoric; ENGR:1100 Introduction to Engineering Problem Solving and ENGR:1300 Introduction to Engineering Computing; and courses in chemistry, physics, engineering mathematics and fundamentals, and the general education component. For information about the B.S.E. requirements, see Bachelor of Science in Engineering, B.S.E. [p. 1428] in the Catalog.

The sophomore, junior, and senior years emphasize chemical engineering courses such as process calculations, fluid flow, chemical engineering thermodynamics, heat and mass transfer, separations, chemical reaction engineering, chemical process safety, chemical engineering laboratories, biochemical engineering, process dynamics and control, and process design. Experience in instrumentation, analysis, and design is obtained through an integrated laboratory program. Routine use is made of computer-based data analysis, simulation, and design.

Students are required to participate in at least one enriching activity, which may include a research experience, a cooperative education or internship experience, study abroad, completion of the Certificate in Technological Entrepreneurship [p. 1535], or other approved experiences.

Chemical engineering students may gain depth of knowledge related to a career path through their selection of science, engineering, and general education electives. Several preapproved elective focus areas may help students define potential careers.

Students must select elective focus area courses according to guidelines established by the Department of Chemical and Biochemical Engineering. See "Elective Focus Area" below.

Elective Focus Area

The elective focus area (EFA) enables students to gain depth of knowledge in a career path. Students meet with their chemical engineering academic advisor to discuss career options and develop a plan for choosing electives based on their career interests. The department offers preapproved elective focus areas in biochemical engineering; business; chemical process engineering; computation, data science, and machine learning; energy and environment; entrepreneurship; oil and gas engineering; pharmaceuticals; polymers; pre-medicine; and sustainability.

Students may prefer to develop an individualized elective focus area, which is subject to approval by the department's curriculum committee. See Chemical Engineering Curriculum on the Department of Chemical and Biochemical Engineering website for detailed descriptions of preapproved elective focus areas, guidelines for tailored elective focus areas, and typical four-year study plans based on elective focus areas.

Biochemical Engineering

The EFA allows students to choose from a selection of courses that combines concepts of biology, biochemistry, and engineering. Biochemical engineers combine knowledge of these three areas to manufacture products of biological nature, including fermentation products and pharmaceuticals. Students often go on to work in the biotechnology and

pharmaceutical industries as production leaders or researchers.

Business

The EFA consists of eight core courses from the Tippie College of Business. Students gain foundational business knowledge on topics including finance, economics, accounting, marketing, law, and management. Past students have applied their integrated business and technical knowledge to many different settings ranging from manufacturing plants to consulting and to corporate offices.

Chemical Process Engineering

Process engineering is the design, optimization, and operation of systems that transform raw materials into valuable products. Process engineers are involved with products, including foods and beverages, electronic materials, metals, plastics, fuels, building materials, and pharmaceuticals. Since chemical process engineering spans many aspects of engineering, business, applied math, and science, students can choose 12 s.h. of electives from a broad selection of 3000-level engineering, math, and science courses. The EFA provides ample room for customization and opportunities to tailor to individualized interests.

Students who do not declare a specific EFA are automatically placed in chemical process engineering.

Computation, Data Science, and Machine Learning

The EFA is for students who intend to blend advanced computation and programming with their chemical engineering degree. This area is customizable based on student interest areas, and can accommodate introductory training in cyber-physical systems, remote sensing, advanced simulation, supply chain management, in silico chemistry and biology, bioinformatics, software design, next-generation controls, machine learning, and artificial intelligence.

Energy and Environment

Students who are passionate about the environment should consider this EFA. Courses prepare students to solve environmental challenges and to revolutionize energy systems. Topics include air pollution, climate change, clean and renewable energy, environmental regulations, and sustainable systems.

Entrepreneurship

The EFA allows students to focus on the process of succeeding in the world of startups, innovation, business ownership, and new products. The area is well suited for students who intend to start and operate their own business. It also serves students interested in gaining a better understanding of managing innovation in an existing business environment. The wide range of electives permits students to tailor business courses best suited to their individual interests.

Oil and Gas Engineering

Meant for students interested in pursuing careers in oil and gas engineering, the EFA explores foundational elements of chemistry, geology, petrochemical refining, and environmental science. The course plan offers several recommendations put in place by experienced advisors with petrochemical backgrounds. Often viewed as the birth of chemical engineering, the petroleum industry provides a host of challenging and lucrative opportunities for

chemical engineers. This path provides a unique and focused introduction to the field.

Pharmaceuticals

Chemical and biochemical engineering is central to the design, formulation, and manufacturing of pharmaceutical products. Students who are passionate about medical applications can align their chemical engineering skills toward a career in pharmaceuticals by choosing this EFA. The curriculum features biology, drug delivery, and the mechanisms and chemistry of drug interactions. Course options span many departments besides chemical and biochemical engineering, including biomedical engineering, biochemistry, pharmacy, and pharmacology.

Polymers

The EFA enables students to study the development of chemical compounds by polymerization, including combining small molecules into engineered networks to produce valuable plastics and other advanced materials. The program is well suited for students who intend to use their knowledge to design new materials; it also serves students interested in gaining a better understanding of the links between molecular scale structure and macroscopic scale properties.

Pre-Medicine

Concepts of chemical engineering are naturally applicable to the processes in living organisms. The EFA enables students to apply these concepts to gain a deeper understanding of the atoms and molecules that comprise living organisms, and the pathways through which they operate. This program is for students who intend to use their knowledge to gain acceptance to post-graduate education in the medical field.

Sustainability

The EFA covers the most important and current topics in environmental science, societal impacts, energy usage, and natural systems. Courses prepare students to understand and discuss these topics as they relate to chemical engineering.

Combined Programs

B.S.E./M.S. in Chemical and Biochemical Engineering

The College of Engineering offers a combined Bachelor of Science in Engineering/Master of Science for chemical engineering undergraduate students who intend to earn a M.S. in chemical and biochemical engineering. B.S.E./M.S. students may count 12 s.h. of coursework (typically advanced chemistry sequences and electives) toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the B.S.E., and they typically complete the M.S. one year later.

To be admitted to the degree program, students must have a cumulative g.p.a. of at least 3.25, and submit a letter of application and statement of purpose to the chair of the Department of Chemical and Biochemical Engineering. Visit B.S./M.S. Programs on the department's website to learn more.

B.S.E./M.S. in Civil and Environmental Engineering

Bachelor of Science in Engineering students majoring in chemical engineering who are interested in earning a Master of Science in civil and environmental engineering may apply to the combined B.S.E./M.S. program offered by the College of Engineering. The combined program enables undergraduate students to begin work on the M.S. degree while completing their B.S.E. degree. Students admitted to the program may count 12 s.h. of coursework toward both the B.S.E. and the M.S. degree requirements. They also may count an additional 3 s.h. toward the M.S. degree requirements before they have been awarded the B.S.E. degree. For more information, see the M.S. in civil and environmental engineering [p. 1476] in the Catalog.

Academic Plans

Sample Plan of Study

Sample plans represent one way to complete a program of study. Actual course selection and sequence will vary and should be discussed with an academic advisor. For additional sample plans, see MyUI.

Chemical Engineering, B.S.E.

Course	Title	Hours
First Year		
Fall		
MATH:1550	Engineering Mathematics I: Single Variable Calculus	4
ENGR:1100	Introduction to Engineering Problem Solving ^a	3
CHEM:1110	Principles of Chemistry I	4
RHET:1030	Rhetoric	4
ENGR:1000	Engineering Success for First-Year Students ^a	1
CSI:1600	Success at Iowa	0
Hours		16
Spring		
MATH:1560	Engineering Mathematics II: Multivariable Calculus	4
ENGR:1300	Introduction to Engineering Computing ^b	3
PHYS:1611	Introductory Physics I	4
MATH:2550	Engineering Mathematics III: Matrix Algebra	2
CHEM:1120	Principles of Chemistry II	4
CBE:1000	CBE Departmental Seminar ^c	1
Hours		18
Second Year		
Fall		
MATH:2560	Engineering Mathematics IV: Differential Equations	3
GE: Engineering Be Creative		3
ENGR:2110	Engineering Fundamentals I: Statics ^d	2
ENGR:2130	Engineering Fundamentals III: Thermodynamics ^d	3

CHEM:2210 or CHEM:2230	Organic Chemistry I or Organic Chemistry I for Majors	3
CBE:2105	Process Calculations ^b	3
Hours		17

Spring

CBE:3105	Chemical Engineering Thermodynamics ^c	3
CBE:3109	Fluid Flow ^c	2
CHEM:2240 or CHEM:2220	Organic Chemistry II for Majors or Organic Chemistry II	3

Degree Application: apply on MyUI before deadline (typically in February for spring, September for fall)

Hours	15
Total Hours	134

- a Typically this course is offered in fall semesters only. Check MyUI for course availability since offerings are subject to change.
- b Typically this course is offered in fall and spring semesters. Check MyUI for course availability since offerings are subject to change.
- c Typically this course is offered in spring semesters only. Check MyUI for course availability since offerings are subject to change.
- d Typically this course is offered in fall, spring, and summer semesters. Check MyUI for course availability since offerings are subject to change.
- e A full list of approved course subjects can be found on the College of Engineering General Education Component website.
- f Courses must be completed from CHEM or BIOC.
- g Science-based courses offered in Engineering or science departments outside of the College of Engineering.
- h Please see Academic Calendar, Office of the Registrar website for current degree application deadlines. Students should apply for a degree for the session in which all requirements will be met. For any questions on appropriate timing, contact your academic advisor. For more information visit <http://commencement.uiowa.edu/>

Career Advancement

Chemical and biochemical engineers work in a wide range of industries, including petroleum and specialty chemical production, polymer and plastic production, food processing, energy, microelectronics production, pharmaceutical production, biochemical processing, and environmental compliance. Potential jobs include production, process development, plant design and construction, and fundamental research. Many experienced chemical and biochemical engineers move through management ranks to high-level administrative positions. On average, 93-98 percent of graduates are employed in their field of study or pursuing advanced education within seven months of graduation.

The engineering profession is a foundation for a variety of careers in industry, medicine, law, government, and consulting. Engineering majors hold eight of the top ten spots on the list of top-paid majors for bachelor's degree graduates, according to the National Association of Colleges and Employers (NACE).
